Lord Douglas of Kirtleside, the Corporation's chairman, explained at a press conference that the failure of BEA traffic to come up to expectations was due largely to (*a*) the credit squeeze ; (*b*) the slower growth of Britain's national income than expected ; (*c*) the trouble in the Middle East. He added that the small profit of £216,770 shown in the accounts really represented the difference between a profit of £1,587,770 on the international services and a deficit of £1,371,000 on the domestic routes, which had failed by that amount to meet their reasonable share of overhead and centralized service costs. The Corporation was at present negotiating for fare increases on the internal routes.

BEA and the de Havilland Company jointly announced on Aug. 30 that the Corporation had ordered six *Comet IVB* jet airliners for operation on BEA routes in 1960. They would carry up to 100 passengers and be put into service on the longer routes— particularly in the Mediterranean area—where their superior speed could be most effectively utilized. Deliveries were expected to begin towards the end of 1959 and to be completed in the spring of 1960.

British Overseas Airways Corporation.

Operational revenue amounted to £49,004,711 (compared with £42,700,582 in 1955-56) and operational expenditure to £46,942,219 (£41,264,980), resulting in a gross profit on operating account of £2,062,492 (£1,441,602). After adjusting for the results of ancillary and subsidiary undertakings, and deducting board members' and auditors' fees, the net profit, before remuneration of capital, totalled £1,776,027, against £1,295,525 in 1955-56. The deduction of £1,472,675 for interest left a net surplus of £303,352, against £117,731 in 1955-56.

The report attributed the "substantial improvement" in the actual results for 1956-57 on those forecast in June 1956 (when a deficit of £1,500,000 was predicted) to a 2 per cent improvement in the load factor and a £2,800,000 increase in revenue. This increase, in turn, was attributed mainly to (i) the introduction of immigrant fares to the U.S.A. and Canada in November 1956 ; (ii) an intensified sales campaign on all routes ; (iii) the diversion of business from sea to air owing to the closing of the Suez Canal.

Detailed financial and traffic statistics are shown below, with 1955-56 figures for comparison :

	1956-57		1955-56	
Traffic revenue :		£42,699,654		£41,002,668
Passenger	£27,534,855		£27,306,419	
Freight ..	4,354,498		3,796,000	
Mail ..	9,861,549		9,482,436	
Non-scheduled services	948,752		1,017,813	
Capacity-ton-miles		282,134,827		260,286,387
Revenue-ton-miles		182,378,888		163,681,577
Load factor on scheduled services (per cent)		63.7		61.7
Passengers carried		409,684		358,778
Percentage of tourist passengers in total		57.4		43.2
Passenger load factor (per cent)		66.0		62.2
Cargo carried (tons)		7,483		7,050
Mail carried (tons)		4,145		3,814
Costs per capacity-ton-mile		39.9d.		38.0d.
Total revenue per revenue-mile		24s. 10d.		23s. 8d.
Operating costs per revenue-mile		23s. 9d.		22s. 11d.
Unduplicated route mileage		63,418		84,393
Staff (March 31)		19,046		18,411

The report gave the following information :

Relations with Other Airlines. During the year the Corporation concluded partnership agreements with the Central African [see 15657 B], East African, and West African Airways Corporations and continued its long-standing partnerships with Qantas Empire Airways (Australian routes) and South African Airways.

The Corporation's subsidiary and associated companies continued to develop, but in the Middle East (where it had five associated companies) some services were brought to a standstill by the Suez crisis and had not been fully resumed by March 31, 1957. In the Caribbean area, British West African Airways Ltd. and Bahamas

Airways Ltd. were engaged in modernizing their fleets and extending their route networks.

Aircraft in Service and on Order. BOAC introduced two new aircraft types during the year—the Douglas *DC-7* (powered by turbo-compound reciprocating engines) on the London-New York route in January 1957, and the Bristol *Britannia-102* on the London-Johannesburg route in February. The report explained that the introduction of the *Britannias* had been delayed because engine performance had been affected by icing at high altitudes during service trials. The problem had been referred to a committee on which the manufacturers, the Royal Aircraft Establishment, the National Gas Turbine Establishment, and BOAC were represented, and certain modifications had been introduced enabling the Corporation to place the aircraft in service. The committee was still studying the problem with a view to further improving the engine design.

BOAC also planned shortly to bring into service two other new British aircraft types—the *Britannia-312* and the *de Havilland Comet IV*. It was hoped to bring the *Britannias* into North Atlantic service in the coming months—the first time that modern British-manufactured aircraft would have gone into service on this vital dollar-earning route. The *Comet IV's* were planned to go into service on the Australian routes before the end of 1958.

On the recommendation of a committee set up in 1956 to review the Corporation's future aircraft programme, and with Government approval, orders had been placed (1) with the U.S. Boeing Company for 15 *Boeing-707* jets for service on North Atlantic routes and for delivery between December 1959 and December 1960, (2) with Vickers-Armstrong's for 35 of a new type of aircraft—the *Vickers VC-10*—for delivery from 1963 onwards for service on Eastern Hemisphere routes. The committee had stressed that non-stop operations with jets would have to be introduced on North Atlantic routes by 1960 to enable BOAC to meet international competition, and as no British aircraft with the required speed, range, and payload were in sight, it had recommended that the *Boeings* should be ordered. As regards the Vickers *VC-10's*, the committee had evaluated a number of types and had decided that the new aircraft would best suit BOAC requirements on Eastern routes.

BOAC's decision to buy 35 Vickers *VC-10's* for its African, Far Eastern, and Australian services (see above) had been announced on May 22, when the airliner had been described as "a medium-long-range jet powered by four Rolls-Royce *Conway* engines"; it was stated that the type to be delivered to BOAC would seat up to 120 passengers.

Mr. Watkinson, the Minister of Transport and Civil Aviation, stated on the same day that the *VC-10* was being developed by Messrs. Vickers-Armstrong as a private venture, with no Government money involved. The Government had approved BOAC expenditure of about £68,000,000 on the purchase, including spares.

The first of the long-range *Britannia-312's* referred to in the BOAC report was delivered on Sept. 10; the Corporation explained that "subject to deliveries and the aircraft proving suitable for scheduled North Atlantic flying," it was planned to introduce it on the London-New York service in January-March 1958. Mr. Watkinson announced on Sept. 19 that the *Britannia-312* had been given a passenger-carrying certificate of airworthiness, but that operators had been advised that prolonged flights over 16,000 feet in certain weather conditions should be avoided.

A Ministry statement explained that a warning had been incorporated in the flight manual accompanying the airworthiness certificate that "prolonged flights in cloud at altitudes over 16,000 ft. in a narrow band of temperature about freezing-point and in heavy concentrations of water or ice should be avoided." The warning, however, had been expressed "in the form of advice" and was not a "mandatory limitation." The statement further explained that the *Proteus* engine with which *Britannias* were equipped had successfully passed normal icing tests, but that during BOAC proving flights in Africa about 18 months previously it had been found that flight through high concentrations of dry ice resulted in "flame-outs." After investigations by an expert committee, engine modifications had been made which alleviated the dry-ice difficulty and had enabled BOAC to start passenger operations with *Britannia-102's* in February (see above).

Further operating experience, especially in monsoon conditions in India and the Far East, showed, however, that although the modified engine could cope with dry ice it could still be affected by certain conditions of ice crystals and water occurring together. The statement added: "The problem posed by this fresh discovery has yet to be fully solved . . . In the meantime the Minister is advised that the aircraft can be flown normally provided due regard is paid to the advice in the flight manual. With this in mind he has accepted the recommendation of the Air Registration Board."

Following a forced landing at Miami (Florida) by a BOAC *Britannia-312* while on a proving flight, however, the Air Registration Board recommended the Bristol Aeroplane Company (the aircraft's builders) on Oct. 4 to make certain modifications to the engines of *Britannia* airliners. The Board described its recommendations as "precautionary" and as not involving the withdrawal of airworthiness certificates from *Britannias*, but stressed that no attempt should be made to fly the grounded *Britannia-312* to Britain until four modified engines could be installed.

BOAC announced on Nov. 8 that transatlantic proving flights with the *Britannia-312* would be discontinued pending an explanation of the crashing of a *Britannia Mark 301*—the prototype of the *300* series—at Downend, near Bristol, on Sept. 6.

The aircraft—the only one of the *301* series in existence—had made its first flight in August 1956 and since then had been airborne for more than 700 hours on test and development flights. At the time of the accident it was returning to Filton aerodrome after a routine test flight when it crashed into a built-up area. All the 15 persons on board (four crew and 11 technicians) lost their lives. There were no casualties in the built-up area, though many people had narrow escapes.

It was announced on Nov. 8 that the Ministry of Transport and Civil Aviation had begun a full investigation into the disaster.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15234 A.)**

A. IRISH REPUBLIC. — North-Central Dublin By-election. - Independent Gain from Fianna Fail.

The Dublin North-Central by-election to the Dail, caused by the death of Mr. Colm Gallagher (Fianna Fail), was held on Nov. 14 and resulted in an Independent gain from Fianna Fail, the Government party.

The first count result was as follows: Frank Sherwin (Independent), 4,077; John O'Byrne Gregan (Fianna Fail), 3,353; Victor Carton (Fine Gael), 2,399; Sean Garland (Sinn Fein), 1,600; Thomas Herlihy (Labour), 761. Independent majority—724. After transferring second preference votes, Mr. Sherwin received 6,910 votes on the fourth count and Mr. Gregan 4,179.

The total poll was 12,316, or only 45.8 per cent of the electorate of 26,913, compared with 57.4 per cent at the general election.

The result of the by-election reduced the strength of Fianna Fail to 77 and increased that of the Independents to 10, reducing Fianna Fail's overall majority from nine to seven; because of the abstention of the four Sinn Fein members, however, the Government was still left with an effective majority of 11.—(Irish Times, Dublin) **(Prev. rep. 15429 A.)**

B. UNITED STATES. — Mr. George Allen appointed Director of U.S. Information Agency.

It was announced in Washington on Oct. 16 (*a*) that Mr. Arthur Larson, the Director of the U.S. Information Agency, had been appointed a special White House aide for countering Soviet propaganda, in which connexion he would advise both President Eisenhower and Mr. Dulles on overseas information programmes; and (*b*) that Mr. George V. Allen, Ambassador to Greece, would succeed Mr. Larson as head of the U.S.I.A.

Mr. Allen, a member of the Foreign Service since 1930, has held a number of diplomatic assignments and was Ambassador in New Delhi before his appointment to the Athens Embassy in 1956. From 1948 to 1950 he was Assistant Secretary of State for Public Affairs, in which capacity he directed the "Voice of America."

Mr. Larson, a Rhodes scholar, was Dean of the University of Pittsburgh Law School before his appointment as Under-Secretary of Labour in 1954. He became head of the U.S.I.A. in December 1956.

The U.S.I.A. directs the overseas information services of the United States.—(New York Times) **(Prev. rep. 13115 A.)**

C. GHANA. — External Broadcasting Service.

An official spokesman announced on Sept. 26 that the Government of Ghana had decided to establish an external broadcasting service to keep the outside world, and especially Britain and South Africa, well-informed on affairs in Ghana. There would also be broadcasts to the Soviet Union, North America, part of South America, China, India, Japan, Malaya, the Arab countries, the Near East, and North Africa, and in the later stages of the scheme these would be made in the appropriate languages. It was estimated that the broadcasts would cost £500,000 to launch and £340,000 a year to run. (Times - Manchester Guardian)

D. NETHERLANDS. — Armed Forces. - New Command Appointments.

General Hasselman, Chief of General Staff and C.-in-C. of the Netherlands Army, was succeeded in those posts on Nov. 1 by Lieut.-General Le Fèvre de Montigny, whilst Lieut.-General Schaper (Chief of Air Staff) succeeded General Hasselman as chairman of the Chiefs of Staff Committee. General Hasselman had relinquished these posts to become chairman of the Military Committee of the North Atlantic Treaty Organization.—(Algemeen Handelsblad, Amsterdam) **(Prep. rep. 11256 A)**

E. AUSTRIA. — Provincial Elections in Tirol.

Elections for the Provincial *Landtag* were held in Tirol on Oct. 27, the People's Party obtaining 23 seats (no change), the Social Democrats 11 (9), and the right-wing Freedom Party 2 (4).—(Wiener Zeitung) **(Prev. rep. 14889 A.)**

A. NOBEL PRIZES. — Awards for 1957.

The Nobel Prize awards for 1957 were announced during October as follows :

Peace Prize. The Nobel Peace Prize was awarded to Mr. Lester B. Pearson (60), Canadian Secretary of State for External Affairs in the Liberal Government of Mr. St. Laurent from 1948 until June 1957. A leading figure at the United Nations, and a former president of the U.N. General Assembly, Mr. Pearson first put forward the suggestion for the creation of a U.N. Emergency Force for the Middle East during the Suez crisis of November 1956. This suggestion, approved by the General Assembly, resulted in the formation of UNEF, its despatch to Egypt to take over from the Anglo-French and Israeli forces, and its subsequent stationing on the Egyptian-Israeli border.

Mr. Lester Pearson, a former Rhodes scholar and one-time professor of history, was Ambassador in Washington at the time of his appointment as Secretary for External Affairs in 1948. He played a leading part in founding the North Atlantic Treaty Organization and was secretary-general of the NATO conference held in Lisbon in 1952. He is the first Canadian to be awarded the Nobel Peace Prize.

As stated below, the Peace Prize is awarded by a special committee of the Norwegian Parliament. The Oslo newspaper *Arbeiderbladet*, organ of the Norwegian Government, said that the main reason for the conferment of the Peace Prize on Mr. Pearson was his outstanding personal contribution towards solving the Suez crisis of 1956 by suggesting the formation of a U.N. Emergency Force to keep the peace in the area.

Literature. The Literature Prize was awarded to M. Albert Camus (44), the French novelist and playwright, for "his important literary work which, with clear-sighted earnestness, illumines the problems of human conscience in our times." M. Camus was the seventh French writer to be awarded the Nobel Prize for Literature, his predecessors being Sully Prudhomme (1901), Frédéric Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1927), Roger Martin du Gard (1937), André Gide (1947) and François Mauriac (1952).

Born in Algeria, Albert Camus worked as a journalist and helped to found the left-wing Paris newspaper *Combat* after the liberation, being for three years one of its principal editors in collaboration with M. Sartre and Mme. Simone de Beauvoir. His first novel, *L'Etranger* (1942), was followed in the post-war years by *Le Mythe de Sisyphe*, *La Peste*, *L'Homme Révolté*, and *La Chute*. In the English-speaking countries he is best known for *La Peste* (translated as *The Plague*), for which he has written a stage adaptation

Medicine. The Prize for Medicine and Physiology was awarded to Professor Daniel Bovet (50), head of the pharmacological department of the *Instituto Superiore di Sanità* in Rome, for "his discoveries relating to the synthetic compounds that inhibit the action of certain body substances, and especially their action on the vascular system and skeletal muscles."

Born in Switzerland, the son of a famous Swiss educationist (Dr. Pierre Bovet), Professor Bovet has lived in Rome since 1947 and is a naturalized Italian citizen. A pioneer of research into the antihistamine group of drugs, now used with outstanding success in the treatment of various allergic conditions, he was awarded the Medicine Prize specifically for producing a synthetic form of curare (the substance used by South American Indians to poison their arrows). Curare has important applications in medicine and surgery, and is a valuable adjunct to anaesthesia by causing the muscular relaxation essential for surgical operations.

Professor Bovet was head of the therapeutical chemistry laboratory at the Pasteur Institute in Paris from 1936 until 1947, when he took up his present post in Rome.

Chemistry. The Prize for Chemistry was awarded to a British scientist, Sir Alexander Todd (Professor of Organic Chemistry at Cambridge), for his "work on nucleotides and nucleotide enzymes." Sir Alexander Todd's best-known work has been on the chemistry of the nucleic acids, which are believed to play a key part both in the transmission of inherited qualities, and in giving effect to them when inherited. In connexion with this research he has synthesized two substances—adenosine diphosphate and adenosine triphosphate —which are believed to be of central importance in making energy available for building-up processes in living organisms, and in the working of muscles. He had earlier developed a number of ways of synthesizing aneurin (vitamin B_1), one of which has since been employed in making it commercially.

Born in Glasgow, Professor Todd has been Professor of Organic Chemistry at Cambridge since 1944 and is chairman of the Government's Advisory Council on Scientific Policy, of which he has been a member since 1947. He was a lecturer in Biochemistry at London University (1937-38) and Professor of Chemistry at Manchester University (1938-44) before going to Cambridge.

Physics. The Prize for Physics was awarded jointly to two Chinese-born scientists working in the United States—Professor Lee Tsung-dao (31), of Columbia University, and Professor Yang Chen-ning (27), of the Institute for Advanced Study at Princeton. They were honoured for "their penetrating investigation of the so-called parity law which has led to important discoveries regarding elementary particles."

It was explained by the Nobel Institute that Professors Lee and Yang had disproved, by experiment, what had for long been considered a basic law of nature—the so-called "principle of the conservation of parity," according to which space was held to possess a symmetrical quality whereby every existing object was balanced by a corresponding "mirror image" that had to respond to the same law of nature. The discoveries of Professors Lee and Yang showed that this "law" did not apply in the field of nuclear physics—a conclusion verified by the study of atomic nuclei when disintegrated by the "atom-smasher."

The Literature Prize is awarded by the Royal Swedish Academy of Literature ; the Medicine and Physiology Prize by the Royal Carolinian Medico-Surgical Institute of Stockholm; the Chemistry and Physics Prizes by the Royal Swedish Academy of Science ; and the Peace Prize by the Nobel Committee of the Norwegian Parliament. The value of the Nobel Prizes for the current year is about £14,300 each. (Svenska Dagbladet, Stockholm - Arbeiderbladet, Oslo - Le Monde - Times - Manchester Guardian - New York Times)

(Prev. rep. 1956 Awards, 15212 B.)

B. INDIA - SOVIET UNION. — Large Soviet Credit for Indian Purchases of Industrial Equipment under Second Five-Year Plan. - Contract for Indian Purchase of Soviet Oil-drilling Equipment.

It was announced in New Delhi on Nov. 15, 1956, that the Government of India had accepted a long-term credit of 500,000,000 roubles (about Rs.600,000,000 or £45,000,000) from the Soviet Government for the purchase in the U.S.S.R. of industrial equipment for the Second Five-Year Plan. The offer had been made to Mr. K. C. Reddy, the Indian Minister for Production, during a visit to Moscow the previous month.

The credit, which brought total Soviet credits to India to Rs.1,150,000,000 (£86,250,000), was designed to cover the foreign exchange component of certain industrial projects, including a heavy machine-building plant, a coal-mining machinery plant, a power plant with a capacity of 250,000 kw. for the Neiveli lignite project in South India, a fertilizer plant, an oil refinery, an optical glass factory, and the development of the Korba coal mines in Madhya Pradesh, with an annual output of 2,600,000 tons. It was on the same terms as the credit for the Bhilai steel project [see 15298 C]—viz., 2½ per cent interest, with repayment in 12 equal annual instalments from the dates of the drawings. Repayment can be made in rupees, convertible into sterling on demand.

An agreement had been previously signed in New Delhi on May 21, 1956, providing for the supply by the U.S.S.R. of oil-drilling equipment to India worth Rs. 7,400,000 (£555,000). A year later (in May 1957) it was also agreed to purchase accessory equipment valued at Rs.3,724,000, the original agreement being modified to enable an additional expenditure of Rs.2,000,000 to be included.

On Nov. 26, 1956, the Soviet Government had agreed to assist India in her oil exploration programme, especially the projects undertaken by the Oil and Natural Gas Commission in East Punjab, and had arranged for the despatch of 175 Soviet experts and consultants for this purpose.

The agreement followed discussions during October 1956 by Mr. Malaviya (the Indian Minister for Natural Resources) with the Soviet authorities concerning the exploration of India's mineral wealth. On Mr. Malaviya's initiative a team of Soviet oil experts subsequently visited India to make recommendations with regard to the oil exploration programme ; the Oil and Natural Gas Commission then worked out a detailed scheme costing about Rs. 305,000,000 during the period of the Second Five-Year Plan.

Discussions between a Soviet delegation and Mr. M. M. Shah, the Indian Minister for Industry, opened in Delhi on Sept. 3, 1957, to finalize details of the supply and delivery programme for the various industrial projects to be carried out with the help of the 500,000,000-rouble Soviet credit. An agreement was accordingly signed in Delhi on Nov. 9 laying down that, as in the case of the Bhilai steelworks, the Soviet Union would supply during 1959 and 1960 the complete equipment and machinery for each of the above-mentioned undertakings, as well as experts to supervise their erection and training facilities in Russia for Indian technical personnel. The terms of the credit were changed, inasmuch as repayment will only begin one year after the delivery of machinery for each project has been completed. The original plan to include an oil refinery was dropped.—(Indian High Commissioner's Office, London - The Hindu, Madras - The Statesman, Calcutta)

(Prev. rep. 15298 C.)

C. FRANCE - GERMANY. — Creation of Franco-German Mixed Court for the Saar.

The Franco-German mixed court, provided for under the Franco-German agreement on the Saar, was formally set up on Nov. 5. The new court, replacing the former High Court of the Franco-Saar Economic Union, will reconcile Saar jurisdiction with French law in those spheres where the latter remains in force during the transitional economic period. (Le Monde, Paris) **(Prev. rep. 15303 A ; 15165 A.)**

NOVEMBER 16—23, 1957

A. UNITED STATES. — Reactions to Russian "Sputnik" Launchings. - President Eisenhower's Broadcasts on "Science in National Security." - Development of U.S. Missiles. - Dr. Killian appointed Special Assistant to President on Science and Technology.

The launching of the first earth satellite by the Soviet Union on Oct. 4 (see 15791 A) led to strong criticisms of the Eisenhower Administration by a number of Democratic senators, who asserted that the Administration's economy cuts in the U.S. missile research programme had enabled the U.S.S.R. to surpass the United States in this field.

Senator Richard B. Russell, chairman of the Senate Foreign Relations Committee, expressed the view that the U.S.A. had suffered "a most disastrous blow" and that the Soviet achievement "confronts us with a new and terrible danger" from a military standpoint. He noted that the Defence Department, against his own protests, had "very foolishly" cut down the atomic aircraft programme by two-thirds; asserted that the Administration had consistently under-estimated Soviet productive capacity; and recalled that the Senate Armed Services Committee had frequently urged the Administration to place greater emphasis on the missile programme.

Senator Stuart Symington (a former Secretary for Air under President Truman) sent a telegram to Senator Russell calling for an immediate investigation into the U.S. missile programme. After saying that the launching of the Soviet earth satellite was "more proof of growing Communist superiority in the all-important missile field," Mr. Symington added: "If this now known superiority over the United States develops into supremacy, the position of the free world will be critical . . ."

Senator Henry M. Jackson (Democrat), chairman of the military applications panel of the Joint Congressional Committee on Atomic Energy, described the launching of *Sputnik I* as "a devastating blow to the prestige of the U.S.A. as the leader in the scientific and technical world," adding that there could be no doubt of the correctness of the Soviet claim to have launched an inter-continental ballistic missile. **Senator Styles Bridges** (Republican), a member of the Senate Armed Services Committee, called for an "immediate revision of national psychology" and said that Americans must be "prepared to shed blood, sweat and tears if this country and the free world are to survive."

The launching of the second and much larger *sputnik* on Nov. 3 (see 15885 A), only a month after the launching of the first Soviet satellite, caused what the Washington Correspondent of the *The Times* described as a "wave of alarm" throughout the country. The *Daily Telegraph* Correspondent in the U.S. capital said that "Russia's achievements have accomplished more in a few weeks to wake up the American public and officials to the importance of scientific research and development than anything else has been able to do in as many years."

Senator Symington described the launching of *Sputnik II* as "a technological Pearl Harbour" for the U.S.A., while **Senator Kefauver** (Democrat) urged the appointment of a Secretary for Science, with Cabinet rank, to stimulate the U.S. missile programme. Mr. Kefauver also called for steps "to relax the ridiculous and outmoded security regulations" which, he said, prevented some of the best minds in science from working with the Government and hampered the pooling of knowledge with other countries of the free world.

It was announced in Washington on Nov. 4 that a full-scale Senate inquiry would be undertaken into the U.S. missile and satellite programmes. The decision was taken after a delegation representing the Senate Armed Services Committee had had a seven-hour conference with the Secretary of Defence (Mr. McElroy) and his senior advisers.

President Eisenhower's Meetings with National Security Council. - Dr. Killian appointed Special Assistant to President on Science and Technology.

President Eisenhower presided on Oct. 10 and Oct. 31 at meetings of the National Security Council, held at the White House, which were also attended by Administration officials, top scientists, and senior officers of the armed forces. In addition, he conferred several times during the last fortnight of October with Mr. McElroy, the Defence Secretary, and also with members of his (the President's) Scientific Advisory Committee on Research. No statements were issued on these meetings, but it was understood that they dealt with the U.S. missile programme in general and with the impact of Soviet rocketry advances on that programme in particular.

Among those attending the National Security Council's meetings were Dr. Alan T. Waterman, director of the National Science Foundation; Dr. Detlev W. Bronk, president of the National Academy of Science; Vice-President Nixon; Mr. J. Foster Dulles, the Secretary of State; Mr. Herter, Under-Secretary of State; Mr. McElroy, Defence Secretary; Mr. Quarles, Deputy Defence Secretary; Mr. Allen W. Dulles, head of the Central Intelligence Agency; General Nathan F. Twining, chairman of the Joint Chiefs of Staff; Dr. John P. Hagan, director of "Project Vanguard" (the U.S. satellite programme for the International Geophysical Year); Mr. Stassen, Special Assistant to the President on disarmament; Mr. Gordon Gray, head of the Office of Defence Mobilization; Mr. Anderson, Secretary of the Treasury; Admiral Lewis Strauss, chairman of the Atomic Energy Commission; Mr. Leo Hoegh, Federal Civil Defence Administrator; Mr. James Smith, head of the International Co-operation Administration; Mr. Brucker, Secretary of the Army; Mr. Douglas, Secretary of the Air Force; General Maxwell Taylor, Army Chief of Staff; and General Thomas White, Air Force Chief of Staff.

On Nov. 8, after presiding over a further meeting of the National Security Council (the biggest so far held by the Administration), President Eisenhower delivered the first of two major nation-wide broadcasts on the theme of "Science in National Security." In the course of his first speech the President gave a lengthy survey of the re-arming of the U.S. forces with missile and nuclear weapons; referred to the implications of the launching of the Soviet *sputniks*; announced that top priority would be given to missile and rocketry development and to scientific education; and announced also the appointment of Dr. James R. Killian, president of the Massachusetts Institute of Technology, to the new post of Special Assistant to the President for Science and Technology.

The President's White House Broadcast on "Science in National Security."

The President's first speech was broadcast and televised from the White House, its text being as follows:

"My subject tonight is 'Science in National Security.' Originally, this talk was to be part of one I intended to make in Oklahoma City next week. However, I found that I could not possibly deal with this subject in just one address. So tonight I shall concentrate on the most immediate aspects of this question of the relationship of science to the defence of our country.

"I am going to lay the facts before you—the rough with the smooth. Some of these facts are reassuring; others are not—they are sternly demanding. Some require that we resolutely continue lines of action now well begun. Others require new action, and still others new dimensions of effort. After putting these facts and requirements before you, I shall propose a programme of action—a programme that will demand the energetic support of not just the Government but every American, if we are to make it successful.

"First: some facts about our present security posture. It is one of great strength, but by no means should this assurance satisfy any of us. Our defences must be adequate not just today, but tomorrow and in all the years to come, until, under the safety of these defences, we shall have secured a durable and just peace for all the world.

"As of now, the United States is strong. Our nation has today, and has had for some years, enough power in its strategic retaliatory forces to bring near-annihilation to the war-making potentialities of any other country. This position of present strength did not come about by accident. The Korean War had the effect of greatly expanding our peace-time defence forces. As we began the partial demobilization of these forces we undertook also an accelerated programme of modernization.

"As a first step, scientific surveys were instituted soon after the Korean armistice. The result was a decision to give a 'new look' to the defence establishment, depending for increased efficiency more upon modern science and less upon mere numbers of men. In succeeding years there has been an across-the-board programme to bring all units of our defence into line with the possibilities of modern technology. There has been, also, a high level of expenditure on research and development for defence—now running in the aggregate at something over $5,000,000,000 a year. Later, scientific surveys focused attention and emphasis on long-range ballistic missiles. Development on this item got into high gear more than two years ago. We have since been spending $1,000,000,000 a year on this item alone.

"Before discussing some of the things we urgently need to do, I would like to give you a few samples of the things that have been done in recent years by our military forces, scientists, and engineers to put current scientific discovery at the service of our defence.

"In our diversified family of missiles we have weapons adapted to every kind of distance, launching and use. There are now 38 different types either in operation or under development. About one-third of these are in actual operation. All combat vessels of the Navy built since 1955 have guided missiles in place of, or to supplement, guns. The Navy has in both oceans submarines which can rise to the surface and launch, in a matter of minutes, a missile carrying a nuclear warhead, and submerge immediately—while the missile is guided to a target hundreds of miles away. The Navy possesses an atomic depth bomb. Since Korea, both the Army's and Navy's anti-aircraft guns have been largely replaced by surface-to-air missiles. All our new interceptor aircraft are armed with air-to-air missiles.

"Many of the traditional functions of the Army's artillery and support aircraft have been taken over by guided missiles. For example, we have already produced, in various distance ranges, hundreds of *Matador*, *Honest John*, and *Corporal* missiles. To give you some idea of what this means in terms of explosive power:

four battalions of *Corporal* missiles alone are equivalent in fire-power to all the artillery used in World War II. Some of these missiles have their own built-in mechanisms for seeking out and destroying a target many miles away. Thus, the other day, a *Bomarc* missile by itself sought out a fast-moving unmanned airplane 45 miles at sea and actually met it head-on.

"Except for a dwindling number of B-36s, there is hardly an airplane in the combat units of the Air Force that was in them even as late as the Korean conflict. The B-52 jet bomber . . . is standard in our Strategic Air Command. Again, to show you what this means in terms of power: one B-52 can carry as much destructive capacity as was delivered by all the bombers in all the years of World War II combined. But the B-52 will, in turn, be succeeded by the B-58, a supersonic bomber.

"Atomic submarines have been developed. One ran almost 16 days without surfacing; another cruised under the polar ice cap for over five days. A number of huge naval carriers are in operation, supplied with the most powerful nuclear weapons and bombers of great range to deliver them. Construction has started which will produce a carrier to be driven by atomic power.

"Since 1956 we have developed nuclear explosives with radio-active fall-out of less than 4 per cent of the fall-out of previous large weapons. This has obvious importance in developing nuclear defences for use over our own territory. In numbers, our stock of nuclear weapons is so large and so rapidly growing that we are able safely to disperse it to positions assuring its instant availability against attack, and still keep strong reserves. Our scientists assure me that we are well ahead of the Soviets in the nuclear field, both in quantity and quality. We intend to stay ahead.

"We have already shown that we can fire a large ballistic missile well over 1,000 miles. Our ballistic test missiles have had successful flights to as much as 3,500 miles. An intercontinental missile is required, and we have some of them in an advanced state of development. But, because of our many forward positions, for us an intermediate-range missile is for some purposes as good as an intercontinental one. A different kind of missile, the air-breathing *Snark*, recently travelled over a guided course for 5,000 miles and was accurately placed on target. We have fired three rockets to heights between 2,000 and 4,000 miles and have received back much valuable information from outer space.

"One difficult obstacle in the way to producing a useful long-range weapon is that of bringing a missile back from outer space without its burning up like a meteor because of friction with the earth's atmosphere. Our scientists and engineers have solved that problem. This object here in my office is an experimental missile—a nose cone. It has been hundreds of miles to outer space and back. Here it is, completely intact. [The President showed his listeners the nose-cone of the missile to which he referred].

"These illustrations—which are only a small sample of our scientists' accomplishments—I give you merely to show that our strength is not static, but is constantly moving forward with technological improvement. Long-range ballistic missiles, as they exist today, do not cancel the destructive and deterrent powers of our Strategic Air Force.

"The Soviet launching of earth satellites is an achievement of the first importance, and the scientists who brought it about deserve full credit and recognition. Already, useful new facts on outer space have been produced, and more are on the way as more satellites with added instruments are launched. Earth satellites, in themselves, have no direct effect upon the nation's security. However, there is real military significance to these launchings. Their current military significance lies in the advanced techniques and the competence in military technology they imply, evidenced, for example, by the powerful propulsion equipment necessarily used.

"But in the main the Soviets continue to concentrate on the development of war-making weapons and supporting industries. This, as well as their political attitude in international affairs, serves to warn us that Soviet expansionist aims have not changed. The world has not forgotten the Soviet military invasions of such countries as Finland and Poland, their support of the war in Korea, or their use of force in their ruthless suppression of Hungarian freedom. Eternal vigilance and increased free-world military power, backed by our economic and spiritual strength, provide the only answer to this threat until the Soviet leaders cease to consume their resources in warlike and expansionist purposes and turn them to the well-being of their own peoples.

"We frankly recognize that the Soviets are building up types of power that could, if we were attacked, damage us seriously. This is because no defensive system today can possibly be airtight in preventing all break-throughs of planes and weapons. To aid in protecting against this, we, in partnership with Canada, have long been constructing a continental defence system reaching from far out in the Pacific around the northern edge of this continent and across the Atlantic approaches. This is a complex system of early-warning radar, communication lines, electronic computers, supersonic aircraft, and ground-to-air missiles, some with atomic warheads. This organization and equipment is under constant improvement; emphasis on this improvement must be increased.

"In addition to retaliatory and continental defence forces, we and our allies maintain strong ground and naval units in strategic areas of the world. In the strength and readiness of all these varied kinds of power—retaliatory, defence and local—properly distributed and supported, lies the real deterrent to the outbreak of war. This fact brings home to all of us the tremendous importance to this country of our allies. Not only do they maintain large military forces as part of our combined security, but they provide vital bases and areas that permit the effective deployment of all our forces for defence.

"It is my conviction, supported by trusted scientific and military advisers, that although the Soviets are quite likely ahead in some missile and special areas, and are obviously ahead of us in satellite development, as of today the over-all military strength of the free world is distinctly greater than that of the Communist countries. We must see to it that whatever advantages they have are temporary only.

"The next question is: how about the future? I must say to you, in all gravity, that in spite of both the present over-all strength and the forward momentum of our defence, it is entirely possible that in the years ahead we could fall behind. I repeat: we could fall behind—unless we now face up to certain pressing requirements and set out to meet them at once.

"I address myself to this problem, knowing that for every American it surmounts any division among us of whatever kind. It reminds us once again that we are not partisans of any kind, we are Americans. We will close ranks as Americans, and get on with the job to be done.

"According to my scientific friends, one of our greatest and most glaring deficiencies is the failure of us in this country to give high enough priority to scientific education and to the place of science in our national life. Of course, these scientists properly assume that we shall continue to require the most modern weapons in adequate numbers as fast as they are produced; but their conviction does expose one great future danger that no amount of money or resources currently devoted to it can meet. Education requires time, incentive, and skilled teachers. They believe that a second critical need is that of giving higher priority, both public and private, to basic research.

"As to these long-range requirements, I shall have something to say next week [see Oklahoma City speech below]. Tonight I shall discuss two other factors on which prompt action is possible.

"The first is the tragic failure to secure the great benefits that would flow from mutual sharing of appropriate scientific information and effort among friendly countries. Most great scientific advances have been the product of free international exchange of ideas. There is hardly a nation that has not made some significant contribution to modern science. There instantly comes to mind the contribution of Britain to jet propulsion, radar, and infra-red rays; of Germany to rocketry, X-rays, and sulfa drugs; of Italy to wireless telegraphy; of France to radio-activity; of Japan to magnetics. In the free world we all have a lot to give and a lot to gain in security through the pooling of scientific effort. Why should we deny to our friends information that we are sure the Soviets already have—information our friends could use towards our mutual security? Why, for want of the fullest practicable sharing, should we waste American research funds and talent struggling with technological problems already mastered by our friends? Here is a way in which, at no cost, we can dramatically and quickly magnify the scientific resources at the disposal of the free world.

"The second immediate requirement is greater concentration of effort and improved arrangements within the Government in the fields of science, technology and missiles—including the continuing requirement for the closest kind of Executive-Legislative co-operation.

"As to action, I report the following items to you:

"The first thing I have done is to make sure that the very best thought and advice that the scientific community can supply, heretofore provided to me on an informal basis, is now fully organized and formalized so that no gap can occur. The purpose is to make it possible for me, personally, whenever there appears to be any unnecessary delay in our development system, to act promptly and decisively.

"To that end I have created the office of Special Assistant to the President for Science and Technology. This man, who will be aided by a staff of scientists and a strong advisory group of outstanding experts reporting to him and to me, will have the active responsibility of helping me to follow through on the programme of scientific improvement of our defences that I am outlining tonight and next week.

"I am glad to be able to tell you that this position has been accepted by Dr. James R. Killian, president of the Massachusetts Institute of Technology. He is a man who enjoys my confidence and the confidence of his colleagues in the scientific and engineering world and in the Government. Through him, I intend to be assured that the entire programme is carried forward in closely integrated fashion and that such things as alleged inter-Service competition or insufficient use of overtime shall not be allowed to create even the suspicion of harm to our scientific and development programme.

"Moreover, Dr. Killian will see to it that those projects which experts judge have the highest potential shall advance with the utmost possible speed. He will make sure that our best talent and the full necessary resources are applied on certain high-priority, top-secret items that for security reasons you will not expect me to enumerate. In looking to Dr. Killian to discharge these responsibilities, I expect him to draw upon the full abilities of the scientists and engineers of our country.

"Second: in the Defence Department is an official, directly responsible to the Secretary, in charge of missile development. I have directed that the Secretary make certain that the guided-missile director is clothed with all the authority that the Secretary himself possesses in this field, so that no administrative or inter-Service block can occur. Dr. Killian will, of course, work intimately with this official.

" Third : the Secretary of Defence and I have agreed that any new missile or related programme hereafter originated will, whenever practicable, be put under a single manager and administered without regard to the separate Services.

" Fourth : there will be laid before Congress proposed legislation to remove legal barriers to the exchange of appropriate technological information with friendly countries.

" Fifth : if the necessary authority is granted, I shall support, along the lines of the agreement reached with Prime Minister Macmillan [see 15832 A], a Scientific Committee organized within NATO to carry out an enlarged Atlantic effort in research Similar action in SEATO and comparable organizations will be studied. To help carry out these measures of mutual effort, the Secretary of State will appoint a Science Adviser to himself and science attachés in appropriate places abroad.

" At any point in any of these actions where additional legal authority proves necessary, that authority will be asked of Congress at the outset of its next session. These matters will be discussed in my forthcoming bi-partisan meeting with the leaders of Congress. They will be requested to consider every feasible step to hasten needed legislative action . . .

" Even in two talks I cannot by any means cover the entire subject of defence, but only selected questions of pressing and current importance. Accordingly, I am not at this time even alluding to a number of key items bearing strongly on defence, such as mutual aid and civil defence. Likewise I have not dwelt upon the urgent need for greater dispersal in the Strategic Air Command, or for providing all the means that will enable airplanes to take off in the shortest possible time after receipt of warning.

" In this whole effort it is important to see that nothing is wasted on non-essentials. Defence today is expensive and growing more so. We cannot afford waste. It misses the whole point to say that we must now increase our expenditures of all kinds on military hardware and defence—as, for example, to heed demands recently made that we restore all personnel cuts in the armed forces. Certainly we need to feel a high sense of urgency. But this does not mean that we should mount our charger and try to ride off in all directions at once.

" We must clearly identify the exact and critical needs that have to be met. We must then apply our resources at that point as fully as the need demands. This means selectivity in national expenditures of all kinds. We cannot, on an unlimited scale, have both what we must have and what we would like to have. We can have both a sound defence, and the sound economy on which it rests, if we set our priorities and stick to them, and if each of us is ready to carry his own share of the burden.

" In conclusion : although for tonight's purposes I stress the influence of science on defence, I am not forgetting that there is much more to science than its function in strengthening our defence, and much more to our defence than the part played by science. The peaceful contributions of science—to healing, to enriching life, to freeing the spirit—are the most important products of the conquest of nature's secrets. And the spiritual powers of a nation—its underlying religious faith, its self-reliance, its capacity for intelligent sacrifice—are the most important stones in any defence structure. Above all, let me say for all to hear that, so far as we are concerned, the amassing of military might never has been—and never will be—devoted to any other end than defence and the preservation of a just peace.

" What the world needs today, even more than a giant leap into outer space, is a giant step toward peace. Time and again we have demonstrated our eagerness to take such a step. As a start in this direction, I urge the Soviets to align themselves with the practical and workable disarmament proposals approved by a large majority in the United Nations. Never shall we cease to hope and work for the coming of the day when enduring peace will take these military burdens from the back of mankind, and when the scientist can give his full attention, not to human destruction, but to human happiness and fulfilment."

As stated above, President Eisenhower showed his listeners the first known object to be recovered from outer space—the nose-cone of a *Jupiter* missile which had been fired " hundreds of miles into outer space " and subsequently recovered. Although the President gave no further details, three top-ranking scientific experts disclosed on Nov. 13 how this achievement had been carried out.

The experts concerned—Mr. Alvin G. Waggoner, adviser to the Defence Secretary on guided missiles, Colonel John H. Swenson, Assistant Secretary of Defence for research and engineering, and Captain Leslie M. Slack, director of surface weapons systems for naval ordnance—disclosed that the Army's *Jupiter* missile had been fired from the Air Force test base at Cape Canaveral (Florida) and that its nose-cone was later recovered by the U.S. Navy in the Caribbean area. There was a particular reason for wanting the cone back because " no test gear on earth even approximates to the speed, heat, forces of gases, and other conditions which the cone had to endure."

Colonel Swenson said : " The cone had to think for itself and determine at least a dozen acts. At the right time it slowed itself by ejecting a parachute without burning it on the red-hot metal. Then it put out a balloon and inflated it. Then a little guillotine severed the inflated tube and the balloon was let out on a tether above the parachute. Just before it hit the water it ejected and fired some small bombs so that the Navy could pick up the noise on listening devices and know the point of the crash . . . In the water the cone put out an antenna and began broadcasting ' beeps.' It also flashed light signals. As the balloon held the cone from sinking too far beneath the surface, the cone put out marker dye on the water. It also put out repellent so that those regaining the cone would not be attacked by sharks."

President Eisenhower's Oklahoma City Broadcast.

In a second televised broadcast on Oct. 13 from Oklahoma City, President Eisenhower developed the theme of " Science in National Security " in what he described as " a somewhat wider context." In the course of his address the President laid emphasis on (1) the need for a " critical re-examination of our entire defence position " in view of Soviet technological advances ; (2) the necessity for drastic economies in the civilian sector in view of the great cost of the defence programme; and (3) the fact that the number of trained scientific workers in the U.S.S.R. now exceeded that in the United States—a development which the President described as " the most critical of all." In this connexion President Eisenhower stressed that the United States would need " thousands " more scientists in the next decade " than we are now presently planning to have." Extracts from the President's broadcast are given below :

. . . " This week the Soviets are celebrating the 40th anniversary of their revolution. These four decades have seen them change from an agricultural to an industrial nation. We know of their rigorous educational system and their technological achievements . . . We recently had dramatic evidence that even under such a system it is possible to produce some remarkable material achievements. When such competence in things material is at the service of leaders who have so little regard for things human, and who command the power of an empire, there is danger ahead for free men everywhere. That is the reason why the American people have been so aroused about the earth satellites.

" Of course, free men are meeting and will meet this challenge. Up to a point, this must be done on the Communists' own terms—outmatching them in military power, technological advance, and specialized education and research. But this is not all the story. The real strength with which the self-governing democracies have met the tests of history is something denied to dictatorships. It is found in the quality of our life and the vigour of our ideals. It manifests itself in the capacity of free men for voluntary heroism, sacrifice, and accomplishment when the chips are down. This is a weapon which has meant eventual downfall for every dictator who has made the familiar mistake of thinking all democracies ' soft.'

" Now, once again, we hear an expansionist regime declaring ' We will bury you.' In a bit of American vernacular, ' Oh yeah ! ' Seriously, it would be a grave error not to take this kind of threat literally. This theme has been a Communist doctrine for 100 years. But there was once a dictator named Hitler who also said he would ' bury us.' He wrote a long, dull book telling precisely how he was going to do it. Not enough people took him at his word. We shall not make that mistake again . . .

" Our military defences have been largely reshaped since World War II. I assure you, as I did last week, that for the conditions existing today they are both efficient and adequate. But if they are to remain so for the future, their design and power must keep pace with the increasing capabilities that science gives both to the aggressor and the defender. They must continue to perform four main tasks :

(1) As a primary deterrent to war, to maintain a strong nuclear retaliatory power. The Soviets must be convinced that any attack on us and our allies would result, regardless of damage to us, in their own national destruction.

(2) In co-operation with our allies, to provide a force structure so flexible that it can cope quickly with any form of aggression against the free world.

(3) To keep our home defences in a high state of efficiency.

(4) To have the reserve strength to meet unforeseen emergency demands.

" To provide this kind of defence requires money, lots of it. During the last five fiscal years we have spent 211,000,000,000 dollars on our security—an average of over 42,000,000,000 dollars a year . . . In my judgment, the armed forces and their scientific associates have, on the whole, used this money wisely and well. Much of it has gone and is going into better and more powerful weapons. A single B-52 bomber costs $8,000,000. The B-52 wing costs four times as much as the B-36 wing it replaces. The *Nike* missile, which has largely replaced anti-aircraft artillery, costs three times as much per battalion. A new submarine costs $47,500,000—ten times the cost of a World War II submarine. And so on, for our entire arsenal of equipment . . .

" There has been much discussion lately about whether Soviet technological break-throughs in particular areas may have suddenly exposed us to immediately increased dangers in spite of the strength of our defences. As I pointed out last week, this is not the case. But these scientific accomplishments of theirs have provided us all with renewed evidence of Soviet competence in science and techniques important to modern warfare.

" We must, and do, regard this as a time for a critical re-examination of our entire defence position. The *Sputniks* have inspired a wide variety of suggestions, ranging from acceleration of missile pro-

grammes to shooting a rocket around the moon . . . Common sense demands that we put first things first. And the first of all firsts is our nation's security. Over the next three weeks I shall be personally making our Annual Review with military and civilian authorities of our national security activities for the coming year. Then I shall meet the leaders of Congress—from both Houses and both parties—for conferences on policies, actions and expenditures . . . "

Although missile power was being added to the U.S. armed forces as rapidly as possible (the President continued), " it will be some time before either we or the Soviet forces have a long-range missile capacity equal to even a small fraction of the total destructive power of our present bomber force." Intensive research was in progress to develop long-range missiles, and also to develop " an active missile defence against missiles," but he had been assured by the technicians that " development of the long-range ballistic missile cannot be markedly accelerated by expenditure of more money." Nevertheless, the U.S.A. was now spending more than $1,000,000,000 a year on research and testing, and it was " clear that production, deployment and installation of missiles over the period ahead . . . will be costly."

Turning to earth satellite projects, as distinct from the missile programme, the President said : " Confronted with the essential requirements I have indicated for defence, we must adopt a sensible formula to guide us in deciding what satellite and outer space activity to undertake. There should be two tests in this formula. If the project is designed solely for scientific purposes, its size and cost must be tailored to the scientific job it is going to do. That is the case in the 'Vanguard' project now underway. If the project has some ultimate defence value, its urgency for this purpose is to be judged in comparison with the probable value of competing defence projects."

Reverting to the subject of defence expenditure, the President said . " All these new costs, which in the aggregate will reach a very considerable figure, must be added to our current annual expenditures for security. There is no immediate prospect of any marked reduction in these recurring costs. Consequently the first thing is to search for other places to cut expenditures. We must go all over our military programme with redoubled determination to save every possible dime. We must make sure that we have no needless duplication, or obsolete programmes or facilities . . . In the Federal Government's civilian activities we shall have to make some tough choices. Some programmes, while desirable, are not absolutely essential . . . Savings of the kind we need can come about only through cutting out or deferring entire categories of activities. This will be one of the hardest and most distasteful tasks that the coming session of Congress must face, and pressure-groups will wail in anguish . . . "

President Eisenhower said in conclusion : " The Soviet Union now has in the combined category of scientists and engineers a greater number than the U.S.A., and is producing graduates in these fields at a much faster rate. This trend is disturbing. Indeed, according to my scientific advisers, this is for the American people the most critical problem of all. My scientific advisers place this problem above all other immediate tasks of producing missiles or of developing new techniques in the armed services. We need scientists. In the ten years ahead they say we need them by thousands more than we are now presently planning to have . . .

" One thing that money cannot buy is time. It takes time for a tree to grow, for an idea to become an accomplishment, for a student to become a scientist. Time is a big factor in two longer-term problems—strengthening our scientific education and our basic research. Remember that when a Russian graduates from high school he has had five years of physics, four years of chemistry, one year of astronomy, five years of biology, ten years of mathematics and trigonometry, and five years of a foreign language . . . "

" At present, our basic research compared with any other country is considerably greater in quantity—and certainly equal in quality. The warning lies in the fast rate of increase in the Soviet effort, and their obvious determination to concentrate heavily on basic research. The world will witness future discoveries even more startling than that of nuclear fission. The question is : Will we be the ones to make them ?

" Here again, money cannot do everything. You cannot say to a research worker : 'Your salary is tripled ; get busy and produce three times as many basic discoveries.' But wise investment in such facilities as laboratories and high-energy accelerators can greatly increase the efficiency of our scientists. The Government is stepping up its basic research programme. But . . . the biggest share of the job is in the hands of industry and private organizations . . . "

Dr. James R. Killian (53) was sworn in at the White House on Nov. 15 as Special Assistant to the President on Science and Technology.

Born in South Carolina, Dr. James Rhyne Killian has been at the Massachusetts Institute of Technology since 1923, and was previously on the staff of Duke University (then Trinity College). During the Second World War he played an important part in mobilizing and expanding the Institute's research and training facilities for the U.S. war effort. Vice-president of the M.I.T. since 1945, he became its president in 1949 on the death of Dr. Karl T. Compton. One of America's top-ranking scientists, Dr. Killian holds 16 honorary degrees, the President's Certificate of Merit, and other awards. In addition to his new post he is chairman of the Army Science Advisory Panel, chairman of the President's Board of Consultants on Foreign Intelligence Activities, and a member of the Science Advisory Committee of the Office of Defence Mobilization.

The new Secretary of Defence, Mr. McElroy, revoked on Oct. 28 an Order by his predecessor (Mr. Charles E. Wilson) that would have had the effect of reducing by $170,000,000 the amount available for military research, development, testing and evaluation of new weapons. [This Order had been issued by Mr. Wilson on Aug. 17 before his resignation from the Defence Department.] In a statement the same evening, Mr. McElroy announced that the Services' basic research programmes " will be restored to the general levels justified to Congress and authorized within the 1958 fiscal year appropriations." The " McElroy Order " was aimed in particular at the Air Force, which in recent weeks had ordered a five per cent cut in its basic research contracts for economy reasons. A. CANADA. — World's Largest Hydro-electric Project for British Columbia.

An agreement for the construction of a vast hydro-electric project on the Peace River in British Columbia was signed in Victoria (B.C.) on Oct. 8 by the Provincial Premier, Mr. W. A. C. Bennett, and the Wenner-Gren B.C. Development Company Ltd., representing Mr. Axel Wenner-Gren (the Swedish financier) and the Wenner-Gren Foundation.

The scheme, which will be the largest hydro-electric project in the world, will produce 4,000,000 horsepower i.e. four times the power produced by the Boulder Dam in the U.S.A., at present the world's largest hydro-electric plant. It will provide electricity throughout British Columbia and also for Alberta, as well as for the U.S.A. if required. A report submitted by the British Thomson-Houston Company proposed that the dam should be constructed on the Peace River, between the junction of the Finlay and Parsnip rivers and the Alberta border, to create a lake 260 miles long— the largest artificial lake in the world—reaching down the Rocky Mountain Trench towards Prince George. The lake will take seven years to fill and power supplies are expected to start by 1964. The total cost is estimated at between $400,000,000 and $600,000,000 (£150,000,000 to £220,000,000).

The final execution of the plan will depend on detailed geological investigations of the feasibility of erecting the dam, and on the preparation by the Wenner-Gren Foundation of plans for financing the project. Preliminary surveys had already shown that it was feasible to establish the project in the Rocky Mountain Trench — a huge geological fault, 10-20 miles wide, which runs from the United States north-westward through British Columbia and into the Yukon territory.

Mr. R. W. Bonner, Attorney-General and Minister of Industrial Development, Trade and Commerce in the British Columbian Government, said in London on Oct. 9 that it was expected that Canadian, British, and European capital would be jointly employed in financing the project, which would " roll our habitable and industrial frontier northward by about 500 miles."—(Montreal Star - Manchester Guardian - Board of Trade Journal) **(Prev. rep. Power Projects, 14574 A.)**

B. UNITED KINGDOM. — £3,500,000 Expansion Plan for Birmingham University. - " University City " planned for Edgbaston.

Details of a £3,500,000 building programme for the University of Birmingham, designed to concentrate all the faculties at Edgbaston, were announced on Oct. 27. Most of the new buildings are expected to be ready by 1961, and the project is designed to increase the number of students from the present figure of 3,700 to 5,500 by 1966.

New buildings to house the departments of Mathematics, Physics, Chemistry, and Civil Engineering will be built at Edgbaston (where there are already a number of University buildings), while the departments of Arts, Law, and Education will also be moved to Edgbaston from the old Mason College site in the centre of Birmingham. The new buildings are expected to be completed by 1960-61, together with a University library already under construction and part of a new refectory. In addition, a new nine-storey building for the Biology department—to be built on a lakeside site - is expected to be partly ready by 1961.

The broad conception of the plan is that of a " university city," comprising a large inner campus of lawns, walks and trees encircled by a ring road enclosing the principal buildings. Plans have also been drawn up for new halls of residence, accommodating some 900 students, to be built on parkland already owned by the University at Edgbaston.

The architects of the scheme are Sir Hugh Casson and Mr. Neville Conder, though different architects will be employed for individual buildings.—(Times - Birmingham Post)
(Prev. rep. 15614 A.)

C. ISRAEL. — Eilat-Ashdod Oil Pipeline.

Mr. Ben-Gurion announced on Sept. 24 that construction of the second part of the oil pipeline from Eilat, on the Gulf of Akaba, to Ashdod, on the Mediterranean, had been completed. The first (Eilat-Beersheba) section had been completed in April last.—(Daily Telegraph) **(Prev. rep. 15528 A.)**

A. UNITED KINGDOM. — Conservative Party. - The 1957 and 1956 Conferences. - New Director of Conservative Central Office.

The 77th annual conference of the Conservative Party was held at Brighton from Oct. 10-12, 1957, under the chairmanship of Mrs. Walter Elliot. The principal resolutions adopted are summarized below :

Anti-Inflationary Policy. The conference adopted a resolution, moved by Mr. Amslie Fairclough (Warrington) urging the Government "to take all necessary steps, including a reduction in Government spending and greater efficiency in the nationalized industries, to stabilize the cost of living, control inflation, and preserve the value of our currency." An amendment calling for an all-out campaign for higher productivity, moved by Mr. R. G. Leeming (Hornsey), was incorporated in the resolution.

The Government's determination to halt inflation was stressed by the Chancellor of the Exchequer (Mr. Peter Thorneycroft) during the debate on the resolution. The Chancellor reviewed the general economic situation, and discussed the Government's economic policy, in terms broadly similar to those of his Mansion House speech of Oct. 8 (see 15800 A) and of his earlier speeches in July last (see 15673 A).

Taxation. With a few dissenting votes, the conference accepted a motion by Mr. Harold Powis (Harwich) calling on the Government "to take bold steps to reduce taxation so that individuals can find the savings needed for further capital requirements both in public and private industry." There were 31 other resolutions on the agenda couched in similar terms.

Defence. Initiating a debate on defence, Mr. G. E. McWatters (Bristol South) moved a resolution expressing confidence in the Government's nuclear weapons policy, but urging it not to regard the new weapons as a complete alternative to the more conventional weapons of defence. The resolution was carried with only two dissenting votes after the conference had heard a general exposition of the Government's defence policy by Mr. Duncan Sandys, Minister of Defence.

Agriculture. By a large majority, the conference adopted a resolution by Mr. R. A. Milligan Manby (Louth) congratulating the Government on the success of its agricultural policy, but urging the Government to give careful consideration to the "disposal difficulties" [i.e. surpluses of agricultural products] which the "success of this policy will raise." Mr. Heathcoat Amory (Minister of Agriculture) reviewed the Government's agricultural policy in the debate on the resolution.

Party Publicity and Propaganda. With two dissentients, the conference approved a resolution by Mr. S. Plaister (Solihull) stating that "Conservative Party propaganda should be more clearly explained and issued in terms more easily understood by the general public, with special emphasis on a direct appeal to the uncommitted voter."

Foreign Policy. Mr. Ronald Bartle (Lecturer in Law, City of London College) moved a resolution stating that "this conference, while fully supporting the principles and objects of the United Nations, recognizes that the vital interests of Britain must always remain the paramount consideration in the conduct of foreign affairs by the Government."

The resolution was carried with only two dissenting votes after a comprehensive review of the Government's foreign policy by Mr. Selwyn Lloyd, the Foreign Secretary. In the course of his speech Mr. Lloyd stressed that Britain could not play the role of a neutral "in the great struggle between the human values as the Communists see them and our Western systems, whatever their imperfections." This did not mean that Britain should not have an independent line of approach from time to time on particular political problems, but "on the great issues I believe that the American people and the British people think alike. It would be playing into the hands of the Communists to let it be thought that in this conflict we were casting ourselves for the role of neutral. We cannot contract out . . ."

European Free Trade Area. By a large majority, the conference endorsed a resolution by Mr. T. M. Jopling (Thirsk and Malton) which (i) declared that the conference would welcome the inclusion of the United Kingdom "in a European partial free trade area," and (ii) congratulated the Government on "its avowed determination to keep agricultural products outside the organization and to preserve the Commonwealth tie."

Sir David Eccles (President of the Board of Trade) recalled that Britain's projected association with the European Free Trade Area had been discussed at the recent meeting of Commonwealth Finance Ministers in Canada (see 15796 A). Following that meeting, he could say with certainty (i) that the whole Commonwealth had examined and approved Britain's association with the Free Trade Area, and (ii) that Britain had "fresh and firm prospects of even bigger expansion of trade within the Commonwealth." He added : "The Europeans do not want free trade in foodstuffs but a managed market. We are ready to discuss that with them provided that in no way do we damage our own domestic agricultural policy."

Liberty of the Subject. Unanimous endorsement was given to a resolution, moved by Mr. W. W. Harris (Battersea South), which declared that "this conference, believing that individuality and independence are threatened by the misuse of power within the modern State, and that Socialist policies would aggravate this threat, urges Government action along the lines of the recent report on administrative tribunals and inquiries, and in other ways to strengthen our institutions and protect our rights and liberties"

In moving the resolution, Mr. Harris complained that the conditions which made possible the Crichel Down case, and other examples of "injustice at the hands of bureaucracy," still existed. He also drew attention to the recent "telephone-tapping" disclosures (see 15776 A) and to the fact that the Home Secretary had absolute power to intercept and record any conversation.

Mr. J. E. Simon, Q.C. (Under-Secretary, Home Office) welcomed the resolution and emphasized that the Government shared the general repugnance to telephone-tapping. He pointed out that the Government would announce its decisions on this matter as soon as it received the report of the Committee of Privy Councillors which had been appointed by the Prime Minister.

Industrial Relations. The conference adopted a resolution by Mr. K. V. Cooper (Harrow East) urging the Government "to get to grips with problems between management and labour in industry and to encourage trade union leadership to be responsible and representative." The resolution, as adopted, incorporated an amendment by Mr. G. Beaman (Crewe) urging the Government to tackle the problem of industrial relations in the spirit of the Conservative Party's Industrial Charter [see 8626 A]. Many Conservative trade unionists and shop stewards spoke in support of the resolution.

The Minister of Labour (Mr. Macleod) stressed during the debate that the Government had no intention of interfering with the principle of independent arbitration. Reminding the conference that the Government normally took little part in wage adjustments, he gave the following details of how wage increases came about in 1956—by direct negotiation, 40 per cent; by joint industrial councils, 28 per cent; by wages councils and wages boards, 21 per cent.; by sliding-scale agreements linked to the retail price index, 6 per cent; by miscellaneous forms of voluntary agreement, 2 per cent; and through arbitration, 3 per cent. "Over the whole field," he added, "only 1.7 per cent was attributable to cases in which the Ministry, either by conciliation or other means, had a share in the final settlement."

In the course of his speech Mr. Macleod said that it was "an illusion to think and an impertinence to talk of ten million trade unionists as if they were all devoted followers of the Socialist party. Three million of them vote Conservative—that is one of the central facts of British political life."

Pensions. By an overwhelming majority, the conference adopted a resolution by Mr. J. Arbuthnot, M.P. (Dover) which (*a*) welcomed the consideration given by the Government to the whole basis of pensions; (*b*) said that the conference would support action which enabled pensioners, including war pensioners, to share in the expanding wealth of the community; and (*c*) suggested that use should be made of private enterprise as the only basis on which demands for financial security in old age could be met on sound financial lines.

The Minister of Pensions (Mr. Boyd-Carpenter) intimated during the debate that the Government had decided to increase pensions, pointing out at the same time that increased benefits would necessarily have to be accompanied by "substantial increases" in contributions. [See 15867 A.]

Housing. With six dissentients, the conference approved a resolution by Mr. L. H. Cleaver (Birmingham) which (i) congratulated the Government on the "outstanding success" of its house-building programme, and (ii) urged immediate steps to make home ownership easier, particularly for young married couples, "in accordance with the declared aims of the party to promote a property-owning democracy." In moving the resolution, Mr. Cleaver complained that owner-occupiers were "getting the rough end of the inflationary stick" and demanded the abolition of the Schedule A tax on owner-occupiers.

Speaking of post-war housing, Mr. Henry Brooke (Minister of Housing and Local Government) said that 1,750,000 houses and flats had been built during six years of Conservative rule, whereas less than 1,000,000 had been built during six years of Labour rule. At present new houses were being built by private enterprise at the rate of 122,000 a year, whereas the Labour Government, in its last year of office, had restricted the number built by private enterprise to 22,000. With regard to Mr. Cleaver's complaints, Mr. Brooke said that he could hold out "no prospect" that the Chancellor of the Exchequer would "be able to find the money for reductions of taxation in the directions suggested."

Colonial Policy. With 12 dissenting votes, the conference adopted a resolution by Mr. W. John Peel (prospective candidate for South-East Leicester) urging the Government to explore "all methods of helping the Commonwealth countries to help themselves," and expressing the hope that "false pride" would not prevent such countries from seeking British help.

The only speaker against the resolution, Mr. Harold Soref (Dudley), asked the Government not to "rush" independence on Colonial countries, most of which, he maintained, were not ready for it. After questioning whether there was now more freedom in Ghana then under British rule, he added : "The fear in Ghana is that the rule of law has very largely disappeared with the disappearance of the British administration. That fear is not confined to that territory."

On the other hand, Mr. Clive Bailheu (prospective candidate for North Battersea) urged patience with countries such as Ghana which had newly emerged into nationhood. After saying that the

Prime Minister of Ghana "would not make as many mistakes there as Mr. Gaitskell would make as Prime Minister here," he added: "Dr. Nkrumah has got a hell of a lot to put up with, and only by sympathy can we get his co-operation. By cheap gibes we can only antagonize him and the rest of Africa."

Replying to the debate, Mr. Alport (Under-Secretary, Commonwealth Relations Office) said: "Commonwealth co-operation presupposes that we shall not be too quick to sit in judgment on another Commonwealth country, especially when that other country is a new member handling the dangerous substance of power without great experience or resources. It presupposes that even where conflicts of interest and policy come into being, and where hard things may be said, we on our side will always be fair in our attitude and quick to forget those disagreements."

Highways. The conference adopted a resolution by Mr. John Howard, M.P. (Southampton, Test) urging the Government to accelerate the building of new highways, particularly to the ports.

Mental Health. The conference also adopted a resolution by Mr. H. Berkeley (prospective candidate for Lancaster) calling on the Government to implement as soon as possible the main recommendations of the Royal Commission on mental illness and mental deficiency [see 15654 A].

In a speech at the end of the conference, Lord Hailsham (the new party chairman) declared that the Conservatives intended to attack the ideas and policies of the Labour Party and "beat the daylights out of them." Seizing the chairman's handbell, he rang it for several minutes as he said: "Let us say to the Labour Party: 'Seek not to inquire for whom the bell tolls.' It tolls for them." [A paraphrase of the words of John Donne: "And therefore never seek to know for whom the bell tolls; it tolls for thee."]

The Prime Minister, speaking after the conference had ended, dealt mainly with the economic situation and gave what he described as a "plain man's guide" to the Government's measures to combat inflation. Extracts from Mr. Macmillan's speech are given below:

". . . Our great pre-war problem was unemployment; our great post-war problem has been inflation. Our first responsibility is to see that inflation does not undermine our economic position in the world or endanger the expansion of our economy. We have had our successes. In spite of all our difficulties we have achieved a good surplus in our balance of payments. This year it will be some £200,000,000 . . . We have invested heavily overseas, and in our capacity as the bankers of the sterling area we have had to meet heavy drawings on the central funds from the rapidly developing territories of the Commonwealth.

"At home we have reached, so far as the mass of people are concerned, the highest standard of living in our history. Mr. Bevan has called the people 'an embittered and frustrated industrial mass.' I don't know where he got that impression from. Has he never seen any of those 6,000,000 T.V. aerials which have gone up since 1951? Has he never run across any of the extra 2,000,000 cars and motor-bikes? Does his view embrace none of those houses he didn't build but we did?

"Let us be frank. The wage-earner and the businessman find wages and profits go far above prices. It is the pensioner, the retired man, the people on fixed or nearly fixed incomes, who have borne the burden. I said at Bedford recently, and I say again: 'We have a clear duty to those sections of our people who have not shared in this general prosperity and we intend to discharge it . . .

"The threat to-day does not come from a shortage of money of the type that led to unemployment between the wars. It is no good trying to revive the bogy of Montagu Norman. Everyone is fully employed—indeed, there is if anything a shortage of labour. The danger does not come from too little money in the system. The danger comes from too much. In other words, from inflation.

"Of course, the Government could—but it won't—allow paper money to be created to ensure that for the time being the spiral of wages and prices goes merrily up. But who gains? The wage-earner won't gain in the long run, and all the rest of the community will lose. The spiral won't keep on going up—sooner or later it will blow up. Then all will lose in a common disaster . . . That is where the real threat of unemployment lies—not in the Government's measures to deal with the problem . . .

"We do not seek unemployment—we seek to avert it. And if it ever comes to the people in this country it can only come in one way—it will be a self-inflicted wound . . . Our aim is not to reduce living standards in any section of our people. On the contrary, our fixed purpose is to raise them—and raise them for all. Our aim is not conflict, but unity. Whatever extremists may say, I would urge ordinary men and women of every section of the community to put out of their minds all appeals to prejudice.

"I must say this frankly to the country: Unless we can show commonsense all round, we may, by ill-considered words and deeds, throw away the substance for the shadow, like the dog in the fable. I cannot believe that our people will make the tragic mistake of throwing away the solid benefits which they have gained, and the still more substantial benefits which are within our grasp.

"What we all ought to be doing is seeing how we can produce a bit more, not seeing how we can chisel a bit more off somebody else. I believe that, if they think it over, all those who hold great responsibility, either for the leadership or management of business, or the trade unions, will have these thoughts in mind. In spite of misunderstanding and misinterpretation, we intend to see this thing through. Then our policies will be seen to be not only necessary but fruitful . . .

"In due course the British people will be called upon to make a great decision. The broad divide in our political life is between Socialism and freedom; between those who accept the doctrine that the State should dominate the life of the individual, and those who believe in the highest degree of individual freedom compatible with an ordered community and the common good. That is the choice today, and will be two or three years hence." [The last sentence was generally regarded as implying that the Prime Minister did not contemplate a general election until the Government had completed, or almost completed, its term of office].

The 1956 Conference.

The 1956 party conference took place at Llandudno from Oct. 11-13, 1956, under the chairmanship of Sir Eric Edwards. Held only a fortnight before the Anglo-French intervention in Egypt, following the Israeli attack in the Sinai peninsula, it was largely dominated by the tension then existing in the Middle East. With only one dissenting vote (Mr. William Yates, M.P.) the 4,000 delegates adopted a resolution fully endorsing the Government's handling of the Middle East situation. Sir Anthony Eden, then Prime Minister and party leader, made a speech defining the Government's policy in the Middle East and its general attitude towards the problems of the area.

Apart from endorsing the Government's handling of the Suez crisis, the conference adopted the following resolutions among others:

Industrial Relations. A resolution (moved by Mr. E. J. Brown, Home Counties North Provincial Area Council) welcoming the Government's report on automation and recommending constant consultation with the National Joint Advisory Council for its gradual implementation. A second resolution by Mr. R. Hinton (Watford) was also adopted expressing concern at the damage caused by industrial disputes, and calling for a more determined effort by management and trade unions to improve the conduct of industrial relations. Both resolutions were carried by large majorities.

Mr. Macleod (Minister of Labour) said that the Government had been examining the idea of the "contract of service" first put forward in the party's Industrial Charter 10 years ago. If the conference agreed that the Government should go forward again in this sphere, he intended to invite representatives of the trade unions and employers' organizations to meet under his chairmanship to see how the idea could best be brought into effect.

Replying to a proposal that there should be compulsory secret ballots before strike action was undertaken, Mr. Macleod expressed the view that if every single case of friction were made the subject of a call for a pre-strike ballot, the number of strikes would increase.

Economic Policy. A motion urging the Government to take all possible action to restrict public expenditure, and thus make possible substantial tax reductions, was carried by a large majority. Moved by Mr. R. P. Lee (Nelson and Colne).

Mr. Macmillan (then Chancellor of the Exchequer) spoke of the Government's efforts to obtain savings on defence; justified the "credit squeeze" as a simple, economical, and effective measure; and referred in detail to the question of British association with the European Common Market through the establishment of a Free Trade Area, on which the Government had begun discussions with the other Commonwealth countries.

Public Relations and Propaganda. With only one dissentient, the conference adopted a motion urging the Government "as a matter of top priority to build up a powerful broadcasting system to enable the British viewpoint to reach the millions who at present only hear the other point of view." Moved by Mr. Colin Turner (Enfield East).

Colonial Affairs. A motion pledging full support to the policy of granting new Constitutions to Colonial territories was carried with only a few dissenting votes. Moved by Mr. G. Finsberg (Young Conservative and Unionist Advisory Committee).

Housing. A resolution (adopted unanimously) welcoming the success of the Government's slum-clearance drive, but regretting "that a substantial proportion of the nation's stock of fit houses is exposed to deterioration owing to the operation of the Rent Restriction Acts" and calling on the Government "to bring a just and urgent remedy."

Mr. Sandys, then Minister of Housing and Local Government, announced the Government's intention to introduce legislation for the progressive abolition of rent restriction. [See 15292 A].

Local Government. A resolution (moved by Mr. W. R. Rees-Davies, M.P., Isle of Thanet) calling on the Government to introduce comprehensive legislation to amend the law relating to the structure and finance of local government.

Mr. Enoch Powell (Parliamentary Secretary, Ministry of Housing and Local Government) stated that the Government was proposing to overhaul both local government finance and organization.

National Assistance. A resolution by Mr. R. Bulbrook (North Kensington) urging the Government to examine closely the present system of national assistance administration, so as to check apparent abuses in the spending of public money, was carried by an overwhelming majority. Mr. Bulbrook and other speakers referred to

numerous instances in which people unwilling to work drew national assistance, and to cases in which people spent all their earnings on drink and betting and left their wives to get national assistance for themselves. Wherever weekly payments were being made over a long period, it was said, such cases should be closely examined.

Agriculture. A resolution which (i) recognized that home agriculture could make its contribution to the balance of payments; and (ii) called for arrangements to be made, within the framework of the 1944 Agriculture Act and the Industrial Marketing Acts, under which the industry could plan ahead in the knowledge that changes in economic policy would not undermine its efforts. Moved by Mr. Donald Goodwin (Nantwich).

Capital Punishment. A motion (moved by Mr. P. A. Alcock, City of Oxford, and carried by an overwhelming majority) stating that the conference "emphatically opposes the terms of the Death Penalty (Abolition) Bill but urges that the law of murder be amended to limit the imposition of the death penalty." [See 15600 A.]

Cruelty to Children. A motion urging the Government to introduce severer punishment for those found guilty of cruelty to children. Moved by Mr. L. F. Wass (Enfield).

National Health Service. A resolution urging that facilities under the N.H.S. should be available only to nationals of those countries which offered similar facilities to British citizens. Moved by the Chelsea Conservative Party.

Nationalized Industries. A resolution (carried by an overwhelming majority) urging that "the excessive expenditure of the nationalized industries should be subject to stricter supervision and control." Moved by Miss Hope Hearson (North Devon).

The major speeches were made by Sir Anthony Eden, as stated above; by Mr. Macmillan, then Chancellor of the Exchequer; and by Mr. R. A. Butler, Lord Privy Seal and Leader of the House of Commons.

Mr. Butler recalled that the 1955 conference had asked the Government to deal specifically with four major matters—(1) monopolies and restrictive practices; (2) technical education; (3) help for the aged; and (4) administrative tribunals. As regards the first, the Monopoly and Restrictive Practices Bill had been piloted through the House, and the Government had started an inquiry into restrictive labour practices through the National Joint Advisory Committee. With regard to (2), a £100,000,000 expansion programme for technical education had been launched. As regards (3), the Government had taken steps to help pensioners and retired persons, whilst in connexion with (4) it had appointed a committee under Sir Oliver Franks to inquire into the whole question.

New Director of Conservative Central Office.

It was announced on Aug. 29, 1957, that Sir Stephen Pierssené had resigned as general director of the Conservative Central Office for health reasons and had been succeeded by Mr. W. H. L. Urton, Central Office agent for London. Sir Stephen Pierssené had been general director of the Central Office since 1945.—(Times - Daily Telegraph . Sunday Times)

(Prev. rep. Conservative Party Chairmanship, 15772 A; Party Conferences, 14493 A; 13835 A.)

A. SOUTHERN RHODESIA. — Cabinet Reshuffle.

The following Cabinet changes were announced by the Southern Rhodesian Prime Minister (Mr. Garfield Todd) at a United Rhodesia Party congress, held in Bulawayo during September: (*a*) the Departments of Irrigation and Survey, hitherto administered by Mr. Ellman-Brown (Minister of Housing, Roads, and Road Traffic), would be transferred to Mr. P. B. Fletcher, the Minister of Native Affairs and Lands; (*b*) Mr. Todd himself would relinquish the portfolio of African Education to Mr. A. R. W. Stumbles, the Minister of Internal Affairs; (*c*) Local Government and Town Planning would be incorporated into the Ministry of Housing under Mr. Ellman-Brown; and (*d*) Mr. H. J. Quinton (M.P. for Mazoe) would become Parliamentary Secretary to Mr. Fletcher—an appointment described by Mr. Todd as "a step to bring the Department of African agriculture into harmony with Federal agriculture in general."

Mr. Todd indicated that the Labour portfolio, at present held by him, was becoming "so significant that it should not continue longer than necessary to be just one of the jobs that a Prime Minister does."—(Federal Information Department)

(Prev. rep. 14698 D.)

B. EASTERN GERMANY. — New Minister of State Security. - Herr Mielke succeeds Herr Wollweber.

It was announced in East Berlin on Nov. 1 that Herr Ernst Wollweber (59) had resigned as Minister of State Security for health reasons and had been succeeded by his deputy, Herr Erich Mielke (52). Herr Mielke, like his predecessor, is a veteran Communist, his association with the party going back to the days of the Weimar Republic. He fled to the Soviet Union in 1931 after a shooting incident in Berlin in which two policemen were fatally injured, and the West German police still hold a warrant for his arrest on charges of murder.

(Frankfurter Allgemeine Zeitung) **(Prev. rep. 15267 A.)**

C. NEW GUINEA. — Australian-Dutch Co-operation in New Guinea. - Joint Statement on Future Policy. - Indonesian Reactions.

The following joint statement on the future of New Guinea was issued by the Australian and Netherlands Governments in Canberra and The Hague on Nov. 6:

"(1) The Netherlands and Australian Governments base their policies with regard to the territories of New Guinea, for which they are responsible, on the interests and inalienable rights of their inhabitants in conformity with the provisions and spirit of the U.N. Charter.

"(2) The territories of Netherlands New Guinea, the Australian Trust Territory of New Guinea, and Papua are geographically and ethnologically related, and the future development of their respective populations must benefit from co-operation in policy and administration.

"(3) The Australian and Netherlands Governments are therefore pursuing, and will continue to pursue, policies directed towards the political, economic, social and educational advancement of the peoples in their territories in a manner which recognizes this ethnological and geographical affinity.

"(4) At the same time, the two Governments will continue and strengthen the co-operation at present existing between their respective administrations in the territories.

"(5) In so doing, the two Governments are determined to promote an uninterrupted development of this process until such time as the inhabitants of the territories concerned will be in a position to determine their own future."

The statement coincided with the arrival in Australia of Dr. Helders, the Netherlands Minister of Oversea Territories, following a visit by him to Port Moresby, capital of Australian New Guinea. On Nov. 12 Dr. Helders had discussions in Canberra with Mr. Casey, the Australian Minister for External Affairs, and Mr. Hasluck, Minister for Territories, during which they considered practical measures for improving co-operation between the Australian and Netherlands administrations in New Guinea.

In a statement to the Australian House of Representatives on the same day, Mr. Casey declared that Australia was ready to discuss the question of Dutch New Guinea with Indonesia at any time suitable to the Indonesian Government. Indonesia, however, could be in no doubt about Australia's policy or where her sympathies lay in the dispute over the sovereignty of Western New Guinea. Although he (Mr. Casey) had not had an opportunity to talk with Indonesian Government representatives on his way through Jakarta, he had had long talks with the Indonesian Foreign Minister, Dr. Subandrio, in New York and Saigon, and the Indonesian Government was in no doubt about Australia's attitude. Australia had told the United Nations that though she regretted the reopening of the New Guinea question, which had already been debated three times, she was willing to take part in the U.N. General Assembly's debate on this matter.

The Australian-Dutch statement was criticized on Nov. 6 by Dr. Sastroamidjojo, head of the Indonesian delegation to the United Nations, and former Prime Minister, as "an attempt to influence the peaceful solution of Indonesia's claim to Western New Guinea."

Dr. Subandrio said on Nov. 11 that the meaning of the Dutch-Australian declaration was "not yet clear" to him, but he hoped the impression that it was meant as a military pact against Indonesia was wrong. The concerted efforts in administrative and development work in both parts of New Guinea were common knowledge, but if there was behind the joint statement a move which would lead to a military alliance, "then that will change overnight the whole attitude of all the Asian nations towards the countries of Western Europe." He appealed to the Netherlands Government to reconsider its stand so as to reach a quick settlement of the New Guinea problem which would "satisfy both parties."

Meanwhile a nation-wide campaign for the "liberation of West Irian" had opened in Indonesia on Oct. 28, the Minister of Information (Mr. Subidjo) announcing that it would be conducted in three stages: the first, coinciding with the National Youth Pledge Day, which had already begun; the second to begin on Nov. 10 (Heroes Day); and the third to be launched when the U.N. debate was held. The campaign would be co-ordinated by a Government committee.

A spokesman of the Netherlands Foreign Ministry said on Nov. 6 that co-operation between the Netherlands and Australian administrations in New Guinea had begun in 1953, when an arrangement had defined the fields of this co-operation. It was intended to extend this co-operaton in agriculture, public health, quarantine arrangements, and education, and to improve communications by the establishment of a regular air service.—(Australian News and Information Bureau - Netherlands News Agency - Algemeen Handelsblad, Amsterdam - Indonesian Embassy Press Office, London)

A. ARGENTINA. — Breakdown of Constituent Assembly. - President Aramburu decrees General Elections for February 1958.

The Constituent Assembly, which met for the first time at Santa Fé on Sept. 1 (see 15733 A), disbanded on Nov. 6 after the withdrawal of a majority of its members had left it without the necessary quorum to carry out the constitutional reforms for which it had been elected. Only two measures had been passed by the Assembly in its lifetime of little more than two months : (*a*) approval of the 1853 Constitution as the basic law of the Argentine Republic, thereby giving formal sanction to the Provisional Government's decree of May 1956 which revoked the 1949 *Peronista* Constitution (see 14871 A) ; and (*b*) adoption of a constitutional amendment establishing the rights of labour to participate in the management of industrial enterprises, to share profits, and to strike.

As stated in 15733 A, the 76 members of the Left-wing Radical party led by Dr. Frondizi (the *Unión Cívica Radical Intransigente*, known as the "intransigent" Radicals) had walked out of the Constituent Assembly at the opening session, thus reducing the Assembly's membership from 205 to 129. On Oct. 16 eight representatives of the minority groups also withdrew from the Assembly, together with nine members of the Moderate Radical party (*Unión Cívica Radical del Pueblo*), involving a further reduction in the Assembly's strength to 112. The nine Moderate Radicals—the so-called "Sabatini group" from its leader, Dr. Sabatini—left the Assembly on the ground that it had fulfilled its task by restoring the 1853 Constitution and revoking the *Peronista* Constitution. Finally, the withdrawal on Oct. 26 of the 11 Christian Democratic (Conservative) deputies, grouped as the *Partido Democratica Nacional*, reduced the Assembly's membership to 101 and left it without the quorum needed to fulfil its tasks—i.e. 104 members of its total membership of 205. The Conservatives walked out on the ground that the Moderate Radicals (the largest party in the Assembly) were seeking to insert in the Constitution "totalitarian" and "socialistic" provisions such as State ownership of the oil industry and public utilities, and a Government monopoly of education.

The Constituent Assembly decided on Nov. 6 to disband itself after an all-night debate on a proposal by a group of deputies that force should be used to secure a quorum. The proposal was rejected by 38 votes to 27 on the ground that "a Constitution cannot be written with police aid."

Following the dissolution of the Constituent Assembly, President Aramburu issued a decree on Nov. 18 for the holding of general elections on Feb. 23, 1958. Unlike the Constituent Assembly elections of July last, which were held by proportional representation, it was laid down that the general elections would be held in accordance with the "Saenz Peña" law—i.e. two-thirds of the seats would go to the majority party and one-third to the principal minority party, no provision being made for parties lower in the list. It was also laid down (*a*) that the President would be elected (as in the past) through an electoral college, and not by direct vote ; and (*b*) that the Provisional Government would hand over power to the new constitutional regime on May 1, 1958.

Widespread Industrial Disputes. - General Strikes.

Widespread labour stoppages occurred throughout Argentina during September and October, involving two general strikes and leading to the imposition of a state of siege by the Provisional Government.

Some of Argentina's biggest labour unions—including the General Confederation of Labour in Buenos Aires Province, and the Confederation of Commercial Employees—ordered "sympathy" stoppages on Sept. 19 in support of 45,000 telegraph and telephone workers who had gone on strike the previous day after the Government had refused their demand for a 25 per cent wage increase. During the following week many sectors of the economy were disrupted by a series of strikes and "go-slow" movements, involving a 48-hour stoppage of work by stevedores in the port of Buenos Aires and strikes among meat-packing, oil, building and garment workers, shop assistants, and bank employees.

On Sept. 26 the representatives of 62 unions unanimously agreed to call a 24-hour general strike at midnight on that date. At the same time the unions issued a declaration calling on the Government to abandon the policy of "freezing" wages, to authorize "emergency" wage increases, to stabilize the cost of living, and to meet the demands of the telephone and telegraph workers. The leaders of 27 other unions, however, including powerful groups representing railway workers, garment workers, shop assistants, and commercial employees, urged their members not to take part in the general strike, on the ground that the leaders of the striking unions were actuated solely by political motives and, it was alleged, were dominated by *Peronista* and Communist influences.

Some 500,000 workers obeyed the 24-hour strike call on Sept. 27, including those in the metal, textile, and building industries, and also bank employees ; on the other hand about 1,500,000 workers remained at their jobs, leading to clashes between strikers and non-strikers. The situation continued to deteriorate in the following week as a result of further stoppages of work and go-slow movements, leading on Oct. 4 to the imposition of a state of siege in the City and Province of Buenos Aires. By the latter date the port of Buenos Aires was operating at only 70 per cent efficiency and with only a quarter of the normal number of stevedores, aided by troops ; the meat-packing industry was seriously affected by go-slow movements ; and the garment workers' union had called a nation-wide strike after a lock-out of some thousands of its members. In addition, tele-communications were in a chaotic state as a result of the continued strike of telegraph and telephone employees, over 100,000 lines being affected and Buenos Aires being cut off from telephone communication with seven of the provincial capitals.

Simultaneously with imposing a state of siege -on the ground that normal political development was being jeopardized by "sabotage and unrest"—the Government arrested some 270 labour leaders, many of whom were alleged to be former *Peronistas*. In view of the mounting unrest, President Aramburu and some of his Ministers had discussions on Oct. 11-12 with leaders of the labour unions, who put forward the following demands : (1) wage increases to match the rapidly rising cost of living ; (2) "freezing" of commodity prices ; (3) suspension of the export of commodities needed for home consumption ; (4) lifting of a decree "freezing" all collective bargaining until 1958 ; (5) the release of labour leaders who had been arrested, and (6) the raising of the state of siege. Demands were also made that President Aramburu should dismiss the three Ministers primarily responsible for economic matters Dr. Krieger Vasena (the Finance Minister), Dr. Cueto Rua (Commerce), and Dr. Guevara (Labour).

During these discussions, Dr. Cueto Rua (the principal Government spokesman) insisted that suspension of exports in favour of home consumption would mean "economic suicide," as Argentina needed fuel, raw materials and machinery and could only pay for them by exports He pointed out that in 1925-29 Argentina had exported 51 per cent and consumed 49 per cent of her produce : in 1935-39 she had consumed 57 per cent and exported 43 per cent ; and in 1955 consumption had risen to 80 per cent and exports had fallen to 20 per cent. The Minister also gave figures to show that individual production had declined, and pointed out that other contributory factors in the rise in the cost of living were dearer transport, higher interest charges, more expensive fuel, and higher wages. In the latter connexion he emphasized that any wage increases must be part of a general "package deal" which would involve simultaneous increases in production.

The 62 unions which called the 24-hour strike of Sept. 27 agreed on Oct. 15 to call a 48-hour general strike for Oct. 22-23 in protest against the Government's rejection of their demands and its refusal to agree to wage increases to offset the cost of living. The unions which opposed the earlier strike, however, also opposed the 48-hour strike and instructed their members not to participate. Thus, although the second general strike paralysed large sections of industry, its effects were not universal and the public utilities and transport services were not affected ; moreover, banks, shops and most places of entertainment remained open. All key power and transport installations were heavily guarded by soldiers, sailors and marines, and transport workers (railwaymen, bus conductors and drivers, etc.) were escorted to their work by troops and police to avoid any interference by strikers. The strike was nevertheless total in many sectors, the docks and meat-packing plants being brought to a standstill and most of the country's chemical, metal and rubber factories being unable to operate.

The state of siege in the capital and Buenos Aires province was lifted on Nov. 4 after being in force for a month. At the same time the Government released most of the 1,000 persons who had been arrested during that period. Several further strikes occurred during the first fortnight of November, but these were mostly of a minor character and caused no large-scale disruption of industry.—(New York Times - New York Herald Tribune - Times - Bank of London and South America, Fortnightly Review - Le Monde, Paris) **(Prev. rep. 15733 A.)**

B. GAMBIA. — New Governor.

It was announced in London on Oct. 15 that Mr. E. H. Windley, Minister for Native Affairs in the Kenya Government, had been appointed Governor of the Gambia in succession to Sir Percy Wyn-Harris, whose term of office would expire in May 1958.

Mr. Windley (48), a Rhodesian, was Provincial Commissioner at Nyeri at the outbreak of the Mau Mau emergency and was subsequently promoted Chief Native Commissioner—a post which was transformed under the "Lyttelton Constitution" into its present title of Minister for African Affairs. A fluent Kikuyu-speaker, he made many perilous journeys into forest areas to contact Mau Mau terrorists during the surrender talks early in 1955. Sir Percy Wyn-Harris was also Chief Native Commissioner in Kenya before his appointment in 1949 as Governor of the Gambia.

Mr. Windley is expected to take up his appointment in Bathurst towards the middle of 1958.—(Times)

(Prev. rep. 10262 C.)

C. PAKISTAN. — Cabinet Appointment.

It was announced in Karachi at the beginning of November that Mr. A. Kumar Das had been appointed Minister of State in the Ministry of Commerce.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 15819 A.)**

A. UNITED KINGDOM. — Increases in War Pensions, National Insurance, Old Age Benefits, Industrial Injury Benefits, and National Assistance Grants. - Higher National Insurance Contributions and Exchequer Liability. - Second Reading of National Insurance Bill. - Previous Pensions Legislation.

Increases in pensions, national insurance benefits, and national assistance payments were announced in the House of Commons on Nov. 6 by Mr. Boyd-Carpenter, the Minister of Pensions and National Insurance. The increases, which will be accompanied by higher national insurance contributions, will take effect from the last week of January 1958, or in some cases from early in February. [The Government's intention to raise pensions and benefits had been announced in the Speech from the Throne on Nov. 5—see 15844 A].

Mr. Boyd-Carpenter's statement is summarized below under cross-headings.

War and War Widows' Pensions. The Royal Warrant would be amended so as to raise the basic rate of war pensions for 100 per cent disablement by 17s. 6d. a week (e.g. for a private with 100 per cent disablement from 67s. 6d. to 85s.), with proportionate increases for the less severely disabled. The standard rate for war widows with children, and for widows over 40 or incapacitated, would be raised by 13s. 6d., with appropriate increases for their children; thus a private's widow in these categories would have her own pension raised from 52s. 6d. to 66s. There would also be increases in certain supplementary allowances to war disablement pensioners—e.g. the normal maximum rate of the constant attendance allowance would be raised from 30s. to 35s. (or from 60s. to 70s. in the most serious cases), whilst the unemployability supplement payable to men whose war disability prevented them from working would be increased from 45s. to 55s. The new rates would come into force automatically on the first normal pay day after Jan. 26, 1958. The additional cost to the Exchequer would be £16,500,000 in a full year. Corresponding improvements would be made in disability awards administered by the Service Departments.

National Insurance Pensions. Legislation was being introduced to provide for the raising of the standard rate of National Insurance retirement pensions at the minimum pension age, as well as of sickness and unemployment benefit, from 40s. to 50s. (single person) and from 65s. to 80s. (married couple). The new standard rate of widow's pension would also be 50s., whilst the widowed mother's allowance, including the payment for the first child, would go up to 70s.

Ending of Tobacco Token Scheme. Benefits in kind under this scheme, which had been much criticized as being unfair as between pensioner and pensioner, would be ended (subject to Parliamentary approval of the necessary legislation) from Jan. 26, 1958—the date on which the above-mentioned increases would come into force. The Government proposed, however, that non-contributory old age pensioners should receive a special addition to their pensions of 2s. 4d. a week, the cash equivalent of the tobacco token.

National Insurance Contributions. The higher rates of N.I. pensions and benefits, together with the increase in industrial injuries benefits (see below), would add about £177,000,000 to the expenditure of the National Insurance Fund in the first full year. Higher benefits under a contributory scheme of National Insurance implied higher contributions, and the employed man's contribution would accordingly be increased by 2s. to become 9s. 5d., and the employer's contribution by 1s. 11d. to become 11s. 6d., including the separate National Health Service contribution in each case. The contribution for the self-employed man would be increased by 2s. 3d. to become 11s. 6d., and there would be corresponding increases in other contribution rates. Parallel with this, there would be an immediate increase of about £35,000,000 a year in the supplement from the Exchequer, and in addition the new Bill would increase substantially the long-term Exchequer liability.

Industrial Injury Benefit. The standard rate of benefit under the Industrial Injury Scheme and the 100 per cent disability pension would be increased from 67s. 6d. to 85s., and the widow's pension from 45s. to 56s.

Date of Coming into Force of Increases. If the Bill became law in November the Government intended that the increased rates of retirement pension and widow's benefit should operate by the end of January, and the other new rates of benefit and the new rates of contribution come into force early in February.

National Assistance Grants. The Government had approved proposals by the National Assistance Board for increases in the assistance scales of 5s. for a single householder and 9s. for a married couple, with appropriate increases in other rates. The increases (which took into account the proposed repeal of the tobacco token scheme) would come into effect on Jan. 27, 1958.

A White Paper giving further details of the increases in pensions and benefits, in National Insurance contributions, and in National Assistance scales was published on the same day. The effect of the changes is shown in the tables given below, relating respectively to (1) national insurance, (2) national insurance contributions, (3) war pensions, (4) industrial injury benefits, and (5) national assistance.

National Insurance.

	Present weekly rate	Proposed new rate	Approx. number of current payments
Unemployment benefit	40s.	50s.	
Married women (normal rate)	30s	34s	about 150,000
Sickness benefit	40s.	50s.	
Married women (normal rate)	25s.	34s.	Between 800,000 (summer and 1,200,000 (winter)
Retirement pension (at minimum age)			
Insured person or widow	40s.	50s.	
Uninsured wife of pensioner	25s.	30s.	4,750,000 (rising substantially in 1958)
Widow's allowance (first 13 weeks)	55s.	70s.	About 20,000 at any one time
Widowed mother's allowance (including provision for one child)	56s. 6d	70s.	110,000
Widow's pension	40s.	50s.	210,000
Increases for dependants:			
Wife or other adult	25s.	30s	
First or only child	11s. 6d.*	15s.*	
Other children	3s. 6d.*	7s.*	
Maternity benefits:			
Maternity grant	£10	£12 10s.	770,000 a year
Home confinement grant	£4	£5	300,000 a year
Maternity allowance	40s.	50s.	60,000
Child's special allowance†:			
First or only child, up to	16s. 6d.	20s.	
Other children, up to	8s. 6d.	12s.	
Guardian's allowance	18s.	27s. 6d.	6,000
Death grant (adult) (standard rate)	£20	£25	230,000 a year

* Plus 5s. in the case of widowed mothers' children provided under the 1956 Act.

† A new benefit starting on Nov. 18, 1957.

National Insurance Contributions.

	Employed Persons. Men over 18 Present rate	Women over 18 Present rate
Employee	9s. 5d.	7s. 5d.	7s. 8d.	6s. 0d.
Employer	8s. 1d.	6s. 2d.	6s. 7d.	5s. 1d.
Total	17s. 6d.	13s. 7d.	14s. 3d.	11s. 1d.
Self-employed	11s. 6d	9s. 3d.	9s. 8d.	7s.10d.
Non-employed	9s. 1d.	7s. 4d.	7s. 3d.	5s.10d.

Other rates, e.g. for juveniles, will be increased correspondingly.

War Pensions.

	Present Weekly Rate	New Rate	Number of People Affected
Disablement Pension			
100 per cent rate	67s. 6d.	85s.	580,000
with proportionate increases for lesser disablement, e.g., 20 per cent	13s. 6d.	17s.	
Special Allowances paid with Disablement Pensions			
Constant Attendance Allowance up to	30s.	35s.	9,000
Most serious cases up to	60s.	70s.	
Unemployability supplement	45s.	55s.	18,000
Allowance for Lowered Standard of Occupation up to	27s. 6d.	34s.	10,000
War Widows			
Standard Pension	52s. 6d.	66s.	150,000
Allowance for each child	21s. 6d.	25s.	56,000
Rent allowance, up to	20s.	25s.	2,000
Orphans			
Under 15 years	25s.	30s.	2,000
15 years or over	35s.	40s.	

Industrial Injuries.

	Present weekly rate	Proposed new rate	Approx. number of current payments
Injury Benefit	67s. 6d.	85s.	60,000
Disablement Pension:			
100 per cent rate	67s. 6d.	85s.	150,000
With proportionate incr. for lesser disablement			
Special Allowances paid with Disablement Benefit:			
Constant Attendance Allowance up to	30s.	35s.	2,000
Most serious cases, up to	60s.	70s.	
Unemployability Supplement	40s.	50s.	500
Special Hardship Allowance, up to	27s. 6d.	34s.	73,000

Increases for Dependants :			
Wife or other adult ..	25s.	30s.	
First or only child ..	11s. 6d.	15s.	
Other children	3s. 6d.	7s.	
Widow's Pension (first 13 weeks of widowhood ..	55s.	70s.	14,000
Widow's Pension (Standard Rate)	45s.	56s.	
Allowance for first or only child	16s. 6d.	20s.	12,000
Other children	8s. 6d.	12s.	
Widower's Pension ..	45s.	56s.	

National Assistance.

	Present weekly rate	Proposed new rate
Married Couple	67s.	76s.
Single Householder	40s.	45s.

Appropriate increases are made in the rates for other persons, including dependent children.

The second reading of the National Insurance Bill, implementing the changes in National Insurance and Industrial Injury benefits, was moved by Mr. Boyd-Carpenter in the House of Commons on Nov. 13.

Claiming that the Bill was a " major measure " which would bring about substantial improvements in benefits and have considerable effects on the country's economy, **Mr. Boyd-Carpenter** explained that the Government had not adopted any of the alternative pensions schemes put forward (most of them involving graduated contributions and benefits) because it was clear that they could not be brought into effect for some considerable time. The Government wished to improve the standards of existing pensioners as soon as possible, and realized that this could be done only on the basis of the present system. Graduated contribution schemes, however, were still being studied.

The increase in the number of pensioners which would take place in 1958, combined with the proposed improvements in pension rates, would bring the cost of retirement pensions up to £622,000,000, compared with £463,000,000 in the current year. The total cost of National Insurance benefits in the coming year would be £897,000,000, compared with £685,000,000 in the present year. The Exchequer liability for the service would be increased by about £60,000,000 next year, with an even heavier increase in the long run because of the steady increase in the number of recipients of N.I. benefits. By 1965-66 the direct burden on the Exchequer on the present basis would be £357,000,000, of which £45,000,000 would be a direct result of the passing of the Bill.

The effect of the Bill would be to raise the total contribution by employers and employees together to £708,000,000 in 1958-59, of which employers would find £348,000,000 and employees, self-employed, and non-employed together would find £360,000,000—an increase of £82,000,000 in the employers' contributions and of £85,000,000 in the contributions from employees, the self-employed, and the non-employed. The new contributions amounted to about 7 per cent of average earnings in the manufacturing industries and represented " a first-class bargain." At the new benefit rates a married man aged 65 would receive a pension to an actuarial value of £2,650. If he retired in 1968 he would, at the absolute maximum, have paid £550, and if he retired in 1978 he would have paid only £970.

Regarding the tobacco concessions to certain pensioners, Mr. Boyd-Carpenter explained that M.P.s with direct experience of the concessions felt that the scheme had been difficult and unfair to work, and of doubtful merit and principle. It had been thought for some time that the scheme should be brought to an end, but this could be done fairly only when substantial increases were being made in benefit rates. The Government had given the same increase in benefit, not only to those who had not applied for the tobacco-token concessions, but also to recipients of benefits which did not carry the right to such tokens.

After claiming that the Bill would raise the National Insurance benefit to " a new high level in real terms "—viz., to 7s. 6d. above the 1946 value and 12s. above the 1951 value—Mr. Boyd-Carpenter pointed out that, as matters stood, the increases would have the effect of cutting Income-tax relief for persons who supported elderly or infirm relatives. At present the maximum allowance of £60 was given only when the dependant's income did not exceed £105 a year, and was reduced pound-for-pound for any excess. The Government did not intend that the increases should have this effect, and the Chancellor of the Exchequer had authorized him to say that provision would be made in the next Finance Bill for the income limit in connexion with dependent relative allowances to be raised to £135 a year.

Mr. Hilary Marquand (Lab.), on behalf of the Opposition, criticized the Government's failure to increase the pension increments for postponed retirement; the alleged inadequacy of the increases in allowances for children; and the proposal to withdraw the tobacco concession from old-age pensioners. He announced, however, that in order not to postpone the date on which the increases could be brought into effect, the Opposition would not vote against the second reading but would try to improve the Bill in Committee.

The second reading was accordingly given without a division, a resolution repealing the old age pensioners' tobacco scheme being subsequently carried by 294 votes to 246.

Earlier Pensions Legislation.

An earlier measure—also called the National Insurance Bill—had been enacted on June 6, 1957, after an unopposed passage through Parliament.

The Bill (1) extended eligibility for deferred pension increments—previously restricted to workers who continued to remain at work on reaching retiring age - to retirement pensioners under 70 (65 for women) who decided to return to work; (2) increased from 20s. to 40s. a week the amount which the wife of a man on sickness or unemployment benefit might earn while still qualifying for a dependant's allowance; (3) stipulated that workers normally on a five-day week but placed temporarily on short-time working should receive unemployment benefit only for the days actually lost, but not for Saturdays as well.

Mr. Boyd-Carpenter, in moving the second reading (March 21), said that the Bill implemented certain recommendations of the National Insurance Advisory Committee which had reported in May 1956. He explained that as the law stood at present, a man's decision to retire was irrevocable from the National Insurance standpoint, and if he subsequently decided to resume working he forfeited his pension and did not benefit from any pension increment when he finally retired. The Bill remedied this, and also rectified the anomaly which allowed a man normally working a five-day week to claim an extra day's unemployment benefit on any time he might lose through short-time working. The Bill was expected to affect about 250,000 workers and to cost the National Insurance and Industrial Injuries funds about £1,500,000 and £250,000 a year respectively.

The report of the National Insurance Advisory Committee, referred to by Mr. Boyd-Carpenter, had been published on May 2, 1956. It contained the following recommendations, in addition to those implemented by the Bill :

(1) The maximum amounts which retirement and widowed pensioners might earn without having their pensions reduced should be increased from 40s. to 50s. Above this amount they should lose 6d. pension for every 1s. earned between 50s. and 70s., and 1s. pension for every 1s. earned over 70s. a week.

(2) The existing earnings rule should continue to apply to the net earnings of widowed mothers where these exceeded 60s. a week, but only 6d. should be deducted from pensions for every 1s. earned between 60s. and 70s. a week, and 1s. for each 1s. earned above 70s. The committee estimated that about 20,000 of the 100,000 widowed mothers receiving the allowance had had it reduced because of their earnings.

(3) P.A.Y.E. deductions should not be taken into account in calculating pensioners' net earnings.

The committee's chairman was Sir William Spens.

The following legislation affecting pensions and family allowances had been enacted during 1956.

The Pensions (Increase) Bill. This Bill assisted retired public servants (e.g. civil servants, local government officials, teachers, policemen, postmen, and firemen) to meet the higher cost of living by increasing their pensions by from 6 to 10 per cent, according to length of service. It was enacted on May 17, 1956 after an unopposed passage through both Houses.

The Family Allowances and National Insurance Bill. This measure (*a*) increased family allowances for a third or subsequent child by 2s. a week (i.e. from 8s. to 10s.); (*b*) raised to 17 the upper age-limit at which family allowances are payable in respect of school-children or apprentices; (*c*) raised family allowances to widowed mothers by 5s. a week for each child qualifying for allowances; (*d*) raised from 15 to 16 the age-limit for the payment of allowances for children unable to attend school owing to illness; (*e*) authorized the Government to negotiate reciprocal agreements on family allowances with foreign Governments. The Bill was enacted on July 5, 1956, and the increases authorized came into effect a month later.

Increases for former members of the Armed Forces, broadly corresponding to the increases for civilian pensioners under the Bill, were subsequently effected by Royal Warrants.

Mr. Boyd-Carpenter announced on Nov. 19, 1956 that a new allowance, ranging from 5s. to 15s. a week, would be paid to war pensioners aged 65 or over whose disablement ranked as 40 per cent or more. At the same time the " comforts allowance " for seriously disabled pensioners would be increased from 10s. to 20s. a week and extended to about 13,000 war pensioners who had not previously received it. About 55,000 pensioners were affected by the increases, which came into operation from the first pay-day in February 1957.

A. KENYA. — "Lyttelton Constitution" abandoned. - New Constitutional Proposals. - Rejection by African Members of Legislative Council. - Resignation of European Unofficial Ministers. - Sir Evelyn Baring's Review of Security Situation.

The U.K. Colonial Secretary, Mr. Lennox-Boyd, arrived in Nairobi on Oct. 11 for talks with members of all racial groups in the Legislative Council. These talks were designed to break the deadlock which had existed since March, when the newly-elected African members of the Legislative Council had refused to participate in the Government and had called for the creation of 15 additional African seats (see 15632 A).

Shortly before Mr. Lennox-Boyd's arrival the African group in the Legislative Council had issued a statement on Oct. 8 outlining their demands.

The statement proposed, notably, the introduction of universal adult suffrage on a common roll and the replacement of communal representation by geographical constituencies. On the question of African representation in the Legislature, it said that "self-government in Kenya must wait until the African people are in such strength as effectively to influence public affairs." For such a change to take place, it was necessary for the African population to be adequately represented in the Legislature. The statement went on to describe the White Highlands as "an anachronism that must go," and demanded that all unused land in that area should be acquired by the Government and opened up to Africans, either as individual or co-operative farmers. In addition, there should be a maximum limit to the amount of land which any one person might own.

Other demands made by the African members included: the safeguarding of trade union rights; the immediate introduction of an eight-year period of instruction for all children; integrated schools; effective African representation in local government; the extension of jury service to all races; and the ending of the state of emergency.

The Colonial Secretary's talks failed, however, to produce a settlement, and it was officially announced on Oct. 18 that no agreement had been reached. A Government spokesman explained that the discussions had been discontinued because Mr. Lennox-Boyd felt that he could not accept the African members' proposal that the question of increased African representation in the Legislative Council should be decided before any other issues were discussed.

In a statement after the talks, Mr. Lennox-Boyd said that there were four issues which he had wished to discuss: (1) increased African representation in the Legislative Council without corresponding increases for the other racial groups; (2) African participation in the Government; (3) the joint statement on constitutional changes issued the previous year by all groups in the Legislative Council; (4) the idea "that constitutional development should ensure confident acceptance by all Kenyans of responsibility for each other, with opportunities of mutual service fostered by safeguards for all races."

On the same day (Oct. 18) statements were issued on behalf of the European members and the African members.

Sir Alfred Vincent, chairman of the European elected members, recalled that they had given a public pledge in favour of increased African representation in the Legislative Council (see 15632 A); while the proposal had necessarily been tentative, they had then had in mind an increase of four seats. The European members believed, however, that the precise number of such seats could not be determined in isolation from other outstanding issues.

On behalf of the African members, Mr. Tom Mboya said that the case for increased African representation was "independent, logical and justifiable" and that the African members had insisted that agreement on this question should be "final and unconditional." Mr. Mboya added: "During our discussions the Colonial Secretary and the Governor stated that, much as they regretted the absence of an African in the Council of Ministers, the Government was running smoothly and could continue to do so indefinitely. This we regard as a serious statement, and wish to state that it is unfortunate, unwise, uncalled-for and unrealistic."

Following a visit to Tanganyika, Mr. Lennox-Boyd returned to Nairobi on Nov. 1 for further discussions. Subsequently an unexpected development took place on Nov. 7, when the five "unofficial" Ministers in the Kenya Government tendered their resignations—Mr. Blundell (Agriculture), Mr. Havelock (Local Government), Group-Captain Briggs (European Minister without portfolio), Mr. Nathoo (Works) and Mr. Madan (Asian Minister without portfolio). [Mr. A. H. Windley, the Minister for African Affairs, had previously left the Government following his appointment as Governor of the Gambia—see 15866 B] A statement from Government House explained that "they [the Ministers] have made it clear that their action has been taken to enable the Secretary of State to take the initiative ... The Secretary of State is now, under paragraph 11 of the Command Paper issued at the time of the Lyttelton agreement, free to do so." The statement added that the Governor (Sir Evelyn Baring), in accepting the resignations, had asked the Ministers concerned to remain in office "until such time as he is in a position to reconstitute the Government."

New Constitutional Proposals.

Mr. Lennox-Boyd announced on Nov. 8 that he had reached the conclusion that the "Lyttelton Constitution" had proved unworkable and that, in consequence, a new Constitution would be introduced incorporating the following features:

(1) The number of elected African members in the Legislative Council would be increased from eight to 14, the six new members coming from constituencies "subsequently to be determined."

(2) To reduce the disparity in numbers between the Government and non-Government sides of the Legislative Council, and also to provide a place for Ministers drawing support from more than one community, 12 new non-Government seats would be created, divided equally between Europeans, Africans and Asians; of the latter, one would be an Arab, one an Asian Moslem, and two non-Moslem Indians. The new seats would be filled through election by the Legislative Council, sitting as an electoral college and voting by free and secret ballot. The method of nominating candidates for election to these seats would be determined later.

At the same time, provision would be made to ensure that the Government could appoint sufficient nominated members for it to retain an "adequate" majority in the Legislative Council. Mr. Lennox-Boyd also indicated that the number of seats designed (as were the above) to provide representation on a non-communal basis might be increased within the next 10 years, but that "the proportions between and within the groups will not be varied." In addition, any alteration in the total number of such seats or in the method of filling them would be subject to the approval of the Council of State [see below].

(3) A Council of State would be set up "in order to protect any one community against discriminatory legislation harmful to its interests." The Council would have "certain defined powers of delay, revision and reference" and would be convened "whenever the occasion arises."

(4) Whereas the "Lyttelton Constitution" had provided for only one African Minister, there would in future be two, one of whom would hold the portfolio of housing and the other a portfolio which would include adult education and community development. There would also be an additional "unofficial" European Minister, so that the "unofficial" Ministers would in future comprise four Europeans, two Asians and two Africans. Nevertheless, the division of ministerial portfolios as between officials and unofficials would remain as hitherto. In the case of the unofficial Ministers, the Governor would be entitled, if he considered that there was no suitable member of the Legislative Council willing to accept ministerial office, to appoint a "suitable person preferably, but not necessarily, of the race in question."

(5) Parliamentary Secretaries would in future be named Assistant Ministers. There would be a minimum of three and a maximum of six such posts, two of which would be filled by Africans, one by an Asian, and one by an Arab.

(6) A new seat would be created on the Government bench for a nominated representative from the Northern Province.

(7) The two seats filled by the so-called "corporate" members would not remain beyond 1960.

(8) In any future expansion of the Legislative Council, there would be no additional seats based on election by purely communal electorates.

As regards the abandonment of the "Lyttelton Constitution," Mr. Lennox-Boyd said that he was satisfied that the constitutional arrangements introduced by his predecessor had now become unworkable. In these circumstances the position had reverted to what it was before the emergency, and the British Government was "free to take such action as it may think fit." He also stressed that for many years to come it would be necessary for the Kenya Government to include a certain number of official members, and for ultimate control to remain with a Governor responsible to H.M. Government.

Asian and African Reactions.

The Colonial Secretary's proposals were welcomed by the Asian community but were rejected by the African members of the Legislative Council.

Asian Reactions. Mr. N. S. Mangat, president of the Kenya Indian Congress, described the new arrangements as "a fine example of sagacious statemanship," whilst Mr. Madan, the Asian Minister without portfolio, said that the new system of elected seats was the beginning of a common roll and therefore "a decided advance." He went on: "I would ask the peoples of Kenya not to judge the new constitutional arrangements in terms of racial gains and losses, but as a scheme worked out by a Secretary of State who has left no doubt that his only anxiety is to restore political stability to the country."

African Reactions. The African members of the Legislative Council announced on Nov. 13 that "after very serious consideration" they had decided to reject the new arrangements.

The statement said that it was regrettable that Mr. Lennox-Boyd had chosen "to throw away the golden opportunity presented by the ministerial resignations of Nov. 7" and "to resort instead to the old-fashioned colonial and imperialist technique used in the past to preserve colonial rule and in this case to ensure White-settler domination." Reiterating that the African members' ultimate objective was "undiluted democracy based on universal (one man, one vote) suffrage," the statement asserted that neither the "Lyttelton Constitution" nor the new proposals would lead towards that objective.

The proposed Council of State was described as "unnecessary since ultimate control is still vested in the British Government, in addition to the fact that the Governor has veto powers and the Government has a majority in the Legislature." As an alternative to Mr. Lennox-Boyd's proposals, the statement proposed that a report should be drawn up by a constitutional lawyer and that thereafter the British Government should convene a constitutional conference to be presided over by an impartial chairman.

Governor's Review of Security Situation.

Sir Evelyn Baring reviewed the security situation when opening the new session of the Legislative Council on Oct. 23.

The Governor said that the task which remained was to bring into custody the 150 "hard core" Mau Mau terrorists (including "one leader of note") who were believed to be still at large. He warned, however, that "because of their small number, the skill they have gained in concealing themselves, and the great extent of the territory in which they are hiding, the task may be a long one." As regards rehabilitation, Sir Evelyn said that while the task was a difficult one, a remarkable success had been achieved, since 50,000 detainees and Mau Mau convicts had been released over a period of slightly less than three years. No disorder had resulted from this process, nor had it been necessary to detain for a second time under the emergency regulations any of those released. On the other hand, the men still in custody were "those most deeply imbued with the ugly tenets of the movement" and who accordingly presented an increasingly intractable problem to the Rehabilitation Service.

On the question of reabsorption of former detainees, the Governor stated that an encouraging start had been made on this problem—a total of 12,000 landless Kikuyu families having been reabsorbed to date.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15632 A.)**

A. SOVIET UNION. — Science City for Siberia.

A project for the construction of a "scientific city" in Siberia, to house 12 large research institutes and a new university, was announced on Nov. 16 in a broadcast by Professor Mikhail Lavrentiev, deputy president of the Soviet Academy of Sciences.

Professor Lavrentiev said that the city would be built in the Novosibirsk area, would cover 2,500 acres, and would accommodate 20,000 professors, research workers and students when completed. The first contingent of 1,500-2,000 scientists would settle in the new city in 1958, and the whole project was scheduled for completion within three years at a total cost of about 200,000,000 roubles (approx. £18,000,000). The scientists would come from Moscow, Leningrad, and other parts of the Soviet Union, and the work would include research in nuclear physics, automation, and jet and rocket techniques.

The 12 institutes will be for Mathematics, Nuclear Physics, Thermal Physics, Kinetics of Combustion, Inorganic Chemistry, Geology and Geophysics, Hydrodynamics, Mechanics, Automation and Electronics, Economics and Statistics, Sociology, and Experimental Biology.

Professor Lavrentiev added that the Mechanics Institute hoped to produce robots which would take the place of factory workers, foremen, and "even duty engineers."
(Soviet Embassy Press Department, London) **(15666 B.)**

B. PORTUGAL. — General Elections.

General elections were held on Nov. 3 for a new National Assembly, all the 120 seats being won by the National Union (*União Nacional*)—the Government party supporting Dr. Salazar. Six Opposition candidates stood in Braga (northern Portugal), polling some 800 votes against 3,000 for National Union candidates. Opposition groups had also announced their intention of running candidates in Lisbon, but withdrew them early in October after the Government had ruled that the candidatures had been presented 24 hours too late. In Oporto and Aveiro, Opposition candidates withdrew shortly before the poll after the Government had refused their request to suspend the elections for eight days to enable them to consult the lists of registered voters. It was officially stated that about 1,350,000 electors had gone to the polls, representing about 70 per cent of the total electorate.
(Times - Daily Telegraph - Le Monde, Paris) **(13286 C.)**

C. ETHIOPIA. — First General Elections.

The first general elections in the history of Ethiopia took place between Sept. 11 and Oct. 10 to elect a Chamber of Deputies of 210 members. In accordance with the new Constitution, promulgated in 1955 by the Emperor Haile Selassie on the occasion of his silver jubilee (see 14598 A), the elections were held by universal, direct and secret ballot. All native-born Ethiopian citizens over the age of 21, both men and women, were eligible to vote except for individuals who had been deprived of civil rights or imprisoned on criminal charges. Candidates were required to be at least 25 years of age, to be Ethiopian nationals by birth, and to possess a property qualification - possession of immovable property to the value of at least 1,000 Ethiopian dollars (about £140) or of movable property to a value of at least E.$2,000. In addition, candidatures had to be supported by at least 50 registered voters, and the candidate himself was required to deposit E.$250 (about £36), which was forfeited if he received less than two per cent of the votes in his constituency.

For the purpose of the election the country was divided into 95 electoral districts each containing approximately 200,000 inhabitants. Each district was represented by two deputies, while cities with a population over 30,000 were entitled to one deputy, plus an additional deputy for each 50,000 inhabitants in excess of 30,000 (e.g. Addis Ababa, with an estimated population of 400,000, was represented by eight deputies). As there are no political parties in Ethiopia, the candidates campaigned on their personal records. A total of 491 candidates stood for the 210 seats, including several women. In view of the high rate of illiteracy, the electors voted by dropping coloured cards into boxes over which the photographs of the various candidates were displayed. The total number of votes cast was 3,015,260 out of an electorate of approximately 6,000,000.

The new Chamber of Deputies met for the first time on Nov. 1, by which date 190 members had been elected (including two women), with 20 results still outstanding. On the same day the Emperor nominated a Senate of 35 members, most of them officials experienced in government and administration. The Prime Minister, Bitwoded Makonen Endalkatchaw, was appointed President of the Senate and given the title of Ras—corresponding to a peerage. He had been Premier of Ethiopia since the country was liberated by British forces in 1941.

Under the new Constitution the Emperor retains the prerogative of appointing the Senate, in addition to the direction of foreign affairs and supreme authority over all internal affairs as Head of State.—(Times - Le Monde, Paris, Neue Zürcher Zeitung - New York Times)
(Prev. rep. New Constitution, 14598 A.)

D. FRANCE. — Junior Ministerial Appointments.

M. Gaillard completed his Government on Nov. 18 after lengthy negotiations with the three African parties—the *Rassemblement Démocratique Africain*, the *Mouvement Socialiste Africain*, and the *Convention Africaine*. The following appointments of State Secretaries were accordingly announced in the *Journal Officiel* on Nov. 19: M. Mobido Keita (R.D.A.)—*Présidence du Conseil*; M. Hammadoun Dicko (M.S.A.)—Education; M. Sid Cara (Radical) and M. Abdelkader Barakrok—Algeria; M. Hubert Maga (C.A.)—Under-Secretary of State for Labour and Social Security.

M. Sid Cara and M. Barakrok had held the same posts in the Bourgès-Maunoury Government, whilst M. Dicko and M. Keita had been State Secretaries for *France d'outre-mer*. M. Maga, a headmaster, is deputy for Dahomey.

The appointments brought the number of Secretaries of State to 17, and of Under-Secretaries to two.—(Le Monde)
(Prev. rep. 15847 A.)

E. ISLE OF MAN. — Financial Autonomy.

An agreement was signed at the Home Office in London on Oct. 30 giving the Isle of Man greater control over its financial affairs.

The agreement laid down (1) that the island's finances would be freed from Treasury control as it had been exercised since 1886; (2) that the island would be free to fix its own Customs duties and purchase tax, though rates of duty levied in the island would normally continue (as at present) to be the same as in the United Kingdom; and (3) that the island would also be free to administer certain other services, e.g. harbours, mines, and its own loans. As regards (1), the announcement said: "In recent years this control has been more formal than real, but it is now thought appropriate to give the island the form as well as the substance of freedom from Treasury control."

Legislation giving effect to the agreement will be introduced at Westminster and in the Tynwald.—(Times) **(14030 E.)**

NOVEMBER 23—30, 1957

A. POLAND. — Internal Developments. - Policy Statement by M. Gomulka. - M. Berman and General Radkiewicz expelled from United Workers' Party. - Trial of Former Security Officials. - Large-scale Dissolution of Collective Farms. - Suppression of "Po Prostu." - Rioting in Warsaw. - Purge of United Workers' Party.

The Polish Government and the United Workers' Party (U.W.P.) continued to adhere during 1957 to the liberalized policy which they had adopted in October 1956. Leading members of the U.W.P. associated with the former repressive policy were expelled; former officials of the Ministry of Public Security responsible for the use of illegal methods were sentenced to long terms of imprisonment; the great majority of the collective farms were dissolved; and wages were increased by about 25 per cent. This policy, however, was strongly criticized by the "Stalinist" wing of the U.W.P., whilst other sections of the party (generally referred to as "revisionists") demanded a further development of the liberalizing trend. During October the Government and the U.W.P. adopted a number of measures directed against both wings of the Opposition; the leading "revisionist" journal *Po Prostu* was suppressed, a step which led to serious riots in Warsaw, and the U.W.P. decided to carry out a purge of both "Stalinists" and "revisionists." Details of these and other recent developments in Poland are given below under cross-headings.

Ninth Plenary Session of U.W.P. Central Committee. - Policy Statement by M. Gomulka.

At the ninth plenary session of the U.W.P. Central Committee, held on May 15-18, a detailed policy statement was presented by the party's first secretary, M. Gomulka. In it he reaffirmed his view that Poland's method of achieving Socialism must inevitably differ from that of the Soviet Union, and defended the party's policy on workers' councils, agrarian questions, and relations with the Roman Catholic Church against "Stalinist" criticisms.

"The practice of Socialist construction," M. Gomulka declared, "has demonstrated that there are not and cannot be any universal forms of this construction . . . If the Soviet Union had avoided the disease of the 'cult of personality,' would the Russian road to Socialism have been acceptable to all other countries, and would it have been necessary for them? Probably not, even certainly not . . . Every nation has its own specific features of development, its own history, its own historically determined national characteristics. This fact cannot be overlooked with impunity. These different characteristics constitute an element of the road to Socialism, which is different for each country . . . Such a policy is incompatible with the imitation of the Russian road by other countries. Such imitation was applied in many respects at a time when the individual countries were still lacking their own experience in Socialist construction. It was encouraged by the relations of inequality with the Soviet Union during the domination of the cult of Stalin.

"The stress on historical differences and national characteristics in Socialist construction must not mean the denial of the universal principles deduced from the experience of Socialist construction in the Soviet Union. The under-estimation or negation of the general regularities in Socialist construction which have been experienced by the Soviet Union is nationalist revisionism. It must be combated, and the party and the working class must be protected against it, for it has nothing in common with Socialism. Under-estimation or negation of national features and specific characteristics in Socialist construction is nihilist dogmatism, which must also be eradicated . . ."

M. Gomulka recalled that the previous plenary session in October 1956 (see 15161 A) had mapped out three lines of development—through workers' councils, expansion of the power of people's councils, and development of different economic forms of peasant self-government, all of which constituted important elements of "the Polish road to Socialism." The workers' councils were neither political nor administrative bodies, but "organs through which the working-class directly participated in the management of the national economy." They had originated as "an antidote to certain ailments within the Socialist system" as a result of "the search for new and better forms of economic management and the exercise of State power," and had been based on the experience of the Yugoslav councils, though they had developed in a different direction. Their powers and tasks included such matters as the organization of work, technical progress, labour discipline, and initiation of measures against corruption. Differences of opinion between workers' councils and the management of the establishment concerned would be settled by arbitration commissions, consisting of representatives of central boards, ministries, and the trade unions.

On agricultural policy, M. Gomulka said that the majority of the collective farms established in the past had not stood the test of experience, and the party's new policy, which had been worked out in consultation with the United Peasant Party (U.P.P.), aimed at the development of new forms of co-operative farming, such as supply and purchase, dairy, and market-gardening co-operatives, and of peasant self-government. The workers' councils and the newly-formed "agricultural circles" both had the same aim of raising output; but whereas the former were Socialist in character, peasant self-government was based on private ownership of land. M. Gomulka emphasized that the peasants would not be driven into co-operative farms by coercion or any form of pressure, and expressed confidence that in time they would realize that co-operation was in their own interests. He strongly attacked critics who had denounced the party's agricultural policy as "capitalist," describing such criticisms as "barren, empty, and dogmatic."

The U.W.P., he continued, had corrected its past attitude towards the U.P.P., which it recognized as an independent party and "a permanent element in our political life." He expressed concern, however, at the activities of some U.P.P. organizations which were openly attacking the U.W.P., and declared that the principle of alliance and co-operation between them, which had been accepted by both parties, must be implemented in practice.

On the religious question, M. Gomulka commented that the situation in Poland, which permitted non-compulsory religious teaching in schools, differed not only from that in other Socialist states but also from such countries as France and the U.S.A. "It is clear that this state of affairs is not in accordance with the world outlook of our party," he observed. "Our party must, however, never close its eyes to realities. It starts from the assumption that the idealist view of the world will exist for a long time alongside the materialist world outlook. Believers and non-believers, the Church and Socialism, the People's Government and the Church hierarchy, will also exist for a long time side by side; there is no doubt about it . . . We do not prevent the Church from marching in matters of faith along its road of Roman Catholic doctrine. But the Church should recognize the fact that Poland has changed her former social system, that she is building Socialism. In matters which are of vital concern for the interests of People's Poland and the nation, we want the Church to march together with us along the Polish road. It is on this that the long-term shaping of relations between the State and the Church will largely depend."

Turning to economic problems, M. Gomulka said that the rate of increase in real wages during the past two years had greatly exceeded that provided for in the Five-year Plan. This increase in real wages had led to a shortage of certain commodities, notably butter, which it was planned to import in increased quantities. In the present state of the country's economy, however, it was impossible to find more funds to increase wages. Admitting that short strikes had recently taken place in some factories in support of economic demands, he maintained that strikes in a Socialist state could only harm the strikers themselves and the entire working-class, and were not the way to improve living conditions. "A strike as such," he said, "is an expression of definite contradictions between the working class, or its various sections, and the people's power. These contradictions are not, however, of an antagonistic nature. They can always be resolved by means of mutual understanding between the people's power and the working-class." [The phrasing of this passage strongly suggested the influence of President Mao Tse-tung's theory of "contradictions among the people"—see 15681 A.]

In his concluding section, which dealt with relations with other Communist parties, M. Gomulka stated that differences of opinion existed on certain important points, and suggested in particular that the U.W.P. differed from other parties "in the appraisal of the happenings in Hungary." Such differences, however, did not infringe "the principle of proletarian internationalism," in which connexion M. Gomulka said: "There are comrades both in our own and other parties who think that in order to satisfy the principles of proletarian internationalism, the workers' and Communist parties all over the world must agree absolutely on everything, on every minor detail. We think that this does not have to be so, and that it is even impossible that it could be so." On the other hand, he condemned the attitude of party members who made "unfounded public attacks on the Soviet Union and its Communist Party" as "directed against the unity of the camp of Socialist States."

After praising President Mao Tse-tung's theory of "non-antagonistic contradictions" and "100 blossoming flowers" as "a bold step forward, so far unknown in the practice of Socialist construction in other countries," M. Gomulka continued: "The example of many parties shows that a search for new methods of political work is taking place in the international working-class movement. Our party follows the same road. This search can only be fruitful when it does not obscure the fundamental difference, the fundamental contradictions, between capitalism and socialism. Some of our revisionists lose sight of this difference." The U.W.P., he concluded, would continue to reject "all attempts at polluting our ideology with any forms of nationalism and revisionism, or at distorting it by ossified dogmatism."

In the ensuing discussion M. Gomulka's policy, and especially his agricultural and religious policies, were violently attacked by the "Stalinist" group on the Central Committee, headed by M. Nowak (the Deputy Premier) and M. Mijal (the former Minister of Communal Economy); M. Gomulka, however, was strongly supported by M. Ochab, the Minister of Agriculture and his predecessor as first secretary of the U.W.P. Demands by the "Stalinists" that the Committee's political resolution should include references to the Soviet Union's "leading rôle" and to the "counter-revolution" in Hungary were defeated, and a resolution was adopted fully endorsing the policy outlined by M. Gomulka.

The position of the "Stalinists" was further weakened by the presentation of a report on the responsibility of leading party members for the illegal methods used by the Ministry of Public Security during 1949-55. As a result of this report, the Central Committee announced on May 20 that M. Berman and General Radkiewicz (both former members of the Politburo) had been expelled from the party, but with the right to apply for readmission after three years, and that General Mietkowski (a former Deputy Minister of Public Security) had been permanently expelled. M. Berman had been forced to resign his post as Deputy Premier and his membership of the Politburo in May 1956 (see 14880 A); General Radkiewicz was removed from the Ministry of Public Security in December 1954 and appointed Minister of State Farms, but was dismissed from that post in April 1956 (see 14817 A).

Trial of Former Security Officials.

The trial of Roman Romkowski (formerly Deputy Minister of Public Security and a member of the U.W.P. Central Committee) and of two former officials of the Ministry of Public Security, Jozef Rozanski and Anatol Fejgin, opened in Warsaw on Sept. 16. All three were charged with illegally depriving a number of persons of their freedom and ordering or permitting the use of torture, whilst Romkowski and Rozanski were also accused of personally torturing prisoners to extract confessions from them.

The three accused had been removed from their posts and expelled from the U.W.P. in January 1955 (see 14064 C). Rozanski was arrested and subsequently sentenced to five years' imprisonment, which was reduced to 3½ years under an amnesty, but this had aroused such strong public indignation that a new trial was ordered. Romkowski and Fejgin were arrested in April 1956. At the meeting of the U.W.P. Central Committee in October 1956 it was alleged that Rozanski had personally tortured prisoners by tearing off their fingernails (see 15242 A).

After a secret trial, the accused were found guilty on Nov. 11 of all the charges against them, Romkowski being sentenced to 15 years' imprisonment, Rozanski to 14 years, and Fejgin to 12 years.

Wages Policy. - The Lodz Transport Strike.

The Government announced on Aug. 10 that the price of vodka and other spirits would be increased by 15 per cent, and the extra revenue used to grant wage increases to municipal transport workers, postal workers, nurses, and others who had not benefited by the increases granted to many categories of workers since 1956. In Lodz, however, 5,000 transport workers went on strike on Aug. 12 on the ground that the increases were inadequate, and a number of clashes occurred between strikers and the police. The majority of the strikers voted on Aug. 18 to return to work, but some of them continued to occupy the tramway depots and had to be forcibly evicted. An assurance was given that there would be no victimization, and 19 strike leaders who had been arrested were released after questioning.

A statement published on Sept. 26 in the U.W.P. monthly *Nowe Drogi* forbade party members to organize or take part in strikes, whilst rejecting the view that strike leaders were necessarily "enemies of the party and the people's authority." After pointing out that wages had increased by 30,000,000,000 zlotys since 1956, as compared with an increase of 16,500,000000 zlotys in industrial production, the statement emphasized that further wage increases were impossible without a greater increase in production.

Agricultural Policy.

M. Jaworski, chairman of the National Council on Collective Farms, stated in May that all but 1,958 of the 12,500 collective farms in the country had been dissolved since October 1956; 211 of the dissolved farms had been re-established, however, and 31 new ones formed, making a total of 2,200. It had previously been announced that 500 Government surveyors and agronomists were employed on dividing the land of the dissolved collective farms for redistribution among its former owners.

The *Seym* approved on May 29 a Bill re-establishing the rural co-operative banks, which had been transformed in 1948 into advisory bodies to the National Bank. These banks, which are among the oldest co-operative institutions in Poland, provide credit facilities for peasant farmers and artisans.

Religious Policy.

The *Seym* approved on May 29 a decree on ecclesiastical appointments, which laid down (1) that all clergymen must possess Polish citizenship and must take an oath of allegiance to the State on taking up their posts, and (2) that all appointments of archbishops, bishops and coadjutors must be approved by the Government. On the previous day a Bill had been adopted providing that religious bodies should be treated in the same way as other organizations for purposes of land-tax assessment.

Local Government.

A Bill regulating the elections to local government bodies (which are due to take place in December) was introduced in the *Seym* on Oct. 30. Its main provisions were as follows:

(1) Elections would be by direct and secret ballot, all Polish citizens of 18 years and over having the right to vote and to be elected. The councils would be elected for three years.

(2) To avoid "bureaucracy," the number of members of the higher local government bodies would be reduced and the post of deputy member of a council abolished. On the other hand, in order to increase direct participation by the peasantry and the working-class in local government, the membership of village councils would be increased, and provision made for the election of representatives by large industrial establishments.

(3) Political, trade union, co-operative, and other organizations might nominate candidates. The number of candidates was required to exceed the number of vacant seats, but not by more than one-half. In areas electing one member there would be two candidates.

(4) Councils would be empowered to deprive a member of his mandate for conviction in a criminal case, perjury, "undignified behaviour," or neglect of his duties for at least six months. A councillor could also be recalled by the electorate.

(5) Local government bodies would be forbidden to co-opt members.

Suppression of "Po Prostu." - The Warsaw Riots.

During the early months of 1957 the Press enjoyed greater freedom in Poland than in any other Communist country. Extracts from George Orwell's satire *1984* were printed in a popular Warsaw weekly, and a new edition was published of the *Critique of the Russian Revolution* by the Polish Communist Rosa Luxemburg (1871-1919), in which she emphasized the danger that the dictatorship of the proletariat might degenerate into "the dictatorship of a handful of politicians." The leading spokesman for the "revisionist" tendency inside the U.W.P. was the student weekly *Po Prostu* ("Plain Speaking"), which has a circulation of 150,000, largely outside student circles. Although most of the members of its editorial board belonged to the U.W.P., it frequently published articles exposing examples of dictatorial methods, corruption, embezzlement, and the privileges enjoyed by leading party members.

From September onwards, however, the Press censorship became increasingly strict; the first issue of *Po Prostu* for the new academic year was seized by the censorship, and on Oct. 2 the paper was suppressed. Ten members of the editorial board, including the editor (M. Turski) and the former editor (M. Lasota), were expelled from the U.W.P. on Oct. 16, and six others were reprimanded; M. Lasota, nevertheless retained his seat in the *Seym* as a deputy for Warsaw.

A statement issued by the U.W.P. secretariat on Oct. 4 alleged that for many months the editorial board of *Po Prostu* had opposed the party's policy, and that, although the censorship had suppressed articles in almost every issue and the Central Committee had given repeated warnings, the paper's tone had "deteriorated" rather than improved. The U.W.P. daily *Trybuna Ludu* stated on Oct. 12 that *Po Prostu* had put forward the slogan "all power to the workers' councils," harmed the development of the youth movement, misrepresented the economic situation, favoured "nationalist" tendencies in Poland's relations with the Soviet Union, and "presented such problems as the repatriation of Poles in the U.S.S.R. and Polish-Soviet economic co-operation in a false light."

A protest demonstration on Oct. 3 by some 2,000 students of Warsaw Polytechnic was broken up by the police, who used truncheons and tear-gas to disperse the crowd. On the following evening a larger number of demonstrators marched on the U.W.P. headquarters and further clashes occurred between the students and the police, who had been reinforced by units of the workers' militia. The violence used by the police, who were alleged to have indiscriminately attacked onlookers taking no part in the demonstrations, led to strong protests, and on Oct. 7 the Commander of the Warsaw Police issued a statement expressing regret that a number of people had been accidentally injured.

Street fighting again broke out each evening from Oct. 5-7, but on these occasions the rioters consisted almost entirely of youths of the hooligan type, who attacked the police with stones, bottles, and knives. The Polytechnic students issued a statement on Oct. 6 dissociating themselves from "the activities of trouble-making elements," and the students of Warsaw University, who had taken no part in the demonstrations of Oct. 3-4, co-operated with the police in restoring order.

Another indication of the increasing strictness of the Press censorship was the decision to ban the publication of a new monthly called *Europa*, which was announced only a few days before its first issue was due to appear on Nov. 1. *Europa* was intended to be a non-political review of international literature, and was to have published translations of work by such well-known Western writers as T. S. Eliot, Albert Camus, and Stephen Spender. As a protest against its suppression, four of the five members of the editorial board (all leading writers who had strongly supported M. Gomulka in the past) resigned from the United Workers' Party.

Tenth Plenary Session of U.W.P. Central Committee. - M. Gomulka's Proposals for Party Purge.

At the tenth plenary session of the U.W.P. Central Committee, held on Oct. 24-27, 1957, M. Gomulka proposed that the party congress, which had been fixed for December should be postponed in order to carry out a purge of "revisionists," "dogmatists" and "corrupt elements" inside the party. He also dealt with the economic situation and gave warning that, in the absence of an increase in production, the wage increases which had been granted had given rise to a grave danger of inflation.

As a result of "ideological confusion," M. Gomulka said, the U.W.P. was "only formally unified as an organization." Two wings were at work inside the party which opposed the leadership's policies, although neither had assumed an organized form. The "revisionist" group represented by *Po Prostu* were "spreading defeatism and undermining the Socialist system," and were supported by "disguised opponents of Socialism" who had joined the party for reasons of self-interest. On the other hand, the advocates of a "dogmatic sectarian attitude," by their "longing for a return to the old methods," were isolating the party from the mass of the people and were thus "playing into the hands of forces hostile to Socialism."

The party's 1,300,000 members, M. Gomulka continued, could be divided into three groups: (i) Communists conscious of their purpose; (ii) good but not very active party members; and (iii) people who had joined the party for their own interests. The last group, which was considerable in size, should leave the party. There were also a number of particularly undesirable elements—"trouble-makers" who organized strikes and put forward "demagogic demands"; "devoted followers of the Church and clergy, conducting activities contrary to party policy"; and "speculators and criminal elements who disguise their motives behind a screen of apparent party activity." All these elements should be expelled from the party.

M. Gomulka declared that while the party did not intend to "close the doors of democratic freedom which had been opened since October 1956," freedom of speech could not mean "freedom to tell lies or freedom of propaganda directed against vital Polish interests." A revival of "reactionary and anti-socialist forces," he alleged, had appeared in the United Peasant and Democratic parties, in the Writers' Union, and among intellectuals and students, although the great majority of the nation supported the policy of the party and the Government.

Turning to the economic situation, M. Gomulka stated that during the past 18 months the wages of all employees had increased by 25.7 per cent and those of industrial workers alone by 30.8 per cent, whilst the prices of most articles of everyday use had remained stable or had even fallen. The increases granted during the past year, however, had been due, on the one hand, to the cancellation of Poland's debt to the Soviet Union, the granting of new Soviet credits, and the reduction of investment and defence expenditure, and on the other to "strong pressure for further wage increases." There had not been a corresponding increase in output, and in consequence the purchasing power of the people was greater than the volume of goods on the market. To meet the increase in purchasing power, debts had been incurred abroad and exports reduced, with the result that Poland had an adverse balance of payments.

The economic situation was strained, M. Gomulka emphasized, not because production was not increasing, but because it was increasing too slowly. In the first nine months of 1957 production had risen by 8.6 per cent compared with the corresponding period of 1956, and stocks of coal, oil products, and iron-ore had increased considerably. Workers' councils, which had been established in 4,316 enterprises and had about 75,000 members, had largely contributed to this increase and had been responsible for the development of side-line production in many enterprises. Agricultural output had also risen by about 4 per cent. To maintain market equilibrium, however, it was necessary to economize in State expenditure, revise the investment plan, limit imports, and do everything possible to increase exports.

M. Gomulka stated that between October 1956 and June 1957, 32,000 new handicraft workshops had been established, the number of people employed in handicrafts having increased by 49,000. "We intend to create the best possible conditions for the development of handicrafts, private production, and private trade," he continued. "From private enterprise we require only the observance of legal regulations and of the orders of the State authorities, and timely payment of taxes. We shall treat favourably all honest artisans, merchants, and owners of small establishments, but we shall combat and punish those who are dishonest . . ."

A resolution was adopted by the Central Committee laying down that committees responsible to the Central Control Commission should examine the records of all party members in order to remove "revisionists," "dogmatists," persons guilty of corruption and other abuses, "notorious idlers, trouble-makers, and demagogues." It had previously been announced on Oct. 25 that the party had 1,283,761 members and candidate members, of whom 39.9 per cent were industrial workers, 38.8 per cent office workers, 12.8 per cent peasants, and 4.8 per cent agricultural workers, but that membership had declined by about 100,000 during the first nine months of 1957, of whom 5,077 had been expelled from the party and 12,071 had resigned.—(Polish Embassy Press Office, London - Times - Manchester Guardian - Le Monde, Paris)

A. CZECHOSLOVAKIA. — Death of President Zapotocky. - Election of President Novotny.

M. Antonin Zapotocky, President of the Czechoslovak Republic, died in Prague on Nov. 13 at the age of 72.

Born on Dec. 19, 1884, at Zakolany, in the Kladno coal-mining district of Bohemia, he left school at 14 and subsequently worked as a stonemason in Prague. He joined the Czech Social Democratic Party (of which his father, a tailor, was one of the founders) in 1902, and during the years before the First World War was particularly active in industrial agitation. Conscripted into the Austro-Hungarian Army, he served from 1914-18 on the Italian, Serbian and Rumanian fronts, and after demobilization resumed his political activities in independent Czechoslovakia. He was imprisoned for 2½ years in 1920 for his part in fomenting a wave of strikes and industrial unrest.

M. Zapotocky became a founder-member of the Czechoslovak Communist Party in 1921, following a schism in the Social Democratic Party, and sat as a Communist in the Czechoslovak Parliament from 1925 until the Munich crisis. Captured by the Gestapo in March 1939, following the German invasion of Czechoslovakia, he was sent in 1940 to the Oranienburg concentration camp and remained there for five years until liberated by the Soviet Army in 1945. Returning to Prague at the end of the war, he became chairman of the "Revolutionary Trade Union" organization and turned that organization into an effective instrument of Communist policy. With the late President Gottwald, of whom he was a close collaborator, he played a leading role in the events of February, 1948, which resulted in the Communist seizure of power and the replacement of Dr. Benesh by M. Gottwald in the Presidency. Elected to the post-war National Assembly in 1946, M. Zapotocky became Prime Minister when M. Gottwald became President in 1948. On President Gottwald's death in 1953 he was elected President of the Republic by the National Assembly.

President Zapotocky was the author of two well-known novels of Czech working-class life—*Red Glow Over Kladno* and *New Heroes Will Arise*—and also of a volume of poems.

After lying in state in the Hradcany Castle in Prague, the body of President Zapotocky was cremated on Nov. 18 and the ashes interred with national honours in a hillside mausoleum outside the city. The funeral was attended by the President of the U.S.S.R. (Marshal Voroshilov), the Prime Minister of Eastern Germany (Herr Grotewohl), and other representatives from Communist countries, as well as by members of the Czechoslovak Government and Communist Party. The Czechoslovak Prime Minister, M. Siroky, delivered a funeral oration in Wenceslas Square.

On Nov. 19 the National Assembly elected M. Antonin Novotny (52), the first secretary of the Czechoslovak Communist Party, as President of the Republic in succession to the late President Zapotocky. Like his predecessor, President Novotny was a founder-member of the Czechoslovak Communist Party and has played a leading part in its activities for many years. It was announced that he would remain first secretary of the party (a post he has held since 1953) concurrently with his Presidential office.—(Times - Le Monde)

B. LEBANON. — Cabinet Reorganization.

The Lebanese Prime Minister, M. Sami Solh, formed a new Cabinet on Aug. 14 following the general elections held in June last. Its membership was: M. Sami Solh—Prime Minister, Interior and Justice; Dr. Charles Malik—Foreign Affairs; M. Jamil Mekkaoui—Finance; M. Selim Lahoud—Public Works; Emir Majid Arslan—Defence and Posts; M. Khazem Khalil—Agriculture; M. Joseph Skaff—Health and Social Affairs; M. Farid Kozma—Education and Information. All the Ministers had previously held office, though several portfolios were exchanged.—(Le Monde, Paris)

A. UNITED KINGDOM. — Labour Party. - Policy Statements on Personal Freedom, Housing, Taxation, Pensions, Public Ownership, and Colonial Affairs.

Nine policy statements were published by the Labour Party between June 1956 and September 1957 as the bases of the party's programme at the next general election. The statements were issued in the following chronological order :

(1) June 18, 1956—*Personal Freedom*, subtitled *Labour's Policy for the Individual and Society*; (2) June 25, 1956—*Homes of the Future*, a statement on housing policy; (3) July 8, 1956—*Towards Equality* (subtitled *Labour's Policy for Social Justice*), dealing largely with taxation and related matters; (4) July 22, 1956—*The Plural Society*, defining Labour's policy in multi-racial Colonies; (5) May 16, 1957—*National Superannuation*, subtitled *Labour's Policy for Security in Old Age*; (6) June 1, 1957—a second Colonial policy statement under the title *Economic Aid*; (7) June 7, 1957—a third Colonial policy statement entitled *Smaller Territories*; (8) and (9) July 18, 1957—*Industry and Society*, a statement of the party's future plans on public ownership, and *Public Enterprise*, a review of the nationalized industries.

The Labour Party's intention of setting up working groups to study these and other subjects had been announced in November 1955 by Mr. James Griffiths, deputy leader of the party (see 14680 A). Most of the above-mentioned policy statements were lengthy documents running to 10,000 words or more, short summaries being given below :

Personal Freedom.

This document, dealing primarily with the relations between the individual and the State, made a number of recommendations for changes in the administration of security measures, legal aid, delegated legislation, administrative tribunals, agricultural land tribunals, public inquiries, etc.

"The Labour Party," it was stated, "believes that the State is made for man, not man for the State. We affirm that the individual, though a member of the community, has an inviolable identity with rights of his own. Democratic Socialists strive for two main groups of freedom for all : those 'liberal' freedoms usually called civil liberties, and those freedoms that can exist only in a classless society. Our concept of freedom is therefore wider than that of other parties. The parties of the Right, though they have been forced to concede civil liberties, have opposed the development of the other freedoms. In contrast, Communism is supposed to aim at the classless society but has subordinated the individual to an all-powerful one-party State, ruled by a privileged *élite* responsible to no-one but themselves."

It was stated that the Labour Party aimed at a society resting on the following bases : "(1) concentrations of power—military, political, and economic—should serve the whole community, and not dominate it; (2) privileges of the few must be transformed into rights, available to every citizen; (3) a fairer distribution of wealth and opportunity must be advanced by positive State action, with the assistance of free trade union and co-operative movements; (4) effective civil liberties and an independent judiciary must safeguard personal freedom against abuse of power, either by the State or by any organization."

After noting that the modern State "exercises great control over its citizens and could quickly become oppressive if the safeguards of democracy were not carefully maintained," a number of recommendations were made for the further safeguarding of individual rights. The most important were :

(1) *Civil Liberties.* It was pointed out that while Civil servants could appeal to an advisory board if they were considered unreliable for certain kinds of public employment, workers in private employment on secret defence contracts were also involved. There should therefore be an advisory board for private industry similar to that provided in the Civil Service. Any Civil servant or industrial worker brought before this board should be confronted with a precise charge, unless the Minister personally decided otherwise. Only Ministers, and not the police, M.I.5, or similar bodies, should take actual decisions on a person's reliability.

(2) *Access to the Courts.* There was reason to believe that the right of Government departments to refuse to produce documents in court was not always reasonably exercised. One remedy might be for the Lord Chancellor to decide whether Crown privilege should apply to official documents which a Minister wished to withhold. A method of appeal should also be provided against the Home Secretary's power to refuse to make available the verbatim report of a public trial.

(3) *Delegated Legislation.* The maximum penalties provided for by an Order should never exceed those provided for in the Act under which it was made. The courts must always be able to judge whether a particular Order was within the scope of the Act.

(4) *Administrative Tribunals.* Members of administrative tribunals should, as a general rule, be appointed by the Lord Chancellor and not by Ministers. Hearings should be in public, unless privacy was requested by an applicant on the ground that intimate personal matters were involved. Legal representation should be permitted by agreement of the tribunal. Reports made by a tribunal should normally be published, together with reasons for the decisions reached; but publication of actual recommendations to a Minister might be withheld.

(5) *Agricultural Land Tribunals.* All proposals for dispossession should be referred to the tribunals for decision. Exceptions would be granted only at the written request of the farmer or landlord concerned.

(6) *Public Inquiries.* There were cases where those conducting inquiries should be appointed by the Lord Chancellor and not, as at present, by the Minister whose department was involved. The inspector's report (but not his actual recommendations) should be made available to all the parties appearing at the tribunal, and the Minister should always give reasons for his decision after an inquiry. In special inquiries, such as in the Crichel Down case, witnesses should not be called without being made aware that their reputation might be brought into question. Where possible, a precise statement against them should be made, which they should have the opportunity of refuting.

(7) *Professional Organizations.* If a person joined a professional organization or trade union because of the protection or assistance it gave him, it was reasonable that he should be subject to discipline if he broke the rules. Such discipline, however, should accord with the procedures laid down in the rules, and these procedures should be able to stand the test of impartial criticism.

Housing.

The statement gave details of the Labour Party's plan for the public ownership of rent-controlled tenanted houses—a plan described as "the greatest public ownership project yet undertaken in this country." It envisaged the taking-over by local authorities of some 6,000,000 homes and flats at present occupied by tenants of private landlords.

After saying that Labour's aim was "to ensure a good home or flat, with modern amenities, for each family, at a price it can reasonably be expected to pay," it was pointed out that 6,000,000 of the 7,250,000 houses and flats occupied by tenants of private landlords were rent-controlled, and among them were to be found most of the overcrowded homes and nearly a million scheduled slums.

The statement went on to make the following specific proposals : (1) Houses and flats that were rent-controlled on Jan. 1, 1956, and remained tenant-occupied, should be acquired and improved by the local authorities, fair compensation being paid to the former landlords. (2) Where hardship might be caused, or where the owner had strong domestic or family reasons for retaining the property, landlords would be permitted to apply to the local authority (and in the last resort to appeal to the Minister) to have their property excluded from the plans for acquisition. (3) Houses that were owner-occupied at the time of acquisition, whether partly let or not, would be excluded. (4) Non-profit-making housing associations would be permitted to continue to own and manage estates. (5) After the next Labour Government had consulted with local authorities, the Minister would lay down dates by which time each authority would be expected to complete its programme of acquisition; if they failed, the Minister would have power to make other arrangements to speed up the acquisition. (6) Tenants of houses and flats acquired by the local authority (and of existing council houses) would be given a certain measure of rent control and security of tenure. (7) Local authorities would be expected to modernize houses with a life expectation of 15 years or more, and to do this within a period mutually agreed by the local authority and the Minister.

As regards home ownership, the statement said that Labour policy was to help those who wished to buy their own homes to do so. Since the finding of the initial deposit was one of the main stumbling-blocks, it was suggested that mortgages of 100 per cent of the value of the property should be allowed, with a maximum period of 30 to 35 years for completion of the purchase. The rate of interest of such mortgages should be kept as low as possible.

"Towards Equality."

This document advocated *inter alia* the limitation of large fortunes by taxation, a transfer of wealth from private to public hands, better distribution of wealth among individuals, and the closing of gaps which enabled some people to avoid restrictions on income, e.g. expenses allowances, capital gains, and spending out of capital.

Much of the statement was devoted to discussing methods whereby a "more just" division of income and wealth could be achieved. It was stated that many sources of spending power (capital, capital gains and expenses) were taxed inadequately or not at all, and that a review of existing tax legislation was needed in order to restrict those exemptions and reliefs which were at present being "abused." Examples given of tax avoidance were business expenses, "top hat" pension schemes for higher business executives, and covenants among surtax payers.

The statement said that while the existing system of death duties could be improved so as to have a great impact upon the maldistribution of wealth, it would not go far towards solving the problem until another major cause of inequality—capital gains—had also been tackled. Capital gains saved large estates from severe, permanent reduction by death duties. Ways in which the problem could be tackled were by additional measures of taxation, further public ownership of those types of property which led to the greatest inequality, and a broader distribution of property in private hands by encouraging small and medium savings. They would not propose, however, to tax capital gains arising from such small property transactions as the buying and selling of owner-occupied houses.

[Mr. Gaitskell, who was chairman of the committee which drew up the document, explained at a press conference that some subjects which had an obvious bearing on social equality, e.g. education and security in old age, would be dealt with in detail in later statements. As regards the fiscal proposals, they could not anticipate in detail the Budget secrets of the next Labour Chancellor of the Exchequer.]

National Superannuation.

A scheme of national superannuation, engrafted on to the existing scheme of national insurance, was set out in this policy statement. It proposed an immediate increase from £2 to £3 in the basic pension payable at 65 to all insured workers, together with a superannuation system related to earnings and compulsory for everyone not participating in an approved private scheme or possessing adequate provision for old age.

National Superannuation was defined as "a new kind of National Insurance under which every man or woman who goes out to work will be able to make provision for old age in the way those in superannuation schemes already do." The worker who joined the national scheme would contribute a fixed percentage of his earnings, the employer a somewhat larger percentage, and there would also be an Exchequer grant. Instead of a flat-rate contribution there would be "a graded contribution towards a graded pension." When the scheme was in full operation the worker whose earnings were round about the national average, and who had contributed to it throughout his working life, would get half-pay on retirement. In the transition period, the amount of benefit would depend on the number of years he had contributed.

Every insured worker, including those in approved private schemes, would be entitled to the flat-rate element as at present, whereas only those covered by National Superannuation would receive the new "graded" element. In this way everyone in the country, when they reached the approved age, would draw (1) a flat-rate pension under the existing National Insurance, and (2) a graded pension due to him either from an occupational scheme or from National Superannuation. For this purpose that part of the National Insurance contributions relating to the old-age pension would have to be divided from the rest. All insured workers would continue to pay that part of the National Insurance contribution covering sickness, unemployment, etc. Everyone who was a member of an approved occupational pension scheme would also continue to pay the flat-rate contribution towards his flat-rate State pension, though at a substantially increased rate.

The worker covered by National Superannuation would, in addition to his reduced National Insurance contribution, pay a percentage of his earnings as his National Superannuation contribution, deducted at source and entitling him to a pension composed of both a flat-rate and a wage-related element. Women wage-earners would have the same superannuation rights as men, and—at least in the transitional stage—would retain the privilege of retiring at 60 if they wished. Married women who did not go out to work would retain their present pension rights unchanged. Workers in existing superannuation schemes could choose between remaining in them (if their employer decided to continue his own scheme and it was approved by the Government) or joining the national scheme.

National Superannuation benefit would be based on life earnings, taking account of their real value from boyhood onwards, and of the increase in the national income which had occurred. Contributions in each year of working life would be related to the level of average national earnings in the year when the pension was assessed. To protect pensioners from subsequent inflation, since "the British economy cannot be completely isolated from the effects of price fluctuations on the international markets," a periodic review of pensions was recommended. A new cost-of-living index would be required, relating specially and exclusively to the cost of living of elderly and retired people. Annual adjustments would then be made to restore the full purchasing power of the pension.

As regards the cost of the proposed scheme, it was stated: "It is perfectly true that the proposals would impose an obligation on the nation to allocate a larger slice of the national cake to old people. The acceptance of National Superannuation would involve the nation in a solemn obligation to slow down the improvement of the standard of living of those in work in order to make better provision for the aged. But a steady rise in productivity should enable us to shoulder the burden without undue strain . . ."

"Industry and Society."

This document, running to 20,000 words, was largely complementary to *Towards Equality* (see above). Discussing at great length the Labour Party's attitude towards public ownership, it contained a pledge that the next Labour Government would renationalize the steel and long-distance road haulage industries, and also suggested State acquisition of shares in some of the larger industrial firms as a new method of securing public ownership and control. No detailed plans were presented in this connexion, however, nor any time-table laid down for such action.

The document pointed to the emergence of the large firm as a "most significant development in the modern economy," and one which had "profoundly modified the workings of the economic system and radically reduced the functions of the private shareholder." It asserted that some 500 great firms, each with assets of over £2,500,000, were in fact the "pacemakers" of the whole private sector of the economy, being directly responsible for about 50 per cent of total private investment and indirectly for very much more.

The statement went on to assert that the large companies were increasingly controlled by men who had little or no stake as owners in the companies they ran; that Board rooms had become "increasingly independent in relation to their shareholders"; that the main incentive for private investment today was "not dividends but the prospect of capital gains"; that the influence of private ownership in the large firms, so far as management, production and growth were concerned, was small; and that their managements were "professional, autonomous bodies, self appointed and self-perpetuating."

After saying that private ownership of these firms was "a potent force maintaining and increasing inequality," the statement went on: "A large part of all capital gains originate in this one sector, and their enjoyment is in the main confined to a small section of the population . . . Our conclusion is that the community should have the opportunity of participating in the almost automatic capital gains of industry. This does not mean confiscation or any measures directed in a discriminatory fashion against holdings of equity shares. Our proposals for a capital gains tax, for example, would have a wider coverage than the purely equity field."

There were a number of ways in which the community might become the owner of industrial shares. It could do so as a consequence of the party's National Superannuation proposals through investing part of the accumulated funds in equity shares; death duties could be paid not only in cash but in shares and land as well; and there were other methods through which State ownership in shares was possible. "We would emphasize, however, that it is not our intention that the Government should indulge in a wildly inflationary scramble for shares; both the timing and occasion for acquiring shares will need careful consideration."

In considering firms which might be taken into public ownership, the Labour Party would have in mind industries where the units of production were too numerous and too small to face effectively the challenge of modern technology or overseas competition; industries whose production persistently fell short of home and export demand; and industries dominated by large and powerful corporations whose trading, price, and profit policies were not attuned to the public interest. Forms of public ownership must meet the particular problems involved; e.g. public ownership of a single firm might suffice to break a production bottleneck or restore competition in a monopolized industry. Where public ownership was extended, "full and fair compensation will of course be paid."

After saying that the Labour Party recognized that "under increasingly professional managements" large firms were as a whole serving the nation well, the statement added: "We have no intention of intervening in the management of any firm which is doing a good job. Nevertheless, the virtual absence of shareholder control does mean that the boards of large firms are almost wholly autonomous. They exercise enormous power without being responsible to anybody. They may exercise that power well, but it is hardly satisfactory that there should be no accountability whatever. It is possible that the best way of dealing with this situation is to review the Companies Acts and to develop more definitely forms of public accountability."

In summing up, the document said that the Labour Party reserved the right to extend public ownership to any industry or part of an industry which, after thorough inquiry, was found to be "falling down on the job." It reiterated the party's intention to renationalize the steel industry and long-distance road haulage if it came to power.

"Public Enterprise."

This policy statement reviewed the functioning of the nationalized industries during the past ten years; expressed general satisfaction with the results achieved; but added that this did not mean "that everything is perfect or that there is no room for improvement."

Some 30 recommendations were made in this connexion, mostly of a minor character. They included the following: (1) While there was no general case for subsidies to nationalized industries as such, they should not be expected to jeopardize financial stability by providing uneconomic services when a private industry in similar circumstances would be given a subsidy. Any subsidy should be specific and limited. (2) Salaries of members of the Boards of nationalized industries should be brought more into line with those for comparable jobs elsewhere. (3) More use should be made of consumer surveys. (4) Periodic inquiries into nationalized industries should continue at about 10-yearly intervals.

Colonial Policy.

The Plural Society outlined the Labour Party's political and social policy in multi-racial (i.e. "plural") societies, and pledged the next Labour Government to "direct all Colonial governments to remove all administrative and statutory racial discriminations, except those expressly designed to protect under-privileged racial groups."

After saying that it was Britain's primary duty in Colonial territories to "lay the foundations of full democracy," the statement went on:

"Full democracy includes recognition of the right of different groups in a society to preserve their own culture and customs. Nevertheless, two developments are essential for the creation of a democratic society in Colonies in which racial group-consciousness is strong. First, the consciousness of belonging to a nation must become so strong that all people, of whatever race or colour, will feel themselves to be Kenyans, Tanganyikans, Rhodesians, Malayans, West Indians, or Fijians rather than only, or primarily, Europeans, Africans, or Chinese, or whites, blacks, browns or yellows. Secondly, political control and organization must increasingly be based on the expression of the will of a nation, each member of which is regarded as an equal human being and not as a member of a racial group. In this process every vestige of the idea of racial superiority or inferiority must be utterly destroyed . . .

"The Labour Party has come to two conclusions: (1) ultimately, the people of each of the Colonial territories have the right to determine which particular form of Constitution . . . best suits their own requirements; (2) the best way of giving the people of each Colony the opportunity of deciding what form of Constitution they desire is to provide for the election of representatives by universal adult suffrage, on the principle of 'one person one vote.' . . . The common electoral roll is the vital test of political democracy in the plural society."

After pointing out that this position could not everywhere be achieved quickly, and discussing various kinds of transitional arrangements, the statement said that "whatever transitional arrangements may be made, Europeans and Asians must be prepared ultimately to accept unqualified African equality as the only permanent basis for democracy."

Detailed proposals were made for ending the "colour bar" in Government services, education, hospitals, transport, factories and industrial enterprises, etc.

Economic Aid committed the next Labour Government to contribute an average of one per cent of the national income for the development of Colonial and backward territories. [At present this figure would be equivalent to about £160,000,000 a year.]

Specifically, it pledged the next Labour Government to (1) increase grants under the Colonial Development and Welfare Acts; (2) increase the British contribution to the U.N. Technical Assistance Board; (3) support the establishment of the proposed Special U.N. Fund for Economic Development (SUNFED); (4) help British Colonies to stabilize their export prices by negotiating long-term bulk purchase agreements; (5) expand the Colonial Development Corporation; and (6) encourage the development of co-operatives in the Colonies.

Smaller Territories outlined the Labour Party's plans for the smaller British Colonies, and contained the following statement of principles:

(1) Every Colony, including the smallest, should have the right of self-determination, including the right to secede from the Commonwealth if it desired. It was hoped, however, that "full and timely recognition of the right of self-determination will encourage the peoples of the Colonies to achieve their full democratic rights within the Commonwealth."

(2) A future Labour Government would aim at "the steady establishment of . . . internal self-government in all the smaller territories as well as in the larger ones."

(3) Territories for which sovereign independence was not physically practicable might achieve membership of a sovereign parliament either by becoming members of a federation or by integration into a sovereign State.

(4) "For those small territories which do not achieve representation in a sovereign parliament, either by integration with the United Kingdom or another Commonwealth State, or by federation, or by secession, the Labour Party proposes the new constitutional status of Dominion."

As regards (4), it was stated that the new status should be defined in terms similar to those in the Statute of Westminster. It would include autonomy in internal and external affairs, and the inhabitants of the smaller Colonies would be able to decide for themselves whether or not to entrust Britain or another Commonwealth State with the responsibility for external relations and defence. "The recognition of Dominion status means that any agreements about bases, defence, and foreign policy will be freely arrived at after the recognition by the United Kingdom of autonomy. It is a contradiction in terms to make the grant of sovereignty dependent upon a prior agreement made whilst the territory is still dependent."

It was stated (*a*) that most of the present Colonies would become full members of the Commonwealth, like Nigeria, or parts of a federation, like Jamaica, or might seek integration with the United Kingdom and representation at Westminster, like Malta; (*b*) that Singapore might become either a Dominion or part of the Malayan Federation; (*c*) that it was "conceivable" that there might one day be a West African Federation, including Sierra Leone and Gambia; (*d*) that Cyprus should have the right of self-determination, after which she might opt for union with Greece or decide to stay in the Commonwealth; (*e*) that territories such as Mauritius, the Seychelles, and the islands of the Atlantic, Pacific and Indian Oceans might become Dominions or integrate with other Commonwealth countries; and (*f*) that a few small communities, such as Pitcairn Island, "may choose to remain much as they are."

The scheme covered 32 territories with a total population of 13,000,000, ranging in size from Bechuanaland to Tristan da Cunha and in population from Sierra Leone (2,250,000) to Pitcairn Island (130). The full list was: Hong Kong, Singapore, Aden, Cyprus, Malta, Gibraltar, Bermuda, the Bahamas, British Guiana, British Honduras, Fiji, Tonga, the Pitcairn, Solomon, and Gilbert and Ellice Islands, the New Hebrides, North Borneo, Sarawak, Brunei, the Seychelles, the Maldives, Mauritius, Zanzibar, British Somaliland, Gambia, Sierra Leone, Bechuanaland, Basutoland, Swaziland, St. Helena, Ascension, and Tristan da Cunha.

[Mr. James Griffiths pointed out at a press conference that the proposals meant, for example, that the people of Hong Kong, Cyprus, and Gibraltar could opt, if they wished, to join China, Greece, and Spain respectively; to remain in the Commonwealth; or to choose independence. The exercise of such freedoms, however, would not be permitted until the individual Colonies were ready for self-government.]

All the above-mentioned policy statements were endorsed at the annual conferences of the Labour Party in 1956 and 1957. Further statements on agriculture and education, to be published in due course, will be submitted to the 1958 conference. In addition, it was decided on Nov. 27, 1957, to set up a working party which would draw up a report on "control of industry," supplementary to the public ownership proposals and containing a statement on the party's attitude to automation.—(Times - Daily Herald - Manchester Guardian)

Note. The 1957 and 1956 party conferences will be summarized in a subsequent article.—*Ed. K.C.A.*

A. FINLAND. — Reorganization of Sukselainen Cabinet. - M. Sukselainen's Resignation. - Non-Party Cabinet formed by M. von Fieandt. - Economic Emergency Measures. - Devaluation of Finnish Mark.

M. Sukselainen's Government resigned on Oct. 18 following an adverse vote in the Finnish Parliament. Prior to his resignation, M. Sukselainen had reorganized his Cabinet on two occasions—on July 2, when the three members of the Swedish People's Party (M. Meinander, the Finance Minister, M. Lindh, Deputy Minister of Agriculture, and M. Nordström, Deputy Minister of Communications) left the Government because of their disagreement with its decision on the question of family allowances (see below); and on Sept. 2, when M. Sukselainen took into the Government representatives of the left-wing "Skog group" of the Social Democratic Party (see 15573 A) in order to broaden the parliamentary basis for an economic programme acceptable to both employers and workers alike.

In the first reshuffle in July M. Miettunen (Agrarian), hitherto Minister of Agriculture, took over the Finance portfolio; M. Karjalinen (Agrarian) became Deputy Minister of Finance; M. Eskola (Agrarian), previously Minister of Communications, became Minister of Agriculture; M. Sarjala (Agrarian), previously Deputy Minister of Finance, went to the Ministry of Communications; M. Tiitu (Agrarian) became Deputy Minister of Communications; and M. Pekka Malinen (Finnish People's Party) became Deputy Minister of Welfare and Social Affairs.

In the second reshuffle in September M. Simonen (Social Democrat) was appointed Deputy Premier; Dr. Söderhjelm (non-party) became Minister of Justice; M. Teuvo Aura (non-party) was appointed Minister of the Interior; M. Pekka Malinen took over the Defence portfolio; M. Lepistö (Social Democrat) was appointed Deputy Minister of Agriculture; M. Sarjala (Agrarian) became Minister of Communications and Public Works; M. Liljeström (Social Democrat) became Deputy Minister of Communications and Public Works; Mme. Aino Malkamäki (Social Democrat) took over the Social Affairs portfolio; and M. Olli Uoti (Social Democrat) was appointed Deputy Minister of Social Affairs. The other portfolios remained unchanged, the reconstructed Cabinet consisting of six Agrarians, five Social Democrats, two members of the Finnish People's Party, and two non-party Ministers. Both employers and unions were represented, the former by Dr. Söderhjelm, general manager of the Central Association of Finnish Woodworking Industries, and the unions by M. Uoti, secretary of the Finnish T.U.C.

The Social Democratic executive council, meeting on Sept. 15 under the chairmanship of M. Tanner, decided by 42 votes to 5 to request the members of the "Skog group" who had accepted ministerial office to leave the Government by the end of the month, on pain of expulsion from the party. The "Skog group," however, described this demand as illegal and refused to recognize its validity. The Social Democratic parliamentary group thereupon decided on Sept. 24, by 24 votes to 19, to expel the five Ministers from the group, though they remained in the party.

Economic Emergency Programmes.

The two reorganizations of M. Sukselainen's Cabinet, and his eventual resignation, were basically due to Finland's economic difficulties caused by rapidly progressing inflation, falling production and exports, rising unemployment, and the critical condition of State finances.

To overcome an acute cash shortage in the Treasury and restore a balanced Budget, the Government had introduced on June 14 an emergency programme which proposed, *inter alia* : (*a*) the abolition of price subsidies for certain farm products ; (*b*) a deferment until 1958 of the family (i.e. children's) allowances for the second quarter of 1957, payable on July 1 ; (*c*) increased retail prices for spirits ; (*d*) a temporary suspension of road building, (*e*) an increase in telephone charges ; and (*f*) a higher licence duty for motor-cars and motor-cycles. These measures were intended to produce 12,900,000,000 Finnish marks in savings and new taxes.

The Diet, however, refused the Government's demand for a deferment of current children's allowances until 1958, whereupon the Government, as a compromise, proposed that the payments should in general be made during the first half of 1958, but that all families in receipt of special family benefits should receive payment of the allowances in July 1957. A Bill incorporating this proposal was given a first reading on June 25 by 101 votes to 88, being supported by the Agrarians, the Swedish People's Party, the Finnish People's Party (Liberals), and the Conservatives.

The Popular Democrats (Communists) thereupon adopted "filibuster" tactics to prevent the Bill's final adoption before July 1 and, supported by the Social Democrats, invoked the Constitutional provision of the Parliament Act whereby a Bill may not be enacted until after the next general election, and its subsequent approval by the new Parliament, if a motion to keep it in abeyance is supported by one-third of the Diet's membership. The Bill was thus held up, leaving the Government's obligation for the immediate payment of the allowances for the second quarter unchanged. A majority of the Cabinet nevertheless decided that while it was impracticable to submit a new Bill to the Diet, it would also be impossible to pay the allowances because of the state of the Treasury's finances. The three Ministers of the Swedish People's Party then resigned, refusing to assume responsibility for this "illegal" situation. Shortly afterwards M. Fagerholm (the Speaker) adjourned the Diet—which had meanwhile passed the other taxation proposals—so as to give the Government time to propose further emergency measures.

The new emergency programme was submitted to the Diet on Aug. 6, the Treasury's position having in the meantime deteriorated to such an extent that payments totalling 20,000,000,000 FM. (or 7 per cent of the Budget) were in arrears. It was proposed, *inter alia*, (*a*) to levy a special tax on incomes of 900,000 FM. (then about £1,300) and over, and on capital and property of 4,000,000 FM. (about £5,900) and over ; (*b*) to treble the duty on matches and double that on cigarettes ; (*c*) to double certain stamp duties ; (*d*) to introduce an export levy for an interim period of one year in the event of devaluation ; (*e*) to advance the collection of the turnover tax ; (*f*) to defer payment of the children's allowances for the third quarter. It was also proposed that Ministers and M.P.s should accept salary cuts.

The Bill for the deferment of the children's allowances was rejected by the Diet on Aug. 27, but Bills incorporating the other proposals were finally adopted on Aug. 20 and Sept. 2 respectively, though in a partly modified form ; e.g. the property limit for the special levy was reduced to 2,500,000 FM (then about £3,700). It was laid down that the proceeds of the export levy, which the Government had intended to be blocked until 1960 as an anti-inflationary measure, and to be used afterwards for the development of the wood and wood-processing industries (Finland's most important export industries), should be used first for the repayment of an earlier Government loan and then for loans to those industries as from July 1958.

Devaluation of the Finnish Mark.

The President of the Bank of Finland, M. Rainer von Fieandt, announced on Sept. 15 that the Finnish mark would be devalued in relation to other currencies by about 39 per cent—viz., from 231 to 320 FM. to the dollar, and from 676 to 896 FM. to the pound sterling. At the same time the special tourist and import rates were abolished.

The tourist rate (introduced in 1952) had been 325 FM. to the dollar and 900 FM. to the pound since the end of 1955. As regards import rates, special arrangements had been in force since 1953 under which exports of certain goods received a premium of up to 20 per cent above parity, while importers of certain goods had to pay a 20 per cent surcharge above the parity rate.

The International Monetary Fund in Washington announced on the same date that it concurred in the proposed devaluation, and that the new par value of the Finnish mark would be 0.00277710 grammes of fine gold, corresponding to the above-mentioned rate of 320 FM. to the dollar.

The devaluation was the sixth since the war, the rate for the dollar having been increased during 1945 in three stages from 49 to 136 FM., in July 1949 from 136 to 160 FM., and in September 1949 from 160 to 231 FM.

M. von Fieandt stated that devaluation had become necessary to redress Finland's balance of payments, which was being distorted by a decline in exports while imports continued unrestricted. The price level of the Finnish economy on the basis of the old exchange rates had been far above the international level for a number of years ; whilst it had been possible to maintain such "unrealistic" exchange rates for a certain time, thanks to favourable export conditions, these conditions had lately deteriorated. He mentioned that the export industries themselves, as well as the trade unions, were supporting the move, and said that the devaluation would open the way to Finland's economic reconstruction on the basis of strict economy in both the public and private sectors.

Simultaneously with devaluing the Finnish mark, the Government took the following measures :

(1) Imports from those countries which had freed the import of Finnish products in at least the same proportion (except for dollar countries) would be freed from restrictions up to 76 per cent as from Oct. 1. Certain relaxations in imports from dollar countries would also be granted.

(2) Until Oct. 31, all prices for home-produced goods, as well as for goods imported before the devaluation, were frozen at their level on Sept. 14.

(3) The Export Levy Act (see above) was brought into effect, the levy ranging from 2.8 to 21 per cent of the export prices of various products.

O.E.E.C Concessions to Finland.

In view of Finland's economic difficulties, special trade and payments arrangements had already been agreed between her and O.E.E.C. member-countries earlier in the year.

The O.E.E.C. had announced on June 12 that the majority of its member-countries having a substantial trade with Finland had agreed in principle to Finnish proposals aimed at correcting the disequilibrium of her balance of payments. These were (i) that during the six-month period from April 1 to Sept. 30 a reduced volume of imports into Finland from these countries should be regulated by global quotas ; (ii) that the countries concerned would, however, maintain or extend their liberalization measures *vis-à-vis* imports from Finland ; and (iii) that they would also give facilities for any balances earned by Finland to be transferable amongst them. As a result of further discussions, detailed arrangements on this basis were agreed during July, the O.E.E.C. member-countries concerned being Austria, Belgium (including Luxemburg), Denmark, France, the German Federal Republic, Italy, the Netherlands, Norway, Sweden, Switzerland, and the United Kingdom.

Resignation of Sukselainen Government. - "Business Cabinet" formed by M. von Fieandt.

The resignation of M. Sukselainen's Government was brought about by a vote in the Diet on Oct. 18, when a motion by the Popular Democratic Union expressing lack of confidence in the Government's economic policy was adopted by 75 votes to 74, with 42 abstentions. The Popular Democrats and the "Tanner group" of the Social Democratic Party supported the motion, whilst the Conservatives, the Swedish People's Party, and some members of the Finnish People's Party abstained from voting.

Following discussions with the party leaders, President Kekkonen invited M. Tanner on Oct. 23 to form a new coalition Government consisting of the Agrarians, Conservatives, Social Democrats, and the Finnish and Swedish Peoples' parties, but M. Tanner was unable to do so because of the Agrarians' refusal to serve under him. After prolonged negotiations M. Sukselainen was asked by the President on Nov. 13 to try to solve the Cabinet crisis, but was similarly unsuccessful in forming either a four-party government (i.e. without the Conservatives) or a government of national union, and gave up the task on Nov. 20. Efforts by Professor Eino Saari (leader of the Finnish People's Party) to form a minority government also failed, and after all other possibilities of forming a minority administration had proved unsuccessful, President Kekkonen decided on Nov. 29 to appoint a "business" Cabinet headed by M. von Fieandt, president of the Bank of Finland. Its membership was announced the same day as follows :

M. Rainer von Fieandt	Prime Minister.
M. P. J. Hynninen	Foreign Minister.
M. Kurt Kaira	Justice.
M. Urho Kiukas	Interior.
M. Kalle Lehmus	Defence.
M. Lauri Hietanen.. . ..	Finance.
M. Reino Oittinen	Education.
M. Hannes Perttula	Agriculture.
M. Lauri Kivekas	Trade.
M. Heikki Waris	Social Affairs.
M. Aku Sumu	Communications and Public Works.
M. Ahti Karjalainen	Deputy Minister of Finance.
M. Paavo Kastari	Deputy Minister of Communications and Public Works.

Of the new Ministers, M. Hynninen (a former secretary-general in the Ministry of Foreign Affairs) has held a number of diplomatic appointments, and M. Kastari was professor of constitutional and international law at Helsinki University. (Finnish Ministry of Foreign Affairs - Bank of Finland Monthly Bulletin - Times - Financial Times - O.E.E.C. Information Division, Paris - I.M.F., Washington) **(15573 A ; 10231 A.)**

A. RHODESIA AND NYASALAND FEDERATION. — Federal Constitution Amendment Bill. - British Government's Advice on Royal Assent. - U.K. Parliamentary Approval. - Lord Home's Visit to Federation.

The U.K. Under-Secretary of State for Commonwealth Relations, Mr. C. J. M. Alport, announced in a written parliamentary reply on Oct. 31 that the British Government had advised that the Royal Assent should be given to the Federal Constitution Amendment Bill.

Mr. Alport said that the Government's decision had been taken (i) after "full and careful consideration" of the report of the African Affairs Board, which had requested that the Bill be reserved for Her Majesty's pleasure because it was a "differentiating measure" (see 15781 A), and of the Federal Government's statement denying this; and (ii) following personal inquiries by Lord Home (Secretary of State for Commonwealth Relations) during his visit to the Federation earlier in October, when he had declared himself "satisfied that it would be right to advise that the Royal Assent should be given."

The Federal Government's statement claimed that if the constitutional changes proposed in the Bill were read with the Government's franchise proposals, the changes, so far from being disadvantageous to Africans, would be advantageous to them for the following reasons: (i) African members of the Federal Assembly would be increased in a greater ratio than other members; (ii) many more Africans would be eligible to participate in the election of the African members and the Special European member for Southern Rhodesia than was the case under the existing arrangements; (iii) for the first time in the history of any of the Territories, or of the Federation, Africans who were British-protected persons would be able to qualify for the ordinary franchise and thus be in a position to influence the election to the Federal Assembly of members of unspecified race.

Lord Home had arrived in Salisbury on Sept. 30 on an 18-day fact-finding visit to the Federation, during which he toured Southern Rhodesia as well as the two Northern Territories. On his arrival he said that he would have "formal and informal discussions" and would "more or less continue the talks I had with Sir Roy Welensky in London," adding that "Dominion status will be among the things we shall discuss." Among those whom Lord Home saw during his tour were the African members of the Federal Parliament representing Nyasaland, and the African members of the Nyasaland Legislative Council, who put forward a demand that Nyasaland should be allowed to secede from the Federation in 1960 and who said that "many Africans prefer the law of the jungle to federation."

In a speech at Blantyre (Nyasaland) on Oct. 11 Lord Home said that federation was "here to stay" and that "the sensible thing" was "to concentrate on making it work to the advantage of all three Territories." Dealing with the economic development of the Federation, he said he had seen many countries, such as Canada and Australia, but never one which had advanced as fast as the Federation in its short existence. It was in the industrial and economic field that joint enterprise and partnership between Europeans and Africans would most surely grow, and social and political integration would follow "naturally and certainly" out of economic integration.

At an interview in Salisbury on Oct. 15 Lord Home said that he thought it would be an extreme statement to say that most Africans opposed federation, since many of them had no clear idea of its meaning, purpose and achievements. Whereas in Nyasaland he had met more virulent opposition from the African parliamentary representatives, in Northern Rhodesia he had found no real opposition to federation but only an anxiety about how it was working. Africans had expressed the view that the economic benefits of federation were not everything, and that if they had to choose they preferred political freedom. There was fear that the Europeans might use the political machinery of federation to keep Africans in a condition of permanent inferiority, but he thought that those fears could be removed if the political purpose of federation could be clarified, and if the African was convinced that its purpose was not that he should be exploited but that he should be gradually brought into full partnership. Lord Home urged greater information and publicity to emphasize the benefits of federation, "particularly the economic benefits which are specially enjoyed by Nyasaland."

U.K. Parliamentary Debate.

The British Government's decision to advise the Queen to give the Royal Assent to the Federal Constitution Amendment Bill was debated in the House of Commons on Nov. 25. The debate was on an Opposition motion "that the draft Order in Council to signify Her Majesty's assent to the . . . Bill . . . be not submitted to Her Majesty."

Mr. Callaghan (Lab.), the principal Opposition spokesman, said that the Opposition were expressing the apprehensions and doubts of many people. In this connexion he referred to articles in *The Times* and *The Observer* stressing the Government's heavy responsibility, and to statements issued on Nov. 23 by the International Department of the British Council of Churches and by the T.U.C. General Council [see below]. He asserted that the proposed increase in the size of the Federal Assembly was unnecessary, as the Assembly had run well with its present 35 members. Moreover, the Bill had only been passed by one vote more than the two-thirds majority needed, and in the present troubled state of opinion in Africa the Government was pursuing a wrong course in adding to the difficulties. He asked whether it had ever been in the mind of the Government, during the discussions in Parliament before the creation of the Federation in 1953, that the House should be considering a Bill of this nature in advance of the constitutional review due in 1960. When Mr. Alport nodded assent, Mr. Callaghan expressed disagreement and said that that was not the impression given in Central Africa. In his opinion, to introduce a Bill of such a controversial character was a breach of the undertakings and understandings that had gone into the making of the Federal Constitution.

Everyone (Mr. Callaghan continued) had been led to believe, in the debates of 1952 and 1953, that the African Affairs Board would be there as a constitutional organ to protect the interests of the African people, and that when they had done so H.M. Government "would not try to find legal sophistries to get round them." In increasing the membership of the Assembly, the Bill would add to the influence of the Europeans in electing Africans. In Southern Rhodesia there would be 65,000 European electors and 16,000 African electors, and the latter would be outnumbered by four to one in electing eight African members. In Northern Rhodesia the number of European and African voters would balance, while in Nyasaland there would probably be a majority of African voters. It seemed "ludicrous" that in present circumstances Parliament should allow the Federal Assembly to amend the electoral roll; to attempt to justify this on the ground that it was getting away from racial elections was "hypocrisy at its worst."

Referring to the agreement reached between H.M. Government and Sir Roy Welensky in April last [see 15529 A], in which the Government had undertaken not to initiate any legislation to amend or to repeal any Federal Act or to deal with any matter included in the competence of the Federal Legislature, except at the request of the Federal Government, Mr. Callaghan declared: "I want to make it clear that the Opposition was no party to this convention. The Government may have bound its own hands between now and 1960. It has not bound ours." The Opposition relied on the words laid down by Parliament, and no convention could unwrite those words unless it was acceptable to all parties in Parliament.

In conclusion, Mr. Callaghan said that Members were being asked "to take a step further down the road of handing over control of the people of the two Northern Territories to the Federal Government, against the express wish of every articulate African there." Such action would be regarded in Africa "as one more proof that the British Parliament was deserting the African people." The Opposition, while recognizing the benefits which Europeans had brought to the Territories and the economic advancement that had taken place, believed that no minority group could pretend to govern the Territories for ever to the exclusion of the millions of residents there.

Mr. Alport, on behalf of the Government, maintained that there was no doubt whatever about the justification for the decision to advise the Queen to give her assent to the Constitution Amendment Bill. The Government could not be guided by misconceptions and misunderstandings either at home or in Africa. Where condemnation of the handling of this matter had been expressed in the Press, it had been based almost invariably upon a total misunderstanding of the facts. Where newspapers had studied the facts they had supported the Government's point of view, and had realized—as the *Manchester Guardian* had done—that it was a step forward in bringing representation off a racial basis and into something which was more closely allied with other democratic Assemblies in the world.

It had been clear for some time that an increase in the membership of the Federal Assembly was urgently needed. The Assembly had to deal with the affairs of a very large country. Moreover, the situation might easily arise after the next election that the Federal Government would have a majority not only over the Opposition but also over its own back-benchers as well—a situation which could not be conducive to carrying out the multifarious work of a democratic Assembly efficiently. He (Mr. Alport) was convinced that a Labour Secretary of State would have taken precisely the same decision.

Dealing with the functions of the African Affairs Board, Mr. Alport rejected the Opposition's contention that the Board's views were automatically binding on the Government. "It is wrong to suppose," he declared, "that the Minister is under an obligation, merely because the African Affairs Board has asked for the reservation of this legislation, automatically to support their point of view. Nor do I think it logical, right, or responsible for the Opposition to suggest that he should do so merely to give the Africans of Northern Rhodesia and Nyasaland confidence in the operation of the African Affairs Board, without any regard whatever to the merits of the legislation concerned." He found it difficult to accept the argument of the African Affairs Board that the increase between the European and African representation was necessarily differentiating. That could only be so if it were assumed that the Assembly was permanently divided into racial *blocs*.

In conjunction with the Federal Government and the two Northern Governments, H.M. Government had tried to produce the best possible estimate as to how many people would be entitled to vote as "special roll" candidates. In Southern Rhodesia the total number of Europeans and Africans eligible for the general roll was about 88,000, including about 3,000 or 4,000 Africans; the number eligible

for the special roll was 30,000, the vast majority of them Africans. The ratio would be about two or three to one in favour of the Europeans, but it was reasonable to say that the new representatives of African interests would be far more representative inasmuch as they would be elected by an electorate which contained not 1,000 but possibly 20,000 Africans. In Nyasaland the number of Europeans who might qualify to vote was about 3,500, and the estimate of Africans eligible for the special roll was about 7,000. There were not 2,000 Europeans on the existing roll, and it would be reasonable to conclude that the ratio would be one, two, or three to one in favour of the Africans. In Northern Rhodesia the number of Europeans, including Afrikaners, estimated to be eligible for the general roll was 37,000, but only 16,000 had registered in 1957. The number of Africans eligible on an income basis might be 48,000, though the literacy test would reduce this figure to about 21,000; it was reasonable, however, to conclude that the balance between European and African electors would be broadly on a 50-50 basis.

Therefore, Mr. Alport concluded, "not by the widest stretch of imagination" could the election of the African members be said to be on an overwhelming European roll. Moreover, the acceptance by the Federal Government of the right of British-protected persons to vote in Federal elections was an important concession, constituting a step away from racial politics and towards basing the Federal political pattern on a party system irrespective of race. Far from bringing disabilities to the Africans, the Bill gave them the opportunity for the first time of exercising their vote in Federal elections, and "one of the strongest arguments in favour of the Federal Government's plan" was that it would "give 12,000,000 Africans the chance to gain experience in how to deal with the practical problems of running a democracy." He hoped that the Opposition would treat this question not with any preconceived ideas but on its merits, since nothing could do more harm to Africa than for the Opposition, by dividing the House, "to add to the tensions and misunderstandings which all too often arise from mistaken guidance."

After a number of Conservative Members had supported the Government's view, and Labour Members had expressed themselves against the proposed changes in the Federation, **Mr. James Griffiths** (Colonial Secretary in the Labour Government) said that there was a deep fear among Africans in the two Northern Territories that their rights and land would be handed over to the domination of Southern Rhodesia. If the Government carried out their intention to advise the Queen to give her Assent, the message would go to Africa that the African Affairs Board, on which the Africans had relied for their safeguards, had been set aside by H.M. Government on the first occasion when it had sought to protect them. Mr. Griffiths suggested that the Government should withdraw the measure and agree to have discussions with Sir John Moffat and the African Affairs Board, after which the House could debate the matter further.

Mr. Lennox-Boyd (Colonial Secretary), replying to the debate, began by announcing changes in the procedure for the election of the African members from Nyasaland. He said that for the first elections to the Federal Assembly, the Governor had designated the Nyasaland Protectorate Council as the body which should elect the two specially elected Africans. That Council had consisted of the seven representatives of each of the African Provincial Councils, together with the African members of the Legislative Council—a body with a membership of a little over 20. Both he (the Colonial Secretary) and the Governor thought that this was too circumscribed, and the Governor had therefore promulgated a new regulation under which the election would in future be in the hands of all past and present members of the three Provincial Councils, thereby increasing the electoral college to approximately 240.

Turning to the Constitution Amendment Bill, Mr. Lennox-Boyd said that the proposals were based on the manifest inconvenience of the present Assembly and were in line with the Federal Government's general policy of partnership. He declined Mr. Griffiths' proposal to initiate discussions with Sir John Moffat or the African Affairs Board, saying that H.M. Government would not be able to do so "without a grave breach of the letter and spirit of the Federal Constitution." They had carefully examined the reasons given by the Board for the reservation of the Bill, but were satisfied that it was in the general interests of the Federation and of the African population to proceed with the legislation. Replying to a question whether the Federal Government's franchise Bill would be laid on the table of the House for 40 days, the Colonial Secretary said this would not be the case as it was not a constitutional Bill; in view of its great importance, however, the House would be given a full opportunity to debate its provisions.

Appealing to the Opposition not to divide the House, Mr. Lennox-Boyd said that whilst he believed that the differences between the Government and the Opposition over Central Africa were very small, a vote would be held there and elsewhere as denoting fundamental disagreement. All were deeply anxious to give Africans more political experience; under these proposals they would get it, and the number of elected Africans would immediately be doubled. All were anxious—and no one more than himself—that British-protected persons who formed the majority of the population of Northern Rhodesia and Nyasaland should play their proper part; under these proposals they would get the franchise. All were also anxious to move away from purely racial representation and franchise arrangements, and the present proposals would make a significant contribution to the political partnership which everyone desired.

The Opposition motion was rejected on a division by 301 votes to 245—a Government majority of 56.

The statement of the International Department of the British Council of Churches [referred to by Mr. Callaghan in the debate] expressed "deep concern" about the effect of the Constitution Amendment Bill on the mutual trust and confidence which was the basis of the Federation's progress. "Rightly or wrongly," it said, "the African understanding was that there would be no alteration in the constitutional provisons before 1960. If the British Parliament accepts such variation now, the confidence of the African will be still further undermined. Approval of the Bill at this juncture, in the Department's view, cannot but have lasting consequences in the further deterioration of race relationship."

The T.U.C.'s concern was expressed in a letter by Sir Vincent Tewson, its general secretary, to the Secretary for Commonwealth Relations. On behalf of the Council, Sir Vincent asked that there should be further consideration of the major issues raised in the Bill, and emphasized the importance of maintaining the African Affairs Board "as a safeguard for African interests," and of the need for Britain to exercise her responsibilities "towards the protected persons in the Territories concerned."

The Southern Rhodesia Electoral Amendment Bill, implementing the new franchise provisions for the Colony, was promulgated in the Government Gazette on Oct. 18.

A. UNITED STATES. — Mr. Adlai Stevenson appointed "Consultant" on U.S. Administration's Programme for NATO Meeting.

The White House announced on Nov. 12 that Mr. Adlai E. Stevenson, the Democratic candidate in the last two presidential elections, had agreed to become a "consultant" in shaping the Administration's programme for the December meeting of the North Atlantic Council in Paris. It was stressed that Mr. Stevenson had originally been invited to take part in the formulation of American proposals to be made by President Eisenhower and Mr. Dulles to the other Heads of Government at the NATO meeting, but had declined this offer. He had agreed, however, to be kept informed of policy proposals as they were developing, and to give his comments orally or in writing before final decisions were taken.

Mr. Stevenson said in New York that while he could not undertake any part in formulating President Eisenhower's policies, he would gladly "pre-view" and discuss the Paris proposals before they were put into final shape. Where he was in agreement he would be willing to do all the "missionary work" he could, "privately, publicly, and politically, both in this country and in Europe among our Allies," and he had already furnished the State Department with a memorandum stating his first impressions of the problems to be confronted. In view of the gravity of the situation, he had "both a desire and a duty" to assist the Government, regardless of party or personal convenience. In reply to a question, Mr. Stevenson said that he would be willing to attend the Paris meeting, though his attendance would depend upon the nature of the U.S. proposals, and also on whether the President was willing to propose an increase in the Federal debt limit, which he (Mr. Stevenson) felt would be necessary to deal with the problem of increased foreign aid.

Mr Stevenson had a first meeting on Nov. 18 with Mr. Dulles, with whom he discussed questions connected with the forthcoming Paris session of the North Atlantic Council.

It had previously been announced by the White House on Nov. 6 that the President would meet Congressional leaders of both parties on Dec. 3 prior to the NATO Council meeting.

B. UNITED KINGDOM. — Accountants' Merger.

An extraordinary meeting of members of the Society of Incorporated Accountants passed a resolution on Nov. 1 placing the society in voluntary liquidation and transferring its net assets to the Institute of Chartered Accountants in England and Wales. The decision, taken by 225 votes to 42 (or more than the three-quarters' majority required), completed the merger scheme between the national institutes and the society. Appropriate payments will be made by the English institute to the Scottish and Irish institutes in respect of members joining the latter bodies.—(Times) **(15640 A.)**

C. FRANCE.—Press. - "Franc-Tireur" changes Title.

The left-wing Paris newspaper *Franc-Tireur* changed its title on Nov. 28 to *Paris-Journal*. As hitherto, the paper will not be allied to any of the political parties and will continue to represent independent left-wing non-Communist opinion. Its principal editorial writers remain unchanged, but it has new financial backing and is designed to have a more "popular" appeal than was the case with *Franc-Tireur*. (Le Monde)
(Prev. rep. 14966 E.)

A. UNITED KINGDOM. — Report of Committee of Inquiry into Interception of Communications.

The report of the committee of Privy Councillors appointed to inquire into the interception of telephone and postal communications was published on Oct. 31. It considered that the power to tap telephones was justifiable; that it had been used with the greatest care and circumspection; that it had been effective in detecting major criminals and preventing injury to national security; and that its exercise in these limited spheres should continue, subject to precisely defined conditions and safeguards, but should not be extended. The committee felt that the decision of Lord Tenby (then Major Lloyd-George) to permit the disclosure to the Bar Council of information obtained by "telephone-tapping" was a mistaken one, and recommended that information so obtained should not in future be disclosed to private individuals or bodies. The report is summarized below.

Existing Conditions for Interception of Telephone Communications. The report pointed out that power to intercept letters had been exercised from early times and had been recognized as lawful by a succession of statutes covering the last 200 years. This power extended to telegrams, and it was difficult to resist the view that it was wide enough to cover telephone communications as well. If, however, it was thought that the power to intercept telephone messages was left in an uncertain state, it would be for Parliament to consider what steps ought to be taken to remove all uncertainty.

Interception was only carried out on a warrant from the Home Secretary or the Secretary of State for Scotland, setting out the names and addresses or telephone numbers of the persons concerned. On occasion a single warrant had been issued in the past to cover a number of names, but the committee considered this practice undesirable. The great majority of the warrants for the detection of crime were granted to the Metropolitan Police and the Board of Customs and Excise, and in 1951 three conditions had been laid down for the police and for the Customs that must be satisfied before a warrant could be issued. These were:

(1) The offence must be really serious (i.e. one for which a man with no previous record could reasonably be expected to be sentenced to three years' imprisonment, or one of lesser gravity in which a large number of people were involved).

(2) Normal methods of investigation must have been tried and failed, or must be unlikely to succeed if tried.

(3) There must be good reason to think that an interception would result in a conviction.

Where the Security Service was affected, the Home Office considered each case. The principles governing the issue of warrants were:

(1) There must be a major subversive or espionage activity likely to injure the national interest.

(2) The material likely to be obtained by interception must be of direct use in compiling information necessary to the Security Service in carrying out the tasks laid upon it by the State.

Less stress was laid upon the need to secure convictions, since the Security Service was primarily concerned with safeguarding the State and keeping itself informed about dangers to its security.

Close supervison over the use of methods of interception was maintained by the Home Office, and there was a quarterly review of outstanding warrants by the Permanent Under-Secretary at which the authorities concerned were asked to make a case for their continuance. The committee had found no evidence of interceptions being kept on longer than was thought necessary, but they felt that outstanding warrants should be reviewed more frequently. The report therefore recommended:

(1) A regular review of outstanding warrants not less than once a month, both by the Home Office and by every authority granted a warrant.

(2) Warrants should no longer be valid until cancelled, but their validity should be for a definite period of not more than two months.

(3) The cancellation of a warrant by the authority to whom it was issued should be reported instantly to the Home Office.

(4) Full records of each case of interception should be kept in the Home Office.

The Marrinan Case. The report recalled that it had been the settled policy of the Home Office that, save in the most exceptional cases, information obtained by the interception of communications should not be used as evidence in a court or in any other inquiry. The committee considered that the actions of Sir Hartley Shawcross, in obtaining authority to disclose to the Bar Council and the Benchers of Lincoln's Inn information obtained by "telephone-tapping," and of Lord Tenby, in granting this authority, had been "governed by considerations of the public interest." Sir Hartley Shawcross had been moved by the view that the integrity of the Bar was of vital importance to the administration of justice, whilst Lord Tenby had considered that the circumstances were so exceptional and the ground of the application of such importance that he should depart from the normal procedure.

"We are anxious not to use language which might imply that the decision of Lord Tenby was unreasonable," the report continued. "We recognize that the facts before Lord Tenby were indeed highly exceptional. The fact that the administration of justice was involved was the governing consideration in the mind of Lord Tenby, and it is easily to be understood that the importance of that consideration led him to the conclusion that the action which he took was in all the circumstances of the case justifiable. But we are of the opinion that the power given to the Secretary of State to issue a warrant to intercept communications, whether by letter or by telegram or by telephone, is a power of such importance and consequence that it should be most rigorously confined to the purposes which convinced the Home Secretary that it was right to issue the warrant in the first place." The committee therefore recommended that "there should be no disclosure of the information obtained on public grounds by the exercise of this great power to private individuals or private bodies or domestic tribunals of any kind whatsoever."

Use and Effectiveness of Telephone Interceptions. The report stated that the major uses to which methods of interception were put by the Metropolitan Police were to break up organized gangs, to catch men on the run, and to detect receivers of stolen property. The Board of Customs and Excise had started to use this method in 1946 at a time when exchange control and quota restrictions had led to the illicit export of capital, usually in the form of diamonds, which was estimated to have reached a value of £9,000,000 in 1952 and to be still running at about £6,000,000 a year. Internationally organized by a small group, this traffic was hard to trace by normal means of detection.

The duties of the Security Service were broadly to detect espionage and subversion and to ensure that Communists, Fascists, or their close associates were not employed on work vital to State security. Espionage was carried out by highly trained people who took extreme precautions. Communications were the weakest link in their organization, and without penetration of these communications it would often be impossible to detect major espionage at all.

The committee had received conclusive evidence of the effectiveness of interception. Results directly achieved by this method included the arrest and conviction of a number of Mr. Billy Hill's associates; the recapture of a number of escaped convicts; the conviction of a large-scale smuggler believed to have illicitly exported £6,000,000 in three years; the identification of major spies; the discovery of highly secret material in passage through the post in extremely ingenious forms; and the detection of Communists operating secretly in the Civil Service. During 1953-56 the number of arrests made by the Metropolitan Police in consequence of direct interception had been 57 per cent of the number of telephones tapped, and so far in 1957 every interception but one had led to an arrest. The number of cases of detection of major Customs frauds due to interception had been 80 per cent of the number of interceptions. Although such cases were a small proportion of the total of convictions, they were confined to the biggest and most dangerous offenders, and the most important captures had been made as a result of interceptions.

The committee were satisfied that all the officers and officials concerned were scrupulous and conscientious in the exercise of this power; that interception was used only where there was good reason to believe that a serious offence or security interest was involved; and that the number of people with access to material obtained by interception was kept to an absolute minimum. The evidence had overwhelmingly established that there were continuous, organized, and dangerous efforts to spy out secrets of the State; that similar organized and continuous efforts were made to spread subversion and to penetrate the apparatus of the Government and work of high security; and that methods of interception were often the only effective method of countering espionage and subversion and of safeguarding vital State secrets.

The committee considered that public concern might be in some degree allayed by knowledge of the actual extent of the interception of letters and telephone messages, and accordingly set out the following figures "as an exceptional measure" and in a way which disclosed as little as possible about interceptions by security:

Number of Interceptions Authorized by Secretary of State.

Year	Police, Customs, Post Office, and Security		Drugs, Lotteries, and Obscene Publications		Totals	
	Telephones	Letters	Telephones	Letters	Telephones	Letters
1937	17	335	—	221	17	556
1938	20	422	—	288	20	710
1939	29	643	—	330	29	973
1940	125	1,192	—	365	125	1,557
1941	180	833	—	29	180	862
1942	164	512	—	2	164	514
1943	126	327	—	2	126	329
1944	102	213	—	—	102	213
1945	56	90	—	—	56	90
1946	73	139	—	—	73	139
1947	110	162	—	28	110	190
1948	103	156	—	714	103	870
1949	133	183	—	458	133	641
1950	179	232	—	124	179	356
1951	177	261	—	225	177	486
1952	173	237	—	225	173	462
1953	202	240	—	219	202	459
1954	222	223	—	4	222	227
1955	231	205	10	—	241	205
1956	159	183	—	—	159	183

The average annual number of telephone interceptions in the 20 years was 130, and of letter and telegram interceptions 501.

The committee were strongly of the opinion that it would be wrong for such figures to be disclosed in the future, since even an approximate indication of interceptions for security purposes would greatly aid agencies hostile to the State.

Position of M.P.s. With reference to questions asked in the Commons about the propriety of intercepting the communications of M.P.'s, the committee stated that so far as they had been able to discover an M.P. was not to be distinguished from an ordinary member of the public unless the communications intercepted were held to be in connexion with a parliamentary proceeding. While recognizing that it was for the House itself to consider whether the interception of a Member's letters or telephone would constitute a breach of privilege, they cited a resolution of 1735 as clear recognition by the House of the Secretary of State's right to intercept a Member's postal packets by the use of an express warrant.

Conclusion. All the evidence was that there had been no tapping of telephones in Great Britain by unauthorized persons, but there could be no certainty that it did not occur. It might even be done without commission of a trespass upon private or Crown property, and Parliament might consider whether legislation should be passed to make it an offence.

The committee recognized that the interception of communications was regarded with general disfavour. They had no doubt, however, that this power should continue to be used for national security, as it had produced important results which could not have been obtained in any other way, and that its use in the detection of serious crime, so far from injuring the citizen, had been to his benefit.

Mr. Gordon-Walker's Reservations. Mr. Gordon-Walker expressed the opinion that public repugnance to this practice had increased, and that public concern was such that if the interception of communications continued as in the past there might be "some danger of a weakening of the popular approval without which the police cannot in the long run carry on effectively." He therefore recommended that this power should be used, for security purposes, only for direct counter-espionage and the protection of high secrets of State, and for the prevention of the employment of Fascists or Communists in connexion with work vital to the State. In the detection of crime it should be confined to the most extreme and dangerous cases, e.g. the apprehension of dangerous criminals or lunatics or the detection of dangerous gangs likely to commit violence.

In recent years, he pointed out, the number of detections of offenders secured through interception by the Customs had been only 0.7 per cent of the total number of convictions, whilst the number of arrests made by the Metropolitan Police as the result of interception had been only 0.13 per cent of the total number of arrests for indictable offences. These figures suggested that even if interception were brought to an end there would be no catastrophic increase in the amount of crime escaping detection. Mr. Gordon-Walker also proposed that no warrant should be issued save on a sworn information or affidavit, and that no material obtained should be used as evidence in any court of law or inquiry in the public service.

The Prime Minister, Mr. Macmillan, announced in the House of Commons on Oct. 31 that the Government had accepted all the committee's main recommendations, and that arrangements were being made to give effect to those which called for a change in procedure.

Lord Tenby stated after the publication of the report that, in view of the exceptional circumstances, he still considered that his action had been justified. At the annual general meeting of the Bar on Nov. 4 Lord Chorley withdrew a motion which he had proposed, deploring the Bar Council's use of material obtained by intercepting telephone communications, in view of the Government's acceptance of the recommendation that material of this kind should not be disclosed to private organizations. A vote of thanks to and of confidence in Sir Hartley Shawcross was adopted unanimously.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15776 A.)**

A. BAHREIN. — British Rejection of Persian Claim.

It was announced in Teheran on Nov. 12 that the Persian Government had been instructed by the Shah to put before Parliament a Bill declaring Bahrein the 14th Persian province. A British Foreign Office spokesman stated on Nov. 14 that Bahrein was an independent Arab State under British protection; that Persia had often in the past claimed sovereignty over Bahrein on historical grounds, which H.M. Government had repeatedly rejected as unfounded; and that H.M. Government would "continue to fulfil their obligation to safeguard the independence of Bahrein."

Persian claims to sovereignty over Bahrein had been put forward in 1906, 1927, 1952, and 1956, but had always been rejected by successive British Governments.

A statement by the Arab League in Cairo (Nov. 15) said that Persia's claim could not be recognized since Bahrein was "Arab territory."—(Times - Daily Telegraph) **(14935 B.)**

B. LAOS. — New Cabinet. - Agreement with Pathet Lao on Reincorporation of North-Eastern Provinces. - Pathet Lao Representatives enter Coalition Government. - Agreement on Neutralist Foreign Policy.

After a Cabinet crisis lasting 70 days the Laotian National Assembly approved on Aug. 9 a new Government formed by Prince Souvanna Phouma, the outgoing Prime Minister, the voting being 28 to eight, with one abstention. The new Cabinet was a coalition of the Independents and National Progressives, the two principal parties. In addition to the premiership Prince Souvanna Phouma also took over the Defence Ministry, whilst M. Katay Don Sasorith became Minister of the Interior and M. Phoui Samanikone became Foreign Minister.

The policy of Prince Souvanna Phouma's new Government—as outlined by him to the National Assembly—was more accommodating to the *Pathet Lao's* demands than his previous offers; while insisting as hitherto on the indivisible sovereignty of the Royal Laotian Government, Prince Souvanna Phouma now offered to include *Pathet Lao* representatives in the Government. He also expressed willingness to incorporate the *Pathet Lao* forces into the Royal Laotian Army after "screening"; to allow a successor party to the *Pathet Lao* to take part in the elections to be held in January 1958; and to pursue a policy of neutrality, including good-neighbourly relations with all neighbouring States.

Renewed negotiations between Prince Souvanna Phouma and the *Pathet Lao*, which is led by Prince Souphannou Vong (the Prime Minister's half-brother), ended in an agreement on Oct. 23 containing the following provisions: (1) immediate cessation of hostilities; (2) integration of the *Pathet Lao* forces in the Royal Laotian Army within the limits of budgetary possibilities; (3) integration of *Pathet Lao* "civil servants" in the Kingdom's administrative system where possible; (4) recognition of the *Neo Lao Haksat*, the political wing of *Pathet Lao*, as a legal party; (5) the granting of civil rights to *Pathet Lao* followers on an equal basis with all other Laotians; (6) the formation of a new Government of National Union which would include two or three *Pathet Lao* representatives; (7) an agreement that Laos would "not participate in any bloc or military alliance, nor allow any country to establish military bases in Laotian territory"; (8) acceptance of foreign aid without political or military commitments; (9) restoration of the Government's authority over the north-eastern provinces hitherto held by *Pathet Lao*.

The agreement was approved by the National Assembly on Nov. 2, and the two north-eastern provinces were formally transferred to the Royal Laotian Government on Nov. 18. On the same day Prince Souvanna Phouma presented a new 16-member Cabinet to the National Assembly for investiture, including two *Pathet Lao* representatives—Prince Souphannou Vong, who became Minister of Planning, and M. Phoumvong Vichit, appointed Minister of Education. The National Assembly passed a vote of confidence in the new coalition Cabinet later the same day.

It was pointed out in the British and American Press that with Laos now committed to a policy of "neutrality" it would form, with its neighbour Cambodia, a "neutralist" corridor stretching from South China to the Gulf of Siam. Western observers nevertheless expressed concern lest Communist influence in the area should be strenghtened as a result of this development.—(Times - Le Monde - New York Times) **(Prev. rep. 15672 A.)**

C. LATIN AMERICA. — Agreement on Stabilization of Coffee Prices and Control of Coffee Exports.

An agreement was signed in Mexico City on Oct. 18 by seven countries—Brazil, Colombia, Mexico, El Salvador, Guatemala, Costa Rica, and Nicaragua, together producing about 80 per cent of the world's coffee—to stabilize coffee prices in world markets, and to control exports.

The agreement provided (*a*) that Brazil would retain a 20 per cent reserve of her coffee exports during the year Oct. 1, 1957-Sept. 30, 1958, exporting about 15,000,000 bags of the current crop (including 4,000,000 already sold) out of 17,000,000 bags produced for export; (*b*) that exports of mild coffee by the signatories would be limited during the period Nov. 1, 1957 to March 31, 1958 to 80 per cent of the average exports in the corresponding periods of the two previous years; (*c*) that producers of mild coffee would maintain reserves equivalent to 10 per cent of all shipments between Nov. 1, 1957 and Sept. 30, 1958.

It was decided to hold a further meeting in Rio de Janeiro in January 1958 to which all coffee-producing countries, including African countries, would be invited, in order to discuss the formation of an international organization for controlling coffee exports and stabilizing coffee prices.

A. FRANCE. — Renewal of Government's Special Powers for Algeria.

The French National Assembly agreed on Nov. 12, by 344 votes to 211 with six abstentions, to renew the Government's special powers for combating the rebellion and terrorism in Algeria and Metropolitan France.

M. Bourgès-Maunoury (Minister of the Interior) stated during the debate that the "life and death struggle" waged in Metropolitan France by adherents of the National Liberation Front and the Algerian National Movement against each other had cost 550 deaths and over 2,000 injured since the beginning of 1957. This struggle indicated that the National Liberation Front, as a result of the blows inflicted upon it in Algeria, had tried to open up a new front in Metropolitan France "with a view to sapping the French fighting spirit." M. Bourgès-Maunoury also disclosed that under the Emergency Powers Act of July last, 329 people had been arrested in Metropolitan France, 101 hotels or cafés closed, 329 persons sent to a place of fixed residence, and thousands of arms seized. A large number of cases was still pending, and the Government intended to use the special powers to the greatest possible extent in order to suppress the rebellion.

During the debate deep apprehension was expressed by several deputies about the alleged excesses committed by the French forces and the police in repressing the Algerian rebellion. **M. Teitgen** (M.R.P.) expressed the view that even though the National Liberation Movement had committed "abominable crimes," their suppression did not justify the use of "certain investigative methods" [i.e. torture]. If it were established that such methods had been used, which was by no means certain, they would be immoral and contrary to the national honour, which demanded that the fighting should be conducted according to the rules of war even if the enemy employed abominable methods. Moreover, the use of such methods would help the rebel propaganda more than the cause of France. To give the Government time to set on foot the necessary investigations to establish the truth, and at the same time to compel it to take the measures necessary to end these abuses, if proved, M. Teitgen proposed an amendment limiting the special powers until April 1, 1958, or the resignation of the present Government, whichever was the earlier.

M. Lacoste (Minister for Algeria) pointed out that the Government had accepted periodical control of its actions in Algeria by various commissions. Three such commissions had been permitted to visit Algeria: first the International Red Cross Commission, which, after a visit in June last, had expressed its appreciation of the facilities granted to it; then the International Commission against concentration camps, which had similarly acknowledged the complete liberty with which it had been allowed to carry out its investigations; and thirdly the Commission to safeguard individual rights set up by M. Mollet's Government. As a result of the last-named Commission's report, the Government had already taken a number of measures. M. Bourgès-Maunoury, when Prime Minister, and he personally (M. Lacoste), had agreed at the time that the Commission's report should be published, but the governmental crisis had made this impossible. The report would be published, but it was essential that it should be accompanied by another report giving full particulars of the atrocities of the terrorists so as to provide "complete and honest information" about the position as a whole. The need for such a complementary report on the rebels' atrocities had been stressed by the "Safeguarding Commission" itself, which had expressed its horror at the ever-growing number of sadistic barbarities and atrocities committed by the rebels. In reply to M. Teitgen, M. Lacoste said that it had always been his aim "not to abandon legality and morality"; that he agreed that malpractices must be ended; and that sanctions had already been taken by the Government in at least 250 cases. He undertook to continue as rapidly as possible with this action and to give M. Teitgen all the information desired. M. Teitgen thereupon withdrew his amendment.

M. Pierre Cot (*progressiste*) moved that an additional Article should be inserted into the Bill laying down that the special powers should be exercised "within the framework of the Declaration of Human Rights"; that all investigations, searches, and interrogations should be handled by judges instead of by officers; that the military appeal tribunal in Algiers should be abolished and its functions transferred to the civil courts; that the reports of the Safeguarding Commission should be published; and that the Commission's powers should be extended to enable it to order the suspension or modification of any administrative or judicial measures. After **M. Lacoste** had intervened to say that his principal task in Algeria was to protect and save the lives of the population, and that he had always honestly tried to reconcile the execution of this task with the demand of his conscience, M. Cot's amendment was defeated by 380 votes to 130.

Both M. Soustelle (Social Republican), the former Governor-General of Algeria, and **M. Isorni** (Independent) announced that they would support the Bill, although they regarded the special powers contained therein as insufficient.

The supporters of the Bill included 95 Socialists and four members of the *Mouvement Socialiste Africain*; 87 (out of 92) Independents and five *paysans d'action sociale*; 64 (out of 75) M.R.P. deputies; 27 (out of 48) Radicals; 19 (out of 21) Social Republicans; the 14 dissident Radicals; 12 R.G.R. deputies; six members of the *Convention Africaine*; five (out of 21) members of the U.D.S.R.-R.D.A.; five *non-inscrits*; and one *paysan*.

The opponents of the Bill comprised 143 Communists and six *progressistes*, 30 Poujadists, three M.R.P., three *non-inscrits*, one Socialist (M. Daniel Mayer), and one U.D.S.R. Five M.R.P. deputies and one Independent abstained, while 16 deputies did not take part in the vote.

The Bill was approved by the Council of the Republic on Nov. 14 by 230 votes to 18, the Moslem senators abstaining. The opposition included 15 Communists.—(Le Monde)

B. EGYPT - JORDAN. — Press and Radio "War."

The Egyptian press and radio launched a violent propaganda campaign against the Jordanian Government and King Hussein personally from the beginning of November, leading to equally strong attacks on President Nasser and the Egyptian Government from the Jordanian side. The intensity and violence of this press and radio "war," in which Syrian propaganda organs also joined in the attacks on Jordan, led the Kings of Saudi Arabia, Iraq, and Libya to issue personal appeals for a cessation of recriminations between the countries concerned.

The Cairo newspaper *Al Shaab* accused the Jordanian Government on Nov. 3 of having entered into secret negotiations with Israel, alleging that the Jordanian Foreign Minister (Mr. Samir Rifai) had had a secret meeting at Nablus on Sept. 14 with the Israeli Prime Minister, Mr. Ben-Gurion, and the Foreign Minister, Mrs. Meir. [An Israeli Government spokesman described these allegations as "nonsense."] The allegations were repeated by Cairo Radio, which bitterly attacked the Jordanian leaders and accused King Hussein of accepting a "bribe" of $30,000,000 from the United States.

The Jordanian Government issued a statement on the following day (Nov. 4) denying the *Shaab* allegation as a complete lie, and accusing Egypt herself of entering into secret negotiations with Israel. After saying that the Jordanian Government possessed "quantities of evidence" to prove that "responsible Egyptians are carrying out secret communications and contacts with the Israelis," the statement accused Egypt of "treason to the Arab cause" and her rulers of "political and moral degradation." The Jordanian radio bitterly attacked President Nasser and other Egyptian leaders, applying to them such epithets as "dogs," "crows of evil," "treason trumpets," and "agents of the Kremlin"; President Nasser himself was denounced as a "little dictator," a "slave of Moscow," and a "Don Quixote striking right and left with his wooden sword but hitting only himself."

During the following week the press and radio "war" between the two countries reached a new peak of violence. The Egyptian Press (including the official *Al Goumhouria*) and Cairo Radio described King Hussein as a "traitor" and accused his Government of allowing Jordan to become a "base of American imperialism," whilst the Jordanian press and radio accused the Egyptian rulers of trying to foment dissension and mutiny in Jordan so that the Arab world would be "an easy victim for the Egyptians' masters in Moscow." The personal attacks on King Hussein were bitterly resented by the Jordanian press, which accused Egyptian newspapers of "ignoring the ethics of journalism and prostituting their profession."

At a mass meeting in Amman on Nov. 11, representatives of the Palestine Arab refugees in Jordan pledged their whole-hearted support for King Hussein, denounced the "campaign of lies" directed against Jordan by the Egyptian press and radio, and called on the Arab League to end the causes of difference between its member-states. On the following day the Speaker of the Jordanian Parliament appealed to the Heads and Parliaments of other Arab countries to assist Jordan in putting an end to the Egyptian press and radio campaign, which was "poisoning the Arab atmosphere."

In a broadcast on Nov. 9, King Hussein thanked his people for their nation-wide demonstrations of loyalty and for their resentment at the "lies fabricated against Jordan by the hired propaganda trumpets in Egypt." Speaking at a press conference on Nov. 13, King Hussein described the present rulers of Egypt and Syria as "tools of international Communism" who, through propaganda and subversion, were trying to spread Communism in Jordan. This campaign, however, had had precisely the opposite effect, as it had united the Jordanian people, the large refugee population, and the Army solidly behind the Government.

King Saud of Saudi Arabia and King Faisal of Iraq urged the Egyptian and Syrian press and radio on Nov. 14 to cease attacking Jordan, declaring that such campaigns would "benefit only the enemies of Arabs and Moslems." King Idris of Libya also appealed on Nov. 18 to the Governments and peoples of Egypt, Syria and Jordan to cease recriminations "for the sake of the dignity of the Arab nation." Although there was no official response to these appeals, the Egyptian press and radio made little or no reference to Jordanian affairs after mid-November, and ceased its attacks on King Hussein and the Jordanian leaders.—(Times - Daily Telegraph - Manchester Guardian - Le Monde - New York Times)

NOVEMBER 30—DECEMBER 7, 1957

A. TUNISIA - FRANCE. — Suspension of French Military Aid to Tunisia. - Delivery of British and U.S. Arms. - French Protests to British and U.S. Governments. - Mr. Macmillan's Visit to Paris. - Gaillard-Macmillan Statement. - Deterioration of Franco-Tunisian Relations in 1957. - Suspension of French Economic Aid. - Tunisian Counter-Measures. - Clashes between French and Tunisian Troops. - Incidents on Tunisian-Algerian Border.

A serious crisis arose in the relations between France on the one hand and Britain and the U.S.A. on the other when the French Government suspended the supply of equipment to the Tunisian Army in August 1957, whereupon the Tunisian Government appealed to the other Western Powers for assistance. After a French offer to resume deliveries on condition that Tunisia would not accept armaments from any other source had been rejected by President Bourguiba, consignments of British and U.S. arms were delivered on Nov. 15, an action which led to strong protests from the French Government. Details of these and other recent developments in Franco-Tunisian relations during the past year are given below under cross-headings.

Suspension of French Military Aid. - Delivery of British and U.S. Arms to Tunisia.

A request by the Tunisian Government for 1,000 rifles to equip one battalion of its Army was refused by the French Government early in August. [According to an earlier statement issued in Paris on May 27, France had previously supplied to Tunisia equipment for a mixed Army regiment, about 2,000 arms for the police, and training equipment for the n.c.o. school at Bardo.] The Tunisian Government thereupon approached the U.S.A., Italy, and Belgium, and also appealed to the Arab States on Aug. 8 for assistance. In an interview with a *New York Times* correspondent (Sept. 11) President Bourguiba stated that both Italy and Belgium had refused to sell arms to Tunisia "because of French pressure," and that no reply had been received from the U.S.A. "If the United States carries its anxiety to please France to the point of forgetting our independence," he declared, "we must begin to consider our own interests," adding that overtures had been received through the Soviet Embassy in Paris. On the following day, however, President Bourguiba received the U.S. Ambassador, who assured him that the U.S. Government was giving the matter close attention.

On Sept. 16 Cairo Radio announced that the Egyptian Government had offered to supply arms to Tunisia as a gift; the Tunisian Ambassador to Egypt (M. el-Tayab el-Sahabany) stated on Sept. 23 that this offer had been accepted, and that a Tunisian military mission would shortly visit Cairo to discuss details. On the following day the U.S. Government gave President Bourguiba a written assurance that Western arms, possibly from Italy, would reach Tunisia during October. Announcing this on Sept. 26, President Bourguiba emphasized that Tunisia did not intend to obtain arms from Communist sources, and stated that although a Czechoslovak trade delegation had recently visited Tunis the question of arms supplies had not been raised.

The possibility of Tunisia's receiving arms from an independent source caused great concern in France, and M. Pineau made a statement on the question during the debate preceding the vote of confidence on the Algerian *loi-cadre* on Sept. 30 (see 15847 A). The French Government, he announced, had proposed that a conference should be held to settle all the questions at issue between France and Tunisia, and that any decision on the delivery of arms should be postponed until the results of the conference were known.

"The Tunisian Government," M. Pineau said, "asked France to supply it with arms . . . Although no weapons belonging to the regular Tunisian Army have so far been found in the possession of the Algerian rebels, the French Government considered that it could not give an affirmative reply because of the deterioration of Franco-Tunisian relations . . . Following this refusal, Tunisia approached certain Western Governments, which after consultations with France did not comply with this request . . . The Tunisian Government then made it known that it was considering approaching certain Eastern Powers to obtain deliveries of arms—an announcement which aroused strong feeling among the majority of our allies, who considered that the question should be re-examined . . . The French Government . . . strongly insisted on a number of essentials, notably concerning the security of our troops and the maintenance of Western solidarity. As a pre-requisite to any decision it raised the question of what guarantees would be forthcoming that the equipment would not be passed on to the Algerian rebels, or employed against the French troops in Tunisia . . . It seemed to the Government that the only possible guarantee would be the settlement of the problems in dispute between Tunisia and France. For this reason it has instructed the French Ambassador in Tunis, M. Gorse, to propose to President Bourguiba the holding of a conference to deal with the questions at issue between the two countries, military, economic, financial, or administrative . . . We are asking our allies that no decision on future deliveries of arms should be taken until the results of this conference are known."

The fall of M. Bourgès-Maunoury's Government on the same day (Sept. 30), and the 36-day Cabinet crisis which followed, prevented any progress being made with the French proposal for a conference. The Tunisian Government meanwhile continued negotiations with the U.S. Government and also with the British Government, which it had approached at the end of September. In return for guarantees from President Bourguiba that the arms would be used solely for defensive purposes and would not be allowed to fall into the hands of the Algerian insurgents, the two Governments agreed to supply Tunisia with arms if France refused to do so. To avoid embarrassing the next French Government, however, no deliveries were made while the French Cabinet crisis continued, and President Bourguiba agreed that the deliveries should be postponed until a week after a new French Government had been formed.

Following the formation of M. Gaillard's Government on Nov. 5, the British and U.S. Governments informed the new French Cabinet that they would deliver a consignment of arms to Tunisia on Nov. 12 if France had not done so before that date. The French Government replied that it was prepared to supply equipment for two battalions if President Bourguiba gave a further guarantee that he would not accept arms from any country other than France—in particular, from Egypt or the Communist powers—and proposed that the British and U.S. Governments should associate themselves with a *démarche* to this effect by the French Ambassador in Tunis. Both Britain and the U.S.A. declined this invitation, but agreed to postpone once more the delivery of arms until the French offer had been submitted to the Tunisian Government. On Nov. 13 M. Gorse (the French Ambassador in Tunis) accordingly saw President Bourguiba, who rejected the French conditions as incompatible with Tunisian sovereignty.

President Bourguiba explained his reasons for rejecting these conditions in a broadcast on Nov. 15. To accept them, he said, would have placed "limits on our sovereignty as an independent country" and would have been an unfriendly gesture towards Egypt, whose offer of a free gift of arms had already been accepted. Moreover, if France became Tunisia's sole source of supply, there was a danger that she would make a frontier incident, or a speech which might cause offence in Paris or Algiers, an excuse for suspending arms deliveries as she had already suspended economic aid. The conditions laid down by Britain and the U.S.A., on the other hand, were reasonable, as Tunisia had never attacked anyone or transferred arms to others in the past, and had no intention of doing so in the future. "It seems," President Bourguiba added, "that all our difficulties arise from the fact that France does not take Tunisian independence seriously."

During the evening of Nov. 13 Mr. Houghton, the U.S. Ambassador in Paris, informed M. Gaillard that the U.S. and British Governments had decided to proceed with the deliveries, whereupon the Premier immediately summoned an emergency Cabinet meeting. M. Gaillard again saw Mr. Houghton and also Sir George Young, the British Chargé d'Affaires, during the night of Nov. 13-14 and lodged a strong protest. The British and U.S. Governments, however, officially announced their decision on Nov. 14, and the arms were delivered to Tunisia on the following day. The British consignment consisted of 350 Sterling sub-machine guns and 70 Bren guns with ammunition, representing a total value of £20,000, and the U.S. consignment of 500 rifles and 50,000 rounds of ammunition.

A statement issued in Washington on Nov. 14 said that Tunisia, as a free and independent member of the U.N., had the right to provide for her internal security and self-defence. Tunisia had freely chosen to identify herself with the West, and Western nations should provide her with an opportunity to purchase arms from Western sources. The statement concluded by expressing regret that the French Government had not "found it possible to associate herself with the supply of arms to Tunisia, despite the frequent consultations which have taken place on this subject."

Statements by M. Gaillard and Mr. Selwyn Lloyd.

Great indignation was aroused in French political circles, and among the French population generally, by the delivery of British and American arms to Tunisia. The French delegation walked out of the NATO parliamentary conference (then meeting in Paris) during the afternoon of Nov. 15, and later

the same day M. Gaillard informed the National Assembly that unless a solution were found by Dec. 16 France would reconsider her position regarding the NATO "summit" conference scheduled to open on that date.

M. Gaillard said that France had decided to suspend arms deliveries to Tunisia because of "the difficulties which arose in Franco-Tunisian relations during the summer, the numerous frontier incidents, and the admitted, if not voluntary, assistance given to the Algerian *fellaghas*." Belgium and Italy, when approached, had refused to supply Tunisia with arms, thereby "showing their friendship for and confidence in France and their clear appreciation of the real nature of the problem." During October, however, Britain and the U.S.A. had given several warnings that if France did not supply Tunisia they would do so themselves, as they considered that "it was necessary above all to avoid an appeal by Tunisia to the Soviet bloc and its allies." After his [M. Gaillard's] Government was formed, Britain and America had insisted all the more that Western arms must reach Tunisia because there were reports of a large arms delivery coming from Egypt; the result was that President Bourguiba, being "assured of deliveries from both Anglo-Saxon and Egyptian sources," had refused the guarantees asked by France.

The French Government had demanded these guarantees, and had refused to be "satisfied with vague hopes or mere promises," M. Gaillard continued, "not only because we have too often been disappointed, not only because Tunisia's independence *de jure* is compromised daily by the armed occupation of a considerable part of its territory by the *fellaghas*, not only because the Tunisian Government which submits to this occupation claims to approve of it, but also because the [French] Government is accountable to the nation for the young men who are fighting in Algeria . . . The situation created by the Anglo-American decision is a grave one. The French people resent it as an unfriendly gesture . . . Article 6 of the Atlantic Pact expressly lays down that it covers the Algerian departments. Any threat to their integrity should automatically bring the solidarity of our allies into play. How can we reconcile that with deliveries of arms, without a guarantee, to a neighbouring country which takes pride in assisting the Algerian rebels? . . .

"The Government will act firmly and calmly," M. Gaillard went on. "It does not intend to weaken what remains of the Atlantic Pact more than has been done already. On the contrary, it will seize this opportunity to strengthen it, convinced that if this result is not attained by our joint efforts the alliance uniting us would soon fall to pieces. The Government will not rest content with the very firm protest which has been addressed to the British and U.S. Governments. Without waiting for the meeting of NATO Heads of Governments which will take place in Paris on Dec. 16, it will seek a solution to this problem consistent with the solidarity of the Atlantic nations and France's vital interests in Algeria and North Africa. If a clear and unequivocal solution is not reached by Dec. 16, the basis of the NATO conference and the hopes which it has raised will be endangered. Parliament will then be informed of the situation and will have to decide . . . on solutions in keeping with the nation's interests."

The British Government's views on the situation were given by the Foreign Secretary, Mr. Selwyn Lloyd, in a statement to the House of Commons on Nov. 18.

"I deeply regret the differences of opinion which have arisen with the French Government over this matter," Mr. Lloyd said. "I wish to emphasize the following points . . . Tunisia, as an independent sovereign State, is entitled to arms for the purposes of legitimate self-defence and internal security, particularly in view of the need to ensure effective control of her frontiers. Secondly, there has been no dispute whatever with the French Government on the principle that any delivery of arms by any Western country must be subject to satisfactory undertakings by the Tunisian Government that those arms would only be used for legitimate self-defence and internal security, and would not under any circumstances be allowed to fall into unlawful hands. On that point the Tunisian Government gave assurances which both H.M. Government and the U.S. Government regarded as satisfactory. No suggestion was made to us by the French Government that the Tunisian assurances on this point were not adequate. On the contrary, the French Government were themselves prepared to send arms to Tunisia; and although in the event they did not do so, this was not because of any lack of assurances on the point which I have mentioned, but rather because certain other assurances relating to the source of future supplies to Tunisia were not forthcoming.

"Thirdly, France is the traditional supplier of arms to Tunisia and, as we made clear to both the French and Tunisian Governments, we believe that France should continue by agreement with Tunisia to be the main supplier. Fourthly, it would be most unfortunate if the Tunisian Government should be forced to rely upon arms coming indirectly or directly from the Soviet bloc." In conclusion, Mr. Lloyd emphasized that "at every point we have consulted the French authorities fully and informed them of our communications with the Tunisian Government and the U.S. Government"; that the delivery of the arms had been postponed several times "in order to meet French difficulties"; and that they had been delivered only after "the French and Tunisian Governments informed us that they had been unable to agree on the basis upon which French arms might have been supplied."

Mr. Gaitskell (Leader of the Opposition) said that if the British and U.S. Governments had refused Tunisia's request, they would have been aligning themselves firmly behind the French Algerian policy, which would have led to a grave worsening of relations between the NATO Powers and the Arab States. The concept of interdependence could not mean the simple acceptance by all NATO countries of a policy carried out by one member, unless there had been full discussion in NATO itself.

Macmillan-Gaillard Discussions.

Mr. Macmillan announced in the House of Commons on Nov. 21 that "in the light of recent developments in North Africa and the coming NATO meeting" he had accepted an invitation to visit Paris on Nov. 25 to discuss matters of common interest with M. Gaillard. The Prime Minister, accompanied by Mr. Selwyn Lloyd, accordingly visited Paris on Nov. 25-26 for talks with M. Gaillard and M. Maurice Faure (State Secretary for Foreign Affairs), who deputized for M. Pineau because of the latter's absence in the United States. The following communiqué was issued at the end of the discussions:

"The Ministers had a general discussion on North African problems, bearing in mind that responsibility for a solution of the Algerian question lies with France. The French Ministers indicated the lines on which the French Government were proceeding. In a spirit of solidarity between their two countries, both Prime Ministers expressed their conviction that France should continue to discharge her special responsibilities in North Africa, where she traditionally possesses a pre-eminent position and makes an indispensable contribution to the common defence of the free world.

"In the same spirit, after a frank discussion on the matter of arms for Tunisia, both Prime Ministers decided to make arrangements designed to avoid the recurrence of difficulties similar to those which have recently arisen. Consultations on this subject between the two Governments are continuing.

"The Ministers considered the preparations for the NATO meeting of Heads of Governments in December. Mr. Macmillan gave an account of his meeting in Washington with President Eisenhower which led up to the declaration of common purpose and interdependence of Oct. 25, and M. Gaillard expressed the French Government's views on the subject.

"The Ministers agreed that the December meeting should give a more precise definition to the principles of interdependence and to the solidarity of the alliance, in accordance with the spirit of equality which underlies the treaty. They considered, in particular, that this solidarity should result in increased pooling of resources and knowledge, especially in the field of research development and production. They also agreed that everything possible should be done to develop the system of consultation in the alliance.

"The Ministers reviewed the position reached to date in the Free Trade Area negotiations. They agreed on the political importance of finding solutions to the technical problems involved."

In a short press statement on leaving the Hôtel Matignon (the French Prime Minister's residence), Mr. Macmillan described the conference as a "complete success" and said that they had "worked in a very good spirit" and made "great progress." In a statement on Nov. 27 to the House of Commons, Mr. Macmillan said that Britain had given no absolute guarantee that no further arms would be supplied to Tunisia, but had expressed the hope that they would normally be supplied by France.

A French official spokesman expressed satisfaction at the assurances given by the British Ministers, which would allay the anxiety felt in France that British policy towards French North Africa might have undergone a change. Particular satisfaction was expressed at the fact that, in the British view, a solution of the Algerian problem remained a French responsibility. It was commented in the French Press, however, that while Mr. Macmillan had apparently convinced M. Gaillard that French fears about an independent Anglo-American policy on Algeria, or of a possible modification of Britain's attitude towards the North African problem, had been completely unjustified, he had avoided any express commitment on the part of the British Government not to send more arms to Tunisia, though agreeing on further consultations to avoid the recurrence of similar difficulties between the two countries.

Demonstrations by French extreme right-wing organizations against the delivery of arms to Tunisia took place on Nov. 12 outside the U.S. Embassy in the Place de la Concorde, resulting in clashes with the police. To avoid similar incidents during Mr. Macmillan's visit, strong detachments of armed police were stationed at the approaches to the British Embassy in the Rue du Faubourg Saint-Honoré.

Mr. Maudling, U.K. Minister of State in charge of the European Free Trade Area question, also accompanied Mr. Macmillan to Paris but returned to London on Nov. 25, since the question of the Free Trade Area and the Common Market could receive only little attention because of the Ministers' preoccupation with political problems.

M. Pineau's Discussions in Washington.

M. Pineau, who had arrived in the United States on Nov. 17 to take part in the U.N. General Assembly's debate on the Algerian question, visited Washington from Nov. 18-20 for talks with the U.S. Government. In a statement on his arrival he revealed that the Soviet Ambassador in Paris had given him an assurance that the U.S.S R. would not send arms to Tunisia. On Nov. 19-20 M. Pineau had a number of talks with Mr. Dulles, and also saw Mr. McElroy, (Secretary of Defence) and senior military officials at the Pentagon.

A State Department spokesman said that Mr. Dulles had received M. Pineau's protest on the despatch of U.S. arms to Tunisia " with understanding and sympathy " ; had told M. Pineau that the U.S.A. shared Franco's concern that these arms should be used " exclusively for internal security and self-defence " ; and had explained that Tunisia had in fact given " undertakings in that sense." After the Pineau-Dulles talks on Nov. 20 the spokesman said that an " agreement or understanding in principle " had been reached " that the U.S.A., in co-operation with other interested parties, would try to work out procedures for the future to allay French fears as to the possibility that arms going to Tunisia would fall into unauthorized hands." Mr. Dulles, in a press statement on Nov. 19, had said that he considered France to be Tunisia's " natural arms supplier " and would like to see France " do the job."

M. Pineau's talks at the U.S. Defence Department were reported to have dealt largely with the question of the establishment of U.S. intermediate-range ballistic missile bases in France.

Franco-Tunisian Relations in 1957.

Prior to the suspension of French military aid to Tunisia, and the subsequent supply of arms to that country by Britain and the United States, Franco-Tunisian relations had continued to deteriorate since the suspension of negotiations on a new defence agreement between the two countries in June 1956 [see 14989 A]. This tension between France and Tunisia, extending for over a year, attained the dimensions of a crisis on three occasions : in October-November 1956, following the arrest of five Algerian nationalist leaders while *en route* from Rabat to a conference in Tunis [see 15329 A] ; in May-June 1957, as a result of the suspension of French economic aid to Tunisia ; and in September-October 1957, following a series of incidents on the Algerian-Tunisian frontier. The first crisis ended with the announcement on Dec. 11, 1956, that normal diplomatic relations would be resumed, and with the appointment on Jan. 23, 1957, of new French and Tunisian Ambassadors [see page 15331]. Further developments in Franco-Tunisian relations during 1957 are summarized below.

Suspension of French Economic Aid to Tunisia.

The Government of M. Mollet decided on May 20, 1957, to withhold payment to Tunisia of the first instalment of 2,000,000,000 francs due under a financial aid agreement which had been signed in April, and which provided for the payment to Tunisia of 12,100,000,000 francs in several instalments. M. Mollet stated in the National Assembly on the following day that the French decision had been taken " because of Tunisia's present attitude."

A Tunisian statement of May 24 claimed that the French Government had denounced the financial aid agreement, that it had thereby also ended the Franco-Tunisian economic and financial convention of June 3, 1955 [see 14289 A], and that Tunisia had thus been released from her own obligations under that convention.

After stating that the French Government had refused to carry out its obligations " because of Tunisia's attitude towards the Algerian problem," the communiqué said : " The Tunisian's Government's attitude towards the Algerian problem has remained constant, and in any case has not changed since the French Finance Minister signed the financial agreement. It has been expressed by the Tunisian Premier on several occasions, and aims at utilizing every means of restoring peace in the neighbouring territory on the basis of free elections under international control . . . When speaking of assistance given to the Algerians, and demanding Tunisia's neutrality, the French Government fails to take into account that its own troops stationed in Tunisian territory use the country as an operational base, contrary to the wishes of the people and Government of Tunisia. The economic and financial convention between France and Tunisia signed on June 3, 1955, stipulated that aid from France was an inseparable counterpart of the economic concessions freely agreed to by Tunisia. As a French Government has considered it unnecessary to carry out its commitments in this matter, Tunisia is released from the obligations which she had accepted as a counterpart."

A French Foreign Ministry communiqué, issued on May 24, declared that the French Government had never denounced the Franco-Tunisian financial agreement. It had, however, " once again brought to the Tunisian Government's notice the inadmissible character of the assistance which it was giving or allowing to be given to the Algerian rebellion." In particular, it had been emphasized that it was " inconceivable that French aid to Tunisia should directly or indirectly assist France's enemies," and it rested with the Tunisian Government to give France " the necessary guarantees for the normal application of the financial agreement."

The Tunisian Cabinet decided on May 31 to carry out a unilateral revision of the Customs agreement with France signed on Dec. 28, 1955 [see 14812 A], so as to permit in future reciprocal tariff agreements between Tunisia and third countries without French participation—a decision equivalent to the abrogation of the Franco-Tunisian Customs union. It was also decided to set up a special commission to prepare, co-ordinate, and supervise import and export programmes and trade agreements, and to create a guarantee fund for foreign investments in Tunisia.

Following these decisions, trade agreements on a most-favoured-nation basis were signed with Yugoslavia in June and with Switzerland in October.

A law was promulgated by President Bourguiba on Oct. 10 abolishing the French and Franco-Tunisian chambers of commerce and agriculture in Tunisia.

An official statement said that French participation in these bodies was incompatible with Tunisia's status as an independent State, but that foreigners would be allowed to form a chamber of commerce which would have the same status as the foreign chambers of commerce established in France. It was pointed out in the French Press that this measure, which had been adopted without previous consultation with the French Embassy, constituted a breach of the convention of June 3, 1955, on the status of the French community in Tunisia, which expressly provided for the maintenance of the French chambers of commerce and agriculture [see 14289 A].

Clashes between French and Tunisian Forces. - Partial Withdrawal of French Forces in Tunisia.

A series of incidents occurred at the end of May 1957 on the Algerian-Tunisian frontier in the neighbourhood of Ain-Draham, where about 2,000 Algerian refugees had crossed into Tunisia. They culminated in a clash between French troops and Tunisian soldiers and National Guards on May 31, in which seven of the latter were killed ; details of the incident, which aroused intense indignation in Tunisia, remained obscure, as contradictory versions were issued by the Tunisian and the French authorities.

The Tunisian version alleged that French troops had tried to drive the refugees back into Algeria by force ; had blocked frontier roads ; and had opened fire on Tunisian forces sent to the area, killing seven and wounding 14. It was further alleged that two Tunisian officials—M. Hajeri (secretary-general of the Foreign Ministry) and M. Sebsi (of the Ministry of the Interior)—had been negotiating with the French officer in charge when the latter gave the order to open fire. The French Foreign Ministry, on the other hand, alleged that a French unit returning from a routine patrol had found the road blocked by Tunisian troops ; that the French commanding officer had been fired on by a Tunisian soldier ; and that the French forces had thereupon returned the fire.

Following a strong protest to France at this incident, M. Bourguiba announced on June 1 that the Tunisian Cabinet had informed the French Government of its desire to open negotiations on the evacuation of the French forces. On the same day the Tunisian Government issued an order forbidding French troops to make any movement without its express authority ; the French High Command, while refusing to recognize the validity of this order, nevertheless confined its troops to barracks and ordered movements to be confined to the minimum necessary for maintaining contacts and supplies. In the Gabès area, however, the French commander rejected a proposal by the local Governor that all troop movements should be suspended or notified to him beforehand, and ordered his forces to use their weapons if necessary. In consequence a number of clashes, in which 10 French soldiers and 11 Tunisians were killed, occurred during June 3-14 between French troops and Tunisian National Guards and armed civilians, who had erected barricades to prevent the movement of French troops and supply columns.

A proposal by M. Pineau that a joint inquiry commission should be set up with a view to preventing future incidents was rejected by the Tunisian Government. In a speech on June 13 M. Bourguiba denounced the " intolerable insolence " of the French military authorities, and continued : " We are determined to end this injustice and aggression, even if we have to enter into an armed conflict with France . . . If the French Government supports its soldiers' attitude in Tunisia, and allows them to treat Tunisian sovereignty with contempt and to claim the right to speak and act as if they were the country's masters, I fear that incidents will gradually become increasingly serious, until they degenerate into a general conflict." He emphasized, however, that Tunisia's desire for co-operation and friendship with France had not changed, and appealed to the new French Government headed by M. Bourgès-Maunoury to open negotiations for the withdrawal of all the French forces in Tunisia to their base at Bizerta.

M. Bourgès-Maunoury's Government subsequently submitted new proposals to the Tunisian Government for the partial evacuation of its forces in Tunisia, details of which were announced on June 27. These provided that about 10,000 of the 25,000 French troops in Tunisia should be transferred to Algeria during the next six months, and that the remainder should be confined to the bases at Bizerta, El Aouina, Gafsa, Gabès, Sfax, and Remada. M. Bourguiba welcomed these proposals as a contribution to better Franco-Tunisian relations, but emphasized that Tunisia could not enter into negotiations for a joint defence agreement until the French forces had been withdrawn from all their Tunisian bases except Bizerta.

Further Incidents on Algerian-Tunisian Frontier.

M. André Morice (then Minister of Defence) stated on June 27, 1957, in connexion with the French Government's new proposals, that the French Army would if necessary pursue Algerian rebel bands across the Tunisian border, claiming that it possessed the right to do so under international law. This warning was repeated on several occasions by M. Morice and M. Lacoste (the French Minister-Resident in Algeria). On Aug. 13 President Bourguiba appealed to Algerians who had received asylum in Tunisia to respect Tunisian sovereignty, warning them that if their attitude led the French to attack them on Tunisian soil, the Tunisian State itself would be threatened. During September and October, however, a number of incidents on the Algerian frontier led to a further grave deterioration in Franco-Tunisian relations.

The French forces exercized the "right of pursuit" for the first time on Sept. 1, when an infantry company crossed the Tunisian frontier in the Tebassa area in pursuit of an Algerian rebel band, 10 of whom were killed. The Tunisian Government alleged that the French troops had attacked a frontier post and killed seven frontier guards, and a few days later further alleged that French troops had attacked a refugee centre at Ain-Draham and killed two Tunisians.

In view of these incidents, President Bourguiba proclaimed a state of emergency along the Algerian frontier on Sept. 9. In a broadcast on Sept. 12 he maintained that the "right of pursuit" had no basis in international law; asserted that it was being used "as a pretext for attacks on Tunisia's sovereignty and integrity"; and announced that his Government had demanded the withdrawal of the French troops stationed in the Gafsa area.

On Sept. 10 the Tunisian Government alleged that French troops from Algeria had crossed the frontier in the Kasserine area and kidnapped four Tunisians, while on Sept. 12 the French authorities alleged that an Algerian rebel band had raided a refugee centre near Souk-Ahras (on the frontier) and carried off 225 refugees into Tunisian territory. A similar incident occurred during the night of Sept. 30-Oct. 1, when some 400 Algerian refugees crossed the frontier (under constraint according to French sources, voluntarily according to the Tunisian Government) in the same area.

Allegations were made by Tunisian spokesmen on Sept. 14 and Oct. 1 that French artillery and aircraft had bombarded and machine-gunned a village in the Ain-Draham area, a Tunisian military post and a Customs post. A French communiqué of Oct. 2 alleged that French aircraft had been fired upon from Tunisian soil on 13 occasions during the last fortnight of September, and emphasized that there had been no retaliation from the French side. Between Oct. 3 and Oct. 8 the Tunisian Government made further allegations that French aircraft had bombed and machine-gunned a village in the Kef area; that French planes had also machine-gunned a caravan ten miles inside Tunisia, killing three people; that French artillery had fired on a frontier post; and that French troops had kidnapped eight Tunisian nationals. All these charges were completely denied by the French authorities, who in turn alleged that French aircraft had been fired on, that an Algerian citizen had been kidnapped by "armed Tunisian elements," and that 300 Algerians had been carried off during the night of Oct. 20-21 by Algerian rebel bands operating from Tunisian territory.

In a broadcast on Oct. 3 President Bourguiba announced that he had decided to recall the Tunisian Ambassador in Paris (M. Masmoudi) as "it is impossible for me to maintain friendly relations with France, especially after the communiqué [of Oct. 2] which virtually authorizes French aircraft to bomb Tunisian territory." After M. Masmoudi had had talks with M. Bourgès-Maunoury and M. Pineau, however, it was announced on Oct. 5 that President Bourguiba had cancelled the order for M. Masmoudi's recall in view of the conciliatory attitude of the French authorities.

Judicial Convention. - Other Franco-Tunisian Agreements.

M. Maurice Faure (the French State Secretary for Foreign Affairs) visited Tunis from Feb. 14-17, 1957, for discussions with M. Bourguiba and other members of the Tunisian Government. Agreement was reached on a draft judicial convention and on a protocol defining the status of French officials employed by the Tunisian Government, both of which were signed on March 9, 1957.

Judicial Convention. This convention, which came into force on July 1, 1957, replaced the convention concluded in 1955 (see 14289 A). Its main provisions were:

(1) The French courts in Tunisia would be abolished, and their powers transferred to the Tunisian courts.

(2) In cases involving the personal status of French citizens, French law would be applied.

(3) In civil and commercial cases where no appropriate Tunisian law existed, the courts would apply the French laws formerly in force in Tunisia.

(4) For a period of five years a French magistrate would share the power of decision in civil suits in which one of the parties was of French nationality.

(5) In criminal cases in which French defendants were involved, half the members of the jury would be French. Half the assessors on conciliation boards hearing disputes between employers and employees would also be French, if any of the parties involved were French.

(6) French magistrates would continue to be employed by the Tunisian Government until sufficient Tunisian magistrates were available.

(7) French lawyers practising at the Tunisian Bar would be allowed to continue exercising their profession.

(8) The use of the French language in court and in legal documents would continue to be permitted.

Technical and Administrative Co-operation.

This protocol provided that all French Civil Servants employed by the Tunisian Government would be incorporated in the French Public Service from April 1, and that the Tunisian Government would offer a contract, valid for at least two years, to those whose services it wished to retain. M. Khiari (the Minister responsible for the Tunisian Public Service) stated on March 10 that contracts would be offered to about 3,500 French Civil Servants, including 1,800 teachers. A communiqué issued by the French Embassy in Tunis (April 16) gave an assurance that officials who remained in the Tunisian Government's service would retain the same rights of promotion and reintegration in the French Civil Service as those who returned to France.

Agreements on the status of Tunis Radio, on consular representation, and on the French *gendarmerie* in Tunisia had previously been signed during August-October 1956. Details of these agreements are given below:

Tunis Radio.

The agreement on the future status of Tunis Radio, concluded on Aug. 29, 1956, replaced the convention of November, 1953, which had placed Tunis Radio under French control for 30 years. Its provisions were as follows:

(1) All land, buildings, and installations in Tunisia belonging to the French Broadcasting Service (R.T.F.) would become the property of the Tunisian Government from March 31, 1957.

(2) A Tunisian director of Tunis Radio would be appointed immediately.

(3) The R.T.F. would continue to supply technical assistance if required.

(4) Broadcasts by Tunis Radio would "respect the spirit of friendship and co-operation animating relations between France and Tunisia."

(5) Two joint standing committees would be appointed: one to deal with the questions of French technical assistance and the training of Tunisian technicians, the other to act as a liaison committee between the French and Tunisian radio services in programme matters.

Consular Representation.

This agreement, concluded on Sept. 13, 1956, provided that Tunisia would set up two Consulates-General in France (in Paris and Marseilles), and that others would be set up later. The French Government would set up Consulates-General in Tunis, Bizerta, Sfax, and Sousse, and Consulates at Gafsa, Gabès, Souk-el-Arba, and Medjez-el-Bab.

Transfer of French Gendarmerie Posts.

The Tunisian Government announced on Oct. 3, 1956, that an agreement had been concluded whereby the French *gendarmerie* posts in Tunisia would be transferred to the Tunisian National Guard, which had been formed under a decree of Sept. 10, 1956.

Tunisian Law declaring Co-operation with French Protectorate Authorities a "National Indignity." - French Protests to Tunisia.

The Tunisian *Journal Officiel* published on Nov. 26 a law (dated Nov. 19) under which Tunisians who had "willingly given either direct or indirect help to the French Protectorate authorities before July 31, 1954," would be held guilty of "national indignity" (*indignité nationale*). [July 31, 1954, was the date on which M. Mendès-France, then French Prime Minister, had announced in a speech at Carthage the new relationship between France and Tunisia based on Tunisian internal autonomy—see 13718 A.]

The law defined the crime of "national indignity" as covering the following actions: (1) having been a member of the "pseudo-Governments" which had been in office in Tunisia before July 31, 1954; (2) having held a post in the security, Press, or information

services; (3) having been a member of the Grand Council or the Regional or Municipal Councils; (4) having taken part in the organization of cultural, economic, political, or other manifestations in favour of the French authorities; (5) having acquired property "illegally" under the terms of a law of Aug. 17, 1957.

Cases of "national indignity" would be decided by the High Court of Justice (see 14989 A) and punished by "national degradation," entailing the loss of civil rights and of all public posts and employments; expulsion from all organizations, professional associations and trade unions; and forfeiture of the right to be a teacher or to become a director or manager of companies.

The promulgation of the law of Nov. 19 caused deep resentment in France, M. Maurice Faure expressing to M. Masmoudi the "indignation" of the French Government at the Tunisian Government's action.

In his statement to M. Masmoudi (Nov. 27) M. Faure recalled that the Protectorate régime, based throughout on treaties, had been internationally recognized; that it had been abrogated in 1955 and 1956 by agreements freely entered into by both sides; that no reservation had been made at the time which would have allowed Tunisia to question the legal and political status which had existed previously for about 70 years; and that French recognition of Tunisian independence had been the logical fulfilment of the Protectorate régime. In the circumstances, the provisions of the law of Nov. 19 could only be regarded as a "hostile measure" against France.

President Bourguiba, in a statement to *Le Monde* on Dec. 2, described the French resentment as "exaggerated," though admitting that the law was worded "in very general terms." He pointed out, however, that it was in no way intended to have retrospective effect from the beginning of the Protectorate régime; that this was quite evident from the fact that the *Néo-Destour* itself had collaborated with the Protectorate authorities until Dec. 15, 1951; that he (President Bourguiba) had personally supported the decision of the National Council in August 1950 to take part in the Government [see 11360 A]; and that this co-operation had only been ended with M. Schuman's Note of Dec. 15, 1951 [see 11969 A], followed by the arrest of the *Néo-Destour* leaders on Jan. 18, 1952 [see 12181 A]. The last-named date was therefore the "beginning of hostilities" and the struggle had lasted until July 31, 1954, when France had agreed to Tunisia's internal autonomy. In consequence, the law of Nov. 19 would only apply to the above-mentioned period (i.e. Jan. 1952 - July 1954) and would not affect more than a "few dozen" people—i.e. only those who had taken a more prominent part in the political sphere, but excluding all minor civil servants, etc.—(Le Monde - Le Figaro - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune)

(Prev. rep. Franco-Tunisian Relations, 15329 A; U.S.-Tunisian Relations, 15655 A.)

A. UNITED KINGDOM. — Press. - Centenary of the "Birmingham Post."

The *Birmingham Post* celebrated its centenary on Dec. 4 with a special issue containing congratulatory messages from H.M. the Queen, the Prime Minister, the Leader of the Opposition, and many others. Together with its associated papers, it remained a family business until the death in 1942 of Sir Charles Hyde (a nephew of the founder), when it was acquired by Lord Iliffe. The latter entered into a deed of trust to meet the wish expressed by Sir Charles Hyde in his will that the independent and local character of the *Post* and its companion papers should be retained. In 1956 the *Post* absorbed its former rival, the *Birmingham Gazette*, the paper's full title now being the *Birmingham Post and Gazette* (see 15281 B). The present Editor is Mr. W. Vaughan Reynolds.

The only surviving morning paper in Birmingham, and one of the leading provincial newspapers, the *Birmingham Post* was particularly associated with the political campaigns of Mr. Joseph Chamberlain and with the campaigns waged by Nonconformist divines for the eradication of slums and poverty in the city.—(Times - Birmingham Post)

B. CANADA. — External Affairs Minister enters Parliament. - Federal By-election.

Dr. Sidney E. Smith, the Secretary of State for External Affairs, was elected as Progressive Conservative M.P. for Hastings-Frontenac (Ontario) in a by-election held on Nov. 4. He received 9,799 votes against 239 for Mr. Ross Dowson, a "Trotskyist" Communist who ran as a self-styled Labour candidate. The by-election was caused by the appointment to the Senate of Mr. George S. White, the former Progressive Conservative M.P. for the constituency.—(Montreal Star)

(Prev. rep. 15759 B.)

C. ITALY - UNITED KINGDOM. — British-built Nuclear Power Plant for Northern Italy.

It was announced on Nov. 20 that a preliminary agreement to co-operate in building an atomic power station in Northern Italy had been concluded between *AGIP Nucleare*, a recently formed subsidiary of the Italian State Oil Corporation ENI (*Ente Nazionale Idrocarburi*), and the Nuclear Power Station Company, of Knutsford (Cheshire). The power station, which would be located on one of the North Italian lakes, would be of the same type as the Calder Hall station in Cumberland and similar to that under construction at Bradwell (Essex), and would have a capacity of about 200 megawatts. The "letters of intent" signed by the chairmen of the two companies (Signor Enrico Mattei and Sir Claude Gibb) provided that the final contract—worth between £25,000,000 and £30,000,000, including the initial fuel charge—would be concluded before June 30, 1958.

It was stated that the contract would involve the manufacture in Britain of considerable quantities of the nuclear plant, which would consist of one reactor running on natural uranium fuel and moderated graphite, with a carbon-dioxide gas heat transfer system to produce steam in six boiler units. A good deal of the civil engineering work involved was likely to be carried out by Italian firms and with local labour, but the Nuclear Power Plant Company would provide the specialized equipment and knowledge, the project as a whole being handled by the company's co-ordinating division—the Parolle Electric Plant Company Ltd.

The contract would provide for a long-term period of collaboration between the Nuclear Power Plant Company and *AGIP Nucleare*, while the U.K. Atomic Energy Authority would be responsible for the extraction of plutonium from the spent fuel, which would be returned to Britain for processing. Negotiations with *AGIP Nucleare* had been in progress since February last, with the participation and advice of the U.K. Atomic Energy Authority; under an arrangement concluded in July, the A.E.A. had agreed to act as consultant to ENI, with the reservation that it would not advise on the choice of individual British firms. Three other British groups had also competed for the contract.

The contract will represent Britain's first export order for an operational atomic power station, and will provide Italy with its first station of this kind. It was pointed out that at the nuclear power station at Bradwell (Essex), which the Nuclear Power Plant Company were building for the U.K. Central Electricity Authority, two reactors would be necessary for an output of 300 megawatts; the fact that the company could now offer an output of 200 megawatts from one reactor alone suggested that it had been able to improve substantially the performance of its nuclear "furnace" within the past year.

The companies co-operating in the Nuclear Power Plant Company are: C. A. Parsons and Co., Newcastle-upon-Tyne; A. Reyrolle and Co. Ltd., Hebburn-on-Tyne; Head, Wrightson and Co., Stockton-on-Tees; Sir Robert McAlpine and Sons Ltd., London; Whessoe Ltd., Darlington; Strachan and Henshaw Ltd., Bristol; Alexander Findlay and Co., Motherwell; and Clarke, Chapman and Co., Gateshead.

(Times - Daily Telegraph - Corriere d'Informazione, Milan)

(Prev. rep. Italian Atomic Development, 14765 A.)

D. ISRAEL. — Completion of Huleh Scheme.

The Huleh (Hula) drainage and land reclamation scheme near the Israeli-Syrian border, on which work had begun in 1951, was completed on Oct. 31. The scheme involved the draining of Lake Huleh and the adjoining malaria-infested swampland, the building of three canals with a total length of 26 miles across the area, the deepening of the bed of the River Jordan south of the lake, and the diversion of the waters of the Jordan and Hasbani (a tributary of the Jordan) into new canals. By draining the water away from the lake and the swampland, the area was turned into 15,000 acres of fertile agricultural land with a rich subsoil of peat.

Work on the scheme had been interrupted soon after its start by a number of serious incidents between Syria and Israel in March and April 1951, and by Syrian complaints to the U.N. Armistice Commission. The Syrians alleged that the scheme [which affected a small area south of Lake Huleh in the demilitarized zone] violated the Syrian-Israeli armistice agreement, which provided that no action must be taken to gain a military advantage through topographical changes. General Riley, then Chief of Staff of the U.N. Truce Supervision Organization, decided, however, that the scheme involved no military advantages. After lengthy debates in the Security Council in April-May 1951, Israel was asked, and agreed, to discontinue work in a small area belonging to Arab landlords, but was authorized to resume the work elsewhere (see 11524 A).

On May 13, 1957, the Syrian Government again complained to the Security Council, this time against the erection by Israel of a Bailey bridge south of Lake Huleh. The Council eventually decided, however, to accept the view of General Burns (the U.N. Chief of Staff) that the bridge conferred no military advantages on either side, and the work was allowed to be completed.—(Israel Weekly Digest, Jerusalem - Times)

A. WESTERN GERMANY. — Land Elections in Hamburg (1957) and Baden-Württemberg (1956). - New Land Ministry in Lower Saxony.

Elections for the *Burgerschaft* (the City and *Land* Parliament) took place in Hamburg on Nov. 10, 1957. This was the only *Land* election to be held during the past two years, except for that in Baden-Wurttemberg in March 1956. The results of these two elections were as follows, comparison being given with the previous elections in these *Länder* :

Hamburg Elections.

	Seats	1957 Votes	Percentage	1953 Seats
Social Democrats ..	69	551,568	53.9	58
Christian Democrats ..	41	330,363	32.3	36
Free Democrats .	10	87,981	8.6	18
German Party ..	—	42,194	4.1	8
German Reich Party .	—	4,106	0.4	—
Others	—	7,523	0.7	—

In 1953 the Christian Democrats, Free Democrats, and German Party had fought the elections jointly under the name of the " Hamburg Bloc," but this association was dissolved in October last to vitiate a formal complaint by the Social Democrats concerning the constitutionality of this grouping. Although the three parties fought the 1957 elections separately, they nevertheless decided to continue their close co-operation in the new *Bürgerschaft.*

The election result meant that the Social Democrats, who had lost the 1953 elections to the " Hamburg Bloc," regained their predominant position by winning an absolute majority over the non-Socialist parties. Whereas in 1953 the Social Democrats polled only 45.2 per cent of the total vote, they increased this to 53.9 per cent. The aggregate vote of the three parties of the Hamburg Bloc fell from 50 per cent in 1953 to 45 per cent.

As a further consequence Dr. Adenauer lost his two-thirds majority in the *Bundesrat,* reducing his Government's majority to 11 in an Upper House of 41 members.

Baden-Württemberg Elections.

	Seats	1956 Votes	Percentage	1953 Seats
Christian Democrats	56	1,392,326	42.6	50
Social Democrats	36	942,557	28.9	30
Free Democrats . ..	21	541,233	16.6	23
Communists	—	104,612	3 2	4
All-German Bloc (Refugee Party).. .	7	204,280	6.2	6
Others	—	80,428	2.5	—

The old *Landtag* (which was elected in 1952 as a Constituent Assembly) had a total of 121 seats, against 120 in the new *Landtag.* 71.3 per cent of the electorate went to the polls.

The elections were fought during a period of great tension between the Christian Democrats and the Free Democrats following the overthrow of the *Land* Government of North Rhine-Westphalia by the Free Democrats, the resulting split in Dr. Adenauer's coalition government, and the dissensions within the Free Democratic Party itself [see page 15758].

Dr. Gebhard Muller, who had headed the outgoing coalition government—consisting of the Christian Democrats, the Social Democrats, the Free Democrats, and the All-German Bloc—was re-elected *Land* Premier on May 10, 1956 and formed a new coalition Cabinet comprising four Christian Democrats, three Social Democrats, two Free Democrats, one Minister representing the All-German *Bloc,* and two Christian Democratic state councillors. The membership of the new Cabinet was identical with the previous one, except that Herr Viktor Renner (Social Democrat) succeeded Herr Fritz Ulrich as Minister of the Interior.

New Land Government in Lower Saxony.

The government coalition in Lower Saxony was dissolved on Nov. 6, 1957, when the joint parliamentary group of the Christian Democrats and the German Party withdrew on the ground that the joint parliamentary group of the Free Democratic and Refugee parties had admitted six right-wing extremist deputies as associated members—an action which the Christian Democratic and German Party Ministers regarded as a serious political danger. Although the Ministers belonging to the Free Democratic Party and the All-German Bloc (Refugee Party) denied these charges, Herr Hellwege (the *Land* Premier) announced that he would reorganize his Cabinet. On Nov. 12, accordingly, he formed a new Government based on a coalition of the Christian Democrats, German Party, and Social Democrats, with the following membership :

Herr Heinrich Hellwege (German Party)—Prime Minister; Dr. Werner Hofmeister (Christian Democrat)—Justice ; Herr Heinrich Kopf (Social Democrat)—Interior ; Herr August Wegmann (Christian Democrat)—Finance ; Herr Georg Diederichs (Social Democrat)—Social Affairs ; Herr Alfred Kube (Social Democrat)—Economy ; Herr Kurt Richling (Christian Democrat)—Agriculture ; Herr Albert Höft (Social Democrat)—Refugees ; Dr. Richard Langeheine (German Party)—Education.

In the Lower Saxon *Landtag* the Social Democrats have 58 seats, the Christian Democrats 44, and the German Party 18. (Die Welt, Hamburg - Frankfurter Allgemeine Zeitung)

(Prev. rep. 14339 A ; 13237 A.)

B. TURKEY. — New Government.

Mr. Adnan Menderes, who was entrusted by President Bayar with the formation of a new Government following the Democratic Party's victory in the recent general election, announced his new Cabinet on Nov. 25 as follows :

*M. Adnan Menderes	Prime Minister.
†M. Tevfik Ileri	Minister of State and Deputy Prime Minister.
*M. Emin Kalafat	Ministers of State.
M. Muzaffer Kurbanoglu ..	Ministers of State.
†M. Esat Budakoglu	Justice.
*M. Semi Ergin	National Defence.
*M. Namik Gedik	Interior.
†M. Fatin Rüstü Zorlu ..	Foreign Affairs.
*M. Hasan Polatkan	Finance.
†M. Celal Yardimci	Education.
*M. Ethem Menderes	Public Works.
*M. Abdullah Aker	Commerce.
M. Lütfi Kirdar	Health and Social Welfare.
*M. Hadi Hüsman	Customs and Monopolies.
M. Nedim Ökmen	Agriculture.
General Fevzi Uçaner ..	Communications.
M. Hayrettin Erkmen ..	Labour.
*M. Samet Agaoglu	Industry.
M. Sitki Yircali	Broadcasting and Tourism.
M. Medeni Berk	Reconstruction and Town Planning.

*No change.
†Held different portfolio in previous Cabinet.

The Ministries of Press, Broadcasting and Tourism, and Reconstruction and Town Planning were new departments.

M. Ileri had previously been Minister of Education—a post in which he was succeeded by M. Yardimci, hitherto Minister of State. M. Budakoglu had held the Agriculture portfolio, whilst M. Zorlu had been acting Foreign Minister until August 1957, and more recently Minister of State. Professor Göktürk (Justice), Dr. Koroz (Health), M. Demirer (Communications), M. Tarhan (Labour), and M. Bengü (Minister of State) left the Government. M. Yircali, M. Ökmen, and M. Erkmen had been members of previous Menderes Cabinets but not of the last one. M. Kurbanoglu (former deputy chairman of the parliamentary group of the Democratic Party), M. Kirdar (a former Governor of Istanbul), and General Uçaner (formerly C.-in-C. of the Turkish Air Force) had not previously held ministerial office.

The Cabinet was the fifth to be headed by M. Adnan Menderes since the Democratic Party first came to power in 1950.—(Turkish Embassy Press Department, London)

(Prev. rep. Cabinet, 15703 A ; Elections, 15841 A.)

C. RHODESIA AND NYASALAND FEDERATION. — Merger of Federal and United Rhodesia Parties. - Formation of Constitution Party.

The merger of the Federal Party and the United Rhodesia Party as the United Federal Party was completed on Nov. 21, when it was approved at the Federal Party's congress at Ndola by unanimous vote, with four delegates abstaining. The United Rhodesia Party had already approved the merger at its annual congress in September. It was announced that a joint congress to set up the new party would be held in April 1958.

Mr. Godwin Lewanika, president of the Mines African Staff Association, joined the Federal Party on Nov. 4, being the first African in Northern Rhodesia to do so.

The decision of Mr. Lewanika—son of the late King Lewanika of Barotseland, and a founder-member of the African National Congress —was regarded as an important political development. In a statement explaining his decision, Mr. Lewanika said that it was not meant " to placate Europeans and betray African interests " but because it was time for Africans to " show by practical concrete action that they cannot think and act in the same way simply because they are Africans," and to prove to Africans the necessity of party politics.

A new multi-racial political party, the Constitution Party, was launched in Lusaka (Northern Rhodesia) on Oct. 19, the founder-members including Dr. Alexander Scott (Independent M.P. in the Federal Assembly) and Colonel David Stirling, founder-president of the Capricorn Africa Society. It was announced that the new party would contest both federal and territorial elections on a platform of liberal principles.
(Federal Information Department, Salisbury) **(15781 A.)**

A. UNITED KINGDOM. — Telephone Service. - Inter-Urban Automation. - Cheaper Toll Calls.

Mr. Marples, the Postmaster-General, announced in the House of Commons on Nov. 13 that from Jan. 1, 1958, charges for most telephone calls at present costing 6d., 9d., and 1s. would be reduced to 3d., whilst the majority of trunk call charges would also be reduced. The reductions would form part of "revolutionary" changes in the telephone system and would pave the way for full automation in the service, including dialling of trunk calls by subscribers themselves.

A White Paper published on the same day gave the following details of the proposals, which were described by Mr. Marples as "the most sweeping and radical changes made since the Post Office took over the telephone system in 1912":

(1) From Jan. 1, 1958 over 150,000,000 short-distance calls now handled by operators would be dialled by callers direct, and the 6,000 telephone exchanges now in use would be reduced by 5,400 by combining them into 600 charging units or groups.

(2) From the same date the area covered by a 3d. call (4d. if from a public call-box) would be extended from the present average of about 80 square miles to about 900 square miles. As a result the average radius for a "local" call would go up from about 5 miles to about 17 miles.

(3) Also from Jan. 1, 1958, most trunk calls would be cheaper because (*a*) they would be charged on the basis of "crow-flight" distances between the centres of groups of exchanges, and not on distances between individual exchanges, as at present; (*b*) in many cases mileage rates would be reduced. Some trunk charges, however, would remain at existing rates, whilst about 3 per cent would be slightly increased. These latter would be for calls between exchanges on the inner circumference of two near, but not neighbouring, groups, where the distance between the group centres would be more than the distance between the places themselves.

(4) The new mileage rates would be as follows (existing rates in parentheses): Up to 35 miles [provided that the required exchange was outside the "extended local call" area—see above], 1s. (from 1s. to 1s. 6d.); 35-50 miles, 1s. 9d. (1s. 10d.); 50-75 miles, 2s. 3d. (2s. 3d.); 75-125 miles, 3s. (3s.); over 125 miles, 3s. 6d. (3s. 9d.).

(5) The existing three-minute minimum charge and subsequent timing at one-minute intervals would be retained for the present, and cheap evening rates would remain unaltered.

(6) Full automation, enabling subscribers to dial numbers anywhere in Britain, would begin at Bristol at the end of 1958, be available in 40 other towns by the end of 1960, and be extended to London by 1960-61. By the end of 1970 automation would enable three-quarters of all trunk calls to be dialled direct.

Mr. Marples outlined the main consequences of the changes at a press conference on Nov. 13, his remarks being summarized below under cross-headings.

First Stage - Extension of "Local Call" Area.

After saying that from Jan. 1, 1958 a subscriber in the Central London area would be able to call, for only 3d., a subscriber in an area bounded by Hertford in the north, Upminster in the east, Reigate in the south, and Windsor in the west, Mr. Marples explained that the simplified charging system would enable full use to be made of existing automatic equipment. Up to the present it had not been possible to use this equipment to connect subscribers outside the "local call" area because it could not record any charge except threepence. Rather than incur the heavy cost of installing new equipment able to record varying charges, it had been decided to extend the threepenny call area. This first step would reduce Post Office revenue by about £8,000,000 annually, but £2,000,000 would be saved by a reduction in the number of operators required, whilst the remaining £6,000,000 would be provided by the increases in local call charges announced in July (see 15779 A). Some 2,000-3,000 telephone operators would become redundant in the first year, but this would present no real problem as about 5,000 operators left annually. The future of displaced supervisors was more serious, but they would be generously treated and full consultations had taken place with the trade unions concerned.

Second Stage - Full Automation.

The simplified charging system, Mr. Marples continued, would "end the administrative restrictive practices caused by an obsolete system of charging," and allow full automation to go ahead. Eventually all telephone charges would be recorded mechanically, thereby saving the labour of 1,500 clerks who at present sorted about 330,000,000 trunk call tickets into 4,000,000 accounts annually, and effecting an overall economy of £15,000,000 a year.

"Grace" Robot Machine. The numbers dialled by a subscriber would be interpreted by a robot machine known as "Grace" (Group Routing and Charging Equipment), devised by Post Office engineers, which would route the calls in the required direction and record the charge. A national telephone-number system would be required, and this would be done by preceding subscribers' present numbers by three digits which, used in various permutations, would represent the code numbers of the different exchanges. To call an operator it would be necessary to dial 100. A supplementary telephone directory with the code numbers of exchanges would be issued. For the convenience of hotels and of establishments where individuals made private calls, meters would be rented out at 15s. a quarter to record call charges.

Trunk Call Charges. These would be based on a new system. The present three-minute minimum would be abolished, and instead the minimum local call charge—at present threepence—would be the basis and would buy time according to the distance involved. For example, the time for a 3d. call from Bristol to Gloucester (32 miles) might be 45 seconds, each subsequent 45 seconds costing an additional 3d. From Bristol to Edinburgh (312 miles), however, every 3d. might perhaps buy 13 seconds of time. It might eventually be possible to telephone from Land's End to John o' Groats for only 3d., but this would allow of possibly not more than 10 seconds. In this way it would be possible to pass a short message between any two points for a few pence only. The present method of warning callers of the passage of time by "pips" would be ended.

Mr. Marples concluded by saying that in spite of "Grace" some operators would still be on call for those who wished to reverse charges, as well as to give subscribers advice or personal service. As the automatic system came into effect, however, the number of operators would decrease by about 2,000 a year. The changes outlined in the White Paper would set the pattern of the telephone service for the next 15 to 20 years.
(Times - Daily Telegraph - Manchester Guardian)
(Prev. rep. 15779 A.)

B. CHILE. — Impeachment of Ministers of Foreign Affairs and Justice after Flight of Argentine Peronista Leader. - Cabinet Reorganization.

The Chilean Chamber of Deputies decided on Oct. 11, by 100 votes to eight, to impeach the Ministers of Foreign Affairs and Justice, respectively Señor Osvaldo Sainte-Marie and Señor Arturo Zuñiga. The impeachment, which was subsequently confirmed by the Senate on Oct. 26, followed the escape from prison on Sept. 28 of Señor Guillermo Patricio Kelly, a prominent *Peronista* leader who had fled from Argentina to Chile in March (see 15512 A) and who was to have been extradited to Argentina under an Order of the Chilean Supreme Court. Señor Kelly's escape appeared to confirm the existence of an organized movement to help *Peronistas*, and no trace of him could be found in spite of nation-wide searches. The two Ministers were charged with having facilitated Señor Kelly's escape through deliberate negligence in maintaining sufficient guards around the prison, thereby "gravely compromising the national honour."

Both Ministers were automatically suspended as a result of the decision of the Chilean Congress, leading to a governmental reorganization on Oct. 28. The new membership of the Cabinet was announced as follows:

Rear-Admiral Francisco O'Ryan Orrego—Interior; Sr. Alberto Sepúlveda Contreras—Foreign Affairs; General Luis Vidal Vargas—Defence; General Diego Barros Ortiz—Education; Dr. Jorge Torreblanco Droguett—Health; Dr. Raul Barrios Ortiz—Labour; Sr. Emilio González González—Mines; Sr. Luis Octavio Reyes—Justice; General Eduardo Yañez Zavala—Public Works; Sr. Enrique Méndez Carrasco—Lands and Settlement; Sr. Luis Correa Prieto—Economy; Sr. Eduardo Urzua Merino—Finance; Sr. Mario Astorga Cartes—Agriculture; Sr. Mario Ciudad Vásquez—Secretary-General to the Government.

The Ministers of the Interior, Health, Labour, Public Works, Lands and Settlement, Finance, and Agriculture retained their former portfolios.

Ministers leaving the Government (in addition to Sr. Sainte-Marie and Sr. Zuñiga) were the former Ministers of Finance (General Barrientos), Education (Rear-Admiral Quintana), and Economy (General Arce). In addition to holding the Foreign Affairs portfolio, Señor Sainte-Marie had also been Minister of Mines.

Rear-Admiral O'Ryan, Dr. Torreblanco, and Sr. Méndez had joined the Cabinet in a previous reshuffle in July, when the then Ministers of the Interior (Sr. Aravena), Health (Sr. Muñoz), and Land and Settlement (Sr. Jimenez) had resigned. Of the new Ministers, Sr. Sepúlveda is a career diplomat; Sr. Reyes had been Deputy Minister of the Interior; General Barros Ortiz was C.-in-C. of the Air Force; General Vidal Vargas was C.-in-C. of the Army; and Sr. González had been president of the State Bank.—(Bank of London and South America Fortnightly Review - Times - New York Times)
(Prev. rep. 15530 B; 15512 A.)

C. ANTARCTICA. — Renewal of Tripartite Assurances between Britain, Argentina and Chile.

The British, Argentine and Chilean Governments exchanged statements on Nov. 25 giving assurances that none of the three countries would send warships south of latitude 60 deg. S. during the coming Antarctic season, apart from such movements as had been customary for a number of years. Similar assurances have been given annually by the three Governments over the past eight years.—(Times) **(Prev. rep. 13913 E.)**

A. SINGAPORE. — Government's Action against Subversive Communist Activities. - Legislative and Political Developments.

The Singapore Government, acting under the emergency powers for the preservation of public security, arrested 35 Chinese on Aug. 23 for carrying on subversive activities in trade unions and political organizations with a view to seizing power on behalf of the illegal Communist Party at the next general elections. Those arrested included Tan Chong Kim (the chairman), Kan Kong Yuan (vice-chairman), and three other members of the central executive of the People's Action Party, 13 members of its branch executives, and 13 trade union officials. Three persons connected with the Chinese left-wing newspaper *Sin Pao* were also detained and four other persons were subsequently arrested, including Tuan Boon Hwa, assistant secretary of the P.A.P.'s education and cultural committee.

A White Paper was issued in Singapore on Aug. 23 announcing that the Government had uncovered a new Communist plot to take over the Colony by violence and armed revolt.

The White Paper said that after the dissolution of the Communist-infiltrated factory and shopworkers' union in 1956 (see page 15557, footnote) Communist agents had seized key positions in the General Employees' Union and the National Union of General Workers. It continued: "Once again the aim is to bring about a united front of workers, farmers, and students, supported by a favourable Press and by political sympathizers. The gravest developments have been among the workers. A determined and successful bid for controlling the People's Action Party has been the second feature in recent months. Here the Communists have worked through cultural, educational and propaganda groups in the party and, through them, have gone far to obtain domination of the whole party organization."

The Government statement referred to developments in the P.A.P. earlier in August, when the party's secretary-general, Mr. Lee Kuan Yew (leader of its moderate wing and its spokesman in the Legislative Assembly), resigned from the central executive after a split between its moderate and extremist factions. He was succeeded as secretary-general by Mr. T. T. Ralah, the only left-wing member of the executive not to be arrested later in August, but who resigned on Sept. 3 "on health grounds."

A motion moved by Mr. Lee Kuan Yew in the Legislative Assembly on Sept. 12, criticizing the Government's action and "deploring the inaccuracies" in the White Paper, was defeated by 25 votes to three, with seven members absent.

Opposing the motion, the Chief Minister (Mr. Lim Yew Hock) said the Communist threat was real and must not be belittled. There had been enough of riots and disturbances, and the Government could not stand by and watch the Communists "corrupt the minds of the workers and the simple people." Whilst not implying that all members of the P.A.P. were Communists, he maintained that the party had been dangerously infiltrated by Communists. The Government knew that Mr. Lee Kuan Yew, who was a genuine Socialist and Democrat, was being used by the Communists for their own ends and would be "thrown overboard" when they no longer required him.

On Sept. 24-25 the Government arrested 48 students for subversive Communist activities in the Chinese middle (secondary) schools. The Government's evidence, published on Sept. 25, revealed the existence of secret indoctrination classes in schools, of illegal "discussion groups," and of the holding of "picnics" and "house parties" designed to subvert students and exploit Chinese education. Twenty-nine of the arrested students were subsequently released, detention orders being issued against the remainder.

A detention order was also issued on Sept. 26 against Dr. Chuang Chu-lin (a Chinese national), principal of the Chung Chen secondary school—the largest in Singapore, and the scene of the 1956 riots. In spite of numerous representations on his behalf by schools and teachers, the Governor-in-Council decided on Oct. 12 to deport Dr. Chuang. A plan to reorganize the Chung Chen school was also announced, to take effect from the beginning of 1958.

Citizenship Legislation.

The Legislative Assembly passed on Oct. 16 the Singapore Citizenship Bill, which conferred citizenship rights on (i) persons born in the Malayan Federation; (ii) citizens of the U.K. and Colonies; and (iii) citizens of other Commonwealth countries which granted reciprocal rights, provided such persons had lived two years in Singapore and had taken an oath of loyalty to Singapore. Furthermore, it enabled aliens who had lived in Singapore for the past eight years to be registered as citizens after taking an oath of loyalty. The latter provision was aimed primarily at enlisting the support of nearly 200,000 Chinese immigrants who had continued to regard themselves as Chinese nationals in spite of a long period of residence in Singapore.

Educational Legislation.

On Nov. 18 the Legislative Assembly finally passed the Education Bill, with a number of amendments adopted during the Committee stage. Its principal provisions were:

(1) All schools, school managers, and teachers would have to be registered with the Government.

(2) The Government could refuse to register a school if, in the opinion of the Director of Education, it was "likely to be used for a purpose detrimental to the interests of the Colony or the public"—e.g. as a meeting-place for an unlawful society, or if discipline in the school was not being properly maintained. Other reasons for refusing registration would include inefficient administration of the school by its committee of management, or if more than 1,200 pupils—the limit set by the Government—were enrolled.

(3) Registration of teachers could be refused not only if they lacked suitable qualifications or were not of good character, but also where the Director of Education considered that a teacher's presence was "prejudicial to the good of the public or his pupils."

The Minister of Education (Mr. Chew Swee Kee) said that the Government regarded the Bill as the "foundation-stone for the education of the children of all communities without discrimination."

Mr. Chew gave assurances that the Director of Education's powers in refusing registration of schools or teachers would not be abused, and said that all appeals against decisions which were taken on political grounds would be considered by the Minister himself. Appeals on other questions would be submitted to a board comprising an independent chairman, two members nominated by institutions of higher education approved by the Minister, and six members appointed by the Minister, of whom two would be teachers and two school managers. A council, on which educational institutions would be adequately represented, would also be set up to advise on educational policy generally.

Formation of Workers' Party. - Mr. David Marshall's Return to Political Life.

Mr. David Marshall (the former Chief Minister of Singapore), who had decided in April to retire from politics, announced on Nov. 1 the formation of a new political party—the Workers' Party—to contest the municipal elections in December and the general elections in August 1958. The party's first meeting, held on Nov. 3, was presided over by Mr. N. S. N. Nair, president of the Army Civilians' Union, which represents Asian civilians working for the Army; as the question whether trade unions in Singapore should participate in politics had not yet been settled, those attending did so in an individual capacity and not as trade unionists. The meeting elected Mr. Marshall—who is legal adviser to the Army Civilians' Union—as a member of the party's executive.

Mr. Marshall accused the Government of "oppressing" Chinese-educated students and trade unionists in an attempt to defeat Communism, and asserted that this would only drive more people to become Communists. He also criticized the Constitution which the Coalition Government had negotiated with Britain in April 1957 (see 15557 A) as "dishonest."

The meeting adopted resolutions calling for the ending of "colonialism" and "exploitation," the complete independence of Singapore and its ultimate union with Malaya, repeal of laws relating to deportation and public security, and improvement of living standards of the people.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15557 A.)**

B. PORTUGAL - UNITED STATES. — Extension of Azores Defence Pact.

The Portuguese Foreign Minister (Dr. da Cunha) and the U.S. Ambassador in Lisbon (Mr. James C. Bonright) signed an agreement on Nov. 15 extending until Dec. 31, 1962, the U.S.-Portuguese defence pact of 1951 whereby the United States was given the right to construct and maintain an airfield on Santa Maria Island, in the Azores.
(New York Times) **(Prev. rep. 11740 B.)**

C. RELIGIOUS LIFE. — Church of England. - New Bishop of Chichester. - Retirement of Dr. Bell.

It was announced on Nov. 26 that the Queen had approved the appointment of Dr. Roger Wilson, Bishop of Wakefield, as Bishop of Chichester in succession to Dr. George Bell (74), who would be retiring in January. Dr. Wilson (52) was Archdeacon of Nottingham from 1945 to 1949 before his consecration in the latter year as Bishop of Wakefield.
(Church Times) **(Prev. rep. 15423 E.)**

D. UNITED KINGDOM. — National Insurance Act.

The National Insurance Bill, which received its second reading in the House of Commons on Nov. 13, was enacted on Nov. 28 after passing through its remaining stages in both Houses of Parliament.—(Times) **(Prev. rep. 15867 A.)**

A. UNITED KINGDOM. — Labour Party. - Adoption of Policy Statements. - The 1956 and 1957 Party Conferences. - National Executive and Shadow Cabinet Elections. - Termination of Agreement between Labour Party and Co-operative Union.

The annual conferences of the Labour Party in 1956 and 1957, summarized below, were devoted mainly to a discussion of the nine policy documents issued by the party (see 15874 A), all of which were approved after extensive debate.

The 1956 Conference. - Mr. Bevan elected Treasurer of Labour Party.

The 55th annual conference was held at Blackpool from Oct. 1-5, 1956, under the chairmanship of Mr. Edwin Gooch, M.P. Its principal features were the election of Mr. Aneurin Bevan as party treasurer, and the unanimous endorsement of four of the party's policy statements—those on *Personal Freedom*, *Towards Equality*, *The Plural Society*, and *Homes and the Future*.

The election of a new party treasurer was caused by the appointment of Mr. Hugh Gaitskell to the leadership of the Labour Party. Four candidates stood for the post—Mr. Aneurin Bevan, M.P., Mr. George Brown, M.P., Mr. Charles Pannell, M.P., and Mr. David Rhydderch, a former South Wales miner. The ballot was held on Oct. 2 with the following result : Mr. Bevan, 3,029,000 votes ; Mr. Brown, 2,755,000 ; Mr. Pannell, 644,000 ; Mr. Rhydderch, 42,000.

Mr. Bevan, nominated by seven trade unions and over 100 constituency parties, was supported by the National Union of Mineworkers (678,000 votes), the Union of Shop, Distributive and Allied Workers (324,000) and the National Union of Railwaymen (295,000). His vote of over 3,000,000 compared with 2,032,000 in 1954 and 1,225,000 in 1955, when he unsuccessfully opposed Mr. Gaitskell for the party treasurership in both those years.

Mr. Brown, a former Minister of Works, was nominated by four unions and six local parties, and had the support of the Transport and General Workers' Union (about 1,000,000 votes) and the National Union of General and Municipal Workers (650,000). Mr. Pannell was nominated by the Amalgamated Engineering Union (635,000 votes) and three local parties, while Mr. Rhydderch was nominated by the Clerical and Administrative Workers' Union.

The principal resolutions adopted by the conference are summarized below :

"Towards Equality." The policy document on this subject was introduced by Mr. Harold Wilson, M.P., and approved without dissent after Mr. Gaitskell had replied for the Executive. Mr. Gaitskell ended his speech by stressing the "vital need" for a twofold unity inside the Labour movement—"unity of purpose between the trade union movement and the Labour Party, particularly in the field of economic policy, and unity within the Labour Party itself."

Speaking the same evening (Oct. 3) at a rally organized by the Socialist periodical *Tribune*, Mr. Bevan declared : "I have no quarrel with any individual inside this movement. There are sometimes personal collisions that represent differences of principle or outlook. All I can say is that I . . . will try my utmost to work in the heartiest and most intimate co-operation with everybody inside this party . . ." Mr. Bevan's speech was regarded as a personal response to Mr. Gaitskell's appeal for unity.

"Personal Freedom." The policy document was introduced by Mr. Sam Watson (the Durham miners' leader) and accepted after debate. Mr. Benn Levy (the well-known playwright and a former M.P.) moved a resolution viewing with "alarm" the increasing tendency for security measures to interfere with the freedom of the individual, and urging that anyone suspected of being a "security risk" should have the right of appeal to a panel of three High Court judges. The resolution was defeated on a card vote by 3,478,000 to 2,625,000.

"The Plural Society." Unanimous approval was also given to this document, which was introduced by Mr. Tom Driberg, former M.P. for Maldon. Several resolutions were moved during the debate and accepted by the Executive, including a resolution by Mr. A. F. Nicholls (Epping) opposing all forms of racial discrimination, and another by Mr. John Boyd (Amalgamated Engineering Union) calling for self-determination for the people of Cyprus.

Housing. The policy document *Homes and the Future* was introduced by Mr. Anthony Greenwood, M.P., and accepted after a lengthy debate. In the course of his speech Mr. Greenwood announced that the Executive had decided to make one important change in the leasehold reform section of *Homes for the Future*—viz., instead of the occupant of leasehold property being entitled to buy the freehold on the expiration of his lease, "we believe on reflection that he should be entitled to buy the freehold at any time."

The conference accepted two resolutions on housing : (1) a composite resolution by Mr. N. J. Smart (Woolwich) calling for lower building costs to be achieved by reducing interest rates and the cost of materials, and elimination of monopolistic and restrictive practices; (2) by Mr. Aneurin Bevan (in his capacity as delegate for Ebbw Vale) urging that local authorities should be able to contract with each other for the maintenance and repair of housing estates.

Social Security. Mr. David Rhydderch, for the Clerical and Administrative Workers' Union, presented a composite resolution calling for the streamlining of the administration of the social services, the abolition of the earnings limit relating to old-age pensions, and the integration of national assistance with social insurance. The resolution was adopted after Mr. Richard Crossman, M.P., had announced the Executive's intention of drawing up a policy statement which would include proposals for compulsory national superannuation [See policy statement *National Superannuation* subsequently issued in May 1957—page 15875].

Automation. Mr. Harry Knight (Association of Supervisory Staffs, Executives and Technicians) moved a resolution regretting the Executive's failure to produce a report on automation, and calling within the next six months for (1) an "effective statement providing for planning and control of automation to ensure that the whole community benefits" ; (2) prior consultation with the trade unions, and adequate compensation for workers displaced by automotive processes ; (3) an educational programme to provide sufficient technical workers to man "the automated plants." In presenting this resolution, Mr. Knight gave a warning that certain European countries and the United States were far ahead of Britain in automation, and declared that British backwardness in this field might result in "more unemployment, poverty and misery from not having automation than we should ever have from having it."

For the Executive, Mr. Jack Cooper (president of the National Union of General and Municipal Workers) proposed that the resolution be remitted for consideration, and expressed the opinion that automation was "nothing to get scared about." Many delegates, however, strongly dissented from this view, and the Executive eventually agreed to accept Mr. Knight's resolution.

Foreign Policy. Unanimous approval was given to a composite resolution by Mr. K. Zilliacus, M.P., calling on the Labour movement (1) to reaffirm its faith in the United Nations ; (2) to press for "co-existence" and disarmament agreements based on the U.N. Charter; and (3) to support the principle that "rights to military bases should be recognized only if they form part of a U.N. world security system."

The Middle East. The conference adopted by acclamation a resolution by Mr. Hugh Jenkins (Cities of London and Westminster constituency party) which (1) condemned the Government's "lamentable handling of the Suez crisis" ; (2) praised the Parliamentary Labour Party's stand on this matter, "and in particular the part it has taken in committing the Government to refer the dispute to the Security Council" ; and (3) reaffirmed that "British policy must conform with the spirit and letter of the Charter and have as its object the achievement of a peaceful settlement by negotiation."

Agriculture. The Executive accepted a resolution by Mr. H. Collison (National Union of Agricultural Workers) noting with concern "the continued worsening in the relationships between the farmers and the Government," and declaring that a flourishing agriculture needed a long-term policy, the full implementation of the 1947 Agriculture Act, and an extension of marketing boards.

Cotton Industry. The Executive also accepted a motion by Mr. W. Roberts (United Textile Factory Workers) calling for policies to safeguard the cotton textile industry against unfair foreign competition, and urging the Government to "restore confidence" in the industry by restricting yarn and cloth imports.

Elections to National Executive. Balloting for the party's National Executive Committee resulted as follows :

Constituency Party members (7)—Mrs. Barbara Castle, M.P. (952,000 votes), Mr. Anthony Greenwood, M.P. (899,000), Mr. Harold Wilson, M.P. (877,000), Mr. Tom Driberg (831,000), Mr. Richard Crossman, M.P. (740,000), Mr. Ian Mikardo (717,000), and Mr. Sydney Silverman (675,000). There were 13 unsuccessful candidates, of whom Mr. James Callaghan, M.P., obtained most votes (558,000).

Trade Union members (12)—Mr. Harry Earnshaw, Mr. Edwin Gooch, M.P., Mr. Sam Watson, Mr. J. W. Stafford, Mr. Jack Cooper, Mr. R. J. Gunter, Mr. H. R. Nicholas, Mr. G. I. Brinham, Mr. W. M. Tallon, Mr. D. H. Davies, Mr. Walter Padley, M.P., and Mr. R. W. Casasola.

Socialist, Co-operative and Professional Organizations (1)—Mr. Arthur Skeffington, M.P.

Women members (5)—Miss Margaret Herbison, M.P., Miss Alice Bacon, M.P., Dr. Edith Summerskill, M.P., Mrs. Jean Mann, M.P., and Miss Alice Horan.

[Mr. Gaitskell, the party leader, Mr. James Griffiths, deputy leader, and Mr. Aneurin Bevan, the party treasurer, are *ex-officio* members of the National Executive Committee.]

Party Chairmanship. Miss Margaret Herbison, M.P., was elected chairman of the Labour Party for the year 1956-57. Mr. Tom Driberg was elected vice-chairman.

The 1957 Conference.

The party's 56th annual conference was held at Brighton from Sept. 30 to Oct. 4, 1957. Its principal features were (1) endorsement of the policy statements on *Industry and Society*, *Public Enterprise*, and *National Superannuation*, and also of two policy documents on Colonial affairs ; (2) a pledge to repeal the Government's Rent Act if the Labour Party came to power at the next election ; and (3) rejection of a resolution which would have pledged a future Labour Government to unilateral renunciation of nuclear weapons.

"Industry and Society." In presenting this document, Mr. Harold Wilson admitted, firstly, that its wording might be considered obscure, for which the National Executive took full responsibility; and secondly, that it had given rise to much controversy, which, he stated, had been based on "misunderstandings and misconceptions." The first misunderstanding was that the document was a substitute for what had been described as "old-fashioned nationalization," whereas it was in fact "a comprehensive statement which includes and involves traditional nationalization as well as other forms." Renationalization of steel and road transport was clearly reaffirmed, and there was a clear commitment to extend public ownership to any industry, or part of an industry, which was found after thorough inquiry to be "failing the nation." Where the case had been made out for "old-fashioned nationalization," public ownership would be extended—whether by the "monolithic public corporation" or other means would be decided on the merits of each case.

A second misunderstanding had arisen on the interpretation of the phrase "failing the nation," in which connexion Mr. Wilson said: "Does this simply mean limiting the criterion to that of pure operational efficiency? The answer is 'No.' ... Efficiency will be an important test, but there are others, like failing to play an adequate part in the export effort, abuse of monopoly power, unwillingness to expand sufficiently in the national interest, lack of drive in investment, bad industrial relations, and failure to co-operate in Government planning measures."

"A third misconception," Mr. Wilson continued, "has arisen from the question that has been asked: 'Is it true that the National Executive is proposing that, in cases where it has been proved that an industry is failing the nation, there will be a mere acquisition of shares and no interference with management and control? Again the answer is 'No.' If we take over a firm or industry that has been proved to be failing the nation, obviously we have to get control of management policy."

After describing the document as "a new analysis of contemporary capitalism," and saying that it showed "the dominance in the economy of a few large firms," Mr. Wilson went on: "The main criticism [of the policy statement] ... has been that we have set out this new and challenging analysis and then failed to say what we are going to do. Some say we ought to list the industries to be taken over. We believe that job is one for the next Labour Government, and not for us here. The reason is not so much electoral considerations, or fears that the more profitable sections of firms will be hived off before the election to avoid nationalization, but the simple practical reason that we cannot tell which industries will be relevant at the time we take over responsibility of government ... So we say steel and road transport—and the decision for the rest to be made after thorough inquiry by the Labour Government ..."

Mr. Jim Campbell (chairman of the N.U.R.), speaking as "an old-fashioned Socialist," said that he had been "depressed" by Mr. Wilson's statement and his references to "obscurity" and "misunderstandings." He moved a resolution which (1) affirmed the conference's belief "in the common ownership of all the basic industries and means of production"; (2) deplored "the present tendency to deviate from these accepted Socialist principles"; and (3) urged that the policy statement be referred back to the National Executive "in order that a clear, unambiguous document be prepared and issued indicating the industries to be brought under public ownership by the next Labour Government."

On the other hand, the policy statement was supported by a number of influential trade union leaders, including Mr. Frank Cousins (general secretary of the T.G.W.U.), Mr. W. Carron (president of the A.E.U.), Mr. Ernest Jones (president of the N.U.M.), Mr. A. Birch (general secretary of the Union of Shop, Distributive and Allied Workers), and Mr. R. J. Cook (national industrial officer of the National Union of General and Municipal Workers).

A lengthy and at times heated debate was replied to by Mr. Gaitskell, who claimed that the policy statement was in full accord with Socialist principles, and who said that it involved "an advance on three fronts simultaneously · the front of nationalization, the front of control, and that of public ownership." The document was then approved by 5,309,000 votes to 1,276,000, together with two other resolutions presented during the debate: (1) a Hornsey resolution proposing that the next Labour Government, "as a first step," should (*a*) transfer to public ownership the shares of a substantial number of companies whose assets exceeded £2,500,000, and (*b*) that, in order of priority, particular attention should be paid to firms in banking, building and civil engineering, chemicals, engineering, insurance, and shipbuilding; (2) a Bromsgrove resolution urging the nationalization of water supplies.

The N.U.R. resolution was defeated by 5,383,000 votes to 1,442,000. It was supported by the Associated Society of Locomotive Engineers and Firemen (ASLEF), the Electrical Trades Union, and many local Labour parties, and also by Mr. Herbert Morrison, Mr. Shinwell, and Miss Jennie Lee (Mrs. Aneurin Bevan).

National Superannuation. The policy document on this subject was unanimously endorsed after a lengthy debate in which Mr. Richard Crossman, M.P. (chairman of the drafting committee which worked out the scheme) replied in detail to a number of points and criticisms by individual delegates. Describing the scheme as "a major and revolutionary change" in the party's approach to the social services, Mr. Crossman said: "The proper Socialist attitude to a privilege is not to destroy it but to transfer the privileges of the minority into the rights of the majority. That is what we are doing ... We are offering a Socialist national insurance in which we deliberately build a floor below which no-one's standard of living falls, deliberately weighting it in favour of the lowest-paid worker ..."

An important part of Mr. Crossman's speech dealt with the relationship between the proposed national superannuation scheme and the many existing occupational pension schemes. He stressed that the Labour Party was not proposing to close down any of the latter, but that they would "limit the schemes which they would authorize as alternatives to national superannuation to those which pass certain tests." Wherever employers did not pass these tests, it would only mean that they would have to adopt the national scheme, "and then the other scheme could be on top." The Labour Party genuinely desired the continuation of those schemes which were sound and which passed the tests. While the policy statement defined these tests, however, it was not a legal document but rather a statement of intentions and purposes. There were several thousand such schemes in existence, each slightly different, and they would "have to be tremendously careful to preserve the rights of people in them and see that the conditions laid down are practical."

"There is grave anxiety," Mr. Crossman continued, "lest our scheme, by sucking away new entrants, will injure these schemes and make them actuarially unsound, causing them to close down. This has been drawn to our attention by the T.U.C. We shall have to go into a huddle in the next 12 months and decide whether to bring some of the weaker schemes into the national scheme, but we must not subsidize private schemes out of State money." Mr. Crossman added that it was intended to get the national superannuation scheme on the Statute Book "in the first two years after the return of a Labour Government"—the first time this "deadline" had been mentioned.

The debate was primarily between the advocates of "flat-rate" pensions (i.e. those who thought the pension should be the same for everyone) and those who agreed with the National Executive that national superannuation should vary in proportion to past earnings up to a maximum of about £15 a week. Mr. Crossman pointed out that a flat-rate scheme would widen the gap between the "poor" two-thirds of the population, who relied entirely on the State pension, and the "lucky" one-third who had some form of private superannuation in addition. A number of delegates also urged that the whole conception of a contributory scheme should be rejected in favour of one financed out of direct taxation. Rejecting this argument, Mr. Crossman pointed out that the next Labour Government were already committed to an increase of £1 in the basic pension, which would cost £212,000,000 a year or 10d. on the standard rate of income-tax; to transfer the whole burden of pensions on to taxation would mean increasing the standard rate by another 2s. 8d.

The policy document was approved without dissent together with (1) a Hampstead resolution asking for special consideration to be given to the position of women under the national superannuation plan—in particular, to see what form of assistance could be given to mothers with young children; and (2) a Nelson and Colne resolution (accepted by the Executive) asking that special consideration be given to widows.

Sir Alfred Roberts, for the T.U.C. General Council, announced the T.U.C.'s acceptance of the scheme subject to an examination of its details. [See also 15853 A, second column.]

Economic Policy. The conference unanimously adopted an emergency resolution by the National Executive which (1) condemned the Government's economic and financial policy, and accused the Government of having "directly contributed to inflation, loss of gold and dollar reserves, and recent speculation against the pound" through its "abandonment of domestic planning and control and its military adventures abroad"; (2) affirmed the importance of defending the present exchange rate, but "rejected a policy which, through cutting essential investment and imposing a rigid credit freeze with the highest Bank Rate for nearly 40 years, undermines the country's future standard of living, restricts production, threatens employment and endangers industrial peace"; (3) declared that there could be "no effective solution to Britain's economic problems while the present Government remains in office."

In a speech strongly attacking the Government's economic policy, Mr. Wilson described the Prime Minister as a "bookmaker turned pawnbroker" and accused him of having "sold out Commonwealth oil assets" and "put us in pawn to the United States and Germany." Mr. Wilson also attacked the Chancellor of the Exchequer (Mr. Thorneycroft) for having made "the most savage attack on industrial production any Chancellor has made since 1931."

The Rent Act. Unanimous endorsement was also given to an emergency resolution, moved for the Executive by Miss Alice Bacon, M.P., condemning the Rent Act as "a vicious piece of legislation in support of landlord vested interests," and pledging the next Labour Government to repeal it. Declaring that "the Tories have produced a charter for the landlords and the Labour Party will produce a charter for the tenants," Miss Bacon said that a Labour Government would introduce new legislation which would (*a*) ensure that there were no further evictions, and end decontrol of property on change of tenancy; (*b*) protect tenants against unreasonable rents, and provide for the transfer of tenancy within a family in the event of death; (*c*) simplify the procedure for obtaining certificates of disrepair, and restore to rent tribunals the power to fix reasonable rents for furnished dwellings.

Nuclear Weapons. A long and heated debate took place on a Norwood resolution seeking to pledge the next Labour Government to take the lead in banning the testing, use and manufacture of

nuclear weapons. The resolution was defeated by 5,836,000 votes to 781,000 after Mr. Aneurin Bevan, for the National Executive, had emphasized that such a decision could not be taken by unilateral action.

In his speech, which attracted wide attention, Mr. Bevan stressed that neither he nor any other member of the Executive were in favour of the hydrogen bomb; that he personally had made "probably more speeches to more people condemning the bomb than anybody in this conference"; and that "I am as strongly against it now as ever I was." He continued:

"I do not believe that this conference should resolve all the fundamental issues of British international relationships and foreign policy as an incidental by-product of a resolution. If you decide in Britain unilaterally that you will have nothing to do with experiments or with the manufacture or use of such weapons—with none of which sentiments I disagree—you . . . will have to say immediately that all the international commitments, arrangements, and facilities afforded to your friends and allies must be immediately destroyed . . . If you carry this resolution and follow up its implications, you will send a British Foreign Secretary naked into the conference chamber . .

"What the proposers of the resolution are saying is that a British Foreign Secretary should get up in the United Nations and announce that the British Labour movement had decided unilaterally to contract out of all its obligations to other countries, including members of the Commonwealth. Do you call that statesmanship? I call it an emotional spasm . . . If we contract out, if we produce this diplomatic shambles, it does not necessarily follow that this country is secure from the hydrogen bomb. Britain could be destroyed merely as an accident of war between Russia and the United States. What we have therefore to consider is how far the policies we are discussing can exert influence and leverage over the policies of the United States and the Soviet Union."

After saying that the supporters of the resolution had not fully thought out its implications, Mr. Bevan went on: "You don't realize that the consequence of passing the resolution will be to drive Britain into diplomatic purdah. You have not thought out the fact that we are in relations with other countries. You are not entitled to take action as a Socialist Government without giving the members of the Commonwealth the opportunity to consider the implications of the action we are taking . . . In my opinion the carrying-out of the resolution, with all the implications I have pointed out, will do more to precipitate incidents that may easily lead to a third world war . . .

"I know you are deeply convinced that the action you suggest is the most effective way of influencing international affairs. I am deeply convinced that you are wrong. It is, however, not a question of who is in favour of a hydrogen bomb or who is against it, but what is the most effective way of getting the damned thing destroyed . . . I have reached my conclusions only after a lot of agonizing thinking. I am deeply convinced that if the resolution is adopted . . . it would embarrass a Socialist Government and might have disastrous consequences throughout the world."

Colonial Policy. The Colonial Policy documents *Economic Aid* and *Smaller Territories* were introduced by Mrs. Barbara Castle, M.P., and endorsed unanimously. In reply to Mrs. Lena Jeger, M.P., Mrs. Castle said that the next Labour Government would confer self-government on Cyprus and would not "include partition in their definition of democratic self-determination."

"Public Enterprise." This policy document (on the nationalized industries) was introduced by Mr. James Griffiths, M.P., and adopted after a short debate with a few dissenting votes.

National Executive. As compared with 1956, the only changes in the National Executive Committee were (1) in the constituency party section, where Mr. Callaghan replaced Mr. Silverman, and (2) in the trade union section, where Mr. Boyd, Mr. Matthews and Mr. Hollywood succeeded three retiring members—Mr. Cooper, Mr. Stafford and Mr. Tallon. Mr. Bevan was re-elected party treasurer unopposed.

Votes cast in the constituency party section were: Mr. Greenwood 911,000; Mr. Wilson 886,000; Mrs. Castle 855,000; Mr. Driberg 753,000; Mr. Mikardo 719,000; Mr. Crossman 578,000; and Mr. Callaghan 565,000. Mr. Silverman (533,000 votes) headed the list of 12 unsuccessful candidates.

Party Chairmanship. Mr. Tom Driberg was elected chairman of the Labour Party for 1957-58, with Mrs. Barbara Castle, M.P., as vice-chairman.

Party Membership. A report was presented to the conference stating that party membership at the end of 1956 was 6,537,228 (including 5,658,249 affiliated trade unionists), compared with 6,483,994 in 1955 and 6,498,027 in 1954. Individual membership (as distinct from affiliated union membership) totalled 845,129 at the end of 1956—an increase of 1,773 over the previous year, but a decline from the figure of 933,657 in 1954 and 1,004,685 in 1953. Affiliation fees from trade unions in 1956 totalled £142,998, an increase of £2,848 over 1955.

The "Shadow Cabinet."

Results of the balloting for the Labour Party's "Shadow Cabinet" in 1956 and 1957 were as follows:

1956 Ballot. The ballot, held on Nov. 22, 1956, resulted in the election of the following members of the "Shadow Cabinet" for 1956-57: Mr. Harold Wilson (185 votes), Mr. Alfred Robens (149), Mr. Aneurin Bevan (148), Mr. G. R. Mitchison (146), Mr. James Callaghan (140), Mr. Anthony Greenwood (137), Sir Frank Soskice (137), Mr. Philip Noel-Baker (133), Dr. Edith Summerskill (112), Mr. George Brown (110), Mr. Kenneth Younger (106), and Mr. Tom Fraser (98). Of 22 unsuccessful candidates, Mr. Arthur Bottomley polled most votes (91).

The Shadow Cabinet announced on Jan. 21, 1957, that it did not propose to pursue the "constitutional implications" of the appointment of Mr. Macmillan as Prime Minister following the resignation of Sir Anthony Eden. [As stated in 15301 A, final paragraph, the Shadow Cabinet had previously announced that it would examine the "constitutional implications" of the change in the Premiership.]

1957 Ballot. The ballot for the 1957-58 "Shadow Cabinet" took place on Nov. 14, 1957, the 12 successful candidates being: Mr. Wilson (193 votes), Mr. Mitchison (191), Mr. Bevan (181), Sir Frank Soskice (174), Mr. Callaghan (171), Mr. Robens (162), Mr. Greenwood (143), Mr. Fraser (123), Mr. Brown (119), Mr. P. Noel-Baker (114), Mr. Patrick Gordon-Walker (105), and Mr. Bottomley (99). Of 19 unsuccessful candidates, most votes were polled by Mr. Younger (94). There were two changes as compared with the 1956-57 Shadow Cabinet—Mr. Gordon-Walker and Mr. Bottomley replacing Dr. Edith Summerskill and Mr. Younger.

In addition to the above-mentioned 12 members, the Shadow Cabinet includes the party leader (Mr. Gaitskell), the deputy leader (Mr. Griffiths), and the Labour Chief Whip in the House of Commons (Mr. Herbert Bowden) *ex-officio*; the Leader of the Labour peers in the House of Lords (Viscount Alexander of Hillsborough); the Chief Whip of the Labour peers (Lord Lucan); and an elected representative of the Labour peers (Lord Faringdon).

A surprise feature of the ballot was the exclusion from the "Shadow Cabinet" of Dr. Edith Summerskill, who fell from ninth place to 15th and received only 89 votes. Dr. Summerskill's defeat was attributed in the Press largely to the widespread resentment caused by remarks made by her after a visit to the Middle East in January last. The *Manchester Guardian* commented that "her trip to Egypt and . . . her indiscretions over 'Norwegian nationality' and the like have weakened . . . her position in the parliamentary party."

[Following a visit to Egypt and other Middle Eastern countries in January, during which she was received by President Nasser, Dr. Summerskill made a statement on her return to London (Jan. 23, 1957) describing the attitude of the British forces to Egyptian civilian casualties in Port Said as "callous" and "inhuman," and alleging that those casualties were much higher than the figures given in the report of Sir Edwin Herbert (the President of the Law Society, who carried out an independent inquiry for the Government—see pages 15322-23). Her allegations were refuted by Sir Edwin Herbert in a detailed reply (Jan. 24, 1957), and were described as "monstrous" by Mr. John Hare, then Secretary of State for War. Writing of her Egyptian visit in a London evening newspaper, Dr. Summerskill said that she had given her nationality as "Norwegian" because it had embarrassed her to be British, and in view of her Scandinavian ancestry.]

Opposition Front Bench Responsibilities. The following reallocation of Opposition front bench responsibilities was announced on Nov. 29, 1956, following the "Shadow Cabinet" ballot held a few days earlier: (1) Mr. Aneurin Bevan would become the Labour Party's spokesman for foreign affairs in the House of Commons in succession to Mr. Robens, who would deal with labour, fuel and power, and atomic energy matters; (2) Mr. George Brown would deal with defence and supply; (3) Mr. Callaghan would be Opposition front bench spokesman for Colonial affairs; (4) Sir Lynn Ungoed-Thomas, Q.C., would remain spokesman on legal subjects; (5) Mr. Philip Noel-Baker and Mr. Younger would assist Mr. Bevan in matters relating to foreign affairs; (6) Sir Frank Soskice, Q.C., would act as a "freelance" member of the Opposition front bench without any specific task (this decision was taken at Sir Frank's own request in view of the demands of his Bar practice).

Following the "Shadow Cabinet" election of November 1957, it was announced that Mr. Bottomley would be principal Opposition spokesman on Commonwealth affairs, while Mr. Steele would succeed Mr. Bottomley as spokesman on Admiralty matters.

Relations between Labour and Co-operative Parties.

It was announced on Feb. 28, 1957, that the Labour Party had formally notified the Co-operative Union of the termination of the agreement of 1946 which had governed the political relationship between the two organizations during the past ten years. This agreement, dated Sept. 24, 1946, laid down that Co-operative M.P.s in the House of Commons (of whom there are at present 20) would accept the Labour Whip and the Standing Orders of the Parliamentary Labour Party, while remaining responsible to the Co-operative Union and not to the Labour Party.

Although no statement was issued about the reasons for the Labour Party's decision, it was understood that trade union leaders had pointed out that, with the single exception of the Royal Arsenal Co-operative Society, the Co-operative Union contributed nothing to the central funds of the Labour Party, whereas the unions contributed generously—a situation which, it was suggested, put the Co-operative movement in a much stronger position to finance candidates in the constituencies than the trade unions. It was also understood that trade union leaders had complained of instances during the past two or three years in which trade union candidates had been rejected by constituency parties—e.g. for by-elections—in favour of Co-operative candidates.

Mr. Morgan Phillips (secretary of the Labour Party) issued a statement on Feb. 28 describing the Labour Party's request for a review of the 1946 agreement as "normal practice," since it was desired to carry out a general review of party organization before the next general election. On the other hand, Mr. J. Bailey (secretary of the Co-operative Union) said that it was "not just a matter of bringing the present agreement to an end," and that a revised agreement was "contemplated." He added that the Co-operative Union had "no knowledge of the particular respects in which the Labour Party wish to revise the agreement."

In a statement on June 11 to the Co-operative Congress in Brighton, Mr. A. E. Jupp (of the Co-operative Union's national policy committee) said that discussions were in progress with the Labour Party on all aspects of the relationship between the two movements, including the position of Co-operative M.P.s and the selection of parliamentary candidates. Specific proposals for a new agreement had not yet been put forward by the Labour Party, but he had Mr. Gaitskell's assurance that "those who wish to see a split between the Labour Party and the Co-operative movement are in for a disappointment." Mr. Jupp stressed that there was "no basic difference of policy" between the two organizations.—(Times - Daily Herald - Manchester Guardian) **(Prev. rep. Labour Party, 15874 A; 14749 C; 14680 A; 14515 A.)**

A. UNITED STATES. — President Eisenhower's Recovery from Cerebral Attack.

A medical bulletin was issued from the White House on Nov. 26 announcing that President Eisenhower was suffering from "an occlusion of a small branch of the middle cerebral artery on the left side."

The bulletin said that the condition was "mild" and was "expected to be transitory"; that it would require "a period of rest and substantially decreased activity estimated at several weeks," though it would not be necessary for the President to enter hospital; and that "the outlook for complete recovery within a reasonable period of time is excellent." There were no abnormal signs or symptoms other than mild aphasia (difficulty in speaking), which was improving perceptibly. It could not be immediately determined "whether the condition present is one of a small clot or a vascular spasm," but all findings indicated that there was no brain haemorrhage.

It had been announced on the previous evening (Nov. 25) that the President had caught a chill after going to Washington airport to meet the King of Morocco and had been ordered to bed by his doctors. The bulletin stated that it was possible that the President's chill was "a contributing factor" in the attack of cerebral occlusion.

[The middle cerebral artery is a large vessel which when occluded (blocked) by a clot of blood results in a "stroke." The speech centre is affected, giving rise to aphasia when the occlusion is on the left side.]

A second bulletin on Nov. 27 said that the President was making "excellent progress" and was well enough to sign official documents and to indulge in his hobby of painting; he had also received the King of Morocco and Vice-President Nixon during the day. The President's Press Secretary (Mr. James Hagerty) stressed that the President was not considering the delegation of any of his powers.

Mr. Hagerty pointed out that the word "stroke" had not been used in the medical bulletins, adding in this connexion: "The word 'stroke', the doctors tell me, is not a medical word and is associated more in the public mind with a term meaning paralysis, or haemorrhage of the brain. Neither of these cases has happened. There was no paralysis, neither was there haemorrhage of the brain, so they [the doctors] were very carefully trying to avoid a connotation through the use of a popular or layman's word which would give a completely wrong report on the President's condition."

On Nov. 28 President Eisenhower was well enough to attend a Thanksgiving Day service at the National Presbyterian Church, accompanied by Mrs. Eisenhower. A further medical bulletin reported that the President was "in fine spirits" and that his progress "continues to be excellent."

Mr. Hagerty said that the impairment in the President's speech had almost completely disappeared, and that he had the President's authority to say that he (Mr. Eisenhower) was looking forward to attending the NATO Heads of Governments meeting in Paris. His doctors, however, would decide whether he could make the trip, and if the President could not go to Paris the U.S. delegation would be headed by Vice-President Nixon. In a statement on the same day, Mr. Nixon said that he would like to "scotch any rumours that the President is in a condition which would make it necessary for him to consider resigning."

President Eisenhower (who is 67) suffered a heart attack in 1955 and underwent an intestinal operation in 1956.

B. MALAYA. — Ban on British Titles.

It was announced in Kuala Lumpur on Nov. 16 that Malayan citizens would no longer be eligible for British titles.
(Observer)

C. INDIA. — Establishment of Naga Administrative Unit. - Central Government's Legislation.

A Bill uniting the Naga areas of India into a single administrative unit under the Central Government, to be known as the Naga Hills-Tuengsang Area, was introduced in the *Lok Sabha* on Nov. 20 by the Home Minister, Mr. G. B. Pant, and passed unanimously on Nov. 25.

The Naga Hills District and the Tuengsang Frontier Division had previously been administered by the Assam Government and the North-East Frontier Agency respectively; the new unit will be administered by the Governor of Assam as agent of the President, who will be advised by the External Affairs Ministry. The Bill also provided that the Area would be represented in the *Lok Sabha* by an additional nominated member.

Introducing the Bill, Mr. Pant said that the Naga Hills District had a population of about 200,000 and the Tuengsang Division about 150,000, they comprised some 17 tribes of different racial strains and speaking different languages, who whenever they assembled had recourse to either Assamese or English as the medium of common communication. For a territory of 350,000 people, with an annual revenue of less than £40,000, to aspire to full independence was not feasible in the modern world. Although the Central Government had taken all steps to fulfil the assurances given by Mr. Nehru to the Naga delegation in September, Mr. Pant admitted that there had been "no very marked response." He expressed the hope that the Government's decision would encourage the forces of peace and help others also to realize where Naga interests lay.

The Bill was subsequently passed by the *Rajya Sabha*, and came into operation on Dec. 1 after receiving the assent of President Rajendra Prasad.

The Assam Government had previously announced on Oct. 26 that an amnesty had been offered to all Nagas who had committed offences against the State; that 161 prisoners awaiting trial had been released; and that the release of 75 convicted prisoners had been ordered. Nagas who had committed murder or other heinous crimes against other Nagas would also be pardoned, if they secured pardon from the aggrieved persons or surviving members of their families in accordance with tribal custom.

In spite of the concessions made by the Indian Government to the Nagas' demands, a section of the Naga rebels continued their activities during October and November, raiding loyal villages, sniping at military convoys and patrols, and blowing up bridges. During November they made a series of raids on villages in Manipur which, although containing a Naga minority, had not previously been affected by the rebellion. (Indian High Commissioner's Office, London - The Statesman, Calcutta - The Hindu, Madras) **(Prev. rep. 15784 C.)**

D. HONG KONG. — Closing of Naval Dockyard.

The British Government's decision to close down the naval dockyard at Hong Kong was announced in the House of Lords on Nov. 27 by Lord Mancroft, Minister without portfolio, and in the Commons by Mr. Galbraith, Civil Lord of the Admiralty. It was explained that the dockyard would be closed down over a two-year period; that 4,700 workers would become redundant; and that the closing of the dockyard would result in an estimated saving of £1,500,000 a year.

Lord Mancroft said that the decision had been taken "with real regret in view of the long association of the dockyard with Hong Kong and the loss of jobs for many employees which must inevitably result." It had been necessitated, however, by "current reorganization of naval forces and their shore support throughout the world in the light of the Government policy outlined in the Defence White Paper" [see 15493 A]. Although future requirements of naval vessels in the Far East would no longer justify the maintenance of a full-scale dockyard at Hong Kong, its closure would not mean the disappearance of British warships from Far Eastern waters. A small naval base from which ships could be serviced and operated would be retained at Hong Kong, and other vessels of the Far Eastern Fleet would visit Hong Kong from time to time. The Royal Navy would thus continue to be "very much in evidence at Hong Kong, although on a reduced scale." Six minesweepers would still be based on Hong Kong, together with a frigate or destroyer, whilst the Far Eastern Fleet would continue to use the Singapore naval base, the long-term future of which was still under examination.

Lord Mancroft explained that the decision had been taken in conjunction with Australia, New Zealand, Malaya, and the United States, "who share our regret but appreciate our difficulties and the necessity for this decision." The two-year rundown of the dockyard (expected to be completed by Nov. 30, 1959) had been fixed to give the employees the best possible chance of finding other work; it was expected that many would find employment in the building industry in view of the present building "boom" in Hong Kong.

Hong Kong was first used as a British base in the "opium war" of 1839-42, and was ceded to Britain in 1841. The present dockyard was built in 1908-11 and had thus been in use for nearly 50 years.—(Times - Daily Telegraph)

DECEMBER 7—14, 1957

A. SPAIN - MOROCCO. — Repulse of Moroccan Attacks on Ifni. - Moroccan Territorial Claims to Spanish Saharan Territory and Ifni Enclave. - Creation of Moroccan Sahara Office.

Large-scale fighting between Spanish troops and Moroccan irregulars broke out on Nov. 23 when some 1,200 well-armed Moroccan nationalists attacked the small Spanish enclave of Ifni, in southern Morocco. According to Spanish and French reports, the attacks were launched by units of the former Moroccan "Liberation Army" which had not yet been incorporated in the Royal Moroccan Army; no Moroccan regular forces were engaged, and the Moroccan Government disclaimed any responsibility for the events in Ifni. Throughout the period of the fighting—the last week of November and the first week of December—the only statements issued on the Moroccan side came from the Rabat newspaper *Al Alam*, organ of the ruling Istiqlal Party. On the Spanish side, developments in Ifni were described in a series of communiqués issued from time to time in Madrid.

Strong forces of Moroccan irregulars—described by *Al Alam* as *moujahidines* ("liberation fighters")—crossed the Ifni frontier at several points on Nov. 23 and attacked a number of Spanish outposts manned by small garrisons. *Al Alam* alleged that the Spanish authorities at Ifni had "provoked" the local inhabitants, that Spanish troops had attacked Moroccan frontier posts, and that French aircraft were supporting the Spanish forces—all these allegations being strongly denied in Madrid and Paris. During the next few days *Al Alam* claimed that the *moujahidines* had inflicted heavy casualties on Spanish troops and had captured Sidi-Ifni, the capital of the enclave—a claim which was retracted, however, on Nov. 27 and which was subsequently shown to be completely untrue.

The first Spanish communiqué, issued in Madrid on Nov. 27 by the Ministry of War, said that for several months past armed bands of the so-called "Liberation Army" had crossed into Ifni and the Spanish Saharan territories with the aim of fomenting unrest and disorder among the inhabitants. The Moroccan Government had been asked to impose its authority in the territories adjacent to Spanish possessions by withdrawing the armed bands and replacing them by units of the Royal Moroccan Army. As no response had been made to this request, and because of the acts of terrorism and violence perpetrated by the armed bands against loyal inhabitants, it had been decided to reinforce the garrisons in Ifni and the Spanish Sahara. On Nov. 23 armed bands had crossed the Ifni frontier in force and launched co-ordinated attacks on Spanish outposts after cutting the telephone-lines linking them to Sidi-Ifni. At the same time an attempted raid had been made on an arms dump at Sidi-Ifni. The Spanish garrison had reacted "promptly and energetically" and had inflicted heavy losses on the invaders—about 100 killed and wounded, against Spanish casualties of five killed and 34 wounded.

During the following week the Spanish garrison in Ifni—normally 2,000-3,000 men—was reinforced by some 10,000 troops from Spain and the Canary Islands, including parachute troops. Three Spanish cruisers—the *Canarias* (10,000 tons), *Miguel de Cervantes* (7,500 tons) and *Mendez Nuñez* (4,500 tons)—were also sent to Ifni, while Spanish bombers based in the Canaries carried out a number of heavy bombing attacks on the invading forces. A second Spanish communiqué of Nov. 29 said that the situation was "developing favourably"; that the security of Sidi-Ifni was "totally assured"; and that military, naval and air reinforcements were assisting the local garrison to "mop up" armed bands in various parts of the enclave. Claiming that "considerable losses" had been inflicted on the invaders, the communiqué said that several hundred Moroccan wounded were known to have arrived at hospitals at Agadir, Goulimine and Bou-Izakarn, in Moroccan territory. It was added that none of the prisoners in Spanish hands were natives of Ifni or the Spanish Sahara.

In different parts of the enclave small Spanish garrisons fought with great bravery for many days though heavily outnumbered by Moroccan irregular forces. Some of the bitterest fighting occurred at the frontier post of Tilouine (on the southern border of the enclave), whose garrison of 120 was incessantly attacked by Moroccan forces in greatly superior strength. Although the garrison was temporarily relieved by Spanish paratroops which fought their way inland over rough country, the post was eventually abandoned in order to reinforce the defensive perimeter covering Sidi-Ifni. A correspondent of the *Agence France-Presse* who visited the area reported on Dec. 5 that the post had been largely destroyed after a 14-day siege. Elsewhere in the enclave Spanish reinforcements relieved other isolated garrisons who had been holding out for long periods—notably at Tiourza (15 miles inland from Sidi-Ifni), which had been encircled by numerically superior Moroccan forces.

A Madrid communiqué of Dec. 8 announced that the Spanish forces had defeated "every co-ordinated enemy action" and were meeting no organized resistance, apart from hit-and-run attacks from isolated bands operating from rugged mountain terrain. It was admitted that a few frontier outposts—e.g. Tilouine—had been abandoned for defensive reasons and subsequently occupied by rebel forces, who had thus had an opportunity of announcing for propaganda purposes that they had captured the posts whereas in fact they had been voluntarily evacuated hours beforehand with all their equipment and material. The communiqué added that reinforcements would remain in the enclave to "clear bandits out of all the villages and mountains of Ifni until peace and order has been restored." Total Spanish casualties in the Ifni operations were given as 61 officers and men killed and 128 wounded. Moroccan casualties were estimated at several hundreds in killed and wounded.

A Spanish naval squadron of two cruisers, four escort vessels and a submarine anchored on Dec. 7 off Agadir, in Moroccan waters, leading to a strong protest to Madrid. The warships sailed for Ifni on the following day.

The Ifni enclave covers an area of 741 square miles and has about 35,000 inhabitants, the great majority of Moorish origin. It was ceded to Spain by Morocco in 1860, but the Spanish flag was not hoisted until 1934. The port of Sidi-Ifni is used by Spanish fishing vessels, but the territory has little economic significance nor any known economic resources.

Apart from Ifni, the Spanish Saharan territories comprise three distinct but contiguous areas as shown on the accompanying map: (1) Spanish Southern Morocco, formerly administered as part of the Spanish protectorate in Morocco [i.e. the former Spanish zone, ceded to Morocco in 1956—see 15110 A; 14947 A]; (2) Saguia el-Hamra; and (3) Rio de Oro, the southernmost and largest territory of the Spanish Sahara. Elsewhere in West Africa, Spain possesses the small colony of Rio Muni, in the Congo, and the island of Fernando Poo, in the Gulf of Guinea.

The Ifni enclave and Spanish Saharan territories. (*Economist*)

Moroccan and Spanish Statements.

Crown Prince Moulay Hassan, C.-in-C. of the Royal Moroccan Army, said in a broadcast on Nov. 28 that he had been "surprised" by the outbreak of fighting in Ifni; he alleged that Spanish aircraft had attacked the Agadir area and killed two women, and stated that instructions had been given to open fire on any foreign planes violating Moroccan air space.

In an interview on Dec. 3 to a French press correspondent, the Crown Prince denied that the fighting had been started by the Moroccan "Liberation Army" and claimed that the attacks had been launched by Moroccan nationalists living in Ifni—the Ba Amrane tribe—who had been "provoked" by the delay in settling Morocco's claim to the enclave. He added: "If General Franco—in whose word I have complete confidence—announces his intention to transfer [Spanish] Southern Morocco immediately to the Sherifian authorities, I undertake to appeal to the Ba Amrane to put their confidence in his Majesty and the [Moroccan] Government to settle their case through diplomatic channels." On behalf of his father (King Mohammed V, who was then visiting the United States), the Crown Prince expressed the sovereign's "bitter regret" at the Ifni fighting and his confidence that a peaceful solution would be reached if Spain adhered to her undertakings.

King Mohammed V issued a statement in New York on Dec. 10 which, although making no direct reference to Ifni, accused Spain of resorting to "menaces and violent methods in order to preserve her domination over part of the Moroccan national territory." After saying that this could lead to "a deterioration of relations between Rabat and Madrid," the King added that Spain "appears to have abandoned peaceful methods and the search for solutions through friendly negotiation." He reiterated his Government's intention to do all in its power to ensure "the restoration of Morocco's natural and historic frontiers."

The Spanish Government issued a statement on Dec. 6 saying that the restoration of effective control by the Royal Moroccan Army in the areas of Morocco adjacent to Spanish territories was a "prior condition" for any "present or future" discussions with the Moroccan Government on the Ifni question. As regards Southern Morocco, it was stated that Spain, in conformity with the declaration of April 7, 1956 (see 14857 B), had "not disputed" the integration of this area with Morocco; nevertheless, the Spanish Government would

be "lacking in its sense of international responsibility if it abandoned this zone to elements which do not give obedience to H.M. the King of Morocco." The statement went on to refer to the "Spanish territories in the Sahara in which the presence of Spain is reinforced by numerous international conventions which a friendly and neighbourly Morocco must undertake to respect"—a phrase indicating that Spain intended to retain her sovereignty over Saguia el-Hamra and Rio de Oro.

Prior to the outbreak of fighting in Ifni, the Moroccan Government had announced on Oct. 16 that Spain was prepared to transfer to Moroccan sovereignty the "southern territories" hitherto under her protection. No precise definition was given of the phrase "southern territories," but it was understood to refer to Spanish Southern Morocco (i.e. the area formerly administered as part of the Spanish protectorate) and not to Ifni. The Spanish Government issued no statement on the matter.

Creation of Moroccan Sahara Office.

King Mohammed V issued a royal decree on Nov. 12 establishing an Office for Saharan and Frontier Affairs in the Moroccan Ministry of the Interior. It will be responsible for negotiations with France and Spain on Morocco's eastern and southern boundaries (which have never been delimited by international agreement), and will also have responsibility for oil and mineral exploitation in the Moroccan Saharan territories. M. Abdelkebir el-Fassi, the founder of the "Liberation Army," was appointed head of the new office.

M. el-Fassi and his cousin, M. Allel el-Fassi (the Istiqlal leader), put forward in 1956 the concept of a "Greater Morocco" extending as far south as Senegal, and including all the Spanish Saharan territories as well as the French colony of Mauretania [see page 15110, second column.] Attempted justification for these claims was sought in the fact that the Moroccan political influence in the 17th century extended southwards as far as Timbuctoo and other areas now forming part of French West Africa.—(A.B.C., Madrid - Le Monde - Le Figaro - Times) **(Prev. rep. Spanish-Moroccan Relations, 15668 A; 15110 A; 14946 A; 14857 B.)**

A. UNITED STATES. — Democratic Victories in Mayoral, Gubernatorial, and State Legislature Elections.

Gubernatorial and mayoral elections held on Nov. 5 in New York, New Jersey, Connecticut and Virginia resulted in sweeping victories for the Democratic candidates.

In New York City, Mr. Robert F. Wagner was re-elected to the mayoralty by the largest majority in the city's history, receiving 1,507,342 votes against 587,440 for Mr. Robert K. Christenberry, his Republican opponent. Mayor Wagner, running on a joint Democratic and Liberal ticket, carried all five boroughs by large margins. In the northern part of New York State, a traditionally Republican area, the Democrats made a net gain of six seats in mayoral elections. In Connecticut the Democrats gained control of Bridgeport City Council for the first time in nearly a quarter of a century, and ended the 24-year tenure of the former Socialist mayor, Mr. Jasper McLevy; the Democrats captured ten seats on the council, the Socialists five, and the Republicans one.

In New Jersey, Mr. Robert B. Meyner was re-elected State Governor with a majority of nearly 200,000 over his Republican opponent, Mr. Malcolm S. Forbes—the second highest majority ever given to a Democratic governor in the State. In addition, the Democrats gained control of the New Jersey Legislature for the first time in 20 years. Governor Meyner's re-election was regarded as a particularly heavy blow to the Republicans since President Eisenhower had made two personal appeals for the election of Mr. Forbes, who was also vigorously supported by Vice-President Nixon and other Administration leaders.

On the other hand, the U.S. Press said that the Democrats could gain "little comfort" from the election of Mr. J. Lindsay Almond as Democratic Governor of Virginia. Mr. Almond, who obtained a majority of 115,000 votes over his Republican opponent, campaigned on a platform of "massive resistance" to the Administration's de-segregationist policy in schools; he was strongly supported by Senator Harry F. Byrd (leader of the State Democratic organization), who called on the voters to give Mr. Almond a "thumping majority" as a protest against President Eisenhower's action in using Federal troops to enforce school segregation at Little Rock (see 15803 A).

A statement from the White House (Nov. 5) said that it was "clear that the Republican Party has a fight on its hands if victory is to be achieved in the 1958 elections."
(New York Times - New York Herald Tribune)
(Prev. rep. 15237 A; 14608 B; 13255 A.)

B. FRANCE. — Compulsory Third Party Insurance for Motorists. - Parliamentary Legislation.

The French National Assembly unanimously passed a Bill on Dec. 6 making it compulsory for all owners of motor-vehicles and motor-cycles to take out a third party insurance policy. Motorists will have free choice of insurance company.
(Le Monde, Paris)

C. INDIA - SOUTH VIETNAM. — President Diem's Visit to India. - Nehru-Diem Communiqué.

President Ngo Dinh Diem of South Vietnam (the Republic of Vietnam) visited India from Nov. 4-9 as the guest of the Indian Government. During his stay in Delhi, President Diem had several discussions with Mr. Nehru and attended a civic reception and a State banquet given by President Prasad. He visited the Community Development area at Baraut, the Agricultural Research Institute and the National Physical Laboratory, the Bhakra-Nangal hydro-electric project, and the city of Agra. A delegation of Vietnamese experts accompanying President Diem inspected a number of industrial and agricultural projects and had discussions with members of the Indian Planning Commission.

A joint statement issued by President Diem and Mr. Nehru on Nov. 9 said that they had had "a friendly and informal exchange of views on matters of mutual interest to their countries." It continued:

"The President of the Republic of Vietnam and the Prime Minister of India are agreed that, in view of the terrible advances in the development of weapons of mass destruction, the most urgent problem before the people of the world is the maintenance of peace... To both countries, as well as to other countries in South-East Asia, the maintenance of peace is a primary need to enable them to devote their energies wholeheartedly to the social and economic advancement of their peoples...

"The President and the Prime Minister noted the important contribution made by India in the International Commission in maintaining peace in Vietnam. They hope that the problems of Vietnam will be solved peacefully and in the best interests of the people of Vietnam.

"The President and the Prime Minister have decided to continue and increase co-operation between their two countries in pursuit of their common goal of economic and social advancement of their peoples. They are resolved to continue to work in their respective spheres for the maintenance of peace in the world and understanding between nations."

Before leaving Delhi on Nov. 9 President Diem issued a statement in which he emphasized that South Vietnam "accepted neither foreign military bases nor foreign troops on her territory" and was "not considering adherence to any alliance at present." South Vietnam, however, needed internal security to recover from the ravages of war and resist Communist attempts at subversion; therefore, while not a member of SEATO, she welcomed the protection afforded to her by that organization, which was "purely defensive" in character. In reply to questions, President Diem said that before joint elections could be held in Vietnam with a view to reunification, North Vietnam must abandon the "terroristic methods" which it was still practising. The International Supervisory Commission still had a useful role to play, particularly in enforcing the prohibition on the import of arms into either part of the country.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London - Vietnam Press Office, Saigon) **(Prev. rep. 13890 A.)**

D. CHILE - VENEZUELA.—Severance of Diplomatic Relations. - Chilean Attaché arrested in Caracas.

The Chilean Government severed diplomatic relations with Venezuela on Nov. 28 on the ground that the Venezuelan Government had failed to give a satisfactory explanation of the detention and subsequent expulsion of an attaché of the Chilean Embassy in Caracas. The attaché in question, Señor Jorge Basulto, had been kept in custody for four days—leading to a strong Chilean protest at the violation of his diplomatic immunity—and then expelled from Venezuela as *persona non grata*. A senior Chilean official said that Señor Basulto had apparently been arrested and expelled because he had told the Canadian Ambassador in Caracas that there was "going to be a revolution in Venezuela"; the official added that the Ambassador had communicated Señor Basulto's confidential remarks to his Government in Ottawa and that the cable had been decoded by the Venezuelan security police.
(New York Times) **(Prev. rep. 15671 B.)**

E. GHANA. — Appointment of Economic Adviser.

It was announced in Accra on Sept. 22 that, with the co-operation of the U.N. Technical Assistance Administration, Professor William Arthur Lewis had been appointed Economic Adviser to the Government of Ghana for a period of two years. Professor Lewis, a West Indian, had held the Chair of Political Economy at Manchester University since 1948. He had visited Ghana (then the Gold Coast) in 1953 and published a report on the possibilities of industrialization in the territory.
(Manchester Guardian - U.N. Information Centre, London)

A. ARGENTINA. — Financial and Trade Policy. - Signing of Multilateral Trade and Payments Agreements with "Paris Club" Countries. - Debt Settlement Agreements with European Creditor Countries and Japan. - Settlement of Compensation for Primitiva Gas Company. - Proposed Compensation for Nationalized French Companies. - Decrees on Confiscated German Assets.

A series of agreements was signed in Buenos Aires on Nov. 25 establishing definitely the multilateral trade and payments system known as the "Paris Club," which had been provisionally in force since July 1956. The agreements were concluded between Argentina on the one hand and 10 European countries on the other—Austria, Belgium, Denmark, France, Western Germany, Italy, the Netherlands, Norway, Sweden, and Switzerland. Great Britain will also participate in the system, but no specific agreement was signed with her as the system required no change in existing U.K. policy.

The agreements were based on the Paris Treaty drawn up by the participating countries during their meeting in the French capital in May 1956. The treaty stressed the desirability of promoting maximum freedom of trade within the multilateral system; specifically allowed for payments between Argentina and the other countries concerned to be made in the currency of any member-country; and stated that Argentina would make no discrimination between member-countries in conducting her trade policy.

The U.K. representatives explained to the Argentine Government that Britain would continue to accord imports from Argentina treatment not less favourable than that accorded to imports from any other foreign country. Argentina, for her part, undertook that her import and export policy towards the U.K. would be non-discriminatory. On the payments side, Argentina is already a member of the Transferable Account area.

Agreements for the consolidation of Argentine commercial debts totalling over U.S. $441,000,000, plus nearly $59,000,000 accumulated interest, were signed at the same time between Argentina and five European creditor countries—Great Britain, France, Western Germany, Italy, and the Netherlands. Japan, although not a signatory, had previously agreed to accept terms similar to those offered to Argentina's European creditors. The principal provisions were as follows:

Breakdown of Debts.

The total amount due under the terms of the debt settlements was fixed at U.S. $500,600,000, of which $58,900,000 represented interest charges. Details are as follows, in million U.S. dollars:

	Principal	Interest	Total
Western Germany	148.0	10.6	158.6
Italy	113.6	19.9	133.6
Japan	64.0	12.2	76.2
United Kingdom	64.4	10.8	75.2
France	30.7	3.3	34.0
Netherlands	20.9	2.1	23.0
Total	441.6	58.9	500.6

Terms of Repayment.

It was laid down that repayment would be made over a period of 10 years except in the case of the Netherlands, for which a shorter period was fixed because of the relatively minor account involved. Accordingly, Argentina would pay the equivalent of $50,000,000 in each of the two years 1956-57 and 1957-58; $55,000,000 in each of the two years 1958-59 and 1959-60; $60,000,000 in each of the four years 1960-61 to 1963-64; $49,400,000 in 1964-65; and $1,200,000 in 1965-66. Outstanding amounts would bear interest at rates averaging 3½ per cent per annum over the ten-year period.

Allocation of Payments.

The annual payments would be divided among the creditor countries in the same proportion which the total debt due to each of them bore to the grand total of Argentine debts due to all the six creditors. Each country would have the right to decide how to apply its share as between governmental and private debts, the distribution of which (excluding interest) was shown as follows:

	Government	Private	Total
	£ million (approx.)		
United Kingdom	19	4	23*
	Equivalent in million U.S.$ (approx.)		
France	3	28	31
Western Germany	23	125	148
Italy	90	24	114
Japan	55	9	64
Netherlands	21	—	21

*Equivalent to $64,400,000 as shown in the previous table.

In the case of the U.K. it was decided that the liabilities to private traders should have priority, the residue being used for interest and capital redemption on the Government debt. There would be no capital redemption on the Government debt in the year 1957-58, because the amount actually received by the U.K. in the first debt year (1956-67) exceeded its quota, and it would accordingly receive less in the second debt year (1957-58).

Debts to British Exporters.

The U.K. agreement made no provision for the payment of debts to British exporters because Argentina agreed that all these liabilities would be met on maturity. Of the total amount of about £4,000,000 which was due in July 1956, £1,560,000 had already been paid in 1956-57; £1,260,000 would be paid in 1957-58; £830,000 in 1958-59; £210,000 in 1959-60; £100,000 in 1960-61; and £40,000 in 1961-62.

Argentine Guarantee to Britain.

The agreement with Great Britain also laid down that if Argentina at any time arranged with France, Western Germany, Italy, or Japan for a settlement of debts or deferred payment liabilities on terms more favourable than those laid down in the agreement with the U.K., similarly favourable conditions would apply to the United Kingdom.

The negotiations and the signing of the agreements had been held up by the unwillingness of Britain, France and Western Germany to agree to the debt settlements unless there was a definite assurance that certain claims on their part against Argentina would be satisfactorily met.

France. French claims centred on the position of the shareholders of a number of Argentine companies whose shares were formerly held in France, but which had been nationalized under the Perónista regime—notably the Quilmès, Schlau, and Palermo breweries and 14 other companies. After protracted discussions with the French Government, Argentina eventually agreed to take steps for the payment of compensation. Following the signing of the debt agreement with France, the Argentine Government issued a decree on Nov. 29 appointing a commission of senior civil servants to investigate the position of the French shareholders affected, examine their claims, and recommend the steps which should be taken to indemnify them.

Western Germany. In implementation of the agreement on former German assets reached on June 18 (see 15690 A), the Argentine Government issued decrees on Nov. 25 (*a*) ordering the return to their former owners, unconditionally and without charge, of all German trade-marks and patents seized as enemy property during the Second World War; and (*b*) ordering the liquidation of all German concerns expropriated during the war and hitherto operated on behalf of the Argentine Government, and laying down that the firms concerned should be auctioned and a considerable part of the proceeds paid to the former owners.

Western Germany's final adherence to the "Paris Club" treaties had also been made dependent on the conclusion of the proceedings taken against three German-Argentine tractor-making firms—Hanomag, Deutz, and Fahr—which had been sequestrated after the fall of the Perón régime. This condition was met at the beginning of September, when the "Restitution Junta" delivered its judgment against the three firms—the Deutz and Fahr companies being sentenced to confiscation of their works, and the Hanomag company to a fine of 128,000 pesos. The judgment, which was accepted by the firms concerned, said that the Deutz and Fahr companies had co-operated with Señor Jorge Antonio (a close personal friend of ex-President Perón, to whom he was financial adviser) and that their capital had not represented a genuine foreign investment but had been provided from Señor Antonio's funds.

United Kingdom. A decree was issued by the Argentine Government on Nov 25 authorizing the settlement of a claim for compensation by the Primitiva Gas Company of Buenos Aires, which had been outstanding since the expropriation of that undertaking in 1945. At that time the company had received as compensation only a provisional sum representing a fraction of the value of the assets taken over, and for a number of years the British Government had pressed Argentina for a final settlement.

The decree of Nov. 25 provided that the Argentine Government would pay the Primitiva Company £2,060,950 sterling in London in 10 instalments spread over 4½ years, without interest. This figure was arrived at on the basis that the claim of the City of Buenos Aires against the company would be settled out of the company's monies already under embargo, whilst each side would pay its own costs in the expropriation suit. It was stated by the company that numerous outstanding questions, some of them involving considerable sums, remained to be settled before a final estimate of the probable return to stockholders could be made.

The Primitiva Gas Company of Buenos Aires was the main interest of Primitiva Holdings (a British company); its investments in Argentina were stated to have been well over £4,000,000.

In addition, the following agreements were concluded concurrently with the multilateral trade and payments arrangements and the debt consolidation agreements: (*a*) an agreement with Switzerland ensuring that a dispute over the proposed nationalization of the CADE electricity company in Buenos Aires would be left in the hands of the Argentine law courts, and that, pending the decision of the courts, the Argentine Government would not interfere in the company's management; (*b*) a protocol with Italy guaranteeing that Italian immigrants entering Argentina would be allowed to make certain monthly remittances to their families or parents at the official peso rate.—(Financial Times - Bank of London and South America, Fortnightly Review - Frankfurter Allgemeine Zeitung - Le Monde, Paris - Neue Zürcher Zeitung)

A. BRITISH HONDURAS. — Suspension of Negotiations between United Kingdom and British Honduran Delegation. - Mr. George Price's Conversations with Guatemalan Minister in London. - Recall of Guatemalan Minister. - Mr. Price expelled from British Honduran Executive Council.

The British Colonial Secretary, Mr. Lennox-Boyd, announced in the House of Commons on Nov. 27 that talks with a British Honduran delegation on the Colony's financial needs and future constitutional advance had been broken off since it had been discovered that a member of the delegation, Mr. George Price, had been engaging in private discussions with the Guatemalan Minister in London. [Mr. Price is leader of the People's United Party, which won all the elected seats in the Legislative Assembly in the general elections of March 1957.]

Mr. Lennox-Boyd stated that early in their visit to London the four unofficial members of the British Honduran delegation had been invited to lunch by the Guatemalan Minister, Señor Jorge Garcia Granados. He went on :

" A plan was put forward which involved severing the connexion of British Honduras with the British Crown and associating it in some form with the Guatemalan Republic. When, 10 days later, I asked the delegation about this lunch, it emerged that Mr. Price was still considering this most improper offer and had not, so he told me, even then made up his mind. In the course of my meetings with the delegation it also came out that, in addition to this incident, Mr. Price had been engaged in discussions on his own with the Guatemalan Minister in London. These private discussions he attempted to conceal not only from the Governor and myself, but also from at least two of his three unofficial colleagues.

" With such lack of good faith on Mr. Price's part, I have felt it impossible to continue negotiations with him. I have told him so this morning. Though I would gladly have continued discussions with the rest of the delegation, I felt, and the Governor agreed, that the right thing was for the whole delegation to return to British Honduras and deal with the consequences of this breakdown in the negotiations. I look forward to a resumption of the talks with a reconstituted delegation as soon as possible in an atmosphere of mutual trust in which the attitude of H.M. Government will be unaffected by this unhappy episode."

Mr. Creech Jones (Labour) said that the Opposition deplored Mr. Price's conduct, and described the latter's conversations with the Guatemalan Minister as an " intrigue." He pointed out that over a number of years the British Government had pressed Guatemala to take her claim to British Honduras to the International Court of Justice, but the Guatemalan Government had consistently refused to do so.

Mr. Price issued a statement later the same day denying that he had ever been engaged in private discussions with Señor Granados.

After claiming that his contacts with the Guatemalan Minister had been known to the other members of the delegation, except possibly Mr. Henry Bowman, the nominated member, Mr. Price said that he had made his initial contact with Señor Granados on the basis of a suggestion put forward by Mr. Jeffrey (a member of the delegation and of the P.U.P.) to the Colony's Executive Council in October. Mr. Jeffrey had suggested that if an opportunity arose, Mr. Price should open talks with Señor Granados and report back to his colleagues. After the initial contact had been made, the four unofficial delegates had been invited to a lunch at which they had been informed of a proposal for self-government for British Honduras within a Central American Federation. It was also proposed that Guatemala, as the leading member of this federation, should provide finance to British Honduras during the early stages of development.

When he met Señor Granados on two subsequent occasions (Mr. Price continued), he had informed him that the above proposal should be submitted through the proper channels. He denied that the question of making British Honduras a province of Guatemala had arisen during the conversations.

Statements were also issued on Nov. 27 by Mr. Jeffrey and by the Guatemalan Minister.

Mr. Jeffrey, in his statement, gave a somewhat different account of the lunch with the Guatemalan Minister. He said that the Minister's proposal had definitely been that British Honduras should become part of Guatemala and that, for example, British Hondurans should hold Guatemalan passports.

Señor Granados claimed that the British and Guatemalan Governments had agreed some months previously that " conversations should take place to seek a solution to the problem of Belize [i.e. British Honduras]." He had subsequently been informed, however, that since any decisions would require the concurrence of British Honduran representatives, the proposed conversations could not take place until the British Honduran delegation had arrived in London. Somewhat later, the Guatemalan Foreign Minister had given the British Minister to Guatemala a broad outline of the Guatemalan plan for British Honduras. When the British Honduran delegation subsequently arrived in London at the end of October, Señor Granados had considered it desirable to brief them on the Guatemalan proposals, since he had feared that discussions on these proposals might not be begun until the very end of the delegation's visit and that, as a result, the delegation would be wholly unprepared for them.

In two subsequent meetings with Foreign Office representatives (Nov. 11 and Nov. 19) he (Señor Granados) had obtained the impression that the British Government found no fault with the reasons which had led him to contact the British Honduran delegation. Señor Granados also disclosed that he had been informed on Nov. 26 that his appointment to present his credentials to the Queen on Nov. 28 had been postponed.

A British Foreign Office spokesman commented on Señor Granados's statement later the same day.

The spokesman said that the impression which the Guatemalan Minister's statement gave that Britain had been prepared to negotiate with Guatemala on the future status of British Honduras was " incorrect," and that Britain had merely been prepared to negotiate on economic and transport questions. Furthermore, Señor Granados had omitted to say that when the British Minister in Guatemala was informed of the Guatemalan proposals for British Honduras, he had replied that they were " totally unacceptable." The spokesman also stated that the Foreign Office representative who saw Señor Granados on Nov. 11 had informed him that his discussions with the British Honduran delegation were " indiscreet." In conclusion, the spokesman added that Señor Granados's visit to Buckingham Palace had been postponed since it would have been " inappropriate " on the very day after Mr. Lennox-Boyd's statement. H.M. Government, however, did not feel it necessary to declare Señor Granados *persona non grata.*

The Guatemalan Legation in London announced on Dec 4 that Señor Granados had been recalled and that the Guatemalan Government " in the present circumstances cannot consider the appointment of another person." The statement added that " the Government of Guatemala considers that the British Government acted improperly in cancelling the appointment for the presentation of letters of credence."

Mr. Price's Expulsion from Executive Council.

It was announced in Belize on Dec. 6 that Mr. Price had been expelled from the Colony's Executive Council.

A statement issued from Government House on Dec. 7 explained that " the Executive Council considered that in not immediately rejecting the suggestion of the Guatemalan Minister that British Honduras should transfer its allegiance from the Crown to a foreign Power, and in concealing these conversations from the Governor, Mr. George Price has not discharged the obligations imposed upon him by his oath of allegiance."

The frigate H.M.S. *Ulster*, carrying a company of the Worcestershire Regiment, arrived at Belize from Jamaica on Dec. 6. An official statement said that in view of the possibility, however remote, that the existing situation might have given rise to disorders in British Honduras, the Government had a duty to take precautionary measures to protect the lives and property of all law-abiding citizens.

B. CANADA. — New Atomic Reactor.

Atomic Energy of Canada Ltd. announced on Nov. 3 that its new NRU reactor had gone into operation at its Chalk River plant the same day. The NRU reactor, which works with heavy water as its primary coolant and with natural uranium as its fuel, is a triple-purpose reactor—i.e. it will provide research, testing, and experimental facilities required for the development of nuclear power ; will produce substantial quantities of plutonium (to be sold to the U.S. Atomic Energy Commission) ; and will also produce a large variety of radioactive isotopes (including Cobalt-60, which is used in the treatment of cancer).

It was stated that the NRU reactor would be unsurpassed as a tool for research, development, and testing, as its neutron flux was approximately five times as great as that of the existing NRX reactor. Moreover, no other known reactor had such a high density of neutrons combined with such a large capacity for experiments. The reactor would be run at low power for several weeks while a series of test experiments was being carried out, but its power would then be increased to the rated capacity of 200,000 thermal kilowatts, or five times the power of the NRX reactor (which had been in operation at Chalk River for the past 10 years).

It was also stated that a unique feature of the NRU reactor was the method of changing the fuel elements. Whereas the NRX and other high-power research reactors must be shut down to change fuel elements, the NRU reactor can be refuelled without a shutdown.

The new reactor—on which work began in 1951, and which cost approximately $57,000,000—was designed entirely in Canada, practically all its components being supplied by Canadian manufacturers.

A new uranium plant—Faraday Uranium Mines—was officially opened on May 30. The plant is situated in the Bancroft camp area 140 miles N.E. of Toronto, and is controlled by the Continental Mining Corporation. Its output of uranium will be sold to Eldorado Mining and Refining Ltd., a Crown company.—(Department of External Affairs, Ottawa - Montreal Star) **(Prev. rep. Uranium Reserves, 15325 A ; Chalk River Reactor, 10377 A.)**

A. SOVIET UNION. — Fortieth Anniversary of October Revolution. - M. Khrushchev's Speech to Supreme Soviet. - 12-Nation "Moscow Declaration" by Communist Parties. - Yugoslav Abstention.

The 40th anniversary of the October Revolution of 1917 was celebrated throughout the U.S.S.R. on Nov. 6. In Moscow, the Soviet of the Union and the Soviet of Nationalities (the two Houses forming the Supreme Soviet of the U.S.S.R.) met on that date in a joint "jubilee session" to hear an extensive report from M. Khrushchev on the achievements of the U.S.S.R. during the past 40 years, with special reference to agricultural, industrial and technological development.

Delegations were present from 37 countries, including the Heads of State, Prime Ministers or First Party Secretaries of all Communist countries, and Communist party leaders from many non-Communist countries.

Among the Communist countries, China was represented by President Mao Tse-tung, North Vietnam by President Ho Chi Minh, North Korea by President Kim Il Sung, Albania by M. Enver Hoxha, Bulgaria by M. Todor Zhivkov, Hungary by M. Janos Kadar, Eastern Germany by Herr Walter Ulbricht, Poland by M. Wladyslaw Gomulka, Rumania by M. Chivu Stoica, Czechoslovakia by M. Antonin Novotny, Yugoslavia by M. Edward Kardelj, and Mongolia by M. Dashin Damba.

Delegates from non-Communist countries included M. Maurice Thorez (France), Signor Palmiro Togliatti (Italy) and Mr. Harry Pollitt (Great Britain), as well as the leaders of the Communist parties of Austria, Switzerland, Luxemburg, Norway, Sweden, Iceland, Finland, India, Indonesia, Japan, Syria and the Lebanon, Israel, Morocco, Tunisia, Australia, Canada, Argentina, Mexico, Uruguay and Ecuador. The outlawed Communist parties of Western Germany and Spain were represented by Herr Max Reimann and Señora Dolores Ibarruri respectively.

Parties co-operating with the Communists in countries where the latter are in power were also represented, including the United Peasant Party and the Democratic Party in Poland; the People's and Socialist parties in Czechoslovakia; the Christian Democratic Union and the Liberal Democratic, National Democratic and Democratic Peasant parties in Eastern Germany; the Agricultural People's League in Bulgaria; and the Democratic and Socialist parties in North Vietnam. The Italian Socialist Party (the "Nenni" Socialists") was also represented.

An airliner carrying members of the Rumanian delegation crashed at Moscow airport on Nov. 4, four persons being killed—three members of the crew and Dr. Grigore Preoteasa, secretary of the Central Committee of the Rumanian Workers' Party, and a former Foreign Minister. Dr. Preoteasa succeeded M. Simon Bughici as Foreign Minister in 1954 and held that post until the governmental reorganization of July last (see 15660 A).

A notable absentee from the celebrations was President Tito of Yugoslavia. The Tanjug Agency in Belgrade had announced on Oct. 29 that an acute attack of lumbago would prevent him from travelling to Moscow or from making a projected visit to several Asian countries during the winter. As stated above, Yugoslavia was represented by M. Kardelj, vice-chairman of the Federal Executive Council.

M. Khrushchev's Report to Supreme Soviet.

M. Khrushchev's speech to the "jubilee session" of the Supreme Soviet is summarized below under cross-headings:

Production in Pre- and Post-Revolutionary Russia. The opening section of M. Khrushchev's speech was devoted to a comparison of industrial output in pre- and post-revolutionary Russia, in which connexion he made the following claims: (*a*) Output of steel had increased from 4,200,000 tons in 1913 to 51,000,000 tons in 1957; "in 1913 our country produced two-fifths of the output in Britain, and less than France, but today we turn out more than Britain, France and Belgium together." (*b*) Coal output had risen from 29,100,000 tons in 1913 to 462,000,000 tons in 1957, and oil output from 9,200,000 tons to 98,000,000 tons; "the Soviet Union now holds first place in Europe and second place in the world in coal output, and third place in the world in oil production." (*c*) Electric power production had increased from 1,900 million kw. in 1913 to 210,000 million kw. in 1957, and "the Kuibyshev hydro-electric power station alone . . . will generate every year five times as much power as was generated by all of Russia's power stations in 1913." (*d*) Output in the engineering industries had increased over 200-fold as compared with 1913.

M. Khrushchev claimed that in spite of the heavy losses suffered as a result of the German invasion in the Second World War, the U.S.S.R. had "long ago far outstripped the biggest capitalist countries of Europe—Britain, France and Western Germany—in absolute volume of industrial production."

Agricultural Development. Reviewing the "socialist reconstruction of agriculture" since the October Revolution, M. Khrushchev stated that there were now about 80,000 collective farms and 5,800 State farms in the U.S.S.R., equipped with 1,632,000 tractors, 420,000 combine harvesters, 660,000 lorries, and "millions of other complex machines." He continued: "The socialist transformation of agriculture and its equipment with up-to-date machinery have resulted in a considerable increase in labour productivity on the farms . . . Production of marketable grain has increased almost three-fold as compared with the most productive pre-revolutionary year—1913—and wheat production has shown a five-fold increase. Production of raw cotton, sunflower seeds, and vegetables has increased six-fold, and that of sugar-beet and potatoes nearly three-fold . . ." The total sown area in the U.S.S.R. in 1957 amounted to 193,200,000 hectares (approx. 477,200,000 acres), an increase of 75,000,000 hectares over the 1913 figure.

M. Khrushchev laid special emphasis on the important results achieved in developing former virgin lands in Siberia and Central Asia. He said in this connexion that 1,021 million poods of grain (a pood = 36.1 lb.) had been procured from such lands by Nov. 1, 1957, of which 645,000,000 poods had come from Siberia and 280,000,000 poods from the Altai region.

Similar progress had been made in stock-farming, formerly "one of the most backward sections of our agriculture." There were 12,000,000 more head of cattle than in 1913, and, compared with the latter year, "the production of meat has doubled, of milk and wool has trebled, and of fine and semi-fine wool has increased five-fold." M. Khrushchev reiterated the Soviet Government's intention "to overtake the United States within the next few years in *per capita* output of meat, milk and butter."

Increase in National Income and Consumption. After reporting a "steady rise in the well-being of the people" since the revolution, and claiming that the national income showed a thirteen-fold *per capita* increase over 1913, M. Khrushchev said that the "scourge of unemployment" had been abolished, that the number of workers in the national economy had risen from 12,900,000 in 1913 to 52,600,000 in 1957; and that plans were in hand for the universal introduction of a seven-hour working day, and of six hours in coal-mining and other underground industries. He referred also to the raising of wages of lower-paid workers, to recent increases in pensions, and to other social legislation.

Speaking of the "rising standards of living of the Soviet people," M. Khrushchev said: "Our people can now buy more; they eat, dress and live better than ever before. In 1957, State and co-operative shops sold 3.3 times as much meat and meat products; 3.5 times as much butter, milk and other dairy produce; 3.3. times as much sugar; and 2.8 times as much fabrics as in 1940. The sale of woollen textiles increased nearly four-fold and of silk fabrics nearly nine-fold. In 1956, people bought over 21,000,000 watches and clocks; more than 3,000,000 bicycles; and 4,200,000 wireless and television sets: and this year even greater quantities of these commodities are being bought. Over recent years, our industry has been putting out greater numbers of sewing machines, refrigerators, washing machines and vacuum cleaners . . ."

Education, Technology and the "Sputniks." After claiming that illiteracy had "been abolished in the main before the Second World War," M. Khrushchev said that more than 50,000,000 people were studying in educational institutions throughout the country; that more than 6,000,000 people trained in universities or secondary schools were working in different branches of the economy, "nearly 33 times as many as in pre-revolutionary Russia"; and that "a vast army of engineers and technicians, agronomists and livestock experts, teachers, doctors, and men of other professions are actively helping in the building of Communism." Expressing "particular gratitude to the fruitful work of Soviet scientists," M. Khrushchev claimed that "our country leads the world in the peaceful uses of atomic energy." He referred also to the successful testing of an inter-continental ballistic missile.

"The crowning scientific achievement," he continued, "was the launching on Oct. 4 this year of the world's first Earth satellite. Less than a month later, another Soviet *sputnik*, equipped with a better and bigger variety of scientific instruments and carrying an animal aboard for research purposes, was sent into the heavens . . . Two messages of the Soviet Union, two stars of peace, are circling the globe—a really fine present for the 40th anniversary of the October Revolution . . ."

After saying that "this triumph of the Soviet Union has scared and confused our enemies," and recalling that the Americans had previously announced their intention of launching an Earth satellite named *Vanguard*, M. Khrushchev continued: "Of course, the name *Vanguard* reflected the Americans' confidence that their satellite would be the first in the world. But life has shown that the Soviet *sputniks* are in the van. Our *sputniks* are circling the globe and waiting to be joined by American and other *sputniks* to form a community of *sputniks*. This community, this competition, would be a much better one than the arms race to produce lethal weapons."

The "Cult of Personality." Speaking of the decisions of the 20th Party Congress, M. Khrushchev said: "The party congress subjected the mistakes linked with the personality cult of J. V. Stalin to fundamental criticism, and outlined measures aimed at overcoming the consequences of that cult. It started from the basic principles of Marxism-Leninism, from Lenin's critical remarks about the shortcomings and negative features in Stalin's character—features which became particularly pronounced in the last period of his life and greatly harmed our common cause . . . We Communists criticize the cult of personality as alien to the spirit of Marxism-Leninism, as something intolerable in a Socialist society . . . But we cannot agree with those who try to use our criticism of the cult of personality for attacks against the Socialist system and the Communist Party.

While criticizing the negative aspects of Stalin's activity, the party fought and will continue to fight all who slander Stalin; all who, on the pretext of criticizing the cult of personality, give an inaccurate and distorted picture of the period of our party's activity during which the Central Committee was headed by Stalin. As a devoted Marxist-Leninist and a staunch revolutionary, Stalin will occupy a worthy place in history . . ."

M. Khrushchev ended this part of his speech with a reference to the "nation-wide approval" which had been expressed for the Central Committee's action in exposing and "throwing overboard" the "anti-party group of Malenkov, Kaganovich, Molotov and Shepilov."

Future Economic Advance. M. Khrushchev adduced the following five reasons for the Soviet people's "profound conviction" that the "plan for a further powerful development of the national economy will be successfully fulfilled":

"(1) The Soviet Union now has a powerful socialist industry, equipped with up-to-date machinery, and large-scale mechanized agriculture which is forging ahead.

"(2) We now have highly trained workers capable of solving the most complex development tasks on the basis of technological progress; steady growth in the productivity of social labour; and better economic indices in industry, building, transport and agriculture.

"(3) The outstanding achievements in Soviet science and engineering, and the application of these achievements in industry, will, with the minimum expenditure of effort and capital, yield considerably greater results in developing the productive forces.

"(4) Our country possesses inexhaustible natural resources which make possible the unrestricted development of our economy. We have everything to hand for a rapid growth in the most varied branches of our national economy, and for the fuller satisfaction of the growing requirements of society.

"(5) The world system of socialism, close co-operation and mutual aid, and co-ordinated plans for the economic development of socialist society, favour more rapid advance by all the countries of the socialist camp."

Development of Natural Resources. After saying that "the more effective utilization of our natural resources is a vital factor for the fulfilment of this long-term plan," M. Khrushchev went on: "In pre-revolutionary Russia, the mineral resources had hardly been studied; the known deposits of iron-ore and coal were barely more than three per cent of the world's deposits . . . In Soviet times many new deposits of all kinds of valuable minerals have been discovered and explored, and the reserves of known deposits substantially increased. The Soviet Union now stands first in the world in prospected deposits of vital mineral raw materials, including iron and manganese ores, coal, copper, bauxite, nickel, tungsten, lead, mercury, mica, zinc, and potassium salts. It is also one of the leading countries in the world for known petroleum deposits. We have immense power resources, which make it possible to build huge power stations in different parts of the country, and our reserves of timber are vast . . ."

M. Khrushchev went on to speak of developments in remote parts of the country which in Tsarist days were "wild bears' backwoods." He instanced in this connexion the building of a scientific city in Siberia (see 15870 A); the discovery in Yakutia of "extremely rich diamond fields" (see 14872 C), as well as "huge deposits of coking coal and immense deposits of iron-ore, gold, tin and other minerals"; the discovery and exploitation of "tremendous deposits of petroleum in the vast expanses between the Volga and the Urals"; the "giant hydro-electric power developments" on the Volga; and the opening-up of "immense deposits of iron-ore" in the Kursk region. He added that "this iron-ore basin, one of the most important in the Soviet Union, will supply a huge metals industry with high-quality ore for hundreds of years and will play a major role in strengthening the industrial might of the U.S.S.R." Moreover, newly-discovered coal basins in the Dnieper and Lvov-Volhynia regions, together with the existing Donbas basin, would result in a great expansion of coal production.

Speaking of the industrial development of Kazakhstan and Central Asia, "which have changed beyond recognition in Soviet times," M. Khrushchev said: "In Kazakhstan we have discovered vast deposits of iron-ore, coal, chromites, high-quality bauxite, and all sorts of ferrous and non-ferrous metals. To date, nearly half the prospected deposits of copper, lead, zinc and tungsten in the U.S.S.R., and more than one-fifth of the country's reserves of molybdenum, are concentrated in this area. Kazakhstan is an extremely rich depository of a great variety of natural resources which make possible the development of a powerful, many-sided industry . . ."

Industrial Development. Comparing Soviet industrial output with "the output of the most powerful capitalist country—the United States," M. Khrushchev said: "This year the Soviet Union will produce approximately 84 million tons of iron-ore, 462 million tons of coal, 98 million tons of petroleum, more than 37 million tons of pig-iron, 51 million tons of steel, 210,000 million kw. of electric power, nearly 25 million tons of cement, more than 4½ million tons of granulated sugar, more than 280 million metres of woollen fabrics, and about 315 million pairs of leather footwear.

"In the U.S.A., 1956 saw the output of 98 million tons of iron-ore, 479 million tons of coal, 354 million tons of petroleum, 69 million tons of pig-iron, 104½ million tons of steel, 684,000 million kw. of electric power, 54 million tons of cement, 2,100,000 tons of sugar, 299 million metres of woollen textiles and 586 million pairs of leather footwear.

"As these figures show, the Soviet Union is still behind the United States in output of some of these important products. At the same time, it should be pointed out that the output level of the U.S.A. is now no longer beyond our reach, as it seemed to some people 25 or 30 years ago. For some products—e.g. wheat, timber and sugar—the Soviet Union has already passed the American level. The difference in output of iron-ore and coal, pig-iron and steel, certain machinery and equipment, cotton and woollen textiles, has been drastically reduced . . .

"Preliminary figures, which require checking, show that in approximately 15 years the annual industrial output of the U.S.S.R. will reach the following levels: iron-ore, 350 to 300 million tons, pig-iron, 75 to 85 million tons; steel, 100 to 120 million tons; coal, 650 to 750 million tons; petroleum, 350 to 400 million tons; gas extraction and production, 270,000 million to 320,000 million cubic metres; electric power, 800,000 million to 900,000 million kw.; cement, 90 to 110 million tons; sugar, nine to ten million tons; woollen textiles, 550 to 650 million metres; leather footwear, 600 to 700 million pairs. This is a preliminary forecast which may be revised in one direction or another. Most likely it will be revised in the direction of cutting down the time necessary to reach these targets . . ."

As regards future plans, M. Khrushchev said that "a considerable extension of our raw material base" would be set in hand, "primarily by developing the big iron-ore deposits discovered in recent years." Particular attention would also be directed to the fuller utilization of gas and petroleum as substitutes for coal—in which respect M. Khrushchev admitted that "we are lagging considerably behind," despite the fact that the U.S.S.R. had "enormous reserves of natural gas." He added in this connexion: "In view of the tremendous advantages held out by gas, we plan to increase its output by some 13 to 15 times over the next 10 to 15 years."

Special attention would also be paid to the development of the chemical industry; to increased output of plastics, fibres, and artificial fertilizers; and to railway electrification, involving the "replacement of obsolete and uneconomical steam-engines with electric and diesel locomotives."

"The calculations of our planners," M. Khrushchev added, "show that within the next 15 years the Soviet Union will be able not only to overtake but to surpass the present volume of output in the United States. Of course, in that time the U.S. economy may make headway too. But if we take account of the fact that the rate of growth of our industry is much higher than in the U.S.A., we can regard the task of speedily overtaking the United States as perfectly feasible . . ."

Housing. M. Khrushchev admitted the existence of an "acute housing shortage" in the U.S.S.R., which he attributed to the following reasons: (1) the "incredible housing shortage inherited from the old order"; (2) the rapid growth of the urban population since the Revolution; (3) the fact that in pre-war years "we were compelled to economize on everything, including the construction of dwellings, so as to be able to put every kopeck into heavy industry"; (4) the tremendous material damage caused by the Second World War, "which left nearly 25,000,000 people without a roof over their heads." After saying that the housing problem was "one of the major concerns of the Communist Party and the Soviet Government," he expressed his conviction that it would be overcome "in the next 10 to 12 years."

The "Socialist State." In the course of a lengthy exposition of Marxist-Leninist principles, M. Khrushchev denounced "so-called national Communism" and described its supporters as "ideologists of imperialism seeking to sow the poisonous seeds of chauvinism and bourgeois nationalism in order to oppose one socialist country to others, thereby betraying their secret desire to turn Communists into bourgeois liberals." He cited M. Imre Nagy in Hungary (see 15661 A) and M. Milovan Djilas in Yugoslavia (see 15822 A) as examples of those who had "descended to outright betrayal of the cause of socialism and the basic national interests of their countries."

"Modern conditions," M. Khrushchev continued, "have given rise to various forms of socialist state . . . Lenin pointed out that all peoples and countries would come to socialism, but not all in the same way, for each country would lend its own distinctive features to this or that form of democracy, to this or that variety of the dictatorship of the proletariat and, lastly, to the rate of socialist reforms in the various sides of social life . . . The theory of scientific socialism does—and must—take into consideration the special features of each country, features that to some degree or other determine the forms and methods by which it will build socialism . . .

"Differences in the practical building of socialism may show themselves, for example, in establishing this or that form of industrial management, this or that method of agricultural co-operative association. But the abolition of the private ownership of the means of production, and the association of the peasantry in co-operatives, are common elements without which the socialist system cannot develop successfully. We know that the problems of industrial management in the Chinese People's Republic are tackled with due regard to the specific conditions of that country, that is, not in the same way as in the Soviet Union or, say, in Czechoslovakia. While there is a variety of concrete forms of management, the main thing—namely, consistent fulfilment of the Marxist-Leninist principles of socialist construction—fully retains its validity . . ."

International Relations and Co-existence. M. Khrushchev began the final section of his speech with an attack on "colonialism," asserting in this connexion that a "bitter struggle for influence in

colonial and semi-colonial countries is taking place between the imperialist groups of the United States and Britain." After a denunciation of the "Eisenhower-Dulles doctrine" in the Middle East, and references to "the freedom-loving Arab peoples," he said that the "American imperialists" were "today conspiring against Syria, using Israel in their evil game, and inciting Turkey to adventurism and provocation."

M. Khrushchev went on to say that the recent meeting between President Eisenhower and Mr. Macmillan had "made it plain that the ruling circles of the two leading capitalist States have reached agreement to fan the flames of the cold war", that the forthcoming meeting of the Heads of Government of NATO countries "bodes nothing good for peace"; and that "the more aggressive imperialist circles are striving to provoke conflicts wherever possible and . . . to encircle socialist countries with military bases and extend military blocs . . ."

After referring to the "five well-known principles governing relations between countries with different systems" [i.e. the *Panch Sila* principles] M. Khrushchev said in conclusion: "As soon as it came into being, the Soviet State made the principle of the peaceful co-existence of countries with different social systems the basis of its foreign policy . . . Socialism and capitalism exist on the same planet and their co-existence is a historical necessity . . . We should like a summit conference between representatives of the capitalist and socialist countries for the purpose of reaching agreement . . . to rule out war as a method of dealing with international issues, to end the 'cold war' and the arms drive, and to establish international relations based on co-existence . . . In advocating peaceful co-existence we of course have no intention of saying that there are no contradictions between socialism and capitalism, that complete 'harmony' can be established between them, or that it is possible to reconcile the communist and bourgeois ideologies. Such a viewpoint would be tantamount to a retreat from Marxism-Leninism. These ideological differences are irreconcilable and will continue so. But this does not preclude peaceful co-existence, peaceful competition, between the socialist and capitalist countries . . ."

The 40th anniversary of the October Revolution was marked by a large military parade in the Red Square at which the salute was taken by Marshal Malinovsky, the new Minister of Defence. Some of the Soviet Union's latest military weapons were publicly displayed for the first time, the following description being given in a *Manchester Guardian* despatch from Moscow:

"The parade included 38 rocket weapons and two huge cannons 'with obvious atomic capabilities.' Nothing approaching an intercontinental ballistic missile was seen, however. The largest weapon displayed was a 75 ft. rocket. Western observers described it as 'an overgrown V2-type, single-stage' rocket, although one suggested that it might be the first and largest stage of an I.C.B.M. Other rockets included ground-to-air two-stage missiles comparable with the American *Nike*, aerial saturation rockets, tiers of other rockets 'unlike any other ground rockets,' and surface-to-surface short-range tactical missiles comparable to the American *Honest John*. Among other weapons on show for the first time were a new heavy tank which appeared to be a development of the *Stalin III*, and an amphibious assault vehicle propelled by jet exhausts. In general, however, the parade gave no real secrets away . . ."

12-Nation "Moscow Declaration" by Communist Parties. - Yugoslav Abstention from Declaration.

During the 40th anniversary celebrations, representatives of 12 Communist parties met in Moscow on Nov. 14-16 to discuss "their relations, current problems of the international situation, and the struggle for peace and socialism." A lengthy joint declaration was issued by the 12 parties concerned—the Communist parties of the U.S.S.R., China, Bulgaria and Czechoslovakia, the Polish United Workers' Party, the Hungarian Socialist Workers' Party, the Rumanian Workers' Party, the Socialist Unity Party in Eastern Germany, the Albanian Party of Labour, the (North) Korean Party of Labour, the Working People's Party of (North) Vietnam, and the Mongolian People's Revolutionary Party.

The 12-nation declaration was divided into four sections as summarized below: (1) a denunciation of "imperialism," combined with an affirmation of the Communist countries' wish for "peaceful co-existence"; (2) co-operation between the Communist countries; (3) a denunciation of "revisionism" and "sectarianism" within Communist parties; and (4) relations between Communist and non-Communist parties, with special reference to the "transition to socialism" in non-Communist countries.

Denunciation of "Imperialism." After denunciations of "colonialism" and "imperialism," the 12-nation declaration accused the "aggressive imperialist circles of the United States" of seeking to "bring most countries of the world under their sway, hamper the onward march of mankind, and enmesh liberated peoples in new forms of colonialism." It went on to describe the United States as "the centre of world reaction"; to accuse "American, British, French and other imperialists and their stooges" of waging or having waged wars "in Indo-China, Indonesia, Korea, Malaya, Kenya, Guatemala, Egypt, Algeria, Oman and Yemen"; and to blame the "aggressive imperialist forces" for their "flat refusal" to reduce armaments or prohibit nuclear weapons.

The declaration went on to attack NATO, SEATO, and "West German militarism and revanchism," and said that "the question of war or peaceful co-operation is now the crucial question of world policy." References to the "collapse of imperialist designs in Egypt" and to the "failure of counter-revolutionary plans to overthrow the people's democratic regime in Hungary" were followed by the assertion that the "cause of peace is upheld by . . . the invincible camp of socialist countries headed by the Soviet Union." Other "powerful peace forces" were "the peace-loving countries of Asia and Africa taking an anti-imperialist stand", the "international working class and above all its vanguard—the Communist Party"; the "liberation movement of the peoples of colonies and semi-colonies"; the "peoples of the European countries which have proclaimed neutrality", and the "peoples of Latin America."

This section ended with an affirmation that the 12 Communist parties signing the declaration adhered to the "Leninist principle of peaceful co-existence . . . which . . . coincides with the Five Principles put forward jointly by China and India and with the programme adopted at the Bandung conference of Afro-Asian countries."

Co-operation between Communist Countries. The declaration continued: "At the bedrock of the relations between the countries of the world socialist system . . . lie the principles of Marxism-Leninism." After a reference to the "historic political and social gains won by the Soviet Union," which was described as "the first and mightiest socialist Power," the declaration went on:

"The socialist countries base their relations on principles of complete equality, respect for territorial integrity, State independence and sovereignty, and non-interference in one another's affairs. These are vital principles. However, they do not exhaust the essence of the relations among them. Fraternal mutual aid is part and parcel of these relations . . . The socialist States also advocate all-round expansion of economic and cultural relations with all other countries, provided they desire it, on a basis of equality, mutual benefit, and non-interference in internal affairs . . ."

"Revisionism" and "Sectarianism." After saying that the meeting had "confirmed the identity of views [of the 12 Communist parties] on the major problems of the socialist revolution and of building socialism," a lengthy attack was made on "revisionism," "sectarianism" and "dogmatism," which were described as "international phenomena." Reference was made, *inter alia*, to the "correctness of the Marxist-Leninist proposition that the processes of the socialist revolution and of building socialism are governed by a number of basic laws applicable in all countries embarking on a socialist road"; to the fact that "these laws manifest themselves everywhere, alongside a great variety of historical national peculiarities and traditions which must be taken into account"; and to the necessity for the "creative application" of Marxist-Leninist principles in a manner which would not involve "mechanical imitation of the policies and tactics of Communist parties in other countries." It was claimed that Marxism-Leninism, "deriving from historical materialism," was a "world outlook reflecting the universal law of development of nature, society and human thinking" and was "valid for the past, present and future."

The declaration continued: "In condemning dogmatism, the Communist parties believe that the main danger at present is revisionism—in other words, right-wing opportunism as a manifestation of bourgeois ideology paralyzing the revolutionary energy of the working-class and demanding the preservation or restoration of capitalism. However, dogmatism and sectarianism can also be the main danger at different phases of development in one party or another. It is for each Communist party to decide what danger threatens it more at a given time . . . Modern revisionism seeks to smear the teaching of Marxism-Leninism, declares that it is 'outmoded,' and alleges that it has lost its significance for social progress . . . The revisionists deny the historical necessity for a proletarian revolution and the dictatorship of the proletariat during the period of transition from capitalism to socialism; reject the principles of proletarian internationalism; and call for the rejection of the Leninist principles of party organization and democratic centralism. Above all, they call for the transformation of the Communist party from a militant revolutionary party into some kind of debating society . . ."

Relations with Non-Communist Parties, etc. The final section of the declaration was worded, in part, as follows: ". . . The working class and its vanguard—the Marxist-Leninist Party—seek to achieve the socialist revolution by peaceful means . . . In a number of capitalist countries the working-class today has the opportunity—given a united working-class and people's front, or other workable forms of political co-operation between the different parties and organizations—to unite a majority of the people, win power without civil war, and ensure the transfer of the basic means of production to the hands of the people . . . [The] . . . working-class . . . can secure a firm majority in parliament, transform parliament from an instrument serving the class interests of the bourgeoisie into an instrument serving the working people, launch a non-parliamentary mass struggle, smash the resistance of the reactionary forces, and create the necessary conditions for the peaceful realization of the socialist revolution . . ."

"In the event of the ruling classes resorting to violence against the people, the possibility of non-peaceful transition to socialism should be borne in mind. Leninism teaches, and experience confirms, that the ruling classes never relinquish power voluntarily. In this case the degree of bitterness and the forms of the class struggle will depend not so much on the proletariat as on the resistance put up by the reactionary circles . . . The possibility of one or another way to socialism depends on the concrete conditions in each country . . .

"In the struggle for winning power and building socialism, the Communist parties seek co-operation with the Socialist parties. Although right-wing Socialist Party leaders are doing their best to hamper this co-operation, there are increasing opportunities for co-operation between Communists and Socialists on many issues. The ideological differences between the Communist and Socialist parties should not keep them from establishing unity of action on the many pressing issues that confront the working-class movement . . ."

The Yugoslav League of Communists neither participated in the 12-party discussions nor signed the declaration. On his return to Belgrade from Moscow, M. Kardelj said that "we did not sign it because we did not agree with it."
(Soviet Embassy Press Department, London - Times - Manchester Guardian - Le Monde, Paris)

A. UNITED KINGDOM. — Gold and Dollar Reserves.

The Treasury announced on Dec. 3 that the sterling area's gold and dollar reserves had risen during November by $92,000,000, after taking into account (*a*) the receipt of $18,000,000 from the E.P.U. in respect of the U.K.'s surplus in October, and (*b*) payment of $3,000,000 to creditor countries in the Union under bilateral settlements. As a result, the gold and dollar reserves stood at $2,185,000,000 on Nov. 30, as compared with $2,093,000,000 on Oct. 30.

Provisional figures for the E.P.U. November settlement showed that Britain had a deficit of £1,000,000; three-quarters of this would be settled in gold or dollars, and the remaining quarter by an increase in the United Kingdom's debt to the Union.

It was pointed out at the Treasury that the E.P.U. deficit would have been a substantial surplus had it not been for large special operations carried out at the end of the month by the French exchange authorities, who had called in currency balances from their trading banks to show them in the account of the Bank of France, thus creating a large bilateral surplus with Britain on the day of settlement.

Mr. Enoch Powell, Financial Secretary to the Treasury, stated in a written reply on Dec. 5 that the increase in the gold and dollar reserves since the rise in the Bank Rate to 7 per cent had been mainly caused—apart from drawings on the Export-Import Bank credit—by commercial requirements for sterling.

The dollar rate for sterling, which had been slightly below the $2.80 level at the beginning of November, rose again above parity on Nov. 6 (2.80\frac{1}{4}$) and remained firm throughout the month, reaching its highest points on Nov. 19 at 2.80\frac{7}{16}$ (the highest since June 19, 1956), and on Nov. 25 at 2.80\frac{11}{16}$ (the highest since May, 1954). On Nov. 30 the rate was 2.80\frac{5}{8}$. Similarly, the transferable sterling rate in Zürich moved up to $2.7880 on Nov. 19, and on Nov. 26 crossed the $2.79 mark for the first time since May 5, 1954.—(Treasury Press Office - Financial Times - Times) **(Prev. rep. 15840 A.)**

B. UNITED NATIONS. — New Director of European Office. - Signor Spinelli succeeds Mr. Adrian Pelt.

The U.N. Secretary-General, Dr. Hammarskjold, announced on Nov. 29 that he had appointed Signor Pier Pasquale Spinelli (Italy) as Director of the European Office of the United Nations in Geneva in succession to Mr. Adrian Pelt, who was resigning on Dec. 31 to become Secretary-General of the World Federation of United Nations Associations.

Signor Spinelli (55) entered the Italian Foreign Service in 1927, held a number of diplomatic and consular posts in the U.S.A., Latin America, and the Far East, and was appointed Executive Assistant to the Italian Administrator of Somalia (Italian Somaliland) in 1950, subsequently becoming Secretary-General of the Trusteeship Administration of that territory. Since 1955 he had worked in the Italian Foreign Ministry.
(United Nations Information Centre, London)

C. NEW ZEALAND. — New Chief of Naval Staff.

The N.Z. Minister of Defence (Mr. Eyre) announced early in December that Rear-Admiral J. M. Villiers, of the Royal Navy, had been appointed Chief of Staff of the Royal New Zealand Navy with effect from February 1958. He succeeded Rear-Admiral McBeath, who had held the post since March 1955.—(Directorate of Information, Wellington) **(Prev. rep. 14065 C.)**

D. YUGOSLAVIA - UNITED KINGDOM. — Mr. Selwyn Lloyd's Visit to Belgrade. - Discussions with President Tito. - Lloyd-Popovich Communiqué.

The British Foreign Secretary, Mr. Selwyn Lloyd, visited Belgrade from Sept. 4-8 for talks with President Tito, M. Kardelj, Vice-President of the Federal Executive Council, and M. Koca Popovich, the Yugoslav Foreign Secretary.

A joint communiqué said that relations between Yugoslavia and Britain had been developing "very favourably" and that there were "no major unsolved problems between the two countries." It continued: "Concrete progress was noted in the development of mutual relations in the economic, cultural, and scientific fields. Useful and constructive talks were held on a number of questions in the international sphere, including disarmament, European security, East-West relations, and the Middle East. Agreement was reached to a large extent on the nature of current international problems. The fact that Yugoslavia and Great Britain have had different views from time to time on certain questions does not affect the friendly relations existing between them, nor their determination to work for a satisfactory solution.

"During the talks, which were frank and cordial, the two Foreign Secretaries emphasized the wish of their Governments to co-operate in bringing about a relaxation of international tension and in increasing confidence, mutual respect, and peaceful co-operation among the various countries regardless of their social systems. They also expressed their determination to continue, through mutual co-operation, to strengthen and expand further the friendly relations between Yugoslavia and Britain."

While in Belgrade Mr. Selwyn Lloyd made several statements in which he spoke of the "sound relationship" between the United Kingdom and Yugoslavia. He indicated his "firm impression" that Yugoslavia would continue to follow an independent foreign policy in spite of her recent efforts to improve her relations with the Soviet Union.

Speaking at a luncheon given by M. Popovich on Sept. 5, Mr. Selwyn Lloyd declared: "Over the whole range of direct relations between our two countries, there are now no major problems and very few minor ones. The fact that our relations are good does not mean that we agree on every topic in international affairs. We do not always agree with you nor you with us. When that happens we tell one another so frankly. If we disagree, that does not make bad blood between us. That is the essence of a sound relationship between two independent countries. In the world of today all nations are, in fact, interdependent; but . . . we both believe in our right, and the right of every country, to hold an individual point of view and to follow an individual policy."

Referring to the different political systems of the two countries, Mr. Lloyd said: "We think our system suits us better, just as you think yours suits you better, but that difference does not lead us to seek to interfere in one another's internal affairs. In fact, we are a good example of genuine peaceful co-existence . . . It does not suit us if there is ill-feeling and strained relations anywhere in the world. Therefore if you succeed in improving your relations with any other Government, there will be no hard feelings on our part. We believe that your relations with us will not be impaired, and that you will maintain the sturdy independence of which you have given so many proofs."

Speaking at a press conference on Sept. 6, Mr. Selwyn Lloyd said that he had formed the "firm impression" that the Yugoslav Government's approach to questions of foreign policy had not changed in spite of its recent efforts to improve relations with the Soviet Union. He thought that the Yugoslav leaders, in the future as in the past, would continue to pursue an independent policy, judging each issue on its merits and coming to their own conclusions.

In reply to questions, Mr. Selwyn Lloyd said there was agreement between both Governments that the first international requirement was an increase of confidence between East and West, and that one of the best ways to create a better atmosphere could be a first-stage agreement on disarmament. The Yugoslav Government shared British misgivings about recent Soviet activities in the Middle East, and both Governments desired to do all in their power to relieve the tension in that area.

Mr. Selwyn Lloyd returned to London on September 8.

E. BRAZIL - PERU. — Amazon Basin Study. - Free Port Facilities for Peru at Belem.

A convention for the joint study and exploitation of the resources of the Amazon Basin was signed in Lima on Nov. 29 at the end of a five-day visit by the Brazilian Foreign Minister, Dr. José Carlos de Macedo Soares. The convention also provided for improved river and overland communications between the two countries, increased trade, and free port facilities for Peru at Belem do Pará, the Brazilian port at the mouth of the Amazon River.—(New York Times)

F. SOVIET UNION. — Chkalov renamed Orenburg.

It was announced in Moscow on Dec. 6 that the Presidium of the Supreme Soviet of the R.S.F.S.R. had issued a decree restoring to the city of Chkalov its former name of Orenburg.
(Soviet Embassy Press Department, London) **(15808 E.)**

A. UNITED KINGDOM. — Leicester and Liverpool By-elections. - Seats retained by Conservatives.

Polling took place on Nov. 28 at South-East Leicester and on Dec. 5 in the Garston division of Liverpool, both seats being retained by the Conservative Party.

South-East Leicester.

The by-election was caused by the resignation of Captain Charles Waterhouse (Conservative). Result :

Peel, William John (Conservative)	18,023
Boothroyd, Miss Betty (Labour) ..	11,541
No change. Conservative majority	6,482

Figures at the general election were : Captain Waterhouse (C.) 26,070, E.J. Masters (Lab.) 14,529—Conservative majority, 11,541.

The Conservative candidate received 60.9 per cent of the votes and the Labour candidate 39.1 per cent, compared with percentages of 64.2 and 35.8 respectively at the general election—the Conservative proportion thus dropping by 3.3 per cent.

56 3 per cent of the electorate voted, compared with 78.4 per cent at the general election. The total electorate numbered 52,564, an increase of 817 since the general election.

Captain Waterhouse (64), leader of the former Conservative "Suez group," resigned because his appointment to the board of Tanganyika Concessions Ltd. would necessitate his absence from Britain for several months each year and thus make it impossible for him to fulfil his parliamentary duties adequately. [He is chairman of the Rhodesia-Katanga Co. and the Zambesia Exploring Co., both of which are partly owned by Tanganyika Concessions.] He had represented Leicester constituencies for 28 years—from 1924-45 and 1950 onwards—and had been chairman of the House of Commons Select Committee on Estimates since 1953. During the war he held ministerial office as Assistant Postmaster-General and later as Parliamentary Secretary to the Board of Trade. Captain Waterhouse emphasized that his resignation had nothing to do with his previous disagreement with the Government over its Suez policy.

Mr. John Peel (44) was formerly in the Colonial Service, having been British Resident in Brunei (1946-48) and Resident Commissioner for the Gilbert and Ellice Islands (1949-51). Since 1954 he had been engaged in political work for the Conservative Commonwealth Council. He unsuccessfully contested Meriden (Warwickshire) at the last general election.

Garston.

The by-election was caused by the resignation of Sir Victor Raikes (Independent Conservative). Result :

Bingham, Richard (Conservative) ..	15,521
Levin, Ian (Labour)	11,217
Dennis, Arthur (Liberal)	4,807
No change. Conservative majority	4,304

Figures at the general election were : Sir Victor Raikes (C.) 28,130 ; T. E. Nixon (Lab.) 16,161—Conservative majority, 11,969.

The Conservative candidate received 49.2 per cent of the votes, the Labour candidate 35.6 per cent and the Liberal candidate 15.2 per cent, whereas at the general election the Conservative candidate received 63.5 per cent and the Labour candidate 36.5 per cent in a straight fight. The Conservative proportion of the poll thus dropped by 14.3 per cent and the Labour proportion by 0.9 per cent. The Liberals last contested Garston in 1950, when they polled 5,966 votes in a three-cornered contest.

49.7 per cent of the electorate voted in the by-election, compared with 71 per cent at the general election. The total electorate numbered 63,445, an increase of 1,072 since the general election.

Sir Victor Raikes (56) had sat in the House of Commons continuously for 26 years—from 1931-45 for South-East Essex, from 1945-50 for the Wavertree division of Liverpool, and since 1950 for Garston. He was one of the eight Conservative M.P.s who resigned the party Whip in May last as a protest against the Government's "capitulation" to Colonel Nasser on the Suez issue (see page 15547, second column), and had subsequently sat in the House as an Independent Conservative. Sir Victor resigned from Parliament to take up a business appointment in Southern Rhodesia as chairman of the Property Manangement Co., a private company dealing with real estate and a subsidiary of the Overseas Land Purchasing Trust, of whose London advisory board he is chairman. He had previously announced his intention of retiring from Parliament before the end of the year, and had emphasized that his decision was unconnected with his opposition to the Government's Suez policy or his relinquishment of the party Whip.

Mr. Richard Bingham (42) is a Liverpool barrister and was formerly a member of Liverpool City Council.
(Times - Daily Telegraph) **(Prev. rep. 15821 E.)**

B. TURKEY. — Release of Mr. Bolukbashi.

The leader of the National Party, M. Osman Bolukbashi, was released from detention on Nov. 30 following his re-election to the Grand National Assembly.—(Times) (15841 A.)

C. FRANCE. — New Political Parties.

A new political party—the Union of the Socialist Left (*Union de la Gauche Socialiste*)—came into being on Dec. 8 as a result of the fusion of four small left-wing organizations—the *Nouvelle Gauche*, the M.L.P., the *Action Socialiste*, and the *Unité Socialiste*. A majority of the *Jeune République* group—over 60 per cent of its membership—also decided to join the *Union de la Gauche Socialiste*.

The new party stands midway between the Socialists and the Communists, but one of the most important points in its programme is to bring about "unity of action between all organizations of the workers." It will also co-operate with non-Socialist parties of a "democratic and progressive" character. Other points in the party's programme include the raising of living-standards of the workers ; respect for democratic liberties ; the ending of arbitrary police action ; and an Algerian settlement by recognizing the right of the Algerian people to decide for itself on its future status.

A political committee of 38 representatives of the constituent organizations was elected to direct the party pending its first congress in May 1958.

A new extreme right-wing party was founded on Nov. 9 under the name of the Patriotic Revolutionary Party (*Parti Patriote Révolutionnaire*). Its leader, M. Jean-Baptiste Biaggi—a former Gaullist, and a lawyer by profession—was one of the organizers of the demonstrations staged by the European community in Algiers against M. Guy Mollet (then Prime Minister) when the latter visited North Africa in February 1956 [see page 14684].

Violent attacks on the political system of the Fourth Republic were made at the party's inaugural meeting in Paris on Nov. 9, coupled with denunciations of M. Mendès-France, M. Mitterrand, and other politicians who were or had been responsible for Algerian and North African affairs. M. Biaggi accused the "men of the system" [i.e. the leaders of the Fourth Republic] of undermining France's interests in North Africa, "abandoning" Tunisia, and "indifference" to the fate of the French population of Algeria. He called upon his supporters to "wage war against the revolutionary war which the agents of treason and their accomplices are waging in France and Algeria." M. Biaggi denied that his party was fascist in character, and paid tribute to General de Gaulle as the only Frenchman of recent years who had shown the capacity for political leadership. Many of those attending the meeting were former French residents of Algeria, Tunisia or Morocco.

M. Biaggi said that "our party's aim, after coming to power, is to instal a free and strong executive capable of governing."—(Le Monde - Le Figaro)

D. CENTRAL AMERICA. — Defence Co-ordination. - Proposed Establishment of Central American Defence Council and Five-Nation "Model Battalion."

The establishment of a Central American Defence Council and the formation of a "model battalion" of troops from the five Central American republics were recommended by representatives of the Defence Ministries of Guatemala, El Salvador, Honduras, Nicaragua and Costa Rica, meeting at San Salvador during the last week of October.

It was agreed (1) that the proposal for a joint Defence Council should be studied by the Foreign Ministers of the five Republics at their next biennial meeting at Managua in January 1958 ; (2) that the Secretary-General of the Organization of Central American States (Señor J. Guillermo Trabanino) should urge the Foreign Ministers to agree to the proposal ; (3) that Señor Trabanino should also urge the five Governments to appoint military attachés to their diplomatic missions in other Central American countries, "especially in the country [El Salvador] which is the headquarters of the Organization of Central American States" ; (4) that the secretariat of the O.C.A.S. should draw up plans for the unification of the armed forces of the five countries, covering such matters as the supreme command, administrative and technical consultative groups, weapons and services, and military instruction centres ; and (5) that military terminology and insignia should be unified in the armed forces of the Central American republics.

Detailed proposals for a "model battalion" of troops from all five countries had first been put forward by the Costa Rican Government.—(New York Times) **(Prev. rep. 15468 A.)**

E. INDONESIA. — Attempt on President Sukarno.

President Sukarno narrowly escaped assassination on Nov. 30 when hand-grenades were thrown at him while he was visiting a school celebration in Jakarta. The President was surrounded by hundreds of children when grenades were hurled by several persons posted at different points ; although Dr. Sukarno escaped injury, two of his aides and five children were killed and 150 people wounded, the great majority being children under 12 years of age. Twenty men were subsequently arrested for participation or complicity in the attack.
(Indonesian Embassy Press Office, London)

A. UNITED KINGDOM.—White Paper on Windscale Accident. - Lifting of Ban on Milk Distribution.

A White Paper on the accident on Oct. 10 at the Windscale No. 1 reactor of the U.K. Atomic Energy Authority (see 15806 A) was published on Nov. 8. It comprised :

(1) A memorandum by the Prime Minister, Mr. Macmillan.

(2) A memorandum by Sir Edwin Plowden, chairman of the Atomic Energy Authority.

(3) A simplified version of the report of the committee of inquiry, under the chairmanship of Sir William Penney, relating to the cause of the accident and the measures taken to deal with it.

(4) A report by the same committee on the measures taken to protect workers and the public.

(5) A report by the committee set up by the Medical Research Council to investigate the health and safety aspects of the accident.

(6) An annexe dealing with the technical differences between the Windscale type of reactor and those at Calder Hall and elsewhere.

Mr. Macmillan's Memorandum.

The Prime Minister stated that since the committee of inquiry's report was a technical document dealing with the design and operation of a defence installation, he (Mr. Macmillan) had asked for a less technical version to be published. The memorandum said that the accident had occurred during a routine maintenance operation known as the "Wigner release" [i.e. the release in the form of heat of the energy stored in graphite as the result of neutron bombardment]. It went on : "The immediate cause of the accident was the application too soon and at too rapid a rate of second nuclear heating to release the Wigner energy from the graphite. This caused the failure of one or more cartridges in the pile, whose contents then oxidized slowly, eventually leading to fire in the reactor."

The memorandum added that "no experiments either for civil or military purposes were being made in the pile during the time of the Wigner release, with one insignificant exception having no relevance to the accident.

[The exception in question was an experimental channel in which a small magnet was being tested.]

Sir Edwin Plowden's Memorandum.

This memorandum stated that the Atomic Energy Authority, having considered the findings of the committee of inquiry, had concluded that the cause of the accident lay "partly in inadequacies of the instrumentation provided for the maintenance operation that was being carried out at the time of the accident, and partly in faults of judgment by the operating staff. These faults of judgment were themselves attributable to weaknesses in organization." Sir Edwin's memorandum went on to cover the following points :

(1) As the responsibility for the accident was essentially collective, no disciplinary action would be taken against any individual.

(2) Temporary measures to deal with the organizational weaknesses had already been taken, pending a more comprehensive evaluation of remedies required. For the latter purpose, it was suggested that an "independent person of standing, with experience of large-scale organizations operating processes involving hazardous materials" should be appointed to undertake an inquiry and to make recommendations. Until this inquiry had been completed, the Windscale No. 2 reactor [which had been closed down] would not be put back into operation.

(3) The Authority had asked the Medical Research Council to lay down for their guidance the maximum permissible level of radioactive substances when exposure took place for a limited period rather than as a continuous lifetime dose.

(4) The accident had underlined the need for closer liaison between the factory management and local interests. A standing liaison committee had accordingly been set up at Windscale, and similar committees were being set up at all other operating factories of the A.E.A.'s Industrial Group. In the case of the A.E.A.'s other groups, arrangements for liaison with local bodies were being reviewed.

(5) Since it was answerable at Common Law for damage caused by negligence, the Authority would consider claims from persons providing evidence of hurt or damage.

First Report of Penney Committee.

The committee reached the conclusion—as mentioned in Mr. Macmillan's memorandum—that the immediate cause of the accident was the application "too soon and at too rapid a rate" of a second nuclear heating in the course of the process known as the "Wigner release." Of this latter process, the report stated that it had first occurred spontaneously in the No. 1 pile in September 1952. Thereafter, a controlled procedure for the operation had been worked out and, up to the end of 1956, had been applied eight times without mishap. On three of these occasions, a second nuclear heating had been found necessary in order to ensure the release of all the so-called "Wigner" energy accumulated in the graphite. On the present occasion, however, two "distinct and separate faults of instrumentation" had affected the efficacity of the second nuclear heating. In the first place, the uranium thermocouples [electric thermometers] were situated in the region of highest uranium temperatures during normal operations and not at the position of maximum uranium temperatures during the "Wigner release." Secondly, the pile power meter, while correct for normal operations, read low in the situation then prevailing. The committee had been unable to decide whether the fire had started in uranium fuel cartridges or in some lithium-magnesium cartridges that were in the reactor at the time ; it believed, however, that the former was probably the case. The report also observed that the physicist in charge who had decided on a second nuclear heating had neither a pile-operating manual, with special sections on Wigner release, to help him, nor the benefit of sufficiently detailed instructions.

As regards the steps taken to deal with the accident once it had been discovered, the report stated that these had been prompt and efficient and had shown great devotion to duty on the part of all concerned.

Second Report of Penney Committee.

Dealing with the measures taken to protect the factory staff and the public, this report noted that extra staff had been called in to deal with any severe cases of exposure to radiation, but that no such cases had in fact occurred. Over the 13-week period up to Oct. 24, only 14 workers concerned in the accident had exceeded the normal permissible level of body radiation. These workers had accordingly been taken out of contact with work involving radiation.

On the question of the emission of radio-active iodine, the report stated that a survey of the activity of this substance in the thyroid glands of workers had found levels as high as 0.5 micro-curies. While noting that the standard level for safe continuous and constant iodine activity in the adult thyroid gland was 0.1 micro-curies, the report added that "since iodine had a short life, some increase over the level can properly be made if the dose occurs on a single occasion."

As regards possible hazards to the public in the area, the committee found that the health physics manager of the Windscale plant had correctly assessed the situation arising from the accident by deciding that there was unlikely to be any danger from irradiation or inhalation, but that there was cause for concern with respect to the ingestion of contaminated food. For this reason arrangements were made for the analysis of milk from farms in the area, and a ban was subsequently imposed on its distribution.

Report of Medical Research Council's Committee.

The report of this committee (which was headed by Sir Harold Himsworth, the Council's secretary) described it as "in the highest degree unlikely that any harm had been done to the health of anybody," whether a worker in the plant or a member of the public. Further conclusions reached by the committee were :

(1) The highest levels of radio-strontium in locally produced milk were "well below those at which an appreciable hazard would arise even if such milk were consumed over a period of years." The radio-strontium levels in some samples of grass from certain occasional pastures indicated, however, that a watch should be kept on milk from such places.

(2) "Certain weaknesses in organization were apparent after the event, notably the delay between recognizing the existence of an accident which might lead to the emission of radio-active substances and the starting of an extensive and rapid milk-sampling programme."

(3) "Certain gaps in our scientific knowledge were revealed and require early attention."

Report on Differences between Windscale and other Reactors.

This report explained why "the accident which happened at Windscale could not happen with the Calder Hall reactors or with the reactors being built for the electricity authorities." The reasons given were as follows :

"(1) The new reactors are cooled by carbon dioxide, which does not react with uranium until the temperature is greater than 650 deg. Centigrade. The air used at Windscale for cooling can react with uranium at 350 degrees.

"(2) The new reactors will use carbon dioxide circulating in a closed circuit for cooling, so that there will be no discharge into the atmosphere.

"(3) The arrangements for detecting burst fuel elements are superior.

"(4) The cartridges which contain the uranium are of better design.

"(5) The instrumentation at Calder Hall and other civil reactors is much improved."

Mr. Macmillan announced in the House of Commons on Nov. 8 (the day of the publication of the White Paper) that three committees had been appointed, each under the chairmanship of Sir Alexander Fleck (chairman of Imperial Chemical Industries Ltd.) in order to ensure that the lessons learnt from the Windscale accident should be "fully digested and applied." The committees in question were :

(1) A Technical Evaluation Committee, which would "study the information relating to the design and operation of the Windscale piles which is to be derived from the accident."

Its members were : Sir Alexander Fleck ; Sir John Cockcroft (director of the Atomic Energy Research Establishment at Harwell) ; Sir William Penney (director of the Atomic Weapons Research Establishment at Aldermaston) ; Dr. R. Spence (chief chemist of

the A.E.R.E., Harwell); Professor J. Diamond (Professor of Mechanical Engineering, Manchester University); Professor J. M. Kay (Professor of Nuclear Engineering, Imperial College of Science); and Professor H. W. B. Skinner (Professor of Physics, Liverpool University).

(2) An Organizations Committee, which would "review organization and staffing in the operations branch of the industrial group of the A.E.A. and of staff operating reactors in the research group."

Membership—Sir Alexander Fleck; Sir William Penney; Mr. C. F. Kearton, a director of Courtauld's [the textile concern] and a member of the A.E.A.

(3) A Health and Safety Committee, which would "review the organization within the Authority as a whole for control of health and safety."

Membership—Sir Alexander Fleck; Sir William Penney; Sir George Barnett (Chief Inspector of Factories); and Dr. J.S. Carter (Chief Alkali Inspector, Ministry of Housing and Local Government).

It was subsequently announced that Professor B. W. Windeyer (Professor of Radiology at London University) had agreed to join this committee, following a suggestion by Sir Alexander Fleck that it would be valuable if a medical expert were added to it.

Normal collection and distribution of milk was authorized by the Ministry of Agriculture, Fisheries and Food as from Oct. 31 for an area south and east of Windscale comprising 538 of the 977 farms originally affected; from Nov. 4 for part of the restricted area lying in Lancashire; and from Nov. 23 for all the remaining parts of the area.

(Prev. rep. 15806 A.)

A. NEPAL. — Postponement of General Elections. - Resignation of Dr. Singh. - King Mahendra assumes Personal Rule. - Creation of National Advisory Council.

The Nepalese Government announced on Sept. 30 that the country's first general elections, which had been fixed for Oct. 8, would be postponed indefinitely as the previous Government had neglected to obtain ballot-boxes, paper for the electoral rolls, and other necessities. The Democratic Front (the alliance formed by the three leading Opposition parties) subsequently decided on Oct. 10 to launch a nation-wide civil disobedience campaign as from Dec. 8 to secure early elections; it also demanded the appointment of an independent and impartial electoral commission to make preparations for such elections.

King Mahendra announced on Nov. 14 that he had accepted the resignation of the Prime Minister, Dr. K. I. Singh, and would himself take over the administration for the present. Although no official reason was given for Dr. Singh's sudden resignation, it was generally believed to be connected with a purge of corruption in the Civil Service, during which he had appointed his own nominees to senior posts and had proposed to remove a number of officials appointed by the King. Dr. Singh was also reported to have offended the Indian Government by his "isolationist" foreign policy, his opposition to any foreign aid, including aid from India, and his decision to substitute a two-year economic plan prepared by himself for the five-year plan drawn up by Indian experts.

A new National Council with advisory functions took office on Dec. 1. [The formation of this body, which was to have aided and advised the Singh Government, had been announced on Sept. 8 but the Council had never met during Dr. Singh's premiership.] Prince Basundhara, the King's youngest brother, was appointed chairman of the Council, which included Mr. Arun Shamshere (King Mahendra's brother-in-law) as the King's nominee and the Chief Justice as *ex-officio* member. The Council, appointed for a period of five years, will advise King Mahendra on internal security, law and order, and general administration.—(The Statesman, Calcutta - Times)
(Prev. rep. 15741 A.)

B. UNITED KINGDOM. — Ending of Presentation Parties for Debutantes. - Additional Garden Parties.

It was announced on Nov. 4 from Buckingham Palace (1) that the Queen had decided that no further presentation parties for debutantes would be held after 1958; and (2) that her Majesty proposed instead to hold more garden parties "in order that larger numbers may be invited to Buckingham Palace." It was understood that the Queen felt that by holding more garden parties, more people from Britain and the Commonwealth would be able to meet her and the Duke of Edinburgh. The last presentation parties for debutantes will be held at Buckingham Palace and Holyroodhouse in 1958.
(Times - Daily Telegraph)

C. ITALY - TURKEY. — President Gronchi's Visit to Turkey. - Italo-Turkish Declaration on Political, Economic and Cultural Co-operation.

President Gronchi of Italy, accompanied by Signor Pella (the Deputy Premier and Foreign Minister), visited Turkey from Nov. 11-15. During their stay in Ankara (Nov. 12-14) they had a number of discussions with President Bayar and M. Menderes, the Turkish Prime Minister, an official statement saying that the talks had been marked by "great cordiality." On Nov. 14 President Gronchi and Signor Pella left Ankara for Istanbul, accompanied by President Bayar and M. Menderes. A joint statement was issued at the conclusion of the visit on Nov. 15, as summarized below:

The International Situation. The statement said that there had been "full unanimity of views on major world problems, and especially on topics of mutual interest to the two friendly and allied countries." Both sides had explained "with frankness" the measures which they considered "most appropriate for the removal of the present tension and for peace and security in the world and especially in the Mediterranean region"; with this end in view they had expressed their determination "to make every effort for the creation of harmonious and fruitful co-operation in the Mediterranean region," and had agreed on continuous exchanges of information and consultations between the two countries. Both sides had reaffirmed the principles of the U.N. Charter and were agreed on "the necessity for making the United Nations ever stronger." At the same time they would "remain completely loyal to those alliances to which they belonged."

NATO. "The two sides agreed that NATO, of which they are two leading members, has decidedly helped to preserve world peace," and firmly believed that "this essential defence organization ... will be a very effective factor in the future for guaranteeing peace and achieving progress and freedom." They were "in complete agreement that the defensive force of the alliance should be strengthened by increasing political consultations on the basis of the full equality of its members, and by applying Article 2 of the North Atlantic Pact in a steadily expanding form in order to secure the development of healthy economic co-operation."

The communiqué added: "In view of the continued propaganda of the opponents of NATO, Turkey and Italy stress the need for increased enlightenment of public opinion in all countries about the exclusively defensive aims of the pact, which, in addition to guaranteeing peace, greatly helps the economic and social progress of its member-countries. The main aim of the forthcoming Atlantic Council meeting must be the strengthening of the Atlantic alliance ... by fully developing common defence plans and by strengthening the mutual ties among the Allies ..."

Middle East. The "consolidation of security and tranquillity in the Middle East" conformed to the common interests of both countries. "Italy and Turkey are convinced that security in the Near East is necessary to complete the security of the West and of Europe, and that an atmosphere of complete confidence must be created in the region in order to achieve this ... The clandestine or open interference of States adhering to the Soviet system, which pursue the aim of establishing complete influence over the Arab countries, and which espouse doctrines alien to the traditions of the West and of the Christian and Moslem worlds, greatly handicaps the creation of such confidence ... The gradual solution of the urgent and difficult problems in the Arab countries will help to consolidate peace in the Middle East. In this connexion the two parties, having noted that the Israeli question is a factor of confusion in the area, agree that it is essential to bring about a satisfactory solution of this problem ..."

Italo-Turkish Relations. After referring to the existing high level of Italo-Turkish trade exchanges, and stating that negotiations would be held with a view to increasing them still further, the communiqué said that Italy would "continue to provide Turkey with means of production and technical aid with a view to contributing to her industrial equipment." Both countries had agreed to direct their economic co-operation towards the development of Turkey's natural resources, minerals, and agriculture, which were "of particular interest to the Italian economy." In addition they would study the possibilities of co-operating in the irrigation and development of the Konya Plain in Anatolia. Both sides had confirmed their intention to develop their economic co-operation within the framework of the multilateral economic agreements linked with European economic integration. It had also been agreed to establish closer cultural relations.

It was agreed during the Italo-Turkish discussions that a greater number of scholarships would be awarded to enable Turkish students to study at Italian universities; in addition, Turkish students would receive greater facilities to complete their scientific and professional training in Italy.

(Prev. rep. 15837 A; 14050 F.)

D. AUSTRALIA. — Petrov Case. - Identification of Soviet Espionage Agents.

The Federal Prime Minister, Mr. Menzies, stated in a written parliamentary reply on Oct. 8 that Mr. Vladimir Petrov and Mrs. Petrov had identified 522 espionage agents throughout the world since they had received political asylum in Australia.
(Times) **(Prev. rep. Petrov Case, 14523 A.)**

A. UNITED KINGDOM - UNITED STATES. — Co-operation in Thermonuclear Research.

British and U.S. scientists attending a conference on controlled thermonuclear research, held at Princeton University on Oct. 17-18, issued a joint statement on the latter date which indicated that recent experiments in both countries "suggested" the achievement of controlled thermonuclear reactions—i.e. the release of nuclear energy which might eventually be used for the generation of electric power. The statement ran as follows :

"Several essentially distinct approaches to solving the problems of controlled thermonuclear reaction are being pursued in the U.K. and the U.S.A. Some of the experimental devices utilized have, for some months, been yielding substantial numbers of neutrons from the interior gas ; in the other machines there has been confinement of very hot gases for a small fraction of a second.

"There are two main conditions necessary for the attainment of power-producing thermonuclear reaction. First, heavy hydrogen must be heated to a temperature of at least 100,000,000 degrees Centigrade. Second, this hot gas must be confined within a container for an appreciable fraction of a second. When the temperature reaches several million degrees Centigrade, neutrons will be emitted in large numbers.

"At this lower temperature it is a delicate and difficult matter to distinguish the neutrons produced by thermonuclear processes from those arising from other processes not of particular interest for controlled thermonuclear reaction. Since neutrons are similar, their mode of origin has to be established by elaborate experiments. Such experiments are in progress in both countries.

"Reports at the meeting in Princeton on the temperatures reached in controlled thermonuclear experiments in the U.K. and the U.S.A. suggest the achievement of neutrons from thermonuclear reaction, but more experimental work will be necessary to establish this as a fact. The realization of the production of thermonuclear neutrons, if definitely established, would be only a step—although an important one—in the long-range efforts to develop thermonuclear reactors for the production of economic power."

Following the arrival of Sir Edwin Plowden (chairman of the U.K. Atomic Energy Authority) in the U.S.A. for discussions with Rear-Admiral Lewis Strauss (chairman of the Atomic Energy Commission), a statement was issued by the two bodies on Nov. 22 which rejected "seriously misleading" observations in the Press about British and U.S. thermonuclear researches.

The statement referred to the Anglo-U.S. co-operation agreement for exchange of information on research in the field of controlled thermonuclear reactions ; recapitulated the conclusions of the Princeton meeting ; and continued : "Progress in the various experimental approaches to controlled thermonuclear reactions, both in terms of negative findings and positive findings, is promptly communicated between the two nations. Thus the U.S.A. benefits from the research results of the approaches being taken by the British, and the results of the work on the half-dozen or so approaches in the U.S.A. benefit the U.K. There have been statements in the news recently that have made unfortunate and confusing comparative observations about the U.K. and the U.S. programmes in this field. Such observations are not only inappropriate in co-operative programmes of this kind but are seriously misleading."

The Princeton conference had been arranged jointly by the U.S. Atomic Energy Commission and the U.K. Atomic Energy Authority to exchange information under the Anglo-U.S. co-operation agreement on the civil uses of atomic energy. It followed earlier meetings at Harwell in June and at Berkeley, California, in February.—(Times - New York Times)

(Prev. rep. 15596 A.)

B. IRISH REPUBLIC. — Cabinet Changes.

The following Cabinet changes were made by Mr. de Valera on Nov. 27-28 following the death on Nov. 16 of Senator Sean Moylan (68), the Minister of Agriculture : (*a*) Mr. Patrick Smith, Minister of Local Government and Social Welfare, became Minister of Agriculture in succession to the late Senator Moylan ; (*b*) Mr. Neal Blaney, Minister of Posts and Telegraphs, succeeded Mr. Smith as Minister of Local Government ; (*c*) Mr. Sean MacEntee, the Minister of Health, became additionally responsible for Social Welfare ; (*d*) Mr. Sean Ormonde, a Fianna Fail deputy for Waterford, became Minister of Posts and Telegraphs *vice* Mr. Blaney.—(Irish Times, Dublin)

(Prev. rep. Cabinet, 15429 A.)

C. POLAND - UNITED KINGDOM. — Agreement on Direct London-Warsaw Air Service.

It was announced in London and Warsaw on Nov. 27 that Britain and Poland had agreed on the conditions for a direct air service between London and Warsaw, to be operated by British European Airways (BEA) and the Polish Air Line (LOT) and to start not later than April 1, 1958.

(Times - Polish Embassy Press Office, London)

D. EGYPT.—Soviet and Czechoslovak Economic Aid. - General Amer's Visit to Moscow.

The Egyptian War Minister and Supreme Commander of the combined Egyptian and Syrian armed forces, Major-General Abdel Hakim Amer, arrived in Moscow on Nov. 1 as the guest of the new Soviet Defence Minister, Marshal Malinovsky. During his stay in the Soviet Union, which lasted until Nov. 20, General Amer had a number of discussions with M. Khrushchev, Marshal Bulganin, M. Mikoyan, Marshal Malinovsky, M. Gromyko (Foreign Minister), M. Semeonov (Deputy Foreign Minister) and other Soviet leaders ; attended the celebrations of the 40th anniversary of the October Revolution (see 15899 A) as Egypt's official representative ; inspected military camps and defence installations ; and watched Soviet Army manoeuvres.

The Middle East News Agency in Cairo (a Government-sponsored undertaking) announced on Nov. 20 that, as a result of General Amer's talks with the Soviet leaders, the Soviet Government had agreed to provide Egypt with economic aid amounting to 700,000,000 roubles (over £60,000,000 at the official exchange rate). The aid would be used for Egypt's five-year industrialization programme, and Egypt would start repayment of the credits received after five years, in annual instalments spread over a 12-year period.

The fact that the Soviet Union had agreed to aid Egypt in building up her national economy had first been mentioned the previous night by Marshal Bulganin at a reception for General Amer in the Kremlin. Marshal Bulganin gave no details, but said that the discussions with General Amer had been devoted mainly to economic questions, and that the Soviet aid would be rendered in response to a request from President Nasser and General Amer. Prior to the reception M. Khrushchev, Marshal Bulganin, M. Mikoyan, M. Gromyko, and Marshal Malinovsky had had a final meeting with General Amer which was stated to deal with political and economic co-operation as well as military questions.

It was confirmed in Cairo on Nov. 25 that, during a visit to Prague in September by the Egyptian Ministers of Finance (Dr. Kaissouni) and Industry (M. Aziz Sidki), an agreement had been concluded with the Czechoslovak Government under which the latter would grant Egypt economic aid to the equivalent of £22,000,000 in the form of credits for the supply of capital equipment in connexion with Egypt's industrialization programme. The terms of the credits were said to be the same as those extended to Egypt by the Soviet Government. (Soviet Embassy Press Dept., London - Times - Le Monde, Paris - Manchester Guardian) **(Prev. rep. 15599 A ; 14697 B.)**

E. KASHMIR. — Split in National Conference. - Formation of Democratic National Conference.

A new party, the Democratic National Conference, was formed in Kashmir on Sept. 6 by Mr. G. M. Sadiq and Mr. D. P. Dhar, the former leaders of the left-wing of the Kashmir National Conference, who had resigned from that party's executive on Aug. 6.

Mr. Sadiq and Mr. Dhar had announced their intention to form an Opposition party in Kashmir on Aug. 18, after discussing the situation in the State with the Indian Premier, Mr. Nehru (who advised them against the formation of a new party) and with leaders of the Congress, Praja Socialist, and Communist parties. At a press conference in Delhi, Mr. Sadiq said that the reason for the crisis inside the National Conference in 1953 was that all power had passed into the hands of Sheikh Abdullah, then Prime Minister of Kashmir. After his arrest collective leadership had been re-established for about a year, but since then power had again been concentrated in a few hands. As an example of why he found it impossible to work inside the National Conference, Mr. Sadiq stated that when he addressed a meeting on Aug. 13 the police had forcibly broken it up and had afterwards made many arrests.

The new party was joined by many leading members of the National Conference, including 14 members of the State Legislative Assembly, two members of the Legislative Council, and seven of the 19 members of the Jammu provincial committee. Mr. Sadiq stated on Sept. 6 that the party would not be affiliated to any party in the rest of India, but would be influenced by democratic and secular parties like the National Congress. A policy declaration, adopted at the new party's inaugural convention at Srinagar on Oct. 19-20, expressed complete support for Kashmir's accession to India and for the State Constitution ; demanded the withdrawal of all Pakistani forces from Kashmir and the restoration of the integrity of the State ; rejected any suggestion of a plebiscite on the future of Kashmir ; and pledged the party to work for the establishment of a socialist society and the implementation of the democratic liberties guaranteed in the Indian Constitution.

(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 15691 A.)**

DECEMBER 14—21, 1957

A. NEW ZEALAND. — Labour Victory in General Election. - Resignation of Mr. Holyoake. - Mr. Walter Nash becomes Prime Minister. - New Government.

General elections held in New Zealand on Nov. 30 resulted in the defeat of the National Party (which had been in office since 1949) and the return of the Labour Party to power after eight years. Labour won 41 seats in the 80-member House of Representatives and the National Party 38, with one result outstanding—at Clutha (South Otago), where the Labour candidate was killed in a road accident the day before the election. There will be a by-election at Clutha—which is regarded as a safe National seat—on Jan. 18, 1958.

A total of 259 candidates was nominated for the 80 seats—240 candidates for the 76 European seats and 19 for the four Maori constituencies. The Labour, National, and Social Credit parties contested every seat, and there were also two Liberals, five Communists, and various Independent candidates. The total electorate numbered about 1,250,000, including 42,926 Maori voters enrolled in the four Maori constituencies.

Prior to the elections, certain changes in the distribution of parliamentary constituencies had been carried out on the recommendation of the Representation Commission, which meets periodically to adjust the distribution of electorates according to population trends. The most important changes were (1) the creation in North Island of the new constituency of Piako, in the rapidly-growing area of South Auckland; (2) the suppression of the former constituency of Oamaru (South Island), most of whose territory was distributed between the neighbouring constituencies of North Dunedin and Central Otago, (3) the renaming of the former constituency of Waimate (South Island) as Waitaki, and its expansion so as to take in part of the former Oamaru division.

The total number of votes cast was 1,045,619 (provisional figures), representing over 94 per cent of the electorate. Distribution of votes between the parties was as shown below, comparison being given with the last (1954) elections :

	1957		1954	
	Seats*	Votes†	Seats	Votes
Labour Party	41	508,981	35	437,843
National Party	38	458,801	45	484,619
Social Credit	—	75,135	—	112,488
Others	—	2,702	—	8,407

*One result outstanding at Clutha, as stated above.

†Subject to final adjustment—notably in respect of postal ballots cast by N.Z. citizens living in Commonwealth and foreign countries, and N.Z. forces serving overseas. New Zealanders living abroad were able to register their votes at N.Z. embassies, legations or (in the case of Commonwealth countries) High Commissioners' offices—e.g. New Zealand nationals in Britain could vote personally or by post at New Zealand House in London.

The Labour Party increased its poll by over 70,000 as shown, its proportion of the total being 48.67 per cent—an increase of over four per cent compared with 1954. The six seats won by the Labour Party from the Nationals were Nelson, St. Kilda (Dunedin), St. Albans (Christchurch), Lyttelton, Tamaki (Auckland) and Roskill (Auckland). All leading members of the party were re-elected, Mr. Walter Nash (the party leader) being returned with an increased majority for the Hutt constituency.

The National Party, though losing the election, polled over 24,000 more votes than in 1954; moreover, its proportion of the total poll (44.12 per cent) was slightly higher than in that year. Two Ministers of the outgoing National Government lost their seats—Mr. E. H. Halstead (Commerce and Industries) and Mr. John Rae (Housing), who were defeated by Labour candidates at Tamaki and Roskill respectively. Mr. Keith Holyoake, the party leader and outgoing Prime Minister, was re-elected with an increased majority in the Pahiatua constituency. Mr. J. T. Watts, Minister of Finance in the National Government, was returned for Sir Sidney Holland's former constituency of Fendalton.

Social Credit candidates polled 37,000 fewer votes than in 1954, many of them losing their deposits; the Social Credit proportion of the total poll (7.21 per cent) showed a drop of four per cent compared with 1954, when the party received 11.3 per cent of the votes on its first appearance at the polls. The highest Social Credit vote (3,167) was at Wanganui. Mr. John Owen, the party leader, polled 931 votes at Lyttelton.

The candidates grouped under "others" polled negligibly—all five Communist candidates losing their deposits and polling only 648 votes between them.

The electoral programmes of the two major parties were as summarized below :

Labour Party. In a speech on Nov. 5, Mr. Walter Nash pledged a Labour Government to introduce a number of concessions and social benefits if it were returned to power—notably, a £100 income-tax rebate when the pay-as-you-earn system was introduced in February 1958. This pledge—one of the central issues in the election, and popularly known as "Walter's £100"—related to legislation, previously introduced by the National Government, which provided for the application of the P.A.Y.E. system early in the New Year. The legislation had laid down (*a*) that the tax on a complete year's income would be extinguished when P.A.Y.E. came into effect in February 1958; and (*b*) that tax would be paid on income earned in the year ended March 31, 1957 (less a rebate of 25 per cent, with a limit of £75). Mr. Nash, however, said that if Labour came to power it would not only extinguish the tax on a complete year's income, as proposed by the National Government, but would give a rebate of £100 in addition before the P.A.Y.E. system came into operation.

Mr. Nash also pledged the Labour Party to increase old-age benefits from their present level of £3. 17s. 6d. a week to £4 a week (payable at 60 years of age subject to a means test, and at 65 without means test); to raise children's allowances from 10s. to 15s. a week, tax-free; to grant long-term loans at 3 per cent per annum for persons wishing to build their own homes; and to provide guaranteed prices for butter, cheese, and other farm products if desired by the producers. On financial policy generally, he said that Labour was opposed to overseas borrowing and saw no necessity for New Zealand to join the World Bank or the International Monetary Fund.

The party's election manifesto said that a Labour Government would abolish conscription and concentrate on building up small, fully-equipped military forces with the necessary naval and air support. It would also oppose all further tests of nuclear weapons and support an international agreement for the prohibition and destruction of such weapons.

National Party. Mr. Keith Holyoake, in a speech on Nov. 4, pledged the National Party to introduce the following benefits if returned to office : abolition of the means test from the age of 65 for Social Security beneficiaries; a grant of £25 to the parents of every child starting secondary school, to assist in buying books, school uniforms, etc.; encouragement of house-building and home ownership by offering loans of up to 100 per cent of the building cost of new houses, with a limit of £2,500, and income-tax concessions amounting to £6,500,000, associated with the introduction of P.A.Y.E. in 1958.

In addition, the party's manifesto pledged a National Government to expand multilateral trade over as wide a range as possible, while paying special regard to Commonwealth preference; to establish an economic advisory council to advise the Government on financial and economic matters; and to protect exporters against payment defaults by foreign buyers.

The National Party, like the Labour Party, expressed full support for the "Welfare State," while stressing that further social security benefits should be accompanied by increased production. In this connexion the Labour proposals—and, in particular, "Walter's £100"—were criticized on the ground that they would cost about £60,000,000 to implement. The National Party's manifesto said that it would be "a special objective of government financial policy to ensure that the creation and issue of money should be related to the production of additional goods and services, safeguarding the value of all earnings, savings and other income."

Mr. Nash formally took office as Prime Minister on Dec. 11 after Mr. Holyoake had tendered the National Government's resignation to the Governor-General, Viscount Cobham. The new Labour Government was announced on the following day, allocation of portfolios being as follows :

Mr. Walter Nash	Prime Minister, External Affairs, and Maori Affairs.
Mr. C. F. Skinner ..	Deputy Premier, Minister of Agriculture and Lands.
Mr. A. H. Nordmeyer ..	Finance.
Mr. H. G. R. Mason ..	Attorney-General, Justice, and Health.
Mr. F. Hackett	Labour, Mines, and Immigration.
Mr. W. A. Fox	Marine, Housing, and State Advances.
Mr. Hugh Watt	Works.
Mr. Eruera Tirikatene ..	Forests, and Associate to the Minister for Maori Affairs.
Mr. P. G. Connolly ..	Defence, Police, and War Pensions.
Mr. Michael Moohan ..	Postmaster-General and Minister of Railways.
Mr. Philip Holloway ..	Industries, Commerce, and Scientific and Industrial Research.
Mr. P. O. S. Skoglund ..	Education.
Miss Mabel Howard ..	Social Security, and Welfare of Women and Children.
Mr. John Mathison ..	Transport, Civil Aviation, Island Territories, and Tourist and Health Resorts.
Mr. Raymond Boord ..	Customs, Marketing, and Broadcasting.
Mr. W. E. Anderton ..	Internal Affairs.

Mr. Walter Nash (75) was Minister of Finance in the N.Z. Labour Government from 1935 until 1949, except in 1942-44 when he served as New Zealand's first Minister to the United States. As the first Labour Minister of Social Security he piloted through the House the Social Security Act which forms the basis of the Dominion's "Welfare State." He has also held the portfolios of Census and Statistics, Public Service Superannuation, Land and Income Tax, and Stamp Duties, and was a member of the N.Z. War Cabinet throughout the Second World War. He became a Privy Councillor in 1946.

Born in England (at Kidderminster) in 1882, he entered a cycle manufacturing business in Birmingham as an office-boy, rising to become chief of the firm's costing and analysis department. He subsequently went into business on his own account, emigrated to New Zealand in 1909, and represented English manufacturers for some years. He entered Parliament in 1929 (for the Hutt constituency, near Wellington, which he has represented ever since), specialized in financial and economic questions, and became Minister of Finance when the first Labour Government was formed in December 1935. Apart from the Social Security legislation referred to, he was also closely connected with the acquisition by the State of the remaining privately-owned shares in the Bank of New Zealand, the nationalization of the airways, the financing of hydro-electric schemes and other public works, and the rehabilitation of ex-servicemen. National secretary of the N.Z Labour Party from 1922-32, and president in 1935-36, Mr. Nash became leader of the party—and concurrently of the Opposition—on the death of Mr. Peter Fraser in 1950.

Short biographies of the other Labour Ministers are given below :

Mr. Skinner (57), a former carpenter and farmer, was Minister for Rehabilitation (of ex-servicemen), Lands, and State Forests in the last Labour Government. He served with distinction in the Middle East in World War II, rising to the rank of major, being wounded, and winning the Military Cross and mention in despatches. He is M.P. for Buller (South Island).

Mr. Nordmeyer (56) was Minister of Health from 1941-47 and of Industries and Commerce from 1947-49 A former Presbyterian clergyman, he resigned his pastorate in 1935 to contest the Oamaru seat for Labour. He has been M.P. for Island Bay (Wellington) since 1949.

Mr. Mason, Q.C. (72), was Attorney-General and Minister of Justice from 1935-49, Minister of Education from 1940-47, and Minister for Native Affairs until 1946. He is M.P. for Waitakere and was formerly in legal practice in Auckland.

Mr. Hackett (56) was Minister of Transport and Marine and Postmaster-General from 1946-49. Born in England, he served in the Royal Navy and the Merchant Navy in World War I before emigrating to New Zealand in 1921. A trade union official, he is M.P. for Grey Lynn.

Mr. Fox (58) was also born in England and served in the Royal Naval Reserve and the Merchant Navy in World War I. A vice-president of the N.Z. Federation of Labour, he has had long association with trade union affairs. He is M.P. for Miramar (Wellington).

Mr. Watt (44) is head of an engineering and sheet-metal business and M.P. for Onehunga (Auckland). Born in Australia, he came to New Zealand with his parents in 1914.

Mr. Tirikatene (62), a Maori, served in the N.Z. Medical Corps in 1914-18, subsequently qualified as a marine engineer, and later became a farm manager. He has done much work for the Maori community, having been an evangelistic preacher in the Rangitikei district and a promoter of Maori development in agriculture and handicrafts. Elected for the South Maori constituency in 1932, he was Cabinet Minister in charge of Maori affairs from 1943-49.

Mr. Connolly (58) served in the Royal New Zealand Navy in World War II, commanding the frigate H.M.N.Z.S. *Moa* and winning the D.S.C. A marine engineer by profession, he is M.P. for Dunedin Central.

Mr. Moohan (58) is a prominent trade unionist and current president of the N.Z. Labour Party. Born in Northern Ireland, he served in the Royal Engineers in 1914-18, emigrated to New Zealand after demobilization, and entered the Post and Telegraph Department. He is M.P. for Petone (near Wellington).

Mr. Holloway (40), the youngest member of the Cabinet, is a manufacturers' representative and has been an M.P. for only three years (his constituency is Heretaunga, near Wellington). A graduate of Otago University, he subsequently studied in the U.S.A. and at the London School of Economics. During World War II he served with the New Zealand Division in Italy.

Mr. Skoglund (58), a retired schoolmaster, has been M.P. for Palmerston North since 1954.

Miss Mabel Howard (63) was Minister of Health and Child Welfare from 1947-49, being the first woman in New Zealand to become a Cabinet Minister. She is M.P. for Sydenham (Christchurch), and has done much welfare work for women and children.

Mr. Mathison (56) was born in Glasgow and worked in the Scottish woollen mills before emigrating to New Zealand in 1925. After working on the Christchurch tramways he joined the publishing staff of the Christchurch *Star-Sun* and later became circulation manager for the Labour daily newspaper, the *Southern Cross*. He is M.P. for the Avon constituency.

Mr. Boord (49), M.P. for Rotorua, was a sheep-farmer for 13 years prior to becoming an organizer and research officer for the Labour Party. He served with the New Zealand Division in the Middle East in World War II, rising from private to lieutenant-colonel and commanding the 24th (Auckland) Battalion.

Mr. Anderton (65), a former Methodist preacher, was born in Birmingham and emigrated to New Zealand after serving with the Royal Field Artillery in the 1914-18 war. His constituency is Auckland Central.

As the Speaker of the new House is expected to be drawn from the Labour Party, and as the National Party is expected to win the Clutha by-election, it was considered probable that Mr. Nash would have a working majority of only one vote in the new House of Representatives.—(The Dominion, Wellington - Directorate of Information, Wellington)

A. UNITED KINGDOM. — Esso Oil Refinery for Milford Haven. - Milford Haven Conservancy Bill.

Mr. Henry Brooke, the Minister of Housing and Local Government, approved on Nov. 4 the construction by the Esso Petroleum Company at Herbrandston, on the north shores of Milford Haven, of an oil refinery and deep-water berths able to accommodate tankers of 80,000-100,000 tons capacity. The refinery will have an initial capacity of about 5,000,000 tons a year, and is expected to cost about £20,000,000 and to be completed by 1961. The products of refining—chiefly petrol, octane spirit, and oil fuel—will be shipped to other British ports in coastal tankers.

The Minister's decision followed the holding of a public inquiry into an application by the Esso Company to the Pembrokeshire County Council in respect of an area of about 1,000 acres. Local opposition to the scheme had centred on grounds of amenity (much of the proposed site lying within the Pembrokeshire National Park) and on the danger to the wild life of Milford Haven and adjacent bird sanctuaries through oil pollution. In his statement Mr. Brooke explained that he did not consider that the damage to the Park's amenities which might be caused by the industrialization of a small section of it could be regarded as sufficiently serious to warrant refusal of consent. On the other hand he felt that the erection of the proposed refinery was in the national interest, and that to site it at a considerable distance from the import jetties (e.g. in the Swansea-Llanelly area, as had been suggested) and connect the refinery and jetties by a pipe-line would heavily increase the cost of the project. The refinery would not be visible from most of the Pembrokeshire coast outside Milford Haven itself - i.e. from the greater part of the area which the National Park had been established to protect and the Minister had every reason to suppose that it would be operated with particular care to avoid the fouling of the waters of Milford Haven by oil. As the special circumstances made the detailed siting of structures particularly important, permission for the refinery had been given subject to its erection on an area of not more than 350 acres to be approved by the Minister. The lay-out and design of buildings and structures would also be subject to ministerial approval.

The Milford Haven Conservancy Bill, authorizing the setting-up of a Milford Haven Conservancy Board of 17 members, including representatives of owners of waterside frontages, shipowners, the Admiralty, and the Pembrokeshire County Council, was given unopposed second and third readings in the House of Commons on Nov. 22 and Dec. 11 respectively. The Conservancy Board will have the duty of maintaining, improving, protecting, and regulating navigation in the Haven, and will have powers to borrow up to £1,000,000 in its first six years by loans or the issue of stock.
(Times - Daily Telegraph - Manchester Guardian)

B. PITCAIRN ISLAND. — Finding of Wreck of the "Bounty."

The remains of Captain Bligh's ship, the *Bounty*, which was scuttled in 1790 by Fletcher Christian and his fellow-mutineers, were discovered in November by Mr. Louis Marden, an undersea photographer on the staff of the *National Geographic Magazine*. The wreck was located in Bounty Bay at a depth of 30 feet by Mr. Marden and two young Pitcairners after several weeks of aqualung diving. Part of the ship's hull was embedded in coral, the finds including hull fittings, an oarlock, and fragments of copper with which the *Bounty* had been sheathed. The inhabitants of Pitcairn Island (about 150) are mostly descended from the *Bounty* mutineers and Tahitian women who fled with them to Pitcairn.—(New York Times)

C. SOVIET UNION. — Atomic Ice-breaker.

The Soviet atomic ice-breaker *Lenin*, the first of its kind in the world, was launched at Leningrad on Dec. 5. Displacing 16,000 tons, she is 440 feet in length with a 90-foot beam, has an engine-power of 44,000 h.p., and a speed in ice-free water of 18 knots ; she will be able to break through ice six feet thick, and to cruise for more than a year without refuelling. The heat produced by the atomic reactor will convert water into high-pressure steam ; this steam will drive the turbo-generators, and the power thus generated will drive the electric motors connected with the screw.—(Soviet Embassy, London)

A. UNITED STATES. — The Civil Rights Act.

Major legislation relating to civil rights was passed by Congress during 1957, for the first time since the reconstruction era after the Civil War [when the Northern States favouring the protection and extension of Civil Rights were overwhelmingly preponderant in Congress]. On all previous occasions Civil Rights legislation had been defeated in the Senate, where the Southern States opposing Civil Rights are more effectively represented than in the House of Representatives. The present Bill, however, was finally passed by the Senate after a number of amendments had considerably reduced its original scope.

The Administration's Proposals.

In his State of the Union message for 1956 (see 14633 A) President Eisenhower had for the first time recommended the creation of a bipartisan commission to examine allegations that Negroes were being denied their voting rights in certain areas. [In his three previous State of the Union messages, the President had always referred only to the use of Executive power to protect Civil Rights, but had never called for any new legislation.] Subsequently (April 9, 1956) the Attorney-General, then Mr. Brownell, submitted Civil Rights legislation to Congress much wider in scope than the President's recommendation (see 15359 A). Although approved by the House of Representatives without any substantial amendments, this measure lapsed with the adjournment of the 84th Congress, since the Senate Judiciary Committee had consistently deferred taking any effective action.

In his State of the Union message for 1957 (see 15350 A), however, the President again urged the enactment of Civil Rights legislation, on this occasion specifically endorsing all proposals previously made by the Attorney-General. Bills embodying these proposals were subsequently submitted to Congress, their main provisions being as follows :

(1) A Commission on Civil Rights would be set up, consisting of six members appointed by the President with the advice and consent of the Senate. Not more than three of these could belong at any one time to the same political party. [There would thus be three Republicans and three Democrats.]

(2) The Commission's functions would be : (*a*) to "investigate allegations in writing under oath or affirmation that certain citizens are being deprived of their right to vote . . . by reason of their colour, race, religion or national origin" ; (*b*) to "study and collect information concerning legal developments constituting a denial of equal protection of the laws under the Constitution" ; and (*c*) to "appraise the laws and policies of the Federal Government with respect to equal protection of the laws under the Constitution."

(3) The Commission could hold hearings and issue subpoenas "for the attendance and testimony of witnesses or the production of written or other matter." In addition to possessing a regular staff, it could also "accept and utilize services of voluntary and uncompensated personnel."

(4) The Commission would submit a series of interim reports to the President and, not later than two years from the date of the enactment of the Bill, a final and comprehensive report. Sixty days after the submission of the final report the Commission would cease to exist.

(5) With the advice and consent of the Senate, the President would appoint an additional Assistant Attorney-General. [Although not specifically stated in the text of the Bill, it was pointed out in the U.S. Press that the new appointee would in fact be in charge of a new and separate Civil Rights Division within the Department of Justice.]

(6) In cases apparently involving a denial of Civil Rights, the Attorney-General could institute "a civil action or other proper proceeding for preventive relief," including an application for a permanent or temporary injunction or restraining order. Federal District Courts would also be entitled to intervene in such cases, whether or not the aggrieved party had "exhausted any administrative or other remedies that may be provided by law."

In the text of the Bill, these provisions took the form of amendments to an earlier section of the U.S. Code (deriving from laws of 1861 and 1871) which laid down that anyone who had been the victim of a conspiracy for the deprivation of civil rights was entitled to institute proceedings against those who had conspired against him. Until Southern opponents of the Bill drew attention to the point in the Senate debate, it was not generally realized that by incorporating these new procedures in existing legislations (instead of merely enunciating them without reference to past statutes), the Administration had in fact acquired the right to use troops to enforce them—another statute having conferred this power on the President with respect to the section of the Code to which the new provisions had been added.

(7) No person would be entitled to interfere with another person's right to vote in any election for a Federal office. In cases apparently involving interference with this right, the Attorney-General and the Federal District Courts would be entitled to intervene as laid down in (6) above.

Passage through House of Representatives.

The Bill was approved by the Judiciary Committee of the House of Representatives on March 18, 1957 with only a few minor modifications, and was debated by the full House from June 6-18.

The principal objection put forward by the Bill's opponents during the House debate was that persons tried for contempt of court following their refusal to comply with injunctions issued at the request of the Federal Government would not receive a jury trial. [Section 3691, Title 18, of the U.S. Code provides that contempt proceedings arising from an action initiated by the Federal Government are heard by a Federal judge sitting alone.] In reply to this objection, Mr. Brownell claimed that the procedure proposed in the Bill was highly desirable, since it was widely agreed that all-White Southern juries would hesitate to convict a White defendant accused of denial of Civil Rights. On June 14 Representative Keeney (Rep., Illinois) put forward a compromise amendment whereby jury trials would be mandatory in those cases in which violators of injunctions had committed a criminal offence under Federal or State law. Although this would have extended the right of jury trial to only a limited number of cases, the amendment was defeated by 199 votes to 167. On the final day of the debate (June 18), a further amendment providing for jury trials in all cases arising under the Bill was also defeated (by 251 votes to 158).

The House approved the Bill in substantially its original form on June 18, by 286 votes to 126. The majority comprised 168 Republicans and 118 Democrats, while the opposition consisted of 107 Democrats and 19 Republicans.

Passage through the Senate.

Meanwhile the Senate Judiciary Committee, whose chairman (Senator Eastland) is a leading opponent of Civil Rights legislation, was still considering the Administration's proposals submitted in January 1957. Normally, the House version of the Bill should also have gone in the first place to the Senate Judiciary Committee, but on a motion by Senator Knowland (the Republican floor leader) the Senate decided on June 20, by 45 votes to 39, that the Bill should go directly to the full Senate. Moreover, on July 16 the Senate decided by 71 votes to 18 to deal with the measure without further delay.

In the ensuing substantive debate the first important vote took place on July 22, when the Senate unanimously decided to repeal the above-mentioned post-Civil War law which empowered the President to use troops to enforce Court decisions on civil rights. A resolution to that effect had been submitted by Senator Knowland and Senator Humphrey (Dem., Minnesota), the leaders of the bipartisan group favouring Civil Rights ; although it did not affect the text of the Civil Rights Bill itself, it was intended by its sponsors to remove an important obstacle to the passage of any Civil Rights legislation.

Subsequently the Senate passed three important amendments to the Administration's proposals. The first one, adopted on July 24 by 52 votes to 38, restricted Federal enforcement powers to those cases involving a denial of the right to vote. The main purpose of this amendment, which had been moved on a bipartisan basis by Senator Aiken (Rep., Vermont) and Senator Anderson (Dem., New Mexico), was to ensure that the Federal Government would not be entitled to intervene in cases relating to school desegregation and similar matters.

The second amendment, adopted on Aug. 2 by 51 votes to 42, provided that in cases of "criminal" contempt of court arising from failure to obey any form of injunction by a Federal District Court (i.e., not only those relating to Civil Rights) the defendant would be entitled to trial by jury. In cases of "civil" contempt, the position was left unchanged, i.e. trial by a Federal judge sitting alone. [A "criminal" contempt case is one in which the court's aim is to punish someone for wilful disobedience or obstruction of an injunction, while in a "civil" contempt case the judge endeavours solely to ensure compliance with his orders.] The adoption of this amendment was strongly criticized by President Eisenhower, who said in a statement issued the same day that "no American can fail to feel the utmost concern that an attempt should be made to interpose a jury trial between a Federal judge and his legal orders." The new procedure, the President added, would "weaken our whole judicial system and particularly the prestige of the Federal Judiciary," and the amendment would "make largely ineffective the basic purpose of the Bill—that of protecting promptly and effectively every American in his right to vote."

The third amendment, moved by Senator Knowland and adopted on Aug. 2, provided that (*a*) the Civil Rights Commission could not employ unpaid personnel in its investigations of racial discrimination ; (*b*) the appointment of the Commission's staff director would be subject to confirmation by the Senate. It was generally understood that the purpose of the first part of this amendment was to prevent such organizations as the National Association for the Advancement of Coloured People from participating in the Commission's work.

The complete Bill, as amended, was approved by the Senate on Aug. 7 by 72 votes to 18. The supporters were 43 Republicans and 29 Democrats, the latter including Senator Johnson of Texas (the Senate majority leader), Senator

Kefauver of Tennessee, and three other Southern senators. The opposition consisted of 17 Southern Democrats and Senator Morse of Oregon, who had previously stated that he was dissatisfied with the "softness" of the Bill.

Final Stages.

When the amended version of the Bill was returned by the Senate to the House for reconsideration, it was at first feared that no agreement could be reached on the far-reaching amendments inserted by the Senate—especially on the contentious issue of jury trial, to which Northern members of Congress were strongly opposed. On Aug. 23, however, a compromise was worked out as a result of discussions between the majority and minority leaders of both Houses—Senator Lyndon Johnson and Representative Sam Rayburn on the Democratic side, and Senator Knowland and Representative Martin on the Republican side.

The compromise version was contained in the following amendment:

(1) The decision whether or not to hold a jury trial would be at the discretion of the Federal judge.

(2) If a non-jury trial were held and the defendant were sentenced either to a fine exceeding $300 or to imprisonment for over 45 days, he could claim a second trial, this time by jury.

(3) These provisions would apply only to Civil Rights cases (and not, as previously, to all cases of criminal contempt of court).

With this amendment, the Senate version of the Bill was finally accepted by the House of Representatives on Aug. 27 by 279 votes to 97. In the Senate, however, Senator Thurmond (South Carolina) tried to block the passage of the Bill by a "filibuster" lasting over 24 hours, and only gave way on Aug. 29. The Senate then approved the Bill in the compromise version by 60 votes (37 Rep., 23 Dem.) to 15, the opposition consisting entirely of Southern Democrats.

The Bill was signed by President Eisenhower on Sept. 9.

Membership of Civil Rights Commission.

It was announced from the White House on Nov. 7 that President Eisenhower had appointed the members of the Civil Rights Commission, as follows: Mr. Stanley F. Reed (chairman), a former Justice of the Supreme Court; Dr. John A. Hannah (vice-chairman), President of Michigan State University and former Assistant Secretary of Defence; Mr. R. G. Storey, Dean of the Southern Methodist Law School; the Rev T. M. Hesburgh, President of Notre Dame University; Mr. J. E. Wilkins (a Negro), Assistant Secretary of Labour; and Mr. J. S. Battle, a former Governor of Virginia.

Mr. Justice Reed, however, resigned from the Commission on Dec. 3, before the Commission's first meeting.

Mr. Justice Reed (who was a member of the Supreme Court when it handed down its ruling against racial segregation in public schools in 1954) explained in a letter to President Eisenhower that, on second thoughts, he had come to the conclusion that to accept the post of chairman of the Commission after service on the Supreme Court in many Civil Rights cases seemed to be "incompatible" with his obligations as a judge, since the Commission would "participate in policy-making through its investigations and its appraisals of Federal laws concerning civil rights."

Mr. W. Wilson White, Assistant Attorney-General in the Justice Department, was appointed on Nov. 21 as the first head of the department's new Civil Rights Division.

A. BURMA - SOVIET UNION. — Agreement on Soviet Technical Aid to Burma. - Burmese Rice Supplies for U.S.S.R.

In implementation of the mutual Soviet and Burmese promises made during M. Mikoyan's visit to Rangoon in 1956 (see 14908 A), the two countries signed an agreement in Rangoon on Jan. 17, 1957, under which the Soviet Union undertook to carry out a number of construction projects in Burma, whilst the Burmese Government agreed to supply rice and other goods to the U.S.S.R. in return.

Further details were laid down in a general contract signed in Rangoon on Aug. 29, 1957. This provided that the Soviet Union would supply building materials (except those locally available), engineers, and technicians for the construction of a technological institute, a stadium, agricultural and industrial exhibition centres, a hotel, and a conference hall in Rangoon, as well as a hospital at Taunggyi. The Soviet Government would also send specialists to train Burmese workers, whilst a number of Burmese would be trained in the U.S.S.R. to take charge of the completed projects. Local building materials and labour would be provided by Burma.

Equipment for four laboratories—one for chemistry, one for biology, and two for physics—was presented to Rangoon University in March 1957 by a group of Soviet scientists on behalf of the Soviet Government.—(Burmese Government Information Department, Rangoon) **(Prev. rep. 14908 A.)**

B. YEMEN - ADEN PROTECTORATE. — Further Incidents on Aden Frontier. - Crown Prince of Yemen's Visit to London. - Discussions with Mr. Selwyn Lloyd.

The situation of the frontier of the Yemen and the West Aden Protectorate, which had been comparatively quiet for some months, again deteriorated during the period June-September 1957. While the Yemeni Government repeatedly alleged that British aircraft and troops had violated its territory, the Aden Government rejected these allegations, claiming that it was acting against Yemeni troops which had occupied positions inside the Aden Protectorate. The main centres of the incidents were the Shukair area in the West Aden Protectorate, about 160 miles north-east of Aden, and the Beihan Amirate, about 100 miles north-east of Aden.

A British Note of June 19 protested against the violation of Aden Protectorate territory by Yemeni forces and asked for their immediate withdrawal. In rejecting the Note, the Yemeni Government issued a counter-protest alleging that on June 18 six R.A.F. aircraft had bombed the post of Shukair, in the Harib area in "free Yemeni territory." A further Yemeni protest of Aug. 12 alleged that the R.A.F. had again attacked the post of Shukair on Aug. 5. While the British Foreign Office returned the Note to the Yemeni Chargé d' Affaires without comment, the Aden Government had announced earlier that R.A.F. attacks would continue against Yemeni troops who had illegally taken up positions in the Protectorate, and accused the Yemen Government of "trying to give the impression that Shukair was inside the Yemen."

A further Yemeni protest, alleging that British air and ground forces from the Aden Protectorate had attacked villages in Yemeni territory on Aug. 19 and 23, was delivered in London on Aug. 26. It was followed by a statement (Aug. 28) which alleged that bombs "never used before in previous British aggressions" had been dropped on Aug. 25 in the area of Shukair, "producing a liquid which burned the spot where they fell, and fatal smoke which caused the inhaler to vomit blood and die." Rejecting the Yemeni protest, the British Government stated on Aug. 28 that the operations referred to had been directed against Yemeni troops occupying positions inside the boundary of the Aden Protectorate and would continue until Yemeni troops were withdrawn from those territories. Dismissing the allegation that napalm or gas bombs had been used as a "complete fabrication," the Foreign Office said that the attacking aircraft had used 20-lb. fragmentation bombs which could not have had any effects of the alleged nature. A further Yemeni protest at alleged British operations in the area, sent on Aug. 30, was not accepted by the Foreign Office.

On Sept. 19 it was announced in Aden that Yemeni forces had been withdrawn from the Jebel Dhat-Shuqair area (inside the Protectorate), where they had been entrenched for several weeks and been constantly attacked by the R.A.F. Patrols of the Aden Protectorate levies, with the Emir of Beihan's forces, had occupied these positions and were destroying the military works built there by the Yemeni forces.

Crown Prince's Visit to London.

The Crown Prince of the Yemen (Saif al-Islam Mohammed Albadr, who is Deputy Prime Minister, Foreign Minister, and Defence Minister) visited London from Nov. 10-20 at the invitation of the British Government. During his stay he had a number of meetings with Mr. Selwyn Lloyd, the Foreign Secretary; was received by Mr. Macmillan; and also had an audience of the Queen. A Foreign Office spokesman had earlier announced that the purpose of the visit was to improve Anglo-Yemeni relations.

No communiqué was issued at the end of the talks, which were conducted in a friendly atmosphere, but a Foreign Office statement (Nov. 21) said that the Crown Prince's visit had "enabled friendly personal relations to be established" and had "provided an opportunity to discuss matters of common interest." It was hoped that the visit would "help towards a better understanding between the two Governments."

It was understood that the Yemeni delegation had maintained its claim to the whole of the Aden Protectorate, including the island of Kamaran in the Red Sea, and had proposed to open negotiations on a final settlement of the frontier. In the British view this claim, based on Yemeni occupation of the territory before the days of Turkish domination, was not valid. The British Government had therefore recommended, as a more practical measure, the setting-up of Anglo-Yemeni conciliation machinery to prevent incidents on the *de facto* frontier of Yemen and the Protectorate.

Mr. Selwyn Lloyd said in the House of Commons on Nov. 27 that although it had not been possible to reconcile differences between the two delegations regarding Yemen's claim to sovereignty over Aden, it was the policy of the British Government to utilize any opportunity which offered itself to exchange views with the Government of the Imam, and to reach agreements which would remove causes of friction. Mr. Lloyd gave an assurance that, while H.M. Government were ready to discuss frontier rectifications, it would not agree to any claim for foreign sovereignty over the Aden Protectorate.

A. WALES. — Minister of State for Welsh Affairs.

The Prime Minister informed the House of Commons on Dec. 12 that Mr. David Vivian Penrose Lewis, of Talybont-on-Usk (Breconshire), had been appointed Minister of State for Welsh Affairs and, in that capacity, would assist the Minister for Welsh Affairs (Mr. Henry Brooke, who is concurrently Minister of Housing and Local Government). It was simultaneously announced from 10, Downing Street, that the Queen had approved the conferment of a barony on Mr. Lewis.

Mr. David Lewis (52) is a member of Breconshire County Council and chairman of the Welsh Area Council of the Conservative Party. He is head of a family quarrying business, chairman of the joint industrial council for the quarrying industry, and a director of Television Wales and West Ltd. A keen sportsman, he formerly played Rugby for Abergavenny. Mr. Lewis is Welsh by birth and understands the Welsh language.

In his statement to the House, Mr. Macmillan said that it was "the Government's cardinal purpose to put beyond doubt that Wales, as a nation, has a place of its own in the councils of Britain, as well as to frame a system of administration that can be developed to meet every modern need." He explained that the Government, after consideration, had rejected a proposal by the Council of Wales and Monmouthshire for the creation of a Welsh Office, similar to the Scottish Office, and the appointment of a Secretary of State for Wales.

A White Paper (*Government Administration in Wales*, Cmd. 334) was published on the same date containing the text of a letter sent by Mr. Macmillan to Alderman H. T. Edwards, chairman of the Council for Wales and Monmouthshire. In this letter the Prime Minister gave the Government's reasons for rejecting the proposal for a separate Welsh Office and Secretary of State, and outlined the Government's plans for increased devolution in Welsh affairs and closer co-ordination of Government administration in the Principality.

Mr. Macmillan explained that, in the Government's view, the creation of a separate Welsh Office on the lines of the Scottish Office—as proposed by the Council—would not prove to be the best means of serving the distinctive needs of Wales; "what Wales needs is not isolation from the rest of Britain but concentration of ability and wise understanding of Welsh problems." After saying that any system of government for Wales must be based on full recognition of the fact that the Principality possessed not only her own language but also her own distinctive needs and culture, the Prime Minister's letter continued:

"I am convinced that . . . the main weakness which needs to be made good in the machinery of Government administration in Wales lies essentially in the economic sphere. In economic development Wales is on the move. The proposals for Milford Haven and for atomic power stations in North-West Wales are . . . striking examples of remarkable advances which, over the past 20 years, have been transforming the economic life of the Principality . . . There is, in my view, a definite need for more closely co-ordinated study by the various Government departments in Wales of the problems which these economic changes throw up.

"If the practical disadvantages inherent in the plan recommended by the Council are, as I believe, serious, the arguments are more powerful still against an alternative—which I have nevertheless considered—of appointing a Minister or Secretary of State who was not also the head of a strong Government department but a kind of advisory overlord with small direct executive authority. Though it can be argued that such a man has ample time to think, all experience proves that a Minister who is to be effective needs power in his own hands to act.

"Instead, I have decided that the Minister for Welsh Affairs should in future be assisted by a Minister of State for Welsh Affairs, who will be available to spend most of his time in Wales. The traditional duty of a Minister of State is to act for and in the name of his Minister at times and places when the Minister cannot himself be personally present, and I attach much importance to the constant contacts which the Minister of State will be able to make and maintain in Wales."

The Prime Minister went on to announce *inter alia* (1) that the Minister for Welsh Affairs, or the Minister of State, would take the chair at regular meetings of the Conference of Heads of Government Departments in Wales; (2) that a committee of that conference would be set up on which each Government department concerned with Welsh economic development would be represented; (3) that it would be the duty of this committee "to ensure co-ordination of the study of economic developments, needs and prospects in all parts of Wales, and to initiate fresh studies as required"; and (4) that much of the administrative work in connexion with Welsh affairs would be transferred from London to Cardiff—in particular, matters relating to Welsh education.

Mr. Lewis's appointment was strongly criticized by Welsh Labour and Liberal M.P.s during a debate on Welsh affairs in the House of Commons on Dec. 16.

Mr. George Thomas (Lab.), the principal Opposition spokesman, described the appointment as "the most astonishing of this Parliament," adding that "an unoffending, unobtrusive county councillor has been catapulted like a sputnik from the recesses of Breconshire . . . to the outer spaces of another place [the House of Lords] where he will be a satellite for the Minister for Welsh Affairs." After denouncing the appointment as a "piece of window-dressing intended to deceive the Welsh people," and asserting that Mr. Lewis would have no real powers, Mr. Thomas said that Wales would not be content until she had "a Minister for Wales whose sole job was to look after Welsh interests and who could speak for Wales in the Cabinet." Criticisms of Mr. Lewis's appointment, coupled with demands for the appointment of a Minister for Wales with Cabinet rank, were also expressed by **Mr. James Griffiths** (Deputy Leader of the Labour Party), **Mr. Goronwy Roberts**, and other Welsh Labour M.P.s.

The appointment was also strongly criticized by the two Welsh Liberal M.P.s, **Mr. Clement Davies** and **Mr. Roderic Bowen**, the former asserting that Mr. Lewis would be merely "fetching and carrying" for Mr. Brooke in the House of Lords. Mr. Davies also said that Mr. Lewis's appointment had come as a "deep shock" to the Welsh people, while Mr. Bowen said that it was "adding insult to injury" that the only full-time Minister for Wales should sit in the House of Lords and not in the Commons.

On the other hand, Mr. Lewis's appointment as Minister of State was welcomed as a forward step by Welsh Conservative M.P.s, including **Mr. David Llewellyn** and **Mr. Peter Thomas**. The Minister for Welsh Affairs, **Mr. Henry Brooke**, maintained that it would be of considerable advantage to Wales that the Minister of State should sit in the Lords rather than in the Commons, as he (Mr. Lewis) would not be subject to recall to London "at inconvenient times by three-line Whips." He asked the House to give the new system a fair trial.

As a Minister of State in the House of Lords, Mr. Lewis will receive a salary of £3,750. He will work in Cardiff and not in London.—(Times - Daily Telegraph - Western Mail, Cardiff)

B. UNITED KINGDOM. — Extension of I.M.F. Stand-by Credit. - Deferment of Repayment on U.S. and Canadian Loans.

The I.M.F. announced in Washington on Dec. 16 that it had agreed to a request by the U.K. Government for a 12-month renewal of the stand-by credit under which the U.K. could buy from the Fund with sterling the equivalent of up to $788,530,000 in foreign currencies. The stand-by arrangement had been in effect since Dec. 22, 1956, but no drawings had been made up to the present time.

It was pointed out in London that the renewal of the original arrangement, which was for one year, was little more than a routine matter and that the decision did not imply that the dollars would actually be drawn upon in the near future.

On the following day it was announced by the Chancellor of the Exchequer in a written parliamentary reply that the British Government had decided to exercise their right to postpone payment of the capital and interest due on Dec. 31 on the U.S. and Canadian loans, and that the U.S. and Canadian Governments had been informed accordingly. The payments to be deferred amount to $176,000,000.

Under the new loan arrangements agreed in March last, this sum will now become due in 2001—the year after the normal annuity repayments on the loans are completed—and will bear interest at 2 per cent. The decision to postpone payment did not require the consent of the creditor Governments, but the British Government had agreed under the new arrangements to defer a payment only if this were found necessary "in view of the present and prospective conditions of international exchange and the level of the gold and dollar reserves."

It was semi-officially stated that the Government's decision was to be considered as part of its long-term economic policy of trying to build up the sterling area's gold and dollar reserves, and that it had nothing to do with the recent pressure on sterling or any expected deterioration in the gold and dollar position.—(Times - Daily Telegraph - Financial Times)

C. SWITZERLAND. — New Federal President.

Dr Thomas Holenstein, head of the Federal Economic Department, was elected President of the Swiss Confederation for 1958 at a meeting of the Joint Federal Assembly (i.e. the two Houses meeting in joint session) on Dec. 12. M. Paul Chaudet, head of the Federal Military Department, was elected Vice-President. Dr. Holenstein, who belongs to the Catholic Conservative Party, was a member of the National Council from 1937 to 1954, being elected to the Federal Government in the latter year. He is a lawyer by profession. (Neue Zürcher Zeitung)

(Prev. rep. 15264 C.)

A. UNITED KINGDOM. — B.B.C. - Reports for 1955-56 and 1956-57. - Changes in Pattern of Sound Broadcasting - Public Protests against Cuts in Third Programme. - New Television and V.H.F. Stations. - New Agreement on B.B.C. Share of Licence Revenue. - Parliamentary Criticism of Suez Broadcasts. - Sir Arthur fforde appointed Chairman of B.B.C.

The report and accounts of the British Broadcasting Corporation for the year ended March 31, 1957 were published on Nov. 1. They showed that the gross proceeds of sound and combined sound-television licences totalled £28,454,492, of which the Treasury retained £2,750,000 and the Post Office £1,914,284, the B.B.C. itself receiving £23,790,208. After adding £1,285,688 representing net profit on periodicals, interest, etc., the Corporation's total income amounted to £25,075,896. Of this sum, £12,926,273 was derived from sound broadcasting (licence revenue, share of profits on publications, etc.) and £12,149,623 from television.

Current expenditure totalled £22,502,011, including £914,587 provision for depreciation and £921,482 provision for income tax. Of the total, £12,137,306 was charged to sound broadcasting and £10,364,705 to television. The deduction of current expenditure from total income left a balance of £2,573,885 available for capital expenditure; £1,866,175 of this was actually spent and £707,710 carried to reserve.

External services were financed by Treasury grants-in-aid totalling £5,767,000 (£5,422,000 for operating expenses and £345,000 for capital expenditure).

The report gave a warning that the effect on the B.B.C.'s financial position of any continued rise in costs would be "serious," whilst even if there were no further increase it was "doubtful whether the income in view for the current year will suffice to maintain the B.B.C.'s services, introduce essential progress in television . . . and meet the burden of competition." It added: "Nothing is included in present estimates for major new developments such as a second B.B.C. television programme or the introduction of television programmes in colour."

The following information was given in the report:

B.B.C. Policy during the Suez Crisis. Defending the "B.B.C. tradition of objective reporting" which had "led it to show to the world a large part of the nation deeply critical of the Government of the day," the report stressed that if the B.B.C. had for the first time been found guilty of suppressing important items of news, the result would have been to "destroy its reputation without vindicating that of the Government." "Evidence reaching the Corporation since the Suez crisis," the report continued, "has shown not only that the B.B.C.'s adherence to honest reporting during the crucial period was greatly respected abroad, but also that the vigorous representation by B B.C. commentators of the reasons for Britain's action in Egypt did much to promote a better understanding of it." [See also below, page 15914].

Soviet Jamming of B.B.C. Overseas Broadcasts. Jamming from Soviet sources of B.B.C. transmissions in Russian, Finnish, Persian, Turkish, Hebrew, and Greek had gradually ended during and after the visit of Marshal Bulganin and M. Khrushchev in April 1956, but had been fully resumed after the Hungarian revolt in October 1956. The cessation of interference during the summer had made it possible to assess more fully the effect of B.B.C. broadcasts to the Soviet Union. Reactions obtained from all parts of the U.S.S.R. showed that the audience included students, teachers, stage and film actors, and musicians, as well as factory employees and managerial staff. "Although jamming deters the politically timid," the report added, "it has the opposite effect on those bold enough to resent the official mixture of rationed truth and lies from home sources."

Licences. The number of licences in force on March 31, 1957, was 14,525,099 (7,558,843 sound and 6,966,256 combined sound and television), compared with 14,250,000 (8,500,000 sound and 5,750,000 combined sound and television) on March 31, 1956. The report estimated that by the time the present B.B.C. charter ended in 1962, the proportions would be about 3,000,000 sound licences to possibly 12,000,000 combined sound and television licences.

The Third Programme. Although listener research indicated that only about one per cent of listeners tuned in to the Third Programme, this programme would in future receive 10 per cent of the total sound output, or ten times as much as listener statistics would justify.

Television. The report stated that amongst viewers able to receive both B.B.C. and I.T.V. programmes, those in the upper-income group favoured the B.B.C.; in the middle-income group the division was roughly equal, but in the lower-income group I.T.V. was the more popular.

The report estimated that on most winter evenings 11,000,000 adults and about 2,000,000 children tuned in at some time to B.B.C. services; programmes appealing to the largest adult audiences (8,000,000 or more) included "Panorama," "What's My Line?", the Sunday night play, the Saturday night comedy hour, and boxing and travel programmes.

Staff. This numbered 15,242 at March 31, 1957, compared with 14,519 at March 31, 1956.

Changes in Sound Broadcasting - Cuts in Third Programme. - Creation of "Network Three."

Sir Ian Jacob, Director-General of the B.B.C., announced on April 8, 1957 that a new pattern of sound broadcasting, intended to save about £1,000,000 a year, would be introduced gradually during the coming months. No drastic changes were contemplated, and the Corporation would continue to maintain three services as hitherto in order to provide a comprehensive range of programmes. The principal alterations in the existing pattern would be as follows:

(1) From October, 1957, the Third Programme would generally start about two hours later—i.e. on most nights (including Sundays) at 8.0 p.m. instead of 6.0 p.m.

(2) In the meantime there would be some "streamlining" of the Home and Light programmes to bring them together to form a single programme at certain periods of the day.

(3) Regional programmes having a national appeal would be broadcast on all networks, so as to "minimize duplication of effort."

(4) The Light Programme would start at 7.0 a.m. instead of 9.0 a.m., so as to offer a choice with the Home Service.

(5) An innovation, known as "Network Three," would be introduced to provide a new vehicle for specialized programmes. This would be quite separate from the Third Programme but would use the same frequencies (both medium-wave and V.H.F.) during the early evening, and sometimes also in the daytime.

Sir Ian Jacob emphasized that some readjustment of sound programmes had been necessitated by the growth of the television audience. Nearly half the population now had television sets, and the number of such sets would doubtless steadily increase. On the other hand there were still about 18,000,000 listeners who depended exclusively on sound radio programmes, and their number would "remain very large for several years to come." Moreover, people with T.V. sets would retain their interest in individual radio programmes, and in radio programmes broadcast at certain times of the day; thus there would always be an important national audience for sound broadcasting, and especially for those programmes which could be done better on radio than on television. In future, however, a greater proportion of the matter broadcast in sound programmes would be designed for "relaxation and entertainment," and there would be "less talk and more music of every kind," though this would be accompanied by "a new and wider provision for minority interests."

To ensure the widest possible choice of programmes (Sir Ian continued), the Home Service and Light Programme would be planned together and the Third Programme would be co-ordinated with them. The Light Programme would be "lighter" and would place even greater emphasis on programmes of "wide popular appeal," with a large proportion of material designed for easy listening—"a background for people who want to do other things while listening to the radio." The Home Service, on the other hand, would be planned for those who wished to listen more attentively, and would continue to provide the traditional wide range of music, the principal news and information services, important broadcasts on foreign affairs, and regional broadcasts. As to the Third Programme, its essential characteristics would remain unchanged, and the B.B.C. believed that the shortened programme would give scope for "all that is truly worthy of inclusion."

Sir Ian concluded by explaining that the new "Network Three" would accommodate many Spoken Word programmes displaced from the Home and Light programmes, as well as much work in the field of further education. Time would also be found for projects intended for audiences with particular interests, and not of sufficiently wide appeal to figure in the other services. The programme readjustments would make little difference to the total number of hours of sound broadcasting, but would save enough money to enable revenue to meet costs.

An earlier B.B.C. announcement (on Jan. 31, 1957) that the pattern of sound broadcasting was being reviewed had given rise to fears that it was intended to drop the Third Programme altogether, or to curtail it seriously enough to destroy many of its principal features. This, in turn, led to the formation of a Third Programme Defence Society, to strong public protests by many cultural and intellectual leaders, and to the tabling in the House of Commons of a motion, signed by nearly 200 M.P.s of all parties, deploring the possibility of the Third Programme being stopped.

After Sir Ian Jacob's announcement of April 8 the Third Programme Defence Society issued a statement denouncing the proposed changes as "a retreat in the face of the advance of competitive television," and proclaiming the Society's intention of launching "a national campaign aimed at securing a full change of policy."

The proposed changes were defended by Sir Ian Jacob on May 18, when addressing the annual conference of the Institute of Public Relations at Brighton.

The B.B.C., he said, had "no intention whatever" of curtailing the range of its work, but had to review the shape of its services in the light of post-war experience. Whereas income from sound broadcasting was likely to remain static in future, the estimated rise in costs over the next three years would "inflate our expenditure by £1,000,000 a year if we took no action to reduce it." He continued. "It is in the light of changing tastes and habits in the television age, and of economy, that we have planned our changes. It has been assumed by some that we have departed from the conception of public service in broadcasting and are bowing unduly to public taste. I do not accept this contention. The B.B.C. will continue to give, within the resources available, a service to all the interests in its audience, whether majority or minority."

It was announced on June 6 that, following a meeting between Mr. Peter Laslett, chairman of the Third Programme Defence Society, and Sir Ian Jacob and Sir Alexander Cadogan (then chairman of the B.B.C.'s Board of Governors), the Society had changed its name to "The Sound Broadcasting Society." It was explained that the change had been made "to avoid misunderstanding," and because "from the beginning the Society has realized that the changes in B.B.C. policy about which it is concerned affect all three national sound services and must be considered as a whole."

A deputation from the Sound Broadcasting Society, including Sir Laurence Olivier, Dr. Vaughan Williams, and Mr. T. S. Eliot, had a further meeting with Sir Alexander Cadogan and two other Governors of the B.B.C. on July 18. It protested against the new arrangements and submitted five specific proposals which had been set forth in a booklet issued by the Society entitled *Unsound Broadcasting*.

The five points were: (1) the retention by the Light Programme and Home Service of all the substantial music, drama, and talks at present contained within the full range of their planning; (2) the dropping of the partial merger of Home and Light; (2) four full hours daily for the Third Programme from 8 p.m. to midnight; (4) no reduction in its staff or budget; and (5) operation of Network Three as an experimental programme only.

Sir Alexander Cadogan informed the Society on Aug. 1 that it had now been decided under the new broadcasting arrangements that the Third Programme would run on Sundays for six consecutive hours instead of three.

Sir Alexander gave an assurance that the B.B.C. had no intention of diluting the Third Programme or excluding any field of material now figuring in it, and that it would continue "to give ample opportunity for the broadcasting of the best in music, drama, and speech." There would be no further reduction in the Third Programme "or those particular kinds of output of high quality that, by necessity, figure less easily in television," and if further economies had to be made later they would be sought "elsewhere."

As a further step in the rearrangement of broadcasts, the B.B.C. announced on Aug. 13 a large-scale change in the output and timing of its news bulletins.

It was stated, *inter alia*, that the present number of sound news broadcasts would be doubled, making a total of 26 bulletins and summaries daily (against 13 previously); that the Light Programme would put out news at half-past every hour throughout the day from Monday to Friday; but that 16 of these transmissions would only be brief summaries.

B.B.C. Report and Accounts for 1956.

The B.B.C. report for the year ended March 31, 1956, published on July 17, 1956, showed that total income had risen to the record figure of £22,500,000, compared with £20,800,000 in 1954-55. Operational costs totalled £17,900,000, compared with £15,000,000 in 1954-55.

Gross licence income amounted to £25,746,051, of which the Treasury retained £2,750,000 and the Post Office £1,788,942, the B.B.C. itself receiving £21,202,109. Of this amount, £11,726,029 was spent on home sound broadcasting and £9,476,080 on television. External services were financed by a Treasury grant-in-aid of £5,822,000.

The undermentioned points were stressed in the report:

Second B.B.C. Television Service. Recalling that in February 1956 the Postmaster-General had announced that, owing to the economic situation, the Government had decided not to consider any additional television programme for at least two years, the report expressed the hope that additional channels on Band III would be set aside for future B.B.C. use. The Corporation considered that the need for a second B.B.C. television programme remained unaffected by the advent of I.T.V., and that in order to provide a full service which would satisfy the many groups in a mass audience it was necessary to offer a choice between "two programmes deliberately planned to contrast with each other." Experience had shown that in broadcasting "competition . . . does not tend towards diversity of choice but rather towards a choice between different programmes of the same kind," and that only planned alternatives could give the genuine choice that the public had become accustomed to in sound broadcasting. The need to cater for varying tastes was an added reason for a second B.B.C. television programme, in which connexion it was stressed that "a second television service is essential if the B.B.C. is to have elbow-room to carry on the long-term policy on which its value to the nation largely depends."

External Services. These services, which provided regular programmes in 40 languages for listeners throughout the world, badly needed further provision for capital expenditure. "Too often," the report said, "their importance is recognized only when conditions of crisis throw into relief the urgency of presenting the British point of view." In particular, there was an urgent need for a medium-wave transmitter in the Eastern Mediterranean to relay the B.B.C.'s Arabic services.

Developments in T.V. and Sound Broadcasting.

Developments in recent months in connexion with B.B.C. television and sound broadcasting are described below.

New Television Stations. The B.B.C. announced on Dec. 14, 1956 that a permanent television station for the Isle of Man would be built at Carnane, near Douglas, and would probably be completed by the end of 1957. The new station would replace the temporary station opened in December 1953.

It was further announced on Sept. 18, 1957, that the Postmaster-General had approved plans for new stations at Peterborough and in the Orkney Islands. The Peterborough station would serve about 100,000 people and the Orkney station (which would also carry V.H.F. sound broadcasts) about 30,000. The announcement added that B.B.C. television was already available to 97 per cent of the U.K. population, and that coverage would extend to over 98 per cent by the end of the year, when it was hoped to open a temporary station near Dover.

The B.B.C.'s Londonderry station [see 13399 E], serving about 130,000 Northern Irish viewers and many in the Irish Republic, was opened on Dec. 18, extending coverage to 96 per cent of the population of Northern Ireland.

Colour Television. A new series of experiments in transmitting colour television on the 405-lines system began on Nov. 5, 1956, being transmitted from the B.B.C. Crystal Palace station and re-broadcast by the I.T.A. on its Croydon transmitter. A further series of experimental colour transmissions from the Crystal Palace, made in co-operation with the radio industry and in agreement with the Television Advisory Committee, began on Oct. 7, 1957.

Extension of Television Viewing Times. Dr. Charles Hill (then Postmaster-General) announced on Dec. 12, 1956 that from Feb. 16, 1957, the B.B.C. and I.T.A. would be free to make television broadcasts during the periods which they thought would best meet audience needs, subject to the existing maxima of 50 hours a week and 8 hours in any one day. These maxima might, however, be exceeded for such purposes as religious broadcasts, broadcasts of outside events, and Welsh language broadcasts. The 6 15-7.25 Sunday evening break and the ban on normal Sunday programmes before 2 p.m. would be retained. This decision ended the previous prohibition on weekly television broadcasting before 9.0 a.m. and after 11.0 p.m.; the two-hour limit on morning broadcasts; and the 6.0-7.0 p.m. weekday evening break. B.B.C. broadcasting hours were accordingly extended to include the 6.0-7.0 p.m. weekday break from Feb. 18, 1957.

School Television. The first B.B.C. television broadcast to schools—an illustrated talk on British Columbia—took place on Sept. 24, 1957. It was explained that there would be five broadcasts each week until the end of term (Dec. 6), dealing respectively with "Living in the Empire," Scientific subjects (two broadcasts weekly), Current Affairs, and "Young People at Work." The programmes were intended especially for pupils aged 11-15.

The Ministry of Education announced on Feb. 22, 1957 that expenditure by education authorities on school television receivers would be recognized for grant, within certain limits: viz., from equipment for one school in the case of authorities with up to 100,000 population to equipment for six schools where the population exceeded 500,000.

New V.H.F. Broadcasting Stations. The B.B.C. announced on Aug. 2, 1956 that the Postmaster-General had approved plans to build V.H.F. sound broadcasting stations at Rowridge (Isle of Wight), Kirk 'o Shotts (Central Scotland), Sandale (near Carlisle), Corwen and Anglesey (both in North Wales), and Rosemarkie (Moray Firth). Each station would carry the Home, Light, and Third programmes except Corwen, which would broadcast the Welsh Home Service only, since the area served would receive the Light and Third programmes satisfactorily from other V.H.F. stations.

The V.H.F. station at Holme Moss (the first permanent V.H.F. station with a full three-programme service, serving about 14,000,000 people in Yorkshire, Lancashire, the North Midlands, and North Wales) was opened on Dec. 10, 1956. On the same day the Corporation announced that it was hoped shortly to open V.H.F. stations at Sutton Coldfield (near Birmingham), Norwich, and Wenvoe (Cardiff), thus completing the first stage of its development programme, which would cover 84 per cent of the population. The second stage (including the six stations named above) would extend coverage to 96 per cent of the population, and was due to be completed by the end of 1958.

It was further announced on June 24, 1957 that work would begin shortly on a new V.H.F. station for N.E. Wales on a site (1,800 ft. above sea-level) near Llangollen. The station was expected to be completed by the autumn of 1958 and would serve about 270,000 potential listeners in Flintshire, Cheshire, Shropshire, Denbighshire, Merioneth, and Montgomeryshire, bringing V.H.F. coverage in Wales to about 90 per cent of the population.

The V.H.F. station at Rowridge, I.O.W. [see above], serving Hampshire, Dorset, most of Wiltshire, and parts of Somerset, Berkshire, Surrey, and Sussex, was brought into service on June 4, 1957.

B.B.C. Appointments. Mr. Kenneth Adam, Light Programme Controller from 1950 to 1955 (when he resigned from the B.B.C.), was appointed Controller of Television Programmes on Jan. 24, 1957, with effect from Feb. 25. Earlier, (July 30, 1956), the appointments had been announced of Mr. Donald Stephenson as Controller of the Overseas Services and of Mr. Tom Chalmers as Controller, North Region. On Feb. 20, 1957 it was announced that Mr. A. Stewart (Home Service Controller in London since 1953) would succeed Mr. Melville Dinwiddie as Controller for Scotland, when Mr. Dinwiddie retired in the summer.

B.B.C. Share of Licence Revenue. The terms were published on Feb. 13, 1957 of a new agreement between the Postmaster-General and the B.B.C. governing the share of licence revenue receivable by the Corporation in the three financial years April 1, 1957-March 31, 1960. In place of the agreement of June 1954, under which the Treasury retained a lump sum of £2,750,000 per annum and the Post Office deducted a further sum for collection, it substituted an arrangement providing for the B.B.C. to receive a fixed 87½ per cent of the total revenue collected in radio and television licences After March 31 1960, the Corporation will receive "such sums as the Treasury may authorize."

Extension of B.B.C. Arabic Broadcasts. At the Government's request the B.B.C. doubled its Arabic services from March 31, 1957, from 4½ to 9½ hours daily, and increased the daily number of news bulletins from seven (lasting 1 hr. 40 mins.) to 11 (totalling 2 hrs. 20 mins.). It was stated that the services (by far the largest of the B.B.C.'s foreign language services) served an area extending from Turkey in the north to East Africa and Zanzibar in the south, and from Morocco in the west to the Persian Gulf in the east—the programmes being heard in 11 independent Arab-speaking countries with 70,000,000 inhabitants.

Parliamentary Criticisms of B.B.C. Broadcasts during Suez Crisis.

Strong criticism of the B.B.C.'s allegedly biassed attitude during the Suez crisis, as expressed in its news bulletins and other broadcasts, was voiced by a number of Conservative members in the House of Commons on Nov. 14, 1956.

Mr. Peter Rawlinson (C.) who raised the subject, complained that "by means of emphasis, selection, nuance, the use of adjectives, and the use of tone," a "slant" had been given to B.B.C. news bulletins during the crisis, and that "programmes going out to a wide audience had been biassed and unfair." In particular, he criticized the alleged partiality displayed by Mr. Woodrow Wyatt (a former Labour M.P.) in the television programme "Panorama," and asserted also that the overseas programme "Press Report" gave undue prominence to the views of such papers as the *Times* and *Manchester Guardian*, with relatively small circulations, and did not reflect "what people in Britain are actually reading." Mr. Rawlinson concluded by saying that overseas broadcasts should "speak in the name of the Government of the day and the foreign policy of that Government."

Mr. Alport (then Assistant Postmaster-General), replying to the debate, said that although Parliament had an undoubted right to discuss B.B.C. activities as "matters of public interest," responsibility for the day-to-day administration of affairs, including the programmes, rested with the Corporation's Governors. Saying that "the ideal of every B.B.C. bulletin is the fair selection of items, impartially presented," and that the duty of editors and sub-editors was to "give the facts" and leave listeners to "form their own opinions," he nevertheless stressed that recent events had "presented the Corporation with an exceedingly difficult problem" The B.B.C. was now examining methods of presenting various aspects of controversial matters, bearing in mind the need to be impartial and to seem so. After this examination had been completed it would be able to judge what action, if any, was needed to safeguard the tradition of impartiality which the B.B.C. had built up and which was one of its greatest assets.

In conclusion, Mr. Alport gave an assurance that the Government was fully aware of the importance of making the British point of view heard and understood abroad, particularly in quarters where it was most frequently traduced and misrepresented. The B.B.C. had a reputation for integrity and objectivity, but there were undoubtedly arguments for the redeployment of its resources. Some people thought that special methods were needed in particular areas to ensure that the British viewpoint was not "drowned by those loud and tendentious voices whose only object appears to be the destruction of the standards and values, not only of Great Britain, but of democracy everywhere." The Government was considering the matter and was determined to find an effective solution before it was too late.

New Chairman of B.B.C. Governors.

Sir Arthur fforde, formerly Headmaster of Rugby School, succeeded Sir Alexander Cadogan as chairman of the B.B.C.'s Board of Governors from Dec. 1, 1957. Sir Arthur's appointment had been announced from 10, Downing Street on May 27, when it was explained that Sir Alexander Cadogan—whose term of office was due to expire on July 1—would be reappointed as chairman of the Board for the intervening five months until Dec. 1, 1957.

Sir Arthur fforde (56) was educated at Rugby and Oxford, and was a partner in a London firm of solicitors for nearly 20 years from 1928. In the war years he held various appointments at the Ministry of Supply, and from 1944-45 was Under-Secretary at the Treasury. He was appointed Headmaster of Rugby in 1948.

The Government announcement of May 27 added that on the expiry of their terms of office on July 1, Lord Macdonald of Gwynysgor would be reappointed National Governor for Wales until June 30, 1959 and Sir Henry Mulholland National Governor for Northern Ireland until June 30, 1958.
(British Broadcasting Corporation - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. B.B.C. 14980 B; Overseas Services, 15688 A; Fourteen-Day Rule, 15300 A.)**

A. MOROCCO. — Formation and Suppression of "People's Movement."

The formation of a new political party, known as the "People's Movement," was announced in Rabat on Sept. 28. Its primary aims were described as the unification of North Africa under the religious leadership of the King of Morocco, and the promotion of an "Islamic socialism." The statement also declared that "we will give all possible assistance, including the sacrifice of our blood, to help the Algerian people to free themselves from the oppression which they suffer."

It was widely believed that the Movement had been organized by former leaders of the "Liberation Army," and this was subsequently confirmed by M. Ahardane, Governor of Rabat Province [see below]. The Movement's propaganda had been carried on mainly in the predominantly Berber regions of the Rif, the Middle Atlas, and eastern and southern Morocco, where the "Liberation Army" still has a following and the Istiqlal (the ruling party) exerts little influence.

The Moroccan Government decided on Oct. 24, however, to suppress the "People's Movement" on the ground that its founders had not complied with legal requirements; at the same time it was announced that governmental consent would be required for the formation of any new political or religious organization. M. Mahjoubi Ahardane strongly protested against this decision in a press statement on Oct. 29, alleging that members of the Movement had been arrested at Marrakesh and Oujda. Revealing that he was among its founders, he stated that it had been established only after the Istiqlal had refused to agree to the formation of a "National Union" which would include "the people of the countryside and the mountains." M. Ahardane was suspended from his post on Oct. 30, his press statement being described as "a grave act of indiscipline."—(Le Monde, Paris) **(Prev. rep. 15110 A.)**

B. INTERNATIONAL SUGAR COUNCIL. — Initial Export Quotas for 1958.

The International Sugar Council, meeting in London on Nov. 21, fixed initial export quotas for 1958 (together with certain other permissible exports) at 4,865,000 metric tons, the highest level since the end of 1956.

The Council's statistical committee estimated that free market requirements during 1958 would amount to about 5,515,000 metric tons, leaving about 1,000,000 metric tons to be supplied by countries not participating in the International Sugar Agreement (e.g. Brazil and Peru). It was decided to set up a reserve of 20,000 metric tons from which additional export quotas might be allotted to meet special cases of proved hardship.

The Council announced that 20 countries had so far ratified the protocol of November 1956 (see 15392 A) amending the 1953 International Sugar Agreement. Ratification by the remaining participants was expected in the near future.

As the New York spot price of sugar had fallen below 3.90 cents per lb. on Oct. 23, and had remained under that level for 17 consecutive market days until Nov. 18, the quotas and other limits provided for in the Agreement—which had been inoperative since Jan. 25, 1957—came automatically back into effect from Nov. 19.—(Times) **(Prev. rep. 15392 A.)**

C. FRANCE. — National Assembly. - Increase in Minimum Size for Parliamentary Groups.

The French National Assembly adopted on Dec 6 an amendment to its rules increasing the minimum size for any parliamentary group from 14 to 28 members. The resolution, which was adopted by 364 votes to 149 (Communists), had been initiated by M. Barrachin (Independent) and M. P.-H. Teitgen (M.R.P.). Both deputies pointed out that there were at present 15 political groups in the Assembly, although there were only six fundamental political tendencies in the country, and that nine of these groups counted 21 or fewer members.

The nine small groups referred to by MM. Barrachin and Teitgen are the Social Republicans and the U.D.S.R.-R.D.A. (21 members each); the dissident Radicals and the R.G.R. (14 each); the *Paysans* (12); the *Paysans d'Action Sociale* (8); the *Convention Africaine* (7); the *Progressistes* (6); and the *Mouvement Socialiste Africain* (4).—(Le Monde, Paris)

A. ALGERIA. — Tunis Conference of F.L.N. Leaders. - Joint Mediation Offer by King of Morocco and President Bourguiba. - French and Rebel Reactions.

A conference of political and military leaders of the Algerian National Liberation Front (F.L.N.), meeting in Tunis from Oct. 25-29, issued a statement on Oct. 30 reaffirming its refusal to negotiate until France had recognized Algeria's independence, and suggesting that discussions should take place between the Tunisian and Moroccan Governments and the F.L.N. with a view to reaching agreement on a common policy. President Bourguiba of Tunisia, though expressing disappointment at the communiqué's insistence on independence as a condition for negotiations, supported the proposal for a conference and stated that he would approach the King of Morocco on the subject.

Those attending the Tunis conference included the members of the Committee for Co-ordination and Execution (the F.L.N.'s executive), leaders of the National Liberation Army, and M. Mohammed Yazid, the F.L.N. representative at the United Nations. The Committee was elected at a secret conference held in the Kabylie on Aug. 20, 1956, and includes both political and military leaders. Its nine members are M. Fehrat Abbas, Dr. Lamine Debaghine, Colonel Omar Ouamrane, M. Abane Ramdane, M. Krim Belkacem, M. Mohamed Boussouf, M. Cherif Mahmoud, M. Bentobbal Lakhdar, and M. Nehri Abdelhamid.

President Bourguiba accordingly flew to Rabat for discussions with King Mohammed V on Nov. 20-21. In a joint statement issued on the latter date, King Mohammed and the President appealed to the French Government and the F.L.N. to open negotiations aimed at combining Algerian sovereignty with safeguards for French interests. At the same time they offered their good offices in achieving such a solution.

The joint statement ran as follows: "Faced with the conflict between their Algerian brothers, with whom they are united by so many bonds, and their friends the French people, the King of Morocco and the President of the Tunisian Republic address an urgent appeal to the two parties to open negotiations for a just solution, with the aim of making concrete the sovereignty of the Algerian people, in accordance with the principles of the U.N., and safeguarding the legitimate interests of France and of her nationals. The two Heads of State offer to put their good offices at the disposal of France and the leaders of the F.L.N. for this purpose. They are convinced that this procedure will put an end to the bloodshed and to this conflict which threatens the security and stability of North Africa and endangers peace in this part of the world."

The communiqué was handed to the French Ambassador in Rabat on Nov. 22 by the Moroccan Foreign Minister, M. Balafrej, and was also conveyed to the F.L.N. leadership. President Bourguiba returned to Tunis on the same day, and subsequently gave his views on the significance of the communiqué in the following broadcast:

"France regards as undeniable and sacred the idea which has been inculcated into four or five generations of Frenchmen—that Algeria is French territory and forms an integral part of France. Faced with this unrealistic outlook, Algerians reply to French intransigence with an equal intransigence. They consider that, between the French conception of assimilation and their aspiration towards independence, there can be only war and a fight to the death. Negotiations will be impossible until France is ready to recognize Algerian independence . . . We were anxious to suggest an intermediate position, but founded on a clear basis—that is, on the necessity for Algeria to escape from colonial tutelage and attain self-government. That is what we mean when we affirm the Algerian people's right to sovereignty and independence. But we do not say 'No negotiations before independence.' We ask both parties to meet, alone or in our presence, for negotiations based on the sovereignty of the Algerian people, leading to independence after the ending of the colonial régime."

Rebel Reactions to Mediation Offer.

The F.L.N. Committee for Co-ordination and Execution issued a statement in Rabat on Nov. 22 expressing appreciation of the attempt by the King and the President "to overcome the French Government's intransigence"; claiming that the joint statement recognized "the legitimacy of the fight carried on by the F.L.N. and the National Liberation Army for their country's independence and the reconquest of its sovereignty; and adding: "The F.L.N. is convinced . . . that official negotiations opened on a basis of independence will end the bloodshed and the ravages of a colonialist war." It was commented in the French Press that this statement twice used the word "independence," which did not appear in the communiqué issued by King Mohammed and President Bourguiba, and that the only concession which it contained was the acceptance of independence as the "basis," and not as a condition (*préalable*), for negotiations.

French Reactions to Mediation Offer.

The French Foreign Minister, M. Pineau, rejected the offer of mediation by Morocco and Tunisia in a statement issued in New York on Nov. 22.

"The joint communiqué published by the King of Morocco and the President of the Tunisian Republic certainly appears very moderate," M. Pineau declared, "but I do not think it basically acceptable for all that. It does not make clear—which we consider an essential point—whether the first negotiations are to be concerned with a cease-fire or with the future status of Algeria. If the former, France would be in complete agreement, as she has always affirmed her desire to negotiate with those who are in arms; if the latter, we cannot envisage negotiations except with the genuine representatives of the Algerian people, chosen in free elections.

"The most striking feature of the communiqué is the allusion to the leaders of the F.L.N., which seems to exclude all other representatives of the Algerian population from the discussion. Even if negotiations were confined to a cease-fire, there are other combatants besides the F.L.N. with whom we should have to enter into contact. If it were a question of Algeria's status, the unique position accorded to the F.L.N. does not correspond to realities, since other Algerian political bodies will clearly have the right to take part in discussions with France and to put their point of view. We cannot understand why, if Morocco and Tunisia consider the F.L.N. to be so representative, they do not support our plan for elections, which would allow this to be demonstrated . . . It is hard to see how these two countries, which affirm their bonds with their 'Algerian brothers,' and which willingly or unwillingly are obliged to supply them with substantial material aid, could offer themselves as mediators, since they are in no way neutral on this problem."

M. Gaillard made a further statement on the French Government's attitude on Nov. 29, during the National Assembly's debate on the new *loi-cadre* for Algeria.

Referring to the Moroccan-Tunisian mediation offer, M. Gaillard declared: "We understand the disquiet of these young countries. I wish they would in turn understand that the principles of French policy are not liable to change. We will never accept that Frenchmen of European origin should regard themselves as foreigners in Algeria. Whatever the words and paraphrases, we will not agree to independence for Algeria. Nor shall we agree to consider the F.L.N. and its combatant organizations as qualified representatives for discussions, other than those for a cease-fire. Whatever the hopes entertained by certain people, Morocco and Tunisia cannot expect the French Government to take a different attitude. If it did, it would at once be not only overthrown but destroyed. No external pressure will make us bend . . .

"The close ties of race, religion, and neighbourliness existing between those countries and Algeria impose on Morocco and Tunisia a special responsibility—that is, to make the *fellaghas* understand that it is in their own interest . . . to respond at last to the proposals which France once more renews. It is for this reason that Morocco and Tunisia should stop helping the rebels, and that their fraternal feelings should express themselves not only in their consideration for the *fellaghas* but also, and still more, for the thousands of men and women whom the rebellion has forced to live in uncertainty and terror. Nothing can be done without a cease-fire, which must not be subject to any political conditions; and Tunisia and Morocco would render a great service to themselves and to the cause of peace by inducing the *fellaghas* to admit this. There is no need for a conference of any kind to bring this about.

"Algeria can neither do without the Europeans living in her territory, nor without help from Metropolitan France. A history of over 100 years, and economic integration, have created links which are too powerful to be torn asunder by an obsolete conception of nationalism. The Moroccan Government, which realistically faces the great problems of its own youthful independence, should take into account the advantages of an association with France and the perspectives thereby opened by [Moroccan] participation in the exploitation of the resources of the Sahara . . ."

M. Mendès-France urged that the Moroccan-Tunisian mediation offer should not be rejected outright.

M. Mendès-France said that it was incorrect to say that Tunisia and Morocco had taken up exactly the same position as the National Liberation Movement. In this connexion he referred to an appeal by President Bourguiba to the Algerian people warning them against intransigence and totalitarianism, and stressing the need to understand the French position and safeguard French interests in North Africa. Pointing out that the Moroccan and Tunisian Governments had declined the F.L.N. proposal for a tripartite meeting, he claimed that the joint statement of King Mohammed and President Bourguiba had been phrased in such a way as not only to facilitate French acceptance but also to "brake" the Algerian extremist elements.

When M. Mendès-France referred to the fact that the joint statement spoke purposely of Algerian "sovereignty" and not of "independence," M. Gaillard intervened to say that, in the unanimous opinion of all experts on international law, there was no difference between these two expressions. M. Mendès-France nevertheless maintained that there were differences in the interpretation of the word "sovereignty," which could mean either internal or external sovereignty. He again urged that the chance of peace which the mediation offer might present should not be rejected outright.

The Radical Party congress, meeting in Strasbourg, had previously adopted on Nov. 23 (by 648 votes to 472) a motion calling on the Government to "take the initiative in opening negotiations with Morocco and Tunisia to study appropriate methods of settling the conflicts and disputes of all kinds

affecting relations between France and North Africa." The motion was supported by M. Mendès-France but was opposed by M. Gaillard, who, however, adopted a much less hostile attitude towards the mediation offer than M. Pineau.

In a brief press statement on his return from the U.S.A. (Dec. 11), M. Pineau emphasized that the French Government would not hesitate to take advantage of the intervention of "our Moroccan and Tunisian friends" to bring about a cease-fire solution in Algeria, but reiterated that a political solution would depend solely on negotiations between France and the elected representatives of the Algerian people. He subsequently confirmed that during his talks with M. Balafrej in New York the latter had renewed his Government's offer of mediation with a view to bringing about a cease-fire, and later a "*détente.*"—(Le Monde, Paris - Le Figaro, Paris)

A. AUSTRALIA. — Report of Committee of Inquiry into the Future of Australian Universities.

The report of the Committee of Inquiry into the future of the Australian Universities was submitted to the Federal Parliament on Nov. 26. Its findings and recommendations are summarized below.

The Committee drew attention to serious deficiencies in the existing state of the Australian universities, listing the principal defects as "pressure of student numbers, particularly in the first year; inadequate staff, accommodation and equipment; high student failure rates; and a weakness of honours and post-graduate schools." In the latter connexion reference was made to the "acute" shortage of graduates in all fields (including science and technology, law, medicine, dentistry, and agriculture) and to the "critical" situation which would develop unless reforms were undertaken. "The single principal cause of these defects," it added, "has been financial stringency."

On the question of student numbers, the report said that the annual enrolment was likely to increase by 120 per cent (i.e. to 80,000) by 1969, but despite this trend Australia faced an acute shortage of graduates in all fields. In this connexion, the report noted particularly that the total output of science graduates from all the Universities in 1956-57 was only 524 and was likely to be still lower in 1957-58.

As regards the high rate of student failures, the report noted that of every 100 students who entered six State universities in 1957, only 35 graduated in the minimum time and only 58 graduated or were expected to graduate at all. The report described this failure-rate as a "national extravagance" and attributed it principally to lack of adequate preparation in schools and to the intellectual and emotional gap between school and university.

On the question of the weakness in honours and post-graduate work, the report stated that the main reasons were the acceptance of the pass degree as the normal end-point of university education, and the lack of close contact between teacher and student in the earlier years of the student's university career.

The report also criticized the low level of present State assistance to the Universities, commenting in particular on the "inadequacy" of the Victorian Government's contribution of £A200,000 per annum.

The Committee's principal recommendations were as set forth below:

(1) A permanent University Grants Committee should be set up and should function, at least in its early years, as an informal body without "legislated status." It would advise the Federal Prime Minister on the financial needs of the Universities, and distribute the Commonwealth Government's contribution among the States in the light of the particular circumstances in each case. Grants made by the Committee should be on a triennial basis for recurrent expenditure, and annually for specific capital or non-recurrent expenditure.

(2) A building programme costing £A12,445,000 should be undertaken in 1958-60. Of this sum, the Commonwealth Government should provide £A6,270,000, in addition to a contribution of £A1,003,000 towards the cost of equipping the new buildings.

(3) To meet the "more serious deficiencies," there should be emergency Commonwealth grants of £A1,015,000 in 1958, £A1,522,000 in 1959, and £A2,030,000 in 1960.

(4) There should be an annual increase of 10 per cent in the recurrent grants to State Universities in each of the three years from 1958 to 1960.

(5) Over the same period the Australian National University at Canberra should receive a total of £A1,070,000 for capital requirements, while Canberra University College should receive a grant of £A1,044,000 for the same purpose. In this connexion the Committee rejected a proposal that the latter institution should be raised to full University status. It suggested, however, that some form of constitution should be devised whereby the two institutions of higher education at Canberra could be more closely linked.

(6) A second University should be established in Melbourne. The Committee stated that while they believed in general that the needs of existing establishments should have priority over proposals for new Universities, the special needs of an expanding industrial centre like Melbourne could not be fully met by the existing University.

(7) Over the period 1958-60 the Commonwealth Government should offer capital grants to the Universities on the basis of £A1 for every £A1 provided by the States or other sources. These grants should not exceed £A200,000 in the first year, £A400,000 in the first two years, or £A600,000 in the whole three-year period.

(8) Professorial salaries should be increased by £A500 per annum without delay, and other salaries increased proportionately.

(9) The number of Commonwealth scholarships should be increased immediately.

The Federal Prime Minister, Mr. Menzies, stated in the House of Representatives on Nov. 28 that the Government accepted in principle most of the recommendations in the Inquiry Committee's "brilliant and provocative" report. Provided the States also accepted the Committee's recommendations, Federal expenditure on State Universities would accordingly be raised from £A6,000,000 in 1955-57 to £A22,000,000 in 1958-60. The principal points made by Mr. Menzies were as follows:

(1) A permanent Universities Committee would be set up, but the term "grants" would not be used as the word had acquired too narrow a connotation in Australian usage.

(2) Provided the States were prepared to undertake an extensive building programme as recommended by the Inquiry Committee, the Commonwealth would provide for this purpose the recommended sum of £A6,270,000 and would also pay the proposed £A1,003,000 towards the cost of equipping the new buildings.

(3) Over the period 1958-60, the State Universities would receive additional emergency grants totalling £A4,500,000.

(4) Commonwealth grants to the State Universities (on the basis of £A1 for every £A3 from the States) would be increased by 10 per cent per annum to make a total of £A8,501,800 for the period 1958-60.

(4) The Commonwealth Government accepted *in toto* the recommendation under (7) above.

(5) The Commonwealth Government would be willing to pay its share of the recommended increase in academic salaries.

(6) The provision for the Australian National University and Canberra University College would be increased.

The Committee, appointed by Mr. Menzies in January last, consisted of three Australian and two British members under the chairmanship of Sir Keith Murray, chairman of the University Grants Committee in the United Kingdom. (Australian News and Information Bureau - Sydney Morning Herald - Times - Manchester Guardian) **(Prev. rep. 15351 A.)**

B. IRAQ. — New Government.

A new Cabinet was formed on Dec. 15 by M. Abdul Wahab Mirjan, the Speaker of the Iraqi Parliament, after Senator Ali Jawdat had tendered his resignation from the premiership. No official reason was given for Senator Jawdat's resignation, but it was understood to have been caused by dissensions in the Cabinet after King Faisal had refused his request for the dissolution of Parliament and the holding of general elections. The membership of the new Government was as follows:

M. Abdul Wahab Mirjan—Prime Minister, and Minister of Defence; Dr. Nadim el-Pachachi—Finance; Dr. Abdul Amir Allawi—Communications and Works; M. Abdul Rasoul Khalisi—Justice; M. Arkan Abaddi—Social Affairs; General Sami Fattah—Interior; Dr. Abdul Hamid Khadim—Education; M. Jamil el-Orfali—Agriculture; Senator Sayib el-Jeburi—Development; M. Burhanuddin Bashayan—Foreign Affairs; M. Mohamed el-Hardan—Economics; M. Ahmad Mukhtar Baban—Health; M. Ali Arshaqi, M. Izzauddin Mulla, and M. Mohamed el-Khatib—Ministers without portfolio.

Seven Ministers of the outgoing Cabinet were included in the new administration, though several of them changed portfolios—e.g. Dr. Nadim el-Pachachi, formerly Minister of Economics and Development. M. Bashayan held the Foreign Affairs portfolio under General Nuri es-Said. All the Ministers are believed to support General Nuri's policies, and most of them were members of the Constitutional Union Party which was led by him before the dissolution of political parties in 1954.

M. Mirjan (47), a lawyer, was born at Hilla and entered the Cabinet in 1948 as Minister for Economics, subsequently holding the portfolios of Finance, Agriculture, and Works and Communications. A close associate of General Nuri, he is known as a strong supporter of the Baghdad Pact.

C. UNITED STATES. — Federal Troops withdrawn from Little Rock.

The last of the regular troops which had been sent to Little Rock on Sept. 24 were withdrawn on Nov. 27, the task of maintaining order being entrusted to the Arkansas National Guard, which remained under Federal command. The regular troops, originally numbering 1,100, had already been reduced to 500 on Oct. 14 and to 225 on Nov. 6, whilst the number of National Guards on duty had been reduced from 10,500 to 900. Only National Guards had been stationed on the Central High School premises since November 15.—(New York Times)

(Prev. rep. 15803 A.)

A. UNITED KINGDOM. — Rent Act in Force.

The Rent Bill, which had been given a second reading during Sir Anthony Eden's premiership in 1956, was enacted on June 6, 1957. During its remaining stages in both Houses of Parliament it was amended in important respects as a result of concessions made by Mr. Macmillan's Government in response to strong opposition from a section of the Conservative Party itself, led by Mr. Rees-Davies and Sir Ian Horobin. A summary of the later stages of the Bill is given below.

House of Commons' Amendments.

The principal Government amendments agreed to in Standing Committee (Dec. 6, 1956 - March 13, 1957) and in the Report stage (March 26-27) affected Clause 9, which freed from control about 800,000 houses and flats now let at controlled rents [see page 15292, provisions 1 and 2]. The amendments were as follows :

(1) The "standstill" period which must elapse before decontrol took effect was extended from six months after the Act came into force (as originally provided in the Bill) to 15 months. During this period the landlord would not be able to raise the rent or seek to regain possession of the house or flat. The amendment did not affect the landlord's obligation to serve six months' notice on the tenant.

(2) The landlord and tenant of decontrolled flats or houses could enter into a new rent agreement at any time within the 15 months' "standstill" period, such an agreement being valid for a minimum of three years; the new rent would be payable from the date when the agreement was concluded.

(3) It was made illegal—under penalty of £100 fine—for a landlord to demand a premium for a tenancy of a decontrolled house or flat within three years of the coming into force of the Act. This prohibition applied also to "concealed premiums"—e.g. where an excessive price was charged to the tenant for furniture or fittings, or where the landlord demanded an investment or loan from him as a condition of letting.

(4) Landlords of decontrolled houses or flats were prohibited from demanding advance rent by way of premium. The amendment (*a*) provided that if, under any tenancy subject to the premium provisions of the Bill, rent was demanded further in advance than the tenancy period to which it related (e.g. a week, a month, or longer), that sum should be treated as a premium and not be recoverable; (*b*) prohibited demands for rent for more than six months in advance before the end of the rental period.

Mr. Brooke (Minister of Housing and Local Government) explained that the amendment was intended to cover cases where demands for rent were made so definitely in advance as to constitute a form of premium—e.g. where a landlord let his property on a long lease and demanded advance payments of the whole rent for the period, or a large part of it.

The following other Government amendments were also agreed to :

(5) For all uncontrolled tenancies the minimum period for a notice to quit was extended from one week to four weeks. This would apply whether the notice was served by landlord or tenant.

(6) Making it clear that the widow of a tenant of a rent-controlled house or flat would not lose security of tenure as a result of his death, providing that she was living with him at the time. Similarly, a near relative of the deceased who had lived with him for at least six months before his death would become a protected tenant.

This amendment was introduced to allay anxieties which had been expressed by Mr. James Griffiths and other Labour Members. Mr. Brooke had previously explained that the Government's intention had always been to continue protection to widows and near relatives of deceased tenants of controlled property, and had promised to bring in an amendment to clarify the position.

(7) Making it an offence for a landlord to try to persuade a tenant to give up a controlled tenancy in return for a new tenancy on more favourable terms.

Mr. Brooke explained that this amendment was intended to prevent landlords from tricking tenants into surrendering controlled tenancies by offering them new agreements which superficially seemed attractive—e.g. the new agreement might cover the original accommodation plus extra rooms.

(8) Removing uncertainty as to whether the landlord or tenant was responsible for internal decorative repairs by providing that the landlord might elect to undertake the responsibility and charge a higher rent, subject to the tenant's right to dissent in writing and undertake to do the repairs himself. Carried by 260 votes to 223.

(9) Excluding those houses or flats for which leases or agreements were still in force from the section of the Bill allowing limited increases in the rents of properties remaining controlled [see page 15292, provision 8]. This amendment, moved by the Opposition, was accepted by the Government and agreed to without a division.

The principal Opposition amendments defeated in Standing Committee and the Report stage are summarized below, with names of sponsors and voting figures in parentheses :

(*a*) To relieve tenants whose rents would be increased under the Bill of the obligation to pay rates (**Mr. Lindgren**; rejected by 23 votes to 18).

(*b*) To provide that the initial rent increase of 7s. 6d. a week for the first six months should include rates, improvements, and services (**Mr. J. Silverman**; rejected by 22 votes to 19).

(*c*) To reduce the initial rent increase from 7s. 6d. to 2s. 6d. a week (also defeated by 22 votes to 19).

(*d*) To exclude slum properties from the rent increases permitted by the Bill (**Mr. J. Sparkes**; defeated by 22 votes to 20 after Mr. Brooke had declared that the amendment was too vaguely worded to be practicable).

(*e*) To make the 25 per cent increase on Scottish rents (which include rates) sanctioned by the Bill applicable to the rent portion only (**Mr. J. McInnes**; rejected).

(*f*) To provide that, in the event of a dispute between landlord and tenant in Scotland, the amount of rent should be fixed by a rent tribunal, and not by the Sheriff as stipulated in the Bill (**Mr. McInnes**; rejected by 21 votes to 18).

(*g*) To provide that in Scotland the landlord should be responsible for continuing repairs to the property (**Mr. Lawson**; defeated by 21 votes to 20).

(*h*) To increase from 3 months to 9 months the notice required to be given by the landlord of his intention to increase the rent of a controlled house (see 15292, provisions 8 and 9). (**Mr. C. Key**; negatived by 274 votes to 233).

(*i*) To retain the tenant's right of appeal to a rent tribunal in respect of certain houses (**Mr. Blenkinsop**; defeated by 276 votes to 232).

(*j*) To delete from the Bill a sub-section empowering the Government, with the consent of Parliament, to extend decontrol to other classes of houses and flats. (**Mr. Lindgren**; defeated by 283 votes to 232 after Mr Bevins, Parliamentary Secretary to the Ministry of Housing, had stressed that the Government intended to extend decontrol gradually to all house property in Britain).

(*k*) To reduce the period allowed to the landlord in which to carry out repairs to houses and flats for which the necessity of repairs had been certified (**Mr. J. B. Hynd**; defeated by 241 votes to 216).

Two further amendments to Clause 9, moved by Conservative back-benchers, were also defeated.

The first amendment (moved by **Sir Ian Horobin**), intended to prevent speculators in house property from making quick exorbitant profits out of the Bill, stipulated that houses purchased on or after Nov. 6, 1956 (the date of its introduction) should not be subject to decontrol. Although this amendment was carried in Standing Committee, Mr. Brooke moved its deletion in the Report stage (March 26), explaining that he had carefully examined its probable effects and had decided that it would hit those who engaged in normal honest transactions much harder than speculators. The deletion of Sir Ian Horobin's amendment was subsequently agreed to by 268 votes to 237.

The second amendment (moved by **Mr. Rees-Davies** on March 26) was intended to place a limitation on excessive rent demands for decontrolled property by providing that, for three years after a house or flat had been decontrolled, the rent should be limited to 2½ times its gross rateable value.

Mr. Brooke, advising its rejection, said that although the Government sympathized with the sponsors' aim of preventing sudden or speculative rises in populous areas, they feared that if a maximum were laid down by law there would be a danger of its becoming also the accepted minimum, since people would come to regard it as having Government approval. "In seeking to protect tenants in more populous areas," he added, "the amendment would have the effect of penalizing a larger number of tenants elsewhere." The amendment was defeated by 267 votes to 242—a Government majority of only 25, about 12 Conservatives abstaining from voting.

Mr. Butler (Leader of the House) had announced on Jan. 31 that, in view of the slow progress being made in Standing Committee, the Government had decided to introduce a "guillotine" motion setting out a time-table for the remaining stages of the Bill, and providing for the completion of the Standing Committee stage by March 13 and the allocation of three days for the Report stage and third reading. The guillotine motion was accordingly introduced on Feb. 4 amidst strong Opposition protests, but was eventually carried by 307 votes to 252 after an Opposition amendment for its rejection had been defeated by 310 votes to 255.

The Bill received its third reading on March 28 by 321 votes to 261.

House of Lords' Amendments.

After giving the Bill a second reading on April 16, the House of Lords adopted the following amendments without a division in the Report stage on May 21 :

(1) Allowing expenditure incurred by landlords in carrying out street works to count as expenditure on improvements (thus permitting increases in rents) (moved by **Lord Meston**).

(2) Enabling any increase or decrease in rates which might occur during the transitional 15 months following decontrol to be passed on to the tenant (moved by **Lord Broughshane**).

A number of amendments by Opposition peers had previously been defeated during the Committee stage, notably amendments to limit the maximum rent increase for controlled houses to 15s. a week;

to raise from £40 to £60 the minimum rateable value of houses to be decontrolled in London; to raise the minimum rateable value for such houses in the rest of England and Wales from £30 to £45; to raise it in Scotland from £40 to £60; and to ensure that no further decontrol should take place for three years after the Bill's enactment.

The Bill was given a third reading by the House of Lords without a division on May 28; received the Royal Assent on June 6 after the Lords' amendments had been agreed to by the Commons; and came into effect on July 6, 1957.

A. POLAND. — Population Statistics. - Polish Nationals Abroad.

The Polish Central Statistical Office reported in November that a recent census had shown the population of Poland to be 28,234,000 at the end of June 1957, of whom 12,747,000 lived in urban areas and 15,487,000 in the countryside. Women, of whom there were 14,654,000, outnumbered men by 1,074,000—the proportion being 108 women to 100 men in the country as a whole, and 111 to 100 in the towns. The most thickly populated voivodships (provinces) were Katowice (3,103,000), Warsaw (2,293,000) and Cracow (1,966,000).

It was stated on Dec. 7 by the Polish Embassy in London that over 9,000,000 Poles were living in 30 countries outside Poland, the largest number being in the United States. The U.S. census of 1950 had shown 5,332,115 persons of Polish origin in the U.S.A., and it was estimated that this figure had since risen to 7,000,000 as a result of population increase. In addition, there were an estimated 750,000 Poles living in France; between 250,000 and 500,000 in Brazil; 250,000 in Canada; about 145,000 in Great Britain, largely wartime and post-war emigrés; about 130,000 in the German Federal Republic, mainly in Westphalia and the Rhineland; between 120,000 and 150,000 in Czechoslovakia; and over 120,000 in Argentina.—(Polish Embassy Press Office, London)

B. UNITED KINGDOM. — Ministerial Responsibilities. - Report of Privy Councillors' Study Group.

The Prime Minister informed the House of Commons on Nov. 5 that he had received the report of the Committee of Privy Councillors, under the chairmanship of Lord Attlee, which had been asked to consider possible methods of reducing the ministerial burden falling on senior members of the Government. Mr. Macmillan said that no further formal inquiry was needed into this question, and suggested that the solution to the problem lay in allowing junior Ministers to relieve their principals of some of the work. He hoped, therefore, that M.P.s might be "more ready to accept junior Ministers as spokesmen for the department on many occasions." Also, he hoped that M.P.s would not object if Parliamentary Secretaries and Ministers of State took an increasing share of responsibility in piloting Bills through the House.—(Times)
(Prev. rep. 15555 B.)

C. ASTRONOMY. — Soviet Radio Telescope.

The Tass Agency announced on Nov. 29 that the world's most powerful radio telescope had been built in the Soviet Union (the site was not disclosed). Quoting Dr. Semyon Khaikin, one of Russia's leading astronomers, the agency said that the telescope was 130 metres (about 426 feet) in length and that its reflector had a diameter of 400 square metres (about 4,300 sq. feet). Dr. Khaikin was also quoted as saying that the telescope was capable of receiving signals with a wavelength of only three centimetres, making it possible for scientists to "penetrate into the depths of the universe to distances of hundreds of millions of light-years."
(Soviet Embassy Press Department, London) **(15838 B.)**

D. EGYPT. — Secretary-General of National Union.

President Nasser issued a decree on Nov. 10 appointing Lt.-Colonel Anwar Sadat as Secretary-General of the National Union, the single-party organization set up a week earlier. Colonel Sadat had been Vice-President of the National Assembly and Secretary-General of the Islamic Congress. His new post will be the third most important in Egypt, ranking after the President himself and M. Aly Sabry, the Minister for Presidential Affairs.—(Le Monde, Paris)
(Prev. rep. 15840 B.)

E. AUSTRALIA. — New Army Chief of Staff.

The Federal Defence Minister, Sir Philip McBride, announced in November that Lieut.-General A. R. Garrett had been appointed Chief of General Staff of the Australian Army in succession to Lieut.-General Sir Henry Wells, retiring in March 1958. General Garrett is at present G.O.C. Southern Command, Victoria.—(Australian News Bureau) **(13712 F.)**

F. SHIPPING. — International Maritime Law Conference. - New Draft Conventions.

A Diplomatic Conference on International Maritime Law, attended by representatives of 31 countries, met in Brussels from Sept. 30 - Oct. 10 under the presidency of M. Albert Lilar, the Belgian Minister of Justice.

The countries represented were: Argentina, Australia, Austria, Belgium, Brazil, Canada, Denmark, Egypt, Finland, France, Western Germany, Greece, India, Indonesia, Israel, Italy, Japan, Netherlands, Norway, Persia, Peru, Poland, Portugal, Sweden, Switzerland, the U.K., the U.S.A., the U.S.S.R., Vatican City, Venezuela, and Yugoslavia.

The conference approved three conventions, dealing respectively with (1) the limitation of shipowners' liability for loss of life, bodily injury, or damage to property as a result of accidents at sea; (2) a new international understanding on the treatment of stowaways; (3) the unification of rules relating to the carriage of passengers by sea and the shipowners' specific liability to passengers carried by them.

Shipowners' General Liability. This Convention, replacing an agreement which had been in force since 1924, stipulated that compensation by the shipowner for material damage should be limited to 1,000 Swiss gold francs (£24 at the current exchange rate) per gross ton for damage to property, and to 3,100 Swiss gold francs (£74) for loss of life or bodily injury. For "mixed damages"—i.e. where both personal injury and damage to property were involved—the 3,100 Swiss gold francs would be divided, with 2,100 gold francs (£50) reserved for indemnity for bodily harm.

It was explained in the Press that the main issue before the conference in fixing shipowners' maximum liability was whether the limit should be based on the ship's gross tonnage—as advocated by the U.K.—or on her value, in accordance with the previous practice of certain other countries. U.K. shipowners had indicated that, in the interests of international agreement, they were prepared to sacrifice their existing very low limitation (£8 per gross ton for damage to property or £15 per gross ton where there was loss of life). The figures eventually agreed upon corresponded closely with the U.K. suggestions.

The convention was signed on Oct. 10 by 22 countries, with nine abstentions, including the United States and the U.S.S.R.

Stowaways. It was provided in this Convention that shipmasters might land stowaways at the first convenient port, unless they were under deportation orders or orders prohibiting entry into the country concerned.

Those landed would be taken charge of at the shipowner's expense, and normally the immigration authority at the port of landing would send them back to the country whose nationality they claimed. In the case of stateless persons, the authority would have the choice of either sending a stowaway back to the port at which he had embarked or to the flag country of the ship on which he was found. Stowaways would remain liable to police prosecution, but the convention would not affect a country's right to grant political asylum, nor would it apply to political refugees.

This Convention was signed on Oct. 10 by 11 countries; Britain, the Netherlands and the Soviet Union voted against the convention, whilst 14 countries abstained. The British and Netherlands delegations withheld their signatures on the ground that the convention would make too many inroads on immigration control.

Shipowners' Specific Liability to their Passengers. This draft convention for the unification of rules relating to the "international" carriage of passengers by sea sought to make the carrier uniformly liable for death or bodily harm arising out of his fault or from neglect by his servants, but limited his liability to 250,000 gold francs per head. It laid down that, failing evidence to the contrary, fault or neglect should be presumed where the death or injury resulted from shipwreck, collision, stranding, explosion, or fire, and that all provisions which sought to exonerate the carrier from his responsibility, or to fix a lower limit of damages than that fixed by the convention, should be null and void. The convention would only apply to seagoing ships and would not modify obligations arising from the first convention above [i.e. on shipowners' general liability.]

The convention, however, was not signed at the conference, as many delegates felt that they should first consult their Governments because of important changes made in the text.

The three draft conventions had been based on earlier drafts worked out at a congress of the *Comité Maritime International* held at Madrid in 1955.

The first two Conventions will come into force six months after ratification by at least ten signatory States, of whom five must have a minimum of 1,000,000 gross tons of shipping each.—(Lloyd's List and Shipping Gazette - Financial Times)

G. UNITED NATIONS. — New Under-Secretary.

The U.N. Secretary-General announced on Dec. 15 that Sir Humphrey Trevelyan, formerly British Ambassador in Cairo, had been appointed an Under-Secretary in the United Nations, to deal with "such special political questions" as would be assigned to him. He will have the same status as Dr. Ralph Bunche (U.S.A.) and M. Dobrynin (U.S.S.R.), both of whom on occasion act *ad hoc* for Dr. Hammarskjöld.
(U.N. Information Centre, London)

DECEMBER 21—28, 1957

A. MIDDLE EAST. — The Syrian-Turkish Dispute. - Consideration by General Assembly. - Syria drops Request for U.N. Investigation. - Ending of Crisis.

Discussion of Syria's complaint against Turkey opened in the U.N. General Assembly on Oct. 22, following the Assembly's decision to place the question on its agenda at the request of the Syrian delegation (see page 15814). After embittered and acrimonious debates extending over a week, the Assembly eventually decided on Oct. 30 to take no further action on the matter—a decision in which both Syria and Turkey concurred.

At the outset of the Assembly's debate, **M. Seyfulla Esin** (Turkey) moved—on a point of order—that further discussion be deferred to give the King of Saudi Arabia an opportunity to mediate in the dispute. He pointed out that Turkey had already accepted King Saud's mediation offer, that the Turkish Foreign Minister (M. Zorlu) was at that moment on his way to Saudi Arabia, and that Mecca Radio had officially announced that King Saud had "offered his good offices to mediate between Turkey and Syria."

Dr. Zeineddine (Syria) strongly opposed M. Esin's suggestion, asserting that talk of mediation was aimed only at "confusing the situation" and "showing up my country in a bad light." Though paying tribute to King Saud as a "great Arab king," he affirmed that "mediation does not really exist" and that the "so-called mediation" was being used as an excuse "by those who wish to avoid an investigation of the situation."

M. Gromyko (the Soviet Foreign Minister) made a bitter attack on NATO, the Baghdad Pact and the "Eisenhower doctrine" in the Middle East, and reiterated the allegation that Turkey and the United States were planning armed aggression against Syria. After referring to "attempts to utilize [Syrian] conspirators who had fled abroad," M. Gromyko alleged that Turkey and the U.S.A. aimed at setting up a Syrian "puppet" government which would "consist of American agents generously supplied with money from Washington and pursuing a policy conforming to American plans." He alleged also that "reactionary" elements in Syria were plotting to form a Syrian Government-in-exile which would be "transplanted to Syria with the support of Turkish armed forces." In the course of his speech—lasting over an hour—M. Gromyko was three times called to order by the President of the Assembly (Sir Leslie Munro) for deviating from the point of order raised by the Turkish delegate; after a heated altercation with Sir Leslie, M. Gromyko eventually quitted the speaker's rostrum in protest.

M. Salah Bitar (Syrian Foreign Minister) repeated M. Gromyko's allegations against Turkey and the United States, and accused both countries of giving the impression that Syria had aggressive intentions against her neighbours. After accusing Turkey of "aggressive" troop concentrations on Syria's northern frontier, and alleging that Turkish aircraft had violated Syrian airspace, he accused the United States of backing Turkish "designs" on Syria and of seeking to dominate Arab countries through the "Eisenhower doctrine." M. Bitar called, firstly, for the "withdrawal of Turkish troops from the frontier and the halting of provocative acts"; and secondly, for the appointment by the General Assembly of a U.N. commission to carry out an on-the-spot investigation and report back within ten days.

M. Esin (Turkey), in reply, refuted the Soviet and Syrian allegations as "baseless" and "completely unfounded," emphasizing that his country desired friendship with Syria and that Turkey had "never massed any forces on any of her frontiers beyond the needs of defensive precautions." Minor border incidents, he said, had been exaggerated out of all proportion by the Syrian propaganda machine, and the only incident of any seriousness had been that of Oct. 8, when a Turkish railway worker had been slightly wounded by a Syrian frontier guard [see page 15813, first column.] Referring to M. Bitar's suggestion of a U.N. inquiry commission, M. Esin said that Turkey considered it appropriate for the U.N. to investigate developments in Syria; in addition, it would be "natural for the free world to ask the Soviet Union why such huge forces are kept under arms at the frontiers of the free countries."

Mr. Cabot Lodge (U.S.A.) strongly supported King Saud's offer of mediation, declaring that there were only two facts in the situation which should move the Assembly to take action—King Saud's offer and its acceptance by Turkey, "acts of good faith which should be matched by Syria." After refuting the Soviet and Syrian allegations as completely untrue and unfounded, Mr. Cabot Lodge warned the Soviet Union—"merely for the record"—that "the heart of the North Atlantic Treaty is the statement that an attack on one is an attack on all; in other words, we stay where we are unless we are attacked." He added: "The North Atlantic Treaty was only evolved after the Soviet Union had gobbled up Lithuania, Latvia, Estonia, Poland, Czechoslovakia, Hungary, Bulgaria, Rumania and Albania . . . While we were working for peace last year, the Soviet Union was butchering Hungary. Is it any wonder that people all over the world are today asking themselves: 'Last year it was Hungary; is it Syria this year? . . .'"

After further debate—in which Egypt alone among the Arab countries expressed full support for Syria—the Paraguayan delegate moved that the discussion be suspended pending the outcome of mediation efforts, and that the Assembly should reconvene to discuss the matter when called upon to do so by Sir Leslie Munro. Dr. Zeineddine thereupon moved the immediate adjournment of the Assembly (which would have prevented it from voting on the Paraguayan proposal). After this had been defeated by 36 votes to 30, Dr. Zeineddine moved—as an amendment to the Paraguayan resolution—that the Assembly should adjourn for three days before resuming its discussion of the Syrian complaint. This was agreed to by a majority of only one vote (33 to 32, with 15 abstentions), and the debate was accordingly suspended until Oct. 25. Delegates of more than 30 countries spoke between the latter date and Oct. 30, the principal speeches being those of Mr. Cabot Lodge (U.S.A.), Commander Allan Noble (U.K.) and M. Selim Sarper (Turkey).

Mr. Cabot Lodge denounced M. Gromyko's speech as "calumnious, provocative, and contrary to the ideals of peaceful settlement, truth and integrity to which this Assembly is dedicated." After saying that the Assembly had witnessed an attempt by the Soviet Union "to bully the world into submission," he declared: "Here is a Government [the U.S.S.R.] which has been condemned by the United Nations three times in the past year for its actions in Hungary; which has violated the expressed wishes of the U.N. more than 30 times in the past eight years; which has abused its veto power 82 times . . . Here is a Government operating on the maxim 'claim everything; concede nothing; and if defeated, allege fraud.' Here is the chronic law-breaker trying to sit in the judge's seat and sentence the whole law-abiding community to gaol. Here is the arsonist trying his best to start another fire and demanding the right to lead the fire brigade . . ."

Mr. Lodge warned the U.S.S.R. that "the United States will not be stopped by threats or by defamation from continuing to offer its understanding and support to those nations of the Middle East which are being threatened by the Soviet Union and whose independence the Soviet Union seeks to destroy."

Commander Noble said that the Syrian charges against Turkey clearly formed part of a "concerted campaign" with its "origin and inspiration" in Moscow. "The only recent parallel," he declared, "is the attempt to persuade the world that the events in Hungary a year ago were the result of a plot inspired by the United States. It is not a coincidence that the authors of that discredited piece of horror fiction are the same as those who now try to persuade us that a similar plot has been laid against Syria."

After saying that the Soviet Union had three targets for its propaganda campaign, Commander Noble continued: "The first target is Turkey, and the two defensive alliances of which she is a member: the Atlantic Alliance and the Baghdad Pact. It is precisely because Turkey is a link between these two alliances that she was singled out for this propaganda assault on the eve of her general election, and that an attempt is being made to persuade the Assembly that she is planning aggression . . . The second target of the Soviet campaign must surely be the Arab world . . . If Arabs could really be brought to believe that Syria was menaced by invasion from Turkey and had been saved from this menace by Soviet intervention, great benefits would accrue to the Soviet Union and the position of the Arab friends of Turkey and the Western world would be gravely shaken . . . The third target at which the Soviet Union is aiming is evidently this Assembly itself. With supreme cynicism the Soviet Government has used the Assembly to secure maximum publicity for its propaganda campaign, and has tried to stampede the Assembly into taking hasty action which it would then represent elsewhere as giving support to its accusations against Turkey and the United States."

Commander Noble called on the Assembly not to be unduly disturbed by "this Soviet hullabaloo," declaring that the U.S.S.R. was "trying to create a war scare and hoping to attain its ends by every mischievous and dangerous means short of war."

M. Selim Sarper recalled that the "fantastic" Soviet and Syrian accusations had been repeatedly denied by Turkey, which "values the independence, sovereignty and territorial integrity of Syria and can never entertain aggressive designs against any of its neighbours." After pointing to Turkey's unblemished record in the United Nations, and asking "whether the record of her accusers is as good," he continued:

"When an offer was made by King Saud to mediate between Turkey and Syria, the Turkish Government . . . promptly accepted it. Although the President of the Syrian Republic also accepted the mediation offer, the present régime in Syria has declared its opposition to any acceptance and has done all in its power to obstruct this benevolent offer.

"References have been made to the disposition of Turkish defence forces within the frontiers of Turkey. When violent threats are being hurled against a country, coupled with a campaign of false accusations, when a complete co-ordination of policies and actions is clearly witnessed between the northern and southern neighbours of that country, is it too much to expect precaution and defensive vigilance on the part of the country concerned? Turkey has lately been in such a position. The most fantastic accusations and the most violent threats have been hurled against us in a co-ordinated manner from the north and the south of our country. Is there any Government that would not feel anxious in such circumstances?

"We have repeatedly stated that Turkey has never placed any forces on any of its frontiers which go beyond the needs of defensive precautions. On the other hand, we are still waiting for a convincing answer from the Syrian Foreign Minister as to why a country like

his own, which has no navy and no submarines, should be building a naval base and a submarine base. We have also asked some other questions which have remained unanswered. There are many more that we could ask . . .

" The charges brought against Turkey and the United States are unfounded and inconceivable . . . The Foreign Ministers of Syria and the Soviet Union use these allegations to threaten and intimidate my country . . . . Not only does he [Mr. Gromyko] dwell upon and elaborate these fictitious accusations, but he uses the most vehement language against NATO, the Baghdad Pact, and other similar organizations created by the free and peace-loving countries of the world for defensive purposes. Mr. Gromyko should know by now that peace-loving countries cannot and will not be intimidated to dissolve their defensive organizations, in which they see their only guarantee for survival."

Two resolutions were presented to the Assembly on Oct. 30 : (1) a Syrian resolution asking the Assembly to appoint a fact-finding commission to " investigate the situation in the area of the Syrian-Turkish border " ; and (2) a seven-nation resolution (sponsored by Canada, Denmark, Japan, Norway, Paraguay, Peru and Spain) requesting the U.N. Secretary-General to promote a settlement through discussions with Syrian and Turkish representatives.

The Syrian resolution proposed (*a*) that the Assembly should set up a fact-finding commission of seven members, of whom two would be designated by Syria, two by Turkey, and three by common agreement between the two countries ; (*b*) that this commission should visit the Syrian-Turkish border area immediately ; and (*c*) that it should submit a report to the Assembly and the Security Council within two weeks from the date of adoption of the resolution.

The seven-nation resolution stated that Dr. Hammarskjöld's discussions with Syrian and Turkish representatives would be " without prejudice to efforts being made under Article 33 " of the U.N. Charter. [This article provides that parties to a dispute shall first of all seek a solution through peaceful means of their own choosing.] It expressed confidence in the successful outcome of Dr. Hammarskjöld's efforts to bring about a settlement.

After the resolutions had been tabled, Dr. Sastroamidjojo (Indonesia) appealed to the sponsors of both resolutions not to press them to a vote ; urging Syria and Turkey to " live together in friendship and seek conciliation," he pointed out that the principle contained in Article 33 of the Charter was also one of the principles proclaimed at the Bandung conference of Afro-Asian countries, to which both Syria and Turkey had subscribed.

On behalf of the sponsors of the seven-nation resolution, Mr. Hans Engen (Norway) said that they would accept the Indonesian suggestion if Syria agreed not to press for a formal vote on her own resolution. M. Salah Bitar, for Syria, stated that his Government would " heed the appeal of an Asian sister-State " and would not ask for a vote on its resolution ; he went on to express the hope that Turkey would take " all necessary steps to end the tension resulting from the concentration of Turkish troops near the Syrian border," since this would " greatly improve relations between the two States." M. Sarper, for Turkey, thanked Dr. Sastroamidjojo for his " wise suggestion," and said that the Assembly's debate would have served a useful purpose if it had focussed world opinion " on the reasons which have brought about the situation now prevailing."

In adjourning the debate, Sir Leslie Munro expressed his conviction that the Assembly would regard the attitude now taken by Syria and Turkey as " a satisfactory outcome of the debate."

Mr. Cabot Lodge, speaking before the adjournment, welcomed the decision not to set up an investigation committee " which would have dignified an artificial concoction and war scare drummed up by the Soviet Union " ; he added that the debate had " shown clearly the spurious nature of the Soviet concoction, which was in effect admitted by M. Khrushchev himself " at a Turkish Embassy party in Moscow [see below]. Mr. Lodge said that the Assembly's decision not to vote on either resolution had established " for the first time the precedent that Assembly consideration of an important matter can be completed without even getting to a resolution "—a precedent which was " of great importance for the future."

Commander Noble also referred to M. Khrushchev's remarks at the Turkish Embassy reception, saying that they were " truly significant " and seemed to indicate that the Soviet Government were in fact of the opinion that there had never been any danger of war on the Turkish-Syrian border.

M. Khrushchev's remarks, to which Mr. Cabot Lodge and Commander Noble referred, were made on Oct. 29 at a reception held at the Turkish Embassy in Moscow in celebration of the Turkish National Day.

In view of the intense Soviet propaganda campaign which had been directed against Turkey in the preceding weeks, Western correspondents in Moscow said that the diplomatic corps in the Soviet capital were " astounded " when M. Khrushchev, accompanied by Marshal Bulganin and M. Mikoyan, arrived at the Embassy " with beaming faces " to attend the reception. M. Khrushchev and the other Soviet leaders displayed the greatest cordiality towards the Turkish, American, British and other Western ambassadors, a toast being proposed by M. Khrushchev to the assembled company in the words : " To peace ! To peace ! Let him be damned who wants war ! Let him fight alone ! But why talk about war anyway —there will be no war." Asked about the talk of war over Syria, M. Khrushchev replied : " The more talk there is of war, the less likely war becomes "

Commenting that " the great war scare has died down," the United Nations Correspondent of *The Times* wrote from New York (Nov. 1) : " Syria, who has cried ' wolf ' several times in recent years, first against Israel and more recently against Turkey and the whole NATO alliance, must realize that the great majority of the 82 member nations are disinclined to believe her version of affairs."

Syrian-Soviet and Syrian-Egyptian Relations.

Further developments in the relations between Syria on the one hand and the U.S.S.R. and Egypt on the other are summarized below, in continuation of report 15811 A :

Syrian-Egyptian Federal Union. Unanimous approval for a Federal Union between the two countries was given in Damascus on Nov. 18 at a joint parliamentary session in which 35 members of the Egyptian Parliament sat with the Syrian Chamber of Deputies. The Speakers of the Egyptian and Syrian Parliaments took the chair in turn during the joint session, from which the Syrian Opposition deputies absented themselves. An identical resolution was approved on the same day by the Egyptian National Assembly in Cairo.

Ratification of Syro-Soviet Agreements. Ratification instruments of the Syro-Soviet economic and technical co-operation agreements were exchanged in Moscow on Dec. 11 between the Soviet Government and a Syrian delegation headed by M. Khaled el-Azem, who had negotiated the agreements with the U.S.S.R. earlier in the year. The agreements had previously been ratified by the Syrian Parliament and the Supreme Soviet of the U.S.S.R. M. el-Azem had discussions with Marshal Bulganin, M. Mikoyan, M. Gromyko, Marshal Malinovsky, and other Soviet leaders before returning to Damascus.

M. Khaled el-Azem had been appointed Finance Minister in the Syrian Government on Nov. 18, concurrently with the post of Minister of Defence which he already held. Before leaving for Moscow to ratify the Syro-Soviet agreements, he was also given the status of Deputy Prime Minister by presidential decree.

The Bulganin-Menderes Correspondence.

Following the Turkish Prime Minister's reply to Marshal Bulganin's letter of Sept. 10 (see 15811 A), the Soviet Prime Minister sent a second letter to M. Menderes on Nov. 22.

The letter was largely a recapitulation of the Soviet viewpoint as previously expressed by Marshal Bulganin, containing allegations against Turkish and U.S. policy similar to those in the first letter. Though worded on the whole in moderate terms, it said that the Turkish Government should " realize that the continuation of the dangerous tension in this area, and the obvious desire to bring more pressure on Syria, may compel the countries interested in ensuring a lasting peace in the Middle East to take measures for the effective maintenance of peace and tranquillity in this area."

After an assurance that the Soviet Union had " no territorial or other claims on Turkey," and that Soviet policy was " based entirely on the Leninist principles of full respect for the territorial integrity, sovereignty and independence of the Turkish State," Marshal Bulganin reiterated his Government's wish for friendship and improved relations between the two countries. He added in this connexion : " For all its well-known and sharp opposition to the North Atlantic bloc and the Baghdad Pact, the Soviet Government believes that Turkey's membership of these military groupings is not in itself an insuperable obstacle to improving present Soviet-Turkish relations."

Détente in Syrian-Turkish Relations.

Although the allegations of Turkish " troop concentrations " were repeated from time to time in Damascus during the last week of October, a Syrian Foreign Ministry spokesman said on Oct. 30 that the tension on the border had " eased." On the following day Syrian and Turkish officials met on the frontier—for the first time since the crisis broke out in the autumn—to examine the local situation and settle complaints arising out of minor incidents.

Despite a Damascus statement of Oct. 26 claiming that King Saud had withdrawn his offer of mediation, the Saudi Arabian Government said on Oct. 28 that the King's " position on the subject of mediation has not changed and still stands as accepted by both parties—Syria and Turkey."—(U.N. (Prev. rep. 15811 A.)

A. KASHMIR. — Security Council Debate on Jarring Report. - Dr. Graham to discuss with India and Pakistan Measures for Peaceful Settlement and Implementation of 1948 and 1949 Resolutions.

Mr. Ghulam Ahmed, the Pakistani delegate at the U.N., requested the president of the Security Council on Aug. 21 to convene a meeting of the Council to consider Mr. Jarring's report on the Kashmir question. The Council accordingly resumed its consideration of this question on Sept. 24, when the Foreign Minister of Pakistan (Mr. Firoz Khan Noon) again put forward his Government's proposals for demilitarization and the stationing of a U.N. force in Kashmir.

Mr. Jarring (Sweden) said in a brief statement that he did not consider it necessary for him to give an oral presentation of his report, which had been at the Council's disposal since the end of April. With the submission of the report, he considered that his duties under the Council's resolution [asking him to undertake the mission] had been terminated.

Mr. Noon said that perhaps the most gratifying part of Mr. Jarring's report was the reaffirmation that both India and Pakistan were committed to the resolutions of the U.N. Commission for India and Pakistan (U.N.C.I.P.) of Aug. 13, 1948, and Jan. 5, 1949 [see 9661 A, 9757 A]. Commenting on Mr. Jarring's statement that his suggestions for mitigating difficulties in the way of a plebiscite had not proved "mutually acceptable," Mr. Noon said that there was nothing in his suggestions which Pakistan had not accepted, and it could therefore be concluded that they had been unacceptable to India. No change of any kind which rendered the holding of a plebiscite impracticable had taken place in Kashmir; the basic factors were the same as nine years ago, and any changes that had taken place in "occupied Kashmir" had been brought about by India in defiance of the Security Council's directives. India's contention that a plebiscite would lead to communal conflict was "a threat of genocide" and "political blackmail."

India's allegation of aggression by Pakistan (Mr. Noon went on) had been dismissed by Mr. Jarring as irrelevant to his task, and neither the U.N.C.I.P. nor any U.N. mediator had called Pakistan an aggressor. The other Indian allegation—that Part I of the resolution of Aug. 13, 1948, had not been implemented by Pakistan—was now put forward for the first time, with the obvious aim of obstructing progress on demilitarization. The suggestion that Pakistan's acceptance of U.S. military aid was a violation of this resolution was "absurd," as the resolution merely prohibited augmentation of the two Governments' forces in Kashmir, and had never contemplated that they should "take no step whatever to improve their defence positions otherwise." Pakistan, he pointed out, had accepted Mr. Jarring's suggestion that the question of whether Part I of the 1948 resolution had been implemented should be referred to arbitration, whereas India had not.

Mr. Noon proposed that all troops, Indian and Pakistani, should be withdrawn from the cease-fire line, and a U.N. force stationed along it. Alternatively, Pakistan was "prepared to remove immediately every Pakistani soldier on the Pakistani side of the cease-fire line," provided that a U.N. force in sufficient strength were stationed along it, and provided that India reduced her troops to the level prescribed by the Security Council in 1952.

Mr. Krishna Menon (the Indian Defence Minister), speaking in the resumed debate on Oct. 9, reaffirmed the Indian view that the basic issue was India's complaint of aggression against Pakistan. He also accused the Pakistani Government of violating the U.N.C.I.P. resolution by promoting a "campaign of sabotage" which, he alleged, had been in progress in Kashmir since June.

Mr. Menon agreed that the Indian Government stood committed to the two U.N C.I.P. resolutions, but maintained that there was a commitment which must be met initially by Pakistan. Although, under Part I of the 1948 resolution, India and Pakistan had agreed not to augment their military potential in Kashmir, and to create and maintain "an atmosphere favourable to the promotion of further negotiations," Pakistan had carried on since 1949 "a continuous campaign of holy war (*jihad*) and hatred propaganda." India had rejected Mr. Jarring's proposal of arbitration on the demilitarization issue because "you don't arbitrate on the obvious," and also because in international law only juridical issues, and not issues affecting a State's "vital interests," were subject to arbitration.

Mr. Menon alleged that in the Pakistani-held areas of Kashmir there was "a vast number" of troops, airfields, and all the accoutrements of war, constituting a threat on India's frontiers. Whilst accepting the U.S. Government's assurance that American military aid to Pakistan was not for use against India, he noted statements by Pakistani leaders and officials of the Baghdad Pact and SEATO countries to support his contention that these alliances were being used by Pakistan to oppose India on the Kashmir question. Mr. Menon alleged that since the Council's last meeting on Kashmir, the strength of the Northern Scouts (a para-military force in Pakistani-held Kashmir) had been doubled or trebled; that this force had been issued with heavier weapons, including mortars; and that one platoon in each "Azad Kashmir" battalion had been trained in guerrilla warfare.

The "most sinister" development, however (Mr. Menon continued) was that "a new wave of aggression" had been launched. A "Kashmir Liberation Front" had been formed by Major-General Akbar Khan [see 15677 A], and between June 18 and Oct. 5 there had been 23 bomb explosions in Kashmir. He alleged that Pakistani Army sources were behind this "sabotage," as the explosives could only have come from Army stocks. Moreover, some captured agents had confessed that they had been trained by Pakistani officers.

Rejecting Mr. Noon's proposal for a U.N. force, Mr. Menon said that India would under no circumstances permit "occupation of any part of Indian soil by foreign troops," and would regard an offer by any nation to participate in such "occupation" as "an unfriendly act." After maintaining that Pakistani troops on the cease-fire line were on Indian territory, Mr. Menon said that what was required was not the occupation of the line by a U.N. force but "the vacation of aggression." Pakistan should disband and disarm the "Azad Kashmir" forces, recognize the State Government of Kashmir, give assurances that she would not permit the passage of irregulars across her territory, and end the "campaign of sabotage, infiltration, and murder," whilst her allies should give assurances that any military aid to Pakistan would not be used in or against India's territory. In return, India would be ready to establish friendly relations with Pakistan and settle all outstanding issues.

Mr. Firoz Khan Noon, replying to the points raised by Mr. Menon, emphasized that any argument as to which party had started "aggression" was "hardly relevant at this stage" and would not conduce to a peaceful settlement. The object of the U.N.C.I.P. resolutions, he emphasized, was the demilitarization of Kashmir, to be followed by a plebiscite under U.N. auspices. Pakistan had accepted 12 proposals to achieve this object, including Mr. Jarring's, each of which India had rejected. Mr. Noon claimed that the Pakistani regular forces and the "Azad Kashmir" forces in Kashmir were far less in number than they were on Jan. 1, 1949, denied that the Pakistani Government knew anything of the bomb explosions mentioned by Mr. Menon; and asserted that these explosions were either "manifestations of the increasing restlessness of a subjugated people" or a "smoke-screen from behind which India is enabled to make further charges against Pakistan." He recalled that Major-General Akbar Khan had been convicted of conspiring to overthrow the Government of Pakistan.

When the Security Council resumed the discussion on Oct. 25, Oct. 29 and Nov. 5, a proposal that Dr. Frank P. Graham (the U.N. Representative for India and Pakistan) should enter into consultations with the two Governments in an attempt to achieve a settlement was put forward by the British representative, Sir Pierson Dixon. It was supported by the U.S.A., Australia, the Philippines, and France.

Sir Pierson Dixon pointed out that neither the United Kingdom nor the Security Council had felt able to pronounce on India's contention that Pakistan was the aggressor in Kashmir; in consequence, they were unable to accept many of the deductions drawn from that contention, however logically they might seem to ensue if the major premise were accepted. The Council had taken the right approach in directing efforts towards progress in demilitarization; and if a U.N. representative could begin conversations with the two parties, and if they entered upon them with the determination to make an advance, progress would be possible. Recalling Dr. Graham's attempts in 1952 to facilitate demilitarization, Sir Pierson suggested that he "could again play a useful rôle in this." **Mr. Wadsworth** (U.S.A.), **Dr. Walker** (Australia), **General Romulo** (Philippines), and **M. Georges-Picot** (France) supported this suggestion, whilst **Dr. Tsiang** (Nationalist China) and **Dr. Nuñez-Portuondo** (Cuba) supported Pakistan's proposal for the despatch of a U.N. force to Kashmir.

Mr. Jarring said that he would be interested to learn the parties' reaction to the Swedish Government's suggestion that certain legal aspects of the dispute might be referred to the International Court of Justice for an advisory opinion. He added that Sweden would not oppose the suggestion that Dr. Graham should resume his conversations with the parties if it met with general support.

M. Sobolev (Soviet Union) said that Mr. Jarring's report reflected the fact that fundamental changes had taken place in the 10 years which had elapsed since the Kashmir question was first put on the Security Council's agenda. In view of these changes, it would be unrealistic to be guided by recommendations and proposals made several years ago. He contended that India had granted the people of Kashmir the right of self-determination through elections, and that the Kashmiris had thereby definitely decided their future. M. Sobolev denounced all proposals for an international force, or for the settlement of the question through mediators, as an attempt by the Western Powers to exercise pressure on India in order to bring about a change in her foreign policy.

Mr. Menon replied at length to the discussion on Nov. 5 and 11; on the latter date he collapsed from exhaustion after speaking for many hours, and was obliged to postpone the conclusion of his speech until Nov. 13.

Referring to Sir Pierson Dixon's statement that the Security Council had felt unable to pronounce on India's "major premise" that Pakistan was the aggressor in Kashmir, Mr. Menon said: "We regard this major premise as not only true but as basic and fundamental . . . It is quite true that they [Pakistan] have not been branded as agressors. Perhaps it is our fault; we did not ask for it at that time. We said that we did not want any name-calling—that we wanted them to call off the aggression. That is all we ask today. Therefore it is not our position that aggression has to be proved. It is our position that the resolutions by which we are engaged are built upon the basis that India has made a complaint of violation of her territory . . . If the representative of the U.K. does not accept that major premise, I am afraid that he is straying from the principles of the Charter."

In support of his allegation that the Baghdad Pact was being used against India, Mr. Menon quoted an *aide-mémoire* submitted by the Iraqi Ambassador in Delhi on June 26, 1956, which stated that the Kashmir question affected the security of the area, and that Iraq, as a member of the Baghdad Pact, "feels that it cannot but be interested in anything that upsets the security of this area." The Turkish Government had submitted a simular Note on May 4, 1956 declaring that "since the Kashmir problem is creating unrest in the Middle East it concerns the Baghdad Pact, which was set up for the defence of that area." Mr. Menon added: "If this is not a military pronouncement, what else is it? I should like to ask both the representative of the U.S.A. and the representative of the U.K. whether this last statement is correct in regard to all members of the Pact . . . Do they subscribe to this statement because it is spoken on behalf of the members of the Baghdad Pact?"

In reply to Hr. Jarring's suggestion that certain legal aspects should be referred to the International Court, Mr. Menon said that if Hr. Jarring meant the question of accession, "that was a part of the law with which Pakistan, the United Kingdom, and India were familiar." Whilst the Indian Government did not reject the idea of appealing to the Court, certain conditions must be satisfied—i.e. assurances must be given that Pakistan would abide by the advisory opinion of the Court, and the former Foreign Minister of Pakistan [Sir Muhammad Zafrulla Khan, now a judge of the International Court] must disqualify himself. On the question of demilitarization, Mr. Menon contended that this referred only to Pakistan, which had "placed troops within India's borders"; India herself was allowed to maintain as many troops as she could or could not afford on her own territory, since no State could be called upon unilaterally to disarm.

Hr. Jarring said on Nov. 13 that his Government had in mind two questions on which the International Court might be asked to give an opinion. These were (1) whether Kashmir's accession to India in 1947 was legally valid; and (2) if a plebiscite were needed to confirm the accession, to what extent India and Pakistan had "assumed precise obligations" regarding the manner in which it should be arranged and the pre-requisites for holding it.

Mr. Noon, replying to Mr. Menon on Nov. 15, declared that "the real reason for the endless repetition by India of baseless charges against Pakistan in regard to her defensive alliances" was "the failure of Indian diplomacy to bring about the political and military isolation of Pakistan." Mr. Menon, he said, had "tried to make moral and political capital out of the fact that India came as a complainant to the Security Council against Pakistan," and his intervention constituted "a major attempt to confuse the issues" and "to confound world opinion." If, however, the Council considered it necessary to go into the question of aggression, Pakistan would insist that "all the transactions in connexion with the accession of Indian States pending before the Security Council, and not only the one single case of Kashmir, must be investigated and pronounced upon."

As regards Hr. Jarring's proposal, Mr. Noon said that the issues involved in the Kashmir dispute were of a political rather than a juridical nature. Any reference to the International Court would merely delay a settlement and might thereby endanger peace, whilst there appeared to be no guarantee that the Court's opinion would be accepted or enforced. He had no doubt, however, that his Government would give due consideration to the suggestion at the appropriate time. He welcomed the idea that Dr. Graham should again visit the Indian sub-continent.

A resolution was submitted to the Security Council on Nov. 16 by the United Kingdom, the U.S.A., Australia, the Philippines, and Cuba authorizing Dr. Graham to visit the sub-continent in order to make recommendations to the two parties, and to work out with them within three months "an early agreement on demilitarization procedures." Dr. Graham was asked to concentrate his efforts on the implementation of the resolution of Aug. 13, 1948, and, in particular, to attempt to reach agreement on "a reduction of forces on each side of the cease-fire line to a specific number, arrived at on the basis of the relevant Security Council resolutions," and having regard to the recommendations contained in his own report of March 1953 [see 12989 A]. The draft resolution also pointed out that both India and Pakistan "recognize and accept" their commitments under the 1948 and 1949 resolutions, which envisaged the holding of a plebiscite in Kashmir. Finally, it called upon the two Governments to co-operate with Dr. Graham.

Before the formal introduction of the draft resolution on Nov. 18, **Mr. Menon** (who had left his sick-bed to take part in the debate) declared that India was totally opposed to it because "it goes against the Charter," and would not honour it if it were approved. The United Kingdom, he alleged, was mainly responsible for the resolution, and had shown a "totally partisan attitude" over the Kashmir issue because she had not forgiven India for her attitude at the time of the Suez crisis. **Dr. Jawad** (Iraq), who was in the chair, ruled Mr. Menon out of order on the ground that the resolution had not yet been officially introduced. Mr. Menon subsequently asked that any words to which Sir Pierson Dixon might have taken objection should be expunged from the Council's records.

Mr. Wadsworth (U.S.A.), who introduced the resolution, said that its sponsors felt that agreement on a reduction of forces on both sides of the cease-fire line would help to reduce tension and promote an atmosphere more conducive to a settlement. **Sir Pierson Dixon** described the resolution as "an attempt to bridge the opposing views of the two Governments in this matter of demilitarization"; he stressed that references in it to earlier decisions or recommendations constituted no attempt "to give some special authority to a previous series of suggestions which have proved unacceptable." **Dr. Walker, General Romulo,** and **Dr. Jawad** also spoke in support of the resolution

Mr. Noon stated on Nov. 20 that Pakistan had "serious objections" to some aspects of the resolution - in particular, to the fact that the subjects proposed for negotiation included the cease-fire provisions of the 1948 resolution, which Pakistan maintained had been fully implemented. His Government would nevertheless offer its fullest co-operation to Dr. Graham.

Mr. Menon, speaking on Nov. 21, recalled that Hr. Jarring's report had stated that the deadlock was over Part I of the 1948 resolution; he (Mr. Menon) maintained, however, that the draft resolution simply referred to the implementation of Part II. In calling upon the two Governments to "formulate an early agreement on demilitarization procedures," the resolution had completely forgotten the implementation of the cease-fire provisions. India was prepared to honour her engagements the moment Pakistan carried out Part I and removed her troops from Kashmir.

M. Sobolev announced that the Soviet Union would veto the resolution, which, he asserted, merely repeated proposals that experience had proved to be fruitless. The fact that no satisfactory solution had yet been found was "primarily due to the Western Powers' attempts to use the Kashmir question in order to carry out their own political plans and to impose an unacceptable decision on one of the parties." Hr. Jarring had come to the conclusion that implementation of the U.N.C.I.P. resolutions had been blocked by the *impasse* in connexion with the carrying-out of Part I of the 1948 resolution, and (M. Sobolev alleged) it was evident that the *impasse* arose from Pakistan's non-compliance with her obligations. The draft resolution served the interests of only one party, Pakistan, and attempted to impose unacceptable conditions on India; hence it was at variance with the provisions of the U.N. Charter, which excluded the possibility of imposing any decision on a member-State. As its adoption would only further complicate an already complicated problem, the U.S.S.R. would vote against it.

After M. Sobolev's statement, Dr. Jawad adjourned the meeting *sine die* to give the Security Council more time to consider the position. On Nov. 28, Hr. Jarring submitted a number of amendments which avoided the use of the word "demilitarization." In this amended form the resolution (*a*) proposed that the Indian and Pakistani Governments should refrain from any statements or actions which could serve to worsen the situation, and should call upon their peoples to help create and maintain an atmosphere conducive to further negotiations; and (*b*) directed Dr. Graham to make every possible recommendation to India and Pakistan for furthering a peaceful settlement and the implementation of the resolutions of Aug. 13, 1948, and Jan. 5, 1949. In this form the resolution was adopted on Dec. 2 by 10 votes to nil, the Soviet Union abstaining.

Before the vote **M. Sobolev** expressed the opinion that the best way of settling the question would be by direct talks between India and Pakistan. The Soviet Union, he stated, could not support the resolution because it retained in the preamble a reference to the importance of demilitarization as one of the steps towards a settlement. It also ignored the main causes of tension, which were "U.S. arms deliveries to Pakistan and the construction of U.S. bases," whilst concentrating on the "secondary" issue of reducing the numerical strength on either side of the cease-fire line.

Mr. Noon stated after the vote that his Government would offer Dr. Graham its fullest co-operation. Mr. Menon said that although the Indian Government did not accept the resolution, it would make no objection to Dr. Graham's visit; he added that "as a person, Dr. Graham is always welcome in India."

The Prime Minister of India, Mr. Nehru, said on Nov. 28 that while Dr. Graham was welcome to visit India, the Indian Government was not prepared to enter into discussions with him or anyone else "in continuation of old talks of several years ago about the quantum of forces and various other things like that." Mr. Nehru had previously stated on Nov. 15 that India was "keeping an open mind" on Hr. Jarring's suggestion to refer certain issues to the International Court.

On the other hand, the Prime Minister of Pakistan (Mr. Chundrigar) rejected Hr. Jarring's suggestion on Nov. 15, declaring that the questions of accession and plebiscite had already been decided several years ago under the Security Council's resolutions, and stressing that the accession of the State could be determined only by "free and impartial plebiscite."

Mr. Noon had alleged in the Pakistani National Assembly on Aug. 24 that Soviet planes were known to have landed in Kashmir, and also alleged that a new aerodrome was being built at Leh (capital of the province of Ladakh) which would be on the route between Delhi and Moscow. Mr. Nehru,

speaking in the *Lok Sabha* on Aug. 26, described these allegations as " flights of fancy " and stated that no Soviet or other foreign aircraft had landed in Kashmir since M. Khrushchev and Marshal Bulganin visited Srinagar in 1955. He added that there was only an improvised landing ground at Leh.
(Indian and Pakistani High Commissioners' Offices, London - U.N. Information Centre, London - Times - Manchester Guardian - New York Times) **(Prev. rep. 15525 A.)**

A. UNITED STATES. — Immigration Act.

A Bill implementing the proposals made by President Eisenhower in his State of the Union message for 1957 for changes in U.S. immigration legislation (see 15350 A) was submitted by the Administration to Congress on Jan. 31, 1957, its main provisions being as follows :

(1) Refugees from " Communist persecution and tyranny " would be admitted temporarily into the U.S.A. under conditions to be laid down by the Attorney-General. The number of such " parolees " would not exceed in any one year the average number of aliens who, over the preceding eight years, had entered the U.S.A. under special Acts of Congress outside the basic immigration laws.

(2) Subject to Congressional veto in each individual case, the Attorney-General would have discretionary power to permit " parolees " to remain in the U.S.A. as permanent residents. [In his message to Congress accompanying the Bill, the President explained that while this provision was principally intended to deal with the case of Hungarian refugees, it would also cover the cases of " certain Korean orphans, adopted children, and other aliens " who had been admitted on an emergency basis and whose status remained " indefinite."]

(3) The annual maximum quota of regular immigrants—at present 154,657—would be increased by about 65,000, and national quotas would be calculated on the basis of the 1950 census instead of the census of 1920. [The basic immigration law—the McCarran-Walter Act of 1952 (see 12427 A)—had (i) allotted national immigration quotas in direct relation to the ethnic composition of the U.S.A. as shown by the 1920 census ; (ii) fixed the total annual quota at one-sixth of one per cent of the total white population living in the continental United States in 1920. By the time of the 1950 census, however, both the total population and its ethnic composition had changed considerably.]

(4) Countries—such as Italy and Greece—which had large waiting lists for immigration places should be entitled to make use of places habitually left unused by other countries, such as Great Britain and the Irish Republic. The unused places should be distributed among the countries requiring them in relation to the ethnic composition of actual immigration into the U.S.A. over the period 1924-1955.

(5) Places unused in one year should not lapse (as under existing law) but should remain available for use in the following year, when they would be pooled and distributed on a " first-come, first-served basis," without regard to the applicant's country of origin. Such places, however, would be restricted to aliens qualifying for preferential treatment under existing law—i.e. those with needed skills or with close relatives already in the United States.

(6) The so-called " mortgages " on quotas should be eliminated. [In the immediate post-war period about 400,000 displaced persons had been admitted permanently into the U.S.A. on an emergency basis. Such admissions, however, were charged against future quotas, so that in some cases quotas had been partially " mortgaged " far into the future—e.g. half the Greek quota was " mortgaged " until the year 2018.]

(7) Orphans adopted or to be adopted by American citizens should be treated as a special category and admitted without reference to the quota system.

(8) The Attorney-General could authorize admission outside the quota system for the following three categories : (i) persons having close relatives in the United States ; (ii) " veterans " (i.e. ex-servicemen) ; and (iii) officials of religious organizations. [The President explained that in recent years private immigration Bills covering individual cases—mainly in the above categories—had amounted to more than one-third of all Congressional enactments. By the new proposal it was hoped to remove this " unnecessary burden " on Congress and the President.]

(9) Aliens on temporary visits to the U.S.A. would no longer need to be finger-printed on entry.

(10) Inspection procedures as regards aliens merely in transit through the U.S.A., or entering the U.S.A. from Alaska or Hawaii, should be considerably relaxed.

(11) Arrangements should be made to regularize the position of the large number of refugees who, in the immediate post-war period, had given false information in visa applications so as to avoid repatriation to Communist countries.

(12) The judicial procedures whereby aliens might appeal against deportation orders should be limited and more carefully defined. [The President explained that these procedures had been gravely abused by criminals, drug traffickers, subversives, etc.]

Congressional action on the Administration's proposals was delayed for many months. In the case of the Senate, this was due to the fact that its Judiciary Committee was almost exclusively preoccupied with the Civil Rights legislation (see 15909 A). In the House of Representatives, the Bill was held up in the Immigration Sub-committee of the Judiciary Committee, whose chairman (Representative Walter, co-author of the McCarran-Walter Act) was one of the leading opponents of the new legislative proposals.

On Aug. 20, however, the Senate Judiciary Committee approved a Bill considerably narrower in scope and omitting most of the proposals to which the President had attached the greatest importance. Its main provisions were :

(1) 18,656 visas left unused when the Refugee Relief Act [see 13152 A] expired at the end of 1956 should be revalidated for use by refugees whose relatives had been admitted to the U.S.A., but who were themselves still waiting for places under the quota system.

(2) The system of " mortgages " should be abolished and the countries concerned should start from scratch with their full annual quotas. It was estimated that this provision would enable about 8,200 immigrants to be admitted annually for an indefinite number of years.

(3) No action should be taken against persons who had given false information on entry into the U.S.A. so as to avoid deportation to Communist countries. It was estimated that about 15,000 persons fell into this category.

(4) Alien orphans up to 14 years of age, including those adopted or to be adopted by American citizens, should be admitted in unlimited numbers for a period of two years. In addition, the existing requirement whereby two years' residence was necessary before they could become U.S. citizens should be waived.

(5) Persons with needed skills should be admitted on a non-quota basis. It was estimated that some 27,000 people would be admitted within a short period under this provision.

(6) Foreign diplomatists who had broken with their own governments should be granted the status of permanent residents. This category, however, would be limited to 50 a year and each case would be subject to Congressional veto.

(7) The existing requirement of finger-printing for alien visitors should be waived for nationals of countries which did not fingerprint American visitors [see 15809 C.].

(8) Existing barriers to the admission of the illegitimate children or stepchildren of American parents should be abolished.

(9) The prohibition of the admission of tubercular relatives of U.S. citizens should likewise be ended.

In this form the Bill was approved by the Senate on Aug. 21 (by 65 votes to 4) and by the House of Representatives on Aug. 28 (by 293 votes to 58). It was signed by President Eisenhower on Sept. 11.

In a message accompanying his signature, the President described the Bill as " a disappointment in that it fails to deal with many serious inequities." He said that it was " particularly regrettable " that the question of " the thousands of brave and worthy Hungarian refugees " in the U.S.A. had been ignored, but expressed the hope that the full range of his earlier recommendations would be " promptly considered " by the next session of the 85th Congress.

The State Department announced on Sept. 12 that Mr. Robert C. McCollum had been appointed co-ordinator of the additional immigration programme deriving from the new Act.
(New York Times - New York Herald Tribune)
(Prev. rep. Immigration, 15809 C ; 13922 A ; 12761 A ; McCarran-Walter Act, 12427 A.)

B. UNITED NATIONS. — International Atomic Energy Agency. - Appointment of Deputy Directors-General.

The Director-General of the International Atomic Energy Agency (Mr. W. Sterling Cole) announced on Dec. 21 that four Deputy Directors-General had been appointed to supervise the principal activities of the Agency : Dr. Paul Jolles (Switzerland) to be in charge of administration, secretarial affairs, and external relations ; Professor V. V. Migulin, professor of physics at Moscow University, to be in charge of information and documentation ; M. Hubert de Laboulaye, of the French Atomic Energy Commission, to take charge of technical work ; and Dr. Henry Seligman, of the U.K. Atomic Energy Research Establishment at Harwell, to head the Agency's department of isotopes and research. In addition, Dr. Karl Gruber (Austrian Ambassador in Washington) would act as special adviser in connexion with the establishment of the I.A.E.A. in Vienna.—(U.N. Information Centre, London) **(Prev. rep. 15845 A.)**

C. DENMARK - SOUTH VIETNAM. — Diplomatic Relations established at Legation Level.

It was announced in Copenhagen and Saigon on Dec. 9 that the Danish and South Vietnamese Governments had decided to establish diplomatic relations at legation level, and that Mr. Seidenfaden, the Danish Minister to Siam, would be concurrently accredited in Saigon.—(Berlingske Tidende, Copenhagen - Vietnam Press Office, Saigon)

A. UNITED KINGDOM. — Trade Figures, 1956 and January-September, 1957. - Exports of World Manufactures in 1956. - Comparative British Position.

Monthly trade figures for the first nine months of 1957 were as follows :

	Imports	Exports	Re-Exports	Adverse Balance
		(£ million)		
January ..	376.5	261.0	11.7	103.8
February ..	320.8	278.2	10.9	31.7
March	361.7	296.9	16.4	48.4
April	349.7	272.2	8.6	68.9
May	374.4	302.9	11.8	59.7
June	323.8	275.8	10.1	37.9
July	359.5	281.4	9.4	68.7
August ..	335.7	269.4	10.5	55.7
September ..	308.4	246.3	9.8	52.3

The quarterly figures for the same period in 1957 are shown below :

	Imports	Exports*	Adverse Balance
		(£ million)	
1st quarter	1,059	875	184
2nd quarter	1,048	881	167
3rd quarter	1,004	827	177

*Including Re-exports.

Volume of Trade, January-September, 1957.

Quarterly volume figures are shown below (1954=100) :

	Total Imports	Retained Imports	Total Exports*
1st quarter	117.8	117.2	117.7
2nd quarter	113.5	113.5	118.0
3rd quarter	112.1	112.3	110.2

*Including Re-exports.

Summary—First Half of 1957.

Imports for the first half of 1957 totalled £2,106,900,000, the volume of imports being 2 per cent higher than in the first half of 1956. Exports in the first six months of 1957 amounted to £1,687,700,000, 3 per cent higher in volume than in the corresponding period of 1956. Re-exports amounted to £69,500,000, and the adverse visible balance of £350,400,000 was £36,000,000 more than in the first half of 1956.

Overseas Trade in 1956.

Further details of overseas trade in 1956 (see 15323 B) are given below, the figures for each quarter and for the whole year being as follows :

	Imports	Exports*	Adverse Balance
		(£ million)	
1st quarter	985	816	169
2nd Quarter	992	855	137
3rd Quarter	937	769	168
4th Quarter	976	879	97
Year 1956	3,890	3,319	571

*Including Re-exports.

Divided into the four main categories, value figures of imports and exports in 1956 were as follows :

	Imports	Exports
	(£ million)	
Food, beverages and tobacco ..	1,451	183
Basic materials	1,103	116
Mineral fuels and lubricants ..	414	162
Manufactured goods	906	2,711
Total*	3,874	3,172

*Excluding postal packages, and live animals of a kind not normally used for food.

Volume of Trade in 1956.

Quarterly and annual volume figures are shown below (1954=100) :

	Total Imports	Retained Imports	Total Exports*
1st Quarter	113.2	112.3	112.8
2nd Quarter	113.0	112.3	117.6
3rd Quarter .. .	106.6	106.8	105.5
4th Quarter	109.5	108.4	120.5
Year 1956	110.6	110.0	114.1

* Including Re-exports.

Terms of Trade in 1956.

The terms of trade for 1956 as a whole averaged 99, an improvement on the 1955 figure of 101 (1954=100).

The import price index dropped from 105 (January) to 103 (August) but, because of the effects of the Suez crisis, rose sharply in the last quarter to reach 109 in December. The export price index rose from 104 in January to 108 in December.

Trade Developments in 1956.

Imports. Imports during 1956 were only a fraction of one per cent more than in 1955, partly due to the delay in arrivals owing to the Suez crisis. The demand for imported raw materials levelled out because of the halting of the growth of manufacturing industry output, and imports of timber, non-ferrous metals, and chemicals were all lower than in 1955; the quantity of rubber imports was unchanged despite a big increase in the supplies required for re-export. Higher steel production, however, brought a continued rise in imports of steel-making materials. Imports of coal were halved in quantity, although the reduction was more than matched by a rise of 11 per cent in petroleum imports.

Exports. The value of engineering products exported rose by nearly 14 per cent to £1,270,000,000, the increase being concentrated chiefly on aircraft, ships and boats, and railway vehicles. Exports of metals increased by 11½ per cent to nearly £442,000,000, non-ferrous metals being mainly responsible for the increase (38 per cent). Other important increases were shown by commercial vehicles and chassis (6½ per cent), electrical machinery and apparatus (13 per cent), non-electrical machinery (9½ per cent), and chemicals (5 per cent). Exports of motor cars and chassis fell by 7½ per cent, textiles (including wool tops) by 4 per cent, and coal by 15 per cent.

Area Pattern of Trade in 1956.

There was a marked increase in exports to non-sterling countries, and particularly to the dollar area, greater than in any year since 1950. Details of the geographical distribution of trade are given below :

	1955	1956
	(£ million)	
Imports (c.i.f.) :		
Non-sterling :		
Dollar Area	841	853
O.E.E.C. Countries and Dependencies ..	956	973
Other	516	546
Total Non-Sterling Area	2,313	2,371
Sterling Area	1,570	1,518
Total	3,884	3,889
Total Exports (f.o.b.) :		
Non-sterling :		
Dollar Area	417	542
O.E.E.C. Countries and Dependencies ..	817	909
Other	339	398
Total Non-Sterling Area	1,573	1,849
Sterling Area	1,451	1,469
Total	3,024	3,318
Excess of Imports over Total Exports :		
Non-sterling :		
Dollar Area	424	311
O.E.E.C. Countries and Dependencies ..	139	64
Other	178	148
Total Non-Sterling Area	740	522
Sterling Area	119	49
Total	859	571

Excluding silver bullion repayments to the U.S.A. of £22,400,000, total non-sterling exports rose by 16 per cent to £1,827,000,000, while imports from non-sterling countries, at £2,371,000,000, rose by only 2½ per cent. The adverse trade balance with the non-sterling world fell from £740,000,000 in 1955 to £522,000,000 in 1956, while the deficit with the sterling area declined in the same period from £119,000,000 to £49,000,000. Exports to the rest of the sterling area, amounting to £1,469,000,000, rose much less in 1956 than exports as a whole, being £18,000,000 (or only 1 per cent) higher than in 1955. This was due mainly to stricter import policies adopted by a number of countries in 1955 because of balance-of-payments difficulties. Exports to Australia, New Zealand and South Africa fell by 16, 9 and 8 per cent respectively, but exports to India increased by £38,000,000 as a result of India's industrialization programme.

World manufactures in 1956 amounted to $88,545,000,000, of which the United Kingdom's share amounted to 10 per cent ($7,337,000,000), compared with 19.7 per cent in 1955 and 20.4 per cent in 1954. On the other hand, Western Germany's share rose from 14.8 per cent in 1954 and 15.5 per cent in 1955 to 16.4 per cent in 1956 ($6,320,000,000), and the U.S. share increased from 25 per cent in 1954 and 24.5 per cent in 1955 to 25.3 per cent in 1956 ($9,738,000,000). The share of Belgium-Luxemburg, France, Italy, the Netherlands, Sweden and Switzerland together fell from 28.8 per cent in 1954 and 29.1 per cent in 1955 to 27.8 per cent in 1956 ($10,727,000,000). Canada's share fell from 6.3 per cent in 1954 and 6.1 per cent in 1955 to 5.8 per cent ($2,244,000,000) in 1956, whilst Japan's share rose from 4.6 per cent in 1954 and 5.1 per cent in 1955 to 5.7 per cent ($2,181,000,000) in 1956. (Board of Trade Journal - Times - Financial Times)

(Prev. rep. 15323 B ; 15023 A.)

A. FRANCE - MOROCCO. — Inquiry Commission into Arrest of Algerian Nationalist Leaders. - Resumption of Diplomatic Relations. - Agreement on Administrative and Technical Co-operation. - Cultural and Judicial Conventions. - Incursions into Mauritania by "Liberation Army." - Establishment of Franco-Moroccan Frontier Commission.

Relations between France and Morocco, which had been seriously strained by the arrest of five leaders of the Algerian National Liberation Front (F.L.N.) on Oct. 22, 1956 (see 15329 A), showed a marked improvement during 1957. Negotiations on French technical and administrative assistance to Morocco, which had been suspended by the French Government on Oct. 22, were resumed in Rabat on Dec. 13, 1956, and a series of agreements on questions at issue between the two countries was concluded during 1957. As a condition for the resumption of normal diplomatic relations (which had been interrupted in October 1956 by the resignation of the French Ambassador in Rabat and the recall of the Moroccan Ambassador in Paris) the Moroccan Government insisted, however, that an international commission should inquire into the circumstances of the arrest of the F.L.N. leaders. The French Government agreed to the appointment of such a commission on Jan. 9, 1957.

The membership of the commission was announced on June 26, 1957, as follows: M. René Massigli, formerly secretary-general of the French Foreign Ministry, and onetime Ambassador in London; M. Abdellatif Filali, head of the legal department of the Moroccan Foreign Ministry; Professor de Visscher, professor of international law at the University of Louvain, and a former judge of the International Court of Justice; Professor Ago, of the University of Milan; and M. Mekkaoui, a Lebanese jurist.

Following the commission's first meeting, the appointment of M. Alexandre Parodi (French permanent representative on the North Atlantic Council since 1955) as Ambassador in Rabat was announced on July 23, and that of M. Mohamed Zeghari (the Moroccan Defence Minister) as Ambassador in Paris on Aug. 21. The two Ambassadors took up their posts in September. M. Ahmed Lyazidi, previously Under-Secretary for Commerce, succeeded M. Zeghari as Defence Minister in the Moroccan Cabinet.

Franco-Moroccan Agreements.

The following agreements on administrative and technical co-operation, cultural and judicial questions, and financial matters were concluded between France and Morocco during 1956-57.

Administrative and Technical Co-operation. The agreement on administrative and technical co-operation, was signed in Rabat on Feb. 6 and came into effect on Feb. 15, 1957. It provided that the Moroccan Government should decide within six months which of the French officials in its service it wished to retain; these officers would be offered contracts for one to five years, and would receive salaries and allowances at least as high as those they had received hitherto. Officials who did not wish to accept these terms might be retained in their present posts for a maximum period of two years before being repatriated. The French Government undertook to provide training facilities for Moroccan administrators and technicians.

Cultural Convention. This convention, initialled in Rabat on May 30 and signed in Paris on Oct. 5, 1957, was primarily concerned with the French schools in Morocco, which had been taken over by the Ministry of Education when the administration was transferred to Moroccan control in March 1956. Under the new agreement, about half the primary and two-fifths of the secondary schools would be transferred to a French cultural mission for a period of two to six years, at the end of which time they would revert to the Moroccan Ministry of Education; in the meantime, however, the mission would establish schools of its own, with the Moroccan Government's assistance, which would be open to both French and Moroccan pupils. The Moroccan Government undertook to provide education of the French type in its own schools for both French and Moroccan pupils who wished to prepare for French examinations. French private schools were also permitted to operate, on condition that they devoted at least three hours a week to the teaching of Arabic.

Judicial Convention. A judicial convention, together with a convention on the execution of judicial decisions and extradition orders, was initialled on June 11 and signed on Oct. 5, 1957. The provisions of the former were as follows:

(1) The Moroccan Government would offer a contract to those French judges whose services it wished to retain, and the judges concerned would enjoy the same salaries, privileges, and status as they would be entitled to in France.

(2) New judges might be recruited in France for the Moroccan courts.

(3) Although Arabic would be the official language of the courts, the use of French in court proceedings and legal documents would be permitted, and judgments and orders issued by the courts would be in both languages.

(4) Moroccan lawyers would be permitted to practise at the French Bar, and *vice versa*.

Financial Agreement. Under an agreement signed on Dec. 29, 1956, the French Government agreed to contribute 8,000,000,000 francs to the Moroccan Government's capital investment budget for 1956, in addition to 9,000,000,000 francs which had previously been granted for this purpose.

Activities of Moroccan "Liberation Army."

Franco-Moroccan relations were complicated during the early months of 1957 by the activities of Moroccan irregular forces which had retained their weapons when the majority of the "National Liberation Army" were incorporated into the Royal Army or disbanded. These irregulars were estimated to number between 4,500 and 5,500 men, divided into three main groups: (*a*) in the Oujda area of north-eastern Morocco about 1,000 to 1,500 men, mostly Algerians, were co-operating closely with the F.L.N. forces in the Oranie; (*b*) bands totalling about 1,000 men, and including both Moroccans and Algerians, were active in the Figuig area of south-eastern Morocco, from whence they made periodic raids across the Algerian frontier; (*c*) the majority of the "Liberation Army," however, numbering about 2,500 to 3,000 men, operated in the area south of Agadir. Skirmishes between irregulars and French troops occurred in the latter area on Oct. 20, 1956 and in March and August 1957.

A French officer, Lieutenant Perrin, was captured by the "Liberation Army" in the action of Oct. 20, 1956, and held as a prisoner until March 29, 1957, when he was released on King Mohammed's personal intervention. Strong feeling was aroused in France by this incident and by the mystery surrounding the fate of Captain Moureau, another French officer who had disappeared in Southern Morocco in June 1956. M. Claparède (State Secretary for Moroccan and Tunisian Affairs) stated in the National Assembly on July 17, 1957, that 87 Frenchmen had been kidnapped in Morocco between March and November 1956, all but three of whom had been released; only one Frenchman, however (who was subsequently freed), had disappeared since December 1956.

Moroccan irregular forces, which were believed to include members of the "Liberation Army," twice came into conflict with French troops in January and February 1957 in western Mauritania, near the frontier of the Spanish colony of Rio de Oro. One force clashed with French troops near Fort Gouraud on Jan. 12, 1957, and was subsequently routed by parachutists, losing 12 killed and 40 captured. On Feb. 15, 1957, another band about 200 strong attacked a French force, which lost 23 killed, north of Fort Trinquet. The total number of irregulars operating in this area was estimated at 600 to 800 men, of whom one-third were estimated to be Moroccans, one-third Mauritanians, and the remainder from Rio de Oro.

The French Chargé d'Affaires in Rabat lodged a protest on Feb. 23, 1957, against the incursions of Moroccan irregulars into Mauritania and Algeria. The Moroccan Government, however, disclaimed responsibility for the activities of "uncontrolled bands" in the frontier areas, on the ground that the French Government had rejected its proposals for a commission to delimit the Moroccan-Algerian frontier, and again suggested talks on this subject. This proposal was accepted by the French Government, a joint commission being established for the purpose in April 1957 under the chairmanship of Crown Prince Moulay Hassan, C.-in-C. of the Royal Moroccan Army and eldest son of King Mohammed V. (Le Monde - Le Figaro) **(Prev. rep. Franco-Moroccan Relations, 15329 A; 15379 A; Moroccan "Liberation Army," 15110 A; Ifni Fighting, 15895 A.)**

B. ITALY.—Trade Unions. - New General Secretary of C.G.I.L. - Death of Signor Di Vittorio.

Signor Giuseppe Di Vittorio, secretary-general of the *Confederazione Generale Italiana de Lavoro* (the Communist and left-wing Socialist labour federation), died on Nov. 3.

Signor Di Vittorio (65) joined the Socialist trade union movement in Italy at the age of 13 and was twice imprisoned for organizing strikes before and after the First World War. Elected to the Italian Parliament in 1921 as an Independent Communist, he joined the Communist Party in 1924; left the country after Mussolini came to power; was arrested and imprisoned upon his clandestine return in 1930; and after his release joined the International Brigade during the Spanish Civil War. After the defeat of the Republicans he fled to France, was subsequently extradited by the Vichy authorities to Italy, and was again imprisoned until his liberation after the Allied landings in 1943. In addition to being secretary-general of the Italian General Federation of Labour since 1945, Signor Di Vittorio had also been president of the (Communist-dominated) World Federation of Trade Unions since 1955. He was a Communist member of the Chamber of Deputies.

Signor Agostino Novella (52), secretary-general of the Italian Federation of Metallurgical Workers (F.I.O.M.), and a Communist deputy, was elected secretary-general of the C.G.I.L. on Dec. 8 in succession to the late Signor Di Vittorio. (Corriere della Sera, Milan) **(Prev. rep. 10125 A.)**

A. JAPAN - UNITED STATES. — The Girard Case.

The case of a U.S. soldier stationed in Japan, Sergeant William S. Girard, who was accused of causing the death of a Japanese woman, aroused strong feeling in both countries during the earlier months of 1957, and led to demands in the U.S. House of Representatives for the abrogation of all agreements giving foreign courts jurisdiction over U.S. servicemen. Details of the case are given below.

While on duty at a military firing range at Somagahara (Japan) on Jan. 30, 1957, Girard fired two empty cartridge cases from a grenade-launcher to frighten away civilians who were collecting cartridge cases for sale as scrap metal; one case struck a woman, who died of her injuries. Strong protests were expressed in the Japanese Parliament, and the case was referred to the U.S.-Japanese joint committee set up to arbitrate in cases of disputed jurisdiction. [Under an agreement signed in 1953, the U.S. military authorities have the primary right to exercise jurisdiction over U.S. servicemen in relation to offences arising out of the performance of official duties, while the Japanese authorities have this right in the case of other offences, either State, however, is required to "give sympathetic consideration to a request from the authorities of the other State for a waiver of its right in cases where the other State considers such waiver to be of particular importance."] After the joint committee had failed to agree whether Girard's action had been done in the performance of his duty (the Japanese claiming that the incident had occurred during a pause in the firing practice, and that Girard had therefore been "off duty"), the U.S. Far Eastern Command announced on May 16 that it had decided to waive its right in the case. This decision, though widely criticized in the U.S.A., was upheld in a joint statement issued on June 4 by Mr. Dulles (Secretary of State) and Mr. Wilson (Secretary of Defence), who gave warning that "attempting to prolong the dispute over the jurisdictional issue would create a situation which could basically affect U.S. relations not only with Japan but also with many other nations."

A petition for a writ of *habeas corpus* was filed on Girard's behalf in the Washington Federal District Court on June 6. Whilst rejecting this petition, Judge McGarraghy ruled on June 18 that, as Girard's act was committed in the performance of duty, he was accountable only to U.S. Federal jurisdiction and therefore should not be handed over to the Japanese authorities. The U.S. Attorney-General (Mr. Brownell) thereupon appealed directly to the Supreme Court, by-passing the Court of Appeals in view of the "imperative public importance" of the case. The Supreme Court ruled unanimously on July 11 that no constitutional or statutory barrier prohibited the implementation of the clause of the 1953 agreement which permitted the "waiver of the qualified jurisdiction granted by Japan," and that, in consequence, "the wisdom of the arrangement is exclusively for the determination of the executive and legislative branches."

Girard's trial opened in the Maebashi District Court on Aug. 26 and concluded on Nov. 19, when he was found guilty of causing bodily injury resulting in death. He was given a suspended sentence of three years' imprisonment, and was subsequently allowed to return to the U.S.A., where it was announced on Dec. 4 that he had been demoted to the rank of private and would be discharged from the Army.

The Foreign Affairs Committee of the U.S. House of Representatives adopted on June 27, by 18 votes to eight, a resolution moved by Representative Bow (Republican) calling for the revision or denunciation of all "status of forces" agreements which permitted the United States to waive jurisdiction over servicemen accused of crimes in foreign countries. Strong opposition to this proposal was expressed by President Eisenhower, who said on July 9 that, if adopted by Congress, the resolution would direct him to take actions that would endanger the security of the United States. The State and Defence Departments pointed out that modification or cancellation of the "status of forces" agreements would lead to increased opposition abroad to the presence of U.S. troops. The U.S.A. has "status of forces" agreements with 39 countries, including all the members of NATO except Western Germany and Iceland.—(New York Times) (Prev. rep. 13259 A.)

B. UNITED KINGDOM - SOVIET UNION. — Agreement on London-Moscow Air Service.

An agreement was signed at the British Foreign Office on Dec. 19 for the opening of regular air services between London and Moscow *via* Copenhagen, to be operated by British European Airways and Soviet Airlines (Aeroflot).

Since neither country has hitherto operated regular services to the other, it was provided that the agreement should come into force only when both parties had been able to investigate and satisfy themselves on a comprehensive range of technical matters, including questions of navigational safety. The agreement provided that if, as a result of tests, either country found the noise level of the other country's aircraft to be excessive, suitable modifications would be made to reduce the noise to an acceptable level before the aircraft were used on the London-Moscow and Moscow-London routes.

The agreement was signed for Britain by Mr. Ormsby-Gore, Minister of State, and for the U.S.S.R. by Marshal Zhigarev, head of Soviet civil aviation. It is terminable by either side at six months' notice.—(Times) (Prev. rep. 15906 C.)

C. UNITED KINGDOM. — The Queen's Christmas Broadcast to Britain and the Commonwealth.

H.M. the Queen made the following Christmas Day broadcast to the peoples of Britain and the Commonwealth from Sandringham House:

"Happy Christmas! Twenty-five years ago my grandfather broadcast the first of these Christmas messages. To-day is another landmark because television has made it possible for many of you to see me in your homes on Christmas Day. My own family often gather round to watch television, as they are at this moment, and that is how I imagine you now.

"I very much hope that this new medium will make my Christmas message more personal and direct. It is inevitable that I should seem a rather remote figure to many of you a successor to the kings and queens of history: someone whose face may be familiar in newspapers and films but who never really touches your personal lives. But now, at least for a few minutes, I welcome you to the peace of my own home.

"That it is possible for some of you to see me today is just another example of the speed at which things are changing all around us. Because of these changes I am not surprised that many people feel lost and unable to decide what to hold on to and what to discard, how to take advantage of the new life without losing the best of the old.

"But it is not the new inventions which are the difficulty. The trouble is caused by unthinking people who carelessly throw away ageless ideals as if they were old and outworn machinery. They would have religion thrown aside, morality in personal and public life made meaningless, honesty counted as foolishness, and self-interest set up in place of self-restraint.

"At this critical moment in our history we will certainly lose the trust and respect of the world if we just abandon those fundamental principles which guided the men and women who built the greatness of this country and Commonwealth. To-day we need a special kind of courage, not the kind needed in battle, but a kind which makes us stand up for everything that we know is right, everything that is true and honest. We need the kind of courage that can withstand the subtle corruption of the cynics, so that we can show the world that we are not afraid of the future.

"It has always been easy to hate and destroy. To build and to cherish is much more difficult. That is why we can take a pride in the new Commonwealth we are building. This year Ghana and Malaya joined our brotherhood. Both these countries are now entirely self-governing. Both achieved their new status amicably and peacefully. This advance is a wonderful tribute to the efforts of men of goodwill who have worked together as friends, and I welcome these two countries with all my heart.

"Last October I opened the new Canadian Parliament, and, as you know, this was the first time that any sovereign had done so in Ottawa. Once again I was overwhelmed by the loyalty and enthusiasm of my Canadian people.

"Also during 1957 my husband and I paid visits to Portugal, France, Denmark, and the United States of America. In each case the arrangements and formalities were managed with great skill, but no-one could have 'managed' the welcome we received from the people. In each country I was welcomed as head of the Commonwealth and as your representative. These nations are our friends largely because we have always tried to do our best to be honest and kindly and because we have tried to stand up for what we believe to be right.

"In the old days the monarch led his soldiers on the battlefield and his leadership at all times was close and personal. To-day things are very different. I cannot lead you into battle. I do not give you laws or administer justice. But I can do something else. I can give you my heart and my devotion to these old islands and to all the peoples of our brotherhood of nations.

"I believe in our qualities and in our strength. I believe that together we can set an example to the world which will encourage upright people everywhere.

"I would like to read you a few lines from *Pilgrim's Progress*, because I am sure we can say with Mr. Valiant-for-Truth these words: 'Though with great difficulty I am got hither, yet now I do not repent me of all the trouble I have been at to arrive where I am. My sword I give to him that shall succeed me in my pilgrimage and my courage and skill to him that can get it. My marks and scars I carry with me to be a witness for me that I have fought his battles who now will be my rewarder.'

"I hope that 1958 may bring you God's blessing and all the things you long for. And so I wish you all, young and old, wherever you may be, all the fun and enjoyment and the peace of a very happy Christmas."

The Queen's Christmas broadcast was televised for the first time, her Majesty being seen by many millions of viewers throughout the country.—(Times) (Prev. rep. 15284 A.)

D. FRANCE. — Launching of the "Clémenceau."

The 22,000-ton French aircraft carrier *Clémenceau* was launched at Brest on Dec. 21. The largest French warship to be built since 1939, she will carry 60 aircraft, including jet fighters, and incorporates the most recent features of carrier design such as the steam catapult, angled deck, and stabilized deck-landing mirror aids. A sister-ship, the *Foch*, is under construction at St. Nazaire.—(Le Monde, Paris) (15624 A.)

DECEMBER 28, 1957—JANUARY 4, 1958

A. EUROPEAN UNIFICATION. — Establishment of European Economic Community and Atomic Energy Community. - Signing, Ratification, and Coming into Effect of Treaties. - Provisions of Euratom Treaty. - Report on Production of Nuclear Energy.

The treaties establishing a European Economic Community (Common Market) and a European Atomic Energy Community (Euratom) came officially into force on Jan. 1, 1958. The final drafts of the treaties had been completed by the Inter-Governmental Committee in Brussels on March 9, 1957, and the treaties had been signed in Rome by Belgium, France, the German Federal Republic, Italy, Luxemburg, and the Netherlands on March 25, 1957. The signing ceremony took place at the Palazzo dei Conservatori on the Capitoline Hill, the signatories being Signor Segni (then Italian Prime Minister), Dr. Adenauer (the Federal German Chancellor), the Foreign Ministers of Belgium (then M. Spaak), France (M. Pineau), Italy (then Dr. Martino), Luxemburg (M. Bech), and the Netherlands (Mr. Luns), and the Federal German State Secretary for Foreign Affairs (Professor Hallstein, representing the Foreign Minister, Dr. von Brentano, then on a visit to Australia). Between July and December 1957 the treaties were ratified by the Parliaments of all the six member-countries.

A summary is given below of the principal provisions of the Euratom Treaty, which is valid for an unlimited period and which contains 222 Articles, an annex, and three lists of nuclear and other materials and products. [The provisions of the Common Market Treaty will be summarized in a subsequent issue.]

The European Atomic Energy Community Treaty.

The aims of the Community were defined in the preamble as the raising of living standards in the member-countries and the promotion of trade with non-Community countries. The tasks of Euratom were defined in Article 1 of the Treaty as the creation within a short period of the technicial and industrial conditions necessary to utilize nuclear discoveries, and especially to produce nuclear energy on a large scale. This result would be acheived by joint measures of the member-countries and through the activities of the institutions of the Community.

Institutions.

The institutions of the European Atomic Energy Community would be as follows :

The Assembly. This body would consist of 142 members elected by the national Parliaments of the member-countries and comprising 36 members each from France, Italy, and Western Germany, 14 each from Belgium and the Netherlands, and 6 from Luxemburg. The election of these members would initially be determined by the national rules of each member-country, but the Assembly would at a later stage draft proposals providing for the introduction of a uniform electoral procedure in all member-countries.

Euratom would share the Assembly with the European Economic Community and the European Coal and Steel Community—the existing Assembly of the latter organization being superseded by the new Assembly.

The Assembly would meet once a year (in October) to discuss the annual report of the Commission [see below]. It would have power to enforce the resignation of the Commission, such a decision requiring a two-thirds majority of the votes cast as well as an ordinary majority of its total membership.

The Assembly would also discuss the Community budgets, and would be empowered to propose amendments. It would have to be consulted on certain proposals of the Commission and the Council of Ministers implementing essential principles of the Treaty; and would be entitled to meet in extraordinary session if a majority of its members so demanded, or at the request of the Commission or of the Council of Ministers.

The Council of Ministers. This body would consist of one representative each from the Governments of the member-countries. It would take decisions in one of three ways : either unanimously, by simple majority, or by a weighted majority, according to the various circumstances laid down in the Treaty.

The unanimity requirement would apply particularly in the early stages of the Community's existence. Decisions requiring a simple or a qualified majority could in most cases be taken only on a proposal made by the Commission, and any such proposal could not be amended by the Council except by unanimous vote. [This provision was aimed at conferring great responsibility upon the Commission and safeguarding the stability of its activities.]

A simple majority would mean the vote of four of the six member-countries. In the case of a qualified majority, France, Italy, and Western Germany would each have four votes, Belgium and the Netherlands two each, and Luxemburg one ; such a majority would normally consist of at least 12 votes, but in some cases (e.g. when decisions were taken on matters not arising from a proposal by the Commission) the consent of at least four member-States would also be necessary.

The Commission. This would have five members of different nationalities, jointly appointed by the member-Governments for four-year terms and eligible for reappointment. The members would be completely independent and would neither solicit nor accept instructions from their Governments. If unanimously agreed by the Council, however, member-Governments might accredit representatives to the Commission to act as permanent liaison officers.

The Commission would be a collegial body and would take its decisions by simple majority vote. Its main tasks would be to supervise the application of the Treaty, and of measures adopted within its framework; to take part in the shaping of Council and Assembly decisions by making proposals to the Council, which the latter could not amend save by unanimous vote [see above]; to formulate opinions and recommendations on matters within the scope of the Treaty ; to take those decisions for which authority had been conferred upon it; and to publish annually a general report on the activities of the Community.

The different means by which both the Council and the Commission would guide the work of the Community were defined as follows : (*a*) regulations, which would be compulsory and directly applicable in any member-State ; (*b*) directives, which would be binding on the recipient State in respect of the result to be achieved, but which would allow it to choose the ways and means ; (*c*) decisions, which would be obligatory for the parties concerned ; and (*d*) recommendations and opinions, which would not have binding force

The Court of Justice. This body—like the Assembly—would be common to the three Communities and would supersede the existing Court of Justice of the European Coal and Steel Community. It would consist of seven members jointly appointed by the member-Governments, holding office for six years and eligible for reappointment. There would also be two Advocates-General.

The functions of the Court would be to safeguard the law in the interpretation and application of the Treaty, to decide on the legality of decisions of the Council of Ministers or the Commission, and to determine violations of the Treaty. Actions might be brought before the Court either by a member-country, or by the Council of Ministers, or by the Commission, or by any person or legal entity affected by a decision of the Community. Actions could be based on the contention that the Council or the Commission were not empowered to take a decision ; had violated essential rules of procedure ; had violated the Treaty or any rule implementing it; or had abused their discretionary powers (especially with regard to the granting of licences by the Commission and the application of compulsory measures in the sphere of security).

The Economic and Social Committee. This Committee would be common to Euratom and the Economic Community and would consist of representatives of all sections of economic and social life, such as employers' organizations, trade unions, and similar bodies. Its members, appointed for four years by a unanimous decision of the Council of Ministers, would be drawn from the member-countries in the following numbers : France, Italy, and Western Germany, 24 each ; Belgium and the Netherlands, 12 each ; Luxemburg, 5.

The Committee would assist the Council of Ministers and the Commission in an advisory capacity, and would have to be consulted in those cases specifically laid down in the Treaty.

The Scientific and Technical Committee. This body would assist the Commission in an advisory capacity and would consist of 20 members appointed by the Council (after consultation with the Commission) for five-year terms.

The seat of the institutions of the Community would be determined by agreement between the member-Governments.

Provisions for Nuclear Development.

These provisions of the Treaty (Articles 4 - 106) were divided into sections dealing respectively with the development of nuclear research, dissemination of nuclear information, protection of health, investments, Community undertakings, supplies of nuclear materials, security measures, ownership of fissile material, and external relations. Details were as follows :

Development of Research. The Commission would promote and facilitate research in the member-countries by the following means :

(1) It would set up a Community Nuclear Research Centre to ensure the execution of research programmes. This Centre would also be responsible, *inter alia*, for standardizing nuclear terminology and measurements, and a Central Nuclear Measurements Bureau would be established in this connexion. Schools for training specialists would be set up in conjunction with the Centre, and an institution of university rank would be created at a later stage.

(2) To supplement nuclear research by member-countries, the Commission would work out research and training programmes, not exceeding five years, to be carried out by the Community Nuclear Research Centre. It might, however, conclude research contracts for part of these programmes with undertakings or nationals of member-countries, and also with international organizations or with nationals and undertakings of non-Community States. These programmes would require the unanimous approval of the Council of Ministers.

(3) The Commission would endeavour to co-ordinate the research conducted in the individual member-States. To this end, it would invite member-States, undertakings, and individuals to inform it of their research programmes in a specified field, and would express an

opinion on these programmes. It would also attempt to prevent wasteful duplication and to direct research into less well-explored channels; would regularly consult public and private research bodies; would publish (with the agreement of the interested parties) the research programmes in operation; and might convene representatives of public and private research centres for mutual consultation and exchanges of information.

(4) The Commission might extend financial and/or technical assistance for research work as follows: (*a*) by a direct financial contribution, repayable or otherwise; (*b*) by the organization of joint financing by those concerned; (*c*) by supplying raw or fissile materials, either against payment or free of charge; or (*d*) by making available installations, equipment or experts, either against payment or free of charge.

Dissemination of Information. (1) The Commission would be obliged to pass on to interested persons and undertakings in the member-countries all the information acquired by the Community, and to issue to them at their request non-exclusive licences, provided they were in a position to exploit them effectively. A special procedure would apply to information which had to be kept secret for defence reasons [see below].

(2) The Commission would also seek (by way of agreement) to obtain information from the member-countries on all patents, patent applications, or working models covering inventions which would be useful to the Community. It would do its utmost to promote the issue of licences for such patents, etc.

(3) A compulsory notification procedure would apply to certain inventions. Under this procedure, member-countries would be required to notify the Commission, within 18 months of the lodging of such applications, of the details of any applications for patents for "specifically nuclear objects." In the case of applications covering objects which, while not specifically nuclear, were considered after preliminary examination to be directly connected with the development of nuclear energy, member-countries would be obliged to notify the Commission within 18 months, and to communicate full details within another two months if requested by the Commission. A special procedure would again apply to secret defence inventions.

(4) For inventions covered by the foregoing paragraph, certain compulsory powers would be available to the Commission, which could demand the issue of a licence if it considered this desirable even though no amicable agreement had been reached between the holder of the patent and the applicant for a licence. In all cases where such a licence was issued, the amount of compensation to be paid would be settled between the owner of the patent and the holder of the licence.

(5) An Arbitration Committee would be set up to deal with disputes between either (*a*) the Commission and the owner of a patent; or (*b*) the owner of a patent and a licensee on the subject of compensation. The Committee's members would be appointed by the Council of Ministers on the proposal of the Court of Justice. The final decisions of the Committee would have the force of *res judicata* as between the parties involved; but, after a lapse of one year, a request might be made for the revision of a decision if fresh circumstances had arisen to justify such a step.

(6) Special confidential procedures would be adopted in the case of information which the Community had acquired from its research programme, and the disclosure of which might be considered detrimental to the defence interests of one or more member-countries. The Council of Ministers would draw up the necessary security regulations defining the various categories of secrecy and the security measures to be adopted.

(7) The Commission would evolve a system whereby member-States, undertakings or individuals could exchange progress or final reports about their research. This system would have to guarantee the confidential nature of such exchanges, but the Commission would be entitled to transmit such reports to the Community Nuclear Research Centre for information, on the understanding that the Centre would have no right of utilization save with the consent of the originators.

Public Health. The Community would establish a code of basic standards governing personal safety against dangers resulting from ionizing radiation. This code would be drafted by the Commission, and submitted to the Council of Ministers for approval, after the Commission had heard the views of a group of persons selected by the Scientific and Technical Committee from amongst scientific experts of member-States, especially experts in the field of public health. In addition, an information and study centre for personal safety problems would be set up within the Community Nuclear Research Centre.

Investments. To stimulate initiative by public and private undertakings in the nuclear energy field, and to promote a planned development of their investments, the Commission would publish programmes indicating the Community's production aims and the capital investments thereby implied, after hearing the views of the Social and Economic Committee.

Public and private undertakings in member-countries which were contemplating investments in the nuclear energy field would be required to inform the Commission at least three months before work began or the first contracts were concluded. Such investment projects could be published, subject to the agreement of the parties concerned and their Governments.

Community Undertakings. Undertakings of outstanding importance for the development of nuclear industry in the Community might be declared Community undertakings by a decision of the Council of Ministers, taken on a proposal by the Commission. This proposal would cover the statutes and site of the undertaking, the necessary finance, and the participation of the Community as well as of non-Community countries, international institutions, or foreign nationals, in the financing or management of the undertaking.

A Community undertaking would enjoy a special status; would be a legal entity of its own with the right to own property, enter into agreements, and assume rights and obligations; but, unless otherwise stipulated, would be subject to general industrial and commercial laws and regulations.

The Council could grant Community undertakings all or some of a certain number of privileges- viz., special facilities for the purchase or expropriation of property; exemption from dues and taxes; exemption from transfer, re-transfer, and registration dues and charges; exemption from Customs duties and from economic or fiscal restrictions on scientific and technical material, or substances treated by the undertaking; and the right to hold funds and foreign currency of any kind, with freedom of transfer.

Council decisions on the creation of Community enterprises would in general be taken by a qualified majority, but the following decisions would require unanimity: (i) financial participation by the Community; (ii) the granting of the above-mentioned privileges; (iii) participation of non-Community States or their nationals in the financing or management of the enterprise.

Amendments to the statutes of such enterprises would have to be approved by the Council of Ministers. Disputes affecting them would be settled by the competent national courts, except for those matters reserved to the Court of Justice of the Community.

Supplies. A joint policy would be pursued with regard to the supply of ores, raw materials, and special fissile matter on the basis of the principle of equal access to resources. For this purpose the Commission would set up a Commercial Agency which would be a corporate body, vested with financial independence and able to conduct its affairs according to business rules, but controlled by the Commission. The Agency (the majority of whose capital would have to be owned by the Community and the member-countries) would possess (i) an option to purchase any of the materials in question produced in member-States; and (ii) the exclusive right to conclude contracts for the purchase or sale of such materials outside the Community.

Resources within the Community. All producers of ores, materials, and special fissile matter would be under an obligation to offer their products to the Agency immediately they became available, and the Agency would normally exercise its option by means of contracts with the producers. The Agency could exercise this option at any stage of production except in the following cases: (i) a producer engaged in the mining of ores as well as in the production of nuclear material need offer his product to the Agency only once, the same applying to a group of undertakings co-operating with each other in these processes; (ii) Community undertakings would supply ores, raw materials, and special fissile matter produced by them according to their statutory or contractual obligations; (iii) in the case of special fissile matter the Agency, while exercising its option, might leave the material with the producer, either to be used by the latter, or to be placed in stock, or to be placed at the disposal of undertakings associated with the producer for the execution of programmes of which the Commission had been notified.

When the Agency did not exercise its option the producer might continue to use or process the material himself, or he might be authorized by the Commission to dispose of the material outside the Community at a price not less than that of his previous offer to the Agency. In the case of special fissile material, however, only the Agency could export this to other countries, with the Commission's consent.

Resources outside the Community. While the Agency [as stated above] would normally have the exclusive right to conclude contracts for supplies from non-Community countries, consumers would be entitled to do so if the Commission found at any time that the Agency's prices for such supplies were excessively high, or that the Agency could not deliver all or some of the required supplies within a reasonable time; the Commission's ruling would be taken on an application from the consumers concerned. Any contracts concluded by consumers would have to be notified to the Commission, which might object to them within one month if they violated the aims of the Community.

Transactions with Agency. - Prices. To enable the Agency to satisfy all demands, producers and users would notify it at regular intervals of their available output and requirements. The Agency would endeavour to satisfy all applications for ores, materials, or special fissile matter, but if unable to do so fully would distribute the available supplies on a proportional basis.

Prices would be regulated by the interplay of supply and demand, member-countries being forbidden to infringe this rule by national legislation. Price adjustments designed solely to give certain consumers a monopoly would likewise be prohibited. On a proposal of the Commission, the Council of Ministers could fix prices by unanimous vote. The Commission would also be entitled to put forward proposals to consumers for the standardization of prices.

Other Provisions. The Commission would be entitled to make recommendations regarding prospecting and the exploitation of mines, and might participate financially in such activities. Member-States would be required to send the Commission annual reports on prospecting, reserves, and mining investments.

After seven years from the entry into force of the Treaty, the Council of Ministers would either confirm or replace all provisions relating to supplies.

Security. The Commission would be required to ensure (a) that ores, raw materials and special fissile matter were not diverted from their intended use as declared by their consumers, and (b) that arrangements for their supply, and any special control measures accepted by the Community in an agreement with a non-Community State or international organization, were observed

To this end, the Commission would :

(*a*) Request declarations from all the undertakings concerned describing the basic technical characteristics of their equipment,

(*b*) Request statements of all transactions in order to facilitate accounting of ores, raw materials and special fissile matter ;

(*c*) Insist, if necessary, on all surplus special fissile matter temporarily not in use being placed in deposit ;

(*d*) Arrange for its inspectors to carry out checks and, where necessary, impose sanctions ranging from a warning to the complete withdrawal of raw materials or special fissile matter.

Ownership of Special Fissile Matter. All special fissile matter would be the property of the Community. Member-States, undertakings or individuals, however, would be entitled to the widest possible utilization and consumption of the special fissile matter which had legitimately come into their possession.

On behalf of the Community, the Agency would keep a special account relating to fissile matter transactions and entitled "Financial Account for Special Fissile Matter." This account would not show any changes in the value of the fissile matter, which would be entirely at the risk of those having the matter in their possession, leaving neither profit nor loss to the Agency.

Common Market in Nuclear Materials. A common market in nuclear materials would be set up, involving the following obligations on member-countries :

(*a*) to introduce, one year after the coming into force of the Treaty, a common Customs tariff for nuclear minerals, materials and products imported from non-Community countries ;

(*b*) to repeal between each other, after the same one-year period, all import and export duties and taxes on such minerals, materials and products (the non-European territories of member-States being entitled, however, to continue to levy duties and taxes of a purely fiscal character) ;

(*c*) to apply the procedure laid down in the Common Market Treaty for the gradual abolition of internal tariffs and quantitative import restrictions between member-countries, and for the introduction of a uniform Customs tariff, to all other products which might be used in the nuclear industry ;

(*d*) to admit nationals of the other member-countries, without discrimination, to all posts and occupations requiring qualifications in the nuclear sphere, as well as to participation in the construction of nuclear undertakings ;

(*e*) to set up an insurance scheme covering risks arising from the use of atomic energy ;

(*f*) to facilitate the transfer between member-countries of capital needed for nuclear projects, and to permit the transfer to other member-countries of payments in connexion with nuclear transactions and employment in nuclear industries or research.

External Relations. The Commission would be responsible for any liaison needed with the various international organizations and, subject to the Council's approval, might conclude agreements with these bodies or with non-Community countries. Member-States would be required to notify the Commission of any clauses in agreements or arrangements concluded, or to be concluded, with non-Community States which fell within the scope of the Treaty. The Commission would consider whether such clauses were compatible with the Treaty and would be entitled, if necessary, to bring any such matter before the Court of Justice.

Financial and General Provisions.

The remaining principal provisions of the treaty covered the following subjects *inter alia* :

Finance. Estimates of all the Community's revenue and expenditure (apart from those of the Commercial Agency and the joint undertakings) would be drawn up for each financial year and entered either in the operational budget or the research and investment budget. The revenue and expenditure of the Agency, which would operate on commercial lines, would be estimated separately.

The receipts of the operational budget would consist mainly of the financial contributions of the member-countries, in the following proportions : France, Italy and Western Germany, each 28 per cent ; Belgium and the Netherlands, each 7.9 per cent ; Luxemburg, 0.2 per cent The receipts of the research and investment budget would consist of similar contributions, but with a slightly different proportionate scale, viz. : France and Western Germany, each 30 per cent ; Italy, 23 per cent ; Belgium, 9.9. per cent, the Netherlands, 6.9 per cent ; Luxemburg 0.2 per cent.

The above contributions might be replaced, in whole or part, by the proceeds of taxes levied by the Community in the member-countries ; the introduction of such taxes would be decided by the Council of Ministers on the proposal of the Commission.

The Community would also be entitled to raise loans to finance research or investment.

The preliminary draft budgets of the various Community institutions under the aegis of the Commission would have to be submitted to the Council of Ministers not later than Sept. 30 of each year (the financial year being Jan. 1-Dec. 31). The Council would be entitled to propose amendments but would be required, in its turn, to submit the budgets to the Assembly by Oct. 21 at the latest. If the Assembly either signified its approval or expressed no opinion within a month, the draft budgets would be deemed to be finally adopted. If the Assembly proposed amendments, the final decision would lie with the Council of Ministers.

The Council's decisions would be taken by a qualified majority. For the adoption of the operational budget this would be the normal qualified majority—i e. at least 12 out of 17 votes. For the adoption of the research and investment budget, however, the votes of the Council members would be weighted as follows : France 30, Western Germany 30, Italy 23, Belgium 9, the Netherlands 7, and Luxemburg 1. A qualified majority in this case would require at least 67 votes.

Overseas Territories. Unless otherwise provided, the Treaty would apply to non-European territories under the jurisdiction of member-States.

Amendment of the Treaty. The Commission or any member-State would be entitled to submit proposals for amending the Treaty to the Council of Ministers, which could then decide to convene a conference of the member-States to consider such proposals.

Admission of New Members. Any European State could apply to become a member of the Community, and could be admitted by unanimous vote of the Council of Ministers In the case of a successful application, the conditions of admission and the resultant changes in the Treaty would be set out in an agreement between the member-States and the applicant State.

An Annex to the Treaty outlined the first five-year research programme of the Community, costing $215,000,000.

Report of Euratom's "Three Wise Men."

The report of the three experts appointed on Nov. 16, 1956 [see page 15396] to estimate "the amount of nuclear energy which could be produced in the near future by the six countries," and to suggest "the means which should be employed to achieve this," was published on May 7, 1957 under the title *A Target for Euratom.*

Following their visit to the United States [see page reference above] the "three wise men" visited Britain from Feb. 25-March 2, 1957, for discussions with Lord Salisbury, then Lord President of the Council and the Cabinet member responsible for atomic energy ; Lord Mills, the Minister of Power ; Sir Edwin Plowden, chairman of the U.K. Atomic Energy Authority ; and officials of the A.E.A. and of the Central Electricity Authority. They also visited the Calder Hall and Windscale reactors and met representatives of four nuclear power plant construction companies to discuss the possibility of exports of British nuclear power plants to the Community countries. A joint statement issued by the three experts and the A.E A. on March 1, 1957, stated that the latter "had declared its willingness to facilitate contacts between U.K. firms and firms within the Euratom countries interested in the building of nuclear reactors." The Authority also expressed its willingness "to give such assistance as lies in its power towards the training of scientists and engineers."

The basic recommendation in the report issued by the "three wise men" (which is summarized below under cross-headings) was that the Community countries should instal 15,000,000 kilowatts of nuclear generating capacity by the end of 1967.

Need for Nuclear Energy. Dealing with the Euratom countries' growing dependence on energy imports, the report said they amounted at present to 100,000,000 tons of coal equivalent (23 per cent of their total energy requirements) ; would rise to 200,000,000 tons (33 per cent) by 1967 ; and might reach 300,000,000 tons (40 per cent) ten years by 1977. Imports of this "enormous" size would place an unusually severe strain on the payments position of the six countries, since they implied expenditure rising from the present level of $2,000,000,000 to $4,000,000,000 by 1967 and $6,000,000,000 by about 1975. In addition, since most of these imports were, and would continue to be, in the form of Middle Eastern oil, there would always be a danger (which the Suez crisis had amply illustrated) that supplies might be cut off for political reasons. Only nuclear energy, in the shape of big nuclear power stations producing base-load electricity, could rescue the Euratom countries from this precarious situation.

The report went on to recommend that 15,000,000 kilowatts of nuclear generating capacity should be built by 1967. This nuclear capacity, however, would not begin to make a really big contribution to the electricity systems of the six nations until 1963, since nuclear power stations took four years to build and no substantial construction orders could be placed before the end of 1958. Nevertheless, if the plan suggested were implemented, the six countries would be able to stabilize their energy imports at the estimated 1963 level—i.e. 165,000,000 tons of coal equivalent per year.

Comparison between Euratom and British Programmes. Comparing the proposed Euratom programme with the existing British programme, the report noted that the Euratom target was 2½ times the British target of 6,000,000 kilowatts of nuclear capacity by 1965. Pointing out that the ratio of population as between the six Euratom countries and Great Britain was 3 to 1, and that of electricity output

2.8 to 1, the report concluded that the Euratom target compared favourably with the British. As regards the engineering resources available for the construction of reactors, the report noted that British industry expected to be able to install 5,000,000-6,000,000 kw. of nuclear capacity at home by 1965 and at the same time to provide a similar amount for export. Since the total engineering capacity of the six Euratom countries was 1 6 times that of Britain, it was considered that the Euratom target was quite feasible from the point of view of engineering resources.

Co-operation with other Countries. Reviewing the prospects of co-operation with the United States, Great Britain and Canada, the report stated that "two-way traffic" could be set up between Euratom and the U.S A. The latter country would provide fissile materials, technical knowledge, and training facilities for Euratom's scientists and technicians, while at a later stage Euratom would make available in return the practical knowledge gained by the large-scale industrial application of atomic power. The British authorities were similarly willing to provide technical training facilities and also to facilitate contacts between British firms in the nuclear construction field and their Euratom counterparts. In the case of Canada, co-operation would be possible in two spheres . (i) the supply of natural uranium, and (ii) the construction of prototypes of a heavy-water reactor which the Canadians had developed, and which promised to be particularly suitable for European requirements. The report recommended that agreements of association should be concluded between Euratom and the three countries in question immediately after the former's establishment. Close co-operation was also recommended with Austria, Switzerland, and the Scandinavian countries.

Reactors. The report said that while there were a dozen prototype reactors in an advanced stage of design or under construction, there were only two types ready for commercial use : the American pressurized-water/boiling-water type, using slightly enriched uranium, and the British gas-cooled type, using natural uranium. Of those types not yet in the commercial phase, Euratom should pay close attention to two—a version of the gas-cooled type, operating on slightly enriched uranium, and the above-mentioned heavy-water type developed mainly in Canada. For a speedy start to its programme, Euratom would either have to buy reactors from America and Britain or build them under licence

Nuclear Fuels. As far as could be ascertained, the nuclear fuel required to reach the target would be obtainable without much difficulty, the total cost for the 10-year period amounting to about $2,000,000,000. As regards two related questions—the fabrication of fuel elements, and the chemical processing of spent fuel - the Community would have to rely initially on Britain and America for such services, but would later build its own plants for these purposes, once the possession of a sufficient number of reactors had made such a project economic.

On the question of enriched uranium, the report advised that a decision on the construction of a Community plant for producing such material should be deferred. It pointed out in this connexion : (i) that the U.S.A. could provide the Community with the required amounts of this material at low prices ; (ii) that the same material produced in Europe would cost two to three times as much ; (iii) that a Euratom plant for this purpose would take several years to build and involve exceptionally heavy capital investment ; and (iv) that future technological developments would almost certainly reduce, and might even extinguish, the need for this material.

Costs of Nuclear-produced Electricity. The report went on to compare the costs of electricity produced by nuclear and conventional (i.e. coal- and oil-fired) stations. The conclusion reached was that there was no substantial difference between the two types, the (estimated) cost of nuclear electricity being $0.0011-$0.0014 per kilowatt-hour and the (known) cost of conventional electricity $0.0011-$0.0012 per kilowatt-hour. It was further observed that while the costs of conventional electricity were moving slowly upwards, those of nuclear power were moving slowly downwards.

Capital Investment. The investment costs for nuclear stations were, broadly speaking, somewhat more than 2½ times those for conventional plant ; in the case of the Euratom target of 15,000,000 kilowatts, they would amount to $6,000,000,000 as compared with $2,000,000,000 for equivalent conventional capacity. Though representing at first sight an immense additional burden for the national economies of the six countries, the former amount would in fact be offset by the anticipated gradual decrease in expenditure on imported conventional fuels. To help electricity undertakings with the heavy initial outlay for nuclear stations, it was recommended that the Euratom Commission should consider the possibility of incentives, such as increased depreciation allowances, to cover the first and most difficult years.

Insurance against Nuclear Risks. This section of the report dealt briefly with the need for a common legislative approach on insurance for nuclear plant, especially as regards the third-party liability of companies engaged in reactor construction and operation, and the liability of non-Community manufacturers with respect to the performance of their products.

The final section of the report stressed the role which Euratom would have to play, "in particular by providing the means to bridge the gap, in the initial period, between the commercial risk which firms face in building nuclear plant and the public need for the most rapid progress."—(European Coal and Steel Community, Luxemburg - Council of Europe, Strasbourg - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Giornale d'Italia, Rome) **(Prev. rep. 15393 A.)**

A. UNITED KINGDOM. — Nationalized Industries. - New Salary Scales of Board Members.

Two White Papers published on Dec. 18, 1957, listed the increased scales of pay for members of nationalized Boards "of a commercial character." They were as follows, the former salaries being shown in parentheses :

British Transport Commission. Sir Brian Robertson, chairman, £10,000 (£8,500) ; Sir John Benstead, full-time deputy chairman, £8,000 (£5,000) ; five full-time members, £7,500 (£5,000) ; seven part-time members, £1,000 (£500).

London Transport Executive. Sir John Elliot, chairman, £7,500 (£7,000) ; Mr. A. H. Grainger, full-time deputy chairman, £5,500 (£3,500) ; three full-time members, £5,000 (£3,500) ; three part-time members, £1,000 (£500).

British Overseas Airways Corporation. Mr. [now Sir] Gerald d'Erlanger, chairman, £5,000 (unpaid) ; Sir George Cribbett, full-time deputy chairman, £7,500 (£5,000) ; two full-time members, £7,500 (£5,000) ; five part-time members, £1,000 (£500) ; one part-time member, unpaid.

British European Airways Corporation. Marshal of the R.A.F. Lord Douglas of Kirtleside, chairman, £7,500 (£6,500) ; Sir John Keeling, part-time deputy chairman, £2,000 (£1,500), salary voluntarily not drawn ; one full-time member on special duties, £6,000 (£5,000) ; six part-time members, from £1,000 to £3,500 (from £1,200 to £1,750, but two members voluntarily waive their salaries).

National Coal Board.—Sir James Bowman, chairman, £10,000 (£7,500) ; Mr. J. Latham, deputy chairman, £8,000 (£5,000) ; six full-time members, £7,500 (£5,000) ; three part-time members, £1,000 (£500).

Central Electricity Generating Board.—Sir Christopher Hinton, F.R.S., chairman, £10,000 ; Mr. C. R. King, deputy chairman, £7,500 ; three full-time members, £7,000 ; four part-time members, £1,000.

Electricity Council.—Sir Henry Self, chairman, £10,000 ; Sir Josiah Eccles, deputy chairman, £7,500 ; Professor R. S. Edwards, part-time deputy chairman, £2,000 ; Mr. C. T. Melling, full-time member, £7,000.

[As from Jan. 1, 1958, the Generating Board and the Electricity Council replaced the former Central Electricity Authority]

Area Electricity Boards (12). Chairmen, £6,500 (£4,000) ; deputy chairmen, £5,000 (3,500) ; part-time members £1,000 (£500) ; part-time members who are chairmen of consultative councils, £1,500 (£1,000).

North of Scotland Hydro-electric Board. Mr. Thomas Johnston, part-time chairman, unpaid ; Sir Hugh Mackenzie, part-time deputy chairman, unpaid ; seven part-time members, from £1,000 to £1,500 (£500 to £750).

South of Scotland Electricity Board.—Mr. J. S. Pickles, chairman, £7,500 (£5,000) ; Mr. W. Hutton, deputy chairman, £6,000 (£4,250) ; seven part-time members, from £1,000 to £1,500 (£750 to £1,000).

Gas Council.—Sir Harold Smith, chairman, £8,500 (£6,000) ; Sir Henry Jones, deputy chairman, £7,500 (£5,000).

Area Gas Boards (12).—Chairmen, £6,500 (£4,500) ; deputy chairmen, £5,000 (£3,500) ; full-time members, £1,000 (£3,500) ; part-time members, £1,000 (£500). Chairmen of consultative councils receive £1,500.

U.K. Atomic Energy Authority.—Sir Edwin Plowden, chairman, £10,000 (£8,500) ; Sir John Cockcroft, F.R.S., Sir William Penney, F.R.S., Sir Donald Perrott, and Mr. W. Strath, full-time members, £7,000 (£5,000) ; five part-time members, £1,500 (£500). In the case of one part-time member (Sir Ian Stedeford) the salary is voluntarily not drawn.

Cable and Wireless Ltd.—Sir Godfrey Ince, part-time chairman, £3,500 (£2,500) ; two managing directors, £4,000 (£3,000) ; one part-time director, £1,000 (£500) ; two part-time directors, unpaid.

Colonial Development Corporation.—Lord Reith, part-time chairman, £5,250 (£3,500) ; Sir Nutcombe Hume, part-time deputy chairman, £1,500 (£750) ; four part-time members, £1,000 (£500). One part-time member voluntarily draws only half his salary.

Iron and Steel Holding and Realization Agency.—Sir John Morison, part-time chairman, £6,000 (no change) ; four part-time members, £1,000 (no change).

Sugar Board.—Sir George Dunnett, chairman, £5,000 (£4,250) ; Mr. J. A Dyson, vice-chairman, £3,500 (£2,750) ; two part-time members, unpaid.

White Fish Authority.—Sir Alfred Chick, part-time chairman (formerly full-time), £3,500 (£4,000) ; Sir John Ure Primrose, deputy chairman, £3,000 (£2,000) ; three part-time members, from £1,000 to £2,000 (from £500 to £1,500) ; five part-time members for Scotland and Northern Ireland, £1,000 (£500).

Herring Industry Board.—Sir Frederick Bell, part-time chairman, £3,000 (£2,000) ; two part-time members, £1,000 (£400).

Iron and Steel Board.—Sir Archibald Forbes, chairman, £8,500 (£7,500) ; Sir Lincoln Evans, deputy chairman, £7,500 (£5,000) ; Sir Robert Shone, full-time member, £7,000 (£5,000) ; seven part-time members, £1,000 (no change).

The salary increases (which dated from July 1, 1957) had been announced by the Prime Minister on July 4, when Mr. Macmillan told the House of Commons that they represented "long deferred adjustments." The extra cost was estimated at between £840,000 and £850,000 a year. Adjustments were decided upon by the Government after a comparison between the rewards offered "at the top" in private industry and in the public boards.—(Times - Daily Telegraph)

(Prev. rep. 15694 A.)

A. INDONESIA - NETHERLANDS. — The New Guinea Dispute. - Seizure of Dutch Economic Interests in Indonesia. - Mass Expulsion of Dutch Nationals. - Netherlands Protests to NATO and United Nations. - U.N. Debate on New Guinea. - Defeat of Indonesian and Afro-Asian Resolution in General Assembly.

The Indonesian campaign for the "liberation of West Irian" (i.e. Dutch New Guinea), launched at the end of October (see 15865 C), was followed during the first ten days of December by the wholesale seizure of Dutch enterprises and estates throughout Indonesia and the decision to expel some 50,000 Dutch citizens from the country. In taking these measures—described as "retaliatory actions"—the Indonesian Government officially stated that they were designed to force a "favourable solution" of the New Guinea question in the absence of U.N. support for Indonesia's claim to sovereignty over the western half of the island.

Some 600 representatives of political, military and youth organizations from all parts of Indonesia, meeting in Jakarta on Nov. 18-19, had urged the Indonesian Government to take "retaliatory" measures against Dutch economic interests if the United Nations "failed to solve the West Irian question in Indonesia's favour." It was proposed that such "retaliatory" action should take the form of (i) nationalization of Dutch-owned enterprises; (ii) repatriation of Dutch nationals "who do not contribute to Indonesia's reconstruction programme"; (iii) a ban on the entry of Dutch nationals into Indonesia; (iv) withdrawal of permits issued to Dutch nationals practising the liberal professions. The meeting also urged the setting-up of a "West Irian Reconstruction Brigade" and a "West Irian Liberation Fund."

A resolution embodying Indonesia's claim to sovereignty over Dutch New Guinea was rejected on Nov. 29 by the U.N. General Assembly (see below), where it failed to secure the two-thirds majority necessary for adoption—as had also been the case at a number of previous Assembly sessions. On Dec. 1 the Indonesian Minister of Information (Mr. Subidjo), acting as "chairman of the Action Committee for the Liberation of West Irian," authorized the following measures to be taken with immediate effect and with the approval of the Indonesian Government: (i) a general strike of all Indonesian workers employed in Dutch enterprises; (ii) a ban on the publication of all newspapers and magazines in the Dutch language, and on the import of publications from Holland; (iii) a ban on all aircraft of Royal Dutch Airlines (K.L.M.), which were forbidden to land on or fly over Indonesian territory. K.L.M. planes already in Indonesia were required to leave the country immediately.

Although the Indonesian Government and the military authorities issued repeated warnings against the unauthorized seizure of Dutch concerns without official permission, large numbers of Dutch businesses, offices, banks and trading concerns were seized by groups of workers and youths in different parts of Indonesia during the first week of December. In Jakarta, red flags were hoisted over the offices of the Royal Dutch Packet Navigation Company (K.P.M.), the Netherlands Trading Bank (*Nederlandse Handelsmaatschappij*), the *Nationale Handelsbank*, the *Escomptobank*, the Hôtel des Indes (the largest in Indonesia), and other large concerns and enterprises, all of which were proclaimed the "property of the Indonesian Republic." Indonesian employees at the K.P.M. offices demanded that the management should sign an "instrument of transfer"; this the board refused to do, and all Dutch personnel thereupon left the building. Similar incidents occurred at many other premises illegally seized by the employees and groups of nationalist youths.

In addition to the seizure of Dutch concerns, many Indonesian shopkeepers, hotel workers, taxi-drivers, etc., refused to sell food or perform services for Dutch nationals, in defiance of Government orders. Although there were no reports of violence against individual Dutch citizens, foreign press correspondents reported that Dutch families in different parts of Java were being refused food supplies as part of the "economic blockade" and were being subjected to great hardships. It appeared, moreover, that the Indonesian Government had little or no control over the groups of workers and youths—many of them apparently Communists or Communist sympathizers—who had seized Dutch property and enterprises. The seizure of the *Nederlandse Handelsmaatschappij* (the oldest and largest bank in Indonesia) and other financial institutions led to a heavy run on the banks by depositors and the withdrawal of large sums, while the taking-over of the K.P.M. company (the largest shipping concern in Indonesia) resulted in the virtual suspension of inter-island shipping traffic.

On Dec. 5 the Indonesian Minister of Justice announced that some 50,000 Dutch nationals in Indonesia would be "expelled or repatriated" in three stages: (1) the first group, numbering some 9,000, would consist of persons employed by the Netherlands Government (including K.L.M. officials), those who could be "replaced by Indonesians," and those whose income was derived mainly from Holland; (2) the second group would include "middle-class" Dutch nationals, e.g. shopkeepers; (3) the third phase would include "other groups" (unspecified). Dutch experts were exempted from the expulsion orders.

At the same time the Indonesian Foreign Ministry announced that all Dutch Consulates and Vice-Consulates throughout Indonesia would be closed down with the exception of the diplomatic mission in Jakarta, the consular section of which would remain open but whose cultural, military and press offices would be closed. The order involved the closing-down of the Dutch Consulates at Bandung, Surabaya and Semarang (Java), Medan and Palembang (Sumatra), and Macassar (Celebes).

The Prime Minister of Indonesia (Dr Djuanda) issued a decree on Dec. 9 placing all Dutch-owned estates and plantations under the control of the Government, the implementation of the decree being left to the Minister of Agriculture, Mr. Sadjarwo. The latter explained (i) that the 500 Dutch estates (representing, it was claimed, three-quarters of all estates in Indonesia) would be under the control of the Central Government in Java and of the provincial administrations in the other islands; (ii) that the new measures would be applied only to Dutch and joint Dutch-Indonesian interests, and would remain in force as long as there was no settlement over West Irian; and (iii) that the present Dutch managers could remain indefinitely, provided they obeyed the new regulations.

In a number of instances the former Dutch estates had been illegally taken over by workers and nationalist groups in rural areas, as had been the case with Dutch enterprises in the cities and towns. When issuing the above-mentioned decree, Dr. Djuanda forbade any "harmful or obstructive activity" on the estates, stressing that the Government's decision had been taken "for the sake of continuation of production important to the State." The Prime Minister also gave a warning against any excesses that might endanger the liberty, safety and security of Dutch nationals, or which might cause damage to individual property. In particular, he called on Indonesian citizens not to take action against any Dutch nationals in the form of economic boycott or refusal to sell foodstuffs.

A similar warning was issued by General Nasution (the Army Chief of Staff) who, in his capacity as Chief Military Administrator, issued orders forbidding the further take-over of Dutch firms and enterprises anywhere in the country. General Nasution announced that the Military Administration would draw up the necessary regulations in all cases where Dutch enterprises had already been expropriated; that the regional and local military administrations would be responsible for the control of former Dutch enterprises in their respective areas; and that this control must be exercised in a restrained and orderly manner and in the name of the Indonesian Government.

Expulsion of Dutch Nationals.

Of the 50,000 Dutch nationals affected by the expulsion order, the great majority—about 30,000—were Eurasians whose families had lived in Indonesia for many years and who had never known the Netherlands. Between Dec. 10 and Dec. 31 some 10,000 left Indonesia for Holland by ship and air, many of them being women and children. Press correspondents in Jakarta spoke of the "heart-rending scenes" at the airport and dockside as families, many with young children and babies in arms, left the country of their birth and upbringing for a land unknown to them.

By arrangement with the British and Singapore authorities, those evacuated by air were temporarily accommodated at a transit camp in Singapore before being flown to Holland. As stated above, the K.L.M. had been forbidden to land in Indonesia, and the air exodus was carried out by planes of British Overseas Airways, Qantas Airways (Australian) and Air India. The evacuation by sea was carried out by Dutch and British vessels—the latter including the P. and O. liner *Himalaya* and the Orient Line vessels *Orontes* and *Oronsay*, which were diverted from their normal routes. The New Zealand transport *Captain Cook*, bound for Singapore with a New Zealand battalion for Malaya, was also diverted to Indonesia to pick up Dutch evacuees.

Press reports from Jakarta stated that many Indonesians were becoming increasingly alarmed at the large-scale exodus of Dutch nationals, in view of the possible serious effects on Indonesia's economy caused by the departure of specialists, technicians and businessmen. In a broadcast on Dec. 9, the Minister of Information said that the Indonesian Government still needed the services of such persons as technical experts and university lecturers, who would be exempted from the expulsion order and for whom separate regulations would be drawn up. He added that if any Dutch nationals wished to remain in Indonesia, "this matter could be discussed." In the course of his broadcast the Minister denied that Dutch nationals were being "driven out" of Indonesia and stated that they had been "requested" to leave the country.

Reactions in the Netherlands. - Dutch Appeals to North Atlantic Council and United Nations.

In a statement on Dec. 3 to the States-General in The Hague, the Prime Minister of the Netherlands (Dr. Drees) said that the Government viewed the situation in Indonesia with "deep concern" and would do its utmost to safeguard the interests of Dutch nationals in that country. He described the expropriation of Dutch enterprises and the measures taken against individual Dutch citizens as "not only contrary to the law of nations but also to the laws of humanity." Nevertheless, the Netherlands Government were "not without hope that the Indonesian Government will understand that the severance of the last ties with our country will harm not only us but Indonesia as well."

After the Indonesian Government's expulsion order, Dr. Drees sent a cable to Dr. Djuanda containing an urgent appeal "to take all measures to enable an orderly departure of those [Dutch nationals] who want to leave." Dr. Drees referred to the closing of the Dutch Consulates, difficulties in obtaining exit visas [required by all foreigners], and hindrances to Dutch shipping, and suggested that the Indonesian Government should give permission for ships to leave according to prearranged schedules and for charter aircraft to pick up evacuees. In reply, Dr. Djuanda stated that Indonesia would place no obstacles to the evacuation of Dutch nationals and would take all measures to facilitate their departure. The Netherlands Government also appealed to the International Red Cross and to the Inter-Governmental Committee for European Migration (ICEM) for assistance in connexion with Dutch nationals threatened with expulsion from Indonesia.

The Netherlands Government announced on Dec. 6 that it had instructed its permanent representative on the North Atlantic Council (Dr. van Kleffens) to call for an urgent session of that body so that Holland could "explain the position to her NATO partners" and request "all measures of solidarity which the present situation demands." The statement reiterated that the measures taken against Dutch nationals by the Indonesian Government were "in violation of the basic principles of international law and of human dignity."

An emergency session of the North Atlantic Council was accordingly held in Paris on Dec. 8, when Dr. van Kleffens informed the Council of developments in Indonesia. No official statement was issued, but it was understood that Dr. van Kleffens had appealed to the other NATO Powers to display solidarity with the Netherlands in a matter which, he maintained, justified co-ordinated action by the NATO countries. The other representatives were believed to have expressed sympathy for Holland, but without committing their Governments to joint protests or joint action; it was understood, however, that the British delegate (Sir Frank Roberts) had referred to the British representations to the Indonesian Ambassador in London—see below—and to the assistance given by British vessels and aircraft in evacuating Dutch nationals from Indonesia.

No official response was reported from the American side, beyond a promise to transmit the Dutch protest to Washington; a U.S. official pointed out in this connexion that there appeared nothing in the North Atlantic Treaty requiring a collective NATO response, as Indonesia was outside the treaty area and no act of aggression had been committed against the Netherlands.

The Netherlands Foreign Minister (Mr. Luns) informed the States-General on Dec. 23 that the Netherlands permanent representative at the United Nations had presented a letter to Dr. Hammarskjöld protesting at the actions of the Indonesian Government, and requesting that the communication be brought to the attention of the Security Council and the General Assembly. Referring to the "serious deterioration" in the situation during the past three weeks, Mr. Luns drew attention to the illegal expropriation of Dutch firms and plantations; to the fact that Dutch nationals in Indonesia were forbidden to sell their private property without official consent; to the arbitrary closing of consular offices; and to the attempted seizure of the K.P.M. shipping fleet—many of whose vessels, however, had succeeded in reaching foreign harbours. Mr. Luns warmly thanked the British, Australian and Singapore Governments for their assistance in evacuating Dutch nationals, and spoke of the "spontaneous indignation" which had been aroused in many countries by Indonesia's actions against the Dutch minority.

The letter presented to the U.N. Secretary-General accused the Indonesian Government of "deliberately and systematically provoking the animosity of the population against a foreign minority in their country," and declared that Indonesia was "answerable to the fullest extent for the present shameful situation." The letter continued: "The measures taken by the Government of Indonesia not only constitute discrimination against Netherlands nationals but also fall below the minimum standards that should be observed by a State in the treatment of aliens. The hostile activities directed against the Netherlands community in Indonesia are a flagrant negation of the human rights and fundamental freedoms which the U.N. Charter is designed to uphold. The pressure exerted on the Netherlands community in Indonesia should be seen as a reaction to the General Assembly's refusal to satisfy the Indonesian claim to Netherlands New Guinea [and as] an effort to achieve by illegal means that which Indonesia has failed to achieve through lawful procedure. Such action involves a challenge to the authority of the United Nations."

As a precautionary measure, two destroyers of the Royal Netherlands Navy—the *Drenthe* (2,450 tons) and *Evertsen* (1,710 tons)—left the Dutch naval base of Den Helder in mid-December for New Guinea to reinforce the destroyer *Groningen* (2,450 tons) and the frigate *Johan Maurits van Nassau* (1,500 tons), which were already in New Guinea waters.

Australian Warning to Indonesia.

Much perturbation was aroused in Australia by the Indonesian Government's actions against the Dutch minority, and in particular at Indonesia's apparent attempt to use these measures in order to force Holland to cede Western New Guinea. A statement outlining Australia's attitude was issued on Dec. 12 by the Minister for External Affairs (Mr. Casey), with the approval of the Australian Cabinet.

The statement emphasized that the Australian Government did not wish to say anything which might contain "the slightest element of injustice to our Indonesian neighbours," with whom Australia had lived on terms of amity and with whom there was only one major point of disagreement [i.e. the New Guinea question.] It went on to make the following points:

(1) Indonesia, like Australia, was a member of the United Nations and a subscriber to the U.N. Charter. The Indonesian resolution on Western New Guinea had failed to secure a majority in the General Assembly, and Australia found it "hard to believe" that Indonesia, having failed to secure her objective in the United Nations, should now seek to secure it by direct reprisals and intimidation of the country with which she was in dispute. If it turned out that the Indonesian Government were seeking to obtain satisfaction of their claims to Western New Guinea by expelling Dutch citizens and confiscating Dutch property, and if such action were allowed to succeed, a "grievous blow" would have been struck at the entire concept of international order which the United Nations was created to defend.

(2) In any self-governing country, the elected Government must accept responsibility for acts of confiscation committed by sections or groups. No Government could "stand by and witness inside its own country the perpetration of widespread acts of aggression against a minority and wash its hands of responsibility for them."

(3) Indonesia, like many other under-developed countries in Asia and elsewhere, had the natural desire to build up the living standards of her people by encouraging investment and industry. The Indonesian Government would appreciate that if Dutch investments in Indonesia—amounting to hundreds of millions of pounds—were subject to confiscation, with or without compensation, the introduction of foreign capital into other under-developed countries would be gravely discouraged. If, therefore, confiscation of Dutch investments occurred or continued, other under-developed countries—as well as Indonesia herself—would inevitably find great difficulties in obtaining the necessary capital and external assistance for developing their resources.

(4) After stressing that Australian opinion on these matters was "both deep and strong," the statement pointed out that Australia had done what she could to help Indonesia to establish a stable and orderly government. She (Australia) therefore felt qualified to urge upon the Indonesian Government "that it should not do or permit anything which would impair the maintenance of true parliamentary democracy, or diminish the clear voice with which it should be able to speak in the councils of nations."

Indonesian allegations that the Australian-Dutch agreement of Nov. 6 (see 15865 C) contained military clauses had previously been strongly repudiated by Mr. Casey, and also by the Australian representative at the United Nations. In a statement to the Australian Parliament on Nov. 19, Mr. Casey had also denounced the "deliberate campaign of falsification" which was apparently being waged in Indonesia in an attempt to influence the U.N. debate on New Guinea. Referring to

"fantastic" Indonesian press allegations that Australian troops had entered the town of Merauke, in Dutch New Guinea, Mr. Casey pointed out that the nearest Australian troops to Merauke were several hundred miles away in Papua.

British and Malayan Reactions.

A British official spokesman said on Dec. 6 that the Indonesian Ambassador in London (Dr. Sunario) had called at the Foreign Office the previous day, at his own request, and had been informed of the British Government's concern at the developments in Indonesia. The British Government were convinced that the expulsion of Dutch nationals "would be harmful to the interests of Indonesia and could only create an unfavourable impression elsewhere," and these views had been officially conveyed to Dr. Sunario. The spokesman added that Britain would offer all possible help to Dutch nationals who might be deported from Indonesia, and was keeping in touch with the Australian and Netherlands Governments on this matter.

The British Embassy in Jakarta received a Note from the Indonesian Government on Dec. 19 asking that Dutch warships should not be allowed to use the Singapore naval base. The British Government's reply (delivered on Dec. 24) pointed out that facilities at the Singapore base were normally made available to foreign warships in time of peace, and that there were no grounds for restricting or denying such facilities

It was announced in Kuala Lumpur on Dec. 17 that the Prime Minister of Malaya (Tengku Abdul Rahman) had instructed the Malayan Ambassador in Jakarta to urge the Indonesian Government, on humanitarian grounds, to exercise moderation and restraint in its treatment of Dutch nationals. The Tengku described the developments in Indonesia as "very serious" and expressed concern lest they should have repercussions in Malaya.

Deterioration of Economic Situation in Indonesia. - President Sukarno's Warning of Hardships.

The mass confiscations of Dutch estates, banks, shipping firms and other institutions resulted in an immediate and serious deterioration of the Indonesian economic situation, as was subsequently admitted by several Indonesian politicians and economic experts, as well as by President Sukarno himself. The seizure of the K.P.M. shipping line, in particular, led to the virtual suspension of inter-island traffic throughout the Indonesian archipelago, large quantities of foodstuffs and raw materials being left to rot at the waterfronts because there were few or no vessels to carry them to other islands where they were needed. The following description of the prevailing conditions was given in a despatch (dated Dec. 18) from the Special Correspondent of *The Times* in Surabaya, normally the busiest port in Indonesia :

"In Surabaya the critical situation of Java is bleakly apparent . . . Apart from the Dutch embarcation, the dock area here is dead. At the K.P.M. wharves ships which the Government dare not allow to leave, for fear they will go to Singapore, lie idle in a long silent row. At other quays there are no ships at all . . . The price of rice, the staple food, has almost trebled in the past two months, and cooking oil from the Celebes, on which the kitchens of Surabaya depend, is no longer coming in. Civilian air services have been disrupted because the military require the aircraft. Java, with its 50 million [population], is thus being thrown back on its own resources while the outer islands go their more fortunate way, trading unofficially yet extensively in small craft with Indonesia's northern neighbours. Sugar, rice, tea, coffee and other necessities, which should be moving in and out of Java, are wasting in sheds and the holds of idle ships . . ."

In a speech at Surabaya on Dec. 11—the first since the attempt on his life ten days earlier (see 15903 E)—President Sukarno warned the Indonesian people that they would have to face shortages of food, clothing, and other vital commodities in the "struggle for West Irian." After calling on the people to be "prepared for sacrifices" and to endure hardships, and appealing for the "renewal of the revolutionary spirit of 1945," he warned the people not to "concentrate their hopes on the United Nations" and declared that the campaign for West Irian had to be "fought in Indonesia and not in the U.N., Washington, London, Moscow or Peking."

Among prominent Indonesians who opposed the confiscation of Dutch property and the expulsion of Dutch nationals was the President of the Bank of Indonesia, Professor Prawiranegara. In a statement early in December, he said that the "actions we have undertaken lately in our efforts to regain West Irian are a flagrant violation of the provisions of our Constitution." After criticizing the "high-handed" seizure of foreign enterprises in Jakarta, and referring to the "chaotic effects" of these actions as reflected in a run on the banks, paralysis of exports, and soaring rice prices, he appealed to President Sukarno and Dr. Hatta (the Vice-President) to "persuade the people to return to respect for law."

To counteract the serious lack of shipping resulting from the suspension or dislocation of the K.P.M. services and the withdrawal of Dutch vessels, an Indonesian Government representative signed an agreement in Tokio on Dec. 29 with the Japan Shipowners' Association for the charter of 26 Japanese cargo ships to Indonesia, aggregating 75,000 tons, together with three to five small tankers of up to 3,000 tons each. It was stipulated that the ships would be chartered for six months ; that the contracts would be renewable at six-monthly intervals ; and that the charter fees would be paid in sterling one month in advance.

The following comment on the gravity of the economic position in Indonesia was brought by *The Economist* (London) in its issue of Dec. 7 :

". . . West New Guinea, as the Indonesians know perfectly well, would be nothing but a liability for the foreseeable future. In ostensible pursuit of his claim to this vast tropical jungle, 1,500 miles from Java, and inhabited by Papuan tribes with a stone age level of culture, President Sukarno is driving the Dutch, on whom Indonesia's economy depends, out of the country. In reality some of the Indonesians may see a more immediate attraction in the idea of squeezing the Dutch About 70 per cent of the total estate production and 70 per cent of the inter-island shipping are in Dutch hands; the temptation to grab Dutch assets must be strong; in President Sukarno's own mind it may be strengthened by the need to distract public attention from the economic and political chaos of the country . . . If the Dutch, as is to be expected, refuse to hand over New Guinea, and President Sukarno persists in what he is doing, the Indonesians will suffer far more than the Dutch. They could not, as the Dutch do now, make the Dutch estates yield 28 per cent of Indonesia's total exports; they would lose a great deal of technical assistance and financial credit; and they would risk losing a market which takes 19 per cent of their exports. . . ."

The existence of famine conditions in 30 areas of Java and of food shortages in parts of East Indonesia was admitted on Dec. 18 by an Indonesian Government spokesman.

The Indonesian Political Situation. - Dr. Sartono appointed Acting President. - Proclamation of "State of War." - Disturbances in Celebes.

The Indonesian political situation remained confused during the events described above, and few authoritative details of developments were available. During the first fortnight of December the Dutch press and radio brought a number of reports alleging that President Sukarno was a "virtual prisoner of the Army" and that effective political control was in the hands of a triumvirate consisting of Vice-President Hatta, Dr. Djuanda and General Nasution. These allegations were denied on Dec. 15 by President Sukarno himself, who said that "Amsterdam is full of rumours and wishful thinking" and that there were no differences between himself and other political and military leaders.

On Dec. 20, however, Dr. Sartono (Speaker of the Indonesian Parliament) was sworn in as acting President of Indonesia during the forthcoming absence from the country of President Sukarno, who, it was announced, would shortly take a holiday abroad for reasons of health. Dr. Djuanda had previously told the Indonesian Parliament that the President would take a holiday in a foreign country (unnamed) on the advice of his doctors.

The head of the Indonesian Army's Intelligence Service (Lieut.-Colonel Sukendro) disclosed on Dec. 26 that 71 persons had been arrested in connexion with the attempt on President Sukarno's life on Nov. 30, including members of political parties and youth organizations and of the outlawed Dar-ul-Islam organization. Colonel Sukendro said that the "master-mind" of the plot against President Sukarno was Colonel Lubis (the former Deputy Chief of Staff), who was wanted in connexion with the abortive *coup d'etat* late in 1956 (see 15272 A) and who was still at large. He added that arrested Dar-ul-Islam suspects had confessed that Colonel Lubis had personally given them the grenades with which the attack on President Sukarno was made.

A "state of war" (i.e. martial law) was proclaimed throughout Indonesia under a decree issued on Dec. 18 by President Sukarno and approved on Dec. 23 by the Indonesian Parliament. It invested supreme authority in the Chiefs of Staff of the armed forces and the Cabinet.

New regulations were issued on Dec. 30 under the "state of war" decree whereby all foreign civilian experts, irrespective of nationality, were required to give their services to the military authorities if necessary. The regulations defined experts as "all those possessing scientific, technical or other specialized knowledge," and laid down that such persons could be employed "in the interests of the security, development and welfare of the Republic." Penalties for non-compliance were fixed at a maximum of two years' imprisonment or fines up to 10,000 rupiahs (there are between 32 and 64 rupiahs to the pound sterling at official exchange rates). It was pointed out that the regulations were in the nature of a "precautionary" measure and had not yet been officially implemented.

Though few details were given in Jakarta, it became known that serious disturbances had occurred in Celebes during December as a result of widespread attacks by Dar-ul-Islam

insurgents, who claimed to be in control of the whole island except for the south-western tip. Foreign press correspondents reported that the insurgents had attacked Indonesian Army posts in different parts of the island, disrupted communications and destroyed bridges over wide areas, and established control in a number of small towns and many villages. It was also admitted in Jakarta that disturbances had occurred in the island of Ambon (Amboyna), no details being given.

U.N. Debate on New Guinea.

As stated above, the question of Western New Guinea was debated at the 12th session of the U.N. General Assembly between Nov. 20-29. A 19-nation resolution calling for negotiations between Indonesia and the Netherlands to resolve the dispute failed to gain the two-thirds majority necessary for adoption and was therefore rejected.

The Assembly had previously agreed, on the recommendation of its Steering Committee, to place the New Guinea question on its agenda, the voting being 49 in favour (including Indonesia and most other Afro-Asian nations, the Communist countries, and several Latin American countries) and 21 against (including the Netherlands, Great Britain, France, Australia and New Zealand). The United States, Canada and Turkey were among 11 abstaining countries.

A resolution was presented in the Political Committee by 18 Afro-Asian countries (including Indonesia) and Bolivia which (i) expressed concern at the prolongation of the dispute as "likely to endanger the peaceful development of the area"; (ii) invited Indonesia and the Netherlands to "pursue their endeavours to find a solution to the dispute in conformity with the principles of the U.N. Charter"; and (iii) requested the U.N. Secretary-General to assist the two parties as appropriate and to report to the next Assembly session.

Dr. Subandrio (Foreign Minister of Indonesia) said that his country's claim to "West Irian" rested on the following "basic facts": West Irian was an integral part of the former Netherlands East Indies, which had been recognized as Indonesia since 1948; the unity of the peoples of Indonesia and West Irian was derived from "centuries of living together"; the Indonesian people had proclaimed the independence of "the whole of Indonesia" in 1945; the Netherlands, in official agreements and pledges, had undertaken to promote the establishment of complete sovereignty for the whole of Indonesia; the formal transfer of sovereignty had taken place "irrevocably" on Dec. 27, 1949, and it had been agreed in 1950 that the dispute over the political status of West Irian should be resolved by peaceful means. Dr. Subandrio denied that the principle of self-determination applied to the people of Western New Guinea, and asserted that it had been introduced by the Netherlands to "confuse the issue." Warning the Committee that the patience of the Indonesian people was "not inexhaustible," he said that if the U.N. failed to satisfy Indonesia's claim she might have to fall back on "other action short of war." Dr. Subandrio added that the recent Australian-Netherlands declaration on New Guinea seemed to have "military implications," and expressed disquiet at reports that "arms shipments were flowing from the Netherlands to West Irian."

Dr. Sastroamidjojo (Indonesian representative at the U.N., and a former Prime Minister) also gave a warning that this might be the last occasion on which Indonesia would try to "seek a peaceful solution through the United Nations" if the 19-nation resolution failed to secure the necessary majority in the General Assembly. In such an eventuality Indonesia would have "no alternative" but to seek a solution "in her own way."

Mr. Schuurman (Netherlands representative at the U.N.) emphasized that his country "cannot and will not comply with Indonesian demands for the annexation of Netherlands New Guinea, nor enter into any negotiations concerning the future status of that territory without its inhabitants having the right to decide on their own political future." The right of self-determination, he said, was explicitly set forth in the U.N. Charter, and the Netherlands adhered to that principle. After stressing that "complete peace, law and order" prevailed in Western New Guinea, and that there was no disposition on the part of its inhabitants to "yield to the domination of Jakarta 2,000 miles away," Mr. Schuurman declared that "if there is any threat to peace it comes from Indonesia and not from the Netherlands."

Mr. Luns (Netherlands Foreign Minister) pointed out that Indonesia had, on the one hand, demanded negotiations on the future status of the territory, but, on the other hand, had argued that Western New Guinea was part of her territory, which left no room for negotiations and simply meant that the Netherlands was asked to hand the territory over to Indonesia. Whereas the demand for negotiations was a political question which could be considered within the Assembly's competence, Indonesia's claim to sovereignty over Western New Guinea was a purely legal question which should be dealt with by the International Court of Justice. In this connexion he reminded the Committee that the Netherlands had wanted to consult the International Court but that Indonesia had refused. Mr. Luns emphasized that there was "no truth whatsoever" in the Indonesian allegation that the Australian-Dutch agreement had "military implications," and described that allegation as a "malicious invention."

M. Peive (U.S.S.R.) expressed full support for Indonesia and called upon the U.N. to end a situation caused by "the unlawful seizure of the territory by The Hague, backed by U.S. oil interests." After accusing the Netherlands and Australia of a "brutal regime of colonial oppression" in New Guinea, he asserted that Australia's membership of SEATO "showed the reason why certain Australian quarters are interested in preserving the Dutch colonial regime."

Dr. Ronald Walker (Australia) strongly protested at the "ridiculous" remarks of the representative of the Soviet Union, "that well-known defender of the self-determination of peoples." Australia's membership of SEATO, he emphasized, had nothing whatever to do with the question of Western New Guinea, which was of "direct interest and importance" to his country. The Dutch-Indonesian Charter of Transfer of Sovereignty [of December 1949] made it clear that Western New Guinea did not belong to Indonesia, and if there was any difference in interpretation it should be referred to the International Court. Indonesia, however, was "interested in nothing less" than unconditional transfer of sovereignty, so that there was really no purpose in direct negotiations between the two parties. The choice lay between self-determination for the people of Western New Guinea, which had been promised by the Netherlands but rejected by Indonesia, or annexation by Indonesia. After refuting Dr. Subandrio's contention that the people of Indonesia and Western New Guinea had "lived together for centuries," Dr. Walker called on the Assembly not to allow itself to be influenced by Indonesia's "threats."

The 19-nation resolution was approved by the Political Committee on Nov. 27, the voting being 42 in favour and 28 against, with 11 abstentions. In the full General Assembly on Nov. 29, the resolution received 41 votes in favour and 29 against, with 11 abstentions, and thus failed to secure adoption because the affirmative votes fell considerably short of the two-thirds majority needed for the endorsement of major political decisions by the full Assembly. The only differences in the voting were that the Philippine representative supported the resolution in the Political Committee but was absent in the plenary session, whilst the South African delegate was absent in the Political Committee and voted against the resolution in the Assembly. The voting in the plenary session was as follows:

In favour (41): Afghanistan, Albania, Bolivia, Bulgaria, Burma, Byelorussia, Ceylon, Costa Rica, Czechoslovakia, Egypt, El Salvador, Ethiopia, Ghana, Greece, Guatemala, Haiti, Hungary, India, Indonesia, Iraq, Japan, Jordan, Laos, Lebanon, Libya, Malaya, Morocco, Nepal, Pakistan, Persia, Poland, Rumania, Saudi Arabia, Siam, Sudan, Syria, Tunisia, Ukraine, U.S.S.R., Yemen, and Yugoslavia.

Against (29): Argentina, Australia, Austria, Belgium, Brazil, Canada, Chile, Nationalist China, Colombia, Cuba, Denmark, Dominican Republic, France, Honduras, Iceland, Irish Republic, Israel, Italy, Luxemburg, Netherlands, New Zealand, Nicaragua, Norway, Peru, Portugal, South Africa, Spain, Sweden, and the United Kingdom.

Abstentions (11): Cambodia, Ecuador, Finland, Liberia, Mexico, Panama, Paraguay, Turkey, United States, Uruguay, and Venezuela. The Philippine delegate was absent, as explained above.

Speaking after the vote, Dr. Subandrio expressed "deep regret" that the resolution had failed to secure adoption. After pointing out that there might be "grave consequences," he added: "Up to now we have done our utmost to conduct our policy in such a way as to discourage any action which might lead to disturbances in the territory under dispute and its surroundings. To uphold this policy now would be an almost impossible task for any Indonesian Government."

It was announced in Jakarta on Dec. 21 that the "Action Committee for the Liberation of West Irian" had been dissolved and its functions taken over by the National Security Council, which is headed by the Indonesian Prime Minister and includes the Chiefs of Staff of the armed forces.

Information Centre, London - New York Times - Australian News and Information Bureau - Economist) **(Prev. rep. New Guinea, Dutch-Australian Agreement, 15865 C; U.N. Debate on New Guinea (11th Session), 15505 A.)**

A. UNITED KINGDOM.—"Truth" ceases Publication.

The weekly review *Truth* ceased publication with its issue of Dec. 28, after a lifetime of 80 years. Founded by Henry Labouchère on Jan. 4, 1877, the review was conservative in politics and was known for its distinctively independent and forthright style. During its career it was involved in a number of legal actions as a result of its often vehement attacks on what it regarded as the shady and the dishonest. In 1958 Staples Press took over control of *Truth* from Mr. Collin Brooks, who had relinquished the editorship after 12 years. Mr. Ronald Staples, the controlling shareholder of *Truth*, died on Dec. 6, 1957.—(Times - Daily Telegraph) **(15587 A.)**

A. LITERATURE. — Book Selections for November and December. - Prix Goncourt Award for 1957.

Selected books published in Great Britain, the United States, and France are given below :

Great Britain. Alexander, Michael—"The True Blue : The Life and Adventures of Colonel Fred Burnaby, 1842-85." (Rupert Hart-Davis, 30s.)

Beloff, Max—"Europe and the Europeans." (Chatto and Windus, 25s.)

Bowra, Sir Maurice—"The Greek Experience." (Weidenfeld and Nicolson, History of Civilisation series, 36s.)

Butterfield, Herbert—"George III and the Historians." (Collins, 21s.)

Charlton, Warwick—"The Voyage of Mayflower II." (Cassell, 16s.)

Feis, Herbert—"Churchill, Roosevelt, Stalin . The War they Waged and the Peace they Sought." (Oxford University Press, 42s.)

Fisher, Margery and James—"Shackleton." (Barrie, 30s.)

FitzGibbon, Constantine—"The Blitz." London 1940-41. (Allan Wingate, 21s.)

Fleming, Ian—"The Diamond Smugglers." (Cape, 12s. 6d.)

Foot, Michael—"The Pen and the Sword." Jonathan Swift and the Duke of Marlborough. (MacGibbon and Kee, 30s.)

Green, V. H. H.—"Oxford Common Room . A Study of Lincoln College and Mark Pattison." (Edward Arnold, 30s.)

Guillain, Robert—"The Blue Ants : 600 Million Chinese under the Red Flag." Translated from the French. (Secker & Warburg, 25s.)

de Hartog, Jan—"The Lost Sea." Translated from the Dutch. (Hamish Hamilton, 10s. 6d.)

"History of the Second World War : The War against Japan—Volume I." (H.M. Stationery Office, 55s.)

Hutchinson, R.C.—"March the Ninth · A Story." (Geoffrey Bles, 15s.)

Hyde, Douglas—"God's Bandit." The Story of Father Orione. (Peter Davies, 15s)

Kennedy, Sir John—"The Business of War : The War Narrative of Major-General Sir John Kennedy." (Hutchinson, 25s.)

"Triumph over Odds : An Anthology." Edited by J. Donald Adams. (Duell, Sloane and Pearce, New York, $6.00)

France. Crouzet, Maurice—"Histoire générale des civilisations : L'Epoque contemporaine." (Presses Universitaires de France, 3,000 francs)

Guimard, Paul—"Rue du Havre." (Editions Denoël, Paris, 450 francs). *Prix Interallié.*

Mégret, Christian—"Le carrefour des solitudes." (Julliard, Paris, 1,000 francs). *Prix Fémina.*

Peisson, Edouard—"La route du pôle sud." (Grasset, Paris, 690 francs)

Vailland, Roger—"La loi." (Nouvelle Revue Française, Paris, 750 francs). *Prix Goncourt.*

The *Prix Goncourt*—the leading French literary prize—was awarded by the *Académie Goncourt* on Dec. 2 to M. Roger Vailland for his novel *La loi* (see above). M. Vailland (50), formerly a journalist for *Paris-Soir*, distinguished himself in the wartime Resistance movement and published his first novel in 1945. He was at one time a member of the Communist Party but was censured by the party in 1956 when, together with other writers, he signed a protest against the Soviet intervention in Hungary. (Ed. K.C.A. - Le Monde, Paris)

(Prev. rep. Book Selections, 15833 A.)

B. PHILIPPINES. — Presidential and Congressional Elections. - Re-election of President Garcia.

Presidential elections held in the Philippines on Nov. 12 resulted in a victory for Señor Carlos Garcia, candidate of the *Nacionalista* Party, who—according to virtually complete returns issued by the Election Commission on Dec. 1—obtained 1,992,806 votes against 1,377,202 for his nearest rival, Señor José Yulo of the Liberal Party. In the elections for the Vice-Presidency, however, the Nationalist candidate (Señor José Laurel) was defeated by the Liberal candidate (Señor Diasdado Macapagal), who secured 2,185,269 votes against 1,767,920 for Señor Laurel.

Of the other three candidates contesting the presidential elections, Señor Manuel Manahan, leader of the newly-formed Progressive Party, received 1,034,124 votes ; Senator Claro Recto, leader of the Nationalist-Citizens Party and the only candidate to oppose the Philippine-U.S. defence agreement, obtained 425,447 votes ; and Señor Antonio Quirino, a dissident Liberal and a younger brother of the late President Elpidio Quirino, polled 60,099 votes.

Señor Garcia (61), whose political following was particularly strong in the southern islands (the Eastern and Western Visayas and Mindanao), had been elected Vice-President in the 1953 elections and had succeeded Señor Magsaysay as President on the latter's death in an air crash in March [see 15456 D]. The Liberal Party nominee—Señor Yulo, a former Secretary of Justice and Speaker of the House of Representatives—represented powerful business interests, being himself a sugar planter and industrialist, as well as a prominent politician with great influence in Luzon.

Señor Macapagal (48), the successful vice-presidential candidate, is a lawyer by profession, was Counsellor at the Foreign Ministry, and was a member of the Philippine delegation at the U.N. General Assembly in 1948. He a drew large part of his support from the island of Luzon.

Although there were no significant differences among the main parties over domestic or foreign policies, much interest was aroused by the emergence of the Progressive Party led by Señor Manahan, which denounced the graft and corruption alleged to be prevalent in the Nationalist and Liberal parties. Señor Manahan, who described himself as a "people's candidate," claimed to represent the ideals of the late President Magsaysay (of whom he was a close friend) and promised to continue the latter's social and land reform programmes. The Progressive Party also campaigned against alleged corrupt election practices through excessive expenditure on patronage, campaign managers, and advertising.

Polling on Luzon was considerably affected by a typhoon which flooded extensive areas of the island. In many rural areas large numbers of voters were prevented from reaching the polling-stations by swollen rivers, damaged bridges and flooded roads ; 20 people were drowned by the floods, while several thousand families had to be evacuated. Casualties arising out of election clashes were fewer than in the previous two elections, 22 people being killed in fights between rival groups as compared with 50 in 1949.

In his first public statement after the election, President Garcia said that his Government would continue to maintain close relations with the United States. Referring to the disagreement over the status of U.S. military bases in the Philippines, which had led to the breakdown of talks between the two Governments in December 1956 [see 15307 D], he said that a basis for the resumption of those talks would have to be found. On the domestic situation, Señor Garcia said that the main problem before the country was "economic in nature" ; he outlined a programme aiming at the utilization of natural resources, self-sufficiency in food, production of raw materials needed for the many new industries which had been established in the Philippine Republic, and stabilization of the Government's fiscal position.

General elections for one-third of the Senate (eight seats out of 24) and for a new House of Representatives (102 seats) also took place on Nov. 12. Of the Senate seats, six went to the Nationalist Party and two to the Liberal Party.

(The Times, Manila - New York Times) **(Prev. rep. Elections, 13305 A ; President Garcia, 15456 D.)**

C. ALBANIA. — Soviet Economic and Technical Aid.

An agreement on Soviet economic and technical assistance to Albania was signed in Moscow on Nov. 22 by General Mehmet Shehu, the Albanian Prime Minister, and M. Mikoyan, the Soviet Deputy Premier. Under the agreement the U.S.S.R. will grant Albania a long-term loan of 160,000,000 roubles for the development of the Albanian national economy during the period 1957-60, with special emphasis on the development of Albania's agriculture and of her oil, mining, and other industries. The aid will take the form of Soviet technical advice and of deliveries of industrial plant and equipment, and the Soviet loan will be repaid by Albanian exports to the U.S.S.R.—(Soviet Embassy Press Department, London)

(Prev. rep. 9946 E.)

A. PAKISTAN. — Resignation of Chundrigar Cabinet. - New Government formed by Mr. Firoz Khan Noon.

The Coalition Government of Mr. Chundrigar resigned on Dec. 11 following a serious disagreement between the Moslem League and the Republican Party over the electorate issue.

Although, when the Chundrigar Cabinet was formed, it had been agreed that the previous policy of joint electorates should be abandoned in favour of separate electorates, the central committee of the Republican Party, meeting at Lahore on Nov. 19, adopted three resolutions: (i) that the Bill restoring separate electorates which had been drafted by the Cabinet should not be introduced in the National Assembly, as planned by Mr. Chundrigar; (ii) that the Government should not do anything that might delay general elections beyond November 1958; and (iii) that a sub-committee be appointed to ascertain public opinion in East Pakistan on the electorate issue. Dr. Khan Sahib, the Republican leader and former Prime Minister of West Pakistan, stated on Nov. 24 that his party firmly supported a joint electorate system and would not compromise on principles to reach an understanding with the Moslem League on the electorate system.

Following unsuccessful efforts by Mr. Chundrigar to form a new Government, President Mirza invited Malik Firoz Khan Noon, the outgoing Foreign Minister and leader of the Republican Parliamentary Party in the National Assembly, to do so. Mr. Noon and the members of his Cabinet were sworn in on Dec. 16, the new Government's membership being:

Malik Firoz Khan Noon (Republican)	Prime Minister, Foreign Affairs, Frontier Regions, Defence, Economic Affairs, Rehabilitation, Information and Broadcasting, Law, Kashmir Affairs and Parliamentary Affairs.
*Syed Amjad Ali (Republican)	Finance.
†Mr. Mozaffar Ali Qizilbash (Republican)	Industry and Commerce.
*Mir Ghulam Ali Talpur (Republican)	Interior.
†Mian Jaffar Shah (Republican)	Food and Agriculture.
†Mr. Abdul Aleem (Republican)	Works, Labour, and Minority Affairs.
Mr. Ramizuddin Ahmed (Dissident *Krishak Sramik*)	Communications.
Mr. Kamini Kumar Datta (Republican)	Health and Education.
†Mr. H. M. B. Soomro (Republican)	Minister of State for Defence, Economic Affairs, Rehabilitation, Information and Broadcasting, Kashmir Affairs, Law and Parliamentary Affairs.
†Mr. A. Kumar Das (Independent) .. .	Minister of State for Finance.

*Held same portfolio in Chundrigar Cabinet.
†Held different portfolio previously, or took over additional portfolios in new Cabinet.

Mr. Noon's Cabinet was supported by a coalition consisting of the Republican Party, that group of the *Krishak Sramik* party led by Hamidul Haq Choudhury (the former Foreign Minister), the Awami League, the National Awami Party, the Congress Party, and the Scheduled Castes Federation. The four latter parties, however, while promising full support, had declined to be represented in the Cabinet pending the holding of general elections.

[The *Krishak Sramik* party consists of two groups. The larger one, with four members in the National Assembly, participated in the previous Coalition Government under Mr. Chundrigar; the smaller group, led by Mr. Choudhury, has two members in the National Assembly.]

For biographical details of Malik Firoz Khan Noon, who had been Minister of Foreign Affairs and Commonwealth Relations in both the Suhrawardy and Chundrigar Cabinets, see 15112 A. Syed Amjad Ali, Mir Ghulam Ali Talpur, and Mian Jaffar Shah were also members of the Suhrawardy and Chundrigar Governments. The only newcomers were Mr. Datta (a prominent Dacca lawyer, and formerly a Congress leader in East Bengal) and Mr. Ramizuddin Ahmed.

In a statement after taking office (Nov. 17) Malik Firoz Khan Noon said that Pakistan desired to live in amity and friendship with India, as with all nations, but would "not yield to anybody on her rights and would continue to strive for the right of self-determination for the people of Kashmir." His Government would stand by Pakistan's military and other alliances, and there would be no change in foreign policy. Internally, his Government would try to overcome the grave food problem and to achieve self-sufficiency; it would also fight inflation, root out corruption, rehabilitate refugees, and "strive to make life happier for the common man." He added that his Government was not yet complete and would shortly be expanded.— (Pakistan High Commissioner's Office, London)

(Prev. rep. 15866 C; 15819 A.)

B. UNITED KINGDOM. — The Finance Act, 1957.

The Finance Bill, 1957, embodying the provisions announced by the Chancellor of the Exchequer in his 1957-58 Budget (see 15481 A), was enacted on July 31, 1957, with only minor modifications.

The following amendments—all sponsored or accepted by the Government—were agreed to during the House of Commons Committee and Report stages, which took place respectively from May 21 - July 16 and on July 16 - 17.

(1) To provide, in connexion with gifts *inter vivos*, that property which was free of estate duty before the publication of the Bill should not be made subject to such duty under the Bill, provided that the persons who would be responsible for paying the duty exercised an option to this effect.

Mr. Enoch Powell (Financial Secretary to the Treasury), moving the amendment in the Report stage, explained that it fulfilled a promise given by the Chancellor of the Exchequer during the discussion of an earlier amendment moved by **Sir Patrick Spens** (C.) but subsequently withdrawn. [Sir Patrick's amendment had been intended to cover cases where the donor of an *inter vivos* gift died within five years, leaving the recipient liable for estate duty on the gift although he might meanwhile have spent or disposed of it. Sir Patrick had argued that in cases of this kind the clause of the Finance Bill covering gifts *inter vivos* would impose serious obligations on persons who might not have the wherewithal to meet the estate duty.] Mr. Powell explained that the Government amendment gave the recipient of such gifts the option of coming under the old law or the new, because in some cases the duty might be less under the Bill than under the old law.

(2) To provide, also in the case of gifts *inter vivos*, that the donee "should be treated, for the purposes of the Bill, as divesting himself, voluntarily and without consideration, of any interest in property which merged or was extinguished in another interest held or acquired by him in the same property."

Sir Harry Hylton-Foster (Solicitor-General), moving this amendment, explained that it was intended to deal with a form of "disappearing trick" which might become a convenient way of disposing of real property without the risk of incurring estate duty. Under the Bill, where a donee had ceased to possess the property originally given, the charge would fall on the property he had received in substitution, but the Bill did not deal with what could be done with a leasehold interest.

If, for instance, the donor gave a leasehold interest as a gift, and the donee bought the reversion to the lease, that leasehold interest would disappear because it would merge in the reversion and there would be no substituted property on which a charge for estate duty could be made.

(3) To enable a company to defer adopting the status of an "overseas trade corporation" (see page 15485), or to relinquish such status and re-assume it at a later date.

Mr. Powell, in moving this amendment, explained that it would give companies which had never been "overseas trade corporations" the option of deferring qualification as such for as long as they wished. A company which had already qualified as an "overseas trade corporation," but wished to cease to be so qualified, would, however, only be able to do so by virtue of a direction of the Commissioners of Inland Revenue, who would need to be satisfied (*a*) that, as a result of giving up its status, the company would enjoy relief enabling it to set off trading losses and capital charges against income; (*b*) that this was the sole or main benefit that the company would derive from ceasing to qualify as an "overseas trade corporation."

(4) To ensure that a U.K. company which was not itself an "overseas trade corporation," but was a shareholder in one and received dividends from it, should be in the same position as regards taxation as it would have been if the dividends had not come from an "overseas trade corporation."

Mr. Powell pointed out in this connexion that normally a U.K. company drawing dividends from a second U.K. company trading overseas would obtain credit for foreign tax against both income-tax and profits tax. Where, however, the second company was an "overseas trade corporation" it was, as such, exempt from profits tax under the Bill. The effect of this would be that the first company would be unable to obtain credit against its profits tax for any foreign tax still outstanding after it had been applied against the income-tax payable by it on the dividend received from the "overseas trade corporation."

(5) To increase from £85 to £100 the income which a child might enjoy in its own right before the parent became disqualified from drawing child allowance. (Moved by **Mr. Arbuthnot,** Conservative, and accepted by the Government).

The Bill was finally passed by the House of Commons on July 19 and by the House of Lords on July 31.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

(Prev. rep. 1957-58 Budget, 15481 A.)

A. UNITED KINGDOM. — The New Year Honours.

The New Year Honours List was published on Jan. 1, 1958, the principal awards being set out below :

Barons. Sir Norman Birkett, Q.C., Lord Justice of Appeal from 1950-57 and Judge of the King's Bench Division from 1941-50, Field-Marshal Sir John Harding, lately Governor of Cyprus.

[Sir Norman Birkett was chairman of the recent Privy Council inquiry into telephone-tapping—see 15776 A.]

Baronets. Colonel Sir Robert Chapman (a former Conservative M.P. for Houghton-le-Spring, Durham), for political and public services in the North of England; Mr. Godfrey Nicholson, M.P. (Conservative, Farnham), for political and public services; Sir Harry Platt, lately President of the Royal College of Surgeons.

A baronetcy had previously (Nov. 9) been conferred on Sir Cullum Welch, Lord Mayor of London in 1956-57.

Companion of Honour. Viscount Nuffield, for public and philanthropic services. [The benefactions of Lord Nuffield—who is 80—are estimated at £28,000,000.]

Knights Bachelor. Mr. Stanislaus Baker, Receiver for the Metropolitan Police District; Mr. Arthur Barnard, Director-General of Inspection, Ministry of Supply; Mr. Walter Barrie, chairman of Lloyd's; Mr. George Benson, M.P. (Labour, Chesterfield), for political and public services; Professor J. R. M. Butler, Chief Historian, Cabinet Office; Mr. William Cook, Deputy Director of the Atomic Weapons Research Establishment, Aldermaston; Alderman Christopher Cowan, for political and public services in Middlesex; Dr. Henry Cowan, Chief Medical Officer, Dept. of Health for Scotland; Alderman William Crane, chairman of the Housing Committee, Nottingham County Borough Council; Mr. Gerald d'Erlanger, chairman, British Overseas Airways Corporation; Mr. James Douglas, chairman, Southern Area Agricultural Executive Committee, Scotland; Mr. Claude Elliott, Provost of Eton College, Mr. Stanley Harley, for political and public services in the Midlands; Major Ernest Harston, secretary, British Empire Service League; Mr. Frank Hawker, Director of the Bank of England; Alderman Frederick Hoare, lately Sheriff of the City of London; Dr. Julian Huxley, the biologist and writer; Professor Christopher Ingold, Professor of Chemistry, University College, London, Colonel Colin Thornton-Kemsley, M.P. (National Liberal and Conservative, North Angus and Mearns), for political and public services; Professor Hans Krebs, Whitley Professor of Biochemistry, University of Oxford; Mr. Thomas Lund, secretary of the Law Society; Colonel James Miller, president of the Association of County Councils in Scotland and Convenor of Berwickshire County Council, Mr. Kenneth Murray, lately chairman of the Royal Bank of Scotland; Mr. Edward Norman, Chief Inspector of Taxes, Board of Inland Revenue; Mr. Fred Parkes, for political and public services in Lancashire; Mr. William Bentley Purchase, the London Coroner; Mr. Halford Reddish, for political and public services in Rugby; Mr. Sydney C. Roberts, Master of Pembroke College, Cambridge; Mr. Foster Robinson, for public services in Bristol, Mr. Steven Runciman, the historian; Mr. John Weir Russell, for political services in London; Mr. Ernest Stacey, for political services in Liverpool; Mr. Hubert Thornley, Clerk of the North Riding County Council, Yorkshire; Mr. Ashley Ward, for political and public services in Sheffield; Alderman Daniel Williams, for political and public services in Cardiff; Mr. Walter Worboys, chairman of the Council of Industrial Design.

[Mr. George Benson, M.P., has been chairman of the Public Accounts Committee of the House of Commons; Professor Butler, as Chief Historian to the Cabinet Office, is in charge of the official military histories of the Second World War; Mr. William Cook directed the British thermo-nuclear tests at Christmas Island in June 1957; Mr. Fred Parkes, of Blackpool, is chairman of one of the biggest fishing concerns in the world; Mr. S. C. Roberts is well known as an authority on Dr. Johnson and Sherlock Holmes; and Mr. Steven Runciman (the Hon. J. C. Stevenson Runciman), the authority on Byzantine history, is particularly known for his histories of the Crusades.]

Other recipients of knighthoods and other awards (in addition to those enumerated above) included the following :

Prime Minister's List. Mr. Maurice Adams, Civil Engineer-in-Chief, Admiralty; Mr. Neville Gass, chairman, British Petroleum Co. Ltd.; Mr. Harry Melville, secretary, Dept. of Scientific and Industrial Research; Mr. Arthur Owen, deputy-chairman, Board of Customs and Excise; Major-General William Penney, lately director, London Communications Security Agency; Brigadier George Walton, chairman, Territorial and Auxiliary Forces Association, County Durham.

Foreign Office List. Mr. William Allen, of the Foreign Office; Mr. Ian Henderson, H.M. Ambassador in Panama City; Mr. Edgar Joint, H.M. Ambassador in Bogotá; Mr. George Middleton, H.M. Ambassador in Beirut.

Commonwealth Relations Office List. The Hon. Stanley Burbury, Chief Justice of Tasmania; Mr. Patrick Fletcher, Minister of Native Affairs, Lands, Irrigation and Surveys, Government of Southern Rhodesia; Mr. Owain Jenkins, a member of the U.K. business community in India; Mr. Howard Mallaby, U.K. High Commissioner in New Zealand; the Hon. Alan Mansfield, Chief Justice of Queensland; Mr. Archibald Park, Lord Mayor of Hobart, Tasmania; the Hon. Roslyn Philp, Senior Puisne Judge, Supreme Court of Queensland; Mr. Geoffrey Tory, U.K. High Commissioner in Malaya; Dr. William Upjohn, of Melbourne (Victoria), for services to surgery; Mr. John Williams, managing director of the Herald and Weekly Times Ltd., Melbourne, Victoria.

Colonial Office List. Dr. Wilfred Marcus Askwith, Bishop of Gloucester and Prelate of the Order of St. Michael and St. George; Mr. Patrick Hogan, Q.C., Chief Justice of Hong Kong; Mr. Yusufali Jivanjee, for public services in Tanganyika; Mr. Audley McKisack, Q.C., Chief Justice of Uganda; Mr. George Roberts, for public services in the Bahamas; Alhaji Muhammadu Sanusi, Emir of Kano, Nigeria; Mr. Alexander Williams, Governor of the Leeward Islands.

The conferment of a knighthood on Mr. William Goode, the new Governor of Singapore (see 15732 C), had previously been announced on Nov. 6, 1957.

Royal Navy List, Army List and R.A.F. List. Recipients of knighthoods in the armed forces included Vice-Admiral Robert Elkins, Surgeon Vice-Admiral Robert May, Vice-Admiral Richard Onslow, Vice-Admiral Ballin Robertshaw, Lieut.-General Richard Goodbody (lately Colonel Commandant, Royal Regiment of Artillery), Lieut.-General Harold Pyman (late Royal Armoured Corps), Air Marshal Hugh Constantine (Deputy Chief of Staff, Plans and Policy, SHAPE), Air Marshal Edmund Hudleston (Vice-Chief of Air Staff), Air Marshal Patrick Potter (Director-General of R.A.F. Medical Services) and Air Vice-Marshal Arthur McDonald (A.O.C.-in-C., Technical Training Command).

Commonwealth of Australia List. Major-General Walter Cawthorn, Australian High Commissioner in Pakistan; Dr. Herbert Grieve, of New South Wales, for services to medicine; the Very Rev. Francis Rolland, Moderator-General of the Presbyterian Church of Australia, 1954-57; Dr. Ralph Whishaw, of Tasmania, for services to medicine, Lieut.-General Eric Woodward, Australian Army; Major-General George Wootten, chairman of the Repatriation Commission.

New Zealand List. The Hon. Kenneth Gresson, president of the N.Z. Court of Appeal; Mr. William Hale, chairman of the Dairy Board (1938-57), for services to the dairy industry; Dr. Ernest Marsden, of Wellington, for services to science.

Federation of Rhodesia and Nyasaland List. Mr. Stephen Courtauld, chairman of the Board of Trustees, Rhodes National Gallery.

D.B.E. Awards. The D.B.E. was conferred on Brigadier Cecile Johnson, Queen Alexandra's Royal Army Nursing Corps; Alderman Miss Mary Kingsmill Jones, for public services in Manchester; and Miss Rose Macaulay, the writer.

C.B.E. Awards. Recipients of the C.B.E. included Professor G. C. Allen, member of the Monopolies Commission and Professor of Political Economy, University of London; Mr. Denis Compton, the Middlesex and England cricketer and former Arsenal footballer; Mr. Clifford Curzon, the pianist; Professor G. R. Driver, Professor of Semitic Philology, University of Oxford; Miss Barbara Hepworth, the sculptress; Mr. Louis MacNeice, the writer and poet; Mme. Alicia Markova, the prima ballerina; Mr. Oliver Messel, the theatrical designer; Mr. Boris Ord, the organist, Director of Music at King's College, Cambridge; Mr. Dai Rees, the golfer; and Mr. Robert Speaight, the actor and author.

[Mr. Denis Compton (39), who has represented England at both cricket and association football, announced his retirement from professional cricket at the end of the 1957 season. Mr. Dai Rees captained the British golf team which won the Ryder Cup from the United States in 1957, for the first time in 24 years. Professor Driver has played a leading part in the controversy over the origin of the Dead Sea scrolls.].

The emergence of Ghana and of the Federation of Rhodesia and Nyasaland as full members of the Commonwealth was reflected in the appearance for the first time of separate lists for these two countries. The awards in the Ghana List were made to U.K. nationals holding official appointments in that country, as Ghanaian citizens are no longer eligible for British honours (see 15480 E).

The following titles were taken by the recipients of peerages in the Birthday Honours of 1957 (see 15589 A) : Sir Horace Evans—Baron Evans, of Merthyr Tydfil in the County of Glamorgan; Mr. J. Arthur Rank—Baron Rank, of Sutton Scotney in the County of Southampton; Lieut.-General Sir Willoughby Norrie—Baron Norrie, of Wellington, New Zealand, and of Hawkesbury Upton in the County of Gloucester.

Order of Merit conferred on Viscount Waverley.

The Order of Merit—which is the personal award of the Sovereign—was conferred on Dec. 8, 1957 on Viscount Waverley (formerly Sir John Anderson), chairman of the Port of London Authority. Lord Waverley (75) was a patient in St. Thomas's Hospital at the time, the insignia of the Order being handed to him at the hospital by Sir Michael Adeane, Private Secretary to the Queen. First elected to the House of Commons in 1938, he was a member of the War Cabinet in the Second World War and served successively as Home Secretary and Minister of Home Security (giving his name to the "Anderson" shelter), Chancellor of the Exchequer, and Lord President of the Council. He was created a peer in 1952.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15589 A.)**

B. AVIATION. — World Speed Record.

A new world speed record of 1,207.6 m.p.h. was set up on Dec. 12 by a U.S. *Voodoo* jet fighter piloted by Major Adrian E. Drew (37), of the U.S. Air Force. The record was set up at the Edwards Air Base (California) over a straight 10-mile course at a height of 39,000 feet. The previous world record of 1,132 m.p.h. was set up in March 1956 by the British pilot, Mr. L. P. Twiss.—(New York Times) **(Prev. rep. 14791 A.)**

A. SOUTH-EAST ASIA.—Mekong Development Plan.

A 20-year plan for the development of the Mekong River basin in South-East Asia, to be carried out in co-operation between the Governments of Siam, Laos, Cambodia and South Vietnam, and with U.N. assistance, was announced in New York by the U.N. Secretary-General on Nov. 15. Dr. Hammarskjold stated that Lieut.-General Raymond A. Wheeler (whom the U.N. entrusted with the task of clearing the Suez Canal) would spend three months in South-East Asia discussing the project with the Governments concerned and also with the U.N. Economic Commission for Asia and the Far East (ECAFE), which had carried out a detailed survey of the region.

(*Economist*)

The plan envisages multi-purpose, long-term river development in the Mekong Basin, involving the construction of hydro-electric stations, irrigation systems, flood-control works, and land reclamation projects. The Governments of Siam, Cambodia, Laos, and South Vietnam, in agreement with ECAFE, have agreed on three projects which will have first priority in the development plan: (1) the Pamong project, involving the construction of a dam north of Vientiane (the Laotian capital) for irrigation and hydro-electric power; (2) the Sambor project (Cambodia), envisaging a dam on the lower reaches of the Mekong for multi-purpose development; and (3) the Tonlé-Sap project (also in Cambodia), which would regulate the flow of water between the lake of that name—a natural reservoir near Pnom-Penh—and the Mekong. Two other power projects are also recommended as priorities: (4) at Khône, on the Cambodian-Laotian frontier, and (5) at Khemmarat, on the Siamese-Laotian frontier. [See accompanying map for location of these five projects.]

The 2,600-mile-long Mekong River—one of the longest in the world—rises in the mountains of Tibet, flows through northern Laos, forms the frontier between Laos and Siam for a considerable part of its course, and then flows through Cambodia and South Vietnam to enter the South China Sea near Saigon. Though it provides a comparatively steady year-round supply of water for the four countries, harmful inundations affecting millions of acres occur every year in the delta area owing to the absence of flood-control measures. At present some 14,000,000 acres are under irrigation, but experts have estimated that 23,000,000 acres could be irrigated by proper utilization of the river's resources. Such new irrigation would improve the rice yield and permit the development of corn, tobacco, soya-bean and peanut crops in lands that for centuries have depended almost exclusively on rice. Moreover, the Mekong could become navigable along its whole length—instead of partly, as at present—if the necessary works were carried out, and it could provide hydro-electric power initially estimated at 5,000,000 kw. and reaching 10,000,000-15,000,000 kw. when the scheme was in full operation.

The first stage of the Mekong development plan will consist of a three-year programme of preparatory work at an estimated annual cost of U.S. $3,000,000. The U.S. Government has offered technical aid; the French, Indian and Japanese Governments have also expressed their willingness to help in the project; and the U.N. Technical Assistance Board is expected to help in the initial stages. The four interested Governments have asked the Executive Secretary of ECAFE (Mr. Narasimhan) to undertake informal discussions with other governments, particularly the Colombo Plan countries, which might be willing to give financial and technical assistance.

General Wheeler arrived in Saigon early in December for discussions with the South Vietnamese Government. He was accompanied by Canadian, French, Indian and Japanese technical experts. General Wheeler's mission will also visit the Laotian, Cambodian and Siamese capitals (respectively Vientiane, Pnom-Penh and Bangkok) and have discussions with ECAFE. Before leaving New York, General Wheeler had pointed out that the plan would constitute "a veritable T.V.A. project for South-East Asia" and would benefit some 17,000,000 people in the four countries concerned.
(Vietnam Press Agency, Saigon - Economist - New York Times)

B. UNITED STATES. — Mr. Arthur Miller convicted of Contempt of Congress.

Mr. Arthur Miller, the well-known dramatist and husband of Miss Marilyn Monroe (the film actress), was found guilty of contempt of Congress by the Washington Federal District Court on May 31, 1957. The charge, which was not denied, was that when appearing before the House Committee on Un-American Activities in June 1956 he had refused to answer two questions on the names of the chairman and the other persons present at a meeting of Communist writers which he had attended in 1947. Judge McLaughlin, who heard the case without a jury, rejected the contention of the defence that the questions were irrelevant to the subject under investigation—viz., the alleged fraudulent procurement and misuse of passports by Communists.

Following the Supreme Court's ruling in the Watkins case (see 15740 A), a motion for acquittal was filed on Mr. Miller's behalf. Judge McLaughlin thereupon reversed his previous ruling on one count on June 28, on the ground that when challenged the committee had failed to show in what respect one of the questions was pertinent. On the other hand, Judge McLaughlin upheld Mr. Miller's conviction on the other count, as he had not raised the issue of pertinence in connexion with this question but had refused to answer it for reasons of conscience. Mr. Miller was fined $500 on July 19 and given a suspended sentence of one month's imprisonment. Notice of appeal was given.—(New York Times) **(Prev. rep. 15740 A.)**

C. YUGOSLAVIA.—Rejection of Moscow Declaration.

The central committee of the Yugoslav League of Communists issued a statement on Dec. 7 criticizing the joint declaration published on Nov. 16 in Moscow by 12 Communist parties (see page 15901). It was stated that the Yugoslav delegation in Moscow had "acted correctly by not taking part in the meeting [of the 12 parties] and by not signing the declaration, which contains attitudes and appraisals which are contrary to the position taken by the Yugoslav League of Communists, and which it considers incorrect." At the same time, however, it was stressed that "differences . . . between the Yugoslav League of Communists and some other Communist parties need not and should not be an obstacle to the development of brotherly co-operation in the struggle for socialism and world peace."

The League of Communists fully endorsed the Yugoslav delegation's action in signing a "peace manifesto" which was also issued in Moscow during the 40th anniversary celebrations of the October Revolution. This manifesto, signed by all the Communist parties attending the celebrations (64 in all), called for the immediate cessation of atomic and hydrogen weapons tests; the "unconditional and speedy" prohibition of nuclear and thermo-nuclear weapons; the ending of the "arms drive" and "military blocs"; and support for a policy of "collective security, peaceful co-existence of different social systems, and the widest economic and cultural co-operation between all peoples."

During the central committee's meeting, which was held at Brioni, President Tito recalled Yugoslavia's expulsion from the Cominform in 1948 and declared that accusations of "revisionism" were still being directed against the Yugoslav League of Communists. He added that Yugoslavia would "energetically refute such insinuations" and desired "nothing more than to be treated as an equal among equals."
(Tanjug Agency, Belgrade - Le Monde, Paris) **(Prev. rep. Moscow Declaration, 15899 A; President Tito, 15807 A.)**

D. INDIA. — Gandhi Peace Foundation.

The executive committee of the Gandhi Memorial Foundation (*Gandhi Smarak Nidhi*) approved on Dec. 15 a proposal to set up a Gandhi Peace Foundation, which would be an international centre of Gandhian Studies and of research and studies in human relations based on Gandhian principles. A scheme for a Gandhi Memorial Museum in Bombay was also approved.—(Indian High Commissioner's Office, London) **(Prev. rep. 12393 B.)**

JANUARY 4—11, 1958.

A. UNITED KINGDOM. — Resignation of Mr. Thorneycroft and Junior Treasury Ministers. - Mr. Heathcoat Amory becomes Chancellor of the Exchequer. - New Ministers of War and Agriculture.

It was announced from 10, Downing Street on Jan. 6 (*a*) that Mr. Peter Thorneycroft, the Chancellor of the Exchequer, had resigned from the Government together with Mr. Enoch Powell, Financial Secretary to the Treasury, and Mr. Nigel Birch, Economic Secretary to the Treasury; and (*b*) that the following governmental appointments had been approved by the Queen: Mr. Derick Heathcoat Amory as Chancellor of the Exchequer; Mr. John Hugh Hare as Minister of Agriculture, Fisheries, and Food *vice* Mr. Heathcoat Amory; Mr. Christopher Soames as Secretary of State for War *vice* Mr. Hare; and Mr. J. E. Simon, Q.C., as Financial Secretary to the Treasury *vice* Mr. Enoch Powell.

No new appointment was being made to the post of Economic Secretary to the Treasury. It was stated that the Paymaster-General, Mr. Maudling, would in future assist the Chancellor of the Exchequer over the whole range of economic matters, in addition to his duties in connexion with the European Free Trade Area. Successors to Mr. Soames (formerly Parliamentary and Financial Secretary to the Admiralty) and to Mr. Simon (formerly Joint Parliamentary Under-Secretary, Home Office) also remained to be appointed. It was announced that Mr. Soames would become a Privy Councillor.

Mr. Heathcoat Amory (58) served with distinction during the Second World War and was wounded at Arnhem. A member of an old Devon family, he entered Parliament in 1945 as M.P. for Tiverton. He was Minister of Pensions, and subsequently Minister of State at the Board of Trade, in Sir Winston Churchill's post-war administration, and in 1954 became Minister of Agriculture, Fisheries, and Food—a post which he continued to hold under Sir Anthony Eden and Mr. Macmillan.

Mr. John Hare, M.P. for Sudbury and Woodbridge, is a brother of Lord Listowel (the Governor-General of Ghana) and was formerly vice-chairman of the Conservative Party Organization. **Mr. Christopher Soames,** a farmer and former Coldstream Guards officer, is M.P. for Bedford and a son-in-law of Sir Winston Churchill.

The resignation of Mr. Thorneycroft, Mr. Powell, and Mr. Birch resulted from an irreconcilable difference of opinion between the Chancellor and the rest of the Cabinet on financial and economic policy. Mr. Thorneycroft had insisted that the Estimates of Government expenditure for the next financial year (1958-59) should on no account exceed the amount actually spent in the current financial year. The Cabinet agreed that the departmental Estimates should be pruned to within one per cent of the current total (implying that the current year's total would be exceeded by less than £50,000,000), but the Chancellor was not prepared to accept any increase whatsoever, and accordingly tendered his resignation.

Mr. Thorneycroft's letter to the Prime Minister (dated Jan. 6) announcing his resignation, and the reasons for it, was published on the same date together with Mr. Macmillan's reply. They were worded as follows:

Mr. Thorneycroft to Mr. Macmillan.

"Dear Prime Minister,—I write to ask you to accept my resignation from the office of Chancellor of the Exchequer. My reason can be shortly stated. I am not prepared to approve Estimates for the Government's current expenditure next year at a total higher than the sum that will be spent this year.

"Your proposed departure from this country on Jan. 7 has made it essential that a decision of principle upon this matter be taken now. It is clear that in this proposal I do not have your support or that of a number of our colleagues. In the circumstances, and since the level of Government expenditure is central to my responsibilities as Chancellor of the Exchequer, resignation is the only course open to me.

"In the sterling crisis of last summer restrictions were placed in money terms upon the level of public investment and of bank advances. The Government itself must in my view accept the same measure of financial discipline as it seeks to impose on others.

"I recognize that in order to achieve my aim some combination of politically unpopular courses would have been necessary. I nevertheless regard the limitation of Government expenditure as a prerequisite to the stability of the pound, the stabilization of prices, and the prestige and standing of our country in the world."

Mr. Macmillan to Mr. Thorneycroft.

"My dear Thorneycroft,—I was sorry to receive your letter this morning offering your resignation as Chancellor of the Exchequer. I particularly regret that you should think it necessary to take this step when the difference between you and the rest of the Cabinet is such a narrow one.

"The policy upon which we are all resolutely determined is to check inflation and to maintain the stability of sterling. In this context the limitation of Government expenditure is certainly of the greatest importance. But we must regard the policy as a whole.

"We have two objectives—one to restrain the supply of money, the other to hold back pressure for more rewards, including wages and salaries. You say that the Estimates for next year must be the exact equivalent of the sum spent this year. The rigid application of this formula, to be carried out immediately and without regard to any other consideration, would do more harm than good. For, as became clear in our discussions, to apply it literally must involve cuts in vital services, including those especially affecting certain aspects of family life—and this without any regard to the effect upon the industrial front and on the task of those who have the responsibility of working for wage restraint.

"This is not a matter of popularity. We have never shrunk from unpopular measures. This is a matter of good judgment.

"In view of the terms of your letter, I feel it necessary to put on record that throughout the 12 months in which this Government have been in office you have had the full support of the Cabinet in the financial and economic policies which we have worked out together.

"When, only a few days ago, the Estimates were put before us, the Cabinet decided to pursue by every possible means the policy of keeping Government expenditure substantially the same as last year. We were faced initially with Estimates which, as they were first presented, were considerably higher. Many of these increases were unavoidable, partly because of the larger number of children at school and the expansion of secondary and university education; and partly because of the provision that has to be made for the increasing number of old people. Nevertheless, as a result of our work together, the Cabinet was able to reduce this excess to something less than 1 per cent of the total of current Government expenditure. Moreover, we agreed to review our policy during the coming year in order to provide a greater measure of control over expenditure in certain sectors on the civil side which can only be dealt with as a longer-term problem.

"I therefore cannot accept that there is any difference of principle between the rest of the Cabinet and yourself. Resignation is always a difficult decision. It is, in my view, justified only on matters of principle. I must add that your resignation at the present time cannot help to sustain and may damage the interests which we have all been trying to preserve.

"The economic and financial measures which we adopted during the past year are, I believe, beginning to bear fruit. The Government are united in their determination to pursue them resolutely to the end. I am therefore sorry that you have chosen this moment to leave us."

Mr. Heathcoat Amory, the new Chancellor, issued the following statement on Jan. 6 setting out the basis of the Government's economic and financial policy:

"The change of Chancellor means no change in the Government's economic or financial policy. The measures which have been successful over recent months in improving our economic position will be maintained as long as is necessary without relaxation. Public expenditure, both capital and current, will continue to be sternly restricted. The Government will adopt the same criteria in regard to its own expenditure as it has been urging others to adopt in relation to theirs.

"The strengthening of sterling and a stable internal price level are the dominating aims of the Government's economic policies, and nothing whatever will take precedence over them. There have been no divisions between us in the Government at any time on these objectives.

"Success is being increasingly achieved, but the battle of inflation has not yet been won. If we continue our present efforts with unremitting and single-minded resolution, it will be won.

"Every person of good will wants to see our country's economy strong and stable. If every one of us plays his part willingly and unselfishly, these aims will be successfully attained. In taking over my heavy responsibilities, I shall need, and I am sure I shall receive, the help and good wishes of all who have the welfare of our country at heart."

A statement was also sent by Lord Hailsham, in his capacity as chairman of the Conservative Party Organization, to the principal party officials in England and Wales. It was worded as follows:

"In this morning's paper you will be reading the grave news of the resignation of the Chancellor of the Exchequer. I need not tell you that this decision was received by all his colleagues, and especially by the Prime Minister, with the greatest possible regret.

"It might seem to you on reading the Chancellor's letter that the Government were not resolved to deal with inflation at home and to defend the pound by all possible means in their power. Nothing could be further from the truth.

"We are all agreed that the carrying to their full effect of the policies announced by the Chancellor last September may well involve unpalatable and unpopular decisions covering the entire range of policy. None of my colleagues would shrink from such decisions. But we do not believe that the whole future of sterling does in fact depend, or can be represented to depend, on marginal differences in the annual Estimates which would not amount to more than 1 per cent of the Government's annual expenditure.

"Moreover, it is clearly impracticable and indefensible to make permanent alterations in the shape of social policy depend on the exact out-turn of a single year's Estimates. To do so would involve the abandonment of some of the best-established of the social policies to which successive Conservative Governments have declared their adherence.

"Although the Chancellor has decided to abandon the struggle on which the Government is embarked, his colleagues in the Cabinet are all determined to carry on the responsibilities of government. I, as chairman of the party organization, look to you and the Conservative associations in your area to give their fullest support to the Prime Minister and the Government in what must inevitably be a most worrying and exacting time. Our duty to the country and the party demands no less."

The following statement was issued at Prestatyn by Mr. Nigel Birch, who is M.P. for West Flint :

"The other Ministers at the Treasury and I have thought it right to resign because we doubt whether it would be possible to be safe and secure at home and abroad and to stop rising prices unless Government expenditure was cut down. This would certainly have involved some rough things, but we believed it was essential to do them.

"I remain a strong Conservative supporter and will go on helping the new Government in Parliament. I believe more than ever that it is essential to beat the Socialists at the next election. They would spend far more than we are doing and have far higher taxation, and I believe this would be a disaster . . ."

Mr. Enoch Powell made a statement on the reasons for Mr. Thorneycroft's and his own resignation to the South-West Wolverhampton Conservative Association on Jan. 9.

After explaining that he (Mr. Powell) had had "a direct responsibility for the Civil Estimates" as Financial Secretary to the Treasury, and that "the reasons the Chancellor gave were as compelling and binding on me as on him," Mr. Powell continued : "In view of what has been said, I want to make clear these points :

"First, the issue was not over £50 million or any other specific sum—although I do not personally regard £50 million, or one per cent of the national expenditure, as a trivality. I must also say that the Chancellor is more open to criticism for not attempting to reduce the level of expenditure than for seeking to keep it at its present level.

"Secondly, the issue was not Family Allowances or any other specific item of welfare or other expenditure. The issue was whether Mr. Thorneycroft felt he had the necessary minimum support from his colleagues for the policy to which he and they were committed. He was forced to the conclusion that he had not that support. Neither Mr. Birch nor I could avoid coming to the same conclusion . . .

"A Chancellor of the Exchequer, occupying a place second in importance under the Crown, does not cast that away for any light cause . . . What is true of the Chancellor is true in scarcely a less degree of his two junior colleagues."

After praising Mr. Thorneycroft's "judgment, calmness and moderation combined with stubbornness, determination and courage," Mr. Powell went on : "In his last Budget and since, Mr. Thorneycroft had made it clear that he regarded further substantial reduction of taxation as one of his main objects. We should therefore regard the present level of taxation as an absolute maximum which must be reduced . . . If there is to be any criticism, it should be that it was not too strict but too lax . . . No Chancellor could forget the experience of the last year when, within six months of approving Estimates which showed virtually no increase over the previous year, the Government barely saved the external value of the pound and could not prevent a further decline in its internal value."

Mr. Powell concluded by saying that he would neither say nor do anything which might in any way weaken or embarrass the Government, nor would he enter into any discussion involving matters of Cabinet secrecy.

The Cabinet's action in opposing Mr. Thorneycroft's attitude towards Government expenditure was defended by Mr. Butler (Home Secretary and Lord Privy Seal) in a speech at Felsted, Essex, on January 7.

"I want to make it clear," Mr. Butler said, "that the Cabinet as a whole is united and determined to continue its battle against inflation, to keep the cost of living steady. The Cabinet were determined to reduce expenditure to the maximum extent possible, and to do this by all possible means. The difference between the rest of the Government and Mr. Thorneycroft arose from his demand that a decision should be taken, before the Prime Minister left [on his Commonwealth tour], that the Government's current expenditure in the coming financial year should be fixed at a total no higher than was spent in the current year."

The Estimates for the new financial year, Mr. Butler continued, had been swollen for a variety of reasons—most of them "natural causes"—including a larger number of children at school, increased expenditure on higher education, the increased cost of pensions, and the consequences of a fall in world prices which necessitated larger Exchequer subsidies to home producers. Until the Estimates were presented to them, the Government could not exactly foresee what the commitments would be. The Cabinet, with the sole exception of Mr. Thorneycroft, felt that the immediate and rigid application of Mr. Thorneycroft's "doctrine" would have resulted in "slashing cuts affecting the wage-earner's family and other expenses"; this would inevitably have had an effect upon the second of the Government's major objectives—to reduce the pressure of demand for increased rewards.

In answer to Mr. Thorneycroft's request, the Cabinet had agreed on the most drastic series of cuts in expenditure and had also agreed to review the whole of national policy in the field of expenditure in the coming months, especially on the civil side. "We thought," Mr. Butler added, "that was as far as we could go, and I am sure our judgment was right . . . If we had had to readjust and alter some of our social policy in the way suggested, we should have had to do so without due regard to humanity or commonsense in facing the dual problem of inflation—limitation of money and limitation of the desire for rewards. It would have meant that we would have been asked to overturn, in the course of a few days, policies in social welfare to which some of us had devoted the service of our lives. It would have been wrong to go back, at a few days' notice, on policies which had already been announced and promised when we had already cut as much as we thought right and proper in the interests of the country as a whole. This was not a struggle between what was politically courageous and what was not : it was a struggle between degrees of proper judgment. There is nothing more important in these financial matters than the question of judging, timing, and degree. I am convinced that if we had not stuck to our point of view we would have done harm to the battle against inflation."

The Labour "Shadow Cabinet" issued the following statement on the same day (Jan. 7) :

"The resignation of the Chancellor of the Exchequer with the other two Treasury Ministers is a grave and unprecedented event. Following as it does upon the resignation of other important Ministers within the past 12 months, it provides further unexampled evidence of the progressive disintegration of the Government. The plain fact is that the Government are no longer able to give the country the coherent and purposive leadership which is so urgently needed. Parliament will certainly expect a full account of the circumstances leading to this latest crisis and of its bearing upon the Government's economic and social policy. The Opposition will therefore press for a debate upon the whole matter as soon as the House reassembles."

Mr. Macmillan left London on Jan. 7 on an overseas tour of Commonwealth countries lasting six weeks, during which he will visit India, Pakistan, Ceylon, Australia, and New Zealand.

In a statement before his departure the Prime Minister said : "Some recent difficulties of our affairs at home have caused me a little anxiety. However, they are now resolved and the Government is going forward firmly along its path. It is always a matter of regret from a personal point of view when divergencies arise between colleagues. But it is the team that matters and not the individual, and I am quite happy about the strength and power of the team. So I thought the best thing to do was to settle up these little local differences and then turn to the wider vision of the Commonwealth."

It was announced earlier the same day that Mr. Butler would take charge of the Government during Mr. Macmillan's absence and would preside at Cabinet meetings.—(Times - Daily Telegraph - Manchester Guardian - Daily Herald) **(Prev. rep. Cabinet, 15761 D ; Mr. Thorneycroft, 15770 A ; 15790 D, footnote.)**

A. MOROCCO. — Inauguration of Rabat University.

The first modern university in Morocco was inaugurated at Rabat on Dec. 21 by King Mohammed V in the presence of the Moroccan Government, the Diplomatic Corps, and many eminent French scholars. Whilst Fez (the site of a famous Islamic university) will remain the centre of higher religious learning in Morocco, the new University of Rabat will teach science, law, literature, and the social sciences. The university will have a number of French teachers, to be supplied under the Franco-Moroccan cultural convention (see 15925 A), and is designed as a meeting-point of the Moroccan and French cultures.—(Le Monde, Paris)

B. FRANCE - UNITED KINGDOM. — Channel Tunnel Study Group. - British Chairman.

It was announced in Paris on Jan. 10 that Sir Ivone Kirkpatrick, formerly Permanent Under-Secretary of State at the Foreign Office, had accepted the post of British chairman of the Channel Tunnel Study Group. The French chairman is M. René Massigli, formerly Ambassador in London.
(Times - Le Monde, Paris) **(Prev. rep. 15729 A.)**

C. WESTERN GERMANY. — Charlemagne Prize.

It was announced in Aachen on Dec. 21 that the Charlemagne Prize would be awarded in 1958 to M. Robert Schuman, the former French Prime Minister and initiator of the Schuman Plan—now the European Coal and Steel Community.

A. DISARMAMENT. — Breakdown of London Disarmament Talks. - Soviet Rejection of New Western Proposals for Ground and Aerial Inspection. - Disarmament Debate at the United Nations. - Adoption of 24-Power Resolution. - Ending of Soviet Participation in Disarmament Commission and London Sub-Committee. - Enlargement of Disarmament Commission.

The disarmament negotiations between the Western Powers and the Soviet Union (see 15517 A) were suspended indefinitely on Sept. 6, 1957, after it had proved impossible to reconcile the Western and Soviet viewpoints. The five-Power sub-committee of the U.N. Disarmament Commission (the " London sub-committee ") had met at intervals at Lancaster House, London, since March 18, 1957, and the negotiations had thus been in progress for nearly six months before they were finally abandoned.

Following the breakdown of the London discussions, the disarmament question was debated at the 12th session of the United Nations General Assembly during November. During the discussions the Soviet delegation announced that the U.S.S.R. would take no further part in the work of the Disarmament Commission or its sub-committee so long as those bodies retained their present membership ; a Soviet resolution was presented in this connexion urging the dissolution of the present 12-member Disarmament Commission and the " London sub-committee " and their replacement by a " Permanent Disarmament Commission " representing all U.N. member-nations. The General Assembly, however, rejected this proposal and adopted a 24-nation resolution embodying disarmament proposals which had been presented by the Western Powers during the London talks but had been rejected by the Soviet Union (see below). Subsequently, the Assembly also approved a resolution enlarging the Disarmament Commission from 11 to 25 members. The Soviet delegation nevertheless maintained its refusal to serve on the Commission unless it were further extended to 32 members, drawn in equal proportions from the " Western " countries on the one hand and from the " socialist " and " uncommitted " countries on the other.

The proceedings in the " London sub-committee " and at the United Nations are summarized below.

The London Sub-committee Sessions.

The five members of the London sub-committee—Mr. Harold Stassen (U.S.A.), Commander Allan Noble (U.K.), M. Valerian Zorin (U.S.S.R.), M. Jules Moch (France) and Mr. David Johnson (Canada)— decided on May 16, 1957, to adjourn for ten days so as to give the delegations time to study the various U.S., British, and Soviet proposals that had been presented during the previous two months (see 15517 A). While the sub-committee was in recess Mr. Stassen flew back to Washington for consultations with President Eisenhower. On his return to London (May 26) he announced that he would present new American proposals aimed at " small measured steps " towards arms reductions rather than any " sweeping " agreement covering all weapons.

New American Proposals.

These proposals were outlined by Mr. Stassen at five meetings of the sub-committee between June 20 and July 5, as summarized below :

(1) The U.S. Government proposed (i) a first-stage reduction in the American and Soviet forces to 2,500,000 men each; (ii) a second-stage reduction to 2,100,000 ; and (iii) a third-stage reduction to 1,700,000. The first stage would be carried out without any political pre-conditions, whilst the second- and third-stage reductions would be " dependent on progress in the solution of political problems." The armed forces of Britain and France would similarly each be reduced in three stages to levels of 750,000, 700,000 and 650,000 *pari passu* with the reductions in the U.S. and Soviet forces.

[It was understood that the " solution of political problems " referred to by Mr. Stassen included an easing of tension in Europe, and, in particular, progress towards German reunification. Commander Noble and M. Moch expressed their Governments' willingness to reduce their forces to the levels proposed by the United States if the U.S.S.R. agreed to the three-stage reduction.]

(2) Each State which was a party to a disarmament treaty should prepare and submit to the other parties a list of conventional armaments (specified in type and quantity) which it was ready to withdraw from its national armaments during the first-stage reduction. The lists would then be compared and be subject to mutual agreement. After such agreement, the arms to be withdrawn would be placed in central depots located in the territory of the State concerned, and would there become subject to international inspection and control.

(3) A first-stage disarmament agreement would involve agreement on the mutual suspension of nuclear tests, accompanied by an adequate inspection system including the establishment of control posts in the U.S.A., the U.S.S.R., the United Kingdom, the Pacific Ocean, and perhaps other areas. This would be followed by immediate negotiations on the form and provisions of an inspection system to control the end-products of nuclear military production. One month after such an inspection system was in operation, all fissionable material would be devoted exclusively to peaceful purposes. Mr. Stassen emphasized (*a*) that the U.S.A. was " ready and willing " to accept control at its nuclear plants ; and (*b*) that the temporary suspension of nuclear and thermo-nuclear tests should start " the day after " ratification of a first-stage disarmament agreement.

Soviet and Western Proposals for Suspension of Nuclear Tests.

The Soviet delegate, M. Zorin, had previously proposed on June 14 : (1) the cessation of all nuclear tests for a period of two or three years ; (2) the setting-up of an international commission to supervise the cessation of tests and to make reports to the U.N. Security Council and General Assembly ; and (3) the setting-up of control posts, equipped with scientific apparatus, in the United States, the Soviet Union, the United Kingdom, and the Pacific Ocean area.

The four Western Powers on the sub-committee issued a joint statement on July 2 which (1) welcomed the acceptance by the U.S.S.R. of " inspection posts . . . for the purposes of control and detection of nuclear testing " ; (2) recalled that this was " an essential requirement which the four [Western] delegations had long proposed and upon which they had insisted " ; and (3) said that " Soviet acceptance of this principle brings within the realm of practical possibility a temporary suspension of nuclear testing as a first step in disarmament." The statement continued :

" This temporary cessation would be subject to precise agreement . . . on its duration and timing, on the installation and location . . . of the necessary controls, including inspection posts, and on its relationship to other provisions of a first-stage agreement. These provisions would include the first steps to halt the growth of armaments and to reverse the trend by initial reductions in armed forces and designated armaments, with the necessary initial measures of inspection, and the cessation of production of fissionable materials for weapons purposes under conditions to be agreed.

" The four delegations propose that a group of experts under the direction of the five delegations meet to proceed with the design of the inspection system to verify the suspension of testing . . . "

Soviet Rejection of Western Proposals.

In a short statement on July 2, M. Zorin expressed qualified approval of the Western proposals but asked for time to study them further before definitely committing his Government. On July 8, however, he said that a meeting of experts to draft an inspection system for verifying the suspension of nuclear tests [as proposed by the Western delegations] would be a " waste of time " unless all the Powers agreed to cease also the production of nuclear weapons, to remove such weapons from their national armaments, and to renounce their use. He added that " agreement on the suspension of nuclear tests for several years, with international control, should not be dependent on other agreements."

Mr. Selwyn Lloyd's Proposals to speed Arms Talks. - Mr. Dulles's Participation in London Discussions.

Following M. Zorin's rejection of the Western proposals—at which deep disappointment was expressed by the Western representatives—the British Foreign Secretary (Mr. Selwyn Lloyd) personally took part in the sub-committee's discussions in an effort to prevent the negotiations from breaking down. On July 17 Mr. Lloyd enumerated those matters on which agreement in principle existed between the U.S.S.R. and the West, and proposed that working parties should be set up to " get to grips " with the practical matters involved.

Mr. Selwyn Lloyd admitted that important divergencies still existed between the Soviet and Western viewpoints, but stressed that agreement had been reached on the following issues :

Level of Forces.—Agreement had been reached on manpower ceilings for the U.S.A. and U.S.S.R. of 2,500,000 men and for Britain and France of 750,000 men. There was hope of agreement on further reductions at a later stage.

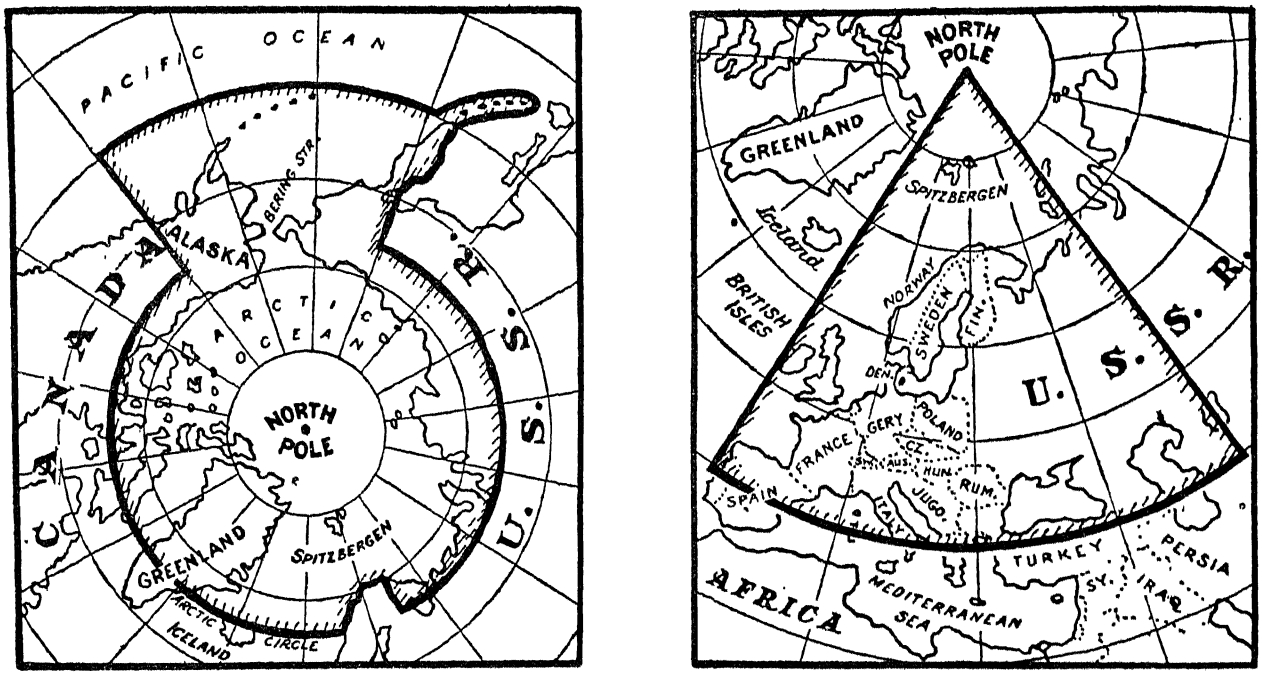
Limitation of Arms.—Agreement in principle had been reached on the drawing-up of lists of conventional armaments to be placed in depots under international supervision.

Measures against Surprise Attack.—There seemed to be agreement in principle that a first-stage disarmament agreement should contain provisions for ground observation posts and aerial inspection.

Nuclear Tests.—The principle of suspension of tests under international control had been accepted.

Mr. Selwyn Lloyd proposed that working parties be immediately set up to study and draw up agreements on the following matters :

(*a*) *Manpower Reductions.*—There was need to define manpower and methods of control.



The map on the left indicates the territory within the Arctic Circle (and, in addition, an area including the Aleutian and Kurile islands) which the West would offer as an inspection zone if the U.S.S.R. refused to accept inspection over the whole of the United States (including Alaska and the Aleutians), Canada, and the Soviet Union. The map on the right shows the area in Europe which the Western Powers would also offer for inspection if the U.S.S.R. agreed to either of the other proposals. (*Daily Telegraph*)

(*b*) *Conventional Armaments.*—Methods of drawing up and exchanging lists should be decided, as well as methods of relating lists to each other and to manpower reductions; types of armaments to be included; and methods of control over the depots.

(*c*) *Aerial Inspection.*—Definition of the areas to be covered; how the inspection should be carried out; overflying rights.

(*d*) *Ground Observation Posts.*—Where these should be established; how composed; what powers they should have, and what methods of communication.

(*e*) *Suspension of Tests.*—The composition, powers and voting procedure of the proposed international commission; the number and location of the control posts, and the composition of the teams which would man them; the types of equipment they would be allowed.

The U.S. Secretary of State, Mr. Dulles, arrived in London on July 29 to take part in the sub-committee's discussions, after previous consultations with President Eisenhower. On the following day Mr. Dulles and Mr. Selwyn Lloyd had a four-hour meeting at the Foreign Office with the Western representatives on the sub-committee, whilst the Secretary of State also saw Mr. Macmillan at 10, Downing Street.

New Western Proposals for Aerial and Ground Inspection.

New Western proposals for aerial and ground inspection, to come into force simultaneously with a first-stage agreement on disarmament, were presented in the London sub-committee on Aug. 2 by Mr. Dulles, on behalf of the U.S., British, French and Canadian Governments. These proposals, designed to safeguard the countries concerned "against the possibility of surprise attack," were as follows:

(1) All the territory of the continental United States, all of Alaska (including the Aleutian Islands), all of Canada, and all the territory of the Soviet Union, should be open to inspection.

(2) If the Soviet Government rejected this proposal, the Western Powers proposed (with the consent of the Danish and Norwegian Governments) that the following areas should be open to inspection: all the territory north of the Arctic Circle of the Soviet Union, Canada, the United States (Alaska), Denmark (Greenland), and Norway; all territory of Canada, the U.S.A. and the Soviet Union west of 140 degrees W. longitude, east of 160 degrees E. longitude, and north of 50 degrees N. latitude; all the remainder of Alaska; all the remainder of the Kamchatkan peninsula; and all of the Aleutian and Kurile islands.

(3) If the Soviet Government accepted either of the above proposals, the Western Powers proposed in addition that an area including practically the whole of Europe should be open to inspection, this area being bounded in the south by latitude 40 degrees N., in the west by longitude 10 degrees W., and in the east by latitude 60 degrees east. The Western Powers made this proposal "with the concurrence in principle of their European allies and in continuing consultation with them, subject to the indispensable consent of the countries concerned and to any mutually agreed exceptions."

(4) If the Soviet Government rejected (3) above, "a more limited zone of inspection in Europe could be discussed, but only on the understanding that this would include a significant part of the territory of the Soviet Union, as well as the other countries of Eastern Europe."

(5) To safeguard against the possibility of surprise attack, the measures taken would "include in all cases aerial inspection, with ground observation posts at principal ports, railway junctions, main highways, important airfields, etc., as agreed." There would also be mobile ground teams with specially defined authority. It would be "understood that ground posts may be established by agreement at points in the territories of the States concerned without being restricted to the limits of the above described areas, but the areas open to ground inspection shall not be less than the areas of aerial inspection."

(6) Since the establishment of any inspection system was subject to agreement on the details of its installation, maintenance, and operation, it was "proposed as a matter of urgency that a working group of experts be set up at once to examine the technical problems and to report their conclusions, which could form the basis for an annex to the agreement."

(7) "It is understood that any initial system of inspection designed to safeguard against the possibility of surprise attack may be extended by agreement of all concerned to the end that ultimately the system will deal with the danger of surprise attack from anywhere."

Mr. Selwyn Lloyd (who was present at the meeting) emphasized that the European allies of the four Western Powers had agreed in principle to the proposals; he stressed also that the position of neutral Governments such as Finland, Sweden, and Switzerland had been carefully safeguarded. Brief speeches in support of the Western proposals were also made by M. Moch for France and Mr. Johnson for Canada.

In response to American representations, the Norwegian Government had previously agreed to international air inspection of Norwegian Arctic territories, including Svalbard (Spitzbergen). The Danish Government had also agreed to international inspection of part of Greenland.

M. Zorin promised to study the proposals, but complained that they did not cover U.S., NATO, and SEATO military bases in North Africa, the Near East, Pakistan, Japan and other countries. After pointing out that there were "no settlements in the Arctic for thousands of miles, and also no military installations," he said that "if one wants to speak about preventing a surprise attack, one must presume that a surprise attack can take place from different sides and not only from one side." M. Zorin reiterated the Soviet Government's view that the ending of nuclear tests and the renunciation of nuclear weapons was a first and indispensable condition for ending the "arms race."

Mr. Dulles returned to Washington on Aug. 4, declaring on arrival that it was "now up to the Soviet Union." He said that he had returned from London "more than ever aware of the immense complexity of the task we face" but "equally convinced that that task must be pursued with unwavering resolution."

M. Zorin's Criticisms of Western Proposals.

Speaking in the sub-committee on Aug. 13 and 16, M. Zorin strongly criticized the Western proposals on a number of grounds and gave a warning that agreement was unlikely to be reached unless the Western Powers dropped what he described as "political conditions" for disarmament.

M. Zorin referred particularly to (1) the statement on German unity issued in Berlin on July 29 by Britain, France, the U.S.A. and the German Federal Republic (see 15684 A), with special reference to the phrase that "any disarmament measures applied in respect of Europe must . . . take into account the connexion between European security and German reunification"; (2) to a statement in a British White Paper that any further reductions in armed forces below the level of 2,500,000 men for the U.S.A. and 750,000 each for Britain and France "will depend on progress in the settlement of important political problems" [the White Paper in question was issued on July 18, and recapitulated the various disarmament proposals made in the London sub-committee to that date]; and (3) to the Eisenhower-Adenauer communiqué of May 29 (see 15580 A), which stressed that general agreement on disarmament "must inevitably presuppose a solution of the problem of German reunification."

After asserting that the Federal German Government was in effect being given a right of veto in "deciding the entire disarmament problem and even any initial disarmament measures," M. Zorin declared:

"If the Western Powers will remove the preliminary conditions which are now brought forward as a barrier to agreement on a substantial reduction of armed forces, it will then be possible to say that the way has been paved to agreement on the question of a reduction in armed forces . . . Are they prepared to record in the agreement a firm and definite undertaking to reduce armed forces below the level of 2,500,000 men without any preliminary conditions and without special talks on each stage of reduction? Until there is such a definite, affirmative reply, it would be wrong to create the impression that we are on the eve of agreement." M. Zorin also asked for a "clear and definite answer" as to whether the Western Powers, in agreement with the Soviet Union, were "willing to seek agreement on the withdrawal of the armed forces of the U.S.S.R., the U.S.A., the United Kingdom, and France from Germany and also from the member-countries of NATO and the Warsaw Treaty respectively."

Reverting to the question of manpower reductions, M. Zorin pointed out that the Soviet Government had originally proposed much lower figures—1,000,000 for the U.S.A. and the U.S.S.R. and 650,000 for Britain and France—than those suggested by Mr. Stassen and now accepted by the U.S.S.R. He added in this connexion: "The Western Powers' statement regarding a reduction in the armed forces of the U.S.A. and the U.S.S.R. to levels of 2,100,000 and [subsequently] 1,700,000 men is, however, emasculated by the fact that they insist on further talks being held in respect of each of these levels, and by the stipulation that agreement on any of these reductions must be conditional on the settlement of major political problems. Is it not clear that it is impossible to draw up a time-table for the settlement of international political problems? Is it not obvious that to make the settlement of one problem dependent on another means to complicate matters and drag out the settlement of each of them? . . ."

After declaring that "the question of ending nuclear tests calls for an immediate solution," M. Zorin expressed the opinion that a "mutually acceptable agreement" [on the banning of A-bomb and H-bomb tests] could be reached "within a few days" if the Western Powers "did not make the settlement of this question conditional on other disarmament questions." He added: "If the Western Powers intend seriously to discuss and solve in a businesslike way the question of ending atomic and hydrogen weapon tests, they must renounce linking the question of ending these tests with other aspects of the disarmament question on which there are still substantial differences in the positions of those taking part in the talks."

New Western Proposals on Disarmament. - Proposed One-Year Suspension of Nuclear Tests.

In an attempt to meet the Soviet objections, the Western Powers presented new disarmament proposals on Aug. 29. These proposals—put forward as a "working paper" and described by Mr. Stassen as "one of the most significant documents of the post-World War II period"—proposed *inter alia* that nuclear tests should be suspended for one year under reliable safeguards, and for a further year if steps had been taken towards a "cut-off" in the production of fissionable material for military purposes. Suspension for more than two years would depend on the "cut-off" coming into effect. [The previous Western proposal was that tests should be suspended for 10 months at first, and only on condition that the production of fissionable material for military use was also suspended; the new proposals therefore represented a concession towards the Soviet demand for the suspension of tests for two or three years without conditions.] The new Western proposals are summarized below:

Limitation and Reduction of Armed Forces and Armaments. (1) Within a year from the entry into force of a disarmament convention, the armed forces of the three Western Powers and the U.S.S.R. would be restricted to maxima of 2,500,000 for the American and Soviet forces and 750,000 for the British and French forces.

(2) During the same period these States would "place in storage depots, within their own territories and under the supervision of an international control organization, specific quantities of designated types of armaments to be agreed upon and set forth in lists annexed to the convention."

(3) The relation of other States to the convention, including the agreed levels of their armed forces, would be determined later.

(4) The States listed in (1) above would be prepared to negotiate on a further limitation of their armed forces and armaments on condition that (*a*) compliance with the provisions of the convention had been verified to their satisfaction, (*b*) there had been progress toward the solution of political issues; (*c*) other "essential States" had become parties to the convention and had accepted appropriate levels for their armed forces and armaments, fixed in relation to the limits under (1) above.

(5) "Upon the conditions cited above, negotiations could be undertaken by France, the Soviet Union, the U.K. and the U.S.A. on a further limitation of their armed forces, which would involve agreed reductions for the U.S.A. and the Soviet Union to not less than 2,100,000 men each. The levels of other essential States would be specified at the same time through negotiations with them."

(6) "Thereafter, and subject to the same conditions, negotiations could be undertaken on further limitations to not less than 1,700,000 men each for the U.S.A. and the Soviet Union. The levels of other essential States would be specified at the same time through negotiations."

(7) "Upon the conditions cited in (4) above, these States will also be prepared to negotiate on further limitations of armaments. The calculation of such armament limitations will be in agreed relation to the armed forces determined in (5) and (6) above and will be completed prior to the further limitations in armed forces. The parties must be satisfied, before such further limitations of armaments are undertaken and at all times thereafter, that the armaments at the disposal of any party to the convention do not exceed the quantities allowed in each category."

(8) "No measures for the reduction and limitation of armed forces and armaments beyond those provided for in (1) and (2) above would be put into effect "until the system of control is appropriately expanded and is able to verify such measures."

Military Expenditures. France, the Soviet Union, the U.K., and the U.S.A. would make available to the international control organization [see below] information about their military budgets and expenditures for the year preceding the entry of the convention into force, and for each year thereafter.

Nuclear Weapons. Each party to the convention would "assume an obligation not to use nuclear weapons if an armed attack has not placed the party in a situation of individual or collective self-defence."

Control of Fissionable Material. The parties to the convention would undertake:

(1) That all future production of fissionable materials would be used at home or abroad, under international supervision, exclusively for non-military purposes (including stockpiling). This undertaking would take effect one month after the international Board of Control [see below] had certified that an effective inspection system was in operation.

(2) To co-operate in the prompt installation and maintenance of such an inspection system.

(3) To appoint a group of technical experts to design the required inspection system, and to submit a progress report to the U.N. sub-committee within 10 months after the convention had come into force.

Suspension of Nuclear Tests. (1) All parties to the convention would undertake to refrain from conducting nuclear tests for a period of 12 months from the date on which the convention entered into force, provided that agreement had been reached on the installation and maintenance of the necessary controls (including inspection posts with scientific instruments) within the territories of the Soviet Union, the United Kingdom, the United States, "the area of the Pacific Ocean," and "at such other places as may be necessary, with the consent of the Governments concerned."

(2) A group of technical experts, appointed by the five Governments represented on the sub-committee, would meet as soon as possible to design the inspection system and to verify the suspension of nuclear tests.

(3) Upon the termination of the 12-months' period, the parties would be free to conduct tests unless they had agreed to continue the suspension for a further period under effective international inspection.

(4) If the inspection system referred to above was operating to the satisfaction of each party concerned, and if progress satisfactory to each party was also made in preparing an inspection system for the cessation of production of fissionable material for military purposes, all the parties to the convention would undertake to refrain from

conducting nuclear test explosions for a further 12-month period. Such an extension would be made "only with the understanding that testing may, at the discretion of each party, be conducted 24 months after the entry into force of the convention if the inspection system for the cessation of production for weapons purposes has not been installed to the satisfaction of each party concerned before the end of the 24 months, and if the cessation of production for weapons purposes has not been put into effect."

(5) If nuclear tests were resumed, each party would "announce and register in advance the dates of each series and the range of total energy to be released therein; to provide for limited observation of them; and to limit the amount of radioactive material to be released into the atmosphere."

Control of Objects entering Outer Space. Within three months after the convention entered into force, the signatories would "co-operate in the establishment of a technical committee to study the design of an inspection system which would make it possible to assure that the sending of objects through outer space will be exclusively for peaceful and scientific purposes."

Safeguards against Surprise Attack. The proposals on this matter were identical with those submitted by the Western Powers on August 2 [see page 15942].

International Control Organization. (1) All the obligations contained in the convention would be "conditional upon the continued operation of an effective international control and inspection system to verify compliance with its terms by all parties."

(2) All the control and inspections services described in the convention, and those which might be created in the course of its implementation, would be within the framework of an international control organization established under the aegis of the Security Council. It would include, as its executive organ, a Board of Control "in which the affirmative vote of the Governments represented on the sub-committee and of such other parties as may be agreed will be required for important decisions."

(3) All parties to the convention would make all relevant information freely available to the Board of Control.

(4) The functions of the international control organization would be expanded by agreement between the parties concerned "as the measures provided for in the convention are progressively applied."

(5) Other matters relating to the international control organization would be defined in annexes to the convention. They would include the duties which the organization would carry out, the method by which it should function, its composition, its relationship to the General Assembly and Security Council, and its voting procedures, working conditions, jurisdiction, immunities and prerogatives.

Movement of Armaments. In addition to its other rights and responsibilities, the Board of Control would have authority "to study a system for regulating the export and import of designated armaments."

Suspension of Convention. (1) Each party would have the right to suspend its obligations, partially or completely, by written notice to the international control organization "in the event of an important violation by another party, or other action by any State which so prejudices the security of the notifying party as to require partial or complete suspension."

(2) At its option, a party might "give advance notice of intention to suspend its obligations, in order to afford opportunity for correction of the violations or prejudicial action."

The U.S. Government issued a statement on the same day (Aug. 29) describing the proposals as "a practical workable plan for a start on world disarmament," and emphasizing that they were approved by the Governments of Belgium, Denmark, the German Federal Republic, Greece, Iceland, Italy, Luxemburg, the Netherlands, Norway, and Turkey, as well as by Britain, Canada, France, and the United States. In addition, "continuous consultation was carried out with numerous other nations in order that their views might be incorporated in the proposals to the maximum possible extent."

After stressing that the proposals, if adopted, would stop nuclear tests, halt the production of nuclear weapons, bring about a reduction in stockpiles of such weapons, reduce the dangers of surprise attack, and start a reduction in armed forces and armaments, the statement added: "The Western Allies have accomplished a major task in forging the plan. It involves major concessions by every one of them. They earnestly hope the Soviet Union will give full consideration to these far-reaching proposals. Soviet acceptance will enable a start to be made towards removing the terrible dangers of nuclear war that hang over the whole world."

Soviet Rejection of New Western Proposals. - Breakdown of London Disarmament Talks.

The new Western proposals were rejected on Aug. 27 by M. Zorin, who asserted that they "contained nothing of genuine value." In an uncompromising and strongly-worded speech, the Soviet delegate accused the Western Powers of deliberate procrastination, of "preparations for a new war," and of seeking to link the disarmament question with that of German reunification. [It was commented in the Western press that M. Zorin's attack came less than 24 hours after the Soviet claim to have successfully launched an inter-continental ballistic missile—see 15744 A.]

In the course of his speech M. Zorin asserted that the Soviet Union was being encircled by American and NATO bases; that General Norstad (the NATO Supreme Commander) and Herr Strauss (the Federal German Defence Minister) were "not concealing their plans for attacking the Soviet Union"; and that the "blackmailing military circles of Western Germany" were trying to make German reunification "on Adenauer's terms" the price of a general agreement on disarmament. Rejecting the Western inspection proposals, he said that aerial inspection in the Arctic could "not be taken seriously" and that the proposals as a whole provided no safeguards against the possibility of a surprise attack. After accusing the Western Powers of "confusing public opinion," M. Zorin reiterated the Soviet demand for an immediate suspension of nuclear tests independently of any other disarmament measures.

President Eisenhower issued a statement on Aug. 28 saying that it was "deeply disappointing to all true lovers of peace that the Soviet Union should have attacked with such scornful words" the proposals put forward by the Western Powers. He added that it was "noteworthy that this attack coincides with the boastful statement by the Soviet Union that they have made advances in the development of means for bringing mass destruction to any part of the world."

Deep disappointment at the Soviet attitude was also expressed in the London sub-committee by Mr. Stassen, Commander Noble, M. Moch, and Mr. C. S. Ritchie, the Canadian delegate. Mr. Ritchie, Canadian Ambassador in Bonn, had succeeded Mr. Johnson as Canadian delegate on the London sub-committee, to enable Mr. Johnson to return to his post as Ambassador in Moscow.

After further abortive discussions in the sub-committee it was agreed on Sept. 6 to suspend the talks *sine die*, no date being fixed for their resumption. M. Zorin had previously proposed that the talks should be suspended in view of the forthcoming session of the U.N. General Assembly.

The Disarmament Question at the United Nations.

The disarmament question was debated at the 12th session of the General Assembly during November. Before the Assembly's debate, the U.N. Disarmament Commission met on Sept. 30 to consider the work of its sub-committee in London. The principal speeches were made by Mr. Cabot Lodge (U.S.A.), as spokesman for the Western Powers on the sub-committee, and by M. Sobolev for the Soviet Union.

Mr. Cabot Lodge reiterated the Western Powers' offer to suspend nuclear tests for an initial period of up to two years if the U.S.S.R. would agree "on establishing an effective inspection system, air and ground; on stopping production of fissionable material for weapons purposes and reducing present stocks; on starting outer-space missile control; and on reducing armed forces." If the U.S.S.R. were unable to agree, "such unwillingness would confront peace-loving countries with a powerful nation whose conduct could only be explained by a determination to impose military domination on the world." In that case "peace-loving humanity everywhere would have no alternative but to concentrate all our efforts on meeting that danger."

After stressing that the possession of nuclear weapons had enabled the free world to stand firm against the large manpower resources of the Communist world, Mr. Lodge declared: "It is reasonable to believe that the possession of these weapons by the free world has helped to prevent the subjugation of still more sovereign and independent Governments. We cannot therefore, in the interests of our own security and that of world peace, agree to stop the development of nuclear weapons unless there are also restrictions on production . . . For the same reasons we will accept no ban on the use of these weapons which does not effectively apply to all instruments of war, nor will we accept a paper prohibition of stocks of these weapons when we know there is no way to ensure that such an obligation is faithfully carried out."

M. Sobolev asserted that the four Western Powers had "brought the disarmament negotiations into deadlock" by "linking the question of cessation of test explosions to the solution of a number of other questions," and had thereby "frustrated the possibility of achieving agreement" on the suspension of nuclear tests. The Western Powers had also put forward "artificial proposals" on aerial inspection which excluded "the military bases of the United States and of NATO, SEATO and the Baghdad Pact in the territories of North Africa, the Middle East, Turkey, and other countries." After claiming that the Soviet Union had made "important concessions" to the Western views, M. Sobolev declared that the London sub-committee had failed to reach agreement because "the ruling circles of the Western Powers . . . do not want disarmament but talks about disarmament, which can be used as an accompaniment to the continuation and intensification of the arms race."

Urging that the membership of the Disarmament Commission and its sub-committee should be enlarged, M. Sobolev said that the U.S.S.R. was "not opposed to narrow and private conversations" if they yielded "positive results"; in their present form, however, the disarmament negotiations had continued "in vain for years and years" and the time had come "to change the approach and move them into the fresh air of publicity."

Disarmament Debate in General Assembly.

The disarmament question was debated in the Assembly's Political Committee between Nov. 10 and Nov. 25. The

principal features of the debate were an appeal by Mr. Cabot Lodge for international control of outer space missiles; a powerful appeal for nuclear disarmament by Mr. Krishna Menon (India); and a suggestion by Dr. Luis Padilla Nervo (the Mexican Foreign Minister) for the appointment of an impartial mediator to resolve the *impasse* between the West and the Soviet Union.

Mr. Cabot Lodge, speaking in support of the 24-nation resolution before the Assembly [see below], laid special emphasis on that clause of the resolution calling for an inspection system to ensure "the use of outer space for exclusively peaceful purposes." He said in this connexion: "We seek agreement on ways to control the newest creation of science, the outer space missile. Like atomic energy, this device can serve the purpose of peace or it can be used to blow us to bits. We have only begun to learn about its possibilities, but we already know that the prospect of outer space missiles armed with nuclear warheads is too dangerous to ignore.

"In 1946, when the United States alone had nuclear weapons, it proposed to the U.N. a plan to ensure the peaceful use of the new and tremendous force of atomic energy by putting it under international control. The world knows now that a decade of anxiety and trouble could have been avoided if that plan had been accepted. We now have a similar opportunity to harness for peace man's new pioneering efforts in outer space. We must not miss this chance We have therefore proposed that a technical committee be set up to work out an inspection system which will assure the use of outer space for exclusively peaceful and scientific purposes. If there is general agreement to proceed with this study on a multilateral basis, the United States is prepared to join in this initiative without awaiting the conclusion of negotiations on the other substantive proposals."

M. Gromyko (U.S.S.R.) urged the Assembly to concentrate on achieving "a concrete agreement on specific issues" in the disarmament question, rather than to add "more useless resolutions to the dozens which have been shelved in the U.N. archives." After alleging that the Western Powers wished to continue "futile discussions on disarmament *ad infinitum*," he urged support for the Soviet Government's proposals [see below] for a two- to three-year suspension of nuclear tests and a five-year moratorium on the use of atomic weapons.

Mr. Krishna Menon stressed that the problem of disarmament was the problem of human survival, and declared that the "non-nuclear" nations had the right to expect some solution from the "nuclear" Powers—above all from the two major nuclear Powers, Russia and America. The only way to get disarmament was for the Americans and the Russians to come to some agreement, and unless they were prepared to do so "there was no hope of saving the world from atomic destruction." Mr Menon added: "If the two great Powers agree on a resolution to suspend nuclear explosions, it will change the face of the world and we can move towards disarmament. Otherwise we are living in an ivory tower isolated from the opinion of mankind, unrelated to the future of mankind, with little care for posterity, and with the survival of man at stake."

Dr. Padilla Nervo suggested that the long-standing deadlock between the U.S.S.R. and the West might be resolved by the appointment of an impartial disarmament mediator who would seek to reconcile the conflicting views of the two sides. He also proposed the setting-up of a small working group to reconcile divergent views, and suggested that this group should consist of the five countries represented on the London sub-committee plus India, Japan and Mexico. The Mexican proposals were strongly supported by the representatives of Ecuador and Panama.

Resolutions on Disarmament.

Ten separate resolutions on disarmament were presented in the Political Committee: a 24-nation resolution incorporating the Western disarmament proposals, the sponsors of which included the four Western Powers represented on the London sub-committee; three presented by the Soviet Union; three presented by India; and one each presented by Belgium, Japan, and Yugoslavia.

24-Nation Resolution. This resolution embodied the proposals put forward by the U.S.A., Great Britain, France, and Canada during the London disarmament talks. It urged the States concerned, "and particularly those on the sub-committee of the Disarmament Commission," to "give priority to reaching a disarmament agreement" which would provide for the following:

(1) The immediate suspension of nuclear weapon tests "with prompt installation of effective international control, including inspection posts equipped with appropriate scientific instruments located within the territories of the U.S.A., the U.S.S.R., the U.K., the Pacific Ocean area, and other points as required."

(2) Cessation of production of fissionable materials for weapons purposes, and the "complete devotion of future production of fissionable materials to non-weapons purposes under effective international controls"

(3) Reduction of stocks of nuclear weapons "through a programme of transfer, on an equitable and reciprocal basis and under international supervision, of stocks of fissionable material from weapons to non-weapons uses."

(4) Reduction of armed forces and armaments through adequately safeguarded arrangements.

(5) Progressive establishment of open inspection "with ground and aerial components to guard against the possibility of surprise attack."

(6) Joint study of an inspection system "designed to ensure that the sending of objects through outer space will be exclusively for peaceful and scientific purposes."

In addition, the resolution:

(*a*) requested the Disarmament Commission to reconvene the London sub-committee "as soon as feasible";

(*b*) asked that the sub-committee, as "one of its first tasks," should set up a group of experts "to study inspection systems for disarmament measures on which the sub-committee may reach agreement in principle";

(*c*) recommended that this expert group should consist of one member from each of the five countries represented on the sub-committee, plus three other members to be designated by the U.N. Secretary-General in consultation with the sub-committee;

(*d*) invited the States concerned, "and particularly those which are members of the sub-committee," to "consider the possibility of devoting, out of the funds made available as a result of disarmament, as and when sufficient progress is made, additional resources for the improvement of living conditions throughout the world, especially in the less developed countries"; and

(*e*) requested the sub-committee to report to the Disarmament Commission by April 30, 1958, on the progress achieved.

[The countries sponsoring the 24-nation resolution were: Argentina, Australia, Belgium, Brazil, Canada, Chile, Colombia, Cuba, the Dominican Republic, Ecuador, France, Honduras, Italy, Laos, Liberia, the Netherlands, Nicaragua, Panama, Paraguay, Peru, the Philippines, Tunisia, the United Kingdom and the United States. The sponsors thus included 12 Latin American countries and four Afro-Asian nations.]

First Soviet Resolution. This called for the suspension of nuclear weapons tests for a two- to three-year period from Jan. 1, 1958, and for the establishment of an international control commission to supervise the suspension of tests.

Second Soviet Resolution. This called for a five-year moratorium on the use of nuclear weapons.

Third Soviet Resolution. This resolution called for the abolition of the Disarmament Commission and its sub-committee, and their replacement by a Permanent Disarmament Commission consisting of all 82 U.N. member-States. The new Commission would hold its meetings in public and elect a Chairman and Vice-Chairman who would be responsible, *inter alia*, for helping countries to organize consultations on disarmament matters.

First Indian Resolution. This resolution urged the immediate suspension of all nuclear tests and called for the appointment of a scientific technical commission to recommend an adequate system of inspection. It was proposed that this commission should consist of equal numbers of experts representing the Western and Soviet viewpoints, plus eminent "neutral" specialists as agreed between the U.S.S.R. and the Western Powers.

Second Indian Resolution. This asked for the establishment of another commission (with the same tripartite political composition) to make recommendations on a number of fundamental questions, including (i) the "cut-off" date from which future production of fissionable material would be used for peaceful purposes only; and (ii) control and inspection arrangements relating to conventional armaments.

Third Indian Resolution. This advocated the enlargement of the Disarmament Commission and its sub-committee No specific States were named, the resolution saying only that a "more varied" membership would assist both bodies in their efforts to reach agreement on disarmament.

[An accompanying Indian memorandum pointed out that the present composition of the Disarmament Commission and its sub-committee was based on the membership of two of its predecessors—the U.N. Atomic Energy Commission and the U.N. Commission on Conventional Armaments, "which were constituted as far back as 1946, when the membership of the United Nations was very different and considerably smaller than it is to-day." It was also pointed out that the constitution of the new International Atomic Energy Agency "provides for wider representation in the Agency's Governing Body" than was the case with the Disarmament Commission or its predecessors.]

Belgian Resolution. This proposed a world-wide "publicity campaign" under U.N. auspices to inform and enlighten the peoples of the world on the dangers of the armaments race.

Japanese Resolution. This urged a suspension of all nuclear tests from the time an agreement had been reached in principle on a system of supervising their suspension until the conclusion of the disarmament debate at the next (13th) Assembly session.

Yugoslav Resolution. This urged the London sub-committee to resume its discussions at an early date and to give priority to ensuring the immediate cessation of nuclear tests, together with the necessary control measures. It also asked the sub-committee to try to reach agreement on other important matters (reduction of armed forces and military budgets, cessation of the production of fissionable materials for weapons purposes, measures to ensure that outer space missiles were used for peaceful purposes only, etc.), and to submit a progress report by May 1, 1958.

Soviet Withdrawal from Disarmament Commission.

Before a vote was taken on the above-mentioned resolutions, the Soviet Deputy Foreign Minister (M. Kuznetsov) informed the Political Committee on Nov. 4 that the U.S.S.R. would no longer participate in the Disarmament Commission and its sub-committee "as at present constituted." He asserted that both these bodies had "lost prestige in the eyes of the peoples by the fruitless nature of their work"; that their continuation on the basis of their "present narrow membership" would be "harmful to the cause of disarmament and beneficial only to those who are concerned with the further stockpiling of armaments"; and that a new Permanent Disarmament Commission, on which all U.N. member-nations should be represented, would "bring a breath of fresh air into the disarmament talks and make possible an all-round examination of the disarmament problem."

After claiming that the Soviet Union had "striven sincerely to find a reasonable solution of the disarmament problem," M. Kuznetsov again accused the Western Powers of having "invariably advanced counter-proposals which precluded a positive solution of the problem." He described the Western proposals advanced in the London sub-committee "as in the nature of an ultimatum"; accused the Western Powers of making these proposals "contingent on various political considerations and demands"; and asserted that the prolonged discussions in the Disarmament Commission and the sub-committee had shown those bodies to be "incapable of ensuring an advance towards a solution of the disarmament question." To continue the discussions in those bodies, M. Kuznetsov declared, would "merely create an illusion that something was being done on disarmament while serving to cloak the continuing arms drive carried out by the United States and other Western Powers." The Soviet Government therefore believed that "all efforts to use the Disarmament Commission and its sub-committee for fruitful deliberations have been exhausted."

In the ensuing debate a number of speakers expressed the hope that the U.S.S.R.'s decision was not a final one and that the Soviet Government would reconsider it. In reply, M. Kuznetsov said that the decision had been taken after serious consideration, that it was not designed to intimidate anyone, and that it was based on "a realistic consideration of the present situation, and on our eagerness to achieve some progress in the disarmament problem." Declaring that "the next move is up to the Western Powers," M. Kuznetsov said that there was every prospect of reaching swift agreement if those countries displayed "some goodwill and a desire for co-operation."

Adoption of 24-Nation and Belgian Resolutions.

The disarmament debate ended on Nov. 6 with the adoption by the Political Committee of two of the ten resolutions—the 24-nation resolution and the Belgian resolution. Of the other eight resolutions, four were defeated and the other four were not taken to a vote.

Resolutions adopted. (1) The 24-nation resolution was adopted by 57 votes against 9, with 15 countries abstaining and South Africa absent. The opposing votes were cast by the Soviet-bloc countries, while the 15 abstentions were Afghanistan, Burma, Ceylon, Egypt, Finland, Ghana, India, Indonesia, Japan, Nepal, Saudi Arabia, Sudan, Syria, Yemen and Yugoslavia. Thirteen of the 15 abstentions were thus Afro-Asian countries, the other two being Finland and Yugoslavia. Seventeen Afro-Asian countries supported the 24-nation resolution (Cambodia, Nationalist China, Ethiopia, Iraq, Israel, Jordan, Laos, Lebanon, Liberia, Libya, Malaya, Morocco, Pakistan, Persia, Philippines, Siam, and Tunisia), as well as all 20 Latin American countries. The other 20 supporting countries were Australia, Austria, Belgium, Canada, Denmark, France, Greece, Iceland, the Irish Republic, Italy, Luxemburg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Turkey, the United Kingdom, and the United States.

(2) The Belgian resolution was approved by 70 votes to 9 (the Soviet-bloc countries), with Syria and Yemen abstaining.

Resolutions defeated. (1) The second Soviet resolution (proposing a five-year moratorium on the use of nuclear weapons) was rejected by 45 votes to 11, with 25 abstentions.

(2) The third Soviet resolution (for the creation of a Permanent Disarmament Commission of all member-countries, and the abolition of the present Disarmament Commission and its sub-committee) was defeated by 51 votes to 9, with 21 abstentions. Most of the abstaining countries were Afro-Asian nations, the others including Austria, Finland, Mexico and Yugoslavia.

(3) The first Indian resolution (for the immediate suspension of nuclear tests) was negatived by 38 votes to 22, with 20 abstentions.

(4) The Japanese resolution was defeated by 32 votes to 18, with 31 abstentions. Britain, France, the Soviet Union and the United States all voted against the resolution.

Resolutions not voted upon. No vote was taken on the first Soviet resolution (for a two- to three-year suspension of nuclear tests), the second and third Indian resolutions, and the Yugoslav resolution.

The full Assembly, meeting on Nov. 14, approved the 24-nation resolution by an identical vote to that in the Political Committee (57 in favour, 9 against, 15 abstentions). The Belgian resolution was also approved by 71 votes to 9 with one abstention (Syria).

Enlargement of Disarmament Commission.

In response to the widespread concern expressed by many members at the Soviet boycott of the Disarmament Commission, the British, French and U.S. delegations announced on Nov. 18 that their Governments were prepared to expand the present 11-member Commission to 25 members by the addition of the following 14 countries: Argentina, Australia, Belgium, Brazil, Burma, Czechoslovakia, India, Italy, Tunisia, Yugoslavia, Egypt, Mexico, Norway and Poland.

The Western Powers had originally proposed that the Commission should be expanded by the first ten countries—i.e. from 11 to 21 members. Several delegations, however—notably those of India and Yugoslavia—had urged a further expansion so as to give the Commission as broadly-based and representative a character as possible, particularly by the inclusion of an Arab State and an additional Latin American State. After intensive private negotiations, the Western Powers agreed that Egypt, Mexico, Norway and Poland should be added to the list originally proposed.

A resolution to expand the Disarmament Commission to 25 members was accordingly presented in the plenary session of the Assembly on Nov. 19, the joint sponsors being Canada, India, Japan, Paraguay and Sweden. The Albanian delegate, however, moved an amendment that the Commission should be further expanded to 32 members by the inclusion of Austria, Bulgaria, Ceylon, Finland, Indonesia, Rumania and the Sudan (i.e. two members of the Soviet group and five "neutralist" countries). The Albanian amendment was defeated by 38 votes to 18, with 19 abstentions, and the five-nation resolution was then adopted by 60 votes to 9, with 11 abstentions, South Africa absent, and Yugoslavia not participating in the vote.

The opposing votes (on the five-nation resolution) were cast by the Soviet-bloc countries, the 11 abstentions being Afghanistan, Cambodia, Cuba, Finland, Ghana, the Irish Republic, Israel, Liberia, Malaya, Morocco and Pakistan. Yugoslavia was originally one of the sponsors of the resolution with Canada, India, Japan, Paraguay and Sweden, but withdrew her sponsorship at the last moment when it became apparent that the resolution would not command unanimous support in the Assembly. The Yugoslav delegate explained that he would not participate in the vote because the efforts of the sponsors had been "based on the conviction that the solution proposed would be generally accepted."

Speaking before the vote, M. Kuznetsov announced that the U.S.S.R. would support the Albanian proposal to expand the Disarmament Commission to 32 members, although the Soviet Government considered this only a "half-way solution." He reserved his Government's right to raise the Soviet 32-nation proposal at the next Assembly session if the Albanian amendment was not adopted. In a press statement after the voting, M. Kuznetsov said that the U.S.S.R. would be prepared to participate in a 32-member Commission "of which half the members would be drawn from the Western Powers or countries associated with them in military pacts, and the other half from uncommitted countries and the socialist countries." The new 25-member Commission, however, remained "completely unacceptable" to the Soviet Union. In reply to questions, M. Kuznetsov insisted that the Soviet boycott of the Disarmament Commission and its sub-committee need not necessarily involve a halt in the disarmament negotiations, which could still be carried on through normal diplomatic channels.

As originally constituted in 1952 the Disarmament Commission consisted of the 11 members of the Security Council plus Canada, as a member of the London sub-committee. As from Jan. 1, 1958, the Commission's membership consists of the 11 Security Council members plus the 14 countries mentioned above. [Canada herself is on the Security Council for a two-year term as from Jan. 1, 1958—see 15818 A—and is thus a member of the Commission both in virtue of her Council membership and of her membership of the London sub-committee.] Poland and Czechoslovakia, in addition to the U.S.S.R., will not participate in the enlarged Disarmament Commission—the Polish and Czechoslovak delegates having previously informed the General Assembly that they would boycott the Commission if the Albanian amendment was not adopted.—(U.N. Information Centre, London - New York Times - New York Herald Tribune - U.S. Information Agency - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Soviet Embassy Press Department, London - The Statesman, Calcutta - Montreal Star - Tanjug Agency, Belgrade)

(Prev. rep. Disarmament, 15517 A.)

A. UNITED STATES. — Progress of Racial Desegregation in Schools during 1957. - Rulings by Supreme Court against Segregation. - Counter-measures in Southern States.

Racial desegregation in schools in the Southern States of the U.S.A. made slow progress during 1957. In November it was estimated that 740 school districts containing Negro residents had been fully or partly integrated, against 2,300 which remained segregated; three of the integrated districts were in North Carolina (where integration began in September), three in Tennessee, 10 in Arkansas, and the remainder in the District of Columbia, Delaware, Kentucky, Maryland, Missouri, Oklahoma, Texas, and West Virginia. The process of integration gave rise to local disorders at Little Rock (see 15803 A) and also at North Little Rock (Arkansas) and Nashville (Tennessee). In Alabama, Florida, Georgia, Louisiana, Mississippi, South Carolina, and Virginia the school systems remained completely segregated.

In a ruling of April 29, 1957, the Supreme Court prohibited racial segregation in private institutions administered by public officials. The Court's ruling was given on an appeal against a judgment of the Pennsylvania Supreme Court, which had decided that two Negro boys had no constitutional right of admission to Girard College—a school originally founded for "poor, male, white" orphans. The Federal Supreme Court, however, held that the Philadelphia city authorities (who administered the school) were "an agency of the State of Pennsylvania" and were therefore forbidden to practise racial discrimination under the Fourteenth Amendment to the Constitution, irrespective of the origin of the school's funds.

Developments in the individual States connected with the question of educational segregation are described below. (Figures of the school population in September 1957 are given in brackets.)

Alabama (total 745,100, Negro 273,000). At Birmingham, where Negro leaders had launched a movement in favour of integration, a Negro clergyman who attempted to enrol four Negro pupils at a white school on Sept. 9 was beaten up by a group of white men, together with his 12-year-old daughter. A Negro had previously been kidnapped, beaten and mutilated by members of the Ku Klux Klan on Sept. 2, apparently in order to terrorize the Negro population; the leader of the gang was sentenced on Nov. 1 to 20 years' imprisonment.

Arkansas (total 418,700, Negro 102,000). Four Bills intended to hinder the process of integration were adopted by the State Legislature during February and approved by Governor Faubus. These set up a State Sovereignty Commission with power to demand membership lists of organizations such as the National Association for the Advancement of Coloured People (N.A.A.C.P); allowed parents to keep children out of integrated schools; and empowered school districts to assign pupils to particular schools and to use State funds to oppose integration in the courts.

As a result of the integration controversy at Little Rock, the school board of North Little Rock (a separate town on the other side of the Arkansas River) decided early in September to suspend indefinitely the programme of limited integration which it had adopted in 1955.

Delaware (total 65,315, Negro 11,411). The position remained virtually static, most schools in Wilmington and neighbouring areas being integrated and schools in the rest of the State remaining segregated.

Florida (total 760,177, Negro 165,957). The State Legislature passed a Bill in May, 1957, which permitted any district threatened with integration to suspend the State school system, and to transfer the pupils to other districts or to private schools at the State's expense. The Bill was vetoed by Governor Collins, but was again passed by both Houses in a special session in October; in the Lower House, however, it failed to secure the two-thirds majority required to pass a Bill in a special session.

The Florida Supreme Court refused Mr. Virgil Hawkins (a Negro teacher) admission to the University of Florida law school on March 8, without prejudice to his right to appear before the court again "when he is prepared to present testimony showing that his admission can be accomplished without doing great public mischief." The U.S. Supreme Court had previously ruled on March 12, 1956, that Mr. Hawkins should be admitted to the university immediately.

Georgia (total 942,000, Negro 297,692). The State Senate adopted unanimously on Feb. 8 a resolution asking Congress to declare null and void the Fourteenth and Fifthteenth Amendments to the U.S. Constitution, on the ground that the Congresses which proposed and adopted these amendments during the reconstruction period after the Civil War refused to seat duly elected representatives from the former Confederate States. [The Fourteenth Amendment, adopted in 1868, laid down that no State should "deny to any person within its jurisdiction the equal protection of the laws"; the Fifteenth, adopted in 1870, gave Negroes the right to vote. It was on the basis of the Fourteenth Amendment that the Supreme Court declared segregation unconstitutional in 1954—see 13593 A.]

A resolution demanding the impeachment of Chief Justice Warren and Justices Black, Douglas, Frankfurter, Reed, and Clark for "high crimes and misdemeanours" was adopted by the Lower House of the State Legislature on Feb. 18, and by the State Senate on Feb. 21. The resolution did not refer to the Supreme Court's ruling on segregation, but alleged that the Justices had "usurped powers reserved to the States" or associated with "Communist-front" organizations such as the N.A.A.C.P.

Kentucky (total 590,129, Negro 38,358). At Sturgis, where 17 Negro pupils were admitted to the white high school on Sept. 3, a dynamite explosion occurred in a Negro neighbourhood on the same day, but no other disturbances took place. Following the earlier riots in the town in September 1956 (see 15359 A) the local school board had decided to return to segregation, but, as the result of an appeal by the N.A.A.C.P., the Federal Court subsequently ordered the admission of Negroes to the school.

A report published by the Louisville education authorities on Oct. 2 stated that 57 of the city's schools, attended by 78 per cent of the pupils, had been integrated; 10 others were attended only by white pupils and eight by Negroes. Louisville schools had been integrated for the first time in September 1956.

Lousiana (total 600,000, Negro 225,000). The New Orleans Federal Court of Appeal on March 3 declared the State's laws on educational segregation to be unconstitutional, and ordered the integration of New Orleans schools "with all deliberate speed."

Maryland (total 507,137, Negro 109,720). Integration was reported to be generally accepted in the western part of the State, where the Negro population is comparatively small, but to be meeting with considerable opposition in other areas.

Mississippi (total 541,938, Negro 268,216). The schools remained completely segregated.

Missouri (total 744,500, Negro 67,000). The State education authorities estimated in September that 95 per cent of Negro pupils were attending school in districts which were wholly or partly integrated.

North Carolina (total 1,025,463. Negro 301,161). Integration began in the cities of Charlotte, Greensboro, and Winston-Salem on Sept. 3 without serious opposition.

Oklahama (total 527,195, Negro 37,367). The process of integration continued without serious friction.

South Carolina (total 563,244, Negro 243,574). The schools remained completely segregated.

Tennessee (total 754,945, Negro 128,164). The Nashville Federal District Court ruled on Sept. 6 that a law permitting "voluntary" segregation, which had been passed by the State Legislature in January, was "patently and manifestly unconstitutional," and ordered the Nashville city school board to proceed with its integration programme, under which a small number of Negro children were to be admitted to white schools for the first time. When the schools opened on Sept. 9 police escorted the Negro children through hostile demonstrators; Governor Clement had previously refused a request by segregationists to use the National Guard (like Governor Faubus of Arkansas) to prevent them from attending white schools. In the early hours of Sept. 10 one of the schools concerned was seriously damaged by a dynamite explosion, whereupon the police rounded up a number of prominent segregationist agitators, including John Kasper, who had led the riots in Clinton a year before [see page 15360]. After the Federal District Court had granted an injunction on Sept. 16 against Kasper and 10 other agitators, forbidding them to interfere with the city's educational system, the situation in Nashville rapidly returned to normal.

Kasper (27), an anti-negro and anti-Semitic propagandist, achieved notoriety in 1956 by organizing the Clinton riots, in August of that year he was sentenced to a year's imprisonment for defying an injunction issued against him, his appeal against the sentence being rejected by the Supreme Court on Oct. 14, 1957. Together with six residents of the Clinton district, he was again found guilty by an all-white jury at Knoxville on July 23, 1957, of fomenting disorders in December 1956 in defiance of a Federal Court injunction; sentence was postponed pending an appeal. The case was the first in which charges of criminal contempt arising from a Federal Court's injunction against interference with integration had been tried by a jury in a Southern State.

Texas (total 1,814.100, Negro 248,532). Governor Daniel signed on Dec. 11 three Bills passed by the State Legislature which (i) authorized the Governor to close any public school where there was a danger that troops would be used to enforce integration, as at Little Rock; (ii) set up a $50,000 fund to cover the legal expenses of local authorities involved in suits arising from demands for integration; and (iii) required the N.A.A.C.P. to give details of its membership on the order of a county judge.

Integration made little progress in the eastern part of the State, where Negroes form about half the population, but elsewhere proceeded without incident. A Federal Appeals Court reversed on Dec. 27 a decision by a lower court ordering the Dallas city authorities to admit Negroes to white schools by February 1958, and ruled that they should have more time to carry out integration. The original suit had been brought in 1955 by Negro parents who claimed that their children were refused admission to all-white schools.

Virginia (total 751,013, Negro 184,417). The Norfolk Federal District Court ruled on Feb. 12 that the Pupil Placement Act passed in 1956 was unconstitutional, and ordered the educational authorities in the towns of Norfolk and Newport News to begin integration. This ruling was confirmed on Oct. 21 by the Supreme Court, which had previously rejected appeals against orders issued by lower courts for the integration of schools in Charlottesville and Arlington County.

West Virginia (total 457,807, Negro 23,806). Integration was reported in September to have begun in all the 43 counties containing Negro residents.

Segregation in Buses and Public Places.

Recent developments relating to segregation in buses and public places are summarized below.

Alabama. In Birmingham 22 Negroes who had defied the city's bus segregation laws on Dec. 26, 1956 were fined $55 each on March 22. In pronouncing sentence, Judge Parker criticized the Supreme Court's ruling against racial segregation on the Montgomery bus service, and declared that the Fourteenth Amendment was "null and void" as ratification had been imposed on the Southern States by military government.

In Montgomery two white men who had confessed to causing a dynamite explosion in a Negro church on Jan. 10, as a protest against the abolition of racial segregation on buses, were acquitted by an all-white jury on May 30 after the defence had alleged that their confessions had been extorted from them by "Communist brain-washing techniques." At Bessemer the home of a Negro lawyer who supported a movement for the abolition of segregation in public parks was damaged by a dynamite explosion on Nov. 1.

The Montgomery city commission adopted on March 19 an ordinance declaring it illegal for Whites and Negroes "to play together . . . in any game of cards, dice, dominoes, checkers, pool, billiards, softball, basketball, baseball, football, golf, track and at swimming pools . . . or in any athletic contest."

Georgia. The State Senate passed unanimously on Feb. 14 a Bill forbidding inter-racial "dancing, social functions, entertainments, athletic training, games, sports, or contests." In the House of Representatives, however, opponents of the Bill secured its postponement until the 1958 session by demanding the printing of proposed amendments, in accordance with the rules of the House. The Bill had aroused considerable opposition in sporting circles, as its implementation would have broken up the South Atlantic Baseball League, which includes both White and Negro players.

A referendum held in Alabama on Dec. 17, 1957, resulted in a majority in favour of a constitutional amendment under which Macon County would be abolished and divided between the neighbouring counties. The purpose of the amendment was to reduce the potential political influence of the Negro population, which forms seven-eighths of the population of Macon County and one-third of the electorate. A Bill had previously been passed in July to exclude the Negro districts from the city of Tuskegee, and thereby to prevent the Negroes, who form seven-tenths of the city's population, from voting in municipal elections.—(New York Times - New York Herald Tribune) **(Prev. rep. Desegregation Question, 15359 A; Little Rock, 15803 A.)**

A. MOROCCO - UNITED STATES. — King Mohammed's Visit to Washington.

King Mohammed V of Morocco, accompanied by his Foreign Minister (M. Balafrej), arrived in Washington on Nov. 25 on a State visit. During the next two days he had discussions with Mr. Dulles, the Secretary of State, acting on behalf of President Eisenhower, who had been taken ill shortly after the King's arrival (see 15894 A). Towards the end of his stay in Washington, however, King Mohammed paid a brief visit to the President at the White House.

A joint statement issued at the White House on Nov. 27 said that in their talks the King and the President had "reaffirmed the close ties and high mutual respect between the Governments and peoples of Morocco and the United States," and had "reasserted their firm attachment to the principles of the U.N. Charter and their determination to co-operate in advancing the objectives of that vital instrument for peace."

The statement said that Mr. Dulles had assured King Mohammed of the U.S. Government's readiness to assist in Morocco's efforts to stabilize and expand her economy, and that the U.S.A. would continue to undertake jointly agreed programmes of economic and technical assistance in Morocco. The two Governments had also confirmed their desire to pursue the negotiations on the U.S. bases in Morocco which had been in progress since May 1957, and, pending the conclusion of an agreement, "to proceed, by means of a provisional solution, to the appropriate adjustments of present conditions" regarding the U.S. forces in Morocco.

During discussions on the Algerian problem the King had "expressed the wish that a peaceful solution shall come about through friendly negotiations and on the basis of the rights of peoples for self-determination." Mr. Dulles had assured him that the U.S. Government favoured "a peaceful, democratic, and just solution to the problem."

After leaving Washington on Nov. 28 the King made a tour of the U.S.A., concluding with a five-day stay in New York, during which he visited U.N. headquarters and addressed the General Assembly. He left for Rabat on Dec. 13.

B. WESTERN POWERS.—Fixing of 1958 Quotas for Exports of Non-Strategic Goods of Military Value to Communist Countries.

"Cocom," the Committee of the Consultative Group in Paris dealing with exports by its member-States to countries of the Soviet bloc and Communist China, decided on Nov. 25, 1957, to abolish the fixing of separate export quotas in respect of goods on List 2 (i.e. non-strategic goods that might nevertheless be of military value) to be supplied to Communist China. Accordingly, exports of such goods to China were co-ordinated, as from Jan. 1, 1958, with the general quotas fixed for trade with the Soviet-bloc countries. This decision implemented the announcements made in May and June 1957 by Britain and all the other member-countries of "Chincom" (the former China Trade Committee), except the U.S.A., to the effect that they would abolish the then existing differential between permitted trade with Communist China and such trade with the U.S.S.R. and other Soviet-bloc countries. The U.S.A., while abstaining from voting, did not oppose the decision taken by "Cocom."

It was announced in Paris on Dec. 16 that the various export quotas had now been fixed by "Cocom" for 1958 in respect of each member-country, covering all the quantitatively restricted goods, without any further distinction between China and the other Communist countries affected. The announcement added that all members of the Committee had been "completely satisfied" with its decisions.

"Cocom" consists of 14 of the 15 NATO countries (the exception being Iceland) and Japan.—(Le Monde, Paris)
(Prev. rep. 15607 A.)

C. UNITED KINGDOM. — Compromise Settlement of Dispute over Bernard Shaw's Will.

The Court of Appeal sanctioned on Dec. 19 a compromise settlement which had been reached between the residuary legatees under George Bernard Shaw's will (the British Museum, the Royal Academy of Dramatic Art, and the National Gallery of Ireland) and the Public Trustee, under which £8,300 would be set aside for carrying out the proposals for alphabetical reform contained in the will. The residue of the estate, which was originally valued at £716,000 (with estate duty at the rate of 70 per cent), would be released for use by the legatees.

The Public Trustee (Mr. R. P. Baulkwill) stated that a prize of £500 would be offered for the design of a new British alphabet of at least 40 letters, including 16 vowels; the remainder of the money would be devoted, in accordance with Mr. Shaw's wishes, to statistical inquiries into the economies to be effected by the new system, and to the publication of *Androcles and the Lion* with the present alphabet and the new alphabet side by side. Mr. Baulkwill will be assisted by an expert committee consisting of Mr. I. J. Pitman, M.P. for Bath, Mr. Peter MacCarthy, of the phonetics department of Leeds University, and Mr. Alan Dodson, chief typographer at the Stationery Office.—(Times) **(Prev. rep. 15530 C.)**

D. MEXICO. — Claim to British Honduras.

The Mexican Foreign Ministry issued a document on Dec. 11 setting out Mexico's claim to part of British Honduras. The document—which was made public after recent reports that Guatemala was trying to induce British Honduras to break with Britain and unite with Guatemala—reviewed the early history of the area and stated that an Anglo-Spanish treaty of 1783 had "made clear that sovereignty over Belize belonged to Spain." It was claimed that after Mexico had achieved her independence "our country substituted for Spain in the rights and obligations in Belize." No plans were announced to bring Mexico's claim before any international body, but it was stated that the Mexican claim would be pressed if there were any alteration in the present status of British Honduras.
(Times) **(Prev. rep. 15898 A.)**

E. TANGANYIKA. — New Governor.

Mr. Richard Turnbull, Chief Secretary of Kenya, was appointed Governor of Tanganyika on Jan. 8 in succession to Sir Edward Twining, whose term of office expires in June 1958. Mr. Turnbull (48) has served in Kenya for 22 years mostly in the Northern Province, where he became a provincial commissioner in 1948. He was Minister for Defence at the height of the Mau Mau emergency and in that capacity planned "Operation Anvil," a drive against terrorists in Nairobi which proved the turning-point of the campaign. The award of the K.C.M.G. to Mr. Turnbull was announced simultaneously with his appointment to the governorship of Tanganyika.

A. UNITED KINGDOM. — National Health Service. - Ministers' Veto on Pay Increases for Clerical and Administrative Staff. - Unions' Ban on Overtime. - Report on Clerical Staff Grading Structure in Hospital Service.

A dispute broke out early in November between the Government and clerical and administrative staff in the National Health Service, resulting in the imposition by the principal trade unions concerned of a ban on overtime working by members involved. The dispute followed a refusal by the Minister of Health (Mr. Derek Walker-Smith) and the Secretary of State for Scotland (Mr. J. S. Maclay) to approve a pay increase of three per cent for lower-paid staff in these grades, as previously agreed to by the appropriate Whitley Council. The proposed increase had been intended as an interim measure pending the drawing-up of a new grading structure for clerical and administrative staff in the N.H.S. A report on this subject by Sir Noel Hall (Principal of the Administrative Staff College, Henley-on-Thames) was nearing completion at the beginning of the dispute and was published during its course [see below].

The staff side of the Whitley Council concerned had originally asked for salary increases of five per cent for N.H.S. clerical and administrative workers earning less than £1,200 a year, and of eight per cent for those earning over £1,200—these latter having been excluded from a three per cent increase awarded to lower-paid workers in December 1956. These demands had been rejected by the management side, but eventually both sides agreed on increases of three and five per cent respectively.

Mr. Walker-Smith, however, wrote on Nov. 1 to the Whitley Council explaining that both Mr. Maclay and he had "felt it our duty to consider the increases in the context of the Government's general policy with regard to the economic situation," and, in particular, of its determination "to check the inflationary spiral of wages and prices." In view of the increases already granted in December 1956 to those earning less than £1,200 a year, they had "felt obliged . . . to withhold approval from that part of the agreement which benefits these workers." They would be prepared, however, to review the question "after an interval of time appropriate in the light of the economic situation and of other relevant considerations."

The Ministers' refusal to approve the increase for lower-paid staff aroused strong protests from the various unions having members in the Health Services, as well as from other trade union and Labour Party leaders.

A spokesman of the National and Local Government Officers' Association (NALGO), to which most of the staff affected belong, described the Ministers' "arbitrary interference with a decision of a properly-constituted Whitley Council" as "a bombshell without precedent in the National Health Service" and "the negation of collective bargaining." On the same day Mr. Bryn Roberts, general secretary of the National Union of Public Employees, declared that the Ministers' "discreditable and reckless action" had "provoked the greatest anger throughout the Health Services," while Mr. J. Richards, general secretary of the Confederation of Health Service Employees, gave a warning that Health Service staffs were "being driven to take direct action."

Mr. Gaitskell on Nov. 2 described the rejection of a Whitley Council award as "a serious matter which is bound to raise doubts amongst trade unionists and employers whether it is worth while to refer disputes to arbitration at all." Mr. Morgan Phillips (secretary of the Labour Party) declared that the Government had "made open war on the trade unions" by "deliberately refusing to operate properly agreed wage awards."

Mr. Walker-Smith, however, denied on Nov. 1 that the withholding of ministerial approval of the increase constituted "extraordinary intervention." He made a further statement in the House of Commons on Nov. 6, in the course of the Debate on the Address.

"These agreements," Mr. Walker-Smith said on Nov. 1, "require the express approval of the Minister of Health. Ministry representatives are in a minority on this particular Whitley Council, so the normal principle of collective bargaining does not apply. To have expressly approved a wage claim which we thought it wrong to grant at the present time would have been a betrayal of a Minister's first duty. In this particular case there was a special duty because any increase would have had to come out of the taxpayer's pocket, and to grant it would have meant that the Government was talking against inflation without taking any action to stop it."

In the House on Nov. 6 Mr. Walker-Smith rejected Opposition allegations that he had "struck a blow at collective bargaining" by withholding the wage increase "for the time being." He explained that the machinery for adjusting wage claims by Health Service workers provided for two distinct steps: (1) negotiation by an appropriate body; (2) ministerial consideration with a view to approval or otherwise. In this case the negotiating machinery was the Whitley Council for administrative and clerical staff—one of nine functional councils for negotiating wages and conditions within the National Health Service. Its management side comprised 18 members, of whom 10 represented hospital authorities and three represented executive councils; there were only five official or departmental representatives of the Minister of Health or the Secretary of State for Scotland.

"Only these five representatives," Mr. Walker-Smith continued, "are concerned with finding the money for any wage increase. Although the hospital boards and executive councils are technically the employers, the wages come directly from the Exchequer . . . It is a clear exception to the rule that he who pays the piper calls the tune. In this case, however, the statutory regulations ensure that the payer of the piper has his say at a later stage . . . The second stage is ministerial consideration. In this case the 'soft option' of doing nothing is not available. Ministers must either grant approval or withhold it. They can, however, take the course we took in this case, which was to withhold approval in present circumstances with the undertaking to review it at the appropriate time."

After explaining that the five per cent increase for higher-paid staff had been approved because these employees were "more out of line with the general level of remuneration and had been so for a longer period," Mr. Walker-Smith stressed that the official representatives on the Whitley Council had never agreed to the proposed increases for lower-paid staff. "They opposed the offer," he concluded, "on precisely the same grounds—those of the general economic context—as those on which I found it necessary to withhold approval for the time being. The unofficial majority on the management side were left in no doubt that approval might well have to be withheld by the Ministers concerned."

Although a deputation from the management and staff sides of the Whitley Council which had agreed on the increases appealed to the Minister of Health on Nov. 11 to reverse his decision, Mr. Walker-Smith refused to do so, whereupon an emergency committee of NALGO decided on the same day to instruct the association's members in the Health Services to cease working overtime from Nov. 18. The National Union of Public Employees also instructed its 2,000 members in hospitals to join the ban.

It was explained that NALGO was anxious to limit its protest measures in such a way as to cause the greatest embarrassment to the Ministry of Health and the least embarrassment to members' immediate employers—the hospital boards and executive councils, with which the association had no quarrel. Staff would therefore be expected to arrange their work so that everything affecting patients directly would have their first attention, and the consequences of the overtime ban would fall mainly on routine statistical returns, official reports and paper-work in general. Working hours would be limited to 38 a week, and members forced by their duties to work extra time on any one day would be expected to work correspondingly short time on the next. One-half of any pay lost through refusal to work overtime would be made up by the Association.

[It was stated in the Press that about 50 per cent of hospital staffs normally worked up to four hours' overtime daily. The NALGO executive estimated that the overtime ban might cost the Association a maximum of £10,000 a week.]

The proposed overtime ban was endorsed on Nov. 17 by a NALGO delegate conference representing about 200 N.H.S. branches of the Association, and began at midnight on that date as arranged.

Several organizations—notably the National Federation of Hospital Officers and the Association of Officers of Executive Councils and Pricing Bureaux—opposed the ban, mainly on the grounds that hospital efficiency would be impaired and patients would suffer. The NALGO executive claimed on Nov. 18, however, that it would be observed by about 30,000 of the 40,000 Health Service employees concerned. On Dec. 4 the executive of the Confederation of Health Service Employees, which had not supported the ban pending the result of a members' ballot, announced that this ballot had shown a majority in favour, and that it would therefore call on all its members in clerical and administrative grades to ban overtime work. The executive also announced that it would ask the T.U.C. to call a conference of affiliated unions with members in the N.H.S. in order to consider stronger action in protest at the Ministers' veto.

Mr. Macmillan, on Nov. 19, informed the T.U.C. (whose economic committee had sent him a letter protesting against the Ministers' veto) that he did not propose to interfere in the dispute. On Nov. 22, however, the Prime Minister promised the Clerical and Administrative Whitley Council (which had asked him to see a deputation of N.H.S. employees) that he would consider doing so after the deputation had first re-discussed the matter with the Minister of Health. Representatives of N.H.S. employees (led by Mr. Ben Smith, chairman of the staff side of the Whitley Council) accordingly saw Mr. Walker-Smith and Mr. Maclay on Dec. 4. The meeting proved abortive, however, whereupon the deputation announced that it had asked the Prime Minister to receive it. A meeting accordingly took place at 10, Downing Street on Dec. 23 between Mr. Macmillan, Mr. Walker-Smith, and the Joint Parliamentary Under-Secretary for Scotland (Mr. J. Nixon-Browne) on the one hand and representatives of NALGO and other unions concerned on the other. This, too, proved abortive, a subsequent official statement saying that Mr. Macmillan had "explained why, in the light of the current economic situation, the decision not to grant the 3 per cent pay increase had been taken," and had stressed that the decision "could not be reversed at the present time."

Sir Noel Hall's report on the grading structure of administrative and clerical staff in the Hospital Service (see above) was published on Nov. 25.

It pointed out that the Hospital Service was at present unattractive to the better-qualified school-leavers, since it was impossible to recruit girls or boys with G.E.C. or similar qualifications. It expressed the view, however, that a "modest improvement" in pay and conditions should secure an adequate number of suitable recruits and enable a proper balance in the senior ranks to be maintained.

In order to remedy present staff shortages in the categories concerned while, at the same time balancing national requirements with the "multi-unit responsibility characteristic of the Service," Sir Noel recommended (*a*) a new and simplified staff grading system; (*b*) the gradual transfer of responsibility for grading to regional hospital boards, with an appeals panel; (*c*) the abolition of direct control by the Minister of Health or by regional hospital boards over senior appointments, and the setting-up of a register of officers and an information and advisory service, which should also advise on training schemes.

Although Sir Noel Hall made no suggestion about levels of remuneration (on which he had not been asked to advise), both sides of the Whitley Council considered that his recommendations on the introduction of a new staff grading system would involve substantial increases in pay.

Representatives of N.H.S. clerical and administrative workers decided on Jan. 2, 1958 to lift the overtime ban from Jan. 6 and to submit a new claim for an increase of 5 per cent in the salaries of employees receiving less than £1,200 a year.

A. ITALY - UNITED KINGDOM. — Ten-Year Atomic Co-operation Agreement.

An Anglo-Italian agreement for co-operation in the peaceful uses of atomic energy was signed in Rome on Dec. 20 by Signor Pella, the Italian Deputy Premier and Foreign Minister, and Sir Ashley Clarke, the British Ambassador.

Under the agreement (which was concluded for 10 years) the U.K. Atomic Energy Authority and the Italian Government undertook to exchange non-classified atomic information. The Authority also undertook to carry out the following services for the Italian Government:

(1) Sale, or assistance in purchase, from U.K. sources of atomic fuel for research and the operation of power reactors in Italy. [The quantities of uranium to be supplied were not specified in the agreement, which only laid down the general framework.]

(2) Assistance in the supply of research and power reactors from Britain.

(3) Processing of used atomic fuel.

(4) Help in the design, construction, and operation of facilities for the manufacture of atomic fuel and the processing of used fuel in Italy.

(5) Provision of training facilities in atomic matters for Italian students and trainees recommended by the Italian Government.

The agreement listed a number of safeguards and controls to ensure that the nuclear material and equipment supplied to Italy would be used only for peaceful purposes, thereby implementing the obligations which both countries had undertaken as members of the International Atomic Energy Agency.

Under Article 2 of the agreement both sides will review the convention after the coming into force of the Euratom Treaty (see 15927 A). It was provided that the facilities granted to Italy might be transferred to Euratom if specific British consent was given.

The agreement was the first comprehensive convention of its kind between Britain and a foreign country. Partial agreements between Britain and France, Belgium, Sweden, Western Germany, and Denmark for co-operation in the peaceful uses of atomic energy are already in existence, but these concern only scientific research or the exchange of non-classified information. In the case of Belgium, the agreement deals also with assistance in establishing a power reactor. The Anlgo-Italian agreement was complementary to the contract which will be concluded between *AGIP Nucleare* and the Nuclear Power Station Company for the installation of a British-built atomic power station in Northern Italy.
(Times - Corriere della Sera, Milan) **(Prev. rep. 15887 C.)**

B. UNITED STATES. — The Baltimore Tunnel.

The Baltimore road tunnel, built in 2½ years at a cost of $180,000,000 (about £46,000,000), was opened to traffic on Nov. 30, 1957. Running under Baltimore harbour, it removes a notorious road "bottleneck" between New York and Washington and enables motorists to by-pass Baltimore in 12 minutes. Previously it took motorists an hour or more to pass through the city at the rush-hour peak. The twin-tube tunnel, 7,650 feet long, is served by 16 miles of limited-entry approach roads.—(New York Herald Tribune)

C. SOVIET UNION. — The "Sputniks."

The Soviet earth satellite launched on Oct. 4 (*Sputnik I*) disintegrated during the first few days of January. Russian, British and American astronomers had all previously declared that the earth satellite would burn out at the end of December or the beginning of January, and Professor Lovell (head of the Jodrell Bank station) expressed the opinion on Jan. 2 that disintegration had already occurred. A similar opinion was expressed by the American astronomer, Dr. Whipple. It was stated in *Soviet Aviation* (Jan. 11) that *Sputnik I* had disintegrated on Jan. 4 after completing 1,367 circuits of the earth and travelling about 43,000,000 miles—equivalent to the distance between Earth and Mars. It was added that study of *Sputnik I* had yielded "unique data of enormous interest for science, the complete analysis of which will take a long time."

The Tass Agency had predicted on Dec. 30 that *Sputnik I* would cease to exist "during the first days of January." It was stated that the maximum height of its orbit had been reduced to about 198 miles, compared with nearly 600 miles at the time of launching, and that it was circling the earth every 90 minutes as compared with the original period of 96.2 minutes.

The carrier rocket of *Sputnik I* burned out and fell on the earth on Dec. 1—on its 879th orbit, according to Professor Lovell and other eminent astronomers who had kept it under close observation. Professor Lovell expressed the opinion that it had "probably burned up entirely in the earth's atmosphere," though pieces of the rocket might have fallen in the Pacific Ocean. On Dec. 6, however, M. Khrushchev said that Soviet scientists were "sure" that the rocket had fallen in Alaska on Dec. 1, adding that "we shall ask them [the Americans] to return it." Asked by Western press correspondents whether he were joking, M. Khrushchev said he was "absolutely serious." Speaking later in the day at a Finnish Embassy reception in Moscow, M. Khrushchev said that "if an American *sputnik* were to fall on Russian territory we would return it."

On the following day (Dec. 7) the Tass Agency said that Soviet observations of the carrier rocket showed "a particularly intensive loss of height" about midnight on Nov. 30 - Dec. 1, while the rocket was passing over Irkutsk and eastern Siberia in an easterly direction. As it entered the denser layers of the atmosphere it had begun "to burn and destroy itself," and "according to available data the remnants of the carrier rocket fell on the territory of Alaska and the western coast of North America."

Spokesmen of the U.S. State Department and the American "Vanguard" project disclaimed any knowledge of the carrier rocket of *Sputnik I* and said that there was "no evidence whatever" to show that it had fallen in American territory. It was stated in Washington that the U.S. Army and Air Force were checking unsubstantiated reports that the carrier rocket might have fallen in the Fort Greely military reservation area, about 100 miles south-east of Fairbanks in Alaska. [On Dec. 1 a number of people in this area had reported a "flaming object" plunging towards the earth.]

Moscow Radio announced on Nov. 10 that the radio transmitters in the earth satellite launched on Nov. 3 (*Sputnik II*) had stopped working "according to plan." It was stated that "medico-biological observations" had been completed and that valuable data had been obtained "regarding the conditions of life during cosmic flight, the influence of solar radiation in the ultra-short and röntgen regions of the spectrum, radio waves, and data regarding temperature, pressure, and other information," all of which were being "carefully assessed." It was added that *Sputnik II* had completed 103 circuits of the earth as at that date and had travelled about 2,800,000 miles.

The death of "Laika," the dog launched into outer space in *Sputnik II*, was announced on Nov. 15 at a press conference given in Moscow by Professor Blagenravov and other leading Russian scientists. Professor Alexei Petrovski (in charge of the biological aspects of the Soviet earth satellite programme) explained that the oxygen regeneration plant in *Sputnik II* had stopped working at the conclusion of the experiment, and "Laika" had died a painless death from oxygen deficiency.
(Soviet Embassy Press Dept., London - Times - Observer - New York Times) **(Prev. rep. 15835 A; 15791 A.)**

D. FINLAND. — Cabinet Appointment.

It was announced in Helsinki on Dec. 30 that President Kekkonen had appointed M. Erkki Lindfors as Deputy Minister for Social Affairs—a post which had not been filled when the von Fieandt Cabinet was formed in November.
(Finnish Ministry of Foreign Affairs) **(Prev. rep. 15876 A.)**

JANUARY 11—18, 1958

A. EUROPEAN UNIFICATION. — The Economic Community (Common Market) Treaty. - Ratification of Common Market and Euratom Treaties. - Paris Meeting of Foreign Ministers. - Membership of Common Market and Euratom Commissions. - Heads of Other European Six-Nation Institutions.

The principal provisions of the Treaty setting up a European Economic Community (Common Market) are summarized below, in continuation of 15927 A.

The European Economic Community Treaty.

This treaty, which was concluded for an unlimited period, consisted of 248 Articles, 15 annexes, 4 "declarations of intention," and 3 protocols.

In the preamble to the treaty, the six signatory countries declared their intention of establishing "the foundations of an enduring and closer union between European peoples" by gradually removing the economic effects of their political frontiers. A common market and a common external tariff (Customs union) would be established for all goods; common policies would be devised for agriculture, transport, labour mobility, and important sectors of the economy; common institutions would be set up for economic development; and the overseas territories and possessions of member-States would be associated with the new Community for an experimental five-year period. All these measures would have one "essential aim"—the steady improvement in the conditions of life and work of the peoples of the member-countries.

The tasks of the Community were defined in Article 1 of the Treaty as the achievement of a harmonious development of the economy within the whole Community, a continuous and balanced economic expansion, increased economic stability, a more rapid improvement in living-standards, and closer relations between the member-countries.

Institutions.

The institutions of the European Economic Community would be as follows, being partly identical with, and partly designed on similar lines to, those of the European Atomic Energy Community:

The Assembly. This body would consist of 142 members elected by the national Parliaments of the member-countries and comprising 36 members each from France, Italy, and Western Germany, 14 each from Belgium and the Netherlands, and 6 from Luxemburg. The election of these members would initially be determined by the national rules of each member-country, but the Assembly would at a later stage draft proposals providing for the introduction of a uniform electoral procedure in all member-countries.

The European Economic Community would share the Assembly with Euratom and the European Coal and Steel Community—the existing Assembly of the latter organization being superseded by the new Assembly.

The Assembly would meet once a year (in October) to discuss the annual report of the Commission [see below]. It would have power to enforce the resignation of the Commission, such a decision requiring a two-thirds majority of the votes cast as well as an ordinary majority of its total membership.

The Assembly would also discuss the Community budgets and would be empowered to propose amendments. It would have to be consulted on certain proposals of the Commission and the Council of Ministers implementing essential principles of the Treaty; and would be entitled to meet in extraordinary session if a majority of its members so demanded, or at the request of the Commission or of the Council of Ministers.

The Council of Ministers. This body would consist of one representative each from the Governments of the member-countries. It would take decisions in one of three ways: either unanimously, by simple majority, or by a weighted majority, according to the various circumstances laid down in the Treaty.

The unanimity requirement would apply particularly in the early stages of the Community's existence. Decisions requiring a simple or a qualified majority could in most cases be taken only on a proposal made by the Commission, and any such proposal could not be amended by the Council except by unanimous vote. [This provision was aimed at conferring great responsibility upon the Commission and safeguarding the stability of its activities.]

A simple majority would mean the vote of four of the six member-countries. In the case of a qualified majority, France, Italy, and Western Germany would each have four votes, Belgium and the Netherlands two each, and Luxemburg one; such a majority would normally consist of at least 12 votes, but in some cases (e.g. when decisions were taken on matters not arising from a proposal by the Commission) the consent of at least four member-States would also be necessary.

The Commission. This would have nine members jointly appointed by the member-Governments for four-year terms and eligible for reappointment. The members, chosen on the basis of their general capability, would be completely independent and would neither solicit nor accept instructions from their Governments No country could have more than two of its nationals on the Commission.

The Commission would be a collegial body and would take its decisions by simple majority vote. Its main tasks would be to supervise the application of the Treaty, and of measures adopted within its framework; to take part in the shaping of Council and Assembly decisions by making proposals to the Council, which the latter could not amend save by unanimous vote [see above]; to formulate opinions and recommendations on matters within the scope of the Treaty; to take those decisions for which authority had been conferred upon it; and to publish annually a general report on the activities of the Community.

Compared with the High Authority of the European Coal and Steel Community, the Commission would require the approval of the Council of Ministers for a far wider range of decisions. Its other most important powers of decision would relate to subsidies and to the special safeguards embodied in the Treaty.

The different means by which both the Council and the Commission would guide the work of the Community were defined as follows: (*a*) regulations, which would be compulsory and directly applicable in any member-State; (*b*) directives, which would be binding on the recipient State in respect of the result to be achieved, but which would allow it to choose the ways and means; (c) decisions, which would be obligatory on the parties concerned; and (*d*) recommendations and opinions, which would not have binding force.

The Court of Justice. This body—like the Assembly—would be common to the three Communities and would supersede the existing Court of Justice of the European Coal and Steel Community. It would consist of seven members jointly appointed by the member-Governments, holding office for six years and eligible for reappointment. There would also be two Advocates-General.

The functions of the Court would be to safeguard the law in the interpretation and application of the Treaty, to decide on the legality of decisions of the Council of Ministers or the Commission, and to determine violations of the Treaty. Actions might be brought before the Court either by a member-country, or by the Council of Ministers, or by the Commission, or by any person or legal entity affected by a decision of the Community. Actions could be based on the contention that the Council or the Commission were not empowered to take a decision; had violated essential rules of procedure; had violated the Treaty or any rule implementing it; or had abused their discretionary powers (especially with regard to the granting of licences by the Commission and the application of compulsory measures in the sphere of security).

The Economic and Social Committee. This Committee would be common to Euratom and the Economic Community and would consist of representatives of all sections of economic and social life, such as employers' organizations, trade unions, and similar bodies. Its members, appointed for four years by a unanimous decision of the Council of Ministers, would be drawn from the member-countries in the following numbers: France, Italy, and Western Germany, 24 each; Belgium and the Netherlands, 12 each; Luxemburg, 5.

The Committee would assist the Council of Ministers and the Commission in an advisory capacity, and would have to be consulted in those cases specifically laid down in the Treaty.

The seat of the institutions of the Community would be determined by agreement between the member-Governments.

Progressive Implementation of Common Market. - Procedure during Transitional Period.

One of the principal characteristics of the process of creating a Common Market would be its irrevocable character—i.e. once the process had been set in motion, the ultimate aim would have to be achieved. This constituted an important safeguard for the member-countries inasmuch as their sacrifices in adjusting themselves to the new conditions would not be in vain, and would not involve a risk of a complete standstill and a subsequent return to the previous status after a number of years. The change from one stage to the next would thus in principle take place automatically.

The Common Market would be progressively established in three stages within a transitional period of 12 years, which might be extended to 15 years. Within the basic 12-year period there would be three stages, each lasting in principle four years. However, if at the end of the first four years the Council of Ministers and the Commission were not unanimously agreed that the objectives of that stage had been essentially accomplished, the stage would automatically be extended for one year. At the end of the fifth year there would be another one-year extension on the same condition, whilst at the end of the sixth year (when the decision of the Council of Ministers would no longer require unanimity but would be taken by a weighted majority) a further extension could be granted only if a request by a member-State for such an extension was recognized as justified by an *ad hoc* arbitration tribunal of three members appointed by the Council of Ministers. In deciding whether the objectives of the respective stages had been essentially accomplished, and the obligations under the Treaty carried out, no member-country could prevent a unanimous decision by basing its protest on non-compliance with its own obligations.

The second and third stages could either be prolonged or shortened by unanimous decision of the Council of Ministers, subject to the maximum limit of 15 years for the whole transitional period.

Other Principles.

The member-countries would co-ordinate their economic policy to the extent required for achieving the aims of the Treaty. The institutions of the Community would ensure that the internal and external financial stability of the member-countries was not endangered. Any discrimination against nationals or companies of other member-countries would be prohibited, except in the special cases expressly laid down in the Treaty.

The Basis of the Economic Community.

The European Economic Community would be based on a Customs Union covering the whole trade of member-countries and entailing (*a*) a prohibition on imposing import or export duties or similar levies between member-countries; (*b*) the introduction of a common tariff on imports from non-Community countries; (*c*) the abolition of all quantitative import and export restrictions and other similar measures between member-countries. The free exchange of goods within the Community would apply not only to goods produced in the member-countries but also to those which had been imported by a member-country from outside the Community, and on which Customs duties had been paid on entry. The only exception from the application of the common Customs tariff *vis-à-vis* non-Community countries would be in the case of goods landed in a free trade zone where each member-country could apply its own Customs tariff.

Internal Tariffs. Tariff restrictions on trade between member-countries would have to be abolished entirely by the end of the transitional period at the latest. During the transitional period, national tariffs (those in force on Jan. 1, 1957, being taken as the basis for calculation in each case) would be reduced by 10 per cent three times in each of the first two stages, and by the remaining 40 per cent during the third stage. The first reduction would take effect a year after the Treaty came into force, and the next two would follow at intervals of 12 to 18 months.

Only the first tariff reduction, however, would be uniformly applied. Thereafter Governments would have a certain discretion as to the incidence of the cuts on the various types of goods in the light of "their general economic situation and the conditions of the economic sector concerned," provided always (*a*) that the total amount of reductions made up the required percentage of 10 per cent of the total tariff proceeds on imports from the other member-countries in 1956; (*b*) that no single reduction on any article was less than 5 per cent; and (*c*) that where the initial duty was more than 30 per cent, the reduction was at least 10 per cent. To prevent any excessive delay in the tariff reduction for certain goods, member-countries would have to aim at achieving a reduction of at least 25 per cent for each item at the end of the first stage, and of at least 50 per cent at the end of the second stage.

Duties of a financial character on certain imported foodstuffs which constituted important revenue sources (e.g. coffee, tea, condiments) would be treated like other import duties. Member-countries would be permitted, however, to replace them by internal consumption duties provided these would not discriminate between the home-produced product and that imported from another member-country.

All export duties and similar levies on goods destined for other Community countries would be abolished not later than the end of the first stage.

External Tariffs. A common tariff on imports from non-Community countries would be established in full not later than the end of the transitional period. As a general rule, the final tariff for each product would be the arithmetical average of the corresponding national tariffs in force on Jan. 1, 1957. National tariffs which varied initially by no more than 15 per cent from the average tariff would be replaced by the latter within four years; in other cases the gap would be reduced by 30 per cent after four years, by 60 per cent after eight years, and eliminated entirely by the end of the transitional period.

Certain exceptions to these general provisions were permitted: (*a*) on a certain number of commodities, fixed duties would replace the arithmetical average (some of these were laid down specifically in the Treaty, others would be settled by negotiation between the member-countries during the first stage); (*b*) in the case of a wide range of raw materials, the common tariff would not exceed three per cent; (*c*) in the case of a wide range of semi-manufactured goods it would not exceed 10 per cent; (*d*) in the case of a range of inorganic chemical products, it would not exceed 15 per cent; (*e*) in the case of a range of organic chemical products, dyestuffs, and artificial fibres it would not exceed 25 per cent; (*f*) a member-country finding itself in special difficulties could be authorized by the Commission to delay the reduction or increase of certain tariff items for a limited period, but this would only apply to items which represented not more than 5 per cent of the total value of that member-country's imports from non-Community countries.

Member-countries might be permitted by the Community to import at tariff rates below those of the common tariff, or duty free, certain goods up to a fixed quantity in the following cases: (*a*) if the supply of the member-country concerned was traditionally dependent to a considerable extent on imports from non-Community countries, and if production within the Community was insufficient to cover that country's requirements; (*b*) if any change in the sources of supply, or an insufficient supply within the Community, involved serious disadvantage to the manufacturing industries of the member-country concerned; (*c*) if the quantity of imports under this exemption was not so large as to cause the risk of a diversion of economic activities to the member-country concerned [i.e. because of its lower tariffs] to the disadvantage of other member-countries; (*d*) if, in the case of food products, such imports would not result in a serious disturbance of the market.

Rates in the common Customs tariff could be altered or suspended either as a result of negotiations with non-Community countries in return for concessions by those countries, or because the Community considered such action necessary for reasons of its own economic policy. Decisions on this matter would require unanimity in the Council of Ministers. After the end of the transitional period, however, the Council could take decisions by qualified majority if the changes did not exceed 20 per cent of the duty on the tariff item in question, and if they were for a period of no more than six months—which might be prolonged once only.

Quantitative Restrictions. All quantitative restrictions on trade within the Community would be progressively eliminated by a series of quota increases. [This procedure differed from the one applied by the O.E.E.C., which provides for the immediate complete removal of import quotas in respect of a growing range of individual products.]

Thus, one year after the coming into force of the Treaty, the member-States would convert all their existing bilateral import quotas into global quotas in favour of all other member-countries, without any discrimination between them. All these global import quotas would then be increased annually by at least 20 per cent as regards their overall value, and by at least 10 per cent as regards each individual product; bigger increases would be made in the case of quotas amounting initially to less than three per cent of the domestic output of a given product. While Governments would have a certain amount of discretion as to the incidence and timing of quota increases, they would nevertheless be required to work towards the ultimate objective—viz. that by the end of the tenth year each individual quota should be equivalent to at least 20 per cent of the national production of the article concerned.

Special provisions would regulate the position of those member-countries which had already introduced high global import quotas on the coming into force of the Treaty, or which had gone beyond the obligations assumed within the O.E.E.C. as regards the liberalization of imports. If the Commission found that the imports of a certain commodity into a member-country during two successive years had been below the respective import quota, the quota would be abolished altogether.

Quantitative restrictions on exports would have to be abolished by the end of the first stage at the latest.

Member-countries were nevertheless permitted to impose import, export, or transit restrictions or prohibitions which were justified for reasons of public morality, public order, public security, or on similar grounds, provided there was no arbitrary discrimination or any concealed restriction of trade.

As regards certain State monopolies in the member-countries which might lead to restrictions in inter-Community trade with effects similar to quota restrictions, the Treaty provided that all such monopolies would have to be gradually changed so that at the end of the transitional period any discrimination between nationals of member-countries as regards both purchases and supplies would cease. If a certain product was subject to a commercial State monopoly in one or several member-countries, the Commission could authorize the other member-States to take certain protective measures.

Agriculture. Agricultural products would be included in the Common Market, although a special régime would apply in view of the different social structure of agriculture in the various member-countries, which made it impossible to introduce a completely liberalized market.

Agricultural Policy. A common agricultural policy would be implemented in the course of the transitional period, aiming at increased agricultural productivity, safeguarding an adequate standard of living for the agricultural population, stabilization of agricultural markets, an assurance of adequate supplies, and fair prices for consumers. For this purpose a conference would be convened by the Commission within two years after the coming into force of the Treaty, one of its main tasks being to draw up a balance-sheet of agricultural needs and resources. In the light of the conclusions of this conference the Commission would draw up proposals and submit them to the Council of Ministers, which would take its decisions unanimously during the first two transitional stages and by a qualified majority thereafter.

Agricultural Markets. A Joint Organization of agricultural markets would be created, but, because of the diversity of market conditions for individual products, this development would not take place under prearranged rules but through decisions of the organs of the Community, varying from case to case. The Joint Organization could accordingly be implemented by joint rules for competition, or by the obligatory co-ordination of differing national market rules, or by the introduction of European market rules. Measures which the Joint Organization might take to achieve the aims of a common

agrarian policy might include price-fixing, subsidies, provisions for building up stocks and reserves, joint stabilization measures for imports and exports, and the setting-up of one or several support and guarantee funds for the latter purpose. National market policies would eventually be superseded by the Joint Organization, and by the abolition of all discriminatory measures between producers or consumers within the Community.

Decisions of the Council of Ministers in this sphere, based on proposals by the Commission, would be taken unanimously during the first two transitional stages and by a qualified majority thereafter. However, the latter voting procedure would only apply (*a*) if the proposed Joint Organization offered guarantees for the employment and the living-standards of the producers concerned not inferior to those existing under national market regulations; and (*b*) if the Joint Organization created conditions for inter-Community trade which corresponded to those in the national markets concerned. The organs of the Community would decide how far the Treaty provisions concerning the regulation of competition should apply to agriculture.

National Minimum Prices. To facilitate the development of a common agricultural market, member-countries would be permitted to fix minimum prices for imported agricultural products during the transitional period, provided these prices did not prevent the expansion of trade within the Community. Within four years after the Treaty came into force, the Commission would submit to the Council of Ministers a series of "objective criteria" concerning the fixing of such minimum prices. If the Council were unanimously agreed on these criteria, each country would fix its own minimum prices in the light thereof, but the Council and the Commission would retain certain powers of control to prevent abuses. If actual prices fell below the prescribed levels, the country concerned could temporarily suspend or reduce imports or admit them only at a higher price. At the end of the transitional period all the minimum prices then in force would be listed, and the Council of Ministers would decide by a simple weighted majority about the system to be applied in future under a joint agricultural policy.

Long-term Purchase Agreements. With a view to steadily expanding the volume of trade within the Community, a preferential purchase system would be set up amongst member-States by means of multilateral long-term agreements and contracts which would exclude any discrimination between the producers of the various member-countries concerned. Special provision was made in respect of agricultural production dependent upon the import of certain materials from non-Community countries.

Labour, Settlement, Services, and Capital. The free circulation of labour, services, and capital, as well as the right to settle, work and trade anywhere in the Community, would be fully established by the end of the transitional period.

Labour. As soon as the Treaty came into force, the Council of Ministers would decide by simple majority what measures were necessary to ensure complete mobility of labour within the Community, including (i) the abolition of all discriminatory measures between nationals of member-countries; (ii) the right to apply for jobs anywhere within the six countries, and—on terminating any employment—to stay on in the country concerned under conditions to be fixed by the Commission. Measures to be taken by the Council of Ministers would include provisions (i) for the dissemination of information about available jobs and labour, as well as other procedures to meet supply and demand under conditions which would avoid serious danger to the standard of living and employment in the various areas and industries; (ii) for the removal of administrative difficulties; and (iii) for close collaboration between national labour organizations. The Council of Ministers would also decide (by unanimous vote) on social security arrangements applicable to conditions of full mobility of labour.

Right of Settlement. All restrictions on the right to settle freely in any member-country, or the right of nationals of any member-country to set up agencies, branches, or subsidiary companies in the territory of another, would be gradually removed during the transitional period. The right of settlement would include the right to engage in any economic activity and to establish or manage companies and other enterprises.

Before the end of the first stage of the transitional period the Council of Ministers would, by unanimous decision, work out a general programme to remove from existing restrictions every kind of activity, and to determine the various stages of implementation. All decisions relating to the execution of this general programme, or for the abolition of restrictions on specific activities, would be taken by the Council of Ministers by unanimous vote during the first stage and by a qualified majority thereafter.

The Council would also draw up rules for the mutual recognition of diplomas, certificates, and other qualifications, and for the co-ordination of existing regulations in the member-countries concerning the practice of professions.

Services. All restrictions on the offering of services by insurance companies, banks, finance houses, the wholesale and retail trade, and by members of the professions would be gradually removed within the Community during the transitional period. Before the end of the first stage the Council of Ministers would (subject to unanimous approval) draw up a general programme to implement this principle. Any further Council decisions, either for implementing the general programme or, if none had been drawn up, for abolishing restrictions relating to specific services, would be taken by unanimous vote before the end of the first stage and by a qualified majority thereafter.

Capital. Existing restrictions on the movement of capital between the Community countries would be progressively removed. As far as was necessary for the proper working of the Common Market, restrictions on current payments relating to the movement of capital (e.g. interest, dividends, rents, premiums) would be completely abolished not later than the end of the first stage of the transitional period. Decisions of the Council of Ministers on the abolition of capital movement restrictions would be taken by unanimous vote during the first two stages, and by a qualified majority thereafter.

The only exceptions from the general rule of the eventual free movement of capital within the Community would apply in the following cases: (*a*) loans directly or indirectly intended to finance the Government, public institutions, or organs of local government of one member-country could be issued or sold in another member-country only with that country's consent; (*b*) member-countries, while generally forbidden to introduce any new restrictions concerning capital movements, would be entitled to take protective measures within certain limits if such movements were likely to disturb their economies—the application of these protective measures being, however, supervised by the Commission.

As regards capital movements between member-countries and non-Community States, the Council of Ministers would lay down all the measures required for controlling such movements and the foreign exchange policies connected with them, with the aim of achieving the highest possible degree of liberalization. Council decisions in these matters would require unanimity. In the event of different degrees of liberalization of capital movements and foreign exchange policies between one member-country and another leading to abuses of the regulations then existing, a member-country affected by such abuses could take suitable measures to stop them after consulting with the other member-countries and the Commission. Measures of this kind, however, might be subsequently amended or abolished altogether by decisions of the Council, taken by a qualified majority.

Transport. The Council of Ministers would establish a joint transport policy and common rules for international transport within or through the Community, covering rail, road, and inland water transport. It would also lay down the conditions under which transport undertakings of one member-country would be permitted to operate in another. These decisions would have to be taken unanimously in the first two transitional stages and by a qualified majority thereafter, but unanimity would still be required after the second transitional stage whenever the Council's decisions related to principles of transport policy and might seriously impair the standard of living and employment in certain areas.

The extension of suitable common rules to sea and air transport, and the procedure applying in these cases, would be a matter for the Council to decide, such decisions requiring unanimity.

All freight rates which discriminated as to the national origin or destination of the goods transported would be suppressed by the end of the second stage of the transitional period, whilst all special rates or privileges granted by a member-country for the purpose of helping or protecting specific undertakings or industries would have to be ended at the beginning of the second stage, unless specially authorized by the Commission. Within two years after the coming into force of the Treaty, and after hearing the views of the Economic and Social Committee, the Council would, by a qualified majority, issue general regulations under which the Commission would take the necessary individual decisions after hearing the views of all the member-countries concerned.

In taking its decisions, the Commission would take into account not only the requirements of an adequate location of industry but also the needs of less developed areas; the problems of areas which had suffered greatly through political conditions; and the effects of the various rates and tariffs on the competitive position between various kinds of transport. Western Germany was authorized, notwithstanding the provisions of the Treaty, to take any measures required to compensate the areas affected for economic disadvantages arising from the political division of Germany.

A consultative committee of experts appointed by member-Governments would be set up to advise the Commission on all transport questions.

The Policy of the Community.

To ensure free and equal competition within the Community, common rules and policies would be introduced in the member-countries as summarized below.

Common Rules.

Cartels and Monopolies. Any agreement or association preventing, restraining, or distorting competition within the Community would be forbidden—e.g. agreements or associations directly or indirectly fixing prices; regulating or controlling production, investment, or technical development; sharing markets; requiring the acceptance of additional goods besides those needed by the customer; or providing for discriminatory conditions of supply. Exceptions would only be permissible if such agreements contributed to production, distribution, or technical or economic progress, and if (i) an adequate share of the benefits arising therefrom was passed on to the consumer; (ii) the restrictive effect was not greater than was necessary for the purpose; (iii) the agreements would not open the way to monopolistic practices. The abuse by any or a number of enterprises enjoying a dominant position in a given market within the Community would also be forbidden.

During the early period anti-monopoly rules would be enforced nationally on the basis of detailed reports by the Commission to member-Governments. Within three years, however, international rules and directives having the force of law throughout the Community would be issued by the Council of Ministers; these decisions would require a unanimous vote. If no such rules and directives had been issued by the Council within the three-year period, it would be able to make them thereafter by a qualified majority, on a proposal of the Commission and after consulting the Assembly.

Although the member-countries themselves would initially enforce anti-cartel and anti-monopoly regulations, the Commission would have certain supervisory functions immediately after the coming into force of the Treaty. Specifically, the Commission could note violations of anti-cartel or anti-monopoly rules and could authorize a member-country whose interests were affected to take the necessary protective measures.

The above principles would apply not only to private industry but also to public enterprises, as well as to enterprises enjoying special or exclusive rights and privileges. State monopolies of a fiscal character and similar undertakings would, in principle, also come under the Treaty.

Dumping. Dumping practices by any member-country within the Common Market would be prohibited. If, during the transitional period, the Commission found that a member-State had engaged in such practices, it would make "suitable recommendations" to the country concerned with a view to ending them. If the country concerned nevertheless continued such practices, the Commission might authorize the other member-country or countries affected to take the necessary protective measures, details of which would be laid down by the Commission.

State Subsidies. Unless otherwise provided by the Treaty, State subsidies (of whatever kind) which distorted or threatened to distort competition would be prohibited. Nevertheless, certain subsidies would be permissible, notably subsidies of a social character; relief after natural catastrophes; subsidies given to certain areas in Western Germany as compensation for the economic disadvantages caused by the division of Germany; special aid for under-developed areas or for projects of common European importance; and aid for the development of certain branches of the economy, provided it did not affect trade conditions in a manner detrimental to the common interest. The Council, taking its decisions by a qualified majority on proposals of the Commission, might also determine other kinds of subsidies which could be regarded as compatible with the Common Market.

On the entry into force of the Treaty, the Commission would examine all existing subsidies falling under this provision, in co-operation with the member-countries. If it found that they were incompatible with the principles laid down in the Treaty, or were abused, it could order their abolition or amendment. If the country concerned did not carry out the Commission's decision within the stipulated period, the Commission itself or any other member-country affected could immediately appeal to the Court of Justice.

All member-countries would be obliged to inform the Commission in advance of any proposed introduction or amendment of such subsidies; if the Commission considered these measures impermissible it would apply the above-mentioned procedure.

Fiscal Policy. While the fiscal autonomy of member-countries would in principle not be affected, certain restrictions essential for the working of the Common Market were laid down in the Treaty. These prohibited any discrimination by means of fiscal policy, as well as concealed subsidies for exports to other member-countries.

Adjustment of National Legislation. By unanimous vote, the Council of Ministers could issue rules for the co-ordination of existing legislation in member-countries which directly affected the setting-up or working of the Common Market.

Economic Policy.

Member-countries would harmonize their general economic, foreign exchange, and foreign trade policies.

General Economic Policy. The general economic policies of member-countries would be regarded as a matter of joint interest, and the countries concerned would consult each other as well as the Commission on the measures which should be taken to meet changing circumstances. Such measures might be laid down by a unanimous vote of the Council of Ministers.

Balance of Payments. Although each member-country would remain autonomous in currency matters and would have sole responsibility for the maintenance of equilibrium in its balance of payments, combined with the maintenance of a high degree of employment and stable prices, all members would co-ordinate their general economic and foreign exchange policies to the extent necessary for the efficient working of the Common Market. This co-ordination would include co-operation between their Economic Ministries and Central Banks. A Monetary Committee would be set up with the task of supervising the exchange and financial positions of member-countries and of making regular reports to the organs of the Community.

Each member-country would conduct its foreign exchange policy in harmony with the common interest. All payments relating to the exchange of goods and services and the movement of capital, as well as the transfer of interest, dividends, rents, wages, salaries, etc., to other member-countries, would be permitted as far as such transactions were liberalized under the Treaty. While the European Payments Union would be used for the time being as a multilateral clearing-house for such payments and transfers, member-countries would consult each other on an alternative payments mechanism if the E.P.U. came to an end—unless by that time all their currencies had become freely convertible. Restrictions on other "invisible" transactions outside the above-mentioned categories would be gradually removed.

If a member-State were threatened with serious balance-of-payments difficulties the Commission would be required to conduct an inquiry without delay. It could then propose to the Council of Ministers measures whereby the rest of the Community might help the member-State concerned, such "mutual help" including the provision of limited credits by the other member-countries. If the latter refused to give such aid, however, the organs of the Community would permit certain protective measures in favour of the country affected. Member-countries would nevertheless be able to take the necessary protective measures on their own initiative, and without waiting for the Commission's decision, if they were threatened by a sudden balance-of-payments crisis; in such eventualities the Council might, however, subsequently demand (by a qualified majority decision) that the country concerned should amend, suspend, or abolish the measures in question.

A special protocol annexed to the Treaty dealt with French export subsidies and special import duties [see below].

External Trade Policy. A common external trade policy would be established by the end of the transitional period; pending this, member-countries would be required to co-ordinate their trade relations with non-Community countries. The Commission would work out proposals for the procedure to be applied during the transitional period with a view to the eventual unification of external trade policies, and would submit these proposals to the Council of Ministers for the latter's approval; the Council's decisions would be taken by a unanimous vote during the first two transitional stages and by a qualified majority thereafter. In harmonizing their trade policies during the transitional period, member-countries would endeavour to unify their liberalization lists *vis-à-vis* non-Community countries at the highest possible level, on the basis of recommendations by the Commission. As an important aspect of this process of co-ordination, the export subsidy policies of the member-States would be harmonized before the end of the second transitional period.

The common external trade policy after the end of the transitional period would cover the application of a common Customs tariff; the joint conclusion of trade and Customs agreements; the unification of trade liberalization measures; the working-out of common export policies; and the joint application of protective measures, e.g. against dumping or subsidies by non-Community countries. The Council of Ministers would take the necessary decisions by a qualified majority on proposals by the Commission.

In future trade and Customs negotiations with non-Community countries it would be the task of the Commission to initiate discussions with the consent of the Council of Ministers, and to conduct negotiations on the basis of any instructions issued by the Council. During the negotiations the Commission would be in continuous consultation with a special committee appointed by the Council for this purpose; any agreements reached would need confirmation by the Council, which would be the organ for officially concluding agreements on behalf of the Community. The Council's decisions would be taken unanimously during the first two transitional stages, and by a qualified majority thereafter. The above-mentioned procedure would apply to all Customs negotiations from the coming into force of the Treaty, and to all trade negotiations from the end of the transitional period.

During the transitional period member-countries would consult each other in all matters relating to international economic organizations, with a view to harmonizing their actions, and would pursue a common policy as far as possible. Thereafter they would act in agreement throughout.

In formulating their joint trade policy, member-countries would take into account the favourable results which the abolition of Customs duties within the Community were expected to produce in increasing the competitive power of their industries.

Social Policy. - Creation of European Social Fund.

General Provisions. The Commission would promote the co-ordination of the social policies of member-countries, with particular reference to employment, labour legislation, conditions of work, vocational training, social security, prevention of industrial accidents and occupational diseases, health protection, trade union rights, and collective bargaining between employers and employed. The Commission would carry out this task by means of inquiries, recommendations, and consultations, and would deal with both internal problems and questions raised by international organizations. Before making any recommendations, the Commission would hear the Economic and Social Committee. The Commission would also report on social developments within the Community in its annual report to the Assembly. The latter body might request the Commission to make reports on special problems of a social nature.

Wages and Social Insurance Contributions. The principle of equal pay for equal work would be generally applied during the first transitional stage. A special protocol annexed to the Treaty dealt with social security contributions in France.

European Social Fund. A European Social Fund would be established to facilitate employment and the mobility of labour within the Community. This Fund would refund to any member-country 50 per cent of the cost incurred by that country, or its

public bodies, for the following purposes : (*a*) re-training workers who had become unemployed as a result of the Common Market for another occupation, provided they had worked at least six months in their new jobs ; (*b*) moving workers who had been compelled to change their residence [as a result of the setting-up of the Common Market] to other localities, provided they had been employed at their new places of residence for at least six months ; (*c*) special subsidies paid to workers who were temporarily forced to work short time, or who had been temporarily thrown out of work, through changes in production by the undertaking employing them, and which had been paid to enable the workers concerned to maintain their standard of living pending the restoration of their full employment. The 50 per cent refund would be dependent on (i) the workers affected having been fully employed again by the undertaking concerned for at least six months, and (ii) the Government concerned having previously submitted an approved reorganization scheme to the Commission.

The Fund would be administered by the Commission, assisted by a Committee consisting of representatives of member-Governments and trade unions. The Fund's budget would be part of the Community's general budget, and would be prepared by the Commission and approved by the Council of Ministers. All regulations for the working of the European Social Fund, and for laying down in detail the terms on which it would aid member-countries, would be issued by the Council of Ministers (deciding by a qualified majority) on proposals of the Commission, and after consulting the Economic and Social Committee and the Assembly. The Council of Ministers would also lay down general principles for a joint policy in vocational training, designed to contribute to a harmonious economic development both in the individual member-countries and in the Common Market as a whole.

The European Investment Bank.

A European Investment Bank would be set up as an independent legal entity, its members consisting of the countries signatory to the Treaty. The Bank would promote a common investment policy within the Community and would, on a non-profit basis, grant loans or guarantees for (i) projects in under-developed regions ; (ii) the modernization, reorganization, or extension of industries which were difficult to finance on a purely national basis ; and (iii) new industries of joint interest to several member-countries which, because of their size or special character, would be difficult to finance by a single member-country.

The Bank's capital would be 1,000,000,000 E.P.U. units ($1,000,000,000), of which France and Western Germany would each contribute $300,000,000, Italy $240,000,000, Belgium $86,500,000, the Netherlands $71,500,000, and Luxemburg $2,000,000. Member-countries would be required to pay in 25 per cent of their capital shares, in five equal instalments, within 2½ years after the Treaty entered into force ; of each payment, 25 per cent would be in gold and the remainder in the national currency.

The Bank could also borrow in the capital market, but if this were not possible on reasonable terms it could request member-countries to grant it special loans for financing specified projects. Such requests could only be made, at the earliest, four years after the Treaty came into force, and the loans might not exceed a total of $400,000,000, or $100,000,000 borrowed in any one year. They would bear 4 per cent interest per annum unless the Board of Governors fixed another rate.

The Bank—the statutes of which were annexed to the Treaty—would have (*a*) a Board of Governors, consisting of the members of the Council of Ministers ; (*b*) a Board of Directors, comprising 12 members and 12 alternate members who would be appointed by the Board of Governors for five years. The Board of Directors would be independent of the member-Governments and would comprise three members and three alternate members nominated by France, three each by Germany, three each by Italy, two each by the Benelux countries jointly, and one each by the Commission. There would also be a Steering Committee consisting of a chairman and two vice-chairmen, appointed by the Board of Governors on the recommendation of the Board of Directors.

Association of Overseas Territories with Common Market. - Special Development Fund for Overseas Territories.

The overseas territories of Belgium, France, Italy, and the Netherlands would be associated with the Community. A special convention annexed to the Treaty laid down the details of this association for the initial five-year period.

Territories. The territories concerned were : *France*—French West Africa (including Senegal, French Sudan, French Guinea, the Ivory Coast, Dahomey, Mauretania, the Niger, and Upper Volta) ; French Equatorial Africa (including Chad, Gaboon, the Middle Congo, and Ubangi-Shari) ; St. Pierre and Miquelon ; the Comoro Islands ; Madagascar ; French Somaliland ; New Caledonia ; the French Settlements in Oceania ; the Republic of (French) Togoland ; and the Trust territory of the French Cameroons ; *Belgium*—Belgian Congo and the Trust territory of Ruanda-Urundi ; *Italy*—the Trust territory of Italian Somaliland ; *Netherlands*—Dutch New Guinea.

Principles of Association. The products of the overseas territories would enter the Community on equal terms with those of the member-States, and each territory would extend to all the other member-countries any concessions applying to the country with which it was specially connected. Whilst Customs duties between the overseas territories and member-countries would, in general, be gradually removed under the five-year convention, and quantitative import restrictions progressively abolished, the overseas territories would nevertheless be allowed to continue to impose Customs duties required for the development of their industries and the financing of their public expenditure. Such duties, however, would be progressively reduced *vis-à-vis* other member-countries to the same level applicable to goods imported by the territory concerned from the member-country with which it was specially connected—thus abolishing any discrimination against the other member-countries.

As regards existing individual import quotas of the overseas territories, these would be converted into global quotas for the benefit of all those member-countries (and their overseas territories) with whom the territory in question was not specially connected. [Thus, in a French overseas territory there would be a global import quota for imports from, e.g., Belgium, Germany, Italy, and the Netherlands, in place of previously existing individual import quotas from each of these countries.]

Overseas Development Fund. The five-year convention provided for the setting-up of a special Development Fund for the overseas territories, with a total of 581,250,000 E.P.U. units ($581,250,000). Of this sum, France and Western Germany would each contribute $200,000,000, Belgium and the Netherlands each $70,000,000, Italy $40,000,000, and Luxemburg $1,250,000. The Fund would be allocated to the overseas territories of the four member-countries concerned as follows : France $511,250,000 ; Netherlands $35,000,000 ; Belgium $30,000,000 ; and Italy $5,000,000.

Details of the contributions and allocations for each of the five years were agreed as follows :

Contributions.

Years	First	Second	Third	Fourth	Fifth
Percentage ..	10 %	12.5 %	16.5 %	22.5 %	38.5 %
Countries		in million dollars (E.P.U. units)			
Belgium ..	7	8.75	11.55	15.75	26.95
W. Germany	20	25	33	45	77
France .	20	25	33	45	77
Italy ..	4	5	6.60	9	15.40
Luxemburg	0.125	0.15625	0.20625	0.28125	0.48125
Netherlands	7	8.75	11.55	15.75	26.95

Allocations.

Years	First	Second	Third	Fourth	Fifth
Percentage	10 %	12.5 %	16.5 %	22.5 %	38.5 %
Overseas Territories of :		in million dollars (E.P.U. units)			
Belgium ..	3	3.75	4.95	6.75	11.55
France ..	51.125	63.906	84.356	115.031	196.832
Italy ..	0.5	0.625	0.825	1.125	1.925
Netherlands	3.5	4.375	5.775	7.875	13.475

Applications for the financing of projects out of the Development Fund would be made by the responsible authorities of the member-countries and overseas territories concerned. The Commission would then draw up annually the general programme of proposed investments on which the Council of Ministers (by a qualified majority vote) would make the final decisions, on the principle of a rational geographical distribution of the projects to be financed. These projects would comprise, in particular, hospitals, technical training and research institutions, institutions to increase employment, and investment projects connected with productive development.

Within six months after the Treaty came into force, the Council (by a qualified majority vote) would also lay down the procedure for calling in contributions and paying out allocations, and for administering the Fund.

The qualified majority in this case would be one of 67 votes, "weighted" as follows : France and Western Germany 33 each, Belgium, Italy, and the Netherlands 11 each, and Luxemburg one vote.

Participation in Overseas Projects. The measures to expand the volume of trade between the member-countries and the overseas territories in question would be accompanied by decisions facilitating the settlement of nationals of all member-countries in the overseas territories, as well as the participation of enterprises of all member-countries in projects to be financed by the Development Fund.

Conventions for Subsequent Periods. Before the end of the initial five-year period the Council of Ministers would lay down rules for the next period on the basis of the results achieved, the Council's decision requiring a unanimous vote. It was, however, laid down that in any case Customs tariffs would continue to be reduced in accordance with the general principles, and that the introduction of a common tariff applying both to the member-countries and to their overseas territories would be proceeded with. [Certain exceptions were permitted in respect of commodities the import of which was of special importance to the member-country concerned.]

Mobility of Labour. Subsequent conventions (requiring unanimous acceptance by all the member-countries) would regulate the mobility of labour between the member-countries and the overseas territories, and *vice versa*.

Association of Other Countries. It was provided that member-countries might offer participation in the Community to certain independent countries such as Morocco, Tunisia, and Libya, and to the autonomous territories of the Netherlands Antilles and Surinam.

General Finance.

The member-States would contribute to the Community budget in the following proportions : France, Italy, and Western Germany, each 28 per cent ; Belgium and the Netherlands, each 7.9 per cent ; Luxemburg 0.2 per cent.

The budget would be prepared by the Commission, which would also investigate the possibility of replacing the contributions of member-countries by independent resources, notably receipts from the common tariff. The budget would be submitted for approval first to the Council of Ministers and thereafter to the Assembly. In the case of any modifications proposed by the Assembly, the Council of Ministers, in consultation with the Commission, would make the final decision.

General Provisions and Safeguards.

Safeguarding Clauses. With the consent of the Commission, member-countries would be able during a limited period to deviate from the provisions of the Treaty in order to meet special difficulties which might be caused to some of their industries during the gradual introduction of the Common Market. A member-country which was in serious and persistent difficulties would be entitled during the transitional period to take special steps to safeguard its economy or the economy of certain areas; in such a case the Commission would decide without delay about the measures which it considered necessary, and would at the same time lay down the conditions of their implementation.

Member-States would also be allowed to take special measures for the protection of their interests in the sphere of defence or in the event of war.

Membership and Association. The Treaty would apply to Algeria and the French Overseas Departments under special conditions.

Any other European country could apply for membership of the Community; the terms of its admission, and any consequential amendments of the Treaty which might become necessary, would be agreed between the original member-countries and the applicant country.

Agreements might also be concluded with another country or group of countries for their association with the Community, based on certain mutual rights and obligations, joint action, and special procedures. Similar agreements of association might be entered into with international organizations.

In a special "declaration of intent" annexed to the Treaty, the member-countries expressed their interest in bringing about an association between the Community and the European Free Trade Area as proposed by the O.E.E.C.

Annexed Protocols.

The following protocols were annexed to the Treaty:

(1) A protocol containing the statutes of the European Investment Bank.

(2) A protocol sanctioning the continuation of trade between Western and Eastern Germany as a German internal matter. It laid down that each member-country would inform both the other members and the Commission of any agreements relating to its trade with Eastern Germany; that member-countries would ensure that the implementation of such agreements were not contrary to the principles of the Common Market; and that they would accordingly take suitable measures to avoid any damage to the economies of the other member-countries. It was also laid down that member-countries would be permitted to take suitable measures to prevent difficulties for themselves arising from the trade of another member-country with Eastern Germany.

(3) A protocol allowing France to maintain for the time being the system of export subsidies and import duties in the franc area. This system would, however, be reviewed annually by the Commission and the Council of Ministers. If the Council found that it worked to the disadvantage of the industries of the other member-countries, it might (by a qualified majority vote) request the French Government to take certain measures; if the French Government failed to carry out this request, the Council might (by the same majority) authorize the other member-countries to take certain protective measures. The Council, by qualified majority vote, could demand the total abolition of the system if the franc area's balance of payments had been in equilibrium for more than a year and if its exchange reserves had reached a satisfactory level.

The protocol also dealt with the situation concerning overtime pay at the end of the first transitional stage. If the level of overtime pay in the other member-countries had by then not reached the average level prevailing in France in 1956, the French Government would be authorized to take certain protective measures to maintain French prices at a competitive level, unless the average rise of the general wage-level in the same branches of industry in the other member-countries exceeded the average rise in the French general wage-level.

(4) A protocol stipulating that the Italian 10-year plan for industrial expansion (the "Vanoni Plan") would be taken into account in the policy of the Community.

(5) A protocol providing for certain protective measures for the agriculture of Luxemburg.

(6) A protocol allowing the continuation of special tariffs for imports by member-countries from certain other countries with which they maintained particularly close political or economic relations—e.g. imports into the Benelux countries from Surinam and the Netherlands Antilles; imports into France from Morocco, Tunisia, and the Indo-Chinese States (Cambodia, Laos, and Vietnam); and imports into Italy from Libya and Italian Somaliland.

(7) A protocol providing that tariffs for imports from the other member-countries into Algeria and the French overseas Departments would be regulated in due course.

(8) A protocol on oil products allowing member-countries to maintain their Customs duties on such products *vis-à-vis* other member-countries for a period of six years.

(9) A protocol confirming that the Netherlands would ratify the Treaty only in respect of its European territory and Dutch New Guinea.

(10) A protocol allowing Western Germany to import certain quantities of bananas below the common Customs tariff.

(11) A protocol containing special provisions for the import of coffee into Italy and the Benelux countries.

(12) A special declaration on Berlin was annexed to the Treaty, reading as follows: "The Governments of Belgium, the German Federal Republic, France, Italy, Luxemburg, and the Netherlands, having regard to the special position of Berlin and the need for the free world to support it, and wishing to reaffirm their association with the population of Berlin, will support within the Community all measures required to ease the economic and social situation of the city, to further its reconstruction, and to secure its economic stability."

(13) Seven lists covering the items for which special maximum levels would be provided in the common Customs tariff [see above] were also annexed to the Treaty, together with a list dealing with agricultural products.

Agreement on Common Institutions.

Among the subsidiary conventions and protocols also signed at Rome on March 25, 1957, was an agreement laying down: (*a*) that there should be one Assembly common to the three European Communities (i.e. the Economic, Atomic Energy, and Coal and Steel Communities) and replacing the Common Assembly of the latter Community; (*b*) that there should be a Common Court of Justice, also replacing the existing institution of the Coal and Steel Community; and (*c*) that the two new Communities should share a single Economic and Social Committee.

Ratification of Common Market and Euratom Treaties by National Parliaments.

The ratification by the various national Parliaments of the treaties setting up the European Economic Community and the European Atomic Community is summarized below, in the sequence in which the ratification process was completed.

Western Germany.

The Bill approving ratification was given a third reading by the *Bundestag* on July 5, 1957; it was estimated (the voting being by show of hands) that about 400 of the 497 deputies present voted in favour. The Bill was supported not only by the parties of the Government coalition but also by the Social Democrats (the major Opposition party), who had previously announced that they would vote for the Bill in spite of certain doubts. The only opposition came from the Free Democrats and the Refugee Party (B.H.E.), who believed that the creation of a "Little Europe" of six countries would prove a fatal obstacle to the creation of a wider European grouping.

In reply to critics of the Bill, Dr. von Brentano (the Federal Foreign Minister) emphasized that the Federal Government would do everything in its power to bring about the earliest possible integration of the Common Market in a broader Free Trade Area. He also stressed that while both treaties applied to overseas dependencies of member-countries, this in no way committed the Federal Republic to the support of "old-style colonialism."

The Bill itself provided that the German instruments of ratification would not be deposited until all the other signatory countries had obtained the approval of their Parliaments. Two resolutions were also adopted, as follows:

Resolution by Government Coalition Parties. This stated that in ratifying the treaties the *Bundestag* assumed:

(1) that the Community would develop an economic policy which would help to preserve stable prices, expand production, maintain a high degree of employment, and thereby bring about a steady increase in the living standards of member-countries;

(2) that a joint currency policy would be developed with a view to stabilizing the currencies of the member-countries, removing exchange disparities, and ending obstacles to the free exchange of money;

(3) that trade with non-Community countries would be expanded, and that for this purpose the adherence of new members to the Community would be facilitated, the association of other countries (by means of a Free Trade Area or of free trade agreements) pressed forward, and trade exchanges with the rest of the world steadily developed;

(4) that the common trade policy would aim at the progressive abolition of restrictions in international trade;

(5) that the German contributions to the Overseas Development Fund would serve also the development of the peoples concerned towards political self-determination;

(6) that inter-zonal trade with Eastern Germany would not be restricted by the development of the European Economic Community;

(7) that all opportunities for improving the economic situation of Berlin would be freely utilized;

(8) that any parliamentary rights which the national Parliaments of the member-countries might renounce would be directly transferred to the European Assembly;

(9) that the use of atomic energy for peaceful purposes would remain the only basis of Euratom, with special regard for the position of the Federal Republic, which had renounced the manufacture of atomic weapons.

In addition, the resolution:

(*a*) requested the Federal Government (i) to investigate the effects of the Common Market on the structure of the German economy; (ii) to take any necessary measures to protect the status of those affected by the Common Market (especially the workers) against any unfavourable consequences; (iii) in the latter connexion, to ensure that the employment and social status of workers were safeguarded.

(*b*) emphasized that in the event of reunification Germany should be entitled to reconsider her participation in the two Communities;

(*c*) expressed the wish that the new European Communities might eventually lead to a comprehensive unification of Europe.

Social Democratic Resolution. This resolution emphasized, as regards Euratom, that no fissile material should be allowed to be used for military purposes. As regards the Common Market, it stressed that the provisions for the association of overseas territories should not only lead to political self-determination in those territories but should promote their development towards independence.

Both resolutions were also supported by the Free Democrats and the Refugee Party. The Social Democrats abstained from voting on the coalition parties' resolution, while the coalition parties abstained on the Social Democratic resolution.

The ratification Bill was unanimously approved by the *Bundesrat* on July 19, 1957.

France.

After approval by the Assembly of the French Union on June 25 (by 100 votes to 48), the Bill authorizing President Coty to ratify the treaties and the agreement on common institutions was debated in the National Assembly from July 2-9, 1957, receiving final approval on the latter date by 342 votes to 289.

An explanatory memorandum accompanying the Bill emphasized: (*a*) that the Euratom treaty contained no restrictions whatsoever on France's right to develop nuclear energy for military purposes; (*b*) that the system of security checks did not apply to factories producing for the armed forces; and (*c*) that the Community's right of ownership over special fissile matter did not extend to any such matter used for military purposes.

During the debate in the National Assembly (where the Bill had been supported by most of the Assembly's Commissions, including that of Foreign Affairs) two amendments were accepted by the Government and incorporated in the Bill's text. The first (moved by M. Boisdé, Independent) provided that the Government should submit an annual report for parliamentary approval, describing the preceding year's developments in the Economic Community and the steps which it (the Government) had taken or intended to take to facilitate the adaptation of national activities to the new conditions. The second amendment (moved by M. de Lipkowski, Radical *apparenté*) required the Government to draft one or several Bills, in the nature of *lois-cadre*, covering a number of measures which would enable France to enter the Common Market under the best possible conditions, and to introduce such legislation before the 1958 Budget.

M. Pineau (Foreign Minister), who spoke on July 6, refuted the argument that the creation of a "Little Europe" would impede the creation of a "Big Europe." He declared that the interest of third countries (and more especially of Britain) in Europe would be all the greater once "solid and dynamic" European organizations were in existence. On the question of the participation of overseas territories in the Common Market, M. Pineau maintained that the treaty, in fact, dealt more favourably with the *territoires d'outre-mer* than with Metropolitan France, for the following reasons: (*a*) the territories would receive an ever-increasing flow of cheaply-priced goods; (*b*) they would have big new markets for their own products; (*c*) they would be entitled to set up Customs barriers to protect their own industries; (*d*) the Community countries would provide them with funds for investment.

Turning to the situation which would arise if Germany were reunified, M. Pineau said that if a reunified Germany decided to withdraw from the European Communities, that, in the French Government's opinion, would entail their dissolution. On the other hand, if a reunified Germany were to take the Federal Republic's place as a Community member, any of the other member-countries would be entitled to withdraw on that account. However, it was impossible to say exactly what would happen in the event of German reunification, since no-one knew what the terms of a reunification agreement would be, or, more specifically, whether a reunified Germany would assume the existing commitments of the Federal Republic.

M. Mendès-France attacked the Treaties on several grounds. He asserted, first, that the main beneficiary of the Common Market would be the Rhineland, and that it would be the fate of French under-developed regions, such as Brittany, to provide labour for Germany. In this connexion he mentioned that one of Dr. Adenauer's principal advisers, Dr. Abs, had estimated that the Federal Republic would need to construct one or two million new houses for French and Italian workers. Dr. Abs had also estimated that there would be 1,000,000-1,500,000 unemployed in France when the weaker elements in French small and medium-scale industry had finally succumbed to German competition.

Secondly, M. Mendès-France said that there were really seven members in the two Communities—the seventh being Eastern Germany, which would enjoy all the benefits of the system but would be under no obligation towards it. Moreover, the products of the East European and Scandinavian countries would have unimpeded entry to the Common Market zone across the Customs-free German zonal boundary. Thirdly, as regards the overseas territories, he criticized the fact that while France's five partners were committed for no more than five years to assist financially in their development, the overseas territories themselves would be open indefinitely to the products of the other member-countries.

M. Mendès-France went on to declare that while European economic integration was greatly to be desired, France was not really ready to embark upon such an experiment at that particular moment. It was very doubtful whether the French economy would be out of its difficulties within 18 months, when the first tariff reductions were due to be made. Moreover, the Algerian campaign, with its attendant effects on the national economy, was likely to continue for another two or three years, according to the estimate of M. Lacoste (the Minister-Resident in Algeria).

M. Maurice Faure (Secretary of State for Foreign Affairs, and chief French representative on the Inter-governmental Committee which worked out the two treaties) had previously emphasized that, far from impeding the recovery of France's economy, the Common Market would actually help to bring it about. Replying to those critics who had expressed concern lest France would be compelled to implement decisions of the Council of Ministers of the Community in the event of a balance-of-payments crisis, M. Faure declared that these decisons would certainly not be in the form of a *diktat* but would be the result of free deliberations; he asked in this connexion what interest the five other member-countries could have in ruining the sixth at the price of being unable to sell their own goods to it any longer.

Replying to critics who had expressed concern about the situation of French farmers, M. Faure declared that France, "with the richest and most varied land in the Community," would now get the "industrial masses of the North of Europe" as buyers without any barriers or limitations—an opportunity which she should seize by conducting an "active and at the same time reasonable agricultural policy, charging fair prices." French farm production would be protected against non-Community countries by the common Customs tariff, whilst, as regards cereals, farmers would be protected by the system of long-term contracts between member-countries.

M. Bourgès-Maunoury (then Prime Minister), speaking on the final day of the debate, emphasized that if France refused to ratify the treaties she would only run the risk of "political and economic isolation." Moreover, the other five countries might go ahead and create the Community without French participation, in which case France would be without the guarantees now accorded to her. Referring particularly to French relations with Western Germany, M. Bourgès-Maunoury declared: "Our wish has always been to set up a democratic and stable framework firm enough to guide the expansion of German industrial power in the direction of the common interests of the European countries, and sufficiently flexible to guarantee respect for our own fundamental interests . . . Those who fear the weight of Germany at our side should think about the weight of a Germany not linked with us, or even ranged against us." In conclusion, he emphasized that the Government would neglect no effort to bring about a wider trade association including, above all, Great Britain.

M. Robert Schuman (M.R.P.), **M. Paul Reynaud** (Independent), and **M. René Pleven** (U.D.S.R.)—all former Prime Ministers and protagonists of European unification—warmly supported the ratification. **M. Duclos**, for the Communists, denounced the treaties as "an economic-military enterprise of a syndicate of capitalist exploiters serving German imperialism."

The voting in the National Assembly took place in five stages, as follows:

(1) That section of Article 1 of the Bill dealing with the Common Market was approved by 342 votes to 234, with five abstentions and eight deputies not taking part in the vote.

The deputies supporting ratification comprised 100 Socialists, 81 Independents, the 74 M.R.P. members, 25 (out of 45) Radicals, 20 U.D.S.R.-R.D.A., 12 R.G.R., 11 dissident Radicals, 10 *paysans*, six Overseas Independents, two *non-inscrits*, and one Poujadist. The opposition comprised the 143 Communists and six *progressistes*, 19 Radicals (including M. Daladier and M. Mendès-France), 16 (out of 21) Social Republicans, six *non-inscrits*, four *paysans*, two Independents, and one each from the dissident Radicals, R.G.R., and U.D.S.R. Three Independents, one U.D.S.R. deputy, and one dissident Radical abstained, while five Social Republicans, one Radical, one Overseas Independent, and one *non-inscrit* did not take part in the vote.

(2) The section dealing with the Euratom Treaty was approved by 332 votes to 240. [Compared with the vote on the Common Market Treaty, only 20 deputies voted in a different way. Fourteen who had supported the Common Market opposed or abstained on the Euratom Treaty; four who had opposed the Common Market or abstained voted for Euratom; a Social Republican who had not taken part in the vote on the Common Market voted against Euratom; and one Independent who had abstained on the Common Market did not take part in the vote on Euratom.]

(3) The convention on Common Institutions was approved by a show of hands.

(4) The whole of Article 1 was then approved by 346 votes to 240.

(5) Finally, the whole Bill (i.e. Article 1 plus the two amendments, which became Articles 2 and 3) was approved by 342 votes to 239.

The Bill was subsequently approved by the Council of the Republic on July 24 by 222 votes to 70, after an all-day and all-night debate.

As in the National Assembly, the Socialists, the M.R.P., and most of the Independents, the *Gauche Démocratique* (Radicals) and the Overseas Independents supported the ratification, whilst the Communists and Social Republicans voted against.

The Council of the Republic also adopted a resolution (moved by M. Durand-Reville, *Gauche Democratique*) requesting the Government (1) to consult the Governments of the French overseas territories on the conditions of their association with the Community; (2) to set up a permanent commission charged with working out an economic policy for the franc area; (3) to reserve equitable representation for the representatives of *France d'outre-mer* in the institutions of the Community; (4) to obtain as soon as possible, and at the latest after five years, a sizeable increase in investments in the Overseas Territories, more efficacious protection for their products, and an assurance that full employment would be safeguarded.

Another resolution was also adopted stating that the Council of the Republic would "always refuse any change or diminution, in whatsoever form, of the prerogatives which constitute the sovereign power of France." The resolution was moved by M. Marcel Plaisant, chairman of the Council's Foreign Affairs Commission.

Italy.

Following a 10-day debate, the Chamber of Deputies approved ratification of the treaties on July 30, 1957, by 311 votes to 144 (Communists), with 54 abstentions ("Nenni" Socialists). In the votes on the separate clauses preceding the vote on the Bill as a whole, the "Nenni" Socialists had expressed their support for the Euratom treaty—thereby isolating the Communists completely in the Chamber for the first time for many years. In the separate vote on the Common Market Treaty the Nenni Socialists had abstained. All the other parties, including the right-wing Monarchists and the neo-fascist M.S.I., supported ratification.

Signor Pella (Deputy Premier and Foreign Minister), who replied to the debate, said that in the next 12 to 15 years Italy's economy would be entirely devoted to the task of applying the provisions of the Common Market Treaty, which might, possibly, lead to the creation of a common currency for the six countries. He also expressed the Italian Government's warm support for the speediest possible creation of a European Parliament elected by direct universal suffrage. As regards Euratom, Signor Pella declared that the Treaty offered Italy a unique opportunity to migitate her great and increasing dependence on energy imports.

The Senate approved ratification on Oct. 9, 1957, by a show of hands.

Luxemburg.

Ratification of the treaties was approved by the Chamber of Deputies on Nov. 26, 1957, by 46 votes to three (Communists).

Belgium.

The Chamber of Representatives approved ratification of the treaties on Nov. 19, 1957, by 174 votes to four (Communists), two of the Christian Social (Catholic) deputies abstaining. The ratification Bill was passed by the Senate on Nov. 28 by 134 votes to two (Communists), with two abstentions.

Netherlands.

After a four-day debate, the Lower House of the States-General approved ratification of the Common Market Treaty on Oct. 4, 1957, by 114 votes to 12; the opposing votes comprised the Communists, the Protestant Reform Party, and three others (including Professor Gerbrandy, the wartime Prime Minister). The Bill ratifying the Euratom treaty was passed without a division, though the Communists expressed their opposition to the treaty during the debate.

By 77 votes to 48, the Lower House rejected an amendment by Professor Oud (League of Freedom and Democracy) which would have made ratification of the Common Market Treaty conditional upon a declaration stressing Holland's particular demographic situation and the need for a continuous expansion of employment. Against Government opposition, however, the House adopted a motion providing that any further agreements relating to the application of the two treaties should be subject to the approval of the States-General.

The Upper House approved the Common Market Treaty on Dec. 4, 1957, by 46 votes to five (three members of the League of Freedom and Democracy and two Communists). As in the Lower House, the Bill ratifying the Euratom Treaty (passed on a voice vote) was opposed only by the Communists.

Paris Meeting of Foreign Ministers. - Appointments to European Commissions and High Authority of Coal and Steel Community.

Following several meetings in Brussels and Paris of the Interim Committee for the Common Market and Euratom during September and November, 1957, the Foreign Ministers of the six member-countries met in Paris on Jan. 6-7, 1958, to discuss the future seat of these organizations and to appoint the heads and other members of their Commissions and other principal institutions. The discussions also dealt with the appointment of a new president and vice-president of the High Authority of the European Coal and Steel Community, to succeed respectively M. René Mayer, whose forthcoming resignation had been announced on Sept. 18, and Herr Franz Etzel, who had entered Dr. Adenauer's Cabinet as Minister of Finance (see 15836 B).

No agreement was reached on a permanent seat for the three European organizations (the Common Market, Euratom, and the Coal and Steel Community), strongly competing claims being put forward by various Ministers—including Brussels, Strasbourg, Milan, and Luxemburg. The Ministers therefore agreed on an interim solution pending their next meeting before June 1. It was reported in the French Press that the deadlock in the choice of a permanent seat for the Communities had been due in large measure to the "intransigence" of Luxemburg.

Wide agreement was nevertheless reached on the principal appointments, thereby enabling some of the most important organs of the two new Communities to be constituted and to start their activities in the near future.

The results of the Foreign Ministers' discussions were announced in the following communiqué issued on Jan. 7, 1958:

Appointments.

In designating the members of the executives of the European institutions set up under the Rome treaties, the Ministers had adopted the principle of rotation with regard to the nationality of the various presidents and vice-presidents. The following had been designated as the initial members:

Commission for the European Economic Community. President: Professor Walter Hallstein (Germany). Vice-Presidents: Signor P. Malvestiti (Italy), Mr. S. L. Mansholt (Netherlands), M. Robert Marjolin (France). Members: M. R. Lemoignan (France), Signor J. Petrilli (Italy), M. Rasquin (Luxemburg), M. Rey (Belgium), and a German member to be designated later.

Commission for Euratom. President: M. Louis Armand (France). Vice-President: Signor E. Medi (Italy). Members: M. de Groote (Belgium), Herr Krekeler (Germany), Mr. Sassen (Netherlands).

European Investment Bank. Signor Campilli (Italy) would be recommended to the Board of Governors of the bank as president, with one German and one French national as vice-presidents.

High Authority of the Coal and Steel Community. President: M. Paul Finet (Belgium) in succession to M. René Mayer. Vice-President: Mr. Dirk Spierenburg (Netherlands) in succession to Herr Etzel. New members to replace M. Mayer and Herr Etzel: Dr. Franz Blücher (Germany) and M. R. Reynaud (France).

European Assembly. The Assembly would be advised to choose an Italian parliamentarian as president.

Court of Justice. The new Court, to serve all three European Communities, would start to function on April 1. Its president would be a Netherlander.

Seat of European Institutions.

The Ministers had agreed that all the three European organizations should be concentrated in one place "as soon as this concentration can be effectively carried out and in conformity with the provisions of the treaties." They had accordingly decided to meet again before June 1, 1958, in order to proceed with the choice of a seat. Meanwhile, as regards the various candidatures put forward, they would consult the Assembly (i.e. the joint Assembly of the three organizations); the presidents of the High Authority of the Coal and Steel Community, of the Commissions of the Common Market and Euratom, of the Court of Justice, and of the European Investment Bank; and international town planning experts.

In the meantime, the Commissions of the Common Market and of Euratom would be convened by their presidents. As neither a definite nor a provisional seat had yet been fixed the member-Governments recommended "for practical reasons and because of existing material facilities" that the Commissions should meet in Brussels or Luxemburg.

The Council of Ministers of the Common Market and of Euratom and the board of directors of the Investment Bank would meet at the demand of their presidents, while the Assembly would meet in Strasbourg. The Secretariat of the Interim Committee would serve the organs of the two new Communities.

Biographical details of the heads of the various European institutions are given below :

M. Louis Armand (52), who started his career as a mining engineer, joined the former P.L.M. Railway Company in 1934 and subsequently directed the research work on the electric traction system now generally adopted in France and many other countries. A leader of the Resistance movement amongst French railwaymen during the Second World War, he was arrested by the Gestapo in 1944, being freed after the liberation of Paris. After the war he was appointed assistant director-general of the French National Railway Company in 1946, became its director-general in 1949, and was appointed president of its board of directors in 1955. As head of the *Bureau des Ensembles Industriels Africains*, the French Government's agency for the industrial development of French Africa, M. Armand directed in 1953 the investigations into the resources of the Sahara which led, in 1956-57, to the setting-up of the Joint Organization for the Sahara (see 15697 A). Also, as chairman of the industrial equipment committee of the French Commissariat of Atomic Energy, he wrote in 1955 a report on the production and distribution of power in Europe for the O.E.E.C. (see 14346 A). In November 1956 he was appointed by the Foreign Ministers of the six "Messina Powers" (i.e. the prospective member-countries of Euratom and the Common Market) as a member of the committee of "three wise men" which investigated the possibilities of nuclear energy production in these countries and the means to achieve it [see page 15396]. The report of the "three wise men" was published in May 1957 [see page 15929].

Dr. Walter Hallstein (56), an eminent jurist and specialist on international and comparative law, held professorships at Rostock and Frankfurt universities before and during the last world war, becoming Rector of the latter university in 1946. After lecturing in the U.S.A. in 1948-49, he was appointed State Secretary in the Chancellor's Office in 1950 and led the German delegation at the Paris conference on the Schuman Plan which resulted in the setting-up of the European Coal and Steel Community. Since 1951 he had been State Secretary for Foreign Affairs, becoming one of the most intimate collaborators of Dr. Adenauer and taking a prominent part in the negotiations with the Western Powers which resulted in the Paris Treaties and in the Franco-German negotiations on the future of the Saar.

M. Paul Finet (60), who was national secretary of the *Fédération Générale des Travailleurs Belges* (the Socialist trade union federation in Belgium) at the outbreak of the Second World War, escaped in 1941 to Britain, where he subsequently worked for the Belgian Government-in-exile. After the war he was appointed general secretary of the F.G.T.B., taking a prominent part in the work of the International Labour Organization and being one of the co-founders of the International Confederation of Free Trade Unions (see 10704 A), whose president he became in 1951. He had been a member of the High Authority of the E.C.S.C. since 1952.

Signor Pietro Campilli (66) was, with Don Sturzo, one of the founders of the former Popular Party in Italy, but abandoned politics when Mussolini came to power. A Christian Democrat, he had been a member of the Italian Chamber of Deputies since 1946 and, except from May 1947 to January 1950, had held Ministerial office ever since, serving under the late Signor De Gasperi as well as in the Pella, Fanfani, Scelba, Segni and Zoli Cabinets. As Minister without portfolio, he was in charge of the Government's investment programme and the maintenance of employment from 1950-51, and since 1953 had been responsible for the Development Fund for Southern Italy (the *Cassa del Mezzogiorno*). Earlier, he had held the Foreign Trade and Finance and Treasury portfolios (1946-47) and had also been Minister of Transport and later Minister of Industry and Commerce (1951-53).

Of the other new appointments, **Mr. S. L. Mansholt** had been Netherlands Minister of Agriculture and Food, and later of Agriculture, from 1946 until a few weeks ago, serving in every Dutch post-war Government. **M. Robert Marjolin** was secretary-general of the O.E.E.C. from its formation in 1948 until 1955, having previously been Assistant Commissioner of the "Monnet Plan." **Dr. Franz Blücher**, a banker in Essen before the war, was Vice-Chancellor in Dr. Adenauer's first and second Administrations from 1949 to 1957, holding in addition the portfolio of E.R.P. Affairs in the first and of European Economic Co-ordination in the second Cabinet. **Mr. Dirk Spierenburg** had been a senior official of the Netherlands Ministry of Economic Affairs, president of the Benelux Council, and Netherlands delegate on the Council of the O.E.E.C. before becoming a member of the High Authority of the E.C.S.C. in 1952.

M. Finet, Professor Hallstein, and M. Armand met in Luxemburg on Jan. 14, for the first time after their appointment. A subsequent communiqué said that they had "agreed on the fundamental necessity and the practical need for close collaboration between the three European Communities" ; that for this purpose they would meet "as often as necessary and in any case at least twice a month" ; and that after his appointment the President of the European Investment Bank would be invited to take part in the examination of those questions which concerned the Bank. On behalf of the High Authority, M. Finet had offered every practical support to M. Armand and Professor Hallstein, notably during the initial period of the two Commissions, and it had been decided to set up a working group to study the question of developing certain services in common between the three authorities.—(European Coal and Steel Community, Luxemburg - Inter-Governmental Committee, Brussels - Council of Europe, Strasbourg - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Corriere della Sera, Milan - Netherlands News Agency) **(15927 A ; E.C.S.C., 15025 A ; 12481 A.)**

A LAOS - SOUTH VIETNAM. — Prince Souvanna Phouma's Visit to Saigon. - Joint Communiqué.

The Prime Minister of Laos, Prince Souvanna Phouma, visited Saigon from Jan. 2-4 as the guest of the South Vietnamese Government, accompanied by M. Phoui Sananikone (the Laotian Foreign Minister) and the Ministers of Defence, Public Works and Communications, and Finance. During their visit the Laotian Ministers had discussions with President Diem, M. Vu Van Mau (the Vietnamese Foreign Minister) and other Vietnamese Ministers.

A joint communiqué issued on Jan. 3 confirmed the desire of both sides for "sincere and close co-operation in order to promote the prosperity of the two countries, to combat subversive activities, and to serve effectively the cause of peace and freedom." It was stated that both countries had come to "specific conclusions" concerning agreements on transit, trade and payments, on measures to reinforce border control, and on a convention for the settlement of Vietnamese immigrants in Laos.

At a press conference on Jan. 4 Prince Souvanna Phouma stated that the main purpose of his visit was "to explain to the Governments of friendly nations the actual situation of my country after the settlement of the *Pathet Lao* question," and "to allay the fears" expressed at the consequences of this settlement. He emphasized that the agreements with *Pathet Lao* would involve "no change whatsoever in the domestic and foreign policies" of the Laotian Government ; he added also that the "Communization" of Laos was out of the question, as neither the people nor the Government wanted any change in present institutions.

It was reported from Saigon on Jan. 15 that agreement had been reached between South Vietnam and Laos on (*a*) the appointment of Vietnamese consular agents at Luang Prabang (the ancient Laotian capital) and four other Laotian towns where Vietnamese minorities had settled ; (*b*) the use of the Vietnamese seaport of Tourane for the transit of goods to Laos ; and (*c*) the rebuilding by Vietnam, with U.S. aid funds, of the road linking the port of Quinhon (210 miles S.E. of Hué) with the Laotian border, and the setting-up of joint Customs control posts on that road.—(Vietnam Press Agency, Saigon - Le Monde)

B. ISRAEL. — "Britannia" Air Services to Britain and America. - Record Long-distance Flights.

Regular Israeli air services to Britain and America with *Britannia* airliners were inaugurated on Dec. 23 by Israel Airlines (*El Al*), operating on the route Tel-Aviv-Rome-Paris-London-New York. The planes carry 66 passengers and an all-Israeli crew of 12. *El Al* set up a new transatlantic record on Jan. 9 when one of its *Britannias* flew from New York to London in seven hours 44 minutes, carrying 51 passengers and crew and two tons of freight. On a proving flight on Dec. 19, an Israeli *Britannia* had made the longest non-stop flight in the history of commercial civil aviation by flying from Lydda to New York—a distance of 6,000 miles—in 14 hours 56 minutes.

Orders for four *Britannia-310* airliners had been placed by Israel with the Bristol Aeroplane Company, three of the machines being handed over to *El Al* at Filton (Bristol) in September. Delivery of the fourth machine is expected towards the end of 1958.—(Times - Daily Telegraph - Israel Government Press Office, Jerusalem) **(Prev. rep. 15373 A.)**

C. CANADA. — Yukon By-election.

A Federal by-election held in the Yukon on Dec. 15 resulted in a victory for the Progressive Conservative candidate, Mr. Erik Nielsen, who had successfully petitioned against his defeat in the general election in June 1957, when the seat was finally allotted to the Liberal candidate after a number of re-counts. Mr. Nielsen's victory increased the strength of the Progressive Conservatives in the Federal House of Commons to 113 and reduced that of the Liberals to 105.—(Canadian Dept. of External Affairs, Ottawa) **(Prev. rep. 15887 B.)**

D. FRANCE. — Cut in Armed Forces.

Defence estimates for 1958, issued in Paris on Jan. 13, showed that the French armed forces would be reduced to 890,000 men by the end of the year, a cut of 150,000 men (or 15 per cent) on the 1957 figure, which stood at 1,040,000.—(Le Monde, Paris)

A. UNITED KINGDOM. — Coal Production in 1957. - Statistics for Second Half of 1957. - The Problem of Absenteeism. - Opencast Coal Bill.

Provisional figures published by the Ministry of Power on Jan. 11, 1958, gave the total output of saleable coal in 1957 as 223,600,300 tons (210,018,500 tons deep-mined and 13,581,800 tons opencast), compared with 222,006,000 tons (209,925,400 tons deep-mined and 12,080,600 tons opencast) in 1956.

The output of saleable mined coal by Divisions in 1957 and 1956 was as follows :

Division	1957 Tons	1956 Tons
Scottish	21,330,900	21,477,600
Northern	13,500,900	13,689,800
Durham	25,172,100	25,585,700
North-Eastern	43,733,400	43,633,700
North-Western	15,457,200	15,713,600
East Midlands	46,937,500	46,266,700
West Midlands	17,927,800	17,732,400
South-Western	24,276,400	24,140,000
South-Eastern	1,682,300	1,685,900

Although the estimated increase in output of mined coal in 1957 was only 93,100 tons more than in 1956, the number of workers on colliery books averaged 710,100 in 1957, compared with only 703,400 in 1956. The average number of shifts worked by wage-earners per week fell from 4.69 in 1956 to 4.65 in 1957, whilst the percentage of absenteeism rose from 12.74 in 1956 to 13.65 in 1957. Output per shift overall in 1957 was 1.234 tons, the same as in 1956.

Sir James Bowman (chairman of the National Coal Board), speaking in London on Jan. 8, stressed that the increase in absenteeism had resulted in the production figures for 1957 failing to show the benefits derived from technical progress.

Sir James explained that during the first 22 weeks of the year the attendance figure had been 0.66 points better than in the corresponding period of 1956, with the result that deep-mined output was 2,100,000 tons up and was "running at the highest rate since nationalization." After the abolition of the "bonus shift" system at the end of May, however (see 15530 A), attendance had begun to deteriorate, whilst the influenza epidemic in the autumn had cost the industry about 1,500,000 tons. Sir James Bowman added that absenteeism was "particularly harmful" when it fluctuated widely between different days of the week—e.g. at some pits absence was often two or three times as high on Mondays as on other days, whilst it was "very serious" immediately before and after the holidays.

The following table shows the average weekly rate of coal production and consumption, and of manpower, output, and absenteeism in the second half of 1957 :

	Saleable Mined Coal Produced Tons	Plus Opencast Tons	Total Production Tons	Inland Consumption Tons	Exports and Bunkers† Tons
July ..	3,531,850	286,150	3,188,000	3,455,250	145,500
August* ..	3,180,520	247,800	3,428,320	3,278,600	128,400
September	3,808,250	254,075	4,062,325	3,016,500	154,750
October* ..	4,137,810	266,180	4,404,020	4,018,000	158,600
November	4,376,125	270,400	4,646,525	4,358,250	140,500
December	3,848,675	221,400	4,070,075	5,705,560	125,750

	Wage-earners on colliery books	No. of shifts worked per wage-earner at coal-face	Output per manshift at coal-face	Output per manshift overall	Percentage of absenteeism
July	709,500	283,725	4.06	2.455	1.223	12.99
August	709,200	243,160	4.02	3.212	1.137	13.73
September	710,100	283,675	4.42	3.312	1.210	17.64
October	709,480	283,720	4.89	3.354	1.233	17.06
November	709,775	283,450	4.97	3.362	1.239	12.98
December	710,200	283,050	4.50	3.278	1.187	15.29

*Average of five weeks. †Including fishing vessels but excluding coastwise bunkers.

Other recent developments in connexion with the coalmining industry are summarized below :

Mining Accidents.

The most serious mining accident during 1957 occurred at Kames Colliery, Muirkirk (Ayrshire) on Nov. 19, when 17 miners were killed and 11 others injured in an underground explosion.

The report of the Chief Inspector of Mines (Sir Harold Roberts) for the years 1954-56, published on Nov. 26, 1957, showed that deaths from mine accidents in 1956 totalled 330—"by far the lowest figure ever recorded." The yearly averages of deaths and injuries in the three years 1954-56 were 375 and 1,838 respectively, compared with 433 and 2,003 in the three years 1950-53. In the 43 years in which the Coal Mines Act had been in operation, the fatality rate per 1,000 had fallen from 1.55 in 1913 to 0.45 in 1956, and the injury rate from 5 to 2.4. The report emphasized that the majority of deaths and injuries were caused by individual accidents, many of them due to illegal smoking; it stressed the "urgent duty" of managements to ensure that the arrangements for searching miners before they went down the pits were properly enforced.

The Opencast Coal Bill.

The text was published on Dec. 17, 1957, of the Opencast Coal Bill, intended to provide a statutory basis for opencast coal mining (at present carried out under Defence Regulations), and to ensure that coal production and land restoration were kept under the close control of a Minister responsible to Parliament. Its principal provisions were :

(1) The National Coal Board would be empowered to acquire land needed for opencast mining by ordinary commercial methods or, if these failed, to acquire such land by means of a "Compulsory Rights" Order.

(2) Any "Compulsory Rights" Order—a new instrument distinct from the normal "Compulsory Acquisition" Order—would require approval by the Minister of Power, which could only be given after the owner or occupier of the land (or other interested party) had been given an opportunity to lodge objections and have them heard by a local authority.

(3) No "Compulsory Rights Order" could be valid for more than 10 years or be made against an occupied dwelling house, a building which it was not intended to restore or replace, or land covered by any previous Order.

(4) Tenants and owner-occupiers whose land rights were taken would receive annual rental compensation, yearly payments for loss, and compensation for the cost of vacating the land and for losses incurred through forced sales of stock and equipment. Landlords and owners would continue to receive rent and would be paid terminal compensation (normally equal to the difference in market values before opencast working began and after restoration had been carried out) at the end of the Board's occupation.

(5) The Board was empowered, subject to Ministerial authority, to enter on land in order to prospect for coal.

It was stated in the Press on Dec. 18 that about 160,000,000 tons of coal had been obtained by opencast mining since large-scale operations began in 1942.—(Ministry of Power - Times - Daily Telegraph - Manchester Guardian) **(15767 A.)**

B. BULGARIA. — General Elections.

Elections for a new National Assembly took place on Dec. 22, resulting in 99.95 per cent of the votes being cast for the candidates of the Fatherland Front. Of the total electorate of 5,218,602, 99.77 per cent (5,206,428) went to the polls, of whom 5,204,027 voted for the Fatherland Front ; 2,076 votes were cast against the Front, and 325 votes were invalid. No candidates other than those of the Fatherland Front were allowed to stand. All citizens of 18 and over were entitled to vote and to stand as candidates.

The new Assembly will have 253 deputies, including 72 of the 90 members of the central committee of the Bulgarian Communist Party. The parties represented in the Fatherland Front comprised the Communist and Agrarian parties, whilst there were also candidates nominated by trade union and youth organizations, cultural, technical, and scientific organizations, factories and offices, co-operative and State farms, villages, etc. (Bulgarian Legation Press Department, London)

(Prev. rep. 13326 D.)

C. CHINA - YEMEN. — Treaty of Friendship and Commerce. - Chinese Economic and Technical Aid for Yemen. - Establishment of Diplomatic Relations.

A Sino-Yemeni treaty of friendship and commerce was signed in Peking on Jan. 13, together with an agreement on scientific, technical and cultural co-operation and on the establishment of diplomatic relations between the two countries. A joint statement was issued by the Crown Prince of Yemen (then on a visit to China) and Mr. Chou En-lai condemning the activities of "colonial Powers" in the Middle East and expressing China's support for Yemen in the Aden frontier dispute.

Peking radio announced that China would provide Yemen with a loan of 70,000,000 Swiss francs (about £5,400,000) over ten years to meet the cost of material and equipment to be supplied by China for building a road, a sugar factory and refinery, a factory for aluminium ware, and textile mills. (Times) **(Prev. rep. 14959 A ; 14779 E.)**

D. SOVIET UNION. — Cut in Armed Forces.

It was announced in Moscow on Jan. 6 (*a*) that the Soviet armed forces would be reduced by 300,000 men "over and above the cut of 1,840,000 carried out in 1955 and 1956" ; and (*b*) that the troops to be released from service would include 41,000 stationed in Eastern Germany and 17,000 stationed in Hungary. The announcement said that the Soviet Government regarded this step as "a major contribution to the relaxation of tension."—(Soviet Embassy Press Department, London)

(Prev. rep. 14878 A.)

A. SWEDEN. — Cabinet Crisis after Referendum on New Pensions Scheme. - Agrarians withdraw from Coalition Government. - Formation of Social Democratic Minority Government.

The Swedish Cabinet, which since 1951 had consisted of a coalition between the Social Democrats and the Agrarians, resigned on Oct. 26, 1957, following the Agrarian Party's decision to leave the Government. The Cabinet crisis—the first of its kind for 21 years—arose out of a national referendum in which the electorate were asked to vote on three different contributory pensions plans : one drawn up by the Social Democrats, one by the Agrarians, and one jointly by the Liberal and Conservative parties.

The question of a new contributory pensions scheme, additional to and superimposed on the existing old-age pension ("people's pension"), had been considered by an official commission in 1956. No agreement could be reached on a single plan, however, and three different pension schemes were put forward by the various parties.

The Social Democrats, with the support of the Trade Union Federation, proposed a national scheme with obligatory contributions, under which the "people's pension" would be raised so that a pensioner's income at the age of 67 would eventually equal 65 per cent of his average annual wage or salary during the 15 best working-years prior to retirement. It was also proposed that a pension fund should be built up over the next 30 years for the payment of these new benefits.

In contrast to the Social Democratic scheme (which was also supported by the Communists), both the Agrarians and the Liberals and Conservatives demanded that any additional pension scheme should be on a voluntary basis. The Agrarians proposed that the State should guarantee the value of pensions in terms of purchasing power, and that, while pensions should be increased, they should not exceed a certain "ceiling." The Liberals and Conservatives advocated that the additional pension payments should be left to arrangements between employers and employees, and that the resulting contributory fund should be administered by the private industrial or business management concerned.

In the referendum, held on Oct. 13, 1957, the Social Democratic plan received 1,602,516 votes, representing 46.4 per cent of all votes cast. The joint Liberal-Conservative plan received 34.6 per cent and the Agrarian plan 15.2 per cent, blank votes accounting for the remaining 3.8 per cent. Of nearly 5,000,000 people entitled to vote, 70.4 per cent took part in the referendum.

It was pointed out in the Swedish Press that voting was not exactly on party lines, as the support for the Social Democratic pensions plan was below that party's voting percentage in the 1956 elections (see below). Moreover, the vote for the Liberal-Conservative proposals was also lower than the joint poll of those two parties in the elections, whereas the percentage support for the Agrarian plan exceeded the Agrarians' electoral percentage in 1956.

Prior to the referendum, Hr. Tage Erlander (the Prime Minister and Social Democratic leader) had announced that he would consider it as a mandate for his party's compulsory pensions scheme if it were approved by at least 40 per cent of the electorate. As stated above, the Social Democratic proposals were supported by 46 per cent of those voting in the referendum, and the Prime Minister accordingly announced his intention of introducing legislation implementing the proposals. On the other hand, the Opposition leaders—Professor Ohlin (Liberal) and Hr. Hjalmarsson (Conservative)—emphasized that if the votes for their own scheme and the Agrarian scheme were added together, 49.8 per cent of the total votes had been cast against the Social Democratic plan for a compulsory pensions scheme ; if blank votes were added, there would be a majority of 53.6 per cent against the Social Democrats.

The Agrarian Party, as stated, were strongly opposed to a pensions scheme based on the compulsory principle, and subsequent differences in the Cabinet on this matter led on Oct. 24 to the resignation of the Agrarian Ministers, and two days later to the resignation of the Cabinet as a whole. Discussions aimed at the formation of a four-party Cabinet representing the Social Democrats, Agrarians, Liberals and Conservatives took place at the suggestion of King Gustav Adolf, but broke down when the Social Democrats refused to take office in such a coalition. Attempts to form a three-party coalition between the Liberals, Conservatives, and Agrarians were similarly unsuccessful, and on Oct. 29 the King asked Hr. Erlander to form a minority Social Democratic administration. Hr. Erlander agreed to do so, and the new Government was accordingly formed on Oct. 30, 1957.

Several changes in the Social Democratic and Agrarian Coalition Government had been announced earlier in the year, as follows :

(*a*) On Feb. 1, 1957 when Hr. Sam Norup (Minister of Agriculture) and Hr. Hjalmar Nilsson (Minister without portfolio), both Agrarians, left the Cabinet together with Hr. Allan Nordenstam (Independent), who was also a Minister without portfolio. They were succeeded by Hr. Bernhard Nasgard, Hr. Lars Eliasson (both Agrarians), and Hr. Herman Kling (Social Democrat) respectively.

(*b*) On March 22, 1957, when Hr. John Ericsson (Minister for Social Affairs) left the Cabinet at his own request after 12 years' service and was succeeded by Hr. Torsten Nilsson, whose post as Minister of Defence was filled by Hr. Sven Andersson, the Minister of Communications. The latter portfolio was in turn taken over by Hr. Sture Henriksson. All the Ministers concerned were Social Democrats.

(*c*) On April 22, when Hr. Henriksson was succeeded by Hr. Gosta Skoglund (Social Democrat) as Minister of Communications.

The membership of Hr. Erlander's new Social Democratic minority government was as follows :

*Hr. Tage Erlander	..	Prime Minister.
*Dr. Östen Undén	..	Foreign Affairs.
Hr. Ingvar Lindell	..	Justice.
*Hr. Sven Andersson	..	Defence.
*Hr. Torsten Nilsson	..	Social Affairs.
Hr. Rune Johansson	..	Interior.
*Hr. Gösta Skoglund	..	Communications.
*Hr. Gunnar Strang	..	Finance.
Hr. Ragnar Edenman	..	Ecclesiastical Affairs.
Hr. Gosta Netzén	..	Agriculture.
*Hr. Gunnar Lange	..	Commerce.
*Hr. Sigurd Lindholm	..	Civil Service.
*Fru Ulla Lindstrom	..	Ministers without portfolio.
*Hr. Herman Kling	..	
Hr. Bjorn Kjellin	..	

*No change.

The new Cabinet had one fewer member than its predecessor (15 Ministers instead of 16), the number of Ministers without portfolio being reduced from four to three. The three portfolios formerly held by Agrarians—Interior, Ecclesiastical Affairs, and Agriculture—were all taken over by Social Democrats, whilst the fourth Agrarian Minister—Hr. Eliasson, who held no portfolio—was succeeded in that capacity by Hr. Kjellin. The former Social Democratic Minister of Justice (Hr. Zetterberg) left the Government and was succeeded by Hr. Lindell, previously a Minister without portfolio.

The 1956 General Election.

Prior to the developments described above, general elections for the Lower House of the Swedish Parliament had taken place on Sept. 26, 1956 with the following result (comparison shown with the previous elections in 1952) :

	1956		1952	
	Seats	Votes	Seats	Votes
Social Democrats ..	106	1,729,501	110	1,739,227
Agrarians	19	366,567	26	405,910
Liberals	58	923,551	58	929,829
Conservatives	42	663,742	31	538,484
Communists	6	194,017	5	167,295

The new House has 231 seats, one more than the former House—an additional seat having been created for the island of Gotland.

As shown in the table, the two parties of the then Government coalition (the Social Democrats and Agrarians) lost four and seven seats respectively ; whilst the Social Democratic vote dropped by about 10,000 (under 0.6 per cent), the Agrarians lost nearly 40,000 votes, or almost 10 per cent as compared with the 1952 figure. The Liberals, who slightly increased their poll, remained the second strongest party after the Social Democrats, while the Conservatives made important gains, polling over 125,000 more votes than in 1952 (an increase of over 23 per cent) and winning an additional 11 seats. The Communists gained one seat as shown and increased their poll considerably (by 15.9 per cent).

The Social Democrats and Agrarians continued in coalition for a year after the elections, retaining an overall majority in the Lower House—which, however, had fallen from 42 to 19. As shown in the table above, the present Social Democratic Government is in a minority *vis-à-vis* the other parties. (Swedish Embassy Press Dept., London - Svenska Dagbladet) **(Prev. rep. Elections, 12534 B ; Swedish Cabinet, 14536 C.)**

B. GHANA.—Diplomatic Relations with Soviet Union.

It was announced in Accra and Moscow on Jan. 14 that Ghana and the Soviet Union had agreed to the establishment of diplomatic relations at embassy level between the two countries, which would be followed "in due course" by the appointment of a Ghanaian Ambassador in Moscow and of a Soviet Ambassador in Accra.

(Times - Soviet Embassy Press Department, London)

A. UNITED KINGDOM. — Mr. Thorneycroft on the Reasons for Resignation from Chancellorship of the Exchequer. - Speech to Constituents.

In a speech to his constituents on Jan. 14—his first public speech since resigning as Chancellor of the Exchequer—Mr. Peter Thorneycroft spoke of the reasons for his resignation and set forth the differences between the Government and himself on financial and economic policy. Although Mr. Thorneycroft is M.P. for Monmouth, the speech was made at Newport (Mon.)—outside his constituency—as being the most accessible centre for the members of the Monmouthshire Conservative Association, to whom the speech was addressed. Mr. Thorneycroft spoke as follows :

"I have called this meeting for one purpose only : to explain to my constituents my reasons for resigning the high office of Chancellor of the Exchequer. The reasons are not at all complicated. They are contained in the letter which I wrote to the Prime Minister on Jan. 6 . . . It was one of the hardest letters I have ever had to write . . .

"I was not prepared to support expenditure by the Government next year at a level higher than that of this year. I regarded that, and still regard it, as a matter of principle. I stand by it. Nevertheless, to you who returned me to Parliament—and, I hope, will go on returning me to Parliament—I will give some elaboration of the problem. My words may perhaps reach a wider audience, but I must emphasize that it is not my purpose to engage in fractious criticism of my late colleagues. It is certainly not my purpose to gather to me some body of revolt within the Conservative Party. If I were the only man in England who holds my views, I would still have acted as I did.

"I see some Conservative M.P.s are being asked whether they are for me or for the Prime Minister. I would remind those who ask that question that I am a back-bencher of the Conservative Party and a supporter of the Government.

"Now, as to the background. For 12 years sterling has been under pressure. Crisis has followed crisis. Prices have steadily, inexorably gone up. These are the facts. They face all parties ; they are incontrovertible. There are sincere differences of view as to how this problem should be dealt with. There are some who sincerely believe that a solution is to be found in still more Government expenditure and still higher levels of investment. There are others, among whom I count myself, who see no future for this country in constantly attempting to do more than our resources can achieve.

"One must make up one's mind which of these views one accepts. One must decide whether one is trying to beat an inflation or a slump For my part, I regard inflation as the danger. I am clear that if we show restraint, our economic difficulties are not insoluble, and we can remain with profit and with honour the centre and heart of a prosperous sterling area, to the great good not only of ourselves but of the world.

"But I believe something more. I believe that the condition of our survival, or of our survival as a great Power, rests not upon luck, not upon the whims of fortune, but in the last resort upon ourselves. When I first went to the Treasury I heard a lot about the Zürich bankers, and no doubt such worthy men exist and are important. But the decisive factor in our future is our own faith and our own absolute determination to put and keep our own house in order.

"Last summer all the signs of inflation were upon us. It was evident that not simply the world outside but the British people themselves were losing faith in their own currency. Against that background, certain events abroad touched off another exchange crisis for sterling. Let no one be under any illusions as to the gravity of that position. Had it not been checked, it could have resulted in irreparable injury to the economy of these islands and all who live here. It could have done more. It could have led to the economic disintegration of the Commonwealth.

"The measures the Government took were in line with instructions I had given earlier to the Treasury. They were harsh, they were unpopular, but they were necessary. The essence of those measures was set out in the statement which I made on Sept. 19 : 'There can be no remedy for inflation and the steadily rising prices which go with it which does not include, and indeed is not founded upon, a control of the money supply. So long as it is generally believed that the Government are prepared to see the necessary finance produced to match the upward spiral of costs, inflation will continue and prices will go up.'

"I made that statement with the full approval of my colleagues. I took many and difficult steps to implement it. The bankers had to be persuaded to hold the level of bank advances for the next 12 months at the same level as the last 12 months. Those concerned with public investment, the nationalized industries, the public authorities, were told to hold investment over the next two years in money terms at the same level as last year. The railways were told that if wages went up no more money would be made available, and thus fewer men would have to be employed, or services reduced. Civil servants were told that if higher wages were asked and given, Government services would be reduced and fewer Civil servants might be employed. Civil servants to-day are being dismissed upon this principle.

"Finally, in the world outside—to the International Monetary Fund, in front of the bankers and Finance Ministers of the free world—I was, in the last weeks of September, defending our position, and if I may say so, not altogether unsuccessfully. I said to them : 'If inflationary pressure grows inside the economy, other things may alter, other aspects of policy may have to be adjusted, but the strain will not be placed upon the value of the pound sterling.'

"In all this period I was often asked by the Press, by the Conservative Party, by all concerned—What about the Government's own expenditure ? We said that steps were being taken and would be taken to limit that expenditure, but that such limitation was not in itself sufficient.

"Then we come to the Estimates for this year. Of course, the cost of some items will go up. That happens in any family if more children arrive or as they grow older. But in a family it is not an unanswerable reason for the *total* of expenditure to grow. If some things cost more, economies are needed elsewhere. Families cannot print banknotes, and Governments can only do so with danger to the economy.

"Many figures have been bandied about in recent days, and some of them are hard to recognize. As they were either referred to in the Cabinet or are not yet published, I do not propose to quote them. Let me say this, however. The figures which matter are the following : first, what we estimated we would spend this year ; second, the substantially larger sum we will have spent this year ; thirdly, what we plan to spend next year.

"At no time have I pressed my colleagues to reduce expenditure to last year's original estimate. What I said is : 'Take last year's estimate ; add to it the substantial supplementary sums which Parliament will be asked to vote because we spent more than we planned ; and then next year do not plan to spend more than that very large total.' I have, if you like, taken the measure of our failure this year as the baseline for attempting success next year. If open to criticism at all, it is that I have been too lax and not too strict.

"Various figures have been given. Some mention has been made of £50,000,000. I do not comment on that, but I say bluntly that I do not approve of the terms 'a mere £50,000,000,' 'mere chicken-feed.' In some circles there is a tendency to talk of £50,000,000 as though it were a triviality. That is an attitude of mind which is part of the evil of our times.

"Nor am I at all impressed by the argument that such sums are marginal in our affairs. The lesson must be learnt in this country, as it has to be learnt in every business, that it is the margin that matters. If it is on the right side, we are solvent ; if it is on the wrong side, we are in the red. Margins are not irrelevant but vital to stability. Finally, I would say that if £50,000,000 is the figure and is a triviality, could it not be found somewhere out of the £5,000,000,000 to keep us straight ?

"But let us leave aside the arithmetic. I have always said, and I repeated it in my letter to the Prime Minister, that I recognize that some combination of unpopular measures would have been necessary to achieve my aim. I stand by that ; I in no way flinch from it. Great aims are not achieved without pain and effort, and this is no exception.

"What could be done ? It is said by some that you must not touch the Welfare State, though some men in recent years must have seen drawbacks in benefits clawed back each year in a constantly depreciating currency. Nevertheless, it is said that if we touch it, it will automatically mean higher wage demands. I would say this at once. It is not the making of wage claims, but the printing of the money to grant them which feeds the wage-price spiral. The Welfare State covers a wide field, from family allowances to welfare milk, from the National Health Service to school meals. Powerful arguments can be adduced against touching any of it, but is it all sacrosanct ? Or, if it is to be sacrosanct, can we do all the other things we seek to do, or do them to the same extent ?

"Let us consider defence expenditure. We spend vastly on the conventional and unconventional field. We develop missiles and anti-missiles ; we develop conventional arms as well. At the same time we also want to press ahead with research and development for civil aviation. I recognize the importance of all these. I recognize the sincerity of those who wish to go forward with them. It means that between £200,000,000 and £250,000,000 year by year is being spent by the Ministry of Supply on military and civil projects. The costs of these projects climb year by year. Projects estimated at one figure are rapidly found to cost double, treble, or more. Projects which early on cost thousands rapidly soar into the millions class.

"Don't misunderstand me. Of course, tentative efforts are made to check it. Of course, a substantial cut in this field would hurt. Of course, it would mean stopping some projects already started or deferring work of value to the nation. But is all this to be regarded as sacrosanct ?

"Or again, it was said by the Minister of Defence in November that we want a volunteer Army, and for that purpose conditions of service must be improved. The political prizes of a volunteer Army are certainly great, and in the long run the economic prizes too. Opinions vary as to how far improvements in pay and allowances affect recruiting, but how much additional expenditure can we afford here ?

"I respect the view of those who say that heavy expenditure in all these things must have priority. I speak in no spirit of bitterness or recrimination. I do not pretend the reduction of any of the plans for any of these things would be painless or would not mean sacrifices. But if it is said that the Welfare State is sacrosanct and that you cannot touch that ; if it is said that you must make pay and conditions for the Forces more attractive and pay more for them ;

if at the same time the vast expenditure of the Ministry of Supply is not susceptible to any substantial reduction—then there is a residuary legatee. There is someone left at the end of the queue, and that someone is the pound sterling.

"Whatever others have said, I have put the pound sterling and the stability of prices first, not last. I could not change my policy upon that matter. It is just not true to say that over this vast field such reductions as are necessary in order to stand on this year's level of expenditure would have disastrous consequences. The Government's current account could have been held, and still could be held, at last year's high level of spending. I regarded it as a matter of principle to hold that line as the limit. I could not accept for the Government, in their own housekeeping, a standard of financial stringency different from that which I was seeking to impose, and was in fact imposing upon others.

"My colleagues would not agree, either upon the subject of containing next year's expenditure at a level no higher than this, or upon a broad pattern for containing it in the fields which I have mentioned.

"It is possible to be wrong on issues of this kind, but I am bound to say that it would be a remarkable thing if three men with backgrounds and approaches as different as myself, Enoch Powell, and Nigel Birch arrived at the same clear conclusion and were wrong at the same moment. At the end of the day, none of us had any doubts whatever as to where our clear duty lay. Every Treasury Minister was united in the action we should take. I would say now how notably I have been sustained in these difficult weeks by their unfailing and unflinching courage and good sense in the struggle in which we have been engaged. *The Times* put it simply and well: 'If ever there was an issue upon which the Treasury team should stand, it was this.'

"For my part, I have been much moved by the wealth of sympathy, understanding, and support which has flowed in to me from rich and poor, from employer and worker, from friends and strangers, in all walks of life.

"I recognize that different views can be honourably held about these matters, and I respect those who hold a different view from my own; but they are not small matters. They turn in the last resort upon a determination of the question where greatness lies. I am firmly convinced that true greatness does not lie in constantly attempting a range of projects in total beyond the resources at our command. Our greatness depends on demonstrating that we are masters in our own house, that we are in control of our own currency, that we can meet our liabilities, honour our debts, and sustain the value of our money.

"It is for this reason that I have taken the action that I did. It was a hard decision, but I believe a right one, and I stand before you as a man content. I do not know what the future may hold for me, but I thank God I found the strength to make the decision I did."

Mr. Thorneycroft was warmly applauded by his audience, who—without a single dissenting vote—passed a resolution congratulating him on the stand he had taken and expressing complete confidence in him.—(Times - Daily Telegraph)

A. AUSTRIA - SOVIET UNION.—Three-Year Trade Arrangements for 1958-60.

Trade arrangements for the three-year period 1958-60 were concluded between Austria and the Soviet Union on Oct. 24, 1957. They provided that the volume of Austro-Soviet trade, which amounted to $38,000,000 on either side in 1957, would be increased to $40,000,000 in 1958, $50,000,000 in 1959, and $60,000,000 in 1960.

A detailed list laid down mutual deliveries for 1958, whilst the lists for 1959 and 1960 only contained a general framework which could, however, be varied or supplemented. Provision was made for larger Soviet exports to Austria of coal, coke, iron-ore, wolfram, tin, cotton, asbestos, and chemicals, but for a reduction of grain and fodder exports to 100,000 tons in each year. New Austrian export items to the Soviet Union included tinplate, cables, chemicals, woollen tissues, leather footwear, insulation material, and certain machinery. Increased Austrian exports were also envisaged for rolled-iron, steel cables, chains, steel tubes, medical supplies and equipment, woollen yarns, leather goods, diesel shunting engines, and various machinery; in addition Austria will build two passenger ships for river navigation in the U.S.S.R.

The increase in Austro-Soviet trade exchanges, which in many cases doubled the volume of export items on both sides, implemented the intention of both countries to expand their mutual commerce as agreed at the time of M. Mikoyan's visit to Austria in April 1957. The new arrangements were concluded under the five-year Austro-Soviet trade agreement signed in 1955.—(Wiener Zeitung - Neue Zürcher Zeitung)

B. AUSTRALIA - ITALY. — Diplomatic Missions raised to Embassy Level.

It was announced in Canberra and Rome on Jan. 9 that the Australian and Italian Governments had agreed to raise their respective diplomatic missions in Rome and Canberra to embassy level.—(Australian News and Information Bureau)

C. OBITUARY. — Viscount Waverley.

Viscount Waverley (the Rt. Hon. Sir John Anderson), the eminent administrator and former Cabinet Minister, died on Jan. 3, 1958, aged 75.

A Scotsman by birth and descent, John Anderson was born at Eskbank (Midlothian) and was educated at George Watson's College, Edinburgh, and the Universities of Edinburgh and Leipzig, graduating in Arts at Edinburgh and in Science at Leipzig. For over 30 years he had a distinguished career in the Civil Service, his first important post being that of Secretary of the National Insurance Commission which was set up in 1912 to administer Lloyd George's National Insurance Act. For most of the First World War he was Secretary to the Ministry of Shipping, and shortly after the war he was appointed Chairman of the Board of Inland Revenue, being only 37 years of age at the time. In 1922 he became Permanent Under-Secretary of State at the Home Office.

Sir John Anderson (he had received the K.C.B. in 1919) was appointed Governor of Bengal in 1932 at a time of great political and economic unrest in that province, where terrorism was rife. An attempt had previously been made on the life of the retiring Governor (Sir Stanley Jackson) and in May 1934 Sir John Anderson narrowly escaped an attempt on his own life at Darjeeling. During the next four years, however, he succeeded to a large extent in restoring normal conditions in Bengal, his reforms including the creation of an industrial credit corporation and the establishment of well-equipped training camps at which political detainees were helped to rehabilitate themselves in small industries and handicrafts, with State assistance. When Sir John Anderson left Calcutta in 1937 the number of detainees had fallen by two-thirds, and his successor (Lord Brabourne) was able to end the detention system a few months later.

On returning to Britain Sir John was invited to stand as a National candidate for the Scottish Universities. He was elected to Parliament in February 1938 and continued to represent the Scottish Universities until the abolition of university representation in 1950. Appointed Lord Privy Seal by Mr. Neville Chamberlain in November 1938, he was given important responsibilities in connexion with Civil Defence problems—in particular, for shelter policy. He approached Mr. (later Sir) William Paterson, the Scottish engineer, and asked him to devise a form of shelter that could be erected in a householder's garden and produced in large numbers at minimum cost; Paterson's design was accepted and the "Anderson shelter" was in universal use throughout the air raids of the Second World War.

After the outbreak of war in 1939 Sir John Anderson was appointed Home Secretary and Minister of Home Security, in which capacity he had to deal with A.R.P., the problems of evacuation from the large cities, and the internment of aliens. In October 1940 Mr. Winston Churchill appointed him Lord President of the Council (with charge of secret work) and promoted him to the War Cabinet. In September 1943 Sir John Anderson became Chancellor of the Exchequer on the death of Sir Kingsley Wood, his Chancellorship being notable for the introduction of the pay-as-you-earn system (PAYE). As a member of the War Cabinet Sir John had general responsibility for scientific research bearing on the war, especially in regard to atomic energy, carried on by various committees. His services to science—in which he took a lifelong interest—were recognized in 1945 when he was elected a Fellow of the Royal Society.

In January 1952, after Mr. Churchill's return to power, Sir John Anderson was raised to the peerage, taking the title of Viscount Waverley. A month later he was appointed chairman of the Royal Commission on the Taxation of Profits and Incomes in succession to Lord Cohen, who had been made a Lord of Appeal in Ordinary. The Labour Party strongly protested against this appointment on the ground that Lord Waverley had shown in the 1945-50 Parliament that he held strong political views corresponding to those of the Conservative Party. Lord Waverley subsequently decided to resign the chairmanship of the Royal Commission after the Opposition had announced its intention of debating the matter in the House. In March 1953, however, he became chairman of the Inquiry Committee set up after the East Coast flood disaster, and a month later he was appointed chairman of the Government committee which was set up to devise a plan for transferring responsibility for atomic energy from the Ministry of Supply to a non-departmental organization.

Lord Waverley was chairman of the Port of London Authority from 1946 until his death, and had also been chairman of the trustees of Covent Garden Opera House since the same year.

The Order of Merit had been conferred on Lord Waverley barely a month before his death—see 15937 A.

D. INDIA.—Praja Socialist Leader enters Parliament.

Mr. Asoka Mehta, the Praja Socialist leader, was elected to the *Lok Sabha* in a by-election at Muzaffarpur held on Dec. 12. Mr. Mehta, who had been defeated in the general elections of February-March 1957, obtained a majority of 14,000 over Mr. K. P. Sinha (Communist), his nearest opponent. The by-election was caused by the death of Mr. Shyamanadan Sahaya, Vice-Chancellor of Bihar University.—(The Statesman, Calcutta)

A. INDIA. — Punjab. - The "Save Hindi" Agitation. - Establishment of Regional Committees.

The *Arya Samaj*, a Hindu religious and cultural organization, launched a civil disobedience campaign in the Punjab on June 10, 1957, as a protest against the regional formula adopted under the States Reorganization Act, and in support of its demands for securing "the rightful place for Hindi" in the educational and administrative fields. Though originally confined to Chandigarh (the State capital) the campaign spread to other areas from the end of July onwards.

The movement's main demands—which had been submitted to Mr. Nehru by a delegation led by Swami Atmananda, the leader of the *Arya Samaj*—were as follows: (1) There should be one language formula for the whole of the Punjab. (2) The medium of instruction in schools should be left entirely to the choice of parents. (3) There should be no compulsion over the teaching of either Hindi or Punjabi as a second language at any stage of education. (4) Hindi should replace English at all levels of administration. (5) All Government notifications should be issued in both Hindi and Punjabi. (6) Communications to the Government should be allowed to be submitted in either language, and the reply should be in the same language. (7) Official records at all levels should be kept in both the Devanagri and Gurmukhi scripts [in which Hindi and Punjabi are respectively written]. In a letter of June 13 to Swami Atmananda, Mr. Nehru pointed out that several of these demands had already been accepted as official policy; he deprecated the intervention of religious organizations in political controversies, observing that it could only lead to communal bitterness.

During the later phase of the campaign the *Jan Sangh* played an increasingly prominent part in the "Save Hindi" (*Hindi Raksha*) agitation, organizing mass demonstrations in its support. Sikh organizations retaliated with counter-demonstrations in support of Punjabi, and serious communal clashes were averted at Ambala, Ludhiana, Amritsar, and elsewhere only by the intervention of the police. Over 9,000 persons were arrested during the *Hindi Raksha* agitation and 144 were detained under the Preventive Detention Act; they included three former Congress Ministers—Professor Sher Singh, Mr. J. L. Narain, and Pandit Sri Ram Sharma—and seven other members of the State Assembly.

Throughout the agitation talks continued between the *Arya Samaj* and the Central and State Governments, Dr. Gopichand Bhargava being appointed a member of the Punjab Cabinet on Aug. 28 with responsibility for conducting the negotiations. [Dr. Bhargava was Chief Minister of the Punjab from 1947-51, except for a few months in 1949, but had taken no part in politics since his resignation—see 11577 B. His new appointment was in the first instance for six months only, as he was not a member of the State Legislature.] Following talks on Dec. 23-24 between Mr. G. S. Gupta (chairman of the Central Language Committee of the *Arya Samaj*), Pandit Pant (the Central Home Minister), and Mr. Dhebar (president of the National Congress), the Punjab Government ordered the unconditional release of all those arrested for participating in the agitation, except for one man who was charged with violence. In response to this "gesture of good will," Mr. Gupta ordered the suspension of the civil disobedience campaign on Dec. 27, 1957.

The two Regional Committees of the State Assembly envisaged in the regional formula were established in November by Presidential Order. The Committees consist of all the members of the State Assembly from the Punjabi- and Hindi-speaking regions respectively except the Chief Minister and the Speaker—the Punjabi Committee comprising 87 members and the Hindi Committee 65 members. It was originally envisaged that the chairman of each committee should be one of the State Ministers; the Presidential Order, however, provided that the posts should be thrown open to all members of the Committees, and that the two chairmen should enjoy ministerial status and should be entitled to attend Cabinet meetings. At the inaugural meetings, Seth Ram Nath (a former Deputy Minister of PEPSU) and Mr. Balwant Rai Tyal (a former Deputy Minister of the Punjab) were unanimously elected chairmen of the Punjabi and Hindi Committees respectively. The election of Mr. Nath (a Hindu) as chairman of the Punjabi Committee was regarded as a conciliatory gesture by the Sikh members of the Congress organization towards the Hindu community.—(The Statesman, Calcutta - The Hindu, Madras)

B. WESTERN GERMANY. — Influx of Refugees from Eastern Germany in 1957.

The West German authorities announced on Jan. 1 that 129,579 persons from Eastern Germany had entered the Federal Republic during 1957 and asked for political asylum. The number of refugees from Eastern Germany in the previous year was nearly 280,000.—(Frankfurter Allgemeine Zeitung)

(Prev. rep. 15416 C.)

C. UNITED STATES. — "Daily Worker" ceases Publication. - Reported Split in U.S. Communist Party.

The national executive committee of the U.S. Communist Party announced on Dec. 26 that it had decided to discontinue the publication of the *Daily Worker*, which had been the party's organ for the past 34 years.

The decision was taken at a secret meeting of the executive committee, and it was understood that all 20 members of the committee had voted to close down the paper with the sole exception of Mr. John Gates, the editor of the *Daily Worker*. According to the *New York Times*, those who voted to cease publication "were reported to have done so either because they opposed Mr. Gates's 'right-wing views,' which have been voiced in the paper, or because they felt Communist party finances were so depleted that continued support of the paper was impossible." Mr. Gates himself said that he intended to "fight for the paper's continued existence."

It was also understood that the U.S. Communist Party had been divided on the question of whether or not to endorse the 12-nation Communist declaration issued in Moscow [see page 15901]. The *New York Times* commented in this connexion: "The Gates faction has opposed the Moscow Declaration on the ground that endorsement would in effect reverse the decision of last February's Communist party convention. That convention voted to permit some criticism of the Soviet Union and declared that 'left sectarianism'—that is, an overtly rigid application of traditional Marxist-Leninist views—was the chief danger. The conflict over this issue, together with Mr. Gates's decision to try to continue publishing the *Daily Worker*, appears to indicate that for all practical purposes the Communist party is now very badly split."

The average circulation of the *Daily Worker* in October last was only 5,574, a decline of 2,000 on the figure for 1956. Its peak circulation was about 20,000 in 1938.—(New York Times)

(Prev. rep. U.S. Communist Party, 15740 A.)

D. KENYA. — Outlawing of Secret Society.

It was announced in Nairobi on Jan. 15 that the Kenya Government had outlawed a secret Kikuyu society known as the *Kiama Kia Muingi* (Party of the People), whose aims were stated to be similar to those of the Mau Mau. A Government spokesman said that 85 leaders and members of the society had been arrested under the emergency regulations; that 25 local committees had been uncovered in the Kiambu area, on the outskirts of Nairobi; and that the maximum penalty for membership of the society was seven years' imprisonment, the leaders being liable to 14 years.

It was explained that the *Kiama Kia Muingi* had its origins in the "passive" wing of Mau Mau, and first came to notice when its members were feeding and assisting terrorists in the Embu district. It died out after the detention of the terrorist leaders but subsequently reappeared in Kiambu, where it began to exercise influence through the administration of ritual oaths and the formation of local committees on the Mau Mau pattern. The aims of the society were similar to those of the proscribed Kikuyu Central Association and the Mau Mau—to undermine and subvert established authority, to drive the Europeans out of Kenya, and to foment racial hatred. While there was no indication that the society intended to resort to violence, the Government were mindful that this had been equally true of Mau Mau almost up to the time it was proscribed.

The District Commissioner for Kiambu (Mr. D. J. Penwill) stated on Jan. 16 that all the ringleaders of the *Kiama Kia Muingi* were believed to have been arrested. About half of the 85 persons taken into custody had been released "with a strict warning."—(Times - Manchester Guardian) **(15761 A.)**

E. UNITED KINGDOM. — New Junior Ministers.

The following junior ministerial appointments were announced on Jan. 17: (*a*) Mr. Robert Allan as Parliamentary and Financial Secretary to the Admiralty in place of Mr. Christopher Soames, the new Secretary of State for War; (*b*) Mr. David Renton, Q.C., as Joint Parliamentary Under-Secretary of State, Home Office, *vice* Mr. J. E. Simon, Q.C., the new Financial Secretary to the Treasury; and (*c*) Sir Ian Horobin as Parliamentary Secretary to the Ministry of Power in succession to Mr. Renton.

Mr. Allan (43) became Parliamentary Private Secretary to Sir Anthony Eden in December 1955 and remained P.P.S. to Mr. Macmillan after Sir Anthony's resignation; he is Conservative M.P. for South Paddington. **Mr. Renton** (49), National Liberal and Conservative M.P. for Huntingdonshire, had been Parliamentary Secretary to the Ministry of Fuel and Power (later renamed the Ministry of Power) since 1955. **Sir Ian Horobin** (58), Conservative M.P. for Oldham East, had not hitherto held ministerial office; a prominent back-bencher, he had frequently urged the importance of limiting Government expenditure and of relating wage increases to greater productivity.

The three junior Ministers will all draw a salary of £2,500 a year, plus £750 Parliamentary expenses allowance.
(Times - Daily Telegraph) **(Prev. rep. 15939 A.)**

JANUARY 18—25, 1958

A. NORTH ATLANTIC TREATY ORGANIZATION. — Paris Meeting of Heads of Governments. - Agreement on Closer Political, Defence, Economic and Scientific Co-operation between NATO Countries. - Reaffirmation of Western Disarmament Proposals. - Atomic Stockpiles and Ballistic Missiles for NATO Collective Defence.

The " Heads of Governments " meeting of the North Atlantic Council was held in Paris at the Palais de Chaillot from Dec. 16-19, 1957. The most important NATO conference since the formation of the Organization, it was also the biggest top-level international conference to be held in the French capital since the Versailles Peace Conference of 1919.

The U.S. delegation was headed by President Eisenhower, and the delegations of all the other NATO countries (except Portugal) by their Prime Ministers. In addition, all the Foreign and Defence Ministers of the NATO countries participated, as well as M. Spaak, the Secretary-General of NATO. The leaders of the 15 national delegations were : *Belgium*—M. Achille Van Acker ; *Canada*—Mr. John G. Diefenbaker ; *Denmark*—Hr. Hans Christian Hansen ; *France*—M. Félix Gaillard ; *German Federal Republic*—Dr. Konrad Adenauer ; *Greece*—M. Constantine Karamanlis ; *Iceland*—Hr. Herman Jonasson ; *Italy*—Signor Adone Zoli ; *Luxemburg*—M. Joseph Bech ; *Netherlands*—Dr. Willem Drees ; *Norway*—Hr. Einar Gerhardsen ; *Portugal*—Senhor Marcelo Caetano (Minister for the Presidency, representing the Portuguese Prime Minister, Dr. Salazar) ; *Turkey*—M. Adnan Menderes ; *United Kingdom*—Mr. Harold Macmillan ; *United States*—President Dwight D. Eisenhower.

President Eisenhower's doctors had announced on Dec. 10 that they were "unanimously agreed that the President's recovery [from his cerebral attack] is such that it permits him to attend the Paris meeting." The medical bulletin said that the President was " in excellent physical condition " and " his usual alert self," and that he had discussed the Paris conference " in detail and with enthusiasm."

Mr. Adlai Stevenson, who had acted as a consultant in shaping the Administration's programme for the NATO meeting (see 15879 A), declined an invitation from President Eisenhower to attend the Paris conference. In a statement on Dec. 3, Mr. Stevenson explained that his membership of the U.S. delegation would put him into a position " without authority " and would necessarily identify him with " decisions with which I might not always agree and which I could not publicly oppose."

President Eisenhower flew to Paris on Dec. 14 in the presidential plane *Columbine*, being welcomed at the airport by President Coty, M. Gaillard, General Norstad (the NATO Supreme Commander), and M. Spaak. Before the conference opened on Dec. 16, a number of private meetings was held among the statesmen assembled in Paris—including a joint meeting between Mr. Macmillan, M. Gaillard and Dr. Adenauer, a separate meeting between the French Prime Minister and the German Federal Chancellor, and discussions between President Eisenhower and the British and French Prime Ministers.

The North Atlantic Council meeting was presided over by the Prime Minister of Luxemburg (M. Joseph Bech) as *président d'honneur*, in accordance with the principle of alphabetical rotation of chairmanship by countries. [The chairmanship of the NATO Council rotates on this basis from year to year, Italy having held the chairmanship at the last Council meeting in December 1956.] The conference was held partly in open session, at which important statements were made by all the Heads of Governments, and partly in closed session, including meetings of the Foreign Ministers and the Defence Ministers.

Statements by Heads of Governments.

Summaries are given below of the principal statements and declarations made to the North Atlantic Council by the Heads of Governments, and also by the NATO Secretary-General, M. Spaak :

Statement by President Eisenhower.

The U.S. President spoke as follows : " This meeting is unique in NATO history. For the first time it is attended by Heads of Governments. We meet, not under a chilling fear that each nation among us, acting separately and alone, might fail to match the aggressive power that could be brought against any. That was once true. We meet, not in any dreadful knowledge that our cities are again scarred by conflict, our economies strained, our peoples worn from a war against totalitarianism. Again, that was once true. Most certainly we do not meet in a mood of nationalistic self-assertion, pursuing selfish interests at the expense of our sister-nations. That has never been true of NATO.

" We are here to re-dedicate ourselves to the task of dispelling the shadows that are being cast upon the free world ; to take stock of our great assets—in men, minds, and materials ; to find ways and means to apply our undoubted strengths to the building of an ample and safer home for mankind here on earth.

" This is a time for greatness. We pray for greatness in courage of will to explore every path of common enterprise that may advance the cause of justice and freedom ; for greatness in sympathy and comradeship that we may labour together to end the mutual differences that hamper our forward march within a mutual destiny ; for greatness in the spirit of self-sacrifice, so that we may forsake lesser objectives and interests to devote ourselves wholly to the well-being of all of us. We pray for greatness of wisdom and faith that will create in all of us the resolve that whatever measures we take will be measures for peace.

" By peace I do not mean the barren concept of a world where open war is for a time put off because the competitive war machines which humans build tend mutually to neutralize the terrors they create. Nor do I mean an uneasy absence of strife bought at the price of cowardly surrender of principle. We cannot have peace and ignore righteous aspirations and noble heritages. The peace we seek is an expanding state of justice and understanding—a peace within which men and women can freely exercise their inalienable rights to life, liberty, and the pursuit of happiness, in which mankind can produce freely, trade freely, travel freely, think freely, pray freely . . .

" NATO was born nearly 10 years ago. Eight European nations had then come under Soviet domination, and there was clear danger that the rest of Europe might, nation by nation, fall before the powerful military and political influence of the Soviet Union. NATO has proved itself as an agency of peace. Since it came into being no further nation of Europe has been lost to Communist aggression. Behind the barrier of NATO's deterrent power, conventional and nuclear, the peoples of the West have made great advances.

" Here on the Continent of Europe there has been achieved a progress toward unity—the Coal and Steel Community, Euratom, the Common Market. Thus is justified the vision of statesmen, and a new stimulus is provided to vast creative forces long enfeebled by irrational divisions . . .

" We can take satisfaction from the past, but no complacency in the present. The Soviet State daily increases its military and economic power, and its rulers make clear their purpose to use that power to dominate the world. To this end the Soviet system imposes upon the great mass of its workers a harsh discipline. Their lot is of forced labour and production, which is as abhorrent as it is menacing, for it provides the despotic State with vast resources produced out of serfdom. Thus there is emphasized the production of new weapons, including atomic warheads and rocketry. The Communists likewise have enlarged their industrial capacity. They challenge us to a world contest in the economic field, seeking by economic penetration to gain the mastery of still more human and material resources. These are some of the problems that confront us. The presence here of Heads of Governments proves that we recognize the magnitude of the challenge.

" At a later meeting this Council will consider specific proposals for raising the level of our collective effort. But I repeat that whatever measures we take will be measures for peace. This peace we seek will not be had for nothing. Indeed, its price will be high. But it need not dismay us. Our free peoples possess ample resources wherewith to meet every threat. The only question is : Will we do so ? Will we, in freedom, pay the price necessary to preserve freedom ?

" Let us glance at our resources. The 15 NATO countries comprise nearly 500 million people. These people have a *per capita* productivity about three times that of the Soviet Union. Our scientists and technicians were the inventors of what now revolutionizes the arts both of war and peace. We possess what is today the most powerful military establishment in the world. These are some of our material assets. Even more important are the political and moral assets that are national heritages. We have demonstrated a will for world disarmament and the peace that all men want.

" Following World War II, the free nations, without awaiting disarmament agreements, voluntarily disarmed themselves. When the West possessed an atomic monopoly we offered to dedicate it to international control, so that the fearsome power could never be used for war. We conceived and developed the concept of 'atoms for peace.' The International Atomic Energy Agency now functioning at Vienna is a product of our imagination and persistence. The Western nations proposed 'open skies' so that no nation could mount a massive surprise attack against another. At London last summer we proposed that there should be an end to the manufacture of fissionable material for weapons purposes, that therefore nuclear weapons should no longer be tested, and that existing stockpiles should be reduced by transfers to peaceful purposes.

" We have demonstrated a will for the spreading of the blessings of liberty. Within the last 15 years our nations have freely granted political independence to 20 countries, with populations totalling 800 million peoples. Within our societies we manifest, so that all can see, the good fruits of freedom. Those fruits do not consist of materialistic monuments, which despots have always been able to exhibit. They consist of providing the simple things all men want—the opportunity to think and worship as their conscience and reason dictate, to live in their homes without fear, to work in congenial tasks of their own choice, to enjoy the fruits of their labour. These are the most precious manifestations of freedom, and we have the power to defend and spread that freedom. Freedom has not failed us. Surely we shall not fail freedom.

"We shall be successful. But the task will not be easy or short. Accomplishment will prove to be a journey, not a destination. We, who inherit and share the humane and religious culture of Europe, must examine our collective conscience to determine if we are doing our best to meet the grave threat to our free institutions.

"I believe that we must rid ourselves of certain false habits of thought, of which we have all been more or less guilty. Among our misconceptions has been the belief that our free system was inherently more productive in all fields than the totalitarian system. Another has been that time was always on our side, irrespective of what we do with that time. Another has been that our nations, merely because they are sovereign, can each lead a separate, selfish, national life, without co-ordination of planning and effort. Another is the assumption that the triumph of freedom over despotism is inevitable. As a countryman of mine once observed: 'It takes a lot of hard work and sacrifice by a lot of people to bring about the inevitable.' . . .

"We are moving into an era in which vast physical forces cast a pall over our world. I believe our NATO Governments stand ready to concert our efforts with each other—and with other nations including, of course, the Soviet Union if it were willing—to bring these forces under rational control in the common interest of all humanity. Until that can be done, we must continue to create and sustain within the free world the necessary strength to make certain of the common security. And all of us must have the assurance that that strength will be used to sustain peace and freedom.

"We are in a fast-running current of the great stream of history. Heroic efforts will be needed to steer the world towards true peace. This is a high endeavour. But it is one which the free nations of the world can accomplish. We of the Atlantic community are not alone. In other parts of the world many free nations have banded together in the exercise of their inherent right to collective security. Other free nations, relying on individual rather than collective security efforts, nevertheless share our purpose and our goals of freedom. A special responsibility does, however, rest upon the Atlantic community. Within our lands freedom first had its birth. It still waxes strong.

"The members of our community need to feel an increasing responsibility to help other free peoples to attain for themselves relief from what has been for many the age-old blight of direst poverty. We have, as I have recalled, been parties to the grant of political liberty to hundreds of millions of people. But that bestowal could be a barren gift, and indeed one which could recoil against us, unless ways are found to help less developed countries to achieve an increasing welfare. All of us have a vital stake in this sense of increasing sacrifice. None of us must shirk any needed sacrifice to make it possible.

"The forces arrayed against us are formidable, but not irresistible. The captive peoples of Eastern Europe have made it evident that patriotism survives, and that they continue to live in the hope of recovering their proud and honourable traditions of national independence. The Kremlin has publicly recognized the 'contradictions' between the desires of the workers for better standards of living and the utilization by the State of colossal sums for military and capital developments. The current Soviet Five-Year Plan has had to be abandoned. There is in process a decentralization of industry which will inevitably bring with it a decentralization of power and of opinion.

"With the passage of time, despotic government historically has suffered internal decay before it is apparent on the surface. Beneath a hard governmental exterior, love of freedom among all peoples still persists. It is a force that has never been indefinitely suppressed. The industrial plans of the Soviet rulers require an ever-increasing number of finely trained minds. Such minds cannot be indefinitely subjected to thought-control, and to conformity, by the Communist or any other party . . .

"There lies before the free nations a clear possibility of peaceful triumph. There is a noble strategy of victory—not victory over any peoples, but victory for all peoples. This is no reason for complacency; it is a reason why we should confidently and hopefully do what is required to carry out that strategy. I have known the comradeship of men in arms from many nations joined in the defence of freedom. The sense of sharing moments of crisis and decision is a moving and lasting one. Too often those moments come only in time of war. It would indeed be a tragedy if we could not, in waging peace, share the joy of common decision, common effort and common sacrifice. There is no task so difficult, yet so imperative and so honourable. It is in that spirit that we have come here so that out of the reconciling and joining of our wills we shall renew our strength and press on to that peace, in freedom, which is our rightful heritage."

Statement by Mr. Macmillan.

The British Prime Minister emphasized that the object of the NATO alliance was "to prevent and avoid war, not to wage war." He added: "One must go further. It is to seek in the future a return to the objective of something like peaceful co-existence; and in the far future—for we must look to the far future for the sake of our children and grand-children—real peace. But it must be a peace based on justice."

Continuing, Mr. Macmillan said that the dangers confronting the NATO alliance were fourfold: (1) the military threat—"a serious one"; (2) the "economic pressure which is exerted against us in NATO and against other countries"; (3) political subversion; and (4) "what I would call—not the breaking of the spirit of our peoples, I do not fear that will happen—but a kind of wearying of the spirit because the struggle goes on so long, year after year, and the peoples do not see the end of it."

After stressing the importance of the principle of inter-dependence, Mr. Macmillan continued: "It is clear that we are moving into a period when, at any rate in certain large areas of the world, purely separate concepts of defence are no longer viable. In many fields of activity as in the operation of early warning systems, for instance this has already been practically recognized." As an example of this co-operation, Mr. Macmillan instanced the Canadian-U.S. air defence scheme, involving a joint command and joint agreement on the common efforts of both countries.

Mr. Macmillan went on: "Perhaps the greatest menace, or one of the greatest, that we have to face in the military field is the enormous fleet of Russian submarines [see 15980 A]. We believe the British contribution to the naval forces of NATO would perhaps be most effective if it were concentrated more on anti-submarine warfare and less on other things such as the offensive strike role, which our American friends are more able to perform."

After referring to the "immense importance" of Mr. Dulles's statement on the pooling of resources, research, development and production in the NATO countries [see below] Mr. Macmillan spoke, in conclusion, of the "psychological aspect" of the international situation. He said in this connexion: "In the psychological warfare —for it is that between us and the Russians, I would make no concession to our safety, yet I would go to any length in discussion, debate, or argument that would prove our sincerity. So when we have to consider our answer to the prolonged and widespread correspondence which we have received from Mr. Bulganin [see 15974 A] I think we must not be unwilling to enter into discussions, debates, and re-statements of our position, to fortify any of those who may be weakened and to prove to them and to ourselves that we have done all that honourable men could do to seek for peace.

"If we were to succeed in improving the situation, we should indeed have achieved something. If we fail, we will have given greater strength to the measures that we have jointly to take. Therefore our aim is not to fight war, but to hold the position. In Sir Winston Churchill's words, 'We arm to parley.' We shall not parley successfully unless we arm effectively. We must therefore reaffirm our strength and not be afraid of the implications of modern weapons. We live under their protection. We reaffirm that an attack on one is an attack on all . . ."

Statement by M. Gaillard.

The French Prime Minister said that the Atlantic Pact, "circumscribed geographically, immobile militarily, and restricted diplomatically," was in danger of becoming out of date "as a system of fixed fortifications in a war of movement." It was therefore necessary to envisage "a certain renovation of the Pact in order that it may respond in a more satisfactory manner to the new political and military problems which will arise for us."

After saying that "Fortress Europe has been outflanked at the very moment when, for the first time, the United States itself is directly threatened," M. Gaillard declared: "Our first duty is to reaffirm with greater emphasis than ever our confidence in this alliance, and our unanimous determination to employ it in the event of an aggression against any one of us. This affirmation, however, would be in vain if no concrete measures were taken to reinforce the Pact, to give it fresh life and to make it respond to the problems of today rather than those which existed eight years ago . . ."

M. Gaillard went on to urge (1) closer co-operation between member-countries in the field of science and armaments, "which should give NATO the political cohesion without which its other efforts would be condemned to sterility"; and (2) better co-operation in the economic field, with special consideration to "the role which the great resources of its members can play in non-NATO regions." He declared in this connexion: "The purchases made by the Soviet Union in Asia and Africa play only a small role in the economy of those regions, while ours play a capital part. Yet the Soviet Union's political influence in those regions is out of all proportion to her economic power."

M. Gaillard continued: "Without changing any of the clauses of the treaty, our policies should be progressively harmonized, at least in areas where experience has shown that the absence of a common attitude gravely imperils the vital interests of some of the NATO members and threatens the solidarity that should reign between us . . . In the Near East we must regain positions which are on the point of being lost. A great victory can be won in Africa if the unity of our policies promotes the constructive idea of a union between Europe and Africa. Far from taking no interest in this question, the Atlantic Pact ought on the contrary to serve as the framework for our common action. That is why the French Government proposes that if, in any part of the world not covered by the pact, the interests of member-countries diverge or are opposed, a procedure of preliminary consultation should be instituted . . ."

Statement by Dr. Adenauer.

The German Federal Chancellor commented that "nothing said or done in the Eastern bloc in the past few months justifies any hope on our part that the threat has disappeared." He therefore welcomed "the principle of inter-dependence expressed in the Anglo-American declaration of Oct. 25" [see 15823 A]. Dr. Adenauer expressed the opinion that the North Atlantic Council, possibly assisted by experts, could make "constructive proposals on our economic relations with the satellite area as a means to overcome the partition of Europe, or to tighten the economic ties between the free world and the nations of the Middle East." He added: "I would also mention the problem of the reunification of Germany; it represents, after all, the primary element of tension in our world, in the solution of which we intend to co-operate according to the agreements concluded between us . . ."

As regards the correspondence initiated by the Soviet Prime Minister, Dr. Adenauer said that he would not object to diplomatic contacts with the U.S.S.R. to find out what Marshal Bulganin's "vague" letters to the NATO leaders really meant. He (Dr. Adenauer) recognized the "moderate tone" of Marshal Bulganin's correspondence, but the Eastern bloc still adhered to the ultimate aim of "Communist world revolution." Moreover, it was difficult to believe in the relaxation of tension in view of Russia's actions in the Middle East.

"As long as our efforts to create a viable order of peace fail to make any practical progress," Dr. Adenauer declared, "and as long as the threat from the East persists, the alliance must organize its military strength in such a manner that it can meet any aggression at any time. For this purpose the alliance as a whole must be equipped with advanced weapons equalling those of our potential enemy."

Statement by Signor Zoli.

After emphasizing that his Government strongly desired general and controlled disarmament, the Italian Prime Minister declared that the "present intransigence" of the U.S.S.R. made it essential for the NATO States "to re-establish the balance of military forces in their own favour." To this end he urged (1) that "modern arms" be placed at the disposal of members of the alliance, (2) greater integration between the armed forces of NATO countries; and (3) close collaboration in the fields of scientific research and the production of modern weapons. Signor Zoli also stressed the need to give NATO political consultations a "preventive and permanent character" so as to co-ordinate political and economic co-operation between member-countries. Like M. Gaillard, he dwelt on the importance of relations with non-NATO regions and, in particular, with Latin America.

Statement by M. Van Acker.

The Belgian Prime Minister said that one of NATO's primary objectives should be "to regain from totalitarianism, in patience and in peace, that which it has seized in Europe by force." To this end it was essential to formulate a common Western policy *vis-à-vis* the countries of the Eastern bloc, to conduct this policy "firmly and resolutely," and to promote "all concrete initiatives, contacts and exchanges of every sort with the peoples of Eastern Europe." These peoples, like the peoples of Asia and Africa, should see NATO "not only as an organization of armies and armaments but as a truly great world force for peace and liberation."

Statement by Dr. Drees.

The Prime Minister of the Netherlands said that the most dangerous aspect of the Soviet threat was the indirect methods of subversion carried out in a number of countries, with a view to weakening the Western nations and poisoning their relations with the nations of Asia and Africa. In this connexion he drew attention to the methods employed by Indonesia against Dutch nationals and economic enterprises [see 15931 A], and to the support which the Russian and Chinese Communists had expressed for Indonesia's actions. Dr. Drees called for a common Western policy in face of such developments, and also for a common policy in the Near East which would assure security both to Israel and the Arab States.

Statement by Hr. Gerhardsen.

The Norwegian Prime Minister recalled that "ever since the foundation of NATO it has been the policy of the Norwegian Government not to admit foreign forces on our territory except in case of attack or when threatened by attack." He continued: "We see no reason to change this policy. We have, moreover, no plans to let atomic stockpiles be established on Norwegian territory, or to construct launching sites for intermediate-range ballistic missiles . . . On the question of establishing such sites, it is our view that the right course would be to postpone the decision . . . The time which will in any case elapse before existing plans can be implemented could be used to examine the possibilities of renewed negotiations with the Soviet Union on disarmament."

Hr. Gerhardsen urged that special attention be paid to the proposal for an "atom-free" zone in Central Europe, and spoke in favour of "the idea of an area in Europe where there would be a thinning-out of military forces so as to reduce tension in our part of the world." He urged also that the disarmament negotiations should be continued in the United Nations and, if necessary, through direct diplomatic contacts between the U.S.S.R. and the United States.

Statement by Hr. Hansen.

The Prime Minister of Denmark fully associated his Government with Hr. Gerhardsen's statement. He recalled that Denmark, like Norway, had made it clear that she would not admit foreign troops on her territory unless she were attacked or threatened with attack, and that she would not allow atomic stockpiles or missile bases on Danish territory. He urged that "serious consideration" be given to the Norwegian proposal that a final decision on intermediate-range missile sites should be deferred "so as to leave us time to probe the possibilities of disarmament."

Hr. Hansen declared: "It is of decisive importance that NATO should build up its military position in such a way as to make it clear to everybody that NATO's military forces serve two purposes only—to deter aggression and, if necessary, to defend our countries and our liberty; and to retain the possibility of negotiations having as their ultimate aim the relaxation of tension, disarmament, and understanding between East and West . . ."

Statement by M. Menderes.

The Turkish Prime Minister spoke as follows: "For the past two years we have seen the Soviet Union concentrating its actions on the Middle East, after lengthy preparations. As a result of these actions, Soviet Russia took over Syria and established close co-operation with Egypt. These actions in the Middle East are only a beginning. The real objective is undoubtedly Europe, for it is Western Europe which constitutes the only real resistance front against the Russian designs for domination. The conquest of the Middle East by Russia—even without armed intervention—after establishing herself in Syria would be extremely easy. With the fall of the Middle East, North Africa would be in danger and the Mediterranean would become a Russian field of action. Thus the Soviet Union would have come close to its goal of encircling Europe.

Referring to the situation in Syria, M. Menderes said: "If today a Communist regime has not been fully established in Syria, and if that country has not been turned into a 'classical' or typical satellite, it is only because of a definite tactical purpose. The communization and satellization of Syria would result in the stiffening of resistance in other countries earmarked for conquest and, consequently, would delay the realization of the desired aim. What Russia really desires is to take over the Middle East with the least trouble and without any intervention . . ."

After stressing that "acceptance of the Syrian *fait accompli*" would lead to the encirclement of Turkey and endanger Iraq, Jordan, the Lebanon, Saudi Arabia, and even Persia, M. Menderes urged the necessity for "some kind of relationship between NATO and the Baghdad Pact." He went on: "It would be a mistake to believe that the Moslem countries possess a strong capacity for resistance to Communist influence, and it would be wrong to rely on this . . . It is necessary to recognize that we are faced with full-scale aggression. We should not accept the situation in Syria as a *fait accompli*, and we must seek measures to deal with it . . ."

M. Menderes said that it was necessary that both intermediate-range missiles and atomic weapons should be based "in as great numbers as possible in all NATO countries which can use them in an effective and satisfactory manner."

Statement by Mr. Diefenbaker.

The Canadian Prime Minister's speech was not made textually available to the Press, although a late briefing by the Canadian delegation set forth its leading ideas. This stated that Mr. Diefenbaker had said that the Soviet proposals for a summit meeting "must be measured in the light of the earlier refusal by the U.S.S.R. to participate further in the U.N. Disarmament Commission," though the West "must continue to demonstrate a willingness to negotiate with the Soviet Union." Mr. Diefenbaker had also urged the creation of a NATO "Food Bank" whereby member-countries could make their food surpluses available to under-developed areas. In addition, he had called for increased scientific co-operation between NATO countries, and had expressed the belief that much could be done to "further understanding between Russia and the West in the spheres of human, scientific and cultural relations."

Statement by M. Karamanlis.

The Greek Prime Minister regretted that the Cyprus question had not been solved "in accordance with the principles of the alliance," but at the same time emphasized that "the bitterness felt by Greece on this matter has not shaken her attachment to the Atlantic Pact."

Statement by Hr. Jonasson.

The Icelandic Prime Minister said that his country, though possessing no military forces of her own, attached "very great importance" to the military strength of NATO. His Government believed that the supply of modern weapons to the national armies would be in the interests of all member-countries, including Iceland.

Statement by M. Spaak.

The Secretary-General of NATO spoke as follows: "If I may summarize what I consider should be our frame of mind, I should put it in a few words: 'Neither provocation nor fear.' It is high time for the Western world to recover its composure and to reassert with quiet conviction its strength and the justice of its cause. I should like us, without threatening anyone, and while making an honest attempt to understand all points of view, to accept whatever is reasonable among the proposals of those with whom, through force of circumstances, we are obliged to hold discussions. I should like us to present the picture of an Assembly which is sure of itself, whose intentions are upright, which has no reason to offer excuses, but which is determined to protect and safeguard not only territories and peoples, but also a way of life, as well as ethical and political principles. Let us repeat that this alliance was imposed on us by events, although when I say 'events' I think 'the evil political policy of a great country' would be a more accurate expression . . ."

Repudiating any idea of a "crisis" in NATO, M. Spaak declared: "Our adversaries proclaim far and wide that we are not always in complete agreement on all problems. Why should we deny this? To do so would be evidence that our alliance is not that of 15 free countries enjoying equal rights. The day when there are no longer any discussions between us will be the day when, having accepted one Government as leader, the other Governments will be no more than obedient, subdued satellites. Should that day ever arrive, one of the most important reasons for the existence of our alliance will have ceased to be.

"Of what importance, however, are these divergencies when weighed against our agreement on basic issues? It might be possible to discover three or four important problems to which our reactions are not unanimous. I shall go even further and admit that there are

three or four problems which are the subject of serious discussions among us. But I also assert that in no instance is it impossible to reach temporary agreement and, in the not very distant future, identical views of a positive character.

"How different from the way things are done on the Communist side! The Soviet armoured cars patrolling the streets of Budapest have enabled us to realize the cost, in that part of the world, of not toeing the political line of the U.S.S.R. Is that the kind of unity that some would welcome?

"One of the tasks of this conference will be to review the world political situation. We shall be forced to the conclusion, I am sure, that the most important event of the last few months was the rejection by the U.S.S.R. of the disarmament proposals of the West. Their value and significance was confirmed in the United Nations by a majority vote of more than 50 countries . . .

"Rebuffed, disappointed in our attempts at disarmament, can we afford to remain unperturbed and inactive, knowing that the Soviets are producing the whole range of guided missiles which can, of course, be fitted with atomic warheads? Can we give our agreement to the policy clearly suggested in the recent letters of Mr. Bulganin—a policy which, in effect is based on a claim by the U.S.S.R. to a monopoly in Europe of nuclear weapons, and which would have us accept the idea that our armies would be definitely inferior to those of a potential enemy and, therefore, destined to defeat in the event of a war? Such a policy can only spring from fear, and lead from fear to discouragement and from discouragement to neutralism.

"If Europe reacted in the manner counselled and hoped for by Mr. Bulganin, the Communist doctrine of the inevitable decadence of the West would be borne out by the facts, and thus would be closed a chapter of world history of which we are justifiably proud."

After stressing that the forces of the West "must be equipped as well as it is possible to equip them," M. Spaak concluded: "We must never give way to discouragement and never despair. It can surely not be impossible, stretching to the full our desire for understanding and conciliation, to prove by a concrete offer that whenever an opportunity arises for relaxing international tensions, we shall eagerly seize upon it."

Meetings of Foreign Ministers.

The Foreign Ministers of the 15 NATO countries met in closed session during the conference to discuss a number of important questions, including (1) disarmament; (2) German reunification; (3) the Middle East; (4) relations between NATO and other collective security organizations such as the Baghdad Pact, SEATO, and the Organization of American States; (5) policy with regard to Africa; (6) policy with regard to the under-developed countries; (7) the correspondence initiated by Marshal Bulganin; and (8) improvements in the procedure for joint consultation between the NATO countries.

As regards (4), it was understood that the Foreign Ministers had discussed (*a*) suggestions for closer association between NATO and the Organization of American States which had been made by President Prado of Peru in a message to the North Atlantic Council; (*b*) suggestions for closer association with SEATO, put forward by the Philippines; and (*c*) proposals for closer association with the Baghdad Pact as put forward by the Turkish Prime Minister in his speech to the North Atlantic Council [see above].

With regard to (5), it was stated in *Le Monde* that M. Pineau had "presented the French view with regard to the Maghreb and Black Africa" and had asked for recognition of "the pre-eminence of French interests in North Africa."

The Foreign Ministers appointed a committee consisting of the Foreign Ministers of Great Britain (Mr. Selwyn Lloyd), France (M. Pineau), Belgium (M. Larock), and Canada (Dr. Smith), together with M. Spaak, to draft the final communiqué of the conference.

The NATO Communiqué.

A communiqué, the text of which is given below under cross-headings, was issued on Dec. 19 at the end of the conference. It consisted of a Declaration of Principles and statements on the international situation, the working of the alliance, disarmament, NATO defence, scientific and technical co-operation, and economic co-operation.

Declaration of Principles.

"We, the representatives of 15 nations of the North Atlantic alliance, believing in the sanctity of those human rights which are guaranteed to all men of free nations by their constitutions, laws and customs, re-dedicate ourselves and our nations to the principles and purposes of the North Atlantic Treaty.

"This treaty has been in effect for nearly nine years. It was founded to protect the right of our peoples to live in peace and freedom under governments of their own choice. It has succeeded in protecting this right. Building on our experience, and confident in the success already obtained, we have agreed together upon means to give added strength to our alliance.

"At the end of the Second World War, the armies of the West were largely disbanded. The Soviet Union did not demobilize. Its expansionist policy impelled us to establish our treaty and to build up our armed forces.

"We are an organization of free countries. We have learned to live and work together in the firm conviction that our fundamental unity and our combined strength are indispensable to our own security and to the peace of the world.

"The meaning of our alliance is clear. We have given a solemn guarantee, each to the other, to regard an attack upon one as an attack upon all, to be resisted with all the forces at our command. Faithful to the Charter of the United Nations, we reaffirm that our alliance will never be used for aggressive purposes. We are always ready to settle international problems by negotiation, taking into account the legitimate interests of all. We seek an end to world tension, and intend to promote peace, economic prosperity and social progress throughout the world.

"We continue to stand firmly for comprehensive and controlled disarmament, which we believe can be reached by stages. In spite of disappointments, we remain ready to discuss any reasonable proposal to reach this goal and to lay a solid foundation for a durable peace. This is the only way to dispel the anxieties arising from the armaments race.

"The free world faces the mounting challenge of international Communism backed by Soviet power. Only last month in Moscow the Communist rulers again gave clear warning of their determination to press on to domination over the whole world, if possible by subversion, if necessary by violence [see page 15901]. Within the North Atlantic Treaty there is no place for the concept of world domination. Firmly believing in peaceful change through democratic means, cherishing the character of our peoples, and vigilant to safeguard their freedom, we will never yield to such a threat.

"For the entire world it is both a tragedy and a great danger that the peoples under international Communist rule their national independence, human liberties, and standard of living, as well as their scientific and technological achievements have been sacrificed to the purposes of world domination and military power. The suppression of their liberty will not last forever. Already in these countries there is evidence of the growing desire for intellectual and economic freedom. If the free nations are steadfast, the totalitarian menace that now confronts them will eventually recede.

"Established to defend the peace, our alliance will also enable us to reach our objectives of economic and social progress. For this purpose we have agreed to co-operate closely to enable us to carry the necessary burden of defence without sacrificing the individual liberties or the welfare of our peoples. We shall reach this goal only by recognizing our inter-dependence and by combining our efforts and skills in order to make better use of our resources. Such efforts will be applied particularly to the peaceful use of atomic energy and to the development and better organization of scientific co-operation.

"To the many nations which have gained their independence since the end of the Second World War and to all other peoples who, like ourselves, are dedicated to freedom in peace, we offer our co-operation on a basis of complete equality and in a spirit of fraternity.

"Conscious of our intellectual and material resources, convinced of the value of our principles and of our way of life, without provocation but equally without fear, we have taken decisions to promote greater unity, greater strength, and greater security, not only for our own nations but also, we believe, for the world at large."

The International Situation.—German Reunification, the Middle East, Africa, and Indonesia.

"(1) The aim of the Soviet bloc is to weaken and disrupt the free world. Its instruments are military, political, and economic, and its activities are world-wide. To meet this challenge the free world must organize its resources—moral, military, political, and economic—and be ready to deploy them wherever the situation demands. Our alliance cannot therefore be concerned only with the North Atlantic area or only with military defence. It must also organize its political and economic strength on the principle of inter-dependence, and must take account of developments outside its own area.

(2) We have therefore reviewed the international situation and, in particular, the dangers to world peace arising from Soviet actions and threats. In spite of the dangers of the situation, which are obvious to all, the Soviet Union has made no real contribution to the solution of major problems causing international tension.

"We have especially in mind the problems of the reunification of Germany in freedom, and the continuing anomaly of the isolation of Berlin, the capital of Germany. We renew and reaffirm our declaration of Oct. 23, 1954, which had in view the establishment on a firm basis of the security and freedom of Berlin. The perpetuation of injustice to the German people undermines international confidence and endangers peace.

"At the Geneva Conference of Heads of Government in July, 1955, the Soviet leaders took a solemn commitment that 'the reunification of Germany by means of free elections shall be carried out in conformity with the national interests of the German people and the interests of European security.' We call upon the Soviet Government to honour this pledge.

(3) We have reviewed the situation in the Middle East. In line with the peaceful aims of our alliance, we confirm the support of our Governments for the independence and sovereignty of the States in this region, and our interest in the economic well-being of their peoples. We believe that the stability of this important area is vital to world peace.

(4) We express our interest in the maintenance of peace and the development of conditions of stability and economic and political well-being in the vitally important Continent of Africa. We hope

that the countries and peoples of that Continent who are disposed to do so will co-operate within the free world in efforts to promote these purposes. We affirm the readiness of our countries to co-operate with the countries and peoples of Africa to further these ends. Historic, economic, and other friendly ties between certain European countries and Africa would make such co-operation particularly desirable and effective.

(5) In the course of our review of the international situation we have given consideration to recent serious events in Indonesia. We view them with concern.

The Working of the Alliance. - Strengthening of Political Consultation between Member-Countries.

(6) The strength of our alliance, freely concluded between independent nations, lies in our fundamental unity in the face of the danger which threatens us. Thanks to this fundamental unity, we can overcome our difficulties and bring into harmony our individual points of view. In contrast, as events in Hungary have shown, the Soviet bloc is held together only by political and military coercion.

(7) Although progress has been made, further improvement is needed in our political consultation. We are resolved to bring this about. Our Permanent Representatives will be kept fully informed of all Government policies which materially affect the alliance and its members. In this way we shall be able to draw fully on each other's political experience and to ensure a broad co-ordination of our policies in the interest, not only of the alliance, but of the free world as a whole.

"In addition, to strengthen the cohesion of the alliance, the Permanent Council and the Secretary-General should ensure effective consultation, including, where necessary, procedures of conciliation at an early stage.

Reaffirmation of Western Disarmament Proposals. - Criticism of Soviet Boycott of U.N. Disarmament Commission. - Offer of Foreign Ministers' Meeting to resolve Arms Deadlock.

(8) We recall that in the course of this year the Western countries taking part in the London disarmament talks put forward to the Soviet Union, with the unanimous agreement of NATO, a series of concrete proposals providing, subject to effective controls:

For reduction of all armaments and military forces;

For cessation of the production of fissionable material for weapons purposes;

For reduction of existing stocks of nuclear weapons;

For suspension of nuclear weapons tests;

For measures to guard against the risk of surprise attack.

(9) We note with regret that these various proposals, which would halt the armaments race and add to world security if they were accepted, were rejected *en bloc* by the Soviet Union, although they had been approved by 56 members of the United Nations.

(10) We regret that the Soviet Union has brought about a deadlock in the disarmament negotiations by declaring their intention to boycott the U.N. Disarmament Commission which has been extended, by a strong majority of the General Assembly, to include 25 nations.

(11) We denounce the Soviet tactics of alternating between peace propaganda statements and attempted intimidation by the threat of nuclear attack.

(12) We deplore, also, that the leaders of the Soviet Union do not allow the Soviet population to be impartially informed and enlightened by the services of the United Nations, at the same time as the populations of other member-countries, as to the danger of destruction to which all peoples would be exposed in the event of general war. A resolution to this effect was adopted in November, 1957, by the U.N. General Assembly by 71 nations against nine nations of the Soviet bloc.

(13) We emphasize that, in order to be effective, any disarmament agreement implies adequate international control, that the acceptance of such control is the test of a true desire for peace, and that the Soviet Union refuses to put this principle into practice.

(14) We have decided to establish a technical group to advise on problems of arms control arising out of new technical developments.

(15) In spite of the successive setbacks given by the Soviet Union to the cause of controlled disarmament and of peace, the NATO Council will neglect no possibility of restricting armaments within the limits imposed by security and will take all necessary action to this end.

(16) We state our willingness to promote, preferably within the framework of the United Nations, any negotiations with the Soviet Union likely to lead to the implementation of the proposals recalled above. We are also prepared to examine any proposal, from whatever source, for general or partial disarmament, and any proposal enabling agreement to be reached on the controlled reduction of armaments of all types.

(17) Should the Soviet Government refuse to participate in the work of the new Disarmament Commission, we would welcome a meeting at Foreign Ministers' level to resolve the deadlock.

NATO Defence Measures. - Establishment of Stocks of Nuclear Warheads. - Intermediate-Range Ballistic Missiles for Collective Defence of European NATO Countries.

(18) The Soviet leaders, while preventing a general disarmament agreement, have made it clear that the most modern and destructive weapons, including missiles of all kinds, are being introduced in the Soviet armed forces. In the Soviet view, all European nations except the Soviet Union should, without waiting for general disarmament, renounce nuclear weapons and missiles and rely on arms of the pre-atomic age.

(19) As long as the Soviet Union persists in this attitude, we have no alternative but to remain vigilant and to look to our defences. We are therefore resolved to achieve the most effective pattern of NATO military defensive strength, taking into account the most recent developments in weapons and techniques.

(20) To this end NATO has decided to establish stocks of nuclear warheads, which will be readily available for the defence of the alliance in case of need. In view of the present Soviet policies in the field of new weapons, the Council has also decided that intermediate-range ballistic missiles will have to be put at the disposal of the Supreme Allied Commander, Europe.

(21) The deployment of these stocks and missiles and arrangements for their use will be decided in conformity with NATO defence plans and in agreement with the States directly concerned. The NATO military authorities have been requested to submit to the Council at an early date their recommendations on the introduction of these weapons in the common defence. The Council in permanent session will consider the various questions involved.

(22) Recognizing the rapidly growing inter-dependence of the nations of the free world, we have decided to bring about closer co-ordination with a view to ensuring that each NATO member-country makes its most effective contribution to the requirements established by the alliance. Better use of the resources of the alliance and greater efficiency for its forces will be obtained through as high a degree of standardization and integration as possible in all fields, particularly in certain aspects of air and naval defence, of logistic support, and of the composition and equipment of forces. We have agreed that a military conference should be held at ministerial level in the early months of 1958 to discuss progress made in these fields in the light, in particular, of the results of the 1957 Annual Review.

(23) As regards defence production, we have decided . . . to take further measures within NATO to promote the co-ordination of research, development, and manufacture of modern weapons, including intermediate-range ballistic missiles.

(24) The best means of achieving co-ordinated production of advanced weapons needed by our forces will be studied as a matter of urgency. Those NATO countries whose programmes have already reached a very advanced stage have offered to share with their allies significant production techniques and the results of their research work in order to stimulate a truly productive effort in the defence production field.

Scientific and Technical Co-operation. - Establishment of Science Committee. - Appointment of NATO Science Adviser.

(25) We recognize that in most of our countries more should be done to increase the supply of trained men in many branches of science and technology. The full development of our science and technology is essential to the culture, the economy, and the political and military strength of the Atlantic community.

(26) We realize that progress will depend on vigorous action within individual States and, in particular, on the devoted contribution of teachers and scientists. We must increase the provision for the training of young people in scientific and technical subjects, and must also ensure that the free pursuit of fundamental research continues to flourish. Each of our Governments will therefore reappraise the support being given to scientific and technical education and to fundamental research.

(27) We seek to increase the effectiveness of national efforts through the pooling of scientific facilities and information and the sharing of tasks. We must build on the established tradition of the universality of true science. Our Governments will support the international organizations doing work in this field.

(28) We have decided to establish forthwith a Science Committee on which all the NATO countries will be represented by men highly qualified to speak authoritatively on scientific policy. In addition, a scientist of outstanding qualifications will be appointed as Science Adviser to the Secretary-General of NATO.

(29) The Science Committee will be responsible in particular for making specific recommendations to the Council for action on a proposal by the French Government for a Western foundation for scientific research [see below], and on the many other valuable proposals which have been put forward by the NATO task force on scientific and technical co-operation and by the NATO parliamentarians' conference.

Economic Co-operation. - Support for European Economic Integration. - Economic Aid for Under-developed Countries.

(30) We are united in our common purpose to promote the economic and social development of our peoples and to assist the peoples of other countries to achieve the same objective. We consider that the purpose of government in a free society is to enlarge the opportunity of the individual rather than to subordinate him to the State.

(31) We will co-operate among ourselves and with other free Governments to further the achievement of economic stability, a steady rate of economic growth, and the expansion of international trade through the further reduction of exchange and trade barriers.

(32) We reaffirm the desirability of a closer economic association between the countries of Western Europe, which we deem to be in the interest of all countries, and we will accordingly lend encourage-

ment to the successful development of the European Economic Community and of a European Free Trade Area in which full account would be taken of the interests of the less developed member-countries. We attach particular importance to these initiatives being worked out in such a way as to strengthen not only the participating countries but also the relations within the Atlantic community and the free world as a whole We recognize the inter-dependence of the economies of the members of NATO and of the other countries of the free world.

(33) We affirm the interest of our Governments in an enlargement of the resources, both public and private, available for the purpose of accelerating the economic advancement of the less developed areas of the free world.

(34) We have decided that the North Atlantic Council, without duplicating the work of other agencies, shall from time to time, and in the spirit of Article 2 of the Treaty, review economic trends and assess economic progress, and make suggestions for improvements either through existing organizations or by the efforts of individual countries, or in special cases by new initiatives.

(35) Under present circumstances, our defensive alliance takes on a new significance. Only an intensified collective effort can safeguard our peoples and their liberties. We have, together, ample capacity in freedom to defend freedom.

(36) We have taken a series of decisions which will promote greater strength and greater security not only for our own nations but also for the world at large."

In a statement before returning to Washington, President Eisenhower expressed his conviction that the conference had made "the chances of peace a little closer and the chances of war more remote." Mr. Macmillan described the conference as a "marked success," while Mr. Dulles said that the full significance of the decisions taken "may not be apparent for some months or years to come." M. Gaillard, in a broadcast, expressed particular pleasure that both President Eisenhower and Mr. Macmillan had recognized the special interests of France in North Africa and especially in Algeria, which remained "a French internal matter."

NATO Missile Bases in Europe.

As stated in the communiqué, the North Atlantic Council decided that intermediate-range ballistic missiles (I.R.B.M.s) should be made available to all European member-countries desiring them, as part of the collective defence effort, pending a general agreement on disarmament. The question of U.S. assistance in the establishment of atomic stockpiles and in the deployment of I.R.B.M.s in Europe was referred to by Mr. Dulles in the following statement to the conference on Dec. 16 :

". . . The major deterrent to Soviet aggression against NATO is the maintenance of a retaliatory power of such capacity as to convince the Soviets that such aggression would result in their own destruction. This power rests in the U.S. Strategic Air Command and in other nuclear striking forces. In this respect we have superiority over the Soviet Union. As long-range missiles become available, they will play their part in maintaining the deterrent.

"The shield of NATO ground, sea and air forces is also an integral part of the deterrent. Therefore, NATO should continue its efforts to strengthen the shield, which should increasingly include a nuclear capability. U.S. forces in Europe—ground, sea and air—now have such a capability, and this capability is being extended to other NATO forces.

"The United States has already programmed approximately $750,000,000 for modern weapons—mostly short-range missiles and aircraft—for the forces of our NATO allies . . . Personnel of several NATO countries are increasingly being trained in the maintenance, operation and deployment of these weapons systems . . .

"The United States is prepared, if this Council so wishes, to participate in a NATO atomic stockpile. Within this stockpile system, nuclear warheads would be deployed under U.S. custody in accordance with NATO defensive planning and in agreement with the nations directly concerned. In the event of hostilities, nuclear warheads would be released to the appropriate NATO Supreme Allied Commander for employment by nuclear-capable NATO forces. We believe that this arrangement meets NATO military requirements and ensures that nuclear weapons can be employed promptly when needed.

"If this Council so desires, and in order to strengthen NATO's deterrent power, the U.S.A. is prepared to make available to other NATO countries intermediate-range ballistic missiles, for deployment in accordance with the plans of SACEUR [Supreme Allied Commander Europe]. Nuclear warheads for these IRBM's will become a part of the NATO atomic stockpile system. Such IRBM deployment would be subject to agreement between SACEUR and the countries directly concerned, and to agreement between each such country and the United States with respect to material, training, and other necessary arrangements."

Recent developments in various NATO countries in connexion with the provision of U.S. guided missiles and the setting-up of I.R.B.M. sites are summarized below :

Missile Bases in Britain. - Anglo-American Discussions. The U.S. Defence Secretary, Mr. Neil McElroy, visited London from Dec. 7-10, 1957, for talks with Mr. Macmillan, Mr. Selwyn Lloyd, and Mr. Duncan Sandys, the U.K. Minister of Defence. No statement was issued on these talks, other than a brief announcement by a Defence Ministry spokesman that negotiations were in progress for the stationing of I.R.B.M.'s in Britain. The Defence Correspondent of *The Times* stated (Dec. 7) that the discussions were "likely to be concerned with the principles governing the deployment of the missiles - who is to have the custody of the nuclear warheads, for instance, and how the cost is to be shared."

Reuter reports from Washington stated that tentative agreement had been reached on the stationing of four I.R.B.M. sites in the United Kingdom, of which three would be manned by the British forces and one by the U.S. Air Force. A British Defence Ministry spokesman, however, described these reports as premature and "purely conjectural" at the moment.

[The British Government's acceptance of U.S. guided missiles for the British forces had been announced to the House of Commons by Mr. Macmillan in April last, after his Bermuda meeting with President Eisenhower see page 15460.]

Belgian Acceptance of U.S. Missiles. The Belgian Defence Ministry announced on Dec. 10, 1957 that it had accepted a U.S. offer (in agreement with the NATO authorities) to equip a Belgian unit with *Nike* anti-aircraft missiles. It was added that Belgian pilots were being trained at American centres in the use of these weapons.

The Foreign Minister (M. Larock) informed a congress of the Belgian Socialist Party on Dec. 23 that there was "no question at the moment" of establishing atomic stockpiles or I.R.B.M. sites on Belgian territory.

Dutch Acceptance of I.R.B.M. Sites. In written replies by the Netherlands Foreign Minister (Mr. Luns) and the Defence Minister (Mr. Staf), it was stated on Jan. 13, 1958, that the Netherlands Government would agree to I.R.B.M. sites and atomic stockpiles on Dutch territory if the North Atlantic Council considered such measures to be in the interests of collective security. The statements were issued after repeated demands by M.P.s of all parties for a declaration of Government policy on this question.

Turkish Acceptance of Guided Missiles. In a statement to the Anatolian Agency, M. Menderes announced on Dec. 9, 1957 that Turkey had accepted *Nike* and *Honest John* missiles from the U.S.A. under NATO arrangements. He added that Turkish Army officers would receive the necessary training in the United States.

German-American Discussions. The Federal German Foreign Minister, Dr. von Brentano, had discussions with Mr. Dulles in Washington on Nov. 23-24, 1957. No statement was issued, but it was understood that the talks dealt, *inter alia*, with, the Federal Government's attitude to the deployment of American missile sites in the European member-countries of NATO. It was stated in Bonn, however, that the discussions were primarily on political questions affecting the NATO alliance, and only secondarily on the question of missile sites.

French Attitude. The Defence Minister (M. Chaban-Delmas) informed the Council of the Republic on Dec. 12 that "no engagement has been entered into nor any agreement signed" on the question of establishing I.R.B.M. sites in France. *Le Monde* stated on the following day that while France might accept such bases on her territory, she would "not renounce control over the equipment which might be supplied."

General Norstad's Statement on Missile Bases in Europe.

In a press statement at SHAPE on Dec. 23, the Supreme Allied Commander announced that he would be making "initial recommendations" to the North Atlantic Council "within a few weeks" about the first stages of the plan for establishing I.R.B.M. sites in Europe. General Norstad said that in view of the characteristics of these new weapons there was no need for them to be sited in any particular place, nor was it "necessary or desirable that they should be based in every one of the NATO countries." Moreover, the possibility of seaborne missile sites should be taken into consideration.

General Norstad said that SHAPE had been making a special study of the new plans for more than a year, the results having been submitted to the political authorities of NATO in October. This study had taken into account the rapid introduction of new weapons, including missiles of all types, in both the Soviet and the Western forces. "We have been assuming," he added, "that the production of the entire family of missiles is in the Russian arsenal. I am sure that if the Russians could translate our assumptions into reality they would settle for it and be damned happy." General Norstad added, however, that the introduction of the new weapons did not reduce or minimize the importance of the other retaliatory forces—e.g. strategic bomber forces—which were "necessary to strengthen the shield with which we propose to defend the peoples and territories of NATO."

In an earlier statement General Norstad had disclosed that SHAPE calculations were based on a planning figure in the first phase of six to 10 squadrons or battalions of I.R.B.M.'s (excluding bases in the United Kingdom), each unit being equipped with 15 missiles. A battalion would have about 500 men at a rough estimate.

French Proposals for NATO "Science Pool."

Prior to the Paris conference, the French Government had presented an *aide-mémoire* to the United States on Nov. 25 proposing the creation of a science foundation, functioning under the North Atlantic Council, to pool scientific and military technological knowledge among the member-countries. It was suggested (1) that details of such an organization should be worked out at the Paris meeting of Heads of Governments ; (2) that all NATO members should co-operate on specific projects of value to the defence of the Atlantic community, and should make their scientists and laboratories available for this purpose ; (3) that scientists with special skills should be called upon to work, if necessary, on particular projects in any laboratory in the NATO area ; (4) that the expenses of such an organization should be shared between the member-countries.

The French proposals were to a certain extent embodied in the agreement on scientific co-operation mentioned in the NATO communiqué. As stated in the communiqué, it was agreed that a Science Committee should be set up and that a Science Adviser should be appointed to assist the Secretary-General of the North Atlantic Treaty Organization.

A. INDIA. — Population and Area of Reorganized States and Union Territories.

A Census Paper published by the Indian Registrar-General at the beginning of December gave the population and area of the Indian States and Union Territories after the reorganization of States as follows, the figures being based on the results of the 1951 census except for Jammu and Kashmir, where no census was taken in that year :

States.

State or Territory	Area (sq. miles)	Population	Capital
Andhra Pradesh	105,963	31,260,133	Hyderabad
Assam	85,012	9,043,707	Shillong
Bihar	67,164	38,783,778	Patna
Bombay	190.919	48,265,221	Bombay
Jammu and Kashmir ..	92,780	4,410,000*	Srinagar
Kerala	15,035	13,549,118	Trivandrum
Madhya Pradesh ..	171,201	26,071,637	Bhopal
Madras	50,110	29,974,936	Madras
Mysore	74,326	19,401,193	Bangalore
Orissa	60,136	14,645,946	Bhuvaneshwar
Punjab	47,456	16,134,890	Chandigarh
Rajasthan	132,077	15,970,774	Jaipur
Uttar Pradesh	113,410	63,215,742	Lucknow
West Bengal	33,945	26,302,386	Calcutta

*Estimated.

Union Territories and Sikkim.

Andaman and Nicobar Islands .. .	3,215	30,971	Port Blair
Delhi	578	1,744,072	Delhi
Himachal Pradesh .	10,904	1,109,466	Simla
Laccadive, Minicoy and Amindivi Islands .	10	21,035	—
Manipur	8,628	577,635	Imphal
Tripura	4,032	639,029	Agartala
Sikkim	2,744	137,725	Gangtok

Bhuvaneshwar was designated as the capital of Orissa in 1950, although most of the offices of the Orissa State Government continue to be located at Cuttack, 28 miles from Bhuvaneshwar.—(Census of India, Paper No. 1, 1957 - Indian High Commissioner's Office, London) **(Prev. rep. 15172 A.)**

B. NEW ZEALAND. — General Elections. - Clutha Seat held by National Party.

The election to the Clutha seat in the House of Representatives, which had been delayed through the death of the Labour candidate, took place on Jan. 18 and resulted in a victory for the National Party, whose candidate (Mr. J. A. Roy) retained the seat by a majority of 1,723 over his Labour opponent. The figures were 6,844 votes for Mr. Roy, 4,621 for Mr. Fahey (Labour) and 292 for Mr. Aberdeen (Social Credit).

The Clutha result brought the strength of the National Party to 39, as against 41 for the Labour Party. As a Labour member (Mr. R. M. Macfarlane, M.P. for Christchurch Central) was subsequently elected Speaker of the new House, this left the Labour Party with a majority of only one vote.

C. VATICAN. — The Pope's Christmas Message. - Appeal for Disarmament and World Peace.

In his annual Christmas message to the world, broadcast on Dec. 22, 1957, by Vatican Radio, Pope Pius XII spoke of the responsibility of man for his scientific and technical inventions and made a plea for disarmament and world peace.

After referring to the "news of the new technical marvels" (an apparent reference to the Soviet *sputniks*) the Pope continued : "Once the first rush of exaltation is passed, men are tortured by a real anxiety when confronted by the unlooked-for mass of their increased knowledge, by this invasion into the greatest and the smallest elements of the universe. They are brought to ask themselves if they can preserve their own control over the world or whether they will not fall victims to their own progress.

"There exist deep discords in the new man who has been created by progress. But although these are full of danger, they are not such as to justify the excessive despair of the pessimists or the resignation of the indolent. The world can, and must, be brought back to its initial state of harmony, which was the plan of the Creator from the beginning . . . If man's very nature is in the image of God, his activity, also, ought to be conformable to Him, as philosophy teaches when it says *operari sequitur esse* [the work takes its nature from the worker]. It follows that man's work on earth is not doomed to discord but is intended to show forth the Eternal Harmony of God . . .

"God has handed over to men His own designs so that they may put them into operation in their own person and in complete freedom, assuming full moral responsibility for them . . . For the sake of the common good, the chief basis of action—not only of Christians, but of all men of goodwill—should be the order and divine harmony of the world. Their preservation and development should be the supreme law which ought to govern important meetings between men. If humanity today should fail to agree on the supremacy of this law—that is, on absolute respect for the universal order and harmony in the world—it would be difficult to foresee the proximate destiny of nations The need for this agreement has been felt in practice when, lately, some specialists in the modern sciences have expressed doubts and disquiet at the development of atomic energy . . .

"In our days, an apparently blind fascination for progress leads the nations to overlook evident dangers . . . Everyone is indeed aware how the development and application of any invention to a military purpose brings harm out of proportion, even in the political sphere, to the advantages which are derived from these inventions . . . Who can give an accurate calculation of the economic damage from progress which is not inspired by wisdom? Such quantities of material, such sums of money derived from saving and from restrictions and toil, such expenditure of human labour diverted from urgent needs, are consumed to prepare these new arms that even the wealthiest nations must foresee the time in which they will regret the dangerously weakened harmony of their national economy —or are in fact already regretting it, though they endeavour to conceal the fact.

"To a person pondering on the actual state of affairs—and always allowing for the right of self-defence—the present competition between nations in demonstrating their individual progress in war equipment assuredly offers new 'signs in the skies,' but even more, signs of pride—that pride which produces on earth wide differences between human souls, nourishes hatreds, and prepares the way for conflict . . .

"The Divine Law of harmony strictly imposes on all rulers of nations the obligation to prevent war by means of suitable international organizations, to reduce armaments under a system of effective inspection, to deter whoever should aim at disturbing the peace, with the most fully guaranteed mutual dependence between the nations which sincerely desire it . . . We have endeavoured more than once in times of crisis, with warnings and counsel, to strengthen that mutual dependence. We regard it as a special task imposed by God on our Pontificate to forge between nations the bonds of true brotherhood. We renew our appeal so that among the true friends of peace all possible rivalry may come to an end and every reason for lack of trust may be removed.

"Peace is a good so precious, so productive, so desirable and desired, that every effort in its defence, even reciprocal sacrifices of legitimate individual ambitions, is well spent. We are sure that the peoples of the world are whole-heartedly in agreement with us, and that they expect a like sentiment from their rulers . . ."

The Pope's message was broadcast by the new Vatican radio station (see 15846 B) to all parts of the world, including—for the first time—the Soviet Union and China. (The Universe - Le Monde, Paris - New York Times) **(Prev. rep. 15340 C.)**

D. UNITED STATES. — Civil Rights Commission.

It was announced in Washington on Dec. 23 that Dr. John A. Hannah had been appointed chairman of the Civil Rights Commission *vice* Mr. Justice Reed, who had resigned before the Commission's first meeting. [Dr. Hannah had previously been vice-chairman of the Commission]. It was also announced that President Eisenhower had nominated Mr. Doyle Elam Carlton, a lawyer, and a former Governor of Florida, to fill the vacant sixth seat on the Commission.

The six members of the Commission were sworn in at the White House on Jan. 8.—(New York Times) **(15909 A.)**

A. MALTA. — Legislative Assembly's Resolution to break Ties with Britain. - Subsequent Retraction by Mr. Mintoff. - Mr. Mintoff's Correspondence with Mr. Lennox-Boyd. - The Dockyard Dispute.

The Maltese Legislative Assembly approved unanimously on Dec. 30 a resolution submitted by the Prime Minister (Mr. Mintoff) declaring that Malta would no longer be bound by its obligations towards Great Britain until H.M. Government provided firm guarantees concerning the future employment of Maltese workers in British Government service. The text of the resolution (which was seconded by Dr. Borg Olivier, Leader of the Opposition) was as follows :

" The Prime Minister proposes that, since the British Government do not want to honour the obligations they undertook in their declaration of July, 1955, to avoid unemployment [see 14352 A], the representatives of the Maltese people in Parliament assembled declare that they are no longer bound by agreements and obligations towards the British Government, and by those so far assumed towards their allies, until a guarantee is given by the British Government that the number of their employees in Malta does not diminish before alternative employment is found for those discharged."

Some hours before the Legislature's approval of Mr. Mintoff's motion, Mr. Mintoff had received an urgent telegram from the British Colonial Secretary (Mr. Lennox-Boyd) in the following terms :

" I have seen the report of your motion in the Legislative Assembly with incredulity. This action, taken without consultation, cannot further the common cause of our two countries, which we have both been working so hard to promote. I sincerely hope that nothing will be said or done [in the Maltese Legislative Assembly] which would prejudice our hopes of attracting new industry to Malta, of creating confidence and stability in Malta's economy and political future, and of bringing to a successful conclusion our plans, now so far advanced, for closer association of Malta with the United Kingdom.

" Towards that end, I should be grateful if you would, in the course of the debate, read the following message from me :

" (1) Your motion talks about H.M. Government not wanting to carry out the declaration of July, 1955. You suggest that our endorsement of the objective of avoiding unemployment—which of course stands—imposes an obligation on H.M. Government to guarantee alternative employment to men discharged in any branch of U.K. Government service. This is not so. The declaration of July 1955 was endorsed by all parties to it, including the Maltese Opposition, and was a statement of objectives of economic policy in Malta.

" Its emphasis was on the diversification of Malta's economy and on the need for combined efforts by the U.K. and by the Maltese people themselves. There is nothing in the statement to support the view that H.M. Government guaranteed the employment of a set number of people by the Services or the provision of alternative employment for men discharged by them. Employment by the Services has never been static, and no Government could agree to regard as sacrosanct a level of employment in a particular year.

" (2) H.M. Government are nevertheless closely concerned with Malta's economic situation and recognize that widespread unemployment would bring serious hardship and suffering. But my message of Nov. 29 [see below], if accepted in good faith and loyally supported, should have made it clear that there was no possibility of widespread unemployment in the near future. Although H.M. Government have as yet reached no decisions about the future of overseas naval dockyards, my message contained a special assurance for Malta covering the next three years.

" Meanwhile, the prospects of alternative employment are already improving. The underground oil storage scheme will start in the next few weeks. There is also additional employment in prospect on other schemes financed by H.M. Government, including the harbour. There is good reason to hope that these opportunities, taken together, will provide jobs for as many people as are laid off by the Services.

" I am also hoping that, with the help of the Hives Committee [see below], and provided conditions are stable and there is confidence in reasonable labour relations, new industries may be attracted to Malta. As to the future of the dockyard itself, we have, as you know, been holding talks with the commercial interests about the possibility of commercial use of its facilities, and representatives of two companies, Messrs. Vickers and Smiths Docks Ltd., are due to arrive in Malta next week to pursue inquiries.

" (3) Moreover, H.M. Government recognized specifically, in the proposed economic arrangements for integration which we agreed last summer, that any drastic change in defence policy affecting Malta may alter the basis of these economic arrangements, and undertook in such circumstances to review the position. In particular, if in consequence of a drastic change in defence policy, the level of unemployment in Malta were to reach, and for six months remain at, a higher level than the rate of unemployment in the United Kingdom at the time, H.M. Government undertook to assist the Maltese Government in taking remedial measures to be agreed.

" (4) These are the practical steps which the British Government are taking and have promised to take towards the attainment of the objectives of the July 1955 declaration. Together, while they do not and cannot constitute a guarantee of a particular level of employment at the dockyard or elsewhere, they hold out a very reasonable prospect of a continued high level of employment in Malta over the next three years at least, and thereafter a diversification of the economy which, with continued emigration, should help to maintain Malta's economic life and make possible a continued advance in the living standards of her people.

" (5) It is my earnest hope that this debate [in the Legislative Assembly] will do nothing to deter new industry from coming to Malta, or otherwise to hinder progress towards the attainment of these objectives and the early conclusion of our negotiations for the closer association of our two countries."

[The oil storage scheme referred to by Mr. Lennox-Boyd is a NATO infrastructure project costing £6,000,000. The cost of the commercial harbour scheme, also referred to, will be about £3,000,000.]

In a speech preceding the Assembly's approval of his motion, **Mr. Mintoff** maintained that Mr. Lennox-Boyd's message shed no new light on the situation and contained " promises but no guarantees." Mr. Mintoff also asserted that Mr. Lennox-Boyd had " broken faith " with him by the premature disclosure of one of the provisions of the agreement concluded earlier in the year [i.e. the provision referred to in the second sentence of (3) above]. Mr. Mintoff added, however, that no action would be taken on the resolution before agreement had been reached with the Opposition, by which time the British Government might have come to a " more concrete decision " on the question of alternative employment for discharged dockyard workers.

Dr. Borg Olivier, speaking in support of the resolution, said that despite the declaration of July 1955 the British Government had continued its " masterly tactics " in " neglecting its duties towards smaller communities." Alleging that the British Government always interpreted agreements unilaterally in its own favour, he declared that the Maltese people would therefore be " stupid " to accept any more of such declarations.

In a speech to a rally of dockyard workers on Dec. 30, Mr. Mintoff had commented on the motion which he intended to submit to the Legislative Assembly later the same day.

Mr. Mintoff said that British private shipyards had full order-books for five years ahead and had in fact found it necessary to transfer surplus orders to Japanese yards. It was only right, therefore, that if a decision had to be taken on the closing of naval dockyards, the choice should fall on Chatham rather than on Malta. If the Malta dockyard were closed the total annual loss to the island would be £11,500,000, and he preferred " to face British armed might rather than such a prospect of hardship and hunger." Mr. Mintoff mentioned that discharges or notices of discharge from the dockyard had totalled about 100 during the previous week.

The Progressive Constitutional Party's attitude to the crisis was outlined by its leader, Miss Mabel Strickland, at a press conference on Jan. 1. [The P.C.P. is not represented in the Maltese Legislative Assembly].

Miss Strickland said that while Mr. Mintoff had taken up the case of those being discharged from the dockyard at the present moment, it was surely more important to think of the 40,000 persons who would be directly or indirectly affected if relations with Britain were severed and the dockyard closed altogether. Mr. Mintoff, she asserted, was " in grave danger of sabotaging the Constitution through inability to govern." Miss Strickland also called for the appointment of an Anglo-Maltese financial commission to investigate what she termed the Maltese Government's " spending spree " of £18,000,000 over the previous three years. Asked whether she considered that the British Government had gone back on the 1955 declaration, she said that, in her opinion, an undertaking to avoid unemployment did not mean a guarantee of full employment.

Following the Assembly's vote, Mr. Mintoff sent a telegram to Mr. Lennox-Boyd on Jan. 2 inviting him to visit Malta and proposing a " truce " in the dispute between the two Governments. Mr. Mintoff's message ran as follows :

" My colleagues and I had hoped that the resolution in the Legislative Assembly, absolving ourselves from obligations towards Britain if discharges are carried out without the adoption of remedial measures, showed the British Government how deeply Malta feels on this subject. We had imagined your Government would not persist in the precipitate action of throwing men out of employment before you yourselves had decided on the function of H.M. dockyard in Malta in the future.

" The Maltese Government and the Admiralty section of the General Workers' Union have given proof to local British Government officials of the availability of funds in the hands of dockyard authorities to keep the men who have been served with notice of discharge in employment for a considerable time to come. You, on the other hand, entertain high hopes of alternative employment being found, not only for these men, but also for others who might have to face a similar fate. You have also assured us . . . that your Government still favours our integration proposals.

" Therefore we cannot put any interpretation on the insistence of discharging these men other than the desire of forcing us and the people of Malta to accept the principle of no specific obligation on the part of Great Britain to look after the welfare of men who have served loyally during two World Wars. There is no doubt that a solution of our present difficulties could be found if the resources of your Government were brought to bear and a truce is called to give time to both Governments to work out plans and implement remedial measures.

"We ask you to submit this message to your Prime Minister in the hope that his intervention might convince the Admiralty to withhold action tomorrow. We renew to you our invitation to come here and discuss our mutual difficulties on the spot. You know that we were patiently awaiting answers to questions arising from your first message of Nov. 29 [see below]. These questions included:

(a) What would be the level of 'employment' in the dockyard during the next three years, as opposed to 'activity' mentioned in your message?

(b) How does the British Government propose to attract industries to Malta if no funds are provided for inducements to compete with other territories striving towards the same objective?

(c) Whether it is not now necessary for you to supplement our funds so as to speed up the schemes we have initiated to provide the public facilities in Malta basic to any industrialization scheme?

"Instead of providing the answers to these questions, your Government sprang upon us the notices of discharges . . ."

Following consultations with the Governor of Malta (Major-General Sir Robert Laycock, who visited London on Jan. 2-3) Mr. Lennox-Boyd replied to Mr. Mintoff on Jan. 3 but made no reference either to the invitation to visit Malta or to the request for Mr. Macmillan's intervention. Mr. Lennox-Boyd wrote:

"Before I answer your specific questions, I must correct your statement that the discharges at the dockyard, which began to-day [Jan. 3], were sprung upon you at short notice. That is just not true. As long ago as last July the First Lord told you himself, when he was on a visit to Malta, that discharges had shortly to take place. So that the discharges might be delayed as long as possible, we had talks with you in the summer to see whether it was possible to find special work for the men due for discharge, and between us we were able to find continued employment under the Admiralty for about 150 of them. But you were left in no doubt that this relief was temporary and that the men could not be held in Admiralty employment beyond the duration of these special works. Accordingly, on Dec. 2 your Government and the General Workers' Union were told by the Admiral Superintendent of the decision to lay off 140 men in January and February.

"Moreover, as you knew all along, there was a strong likelihood of considerable additional employment becoming available on the underground oil storage scheme about the same time as the discharges became effective. Indeed, if there had not been unnecessary delays interposed by your Government on the start of that scheme, the employment might have come along a good deal sooner. And in recent weeks, while you have been stirring up the public in Malta to believe that there is an imminent crisis which has been brought about by the British Government in breach of previous undertakings, we have been concentrating on practical measures to help deal with the transitional unemployment caused by the Admiralty discharges.

"I said in my last message that there was 'good reason to hope that these opportunities taken together will provide jobs for as many people as are laid off by the Services.' In this we have had great help from the contractors on the oil storage scheme, who have been able to advance their plans for starting the preliminary works. This has enabled them to take on all the 40 men being discharged by the Admiralty to-day. This is the sort of practical activity which really yields results. We shall continue to work along these lines although, of course, we cannot accept in Malta, any more than we do in the U.K., the obligation for which you have asked—to guarantee alternative employment before any employee, whatever his trade, length of service, or qualifications, can be discharged. No responsible employer in the world could possibly accept such an obligation. It is surely more important for the men concerned that both Governments should concentrate on providing a basis for alternative employment, and in this H.M. Government have played their full part.

"Since you took office [in February 1955] we have provided nearly £15,000,000 in direct assistance to Maltese budgets. This year's grant has been the highest in Malta's history. Yet over these years not a penny by way of increased taxation or loans has been raised by the Maltese Government towards expenditure on increasing wages, improving social services, and starting new capital schemes. The Economic Commission last year recommended the levy of a 5 per cent surcharge on existing taxes to help meet increases in the Government wage bill, in addition to various economies in expenditure. You rejected all these and other recommendations and have since concentrated all your energies in claiming more money from H.M. Government. You have been told that no more money can be provided this year, but you have done nothing to adjust your financial arrangements accordingly.

"Although it was not our original intention to publish now details of the negotiations on future arrangements between Malta and the United Kingdom, your recent action puts me under an obligation to inform the Maltese people about the exceptionally generous economic and financial arrangements which we had proposed, involving continued capital assistance from H.M. Government of £25,000,000 over a five-year period, quite apart from generous assistance for such things as health and education. This, as you and your colleagues have known for many months past, is the extent of H.M. Government's willingness to help to develop and diversify the Maltese economy so as to encourage new industries and provide alternative employment. These are the intentions which you have now so recklessly hazarded.

"I must now tell you that I consider it essential not only that the Maltese people should know the foregoing facts but should understand that H.M. Government are not prepared that the British taxpayer should go on carrying alone a burden which the 1955 declaration accepted must be shared by the Maltese Government and people.

"This answers the second and third questions in your message on lines with which you are already familiar. I would only add that the provision of financial inducements is not the only or indeed the main incentive to sound industrial development anywhere. Potential industrialists must have confidence in the stability of conditions, including relations with labour, in the countries in which they propose to make new investments. For the sake of Malta and its future, I earnestly hope that what has happened in the last 10 days has not made it more difficult to achieve our joint purpose of diversifying the Maltese economy by attracting new industry there.

"On your first question about the future of employment in the dockyard, I repeat what you have been told by us many times before, and particularly by my message to you of Nov. 29 [see below]. If that assurance had been accepted in good faith and loyally supported, it would have been clear that there is absolutely no question of closing the dockyard overnight, or a possibility of widespread unemployment. Put another way, the prospects of employment in the dockyard can be summed up thus. Some discharges will be necessary. For example, one or two Fleet shore establishments may have to be closed and the works programme is especially hard to predict. Moreover, you will be aware that it is H.M. Government's policy for the time being in all Government establishments that any increase in costs in present financial circumstances must be offset by corresponding economies.

"So far as can be foreseen at present, the number of civilian employees with the Admiralty in Malta in the next three years will not have fallen below a figure of the order of 12,000, as compared with the current figure of about 13,200. The bulk of this reduction is expected to be achieved by not replacing wastage due to retirements, resignations, and other normal causes . . ."

On the same date as Mr. Lennox-Boyd's message (Jan. 3) the Valletta dockyard workers came out on strike in protest against the first batch of discharges from the dockyard. They returned to work within a few hours, however, on learning that Wimpey's (the contractors for the oil storage project) would take on both the workers discharged on that date and the 100 others due to be discharged by the end of February. After the men had returned to work, the Maltese Government spokesman (Mr. Pellegrini) stated that since the required conditions had been met, the Legislative Assembly's resolution of Dec. 30 was "clearly no longer operative"

Mr. Mintoff himself, replying on Jan. 8 to Mr. Lennox-Boyd's message of Jan. 3, stated that "a new situation" had arisen from Mr. Lennox-Boyd's assurance that the number of Admiralty employees in Malta would not fall by more than 1,200 in the next three years, and that the "new situation does not call for the implementation of the resolution passed in the Maltese Parliament on Dec. 30." He added that this decision had been reached with the full approval of the Opposition, and also of the Admiralty section of the General Workers' Union.

Replying to various points raised by Mr. Lennox-Boyd, Mr. Mintoff referred to Maltese "irritation" at being reminded continually of Britain's generosity. He quoted President Eisenhower as saying that the part played by Malta in the Second World War had shortened the conflict by at least a year when it was costing Britain £17,000,000 a day; against this, the U.K. had contributed £6,000,000 to Malta's recovery during the present financial year. Mr. Mintoff denied that his Government had caused "unnecessary delays" in implementing the plan for the oil storage scheme, saying that it had in fact approved the plan a year before it had been due to go into operation.

As regards Mr. Lennox-Boyd's accusation that he (Mr. Mintoff) was stirring up the public in Malta, he replied that "the Maltese Government had to choose between facing mob rule and giving a lead to the country to induce your Government to tackle in earnest the problem of Malta's survival." With regard to Mr. Lennox-Boyd's statement that the Maltese Government had known since July 1957 of the impending discharges from the dockyard, Mr. Mintoff alleged that this was a "half-truth" inasmuch as the British Government had agreed to find alternative employment for the men.

After asserting that the Colonial Secretary had published details of the economic and financial arrangements with Malta without the Maltese Government's consent, Mr. Mintoff alleged that Mr. Lennox-Boyd had chosen only those parts "suitable for propaganda purposes," without disclosing "your Government's refusal to make these arrangements operative before integration day." In conclusion, Mr. Mintoff said that his Government would be "more than willing" to undertake new negotiations with Great Britain "in a spirit of give-and-take without pre-determined formula." He renewed his invitation to Mr. Lennox-Boyd to visit Malta.

Prior to Mr. Mintoff's announcement that the resolution of Dec. 30 would not be implemented, news of a further alternative source of employment for discharged dockyard workers

had been made known in the island. It was announced on Jan. 4 from the office of the C.-in-C., Mediterranean Fleet (Admiral Sir Charles Lambe) that the 16,000-ton Liberian tanker *Sirius*, which had gone aground in the Sicilian Channel on Dec. 9 and had since been laid up in the Valletta floating dock, would be repaired in the naval dockyard. The repairs to the *Sirius* would cost £280,000 and would extend over three months.

The London managers of the tanker (Messrs. Rethymnis and Kulukundis), stated that the work would be regarded as a "test case"; if it proved successful, they would consider sending other repair work to Malta. It was also made known on Jan. 4 that, at a meeting between representatives of the Colonial Office, the Admiralty, and the Salvage Association (which represents Lloyd's underwriters in questions of repairs to damaged ships, and which had maintained that Maltese prices for such work were too high), it had been agreed that the U.K. Government would pay the difference between British and Maltese prices with respect to the work on the *Sirius*.

London Talks on Future Status of Malta.

The London talks on the constitutional and economic future of Malta (the first phase of which had concluded on Feb. 27, 1957—see 15456 A) were resumed on March 22 but suspended on April 2, 1957, after failure to reach agreement on the economic aspects of the proposed integration of Malta with the United Kingdom.

A Colonial Office statement said that while satisfactory progress had been achieved on the constitutional side, Mr. Mintoff had been "unable to agree to the principle underlying the proposed economic arrangements." It was pointed out in the British Press that the deadlock had arisen on the issue of "equivalence"—i.e., the improvement of the Maltese economy until it could be merged with that of the U.K. on completely equal terms. Mr. Mintoff was said to have maintained that this process should take place within a specified period (probably 12 years); the British Government, on the other hand, had considered that there should be no time-limit and that progress towards the goal of "equivalence" should be related to an increase in Maltese productivity.

Mr. Mintoff commented on the London talks in a speech to dockyard workers on May 1, 1957.

Claiming that the British Government had accepted "85 per cent" of his integration plan, Mr. Mintoff listed the following eight points on which agreement had been reached:

(1) Malta would send three representatives to Westminster.

(2) There would be a separate Maltese Parliament to run local affairs independently of the United Kingdom.

(3) The system of dyarchical government would be abolished.

(4) The right to declare a state of emergency would be vested solely in the British Parliament.

(5) The power of local British authorities would be curtailed.

(6) As requested by the Vatican, there would be absolute guarantees of the supremacy of the Roman Catholic Church in religious matters.

(7) If, as a result of changes in defence policy, unemployment in Malta remained for six months at a higher level than that prevailing in the U.K., the British Government would find or create new work for the Maltese unemployed.

(8) While Britain had accepted the principle of economic equivalence, full agreement on its practical implementation had not been achieved. Britain had offered, however, to pay one-quarter of the cost of the social services and one-third of education costs.

Mr. Mintoff added that if Britain would not agree fully to his integration plans, the "only alternative" would be "the road to independence," after which the Maltese people would "lay down the conditions under which the British will remain in Malta."

In an interim report on the London talks, presented to the Maltese Legislative Assembly on May 7, 1957, Mr. Mintoff confirmed that he had informed the British Government that its economic proposals were unacceptable in their present form.

Mr. Mintoff said that satisfactory progress had been made in the talks on constitutional questions, some of the principal decisions having been: (*a*) that the Maltese Parliament's sphere of legislative autonomy should be substantially widened, (*b*) that a number of restrictions in the present Constitution with respect to special subjects (e.g. language) should be abolished; (*c*) that the powers of disallowance of laws passed by the Maltese Parliament should be abolished; (*d*) that the power of reserving Maltese Bills should be strictly limited and become subject to parliamentary control; and (*e*) that the U.K. Government's power to legislate by Order-in-Council on "reserved" matters should be carefully defined, and should be made subject to an affirmative resolution by the British House of Commons.

No agreement had been reached on the economic side, however. The Maltese delegation had contended that, subject to their readiness to bear British taxation, the Maltese people should be entitled to social benefits equivalent to those in the United Kingdom. The British Government, on the other hand, had maintained that progress in Maltese living standards should be directly related to increased productivity in the island.

In an endeavour to resolve the deadlock on the economic questions, further talks between the two Governments were held in London from Oct. 1 to Nov. 8, 1957. A statement issued by the Colonial Office on the latter date said that the two delegations were "now in a position to put fully worked-out proposals to their Governments," and that a White Paper would be issued in due course. The talks had covered, *inter alia*, the strong representations made by the Maltese Government on the future of the naval dockyard and ways and means of encouraging industrial development, including the formation of an industrial advisory committee.

The setting-up of such a committee, under the chairmanship of Lord Hives (recently chairman of Rolls-Royce Ltd.), had been announced in London and Valletta on Nov. 6. It was stated that the other members of the committee would be Mr. Thomas Brand, Sir George Dowty, and Sir George Schuster, who had conducted an economic and financial inquiry in Malta in 1950 on the invitation of the then Maltese Government [see 10760 E; 10570 B]. The committee's terms of reference would be "to foster and encourage industrial development and promote tourism in Malta by stimulating interest among outside industrialists, and acting as liaison between them and the Maltese Government."

Despite the apparent success of the London negotiations, Mr. Mintoff—speaking in the Legislative Assembly on Nov. 20—unexpectedly accused Britain of delay in carrying out the integration plan.

Mr. Mintoff alleged that there were "serious indications of second thoughts on the part of the British Government in deciding to accept Malta's offer for closer union with Great Britain." The British delegation at the London talks had not taken the basic principle of integration for granted, and were referring the matter to the Cabinet. "The British Government," he continued, "are apparently weighing in the balance the unquestionable loyalty of our people . . . and the desire for closer union, against narrow British interests in the Mediterranean. There seems to be a growing ominous mood in certain British Government quarters to shed Britain's responsibilities in the Mediterranean on to other shoulders." On the question of the dockyard, Mr. Mintoff said that, according to calculations by private firms, there would be at least 7,000 discharges if civilian firms were to replace the Admiralty. He had made it clear to Britain, however, that if the dockyard were closed Britain would "have to leave Malta."

On Nov. 29, however, Mr. Mintoff announced at a rally of dockyard workers that he had just heard from Mr. Lennox-Boyd (*a*) that the dockyard would not be "closed overnight"; (*b*) that there was work for another three years; (*c*) that the present level of employment would be maintained; (*d*) that there would be no drastic economies; and (*e*) that it was not yet known whether the yard would in future take Admiralty or civilian work, or both. This news, Mr. Mintoff added, was "possibly the beginning of the road to salvation."

Mr. Mintoff withdraws Resignation Offer.

A brief Cabinet crisis occurred on Dec. 14 when Mr. Mintoff submitted his resignation to the Governor on the grounds of "a serious lack of confidence" recently shown in him by the executive committee of the Admiralty section of the General Workers' Union. Mr. Mintoff proposed at the same time that Mr. J. Ellul Mercer, the Deputy Leader of the Labour Party and Minister of Works and Reconstruction, should succeed him in the Premiership.

In a statement later the same day, the Secretary of the G.W.U. Admiralty section explained that the dispute had arisen in connexion with Mr. Mintoff's speech to the dockyard workers' rally on Nov. 29 [see above]. The executive committee of the Admiralty section had complained to Mr. Mintoff that by "distinguishing" political supporters in the crowd he had "exceeded the hospitality accorded you." Mr. Mintoff had threatened to resign if the letter were not unconditionally withdrawn, but the executive committee refused to withdraw under duress, though emphasizing that there was "no question of a lack of confidence" in Mr. Mintoff.

On Dec. 16, however, the executive committee announced that, "having considered the unity of the Labour movement and the interests of the nation," it was prepared to withdraw its "offending" letter. Mr. Mintoff accordingly withdrew his resignation, with the Governor's agreement.

In a statement to the House on Jan. 23, Mr. Lennox-Boyd said that he had "never disguised my belief that the policy of integration is the best for Malta and in the long run for the U.K.," and that he "deplored actions which prejudice the successful accomplishment of this aim." He added that the Maltese Assembly's resolution—which, he pointed out, had not been rescinded—"does not help the cause of integration." (Times - Daily Telegraph - Manchester Guardian)

A. SOVIET UNION - WESTERN POWERS.—Marshal Bulganin's Correspondence with Western Leaders. - Soviet Proposals for "Summit" Meeting.

The Note exchanges between the U.S.S.R. and the Western Powers on outstanding international problems, initiated by Marshal Bulganin in the early months of 1957 (see 15625 A), culminated in December in a series of Soviet Notes to all 82 member-countries of the United Nations, as well as Switzerland, in which Marshal Bulganin put forward the Soviet Government's proposals for a *détente* in international relations, with special reference to the suspension of nuclear tests and the creation of a security zone in Europe. These proposals, presented on the eve of the North Atlantic Council meeting in Paris (see 15965 A), were followed later in December by new Soviet proposals for a "summit" conference of Heads of Governments. Further Soviet Notes were sent on Jan. 8, 1958, to all U.N. member-nations, to the NATO countries, and to Switzerland calling for a "summit" meeting at Geneva "in the course of the next two or three months."

The voluminous exchanges of Notes and proposals—most of which ran to many thousands of words—are summarized below in chronological order, under relevant cross-headings. Covering a period of six months (July 1957 to the beginning of January 1958), they comprised :

(1) Marshal Bulganin's reply (July 20) to Mr. Macmillan's letter of June 14 [see page 15626], in continuation of the correspondence initiated by Marshal Bulganin in April.

(2) Mr. Macmillan's reply (Sept. 2) to Marshal Bulganin's letter of July 20.

(3) The Soviet Government's reply (Sept. 3) to the Western Powers' Notes on the Middle East [see pages 15625-26] in response to the earlier Soviet Notes on this subject.

(4) The Western Powers' replies (Sept. 24) to the Soviet Notes of Sept. 3 on the Middle East.

(5) A series of letters by Marshal Bulganin (Dec. 10-14) to all U.N. member-States, to the NATO countries, and to Switzerland, as mentioned above.

(6) A seven-point resolution by the Supreme Soviet of the U.S.S.R. (Dec. 21), adumbrated in a speech by M. Khrushchev, proposing a "summit" conference for the settlement of international problems.

(7) A further series of letters by Marshal Bulganin to all U.N. member-States, the NATO countries, and Switzerland (Jan. 8, 1958) recapitulating the Soviet proposals for a "summit" meeting of Heads of Governments.

The Macmillan-Bulganin Correspondence.

In a 6,000-word letter to Mr. Macmillan, dated July 20, 1957, Marshal Bulganin expressed his "disappointment" at the British Prime Minister's letter of June 14, which was itself a reply to Marshal Bulganin's first letter of April 20.

Marshal Bulganin to Mr. Macmillan.

Marshal Bulganin's second letter was largely a recapitulation of the Soviet viewpoint on international problems as set out in his first letter to Mr. Macmillan. He referred at great length to the Soviet proposals for a two- or three-year suspension of nuclear weapon tests, presented in the London sub-committee of the U.N. Disarmament Commission [see 15941 A]; accused Britain and the other Western Powers of procrastination in the disarmament negotiations; and criticized the fact that "the U.K. Government tends to link the solution of the disarmament problem with the settlement of unsolved political issues such as the complicated question of German reunification."

After requesting the U.K. Government to adopt a "constructive attitude" towards the Soviet Government's disarmament proposals, Marshal Bulganin expressed "profound disappointment" at Mr. Macmillan's views on the problem of European security. Reiterating the Soviet proposal for a general European collective security treaty, or, "as a first step," for a non-aggression pact between the NATO and Warsaw Treaty countries, he rejected Mr. Macmillan's contention that "the conclusion of such an agreement between the two groupings of States would add nothing to the obligations which members of the United Nations have already undertaken." In this connexion Marshal Bulganin expressed his support for the "Eden plan" of 1955, which envisaged "a study of the possibility of establishing a demilitarized zone between East and West." He added that the Soviet Government were "prepared to resume discussions on these British proposals."

After attacking the "NATO military bloc," and declaring that the "aggressive activities" of NATO were "primarily directed against the U.S.S.R.," Marshal Bulganin said that the problem of ensuring European security had assumed "particular urgency" because of the "measures taken . . . to equip the armed forces of European member-States of NATO, including the German Federal Republic, with atomic weapons." He added that "the concentration of atomic weapons in Europe and the unleashing of an atomic arms race between European States involves a menacing increase in the danger of atomic war breaking out in Europe."

Marshal Bulganin went on to express "regret" that Mr. Macmillan had "remained silent" on the Soviet Government's proposals "to condemn the use of force as a means of solving problems in the Near and Middle East." As regards the German problem, he reiterated the Soviet view that *rapprochement* between the two German States was an essential pre-condition to any solution, and accused the Western Powers of pursuing "a policy of reviving German militarism and of military alliance with the revenge-seeking forces in Western Germany."

In the final section of his letter, Marshal Bulganin expressed himself at great length in favour of expanding economic and cultural contacts between the two countries. As regards the former subject, he complained that the British Government, "on the basis of restrictions on international trade which are in operation for NATO countries," had banned the export to the U.S.S.R. of "many types of machinery, equipment, and ships," representing "nearly half the volume of orders proposed by the Soviet side." Regarding cultural exchanges, Marshal Bulganin asserted that the British authorities had "refused to carry out a number of important measures previously agreed upon," with the result, *inter alia*, that Russian ballet companies had been unable to perform in Britain or British ballet companies in the Soviet Union. [Reciprocal visits had been planned before the Hungarian uprising, but the British ballet company had refused to go to Moscow as a protest against the Soviet intervention in Hungary; as a result, a projected visit by Soviet artistes to London was cancelled.] Marshal Bulganin also referred to "the biassed nature of B.B.C. broadcasts and at times their hostile character in relation to the U.S.S.R., which arouses indignation amongst Soviet radio listeners."

In conclusion, Marshal Bulganin said that Mr. Macmillan's letter of June 14 contained "no new constructive proposals whatsoever" and "expresses a negative attitude towards nearly every proposal contained in my message to you."

Mr. Macmillan to Marshal Bulganin.

The text of Mr. Macmillan's reply to Marshal Bulganin's second letter was released in London on Sept. 2, 1957.

As regards disarmament, Mr. Macmillan said that the proposals put forward in the London sub-committee by the British, U.S., French, and Canadian Governments represented "an important contribution, both practical and imaginative, towards agreement between us." He (Mr. Macmillan) "earnestly trusted" that they would receive favourable consideration from the Soviet Government, but the Western Powers were "not encouraged by Mr. Zorin's intervention in the sub-committee on Aug. 27" [see page 15943].

On the question of European security, Mr. Macmillan expressed "disappointment that you have not answered the fundamental questions . . . which I posed in my letter of June 14." With reference to Marshal Bulganin's suggestion that the European States and the U.S.A. should "jointly bind themselves not to afford military or economic assistance to any State violating the peace of Europe," Mr. Macmillan declared : "Perhaps you have overlooked the fact that this undertaking has already been given, voluntarily and unilaterally, by the members of NATO on Oct. 23, 1954, when they associated themselves with the declaration by France, the U.K., and the U.S.A. made on Oct. 3, 1954. A similar obligation to withhold support from an aggressor was contained . . . in the outline Treaty of Assurance put forward by the Western Powers at the Geneva Conference of Foreign Ministers in 1955."

As regards the Middle East, Mr. Macmillan wrote : "I note your statement that the sole consideration which guides the Soviet Union in its approach to the problems of the region is the desire to contribute towards ensuring a lasting peace there. I welcome this declaration but I must frankly say that the actions—especially the recent actions—of the Soviet Government have appeared in a somewhat different light . . ."

After saying that he shared Marshal Bulganin's views on the desirability of closer economic and cultural relations between Great Britain and the Soviet Union, Mr. Macmillan stressed that his letter of June 14 had made it clear that H.M. Government were in favour of expanding Anglo-Soviet trade. Moreover, it contained "constructive proposals offered in a genuine desire to increase this trade." The restrictions on the export of certain goods to the U.S.S.R., however, were "a separate matter," and "until there has been a considerable easing of international tension, there can be no question of withdrawing those restrictions which H.M. Government and their allies feel compelled to impose in the interests of their own security." Nevertheless, he (Mr. Macmillan) could not agree that these restrictions prevented a wide development of Anglo-Soviet trade—in which connexion the Prime Minister pointed to the "large range of goods which can be freely exported from the U.K. to the Soviet Union and in which a further expansion of trade would be possible if the Soviet Government so desired."

As regards cultural contacts, Mr. Macmillan wrote : "The interpretation which our two Governments place on the events which have taken place in Hungary differ; but what is incontestable is that British public opinion was deeply shocked by the intervention of Soviet forces in the Hungarian uprising. A decision by the British Government to renew their sponsorship of certain large-scale cultural projects which were under discussion last year would not be welcome in this country in present circumstances. Nevertheless . . . the British Council is at present conducting a programme of officially-sponsored exchanges and visits. It has recently proposed discussions which it hopes will lead to a big programme of youth exchanges . . . I hope that political conditions will make it possible to increase

these contacts as time goes on, and that the Soviet Government will take steps to remove all barriers to the free exchange of persons and information between our two countries, to which I referred in my letter of June 14."

Mr. Macmillan went on to say that the ending of Soviet jamming of B.B.C. broadcasts would be "an important contribution to the improvement of Anglo-Soviet relations and would remove one of the most serious obstacles to the free exchange of ideas." He added: "As regards the broadcasts by the Russian Service of the B.B.C., no complaints were received during the period when jamming was temporarily lifted last year. If jamming ceased, we should be very ready to consider complaints about particular broadcasts, just as we should reserve the right to complain about objectionable broadcasts to the U.K. by Moscow radio. Soviet listeners would be under no obligation to listen to broadcasts which they found objectionable; like British listeners in similar circumstances, they could switch off their sets."

The Prime Minister concluded: "I am sincerely convinced that we shall achieve results with at least some of the problems which remain to be solved if both sides wish for this. But we must approach this task with sincerity and tolerance if we are to reach understanding. It is sometimes better that disagreement should be openly expressed, not camouflaged in obscure wording. In this way we may find a basis for agreement. These considerations have been uppermost in my mind during my study of your letter."

Note Exchanges on Middle East.

The earlier Note exchanges on the Middle East were continued on Sept. 3, 1957, by further Soviet Notes to the U.S., British, and French Governments, worded in similar but not identical terms. Brief summaries are given below:

Note to United States. After complaining that the U.S. Government had "refused to accept" the Soviet proposals for a Middle East settlement [see 15370 A], the Note accused the U.S.A. of pursuing in the Middle East "the so-called policy of strength, guided by the interests of the American oil monopolies and disregarding the national interests of the peoples of that region." References to the Anglo-French and Israeli "armed attack on Egypt" were followed by denunciations of the "Eisenhower doctrine" and by assertions that the U.S. Sixth Fleet had undertaken "a military demonstration in connexion with the events in Jordan" [see 15561 A]. Accusing the three Western Powers of "continually creating more and more hotbeds of conflict" in the Middle East, the Note spoke of the "unprovoked aggression by Britain against the people of Oman," of the "bombing of Omani towns and villages by British aircraft," and of the "inhuman methods" allegedly employed by British troops in "destroying Omani inhabited localities and shooting peaceful residents." In conclusion, the Note spoke of the "anti-government conspiracy recently exposed in Syria, which was organized by official American representatives," and warned the United States of "the serious consequences of such a policy."

Note to Britain. After referring to British "military attacks on Egypt and Oman" the Note rejected the British Government's contention that the Baghdad Pact Organization was exclusively of a defensive character. It alleged in this connexion that the Karachi meeting of the Baghdad Pact Council [see 15617 A] had adopted decisions "aimed at the establishment of a unified command modelled on the North Atlantic bloc and at constructing military bases on the territories of the Moslem member-countries of the Pact and other Middle Eastern States." References to British "aggression" in Oman, similar to those contained in the Note to the U.S.A., were followed by denunciations of "disgraceful British bombings in Yemen." After asserting that the Arab-Israeli conflict would never have become acute if the three Western Powers had "refrained from using Israel as a tool of their colonialist policy," the Soviet Note alleged that the "Eisenhower doctrine" was in fact designed to "create favourable conditions for the final seizure of British positions in the area by American monopolies."

Note to France. The Soviet Note to France was on the same general lines as those to the U.S.A. and Britain. It referred, in addition, to "press reports of plans for an alliance between France and Israel directed against the Arab countries," and declared that "the conclusion of such an alliance . . . would encourage those elements among Israel's ruling circles who are most hostile to the Arab countries."

The U.S. reply, delivered in Moscow on Sept. 24, described the Soviet Note as "offensive in tone," a "cynical distortion" of U.S. objectives and actions in the Middle East, and as "clearly designed to serve Soviet propaganda rather than promote peace and stability in the Middle East." Rejecting the allegations contained in the Soviet Note, the U.S. Government stressed that the Soviet Union itself bore "primary responsibility for the present aggravation of tension in the Middle East" by its large arms shipments to certain countries of the area, which had set in motion "a chain of events leading to the present dangerous situation."

The British and French replies (also sent on Sept. 24) were in similar terms. The British Note, like the American, said that the large-scale supply of Soviet arms to certain Middle Eastern countries "cannot fail to aggravate the situation" and "leads inescapably to the conclusion that the Soviet Government are not sincere in their professed wish to see peace and stability in the Middle East." It added:

"H.M. Government see little useful purpose in refuting in detail the many inaccuracies and distortions in the Soviet Note . . . But they feel obliged to draw attention to the groundless nature of the allegations made in connexion with the Yemen and Oman. British forces have never bombarded Yemen territory. With regard to 'Oman,' the district in question has in fact been an integral part of the dominions of the Sultan of Muscat and Oman since the 18th century and has been recognized as such in a number of treaties concluded by the Sultan with foreign Powers. The action taken by H.M. Government in this area was carried out at the express request of the Sultan of Muscat and Oman, with whom H.M. Government are in close and friendly relations, on the occasion of an internal uprising stimulated from outside the country. Consequently there can be no question of British 'aggression' against Oman . . ."

The sharply-worded French reply accused the Soviet Government of "using these exchanges of views between Moscow and the Western capitals for propaganda purposes, by interpreting the facts in a tendentious manner and pretending to treat baseless rumours as real." It added that "the interest shown by the Soviet Union in the settlement of Middle Eastern problems seems in sharp contradiction with the massive deliveries of war materials to Syria."

Marshal Bulganin's Notes to U.N. Member-States, NATO Countries, Spain, and Switzerland.

As stated above, Marshal Bulganin sent Notes to all the 82 U.N. member-nations, to the 15 NATO countries, to Spain, and to Switzerland between Dec. 10-14 that is, on the eve of the Paris meeting of the North Atlantic Council attended by the Heads of Government of NATO countries.

Notes to U.N. Member-States.

In his Notes to the U.N. member-countries (all of which were identically worded), Marshal Bulganin proposed (1) the suspension of nuclear weapons tests for a two- or three-year period as from Jan. 1, 1958; (2) the creation of a demilitarized zone in Central Europe, covering Western Germany, Eastern Germany, Poland, and Czechoslovakia, in which no atomic armaments would be stockpiled or manufactured; (3) a non-aggression pact between the NATO and Warsaw Treaty organizations, based on the principle of "co-existence"; (4) "normalization" of the situation in the Middle East by mutual pledges between the U.S.S.R. and the Western Powers "not to take any steps infringing the independence of the countries of that area," and by renouncing "the use of force in the solution of questions bearing on the Middle East"; (5) maximum economic, cultural, and scientific collaboration between all countries.

The Notes expressed the Soviet Government's "profound concern at the present state of international relations," and said that "the risk of a new war breaking out with the use of nuclear weapons is sharply increased as a result of the actions taken by the members of the North Atlantic alliance." After denunciations of the "militarization" of Western Germany, of the "Eisenhower doctrine" (which, said Marshal Bulganin, "has virtually become the Eisenhower-Macmillan doctrine") and of "military-political blocs," the Notes went on to accuse the NATO countries of responsibility for the "cold war" and the "armaments race." A lengthy recapitulation of the Soviet viewpoint on the disarmament problem, and allegations of "insincerity" on the part of the Western Powers in the disarmament negotiations, were followed by a warning that a third world war would "most likely know no boundaries and its terrible consequences would greatly surpass anything mankind has ever experienced."

In putting forward the above-mentioned proposals, the Soviet Government expressed its conviction that their adoption would "radically improve the international situation . . . and be a major contribution to the strengthening of universal peace." It was stated that a "positive solution" depended "above all on the Great Powers—the Soviet Union, the Chinese People's Republic, the United States, the United Kingdom, and France—and first and foremost on the NATO member-States." Every member-nation of the U.N. was asked "to oppose . . . the stepping-up of the arms race and military measures aimed at preparing a nuclear war," and to do all in its power "to strengthen peace and friendly co-operation between the nations."

Notes to NATO Countries.

Marshal Bulganin's separate Notes to the NATO countries (sent on Dec. 10-11) were addressed in each case to the Head of Government of the country concerned—that is, to President Eisenhower in the case of the United States and to the Prime Ministers of the other NATO countries. The Notes to President Eisenhower, Mr. Macmillan, and M. Gaillard repeated the proposals contained in the Notes to the U.N. member-countries, and, in addition, stated that the Soviet Union was ready to agree to a "summit" conference of Heads of Governments to discuss these proposals "and other questions which the parties to the meeting might find it necessary to consider."

The Notes to the different NATO countries were not identically worded but were drafted with special reference to the

position and situation of the country concerned. In the case of the European members of NATO, they contained warnings—similar to those previously addressed to Norway, Denmark and the German Federal Republic [see pages 15628-30]—of the dangers to which they would be exposed, in the event of a war, from Soviet "retaliatory" action against American atomic bases located in those countries. Brief summaries of some of the Notes to the NATO Powers are given below :

Note to United States. In his Note to President Eisenhower, Marshal Bulganin expressed his conviction that neither the American nor the Soviet peoples wanted war, and declared that it was "particularly important" for the U.S.A. and the U.S.S.R. to take the initiative in "breaking the ice of the cold war." After a lengthy attack on NATO and on the position taken by the Western Powers in the disarmament negotiations, the Soviet Prime Minister said that his country was "still prepared to reach agreement on effective disarmament measures" and that "it depends on the Western Powers whether the disarmament talks will be conducted in the right direction or whether the problem will remain one of stalemate."

In putting forward the above-mentioned proposals, Marshal Bulganin also called for the conclusion of a Soviet-American treaty "proclaiming the firm resolve of both our countries to develop relations of friendship and peaceful co-operation"; for measures "to halt the present propaganda in the Press and radio which generates mutual distrust, suspicion, and ill-will"; and for co-operation between American and Soviet scientists "in the further harnessing of the elemental forces of nature." In the course of his letter Marshal Bulganin spoke of the "mistaken reactions of certain groups" in the U.S.A. to the Soviet *sputnik* launchings, and emphasized that the U.S.S.R. had "no intention of attacking the United States or any other country" Marshal Bulganin concluded his letter "Knowing you [the President] as a man of broad vision and peaceful convictions, I trust you will understand this message rightly and . . . will be ready to pool the efforts of both our countries . . . in the direction of lasting peace and friendly co-operation."

Note to Great Britain. Marshal Bulganin's Note to Mr. Macmillan was broadly similar to that sent to President Eisenhower, containing the same proposals for an international *détente* and for a "summit" meeting, and referring *inter alia* to the Soviet Government's desire for the widest Anglo-Soviet co-operation "in all fields of science and engineering, culture and the arts, education and health."

In the course of his letter Marshal Bulganin referred to "such NATO measures as round-the-clock flights over the British Isles by British-based American bombers carrying atomic and hydrogen bombs." He added in this connexion : "Such actions are obviously dictated by the desire to show that the armed forces of NATO, or to be more exact the American Air Force, are in military readiness, and thereby to reassure the British, French, Belgians, Dutch, and the peoples of other NATO countries. But . . . such actions place in a very dangerous situation indeed those countries which are the bases for the American atomic air force. It cannot be denied that flights by American aircraft carrying atom and hydrogen bombs create a situation whereby the fate of peace in Europe, and not only in Europe, depends to a large extent not only on one particular commander but even on one individual airman . . . It is not surprising that voices reach us increasingly from Britain expressing a sense of deep concern . . . "

In concluding his letter to Mr. Macmillan, Marshal Bulganin said that the Soviet Government were prepared to examine any views which the U.K. Government might wish to set out "with a view to normalizing the international situation and developing relations between our countries."

Note to France. In presenting Marshal Bulganin's Note to M. Gaillard, the Soviet Ambassador in Paris (M. Vinogradov) stressed that it was not identical with those sent to the other NATO Heads of Government, that it "specially concerned France," and that it constituted "a message of peace and friendship."

The Note began with the assertion that "no matter how much the NATO countries increase their armaments, they cannot alter the fact that, with the creation of the [Soviet] inter-continental ballistic missile, the United States—NATO's most powerful member—has lost the earlier advantages of its geographical position and has become just as militarily vulnerable as its West European allies." After saying that it was "a matter of common knowledge that American military bases are situated on French soil at Bordeaux, Chaumont, Tulle, Laon and elsewhere," Marshal Bulganin referred [as in his Note to Mr. Macmillan] to American "round-the-clock patrol flights over France, Britain and other West European countries with atom and hydrogen bombs on board." He added that "things have come to such a pass that the fate of millions of people in different countries depends on some American airman whose blunder, recklessness, or evil intent may plunge mankind into a new war." Marshal Bulganin also said that France should "take into account the very important fact that forces which have not reconciled themselves to Hitler Germany's defeat, and which are only waiting for a suitable moment to launch military adventures once again, continue to exist and enjoy considerable prestige in present-day Western Germany."

Marshal Bulganin continued : "We trust that the French people—a people whom the Soviet people deeply respect for their nobility of sentiment and keen intellect, and with whom they have ties of enduring friendship cemented by blood shed in the struggle against a common enemy—will be able to distinguish falsehood from truth and realize the real worth of the inventions about the Soviet Union's intentions which are being disseminated in the West . . . This great country [France] is now forced to expend her national resources on war preparations which are not needed by her but by others ; on conflicts which could have been avoided and which bring the French people nothing but privations . . . We are sincerely convinced that there are no real conflicts of interest between the U.S.S.R. and France, with the possible exception of those which have been created artificially as a result of the policy of setting up exclusive military blocs . . . Respecting the noble traditions of the French people and their ardent love of peace, and taking into account the fact that France suffered heavy losses in the First and Second World Wars, I put the following question to you [M. Gaillard] : Why should France not take the initiative and advance at the forthcoming NATO Council session a proposal designed to ease international tensions and develop peaceful co-operation between all States ? I can assure you that the Soviet Union is prepared to support such a step . . . "

Note to Western Germany. In his message to Dr. Adenauer, Marshal Bulganin said that "a country which is thousands of kilometres away from European shores [i.e the U.S.A.] has set up in Western Germany, France, Britain, Italy and other States a network of military bases designed for atomic war." The leading West European nations, "under the leadership of the United States," had "thus formed an exclusive military group and set themselves in opposition to the East European countries." Marshal Bulganin added : "The so-called inter-dependence doctrine, formulated by the United States and Great Britain behind the backs of their NATO partners, indicates that the U S.A , with Britain's support, has set itself the task of using the scientific, economic, and manpower resources of the other members of the bloc for implementing its military and political plans. In other words, the roles are divided thus : some are to supply dollars and military equipment, while others must supply cannon-fodder and expose their territory to the first retaliatory blow designed for the aggressor . . . "

After commenting that the German Federal Republic "could have made an important contribution to the easing of international tension" owing to its "great economic potential, high level of scientific development and technology, and geographical position," Marshal Bulganin said that the Federal Republic was "not only evading any steps in that direction but is to a considerable extent responsible for the present international tension and for the division of Europe into arbitrary military groupings." Moreover, it was "becoming more and more obvious that the Federal Republic is ready to proceed with atomic armament." After alleging that the Western Powers were converting Western Germany into "their atomic bridgehead," Marshal Bulganin went on :

"It is a dangerous delusion on the part of those who claim that the stationing of atomic bases in Western Germany is compatible with the security interests of the Federal Republic. Western Germany lies directly on the line of contact between two military groupings, and any military target on its territory could be hit even by modern short-range weapons. This circumstance is perhaps of little concern to the military leaders of the country which has set up bases in the Federal Republic, far away from its own vital centres . . . What is to them the fate of Hamburg, Düsseldorf, Cologne or Munich ? But it is hard to understand those leaders of the Federal Republic who close their eyes to the fact that, if matters come to a military conflict, atomic bases on the territory of the Federal Republic would become a kind of magnet attracting retaliatory blows by modern military weapons from States defending themselves against aggression. The transformation of the Federal Republic into a launching-site for American rocket missiles, and the arming of the *Bundeswehr* with atomic weapons, will not make the Federal Republic less vulnerable, but will only increase the danger of war on its territory."

Note to Italy. In his Note to Signor Zoli, Marshal Bulganin alleged that "the sponsors of the Paris NATO session have in mind plans whose implementation would greatly increase the danger of war." He added : "It may be said that Italy is not among the authors of these plans and has no intention of waging war against any country directly. We have never doubted, and do not doubt, the peaceable nature of the Italian people. But it should be borne in mind that Italy is a member of a military bloc which . . . is engaged, day in and day out, in preparations for aggressive war . . . " Marshal Bulganin went on to say that "the stationing of foreign air, naval and ground atomic forces at Naples, Leghorn, Verona, Vicenza, Sardinia and elsewhere" had created "a grave threat to the security of the Italian people." In conclusion, he said that there had "never been any irreconcilable contradictions between the Soviet Union and Italy."

Note to Greece. Marshal Bulganin alleged, in his message to M. Karamanlis, that "the part assigned by the NATO leaders to Greece makes her a partner in plans which, if implemented, would bring great calamities on the Greek people." He alleged also that NATO intended to turn Greece into an "unsinkable aircraft-carrier" and, in the event of a war, into "a military jumping-off ground." After referring to the "long-standing bonds of cordial friendship" between the U.S.S R. and Greece, "tempered in the ordeals of the joint struggle against Nazi Germany," Marshal Bulganin said that the Soviet people "highly value the great contribution of the Greek people to the riches of world civilization."

Note to Turkey. In his message to M. Menderes, Marshal Bulganin alleged *inter alia* that "military bases and airfields on Turkish soil are to be placed in the event of war entirely at the disposal of the NATO Command and used for dealing blows at vital centres of the

Soviet Union." He also alleged that NATO was "making military plans for the use of the Black Sea straits against the Soviet Union" and that the Turkish Government had "agreed to the stationing of American task forces on Turkish soil."

Note to Belgium. In his Note to M. Van Acker, Marshal Bulganin said that "Belgians cannot feel secure when atomic and hydrogen depots are set up on their soil and when the question of their use is to be decided by American generals, and possibly Germans, heading the NATO staffs." After pointing out that Belgium had suffered from German invasion and occupation twice within the lifetime of a single generation, Marshal Bulganin said that "Belgium, which possesses rich uranium deposits [in the Congo], could contribute considerably to ending the arms race, particularly in the production of nuclear weapons, if she were to use these resources for peaceful purposes only."

Note to Netherlands. Marshal Bulganin's message to Dr. Drees referred to the NATO air base at Soesterberg, and stressed that the establishment of U.S. bases in Holland could entail "truly catastrophic consequences"—particularly "in view of the fact that a large part of Dutch territory is below sea-level." After references to the equipping of the West German armed forces with nuclear weapons, and allegations that NATO plans would "give the West German militarists and revenge-seekers a free hand in planning a new war," Marshal Bulganin recalled that the Netherlands, like her neighbour Belgium, had also been a victim of German invasion and occupation.

Notes to Norway and Denmark. The Notes to the Norwegian and Danish Premiers (respectively Hr. Gerhardsen and Hr. Hansen) were broadly similar to those sent by Marshal Bulganin in March 1957 [see pages 15628-29]. Like the earlier Notes, they stressed the consequences which atomic warfare would entail for the Norwegian and Danish peoples if U.S. nuclear bases were established on the territory of those countries.

Note to Canada. In his Note to Mr. Diefenbaker, Marshal Bulganin referred to "reports that the question of storing U.S. atomic and hydrogen weapons on Canadian territory, and of creating bases [in Canada] for launching rockets with hydrogen warheads, is being intensively discussed at the present time." He added that "the storing on Canadian territory of American atomic and hydrogen weapons creates a special danger for Canada in the event of a military conflict," and that no country could escape "a retaliatory atomic strike with devastating consequences" in the "present age of rocketry."

Note to Portugal. Marshal Bulganin's message to Dr. Salazar commented on the presence of NATO bases both in Metropolitan Portugal and in the Azores. It added that "the presence of foreign-controlled war bases in Portugal offers no escape from the disastrous consequences of modern war, especially in view of the development of military techniques."

Note to Spain.

In his Note to the Spanish Government, Marshal Bulganin said that "although Spain is not a NATO member, she nevertheless has military agreements with the United States binding her to the North Atlantic bloc." After referring to the fact that U.S. air and naval bases had been established in Spanish territory under these agreements, Marshal Bulganin drew attention to "the risk run by the population of Spanish cities near foreign military bases in the event of the NATO strategists unleashing a new war.

Note to Switzerland.

In his Note to the Swiss Government, Marshal Bulganin said that "in present circumstances no Government, not even the Governments of neutral countries, can remain indifferent to the danger of a new war." As a peace-loving nation with a policy of permanent neutrality, Switzerland could make "a definite contribution to the easing of international tension and the strengthening of trust and peace among the nations."

After recalling the Conference of Heads of Governments in Geneva in 1955, and saying that the U.S.S.R. had fully supported Switzerland's initiative in November 1956 for a similar great-Power conference [see 15216 B], Marshal Bulganin said that the Soviet Government would give careful consideration to any proposals the Swiss Government might put forward. He enclosed a copy of the Soviet proposals sent to the U.N. member-countries.

"Peace Resolution" adopted by Supreme Soviet. - M. Khrushchev's Statement.

After hearing speeches by M. Khrushchev and M. Gromyko, the Supreme Soviet of the U.S.S.R. unanimously adopted on Dec. 21 a seven-point "peace resolution" in which it was proposed that the three "nuclear Powers"—the United States, the Soviet Union, and Great Britain—should agree on the following measures :

(1) A pledge not to use atomic or hydrogen weapons; (2) cessation of all nuclear and thermo-nuclear tests as from Jan. 1, 1958; (3) an "atom-free" zone in Central Europe, comprising Eastern and Western Germany, Poland, and Czechoslovakia, in which nuclear weapons should be neither stockpiled nor manufactured; (4) a "significant reduction" of armed forces by the three Powers; (5) a non-aggression pact between NATO and the Warsaw Treaty Organization; (6) an agreement not to take any steps infringing the independence of the Middle Eastern countries, and to refrain from using force in solving the problems of the area; (7) cessation of "war propaganda," and intensification of trade, cultural, and scientific exchanges.

The resolution also expressed the conviction that "a personal meeting of the leading statesmen of the Powers and a discussion by them of pressing international problems would contribute towards . . . a relaxation of international tension and the strengthening of mutual understanding."

M. Khrushchev made a speech in which he recapitulated the Soviet viewpoint on international problems—in particular, the disarmament problem. After calling on "the imperialists" to "end the policy of cold war and the arms race," he continued :

"We say to the Western countries, primarily the United States—discard your unreasonable and compromised policy of 'positions of strength' to the garbage-heap of history where it belongs. Let us settle outstanding issues by peaceful negotiations, soberly and without *Diktats*; let us discuss on an equal footing the problems agitating mankind; let us rule out war as a means for solving international problems; let us recognize the *status quo*—that is, the situation now prevailing in the world, characterized as it is by the existence of socialist and capitalist States, let us refrain from interfering in each other's internal affairs.

"We declare that, however acute the ideological differences between the two systems—the socialist and the capitalist—we must solve disputed questions among States not by war but by peaceful negotiation. We suggest that competition in inventing new weapons be replaced by peaceful competition. The history of a social system will be decided not by rockets or by atomic and hydrogen bombs, but by which system ensures greater material and spiritual benefits to man."

After appealing for a "summit" conference to discuss international problems "in a businesslike manner and on a footing of equality," M. Khrushchev suggested that such a conference could be preceded by a meeting of U.S. and Soviet representatives. "In the communiqué issued after the NATO conference in Paris," he added, "the Western nations say they will never attack the Soviet Union unless they are attacked first. That is not badly put. The Soviet Union agrees with the NATO suggestion to examine all proposals leading to the relaxation of tension. Why cannot NATO and the Warsaw Pact countries agree on such questions? . . ."

After saying that modern rocket weapons had "made it impossible for an aggressor to escape retaliation, wherever he might be," M. Khrushchev commended the attitude taken by Denmark and Norway, which had "refused to have missile bases on their territory and have judged the situation correctly." He expressed "astonishment" that Italy, Turkey, and "certain other countries" had agreed to the establishment of such bases on their territories, adding that "atomic bases and rocket-launching sites will present exceedingly attractive targets" in the event of war. In conclusion, M. Khrushchev expressed his conviction that 1958 would see a relaxation in international tension, and declared that the Soviet Government would "not spare its efforts to put a complete, or at least a partial, end to the cold war."

Marshal Bulganin's Proposals for "Summit" Talks. - Further Notes to Heads of Governments.

On Jan. 8, 1958, Marshal Bulganin sent further Notes to the Heads of Government of 19 States (including all the NATO countries, as well as Sweden and Austria) proposing a summit conference "during the next two or three months." Copies were sent to all U.N. member-countries and to Switzerland. Marshal Bulganin suggested that such a conference should be held at Geneva, if the Swiss Government agreed, and set out nine proposals for an agenda. The main points of his message are summarized below under cross-headings :

The NATO Conference. Referring to the recent NATO conference in Paris, Marshal Bulganin said : "The documents issued [at the conference] . . . say that the Organization 'will never be used for aggressive purposes' and that its member-countries 'are always ready to solve or settle international problems by negotiation, taking into account the legitimate interests of all.' If that is so . . . then there is no obstacle to appropriate agreements being reached by means of negotiations in the interests of peace."

Preliminary Considerations. "The Soviet Government (Marshal Bulganin continued) bears in mind the fact that it would, of course, be difficult at such a [summit] conference to reach agreement on all questions. The attention of such a conference should be focused primarily on the most urgent questions, the settlement of which would lay the basis for an improvement in the whole international situation. Examination of other problems could be deferred to subsequent negotiations. If initial agreement was reached on a few individual questions, this would be conducive to the settlement of other outstanding international problems as well. The gradual solution of outstanding problems at the present time, when the necessary confidence in relations between States is still lacking, appears to be the most realistic method."

Proposed Agenda for Summit Conference. After urging that a "summit" meeting should take place "during the next two or three months of this year," Marshal Bulganin proposed a nine-point agenda for such a conference, based on the seven points of the Supreme Soviet's "peace resolution" and amplifying them in certain respects. The proposals were :

(1) The immediate ending of nuclear and thermo-nuclear tests for a period of two or three years.

(2) A pledge by the three "nuclear Powers" to renounce the use and manufacture of atomic and hydrogen weapons.

(3) The creation of an atom-free zone in Central Europe comprising Western Germany, Eastern Germany, Poland, and Czechoslovakia, in which atomic and hydrogen weapons would be neither stockpiled nor manufactured.

[As stated below, the creation of such a zone was originally proposed by the Polish Foreign Minister, M. Rapacki. Marshal Bulganin expressed the Soviet Government's full support for this proposal, declaring that the establishment of such a zone would be "received with relief by the peoples of other countries" and would constitute "an important landmark on the road to the total prohibition of atomic weapons."]

(4) The conclusion "in one form or another" of a non-aggression pact between NATO and the Warsaw Treaty Organization. Marshal Bulganin said in this connexion: "The declaration adopted at the December session of the NATO Council states that that Organization will not be used for aggressive purposes. Judging by this statement, the idea of a non-aggression agreement between the two military groupings should meet with no objection on the part of the member-States of the North Atlantic Alliance."

(5) A reduction in the Soviet and Western military forces stationed in Germany, and also in the territories of NATO and Warsaw Treaty member-countries. Marshal Bulganin said that these measures would "help to create conditions for a *rapprochement* between the two German States."

(6) Ground and aerial inspection measures to safeguard all the countries concerned against the dangers of a surprise attack. As regards aerial inspection, Marshal Bulganin proposed "that an agreement be reached on establishing an 800-kilometre [nearly 500 miles] zone of aerial photography on either side of a line dividing the opposing military groupings in Europe."

(7) Expansion of international trade, and the removal of "artificially-created legal obstacles whereby many countries are placed in an inequitable position as compared with other States."

(8) Measures to "put an end to the war propaganda which is being conducted in certain countries at the present time."

(9) An agreement on the Middle East whereby the Great Powers would "take no steps to violate the independence of the countries of that area, renounce the use of force in the settlement of Middle Eastern questions, remove all outside interference in the domestic affairs of the countries of the area, and help to strengthen the sovereignty and national independence of the Middle Eastern countries."

Discussion of Other Questions. In addition to the questions proposed for discussion in the above agenda, Marshal Bulganin suggested that the participants in a "summit" conference should also examine "other constructive proposals conducive to ending the cold war," with a view to a further examination of such matters at subsequent conferences "and also within the framework of the United Nations." In view of the differences between the Soviet and Western viewpoints on a number of important questions—e.g. the "elimination of foreign military bases" and the creation of a European collective security system—the Soviet Government recognized that "summit" discussions on these matters were unlikely to lead to any "positive results." Later, however, "after measures agreed at the proposed conference have been carried out, and a certain minimum of international confidence thereby created, the appropriate conditions will emerge for carrying out more radical measures, including disarmament."

Position of Communist China. Marshal Bulganin declared that it "goes without saying that all questions directly relating to the Chinese People's Republic can only be solved with its participation." He added that the Soviet Government "deems it necessary once again to declare that the policy of preventing People's China from taking a direct part in the consideration of outstanding international problems is gravely detrimental to the international atmosphere as a whole and to the work of the United Nations."

German Reunification. The ending of the "cold war" and the establishment of international co-operation would, in the Soviet Government's view, "undoubtedly facilitate the settlement of the German question on the basis of drawing the German Democratic Republic and the German Federal Republic closer together." A Confederation of the two German States, as proposed by the German Democratic Republic, would be "an important step towards the formation of a united, peace-loving, and democratic Germany" and would "create the pre-requisites for the conclusion of a peace treaty with Germany."

Proposed Membership of "Summit" Conference. As the proposed "summit" conference would consider disarmament, expansion of international trade, and other matters "which concern a large number of countries belonging to neither of the groupings" [i.e. NATO or the Warsaw Pact], Marshal Bulganin suggested that "such countries as India, Afghanistan, Egypt, Sweden, Yugoslavia, and Austria" should also participate in the "summit" meetings.

Opposition to Foreign Ministers' Meeting. In conclusion, Marshal Bulganin opposed the idea of a conference at Foreign Ministers' level [before a "summit" conference] on the ground that "there is no confidence that such talks would lead to positive results." He added that "pronouncements by certain statesmen who oppose the very idea of East-West talks indicate that at the present time talks at such a level would meet with serious difficulties and create further obstacles to convening a conference of Heads of Governments."

Marshal Bulganin's letters to President Eisenhower, Mr. Macmillan, M. Gaillard, and other Heads of Governments were worded in generally similar though not identical terms. They recapitulated the Soviet viewpoint on international problems as set out in Marshal Bulganin's earlier letters; urged the importance of a "summit" conference to settle outstanding problems; and stressed the dangers of atomic warfare with modern weapons. In his letters to the NATO Heads of Governments, Marshal Bulganin welcomed the North Atlantic Council's declaration on the need to settle international problems by negotiation, though reiterating his previous criticisms of NATO policy.

The letter to **President Eisenhower** asked *inter alia* how the "professions of the peaceful aims of NATO can be reconciled with round-the-clock patrolling of the airspace of certain West European countries by American bombers carrying atomic and hydrogen bombs." References to the dangers of an arms race and an eventual conflict with modern nuclear weapons, "the frightful effect of which defies comparison with what happened at Hiroshima and Nagasaki," were followed by a plea for the world's leading statesmen "to pool their efforts to achieve a decisive turn in the international situation." After expressing confidence that a summit meeting "can prove productive if we all show the necessary respect for one another's interests and do not inject into the talks a spirit of intolerance, bias, and dictation incompatible with the peaceful aspirations of the peoples," Marshal Bulganin ended his letter to President Eisenhower: "Knowing ... that you hold the destinies of peace near to your heart, I sincerely believe that you will give these proposals careful consideration."

The letter to **Mr. Macmillan** criticized the "decisions to put ballistic missiles at the disposal of the NATO Supreme Commander and to establish stockpiles of nuclear warheads, atomic bases, and rocket-launching sites on the territories of Western European countries." Re-emphasizing the dangers to which the peoples of Western Europe would be exposed in the event of a nuclear war, Marshal Bulganin said that in such an eventuality those countries containing atomic bases and rocket-launching sites would inevitably be subjected to "the first crushing blows dealt in retaliation for the action of an aggressor." He added that it was "not surprising that the British Government's decision to build several bases in the north of the country for launching American rocket weapons has aroused such a sharp reaction from the population of such cities as Glasgow, Edinburgh, and Aberdeen." In urging Mr. Macmillan's support for "summit" discussions, Marshal Bulganin referred to the fact that "people who can never be suspected of goodwill towards the Soviet Union—people like the well-known American diplomat, Mr. Kennan, and such eminent British public figures as Mr. Bevan, Mr. Cousins, Bertrand Russell, and Mr. Priestley—speak in favour of negotiations between East and West."

In his letter to Mr. Macmillan, and also to President Eisenhower, Marshal Bulganin referred to the recent cuts in the Soviet armed forces [see 15960 D] as evidence of his Government's desire to contribute to the relaxation of international tension.

Among the other letters, that to **M. Gaillard** reiterated the Soviet Government's view that France could "play a leading role in helping to end the cold war"; that to **Dr. Adenauer** laid special emphasis on the significance for Western Germany of an "atom-free" zone in Central Europe, and that to **Signor Zoli** expressed "grave concern" at Italy's "active support for the American plans for continuing the arms drive," adding that the Soviet Union could not "remain indifferent" to press reports that Italy had "agreed to the stationing of American missile bases on her territory in addition to the existing foreign atomic bases." The letter to **M. Menderes** also expressed the Soviet Government's "regret and disappointment" that Turkey had "revealed the desire to deploy foreign nuclear and rocket weapons on her territory," adding that "Turkey obviously does not realize fully the actual meaning of this dangerous step." On the other hand, the letters to **Hr. Hansen** and **Hr. Gerhardsen** expressed "great satisfaction" that Denmark and Norway had refused to have atomic weapons and rocket installations on their territories.

The Rapacki Plan.

The proposal for an "atom-free" zone in Central Europe, referred to by Marshal Bulganin in his letters dated Jan. 8, had been put forward by the Polish Foreign Minister, M. Adam Rapacki, in the U.N. General Assembly on Oct. 3, 1957. In a debate on disarmament M. Rapacki had declared that "if the two German States agree to impose a ban on the production and stockpiling of atomic and thermo-nuclear weapons on their territories, the Polish People's Republic is prepared simultaneously to impose a similar ban on its own territory." The Czechoslovak Government subsequently associated itself with this proposal and announced its willingness to ban nuclear weapons on its own territory on the same conditions—i.e. that Western and Eastern Germany should agree to such a ban on the territories of the two German States.

(Soviet Embassy Press Department, London - New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Montreal Star - Polish Embassy Press Office, London) **(Prev. rep. 15625 A.)**

Note. The Western replies to the Soviet proposals for a summit conference will be summarized in a subsequent issue. *(Ed. K.C.A.)*

A. SOVIET UNION. — Submarine Fleet.

The 1957-58 edition of *Jane's Fighting Ships*, published on Dec. 19, stated that atomic-powered submarines large enough to carry intermediate-range ballistic missiles with a radius of over 1,500 miles were under construction for the Soviet Navy. The I.R.B.M.s, believed to be an improvement on the German V-2 weapons, were about 70 feet long and weighed over 50 tons (the length and weight of a motor torpedo-boat), and could be fitted with thermo-nuclear warheads. The strength of the Russian submarine fleet was given as nearly 500, and it was expected that the Soviet Navy would have 700 submarines—including atomic-powered vessels—by 1961. *Jane's* added that the largest of these vessels were "regarded by the Russian Navy as their capital ships of the future in place of their battleships now discarded."

The publishers stated in their foreword to the new edition: "It is not impossible that nuclear-powered submarines with guided missiles could replace aircraft-carriers as the spearhead of naval warfare within a few years. The importance of underwater craft in sea warfare has increased considerably in recent times. Advances in nuclear propulsion enable submarines to remain submerged indefinitely and to launch guided missile attacks with far greater chances of survival than surface ships, including carriers. The major Powers are aware of the potentialities of submarines. But, although Russia may have superiority in numbers, the United States cannot be said to have lagged behind in pressing submarine design towards its ultimate development; indeed, she already has several nuclear-powered submarines and others carrying guided missiles. And Great Britain has just completed another new high-speed submarine and is well ahead with the design of a nuclear-powered submarine, the *Dreadnought*."

The principal trend in new Soviet naval construction was described as the shifting of emphasis from 15,000-ton high seas cruisers with a speed of 25 knots to fast ocean destroyers of 3,000 tons with a speed of 38 knots. The U.S.S.R. was also reported to be building escort destroyers or frigates of 1,000 tons with a speed of 27 knots, submarines of 750 tons with a speed of 18 knots, and motor torpedo-boats of 50 tons with a speed of 40 knots.

The figure of 500 submarines in the Soviet Navy was 100 more than that given in the 1956-57 edition of *Jane's Fighting Ships*.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Soviet Navy, NATO Estimate, page 15728.)**

B. KASHMIR. — Release of Sheikh Abdullah.

Sheikh Abdullah, the former Premier of Kashmir, who had been detained at Kud since his deposition in August 1953 by the present Chief Minister (Bakshi Ghulam Mohammed), was released on Jan. 8 and returned to Srinagar four days later, being enthusiastically welcomed by thousands of his supporters. Two of the Sheikh's followers who had been detained with him were also released.

At a press conference after his release Sheikh Abdullah said that he had quarrelled with the Indian Government in 1953 because of India's "anti-Moslem communalism," and in particular because Moslems had been excluded from the Army and other public services in Kashmir. In subsequent public speeches in Srinagar he maintained that Kashmir's accession to India was temporary and provisional; demanded the holding of a plebiscite; and justified the Pakistani invasion of Kashmir on the grounds of the alleged oppression of Moslems in Jammu and Poonch by the Hindu rulers of the State. Commenting on these speeches, Bakshi Ghulam Mohammed denied on Jan. 14 that Kashmir's accession to India was merely temporary; he claimed that in ratifying the State's accession to India, the Constituent Assembly—which had come into being when Sheikh Abdullah was leader of the National Conference—had only confirmed what he (the Sheikh) had already agreed to.

Bakshi Ghulam Mohammed had previously stated on Jan. 8 that no restrictions would be imposed on Sheikh Abdullah, although the Government would deal firmly with any attempts to jeopardize law and order. On Jan. 17 he issued a further warning to Sheikh Abdullah and his followers not to attack the Kashmiri Constitution, the cornerstone of which was accession to India.—(Indian High Commissioner's Office, London - The Statesman, Calcutta - Times)

(Prev. rep. 15381 A.)

C. INDIA. — Himalayan Mountaineering Institute.

The Himalayan Mountaineering Institute, on which work began at the end of 1954, was inaugurated near Darjeeling on Dec. 25 by Mr. Nehru. The first institute of its kind in India, it is designed to develop the "mountaineering spirit" among Indian youth and will have Sherpa Tenzing (who reached the summit of Everest with Sir Edmund Hillary) as its chief instructor.—(The Statesman, Calcutta) **(Prev. rep. 13955 C.)**

D. UNITED KINGDOM. — Gold and Dollar Reserves.

The Treasury announced on Jan. 3 that the sterling area's gold and dollar reserves had risen during December by $88,000,000, after taking into account (*a*) the payment of $3,000,000 to the E.P.U. in respect of the U.K.'s deficiency in November, and (*b*) the payment of $3,000,000 to creditor countries in the Union under bilateral settlements. As a result, the gold and dollar reserves stood at $2,273,000,000 on Dec. 31, 1957. This figure compared with $2,133,000,000 at Dec. 31, 1956 and with $1,850,000,000 the lowest level during the year—at Sept. 30, 1957, following the run on the pound during the preceding months.

It was also stated that payments during December included $8,000,000 to Canada on the interest-free loan and $7,500,000 in interest on certain U.S. loans. On the other hand, there would have been a fall in the reserves if there had been no postponement of interest and capital payments (amounting to $175,000,000) on the two main U.S. and Canadian loans.

Provisional figures for the E.P.U. December settlement showed that Britain had a deficit of £6,100,000, including £1,900,000 of interest on the accumulated debit balance with the Union. This deficit would be settled in January as to three-quarters in gold or dollars and as to 25 per cent by an increase in the U.K.'s debt to the Union.

It was pointed out at the Treasury that the E.P.U. figures had again been affected by special operations, such as French *ratissage* (the calling-in by the French exchange authorities of currency balances from their trading banks towards the end of the month), as well as by end-of-the-year "window dressing" by foreign banks and purchases of transferable sterling by foreign countries in order to improve their E.P.U. accounts.

The dollar rate for sterling kept above the $2.80 parity throughout December, reaching its highest point—and the highest level since May 17, 1956—at the end of the year, when the rate closed at $2.80⅛. The transferable sterling rate in Zürich, after a steady rise throughout the month, reached $2.7905 at Dec. 31.—(Treasury Press Office - Financial Times) **(Prev. rep. 15902 A; U.S. and Canadian Loans, 15911 B.)**

E. UNITED STATES. — Failure of First Attempt to launch Earth Satellite.

The first U.S. attempt to launch an earth satellite into outer space, made on Dec. 6 at Cocoa Beach (Cape Canaveral, Florida), resulted in failure when the carrier rocket blew up as the firing-button was pressed. The rocket was wrecked—in the words of the *New York Times*—"by a great fiery billow of flame nearly twice as high as the rocket itself." The satellite itself survived the explosion and remained undamaged. There were no casualties among personnel at the launching-site. The Office of Naval Research stated on Dec. 9 that the failure had been caused by a mechanical defect in the propulsion system, details of which remained "classified" and could not be released.

The satellite, which contained two transmitters, measured 6½ inches in diameter and weighed 3½ lb., compared with the 184 lb. of Russia's *Sputnik I* and the 1,118 lb. of *Sputnik II*. Its three-stage carrier rocket was 72 feet long, with a diameter of 45 inches.

Intense disappointment at the failure of "Project Vanguard" was expressed by the U.S. Press and all sections of American public opinion, coupled with demands by prominent Congressmen for a thorough investigation. Senator Lyndon B. Johnson, the Senate Democratic leader, described the failure as "one of the best publicized and most humiliating in our history," adding: "I shrink a little inside of me whenever the United States announces a great event—and it blows up in our face." [The Senator was referring to the great publicity given to "Project Vanguard" prior to the abortive launching attempt.] It was announced on Dec. 6 that President Eisenhower had asked the Defence Department for a full report on the matter.—(New York Times - New York Herald Tribune)

(Prev. rep. 14337 A; Soviet Sputniks, 15950 C.)

F. NETHERLANDS. — Cabinet Appointment.

Dr. A. Vondeling was sworn-in on Jan. 13 as Minister of Agriculture, Fisheries and Food in succession to Mr. S. L. Mansholt, following the latter's appointment as a vice-president of the Commission for the European Economic Community (Common Market)—see page 15958, second column. Like his predecessor, the new Minister is a member of the Labour Party.—(Algemeen Handelsblad, Amsterdam)

(Prev. rep. 15160 A.)

G. TUNISIA. — Membership of I.C.A.O.

Tunisia became the 72nd member of the International Civil Aviation Organization on December 18, 1957.
(I.C.A.O. Bulletin, Montreal) **(Prev. rep. 15640 B.)**

JANUARY 25—FEBRUARY 1, 1958

A. UNITED KINGDOM. — Atomic Energy. - Progress toward Control of Fusion Reactions. - Possibility of Power from the Ocean. - Statements by Sir John Cockcroft and U.K. Atomic Energy Authority. - The "Zeta" Machine.

The Director of the Atomic Energy Research Establishment at Harwell (Sir John Cockcroft) announced on Jan. 24 that British scientists working at Harwell had produced temperatures of up to 5,000,000 degrees Centigrade (one-third of the temperature of the interior of the sun), had "held" these temperatures for times of a few thousands of a second, and had repeated this process at intervals of ten seconds "many thousands of times." Sir John disclosed that these results had been achieved with a machine known as *Zeta* (zero-energy thermo-nuclear assembly), understood to be the biggest apparatus of its kind used by any country for research in this field of science.

Commenting on Sir John Cockcroft's statement, the Science Correspondent of *The Times* said that "both factors—the production of high temperatures and ability to hold them—are vital to the bringing about of fusion reactions . . . between the nuclei of heavy hydrogen atoms—the means by which heavy hydrogen, obtained from the sea, may be used ultimately as a fuel in power stations." The Science Correspondent of the *Daily Telegraph* (Mr. Anthony Smith) similarly commented that the "historic news" from Harwell "means that the first rung has been reached on a ladder which leads eventually to the use of sea-water as a source of power." Sir John Cockcroft himself said that he was "90 per cent certain" that controlled thermo-nuclear reaction [i.e. the reaction that takes place in the hydrogen bomb] had been achieved; he expressed the opinion that this reaction would be used to produce electricity in "20 years plus."

The achievements of British scientists in this field, and parallel work in the United States, were described in (1) a press statement issued on Jan. 24 by the U.K. Atomic Energy Authority; (2) the above-mentioned statement by Sir John Cockcroft, made at Harwell to some 800 British and foreign journalists; and (3) articles by British and American scientists in the scientific journal *Nature* (issue of Jan. 25).

Statement by U.K. Atomic Energy Authority.

The statement issued by the Atomic Energy Authority was worded as follows:

"Research at Harwell with the latest apparatus has led British scientists to the conclusion that control of thermo-nuclear reactions for electricity generation may well be a possibility for the future, though its practical application is still a long way off.

"The operation of present atomic power reactors is based on the fission (or splitting) of atoms. The possibility now being explored is the harnessing of power from the fusion (or joining) of atoms . . . Results obtained from the Harwell apparatus ZETA suggest that thermo-nuclear neutrons have been obtained, but further experiments will be necessary before this can be proved conclusively. Temperatures reached in this apparatus have been as high as 5,000,000 degrees Centigrade—higher than the measured surface temperatures of any star.

"Many major problems have still to be solved before its practical application can be seriously considered, and the work must be expected to remain in the research stage for many years yet. If it proves ultimately possible to construct a power station operating on the fusion of deuterium, the oceans of the world will provide a virtually inexhaustible source of fuel.

"On Aug. 12, 1957, a large experimental apparatus for studying the controlled release of energy from thermo-nuclear reactions was started up at Harwell. On Aug. 30 this apparatus was first operated under conditions that produced nuclear reactions; neutrons emitted in these reactions were observed when deuterium gas was heated electrically to temperatures in the region from 2,000,000 to 5,000,000 degrees Centigrade. The hot gas was isolated from the [tube] walls for periods of two- to five-thousandths of a second. The heating process was repeated every 10 seconds. The high temperatures achieved, together with the relatively long duration for which the hot gas has been isolated from the tube walls, are the most important experimental results obtained so far. Whilst much longer times (perhaps several seconds) are required for a useful power output, there appears to be no fundamental reason why these longer times, together with much higher temperatures, cannot be achieved.

"The source of the observed neutrons has not yet been definitely established. There are good reasons to think that they come from thermo-nuclear reactions, but they could also come from other reactions such as collision of deuterons with the walls of the vessel, or from bombardment of stationary ions by deuterons accelerated by internal electric fields produced in some forms of unstable discharge.

"In the ZETA apparatus the number of neutrons produced by each pulse of energy as the current was doubled was roughly that which might be expected from a thermo-nuclear reaction at the measured temperatures. These temperatures have been definitely established."

Sir John Cockcroft's Statement.

The text of Sir John Cockcroft's statement is given below:

"Twenty-five years ago we discovered in the Cavendish Laboratory [Cambridge] that nuclei of heavy hydrogen speeded up by high voltage could join with, or fuse together with, other nuclei of heavy hydrogen to form helium, producing neutrons and energy in the process. We know that processes of this kind provide the energy and heat of the stars. Our sun has a central temperature of about 15,000,000 degrees, and at this temperature nuclei of light elements can move about so fast that fusion reactions can occur.

"It has long been the ambition of scientists to emulate the stars and to produce in the laboratory temperatures so high that useful energy can be produced from fusion reactions. The work which is being published in *Nature* [see below] is the culmination of the first stage of our work.

"The objective of Stage 1 was to produce temperatures of about 5,000,000 degrees for a sufficient time for fusion reactions to be produced in deuterium gas at low pressure. During the course of this work a series of toruses of increasing size have been built, culminating in ZETA. [A torus is a ring-shaped tube.] Using ZETA, Dr. Thonemann and his colleagues [see below] have achieved their first objective of about 5,000,000 degrees for times of a few thousandths of a second, and these times have been repeated at intervals of 10 seconds many thousands of times.

"I consider that to have achieved temperatures which are a third of those at the centre of the sun and to hold them for so long is a remarkable scientific achievement; and I have no doubt that within a year ZETA, with some modifications, will far surpass the sun's central temperature.

"When the temperature in ZETA reaches 2,000,000 degrees a few neutrons are produced, and these increase 300-fold as temperatures of 5,000,000 degrees are approached, until about a million are produced in each pulse. This is about the rate of increase and the number we would expect from heavy hydrogen nuclei moving about with the random motion corresponding to these temperatures. We know, however, that heavy hydrogen nuclei could be speeded up by other mechanisms than being part of a hot gas. Strong electrical fields can be produced in such electric discharges, and these could produce high-speed deuterons. So we are not yet certain that all the neutrons come from a true thermo-nuclear process, and experiments are going on to settle this.

"At the present time the energy produced in the fusion reaction is only about a million millionth of the energy input. This is why we call ZETA a zero-energy thermo-nuclear assembly. We intend to increase the current circulating in ZETA by the provision of more condensers; the temperatures should then rise substantially. If and when we reach a temperature of 25,000,000 degrees, the number of neutrons per pulse should increase at least 10,000 times. Even then, however, the amount of energy produced in ZETA would be small compared with the energy input.

"In order to break even, we will have to produce temperatures of about 300,000,000 degrees in deuterium gas and about 40,000,000 degrees in a mixture of deuterium and tritium. So while we are experimenting with ZETA, improving it and studying its performance, we will be designing and building its successor, which will aim at achieving the break-even point.

"We will have many problems to face in this second stage. New methods may have to be devised to heat the gas to higher temperatures, and new techniques will be required to measure the temperatures. Even if all goes well and we meet no road-blocks, we would still have the further engineering problem of designing and constructing a prototype of a practical and economic thermo-nuclear power station. This would be Stage 3, and after that there would be Stage 4—commercial application.

"So it is difficult for us with our limited vision to see far enough ahead to say whether and when the final goal can be achieved. Our experiments with ZETA are only the first milestone along what may be a longish road, and we cannot see the end of the road. We are, however, going forward with optimism and enthusiasm into this great new field of scientific research.

"During our work we have had the help and co-operation of a group at A.E.I. Aldermaston [i.e. the research laboratory of Associated Electrical Industries Ltd.] working under the direction of Dr. Allibone, with Sir George Thomson's advice. This work began at Imperial College [London] on rather different lines from Dr. Thonemann's but has more recently culminated in a device which looks like a baby edition of ZETA—using a torus of about three times smaller bore. We were delighted to learn three weeks ago that they had achieved temperatures of about 4,000,000 degrees and have also observed neutrons. They will now go ahead to see how far temperatures can be increased with smaller and less expensive systems.

"We have also for the last two years had very close and friendly co-operation with U.S. scientists working with the same objective, but on three or four separate lines of work. We have attended three major conferences with them and have had several visits to see and discuss their work in detail."

Commenting on the work of American scientists in this field, Sir John Cockcroft continued: "Dr. Lyman Spitzer is head of a group at Princeton University working on the so-called Stellarator project [see 15590 D]. His paper in *Nature* is mainly a theoretical commentary on the performance of ZETA . . . In the Princeton Laboratory, temperatures of 1.2 million degrees were observed in 1956 in a tube of 4 inches bore . . . Four articles in *Nature* report some of the work directed by Dr. J. Tuck at Los Alamos Scientific Laboratory. Three of the papers describe work with the so-called Colombus apparatus—straight tubes through which currents of up to a million ampères are passed in a very short pulse of a few millionths of a second. Up to a hundred million neutrons are produced in a single pulse. Estimates of temperatures range from 3,000,000 to 5,000,000 degrees.

"This work is rather similar to that described by Academician Kurchatov [a Soviet scientist] in a lecture at Harwell two years ago, the principal difference being the use of an axial stabilizing magnetic field. Since that time further work of this kind has been reported from Russia by Academician Artsimovich . . .

"A fourth paper from Los Alamos describes work with a quite small torus of two inches bore, known as the Perhapsatron. An axial magnetic field rather stronger than the ZETA stabilizing field was used. Pulses of currents of up to 200,000 ampères . . . were passed through the conducting gas channel. Up to a million neutrons per pulse were observed. This neutron emission would be consistent with a temperature of about 6,000,000 degrees, but temperatures were not measured . . .

"You will see, then, that all the papers presented in *Nature* report work on the same general principle of producing a 'pinched' discharge stabilized by an axial magnetic field. Over a million neutrons per pulse are produced in all cases, but in no case have they been definitely proved to be true thermo-nuclear neutrons. The temperatures have been measured spectroscopically only in ZETA and in the A.E.I. Sceptre III [the machine used at Aldermaston] and are in the thermo-nuclear region of 2,000,000 to 5,000,000 degrees.

"The Perhapsatron work in the United States, together with the results obtained by A.E.I. and our work with ZETA, enable us for the first time to see the effect of the size of the apparatus on performance . . . If we examine the performance of the three tori of increasing size, this provides us with a good guide for our future line of development and the conditions required to increase the time during which the high temperatures persist. Long containment times are as important as high temperatures for practical results, and one of our objectives for the future will be to achieve much longer containment times as well as 'break-even' temperatures. The performance of ZETA has encouraged us to believe that this will be possible."

Principles of the Zeta Machine. - The British Research Workers. - The "Nature" Articles.

The principles underlying the operation of *Zeta* were described in the following press release by the Authority:

"The reaction being studied in ZETA is that in which deuterons (nuclei of the heavy hydrogen isotope deuterium) collide with one another and fuse to form heavier nuclei, releasing energy and some neutrons in the process. For fusion to be possible the deuterons must have enough energy to overcome the initial electrical forces of repulsion between them; this necessitates heating the deuterium gas to temperatures of millions of degrees Centigrade. The hot gas must be kept away from the walls of the container, otherwise it falls in temperature.

"The principle adopted in ZETA is to pass a large electric current through the deuterium gas. This current sets up an electric discharge in the gas (analogous to the discharge in a neon advertising sign) which heats it and also produces an intense magnetic field around the column of hot gas. This magnetic field causes the discharge to become constricted and hence heated still more. Since it also causes the discharge to wriggle about, this field by itself is not enough to keep the discharge away from the walls. The wriggling has been suppressed by applying an additional steady magnetic field parallel to the axis of the tube.

"In ZETA the discharge chamber is a ring-shaped tube or torus of 1 metre bore and 3 metres mean diameter, containing deuterium gas at low pressure. The tube is linked (i.e. encircled over part of its length) by the iron core of a large pulse transformer. A current pulse of electricity is passed into the primary winding of the transformer from a bank of capacitors capable of storing 500,000 joules of energy. [A joule is a measure of energy, 500,000 joules being equivalent to about 14 units of electricity]. This pulse in turn induces a very large uni-directional pulse of current in the gas, which forms a short-circuited secondary for the transformer. Peak currents up to 200,000 ampères have been passed through the ionised gas for periods up to 5 milli-seconds. The current pulse is repeated every ten seconds. Emission of neutrons throughout the current pulse is observed regularly in routine operation of ZETA with deuterium; there are up to 3,000,000 neutrons emitted per pulse.

"The temperature of gas discharges may be determined from measurements of the light emitted by the gas atoms. But measurements of this kind in these experiments present problems because, at the temperature of the discharge, the hot deuterium atoms are completely stripped of their electrons and therefore do not emit a line spectrum. One method of solving this problem is to mix with the deuterium a small quantity of some heavier gas, such as oxygen or nitrogen, the atoms of which are not stripped of all their electrons under these conditions, and to study the spectral lines emitted by this impurity; the random motion of the high-energy impurity atoms which make many collisions with the deuterium atoms and so reach the same energy causes the spectral lines to broaden, owing to the Doppler effect, and the amount of broadening is a measure of the ion energy. Many measurements by this method have indicated temperatures in the region of 2,000,000 to 5,000,000 degrees Centigrade . . .

"In order to obtain a net gain in energy from the reaction it would be necessary to heat deuterium gas to temperatures in the region of 100,000,000 degrees Centigrade, and to maintain it at this temperature long enough for the nuclear energy released to exceed the energy needed to heat the fuel and lost by radiation. Lower temperatures would suffice for a deuterium tritium mixture . . ."

The work on *Zeta* was carried out in the General Physics division at Harwell, which is under the direction of Mr. D. W. Fry. The group responsible for the work was led by Dr. P. C. Thonemann (an Australian), other scientists prominently associated with *Zeta* including Mr. R. Carruthers, Mr. R. S. Pease and Dr. W. B. Thompson. The principal contractors for the construction of *Zeta* were Metropolitan-Vickers Electrical Co. Ltd. (who also collaborated in the design), British Insulated Callender's Cables Ltd., and Telcon Ltd.

Mr. Donald William Fry (47), born at Weymouth, is a graduate of King's College, London. A member of the team which designed the first V.H.F. equipment used by R.A.F. Fighter Command in the Battle of Britain, he subsequently joined the staff of the Air Ministry Research Establishment, becoming head of its General Physics Division in 1950 and Chief Physicist in 1954.

Dr. Peter Clive Thonemann (40) was born in Melbourne, graduated from the University of Melbourne, and subsequently carried out important research at the University of Sydney and the Clarendon Laboratory, Oxford. Since 1949 he has been directing the work of a group investigating the properties of highly ionised gases.

Mr. Robert Carruthers (37) was born at Leeds and graduated at the City and Guilds College (University of London). After research work in radar, infra-red techniques, and synchrotron design, he joined Dr. Thonemann in 1951 at Harwell and carried out the experiments which ultimately made it possible to construct the ZETA apparatus.

Mr. Rendel Sebastian Pease (35) was born at Cambridge, graduated from Trinity College, Cambridge, and carried out operational research for R.A.F. Bomber Command during the last war. He joined the Harwell staff in 1947.

Dr. William Bell Thompson (35) was born in Belfast but went with his parents to Canada as a child. A graduate of the University of British Columbia, he lectured at the University of Toronto and worked on the Chalk River project before joining the Harwell staff.

Research work in the field of controlled thermo-nuclear reactions is also being carried out at the Research Laboratory of Associated Electrical Industries Ltd. at Aldermaston, on behalf of the Atomic Energy Authority and with the advice of Sir George Thomson. Dr. T. E. Allibone is Director of the A.E.I. laboratory, the senior members of the staff being Mr. D. R. Chick and Dr. A. A. Ware.

The articles in *Nature*, referred to by Sir John Cockcroft, constituted the first detailed account of the work carried out by British and American scientists in controlling thermo-nuclear reactions. Of a highly technical character, they included (1) a paper by 12 British scientists working at Harwell (including Dr. Thonemann, Mr. Fry and Mr. Carruthers) describing the *Zeta* apparatus, its method of working, and the results achieved; (2) a paper by 14 scientists of the A.E.I. Laboratory, describing the parallel work achieved at Aldermaston with the *Spectre III* apparatus, to which reference was made by Sir John Cockcroft; and (3) several papers by American scientists, including Professor Lyman Spitzer of Princeton and members of Los Alamos Scientific Laboratory, New Mexico, describing the work carried out in the United States. The Los Alamos scientists described the working of the "Perhapsatron" apparatus referred to by Sir John Cockcroft.

American Statement.

By agreement between the British and American authorities, the results of the work carried out by British and U.S. scientists in this field were released simultaneously by the U.K. Atomic Energy Authority and the U.S. Atomic Energy Commission. High tributes to the achievement of the British scientists were paid by the entire U.S. Press, which gave great prominence to the Harwell discoveries, by Dr. Willard Libby and other eminent American scientists, and by Rear-Admiral Lewis Strauss, chairman of the U.S. Atomic Energy Commission.

At a press conference on Jan. 24, Admiral Strauss congratulated the U.K. Atomic Energy Authority and its scientists and engineers on "the notable advances which they have made," and expressed his pleasure at "the co-operation which we have established with our British friends in this field of science." He explained that the simultaneous release of information on both sides of the Atlantic had been made possible under a new Joint Classification Guide recently approved by both countries, and added: "After the U.K.-U.S. decision to de-classify the work on controlled thermo-nuclear reactions (except for certain areas), and following the concurrence of the two countries on a revision of the Joint Classification Guide to accomplish this, conferences began with a view to releasing the newly de-classified information as early as possible in 1958. It was agreed that Jan. 24, 1958, was the most convenient date."

Admiral Strauss strongly repudiated any suggestion of a "race" between British and U.S. scientists, saying in this connexion: "Our research efforts and those of the United Kingdom are at a point where it occurs periodically that first one laboratory and then another will make a useful and illuminating advance. This has happened in the past, and no doubt will occur in the future, as our two countries pursue their joint studies." He also declared: "Assertions that U.S. pressure was used to persuade the U.K. authorities to suppress publication of the results of their research are contrary to the facts and have been refuted by Sir Edwin Plowden, chairman of the U.K. Atomic Energy Authority, and by me. Furthermore, certain comparative observations which have been published in recent weeks about British and U.S. progress in this field will be seen from to-day's British and U.S. papers to have been not only misleading but lacking in any foundation of fact."

In reply to questions, Admiral Strauss defended the simultaneous publication of results on both sides of the Atlantic as a means of avoiding the appearance of rivalry between British and U.S. scientists "where, in fact, none existed." Though he did not think that Britain had a lead over the U.S.A. in the field of thermo-nuclear research, he admitted that Britain had achieved better results in proportion to the amount of money spent in both countries in this field; the British achievement, he added, had shown that "very significant results can be obtained under more austere conditions" than existed in the United States. Dr. Willard Libby described the Harwell results as "a wonderful achievement" and "a great step forward," adding that British and U.S. scientists were "so neck and neck that there is no difference."

[It was explained in the *New York Times* that the U.S. Atomic Energy Commission's programme of thermo-nuclear research (Project Sherwood) had been expanded 30-fold in the past five years. Whereas Project Sherwood spent $800,000 in 1953, expenditure in the current year was estimated at $23,000,000; moreover, only some 20 scientists and engineers were engaged on the project in the former year, compared with about 250 at the present time. It was stated that most of the research was being carried on in five laboratories—Los Alamos, New Mexico; the University of California's Radiation Laboratory; Princeton University; the Oak Ridge National Laboratory, Tennessee; and the Institute of Mathematical Science at New York University.]

In a statement to the British House of Commons on Nov. 11, 1957, the U.K. Paymaster-General (Mr. Maudling) had announced—in reply to a question—that the *Zeta* apparatus at Harwell was operating successfully and that discharges through heavy hydrogen were giving very high temperatures, accompanied by discharges of neutrons, which were believed to be due to thermo-nuclear reactions. Demands for the immediate publication of the results were made by a number of M.P.s and British newspapers, coupled with allegations that the American authorities were exerting pressure on Britain to hold back the announcement. These allegations were refuted by Admiral Lewis Strauss, as stated above, and also by Sir Edwin Plowden.

Tributes to the British achievement, similar to those in the United States, were also paid by leading scientists in France, Western Germany, Italy, Sweden, Japan and many other countries. The news was broadcast by Moscow radio, which "noted" that the work of the British scientists "resembled the work of Soviet scientists as reported by Academician Kurchatov in his Harwell lecture two years ago."—(U.K. Atomic Energy Authority - Nature - Times - Daily Telegraph - Manchester Guardian - New York Times)

(Prev. rep. 15906 A.)

Glossary of Scientific Terms. The Atomic Energy Authority provided the following glossary of terms used in the description of ZETA (see page 15982 above):

Capacitator (or condenser): A device which can be used to store electrical energy.

Deuterium (or heavy hydrogen): Ordinary hydrogen is made up of two isotopes: i.e two different kinds of hydrogen atoms which differ mainly in weight. The heavier isotope, called deuterium, or heavy hydrogen, is present in small proportion only (about one in 3,000).

Deuteron: The nucleus of a deuterium (heavy hydrogen) atom: it is formed by stripping the planetary electron from the atom (see also hydrogen ions).

Doppler Effect: If the atoms of a gas are emitting light in a narrow band of frequencies, then the width of the band will increase as the temperature increases, because the speed of movement of the atoms also increases. This effect (analogous to the change in the note of an engine whistle when a train passes through a station) is called Doppler "broadening." This broadening can be used to calculate the temperature of the emitting gas.

Heavy Hydrogen—see Deuterium.

Hydrogen ions (or heavy hydrogen ions): Ions are atoms which have become charged by gaining or losing planetary electrons. In ZETA atoms lose their electrons and so become positive ions; thus hydrogen and deuterium atoms in the gas discharge lose their single planetary electrons and become positive ions called protons and deuterons respectively. Atoms with more planetary electrons do not lose all their electrons so readily; thus the additive gases used to measure temperature lose some but not all of their electrons.

Line Spectrum: Atoms, or ions which still have planetary electrons, emit radiation only in very narrow and widely separated frequency bands. These appear when photographed as widely separated narrow black lines; this gives rise to the name 'line spectrum.' Fully ionised atoms (i.e. atoms which have lost all their planetary electrons) do not emit line spectra.

Milli-second: One-thousandth of a second.

Micro-second: One-millionth of a second.

Thermo-nuclear Neutrons: Neutrons which are emitted from a true thermo-nuclear reaction.

Thermo-nuclear Reaction: The atoms (or molecules) of a gas are always in random motion. As the gas is heated up, the speed of this motion increases. For a nuclear fusion reaction to take place, the colliding nuclei must possess considerable energy—i.e. they must be travelling very fast. If the gas is so hot that the speed of random motion in it provides sufficient energy for nuclear fusion to take place, then a thermo-nuclear reaction is said to take place. Neutrons produced in thermo-nuclear reactions are called thermo-nuclear neutrons. One million degrees Centigrade is the lowest temperature at which any measurable number of thermo-nuclear reactions could be observed.

Tritium: A radio-active isotope of hydrogen which has three times the weight of the ordinary hydrogen atom. It is manufactured by bombarding an isotope of lithium with neutrons; it has a half-life of 12½ years and decays by emitting beta particles (electrons).

Zero Energy: A zero-energy thermo-nuclear apparatus is one in which the thermo-nuclear output is very small (even though the initiating power input is large). (Atomic Energy Authority)

A. TURKEY. — Cabinet Changes. - Arrest of Army Officers on Plotting Charges.

M. Semi Ergin, the Turkish Minister of National Defence, resigned on Jan. 19 and was succeeded by M. Ethem Menderes, the Minister of Public Works. M. Tevfik Ileri, hitherto Minister of State and Deputy Prime Minister, became Minister of Public Works.

Although no reason was given for M. Ergin's resignation, it was generally believed to be connected with an earlier announcement (Jan. 16) that nine Army officers had been arrested in Istanbul on charges of plotting against the Turkish Government. The official statement contradicted rumours that large-scale arrests had been made among members of the Turkish armed forces; pointed out that the arrested officers comprised three colonels (one retired), one lieutenant-colonel, four majors, and one captain; and stated that the matter had come to light through information supplied by one of the officers concerned.—(Turkish Embassy Press Department, London - Times - New York Times)

(Prev. rep. Cabinet, 15888 B.)

B. MALDIVE ISLANDS. — New Chief Minister.

Amir Ibrahim Ali Didi, Chief Minister of the Maldive Islands (the British protectorate 400 miles south-west of Ceylon), resigned on Dec. 18 for health reasons and was succeeded by his former chief aide, Ibrahim Nasir. The Maldivian Government recalled that Ibrahim Ali Didi had been in office for nearly four years, adding that he had been "trying to survive in spite of increasing pressure of work as head of a State which, when he took over, was in unprecedented chaos."—(Times)

(Prev. rep. Maldives, 15295 A; 13475 A.)

C. UNITED KINGDOM. — Oxford University. - £150,000 Gift for Studies in Transport.

It was announced on Jan. 28 that the University of Oxford had accepted a gift of £150,000 from 37 public and private companies and undertakings, made through the Institute of Transport, to finance studies in the economies and organization of transport. The money was offered for the permanent endowment of a Readership and at least two research Fellowships in the subject.—(Times - Daily Telegraph)

A. INDIA - PAKISTAN. — The Canal Waters Dispute. - New Proposals by International Bank. - Failure to reach New Interim Agreement.

As no agreement on the division of the waters of the Indus basin between India and West Pakistan had been reached by March 31, 1957 (the terminal date for discussions on the preparation of a comprehensive scheme), the vice-president of the International Bank for Reconstruction and Development (Mr. W. A. B. Iliff) visited India and Pakistan in June for talks with the two Governments. Mr. Iliff began his discussions on June 7 in Delhi, where he met the Indian Prime Minister, Mr. Nehru, and the Minister for Irrigation, Mr. Patil; proceeded on June 11 to Lahore, where he discussed the question with the then Pakistani Premier, Mr. Suhrawardy, and the Finance Minister, Mr. Amjad Ali; returned to Delhi for a second round of talks on June 20; and concluded his discussions with a brief visit to Karachi on June 24-25.

Negotiations had been proceeding for three years on the basis of the Bank's proposals of Feb. 5, 1954, which envisaged (1) that Pakistan should have the exclusive use of the three western rivers of the Indus system (the Indus, Jhelum, and Chenab), and India the exclusive use of the three eastern rivers (the Ravi, Beas, and Sutlej); (2) that for a transitional period of about five years India should continue to supply Pakistan with water from the eastern rivers; and (3) that India should bear the cost of building link canals in Pakistan to replace supplies from these rivers, "to the extent of benefit derived by her therefrom" [see 13789 A]. Whereas India had accepted these proposals almost immediately, Pakistan, on the strength of an independent report, had denied that the waters of the western rivers were sufficient for her needs, and only accepted the proposals several months later with certain qualifications. In an *aide-mémoire* submitted to both Governments in May 1956, the International Bank suggested certain modifications of its proposals, including the provision of storage facilities at India's expense.

Before leaving for Washington, Mr. Iliff handed identical communications to both Governments making certain suggestions which, he stated, were "directed to moving forward towards a solution of the problem on the lines of the Bank's proposals." It was reported on July 23 that Pakistan had accepted Mr. Iliff's proposals, subject to certain conditions, and had outlined a programme for their implementation. Mr. Patil stated on July 28 that India had also accepted the proposals.

According to statements made by Mr. Patil in the *Lok Sabha* on July 25 and Aug. 1, the suggestions made by Mr. Iliff generally followed the 1954 proposals but were "a little more accurate and precise in the manner of implementation, if the main principle that the waters of the three Western rivers should be reserved for Pakistan and the waters of the three Eastern rivers for India is accepted." He added that the suggestions also sought to "provide some machinery for resolving points on which the Bank may be unable to secure agreement." He explained that the Bank, after receiving the two Governments' views, would obtain the comments of each Government on the views of the other, and would then decide whether the employment of its good offices could make any further contribution, and, if so, along what lines the work should proceed.

Mr. Patil announced in the *Lok Sabha* on Aug. 1 that India had informed the International Bank and Pakistan that she would not wait more than five years before withdrawing water from the Ravi, Beas, and Sutlej rivers for her own purposes. By 1962 the Rajasthan Canal (which would be 500 miles long, the longest in the world, and would cost Rs. 600,000,000) and the Sirhind "feeder" canal would be completed, and as soon as they were ready they would be supplied with water from the three eastern rivers. In the past three years, he pointed out, Pakistan had spent between 200,000,000 and 250,000,000 rupees on building link canals which were already capable of supplying 5,000,000 acre-feet of water, or half of what India was supplying from the eastern rivers.

A Pakistani Government spokesman declared on Aug. 10 that Mr. Patil's statement that India would withdraw water for the Rajasthan and Sirhind canals as soon as they were ready was "a threat to Pakistan's political and economic security, and if implemented would be regarded as an act of aggression against Pakistan." Even the Bank's proposals, he claimed, did not give India the right to stop or diminish water supplies from the eastern rivers to Pakistan until the completion, at India's cost, of the works necessary to replace the supplies previously provided by those rivers.

Negotiations for a new interim agreement on the supply of canal waters, to replace that which had expired on March 31, 1957, and designed to cover the period Oct. 16, 1957 to Oct. 15, 1958, opened in Delhi on Nov. 28 under the auspices of the International Bank, but broke down owing to disagreement between India and Pakistan over the question of payment for link canals built by Pakistan.

Mr. Patil stated in the *Lok Sabha* on Dec. 20 that Pakistan had demanded that India should pay not only for the construction of canals but also for their operation, whereas India was not prepared to agree to any payment except as part of an overall settlement. The International Bank, he claimed, had twice before rejected attempts by Pakistan to make India pay for the cost of the canals. Mr. Qizilbash (the Pakistani Minister for Industry), on the other hand, said on Dec. 30 that in Pakistan's view the link canals were not part of an overall replacement plan. He added that Pakistan had offered under the interim agreement to operate the canals for India's benefit, provided India agreed to pay for her share. Mr. Qizilbash claimed that the International Bank had supported Pakistan's demand, and reiterated his Government's willingness to submit any disputed questions to arbitration.

In reply to the latter suggestion, it was semi-officially stated in Delhi on Dec. 30 that while minor points of disagreement could be settled by arbitration once Pakistan had accepted the essential features of the Bank's 1954 proposals —which India denied had been the case so far— arbitration on the canal waters dispute as a whole was not acceptable to India. (Indian and Pakistani High Commissioners' Offices, London - The Hindu, Madras - The Statesman, Calcutta)

(Prev. rep. 12876 A; 13789 A; 15144 D.)

B. ALBANIA. — British and U.S. Planes forced down. - Release of Detained Pilots and Aircrew.

It was announced by Tirana radio on Dec. 31 that a British freight plane with six people on board had been forced down at Valona on Dec. 31 by Albanian fighters, after having violated Albanian airspace in disregard of warning signals. The plane concerned, a *Skymaster*, belonged to Independent Air Travel (a British charter company) and was on a flight from Düsseldorf to Singapore with a cargo of machinery for Karachi and Bangkok. Italian radar stations at Brindisi and Otranto (on the "heel" of Italy facing Albania) reported that they had seen two Albanian fighters intercept a civilian aircraft and escort it to Valona.

The *Skymaster* was piloted by Captain M. Kozubski (a former Polish bomber pilot with the R.A.F.), who is chairman and managing director of Independent Air Travel; two other pilots, an engineer officer, a steward, and an air hostess were also on board the machine. Independent Air Travel operates a world-wide service of freight and passenger flights, mostly from Hurn airport, near Bournemouth.

The Albanian Government released the *Skymaster* on Jan. 4 after representations had been made through the French Legation in Tirana. [The United Kingdom has no diplomatic relations with Albania, and only France and Italy among the Western countries maintain diplomatic missions in the Albanian capital.]

On returning to Britain, Captain Kozubski explained that his machine had approached the Albanian coast eight miles closer than usual owing to bad weather conditions over the Adriatic, and had made a forced landing after warning shots by two Albanian MIG fighters; he and the other members of the crew stated that they had been well treated while in Albanian custody. The British Foreign Office announced on Jan. 6 that the incident was regarded as closed, adding that it was clear that the machine had inadvertently flown over Albanian territory owing to bad weather. It was noted that the captain and crew had been well treated by the Albanians, and thanks were expressed to the French Minister in Tirana (M. Keller) for helping to secure their release.

A further broadcast from Tirana radio on Jan. 7 announced that Albanian fighters had forced down a U.S. *Shooting Star* trainer plane over Albanian territory on Dec. 28, 1957, and that its pilot, Major Howard J. Curran, had been taken into custody. It was stated that the plane had been forced down near Berat, 80 miles inland from the Albanian coast. The U.S. Air Force in Europe explained that a plane of this description, piloted by Major Curran, had been missing since Dec. 28 while on a flight from Châteauroux (France) to Naples. Major Curran was released by the Albanian authorities on Jan. 9 after representations by the French Legation, and was allowed to leave for Belgrade in a Yugoslav airliner. On arrival in the Yugoslav capital, he explained that he had been forced to make an emergency landing through instrument failure and lack of fuel, and was unaware that he was on Albanian territory until taken into custody. He added that he had been treated with consideration while under detention.

(Times - Manchester Guardian - New York Times)

A. NEW ZEALAND. — Severe Import Restrictions.

The New Zealand Prime Minister, Mr. Walter Nash, announced on Jan. 1 that all future imports would be subject to licensing, and that trading banks would not allocate exchange to importers unless a licence had been issued by the Customs Department.

Mr. Nash stated that New Zealand was facing her most serious oversea exchange position since the depression of the 'thirties. The deficit in the balance of payments had increased from £4,000,000 in the year ended September 1957 to an amount estimated at £30,000,000 in the calendar year 1957. On Dec. 25, New Zealand's oversea funds were down to £45,500,000 —a reserve sufficient for only six weeks at the current rate of external payments.

Mr. Nash explained that, in considering various possible remedies, the Government had rejected overseas borrowing as too costly and as being no more than a palliative. Exchange allocation without import control could give no guarantee that essential imports would be obtained or that dispensable ones would not be brought into the country, whilst alteration of the exchange rate would open the door to "a wild spiral of costs and prices." Overseas borrowing, he added, might require £50,000,000—an amount which could not possibly be raised in the present state of the London market. Moreover, the interest burden would be excessive.

The Government was determined not to take action to curb purchasing power severely by methods which would cause wage-cuts and unemployment; it believed that New Zealand's living standards and development could only be protected by a combination of exchange allocation and import selection. Accordingly, funds would be allocated for all imports of basic foodstuffs, such as wheat, tea, coffee, and dried fruits, and, to the full amount required, for a long list of basic raw materials used in N.Z. industry. Unused capacity in factories would be called upon to make good the loss of some less essential imports, including soap, footwear, leather goods, woollen piece-goods and carpets. Also, funds would not be wasted for importing many other items which New Zealand industry was well capable of supplying, but full allocations would be made for essential materials needed for medical and hospital use.

Describing the drain on New Zealand's oversea funds in recent weeks as "the worst landslide in the country's history," Mr. Nash blamed the previous (National Party) Government for having allowed New Zealand's overseas reserves to fall from £83,000,000 to £45,000,000 between Oct. 1 and Dec. 31. He added that although the terms of trade had turned against New Zealand in 1957 as a result of a sharp fall in export prices overseas, the reserves at the end of the year should have been at least sufficient for six months instead of for only six weeks. "The main cause of the frittering away of our overseas reserves has been excessive importing," Mr. Nash added. "Not only has New Zealand spent more abroad than she has earned, but the National Government borrowed abroad over £20,000,000, some of which has gone into needless importing. Too many people have been encouraged to live in an unreal world even when the country has been living on its capital and pledging its overseas assets to support this unreality."

The Minister of Customs (Mr. Boord) explained the working of the new import policy on Jan. 2.

Mr. Boord said that, apart from a few necessary exceptions such as passengers' baggage, all imports into New Zealand would now require a licence. Goods previously exempt from licensing and shipped from the country of export up to Dec. 31 would, however, be admitted without licence. Goods shipped by Dec. 31 under licences for 1958 already issued would be deducted from any new licence to which importers were now entitled; where the value of such goods exceeded the value of the new licence, the excess licence would be granted, but the amount of the excess would be charged against any subsequent allocation. All goods on order at Jan. 1, 1958, but not shipped for export to New Zealand before that date, would become subject to the new licensing provisions.

Two schedules were published on Jan. 1 covering approximately 1,000 items grouped into seven categories. These ranged from "A" items, for which licences would be granted to the amount applied for from non-dollar sources or Japan, to "D" items, for which no allocation was made.

Items for which substantial cuts were made—all on the basis of the value of 1956 imports—included electric irons and razors, toys, certain textile piece-goods, and cameras (75 per cent); assembled motor-vehicles, watches, china-ware, carpets and floor-covering (50 per cent); whisky and other spirits (40 per cent); unassembled motor-vehicles, electric motors, dairy machinery, cutlery, and imitation jewellery (25 per cent); and agricultural machinery and implements (10 per cent).

For knitted woollen underwear and outerwear, the new import quotas would be 50 per cent of the allocations already issued for 1958, and the same reduction would apply to imports of tyres and tubes of specified sizes which were also made in New Zealand.

Licences would be available on individual application for, *inter alia*, gramophone records, certain textile piece-goods, raw cotton, plated ware, and jewellery containing precious metals or precious or semi-precious stones.

No licences would be granted (save in "the most exceptional circumstances") for cigarettes, cigars, tobacco, beer, biscuits, jams, jellies, nearly all footwear, lawn-mowers, neckties, woollen blankets, a wide range of leather goods, many speciality foodstuffs, furniture, soap and soap-powder, umbrellas, and cement.

Items in the unrestricted category "A" included iron, steel, and metals generally, crude petroleum and motor-spirit, raw rubber, ball-bearings, wheat, tea, coffee, and dried fruits.

Mr. Nash said on Jan. 3 that an estimate of how much overseas exchange would be saved by the import cuts would not be released for publication; unofficial estimates, however, put the anticipated savings at 20 per cent of the 1957 level of imports, or approximately £50,000,000.

The Minister of Industries and Commerce, Mr. P. N. Holloway, explained the industrial implications of the new policy in a broadcast on Jan. 6.

Mr. Holloway mentioned that certain N.Z. industries which were using almost entirely N.Z. raw materials had been "languishing" in the last few years, particularly woollen mills, footwear factories, tanneries, and factories producing leather goods generally. It was the Government's aim that these industries should produce more in future and that the public should buy more woollen piece-goods, blankets, carpets, footwear, and leather goods made in New Zealand. Similarly, soap, cigarette, furniture, and building-board factories, which were all using New Zealand materials, should produce more to replace imports. Other industries which could achieve higher production with their existing equipment were engineering, garments, paints, bricks and tiles, and radio and communications.

From a long-term point of view all the indications pointed to the fact that New Zealand would continue to find it difficult to export and sell enough in future years to provide for the payment of a very high level of imports for her expanding population. She had reached the stage where she could not rely for her manufacturing development on industries which imported all their parts and had them only assembled in New Zealand, and the Government intended that parts should be made more and more in New Zealand if reasonably economic. Mr. Holloway expressed the hope that all the industrial groups could meet together to develop specific plans for supplying New Zealand's needs, both in the current year and in the future; the Industries and Commerce Department would initiate such discussions, after which he (Mr. Holloway) himself would meet representatives of the various industries. The Minister added that while it was not the Government's intention to encourage any and every industry to develop in New Zealand, there were "things that can be well done here and that can be economically produced up to overseas standards," and it was "these things in which we are interested."

The Labour Government's decision to impose import controls was strongly criticized on Jan. 2 by Mr. J. T. Watts, Minister of Finance in the former National Government.

Mr. Watts maintained that the position of New Zealand's overseas funds was not nearly as serious as the Prime Minister had claimed. One reason for the deterioration in the exchange position had been the rumours of an alteration in the exchange rate following the Labour Party's electoral victory. Funds had accordingly been remitted overseas, in some cases even before payment was due, whilst importers, influenced by threats of Labour candidates that controls would be introduced, had also increased their overseas orders in order to build up stocks.

Continuing, Mr. Watts said that in addition to the £45,000,000 mentioned by Mr. Nash, New Zealand had close on another £30,000,00 in reserves invested in London, plus her holdings of gold. Moreover, the export season was now commencing and funds would start to build up immediately. There was no doubt that overseas funds had reached a lower level in the previous six weeks than was expected, and that some remedial action was necessary. He deplored, however, the return to a "tight" import policy covering all goods when there was only an excess of imports of between 5 and 10 per cent of the country's total requirements.

Import control, Mr. Watts concluded, would not by itself solve the real problem, which was "an excess internal demand for goods and services—aggravated by Labour's election promises of tax concessions, increased family benefits, pensions, and Government capital works."

Great concern was expressed in the United Kingdom at the reintroduction of general import control in New Zealand.

A spokesman of the Society of Motor Manufacturers and Traders said in London on Jan. 2 that New Zealand ranked fourth among buyers of British cars in the first 11 months of 1957, whilst a spokesman of the Footwear Manufacturers' Federation stated that New Zealand was fifth highest importer of British footwear in 1956. A spokesman of the British Electrical and Allied Manufacturers' Association expressed the view that this industry would also be "fairly heavily" hit. A Board of Trade spokesman pointed out that in addition to cars and commercial vehicles, British exports to New Zealand included goods ranging from carpets and whisky to cloth and heavy machinery, other important items being paper and paper-board, wool and worsted yarns, cotton and synthetic yarns, textiles, iron and steel, and electrical apparatus.

The N.Z. Minister of Finance (Mr. Nordmeyer) disclosed on Jan. 16 that the Reserve Bank of New Zealand had sold £5,000,000 worth of investments in London to provide money for trading needs. He said that overseas reserves had fallen from £113,000,000 in June 1957 to £44,000,000 in the first week of January, adding that the Labour Government was faced with a situation "not only serious but critical." (Directorate of Information, Wellington - N.Z. Department of External Affairs - Times - Financial Times - Daily Telegraph - Manchester Guardian - Economist)

Note. U.K. exports to New Zealand amounted to £140,100,000 in 1955 and £127,900,000 in 1956; taking the first 11 months of 1957, the estimated annual total in that year was £140,000,000. The 1955 figure represented 4.6 per cent of total British exports, the 1956 figure 3.9 per cent, and the estimated 1957 figure 4.1 per cent. The largest export items were (in that sequence): cars and commercial vehicles (£17,342,000 in 1955, £13,776,000 in 1956, and an estimated £15,310,000 in 1957); electrical machinery (£12,318,000 in 1955; £10,491,000 in 1956; and an estimated £11,718,000 in 1957); miscellaneous textile manufactures, including carpets in particular (£9,523,000 in 1955; £8,385,000 in 1956; and an estimated £9,185,000 in 1957); cotton yarns and fabrics (£6,983,000 in 1955; £6,098,000 in 1956; and an estimated £6,702,000 in 1955); woollen yarns and fabrics (£4,819,000 in 1955; £3,997,000 in 1956; and an estimated £4,533,000 in 1957), synthetic fibre yarns and fabrics; clothing, footwear, etc.; and beverages.

Fifty-five per cent of total New Zealand imports came from the United Kingdom in 1955, and 53.6 per cent in 1956. (*Economist*)

A. DISARMAMENT NEGOTIATIONS. — Corrigendum.

In summarizing the proceedings in the U.N. Disarmament Sub-committee during the last week of August 1957, certain incorrect dates were inadvertently given on pages 15943-44—i.e. in the text between the cross-heading "New Western Proposals on Disarmament" on page 15943 (near end of first column) and the cross-heading "The Disarmament Question at the United Nations" on page 15944. The correct chronological sequence of events during this period was as follows:

August 21—The Western proposals for a suspension of nuclear tests were presented orally in the sub-committee by the Western delegates.

August 27—The Soviet delegate (M. Zorin) criticized these proposals on the ground that they nullified the possibility of reaching agreement on the suspension of nuclear tests by linking the question with other disarmament measures. In addition, he rejected the Western proposals for aerial inspection which had been put forward on Aug. 2 (see page 15942). In a strongly-worded speech, M. Zorin accused the Western Powers of intensifying the arms race, increasing the production of nuclear weapons, etc.

August 28—President Eisenhower issued a statement deploring M. Zorin's "scornful words" and expressing disappointment at the Soviet rejection of the Western proposals.

August 29—The full Western disarmament proposals were placed before the sub-committee, embodying the proposals of Aug. 2 for ground and aerial inspection, the proposals of Aug. 21 for suspension of nuclear tests, and other proposals on disarmament as shown under cross-headings. M. Zorin said that these proposals contained "nothing new," and the sub-committee decided on Sept. 6 to suspend its sessions *sine die*, as stated. (Ed. K.C.A.)

B. NEPAL. — Road Construction Programme.

The Indian and Nepalese Governments signed on Jan. 2 a tripartite agreement between Nepal, India, and the U.S.A. for the construction of roads in Nepal. The agreement was subsequently signed by the U.S. Ambassador in Delhi (Mr. Ellsworth Bunker), who is also Ambassador to Nepal and was unable to fly to Khatmandu because of illness. It was stated in the Indian Press that the three Governments would contribute over 50,000,000 rupees in the next five years for building about 900 miles of roads in Nepal. The present mileage of hard-surface roads in that country is only 150.
(The Statesman, Calcutta) **(Prev. rep. 15648 F; 15449 C.)**

C. AUSTRALIA. — Civil Aviation. - Round-the-world Service by Qantas Empire Airways.

A round-the-world air service by Qantas Empire Airways was inaugurated on Jan. 14 when two Super-Constellations left Melbourne on their round journey of 25,000 miles, which took less than six days. The two aircraft set out on opposite routes to London, one by way of the U.S.A. and the other *via* the Middle East.—(Australian News and Information Bureau)
(Prev. rep. 15829 C; 15634 A.)

D. PERSIA. — Death of Dad Shah.

Dad Shah, the notorious bandit whose gang ambushed and killed three American citizens and two Persians in March 1957, was killed in the Baluchistan desert on June 11 after a five-hour gun battle with Persian security forces, in which there were fatal casualties on both sides.—(Times - Daily Telegraph)
(Prev. rep. 15532 A.)

E. UNITED KINGDOM. — Record Steel Production in 1957. - Outlook and Expansion Plans for 1958.

Figures issued by the Iron and Steel Board on Jan. 9 showed that U.K. steel production in 1957 reached the record figure of 21,699,000 tons, compared with 20,659,000 tons in 1956. Production of pig-iron in 1957 was also a record, amounting to 14,283,000 tons compared with 13,170,000 tons in 1956.

Detailed figures for the fourth quarter of 1957 are given below, with 1956 figures for comparison:

	1957		1956	
	Weekly Average Tons	Annual Rate Tons	Weekly Average Tons	Annual Rate Tons
Steel Ingots and Castings				
October	437,800	22,766,000	419,100	21,799,000
November	429,200	22,319,000	426,400	22,172,000
December	397,900	20,692,000	395,900	20,587,000
Fourth Quarter ..	421,600	21,926,000	413,800	21,519,000
Pig-Iron				
October	285,500	14,844,000	260,700	13,558,000
November	281,500	14,639,000	262,700	13,660,000
December	275,500	14,329,000	262,300	13,637,000
Fourth Quarter ..	280,800	14,604,000	261,900	13,618,000

Recent developments in connexion with the steel industry are summarized below:

Import Duties. The Board of Trade announced on Nov. 29, 1957 that the suspension of import duties on iron and steel plates would be continued for a further six months from March 18, 1958 (i.e. until Sept. 18, 1958). Duty would, however, be restored on most grades of blast furnace ferro-manganese and sheet.

Closing of Welsh Steelworks. Richard Thomas and Baldwins Ltd. announced on Oct. 22 that two of their older-type steel works in West Wales -the Gwenfelin works and the Grovesend works, both at Swansea—would be closed down within a few weeks. Over 1,000 employees would be affected, but everything possible would be done to offer alternative employment and to mitigate hardship to those for whom other work could not be found. The closures were "an inevitable result of the modernization of the industry which had taken place progressively in recent years." On Jan. 27, 1958 the firm announced that circumstances had arisen which made it "inevitable" that the South Wales Steel Works at Llanelly (employing about 500 men) should be closed permanently within the next few weeks.

Messrs. Thomas and Baldwins had previously announced on Jan. 14 that two steel-sheet works in West Wales—the Pontardawe works in the Swansea valley (employing about 350) and the Whitford works, Briton Ferry (employing nearly 200)—would be temporarily closed from Jan. 20 and Jan. 27 respectively owing to shortage of orders.

The British Iron and Steel Federation, in the number of its quarterly *Steel Review* published on Jan. 1, stated that although the British steel industry was expected to produce more in 1958 than its 1957 output, demand was unlikely to be sufficient to allow production to rise to the industry's total available capacity of 23,500,000 tons. Stressing that the Government's financial measures, especially those restraining investment, were "certain to affect steel consumption in Britain," the review said that the industry hoped, however, to offset the expected reduction in home demand by expanding exports. These had risen in 1957 to an estimated total of about 4,000,000 ingot tons (the highest figure since 1923) as compared with 3,300,000 tons in 1956. It was hoped to do even better in 1958.—(Times - Daily Telegraph) **(Prev. rep. 15280 A.)**

F. JAPAN. — Legalization of Metric System.

A Government decree went into operation on Jan. 1 making the metric system of weights and measures compulsory in all shops and businesses throughout Japan, and also for a number of other purposes such as land surveys. Although the metric system was officially adopted 30 years ago, it had never gained universal acceptance and a cumbersome mixture of British, American and Japanese weights and measures had been in general use for decades. Japanese housewives, for example, had had to do their shopping in British pounds, metric kilograms, or the Japanese *momme* (a fractional part of an ounce), according to the method favoured by the shopkeeper. Moreover, while all Japanese roads are sign-posted in kilometres, it had been customary to calculate distances in the traditional *ri* (about 2½ miles).—(New York Times)

G. UNITED KINGDOM. — War Damage Payments.

The War Damage Commission announced on Jan. 14 that it had paid out £23,250,000 in war damage payments during 1957, bringing total war damage payments by the Commission to £1,222,500,000 in 4,718,000 separate payments.—(Times)
(Prev. rep. 15363 B.)

A. RHODESIA AND NYASALAND FEDERATION. — Passage of Federal Electoral Bill. - Objection by African Affairs Board.

The Federal Electoral Bill was introduced in the Rhodesian Federal Parliament on Dec. 16, 1957 by the Law Minister (Mr. J. M. Greenfield) and received a second reading on Dec. 18 by 21 votes to seven. The Bill, details of which had been published on Sept. 19 [see 15781 A], dealt with the method of election of members of Parliament as enlarged by the Constitution Amendment Act, which had become law on Dec. 16, 1957.

During the second reading debate, **Sir John Moffat** (chairman of the African Affairs Board) stated that he and other members representing African views were seeking legal advice on the Bill and on the Constitution Amendment Act, with a view to possible Supreme Court action. The method of election of African members from the Northern Territories, he maintained, was the responsibility of the Territorial Governments and not of the Federal Government, and it was on this point that legal opinion was being sought. Accusing the Government of breaking faith with the Africans, Sir John said that whilst Africans would have little say in electing the members of unspecified race, Europeans would have a great say in electing the additional African representatives.

Replying to the debate, **Mr. Greenfield** said that the Government had taken the view that under the Constitution the Bill required the prior consent of the three Territories, even though the legal advisers in some Territories had doubts whether this was necessary. Nothing but good, he maintained, could come from the system whereby Africans were elected by voters on the common roll, most of them Europeans, as the European was thereby introduced to African politicians in a normal political atmosphere. Mr. Greenfield refuted Sir John Moffat's charge that the Government was "flooding" the electoral rolls with European voters and that no African would ever be elected as an M.P. of unspecified race. Actually, Mr. Greenfield said, the Bill would bring large numbers of African voters on to the rolls, and in Nyasaland there would from the first be more African voters than Europeans on the common roll; there was therefore every possibility in the long term of Africans being elected on this roll, especially in Nyasaland.

When the debate was resumed in committee on Jan. 6, 1958, the African Affairs Board gave notice that it considered the Bill to be a measure discriminating against Africans, on the ground that whereas at present European voters controlled 20 members and Africans four, under the Bill Europeans would control 49 and Africans still only four. A proposal by Sir John Moffat for the adjournment of the debate until an all-party conference could discuss a better franchise system was rejected after a division. The Bill was given a third reading on Jan. 9 by 25 votes to eight, thus gaining the necessary two-thirds majority.

Speaking in the third reading debate, **Mr. Greenfield** denied the contention of the African Affairs Board that the Bill was a differentiating measure against Africans. The Board, he said, based its conclusions mainly on the fact that Europeans and Africans in the Federation had different standards of education and wealth, but the real question was whether the Bill imposed disabilities or conditions on Africans which were not imposed on Europeans. The Bill was meticulous in avoiding any such differentiating conditions, and all the conditions laid down applied equally to both races.

Sir John Moffat said that "the error and tragedy of the Bill" was that the Government were responsible to a European electorate and had had that in mind when drawing up the Bill. He was satisfied that the members of the Government Party were acting from the highest motives, but the African people in the Northern Territories would not believe that and thought that the franchise was being moved out of their reach.

Lord Malvern (the former Federal Prime Minister) supported the Bill, which he described as a liberal measure which would enfranchise a very large number of Africans, thus giving them the opportunity of learning the system of government and of making their contribution to the Federation. Lord Malvern added that, while they were working for the day when there would be complete partnership by evolution, he was convinced that it would not be possible "to put partnership across" as long as the Federation's domestic affairs were discussed in the U.K. Parliament, and as long as there were nominated members of the Federal Parliament.

The eight members voting against the Bill were Sir John Moffat and the Rev. A. Doig (the two specially appointed European members from Northern Rhodesia and Nyasaland representing African interests); the two African members from Nyasaland (Mr. Chirwa and Mr. Kumbikano); one of the two African members from Northern Rhodesia (Mr. Yamba); and the three Dominion Party members (Mr. W. J. Field, Mr. G. F. M. van Eeden, and Mr. R. W. Williamson). Mr. M. M. Howe, one of the two African members from Southern Rhodesia, had previously announced that he would support the Bill as a compromise attempt to solve a very difficult problem.

It was explained in Salisbury that, in terms of the Federal Constitution, only Bills to amend the Constitution were in certain circumstances brought before the British Parliament for approval. The Electoral Bill, however, was not designed to amend the Constitution and was therefore not subject to that procedure. Nevertheless, under Article 10 of the Constitution, the Electoral Bill was a measure reserved for the signification of her Majesty's pleasure, and it was for the British Government to advise her Majesty in the matter of the Royal Assent.—(Federal Information Department, Salisbury)

(Prev. rep. 15781 A.)

B. UNITED STATES. — Oil Import Restrictions extended to West Coast. - Canadian Protests.

It was announced in Washington on Dec. 24 that the U.S. Government had cancelled the special exemption of Pacific Coast areas from the "voluntary" restrictions on oil imports into the United States, thus making the cut in such imports applicable to the whole country.

The U.S. measure aroused great concern in Canada, and it was announced in Ottawa on Dec. 24 that the Canadian Government had made "the strongest possible representations" on the matter because it could not "accept the view that there was any justification for U.S. limitations on oil coming from Canada, either on economic or on defence grounds." The Canadian Finance Minister (Mr. Fleming), speaking in the Dominion House of Commons on Jan. 3, accused the U.S.A. of violating the NATO agreement concerning co-operation between member-countries.

Mr. Fleming disclosed that the Canadian Government knew in advance that the restrictions were going to be imposed. During the NATO meeting in Paris, however, Mr. Diefenbaker and himself had discussed the matter with President Eisenhower and Mr. Anderson (U.S. Secretary of the Treasury) and had explained (i) that the restrictions were doing great harm to Canada, particularly in view of her large trade imbalance with the U.S.A. and of the U.S. farm products disposal programme; (ii) that the U.S. Pacific States were a natural market for Canadian oil, and would depend on it in wartime; and (iii) that the U.S. action would run counter to the principles of U.S.-Canadian economic co-operation. Mr. Fleming said that the President and U.S. officials had seemed impressed by the Canadian arguments, and he and Mr. Diefenbaker had been led to believe that Canadian oil shipments to the U.S. Pacific States would be exempted from the regulation. On Dec. 23, however, they had learned that there would be no exemption in favour of Canada.

After saying that Canada would continue to protest "in the most vigorous terms" against the U.S. measure, Mr. Fleming refuted the U.S. argument that the oil import restrictions were necessary for reasons of national security—stressing in this connexion that the refineries in the State of Washington which had hitherto taken Canadian oil had been established with specific U.S. approval. The U.S. action, he added, was "in ill accord" with the communiqué of the NATO Council, which had stressed the economic solidarity of the member-countries.

A formal Canadian protest Note was sent to the U.S. Government on Jan. 17. It said that Canadian imports of U.S. oil in 1956 had exceeded $100,000,000, and added: "Surely it is unwise to jeopardize this two-way trade, which works to the benefit of both countries? . . . In the view of the Canadian Government, most imports of Canadian oil must be judged in the context of overall trade relations between the two countries . . . [and] cannot be viewed as an isolated action." The Note therefore urged the U.S. Administration to "reconsider its oil import programme and remove the limitations . . . imposed on the importation of oil from Canada." (New York Times - Department of External Affairs, Ottawa - Montreal Star - Times) **(Prev. rep. 15779 C.)**

C. UNITED KINGDOM. — Trade Union Membership.

Figures published in the December 1957 issue of the *Ministry of Labour Gazette* showed that the aggregate membership of trade unions in Great Britain and Northern Ireland at Dec. 31, 1956 was about 9,700,000, compared with about 9,664,000 at Dec. 31, 1955. Of the 647 unions in existence at the end of 1956, 354 had fewer than 1,000 members, whilst 16 unions (together accounting for 67.2 per cent of total trade union membership) had over 100,000 members. Twenty-five of the unions had their headquarters in Northern Ireland.

Of the total number of unions, 400 with an aggregate membership of 8,549,325, had an income in 1956 of £23,424,000, against expenditure of £20,432,000; their funds at Dec. 31, 1956 totalled £79,495,000.—(Ministry of Labour Gazette)

(Prev. rep. 15853 A; 14675 B; 12073 B.)

D. RELIGIOUS LIFE. — Consecration of First Arab Bishop in Anglican Church.

The first Arab bishop in the Anglican Church (the Rt. Rev. Najib Cub'ain) was consecrated on Jan. 6 as Bishop in Jordan, Lebanon and Syria. The consecration was performed in St. George's Cathedral, Jerusalem, by the Rt. Rev. A. C. MacInnes, Archbishop in Jerusalem.—(Church Times) **(15618 A.)**

A. SIAM. — General Elections. - Formation of National Socialist Party. - New Government formed by General Thanom Kittikachorn.

General elections were held in Siam on Dec. 15 for a new National Assembly of 283 members, of whom 160 were directly elected and 123 nominated by King Phumiphon Aduldet. The elected (first-category) seats were contested by 183 candidates representing 19 political parties, while the nominated (second-category) members consisted for the greater part of Army officers nominated by the King on the advice of Field-Marshal Sarit Thanarat, the Supreme Commander of the armed forces.

The elections were held under the surveillance of the Army authorities, who had previously declared that they would be "free and unfettered" and that no corrupt practices of any description would be tolerated. No obstacles were placed in the way of any of the political parties, and the elections took place throughout the country in a quiet and orderly atmosphere. Unlike the elections of February 1957 [see 15615 A], no allegations of corrupt or illegal practices were brought against any party or group. Of the electorate of 9,859,000 registered voters (out of a total population of about 23,000,000), some 35 per cent went to the poll—a percentage about equal to that in previous elections.

Of the 160 elected seats, 45 were won by the Unionist (*Sahaboom*) party, a moderate group comprising right-centre and left-centre elements, founded in July last and led by Dr. Sukich Nimmanhemin, Minister of Economic Affairs in Mr. Pote Sarasin's "caretaker" administration (see 15773 A). The Democratic (*Prachatipat*) party, a right-wing liberal group led by Nai Phuang Aphaiwongse, won 39 seats, while 15 seats went to various left-wing groups and 61 seats to Independent candidates—the latter including many members of the *Seri Manangasila* party formerly led by Field-Marshal Pibul Songgram.

As none of the parties obtained an overall majority, Field-Marshal Sarit Thanarat entered into discussions with military and political leaders which resulted on Dec. 19 in the formation of a National Socialist party comprising the 123 nominated members of the Assembly, the 45 Unionist members, and about 40 members of the *Seri Manangasila* who had been elected as Independents—the new party thereby obtaining an overall majority of about 210 seats in the National Assembly. The National Socialist party thus represented a coalition between the Army, moderate political opinion of the right-centre and left-centre, and followers of Field-Marshal Pibul Songgram, who had been overthrown by Field-Marshal Sarit Thanarat in the bloodless *coup d'état* of Sept. 16-17, 1957 (see 15773 A). Field-Marshal Sarit Thanarat became leader of the new party, but declined to accept the Premiership.

A new Government was formed on Jan. 3, 1958, with General Thanom Kittikachorn as Prime Minister and Minister of Defence. There were three Vice-Premiers—Prince Wan Waithayakon, General Prapart Charusathien, and Dr. Sukich Nimmanhemin, who retained the portfolios of Foreign Affairs, the Interior, and Economic Affairs respectively.

The other Ministers were: Dr. Serm Vinichaikul—Finance; Nai Vibul Thammabut—Agriculture; Major-General Pong Punakarn—Communications; Phya Atthakari Nibhon—Justice; Mom Luang Pin Malakul—Education; Phra Prakas Satakorn—Co-operatives; Nai Chalerm Prommart—Health; and Major-General Krit Punakan—Industry. In addition there were five Ministers without portfolio and 12 deputy Ministers.

General Thanom Kittichakorn (47), second-in-command of the Siamese Army, was one of the leaders of the *coup* which overthrew Field-Marshal Pibul Songgram. A Regular Army officer, he served as Minister of Defence in Mr. Pote Sarasin's Cabinet but had otherwise taken little part in political affairs. He was Commander of the First Army Corps, which includes the Bangkok area. Of the other Ministers, Prince Wan remained at the Foreign Ministry (serving concurrently as permanent Siamese representative at the U.N.), General Prapart Charusathien at the Ministry of the Interior, and Dr. Sukich Nimmanhemin at the Ministry of Economic Affairs. Most of the civilian Ministers are either non-party members or members of the Unionist Party.

In a press statement on taking office as Prime Minister, General Thanom Kittikachorn emphasized that his Government remained "100 per cent anti-Communist" and would continue to co-operate fully with the West. There would be no change in Siam's foreign policy, which would remain based on the U.N. Charter and the SEATO Pact. General Thanom Kittikachorn added that his Government would take all necessary measures to halt Chinese Communist infiltration, would co-operate with Malaya in suppressing Communism in South-East Asia, and desired co-operation with other Asian countries which were not members of SEATO, such as India, Burma, Ceylon and Indonesia.

Mr. Pote Sarasin, who returned to his post as Secretary-General of SEATO (see 15992 E), declined to take office in the new Government but agreed to become adviser to General Thanom Kittikachorn, for whom he expressed full support. (Times - Le Monde, Paris - New York Times)

(Prev. rep. 15773 A; 15615 A.)

B. RUMANIA. — Death of President Groza. - Election of President Maurer. - New Foreign Minister.

Dr. Petru Groza, President of the Rumanian People's Republic, died on Jan. 7, aged 72.

Born in Transylvania (then part of Austria-Hungary), he practised law at Deva, where he was a large landowner, and served as a sergeant-major in the Austro-Hungarian Army during the 1914-18 war. Starting his political career as a member of Dr. Maniu's National Peasant Party, he was elected to the Rumanian Parliament in 1919, held various posts in Marshal Averescu's Government until 1927 (including those of Minister for Transylvania and Minister of Communications), and in 1953 played a leading part in forming the left-wing Ploughmen's Front (*Frontul Plugarilor*), which subsequently concluded a "popular front" agreement with the Communists. He was imprisoned for these political activities, released in 1941, and served as a Vice-Premier in the Sanatescu and Radescu Governments of 1944-45.

Dr. Groza became Prime Minister in 1945 and continued in that office until 1952. His seven-year Premiership was marked by the abdication of King Michael (1947); the purging of anti-Communist elements from the Ploughmen's Front, in which Dr. Groza took a leading part; the trial and condemnation to life imprisonment of Dr. Maniu; and the conclusion of a 20-year treaty with the Soviet Union, signed by Dr. Groza in Moscow in 1948. In 1952 he was elected President of the Presidium of the Grand National Assembly (the official title of the Rumanian President) after he had been succeeded in the Premiership by M. Gheorghiu-Dej. Dr. Groza was one of Rumania's best-known classical scholars and enjoyed a considerable academic reputation.

M. Ion Gheorghe Maurer (50), the Foreign Minister, was unanimously elected President of Rumania by the Grand National Assembly on Jan. 11 in succession to the late Dr. Groza. He was succeeded as Foreign Minister by M. Avram Bunaceu (the Minister of Justice), the Justice portfolio being taken over by M. Diaconescu. President Maurer, who comes from a German minority district in Transylvania, has been a member of the Rumanian Communist Party for over 20 years and was elected to its central committee in 1948.
(Le Monde, Paris - Times) **(Prev. rep. 15660 A; 12757 A.)**

C. UNITED KINGDOM.—Army. - General Festing appointed Chief of Imperial General Staff. - Other Army Appointments.

The War Office announced on Jan. 31 that (1) General Sir Francis Festing, C.-in-C., Far East Land Forces, would succeed Field-Marshal Sir Gerald Templer as Chief of the Imperial General Staff from September 1958; (2) that Lieut.-General Sir Richard Hull, Deputy Chief of the Imperial General Staff, would succeed General Festing as C.-in-C., Far East Land Forces, in June; and (3) that Lieut.-General H. E. Pyman, G.O.C. First Corps in Germany, would succeed General Hull as Deputy C.I.G.S.

General Festing (55) was one of the youngest British generals during the last world war and commanded the 36th Division in Burma, where he once led a platoon in action while divisional commander. Since the war he had been Director of Weapons and Development at the War Office, had served at SHAPE, and was G.O.C. British Troops in Egypt from 1952-54 and G.O.C. Eastern Command from 1954-56.
(Times - Daily Telegraph) **(Prev. rep. 15669 A; 14159 A.)**

D. AVIATION. — World Altitude Record.

A new world altitude record was set up on Jan. 17 by a French *Trident II* jet fighter, piloted by M. Roger Carpentier, which reached a height of 22,000 metres (about 72,100 feet) and thereby beat the previous record of 70,000 feet set up by a British *Canberra* bomber in August 1957. The machine took off from Istres airfield, near Marseilles. The *Trident II*, built by the *Société Sud-Aviation* (one of the French State aircraft companies), is an interceptor powered by two small turbo-jets and four tail-rockets, and is capable of flying at twice the speed of sound.—(Le Monde, Paris) **(Prev. rep. 15744 B).**

E. WALES. — Minister of State for Welsh Affairs.

It was announced in the *London Gazette* on Jan. 31 that the Minister of State for Welsh Affairs, Mr. David Lewis, had taken the title of Baron Brecon, of Llanfeigan in the County of Brecknock.—(Times) **(Prev. rep. Lord Brecon, 15911 A.)**

A. SHIPPING. — World Tonnage and Construction in 1957. - Continued Supremacy of Japanese Shipbuilding.

Statistical tables published by Lloyd's Register of Shipping in November 1957 gave the total of world shipping at June 30, 1957 as 110,246,081 gross tons, compared with 105,200,361 gross tons at June 30, 1956. The sizes of the principal national fleets (excluding ships under 100 tons, sailing ships, and barges) in mid-1957 and mid-1956 are shown in the following tables :

	1957 Gross Tons	1956 Gross Tons
United States*	25,910,855	26,145,642
United Kingdom	19,857,491	19,545,875
Norway	8,488,164	8,035,340
Liberia	7,466,429	5,584,378
Italy	4,551,956	4,196,762
Japan	4,415,070	4,075,781
British Commonwealth (except U.K.)	4,174,463†	4,009,946
Netherlands	4,335,356	4,006,077
Panama	4,129,029	3,925,751
France	4,009,783	3,943,201
Germany (Western)	3,605,687	3,206,381
Sweden	3,047,535	2,922,092
Soviet Union	2,708,607	2,635,961
Denmark	1,857,478	1,695,221
Spain	1,505,224	1,437,805
Greece	1,471,545	1,307,336
Argentina	1,038,559	1,049,869
Brazil	891,480	862,066
Finland	754,720	751,818
Turkey	593,505	601,485
Belgium	579,432	539,829
Portugal	547,037	536,765
China	541,690	552,552
Costa Rica	519,341	507,706

*Including reserve fleet, estimated at about 12,750,000 tons at June 30, 1957 and at about 14,000,000 tons at June 30, 1946.

†Including 1,521,241 tons registered in Canada; 625,641 tons in India; 599,280 tons in Australia; 419,315 tons in Hong Kong; 251,934 tons in New Zealand; 176,628 tons in South Africa; and 143,558 tons in Pakistan.

Although the record increase in world tonnage during 1957 was widely distributed amongst the principal maritime nations, the largest percentage expansion (33.7 per cent) was shown by the Liberian "flag of convenience."

Of world tonnage of all types, 37.0 per cent were motorships and 55.1 per cent oil-burning steamers, making a total of 92.1 per cent using oil fuel.

Of the total world tonnage, the largest group again consisted of ships of 6,000-8,000 gross tons, but a large proportion of these (including the U.S. reserve fleet) were out of commission. By far the greatest amount of tonnage built in the past five years, however, fell within the 10,000-15,000 tons group; 75 per cent of these ships and 84 per cent of ships of more than 15,000 tons were oil tankers. The recent trend toward still larger tankers was shown by the considerable increase since 1956 in ships of over 20,000 gross tons.

Of the principal maritime nations, Liberia had the largest proportion of modern tonnage, with 50.9 per cent under five years old, followed by Western Germany (47.9 per cent), Norway (38.0 per cent), Denmark (30.2 per cent), Sweden (33.5 per cent), Japan (31.3 per cent), the Netherlands (28.9 per cent), France (25.9 per cent), the United Kingdom (22.8 per cent), and Italy (21.9 per cent). Only 3.7 per cent of tonnage registered in the United States was under five years old.

The world tanker fleet at June 30, 1957 totalled 29,937,882 gross tons, or about 27.2 per cent of all ships, compared with 26.8 per cent at June 30, 1956.

The largest tanker fleets were owned by the United Kingdom (5,585,860 tons), Norway (4,747,002 tons), Liberia (4,142,706 tons), the U.S.A. (4,142,040 tons), Panama (2,135,244 tons), Italy (1,342,292 tons), France (1,304,172 tons), and the Netherlands (1,116,746 tons).

Shipbuilding Returns.

Returns published by Lloyd's Register of Shipping on Jan. 22, 1958 gave the gross tonnage of merchant ships under construction throughout the world at Dec. 31, 1957 as 9,947,977, excluding ships building in the U.S.S.R. and China, as well as ships under 100 tons, barges, etc. Of the total, 23.58 per cent was building in the United Kingdom and 76.42 per cent elsewhere.

Ships building in Great Britain and Northern Ireland numbered 341 of 2,345,408 tons (steamers 1,070,113 tons, motorships 1,275,295 tons), including 4 steamers of over 30,000 tons, 7 of 25,000-30,000 tons, 16 steamers and 2 motorships of 20,000-25,000 tons, and 5 steamers and 2 motorships of 15,000-20,000 tons. Of the total, 27 ships (1,943,250 tons) were building for Great Britain and N. Ireland, 20 (50,628 tons) for other British Commonwealth countries, 11 (120,250 tons) for Norway, 8 (81,420 tons) for Liberia, 3 (32,280 tons) for the Irish Republic, 3 (25,800 tons) for Belgium, 1 (17,900 tons) for Panama, 2 (15,550, tons) for Greece, 4 (10,000 tons) for Cuba, 4 (2,740 tons) for the U.S.S.R., 2 small vessels for Poland and 1 for Kuwait, and 4 ships (44,550 tons) for unspecified countries. Principal shipbuilding areas were : the Clyde (100 ships of 637,344 tons), the Tyne (41 ships of 446,480 tons), Belfast (19 ships of 303,055 tons), the Tees (24 ships of 263,838 tons), Sunderland (32 ships of 259,108 tons), and Liverpool (16 ships of 156,168 tons).

Ships building abroad numbered 1,340 of 7,602,569 tons (steamers 3,308,205 tons, motorships 4,294,364 tons), divided as follows : Japan 161 (1,589,280 tons), Italy 104 (939,537 tons), Western Germany 223 (928,027 tons), the U.S.A. 39 (695,339 tons), Netherlands 173 (643,314 tons), Sweden 75 (611,252 tons), France 65 (521,837 tons), Norway 77 (324,692 tons), Finland 69 (208,845 tons), Poland 70 (186,632 tons), Denmark 32 (175,559 tons), British Commonwealth countries 55 (161,665 tons), Yugoslavia 27 (146,079 tons), Belgium 16 (144,428 tons), Portugal 28 (42,912 tons), Turkey 9 (7,637 tons), Peru 1 (4,297 tons), Argentina 1 (1,600 tons). Four small vessels were building in the Irish Republic, 2 each in Indonesia and Austria, and 1 in Brazil. The total included 4 steamers of over 30,000 tons in the U.S.A., 2 each in Italy and Japan, 1 each in France, Western Germany, and the Netherlands; and 11 steamers of 25,000-30,000 tons building in Japan, 4 in the U.S.A., and 1 each in France, Germany, and Sweden.

Tankers building throughout the world numbered 332 of 4,883,561 tons, including 75 (1,048,408 tons) in the U.K., 45 (869,041 tons) in Japan, 30 (581,262 tons) in Italy, 25 (406,795 tons) in the U.S.A., 25 (406,795 tons) in Sweden, 22 (292,107 tons) in the Netherlands, 40 (259,924 tons) in Western Germany, 13 (240,605 tons) in France, and 18 (213,119 tons) in Norway.

Launchings and Keel-Layings in Fourth Quarter of 1957.

Ships launched during the last quarter of 1957 included the *Pendennis Castle* (29,000 gross tons), built by Harland and Wolff, Belfast, for the Union Castle line's Southampton-Capetown-Durban service.

The keels were laid in September of the two largest liners to be built in Britain since the *Queen Elizabeth*—the *Oriana* (40,000 gross tons), building by Vickers-Armstrong, Barrow-in-Furness, for the Orient Line, and a 45,000-ton liner (as yet unnamed) building by Harland and Wolff, Belfast, for the P. and O. Company. The combined cost of the two ships was put at about £30,000,000.

Order for New Canadian Liner.

Vickers-Armstrong Ltd. announced on Jan. 2, 1958 that they had signed a contract with Canadian Pacific Steamships for a 27,500-ton liner, to be built at Walker-on-Tyne, with machinery built at Barrow. The new ship (whose name had not been fixed) would carry over 1,000 passengers. She would be both the largest of her owners' North Atlantic fleet and the biggest to navigate the St. Lawrence River to Montreal. Her cost was estimated at £8,000,000 to £10,000,000.

Sale of British Ex-Liners.

The sale was announced on Jan. 13, 1958 of the former Canadian Pacific liner *Empress of Scotland* (26,313 gross tons), built in 1930, to the newly-formed Hamburg-Atlantic Line, in which the Greek-controlled Home Lines has a dominant interest. The purchase price was about £1,000,000. After reconditioning at Hamburg, the liner will sail under the German Federal flag between Hamburg and New York.

On the same day it was announced that the emigrant ship *New Australia* (20,256, gross tons), built as the luxury liner *Monarch of Bermuda* and converted in 1950 by the British and Australian Governments for emigrant-carrying, had been sold to the Greek Lines, which operates a regular service between Bremerhaven and Montreal.

Figures published in the Press on Dec. 27, 1957 showed that Japan, which in 1956 won from Britain the peace-time leadership in shipbuilding, further improved her position in 1957, having launched about 2,300,000 gross tons as compared with 1,469,155 gross tons launched in Britain. Japan thus eclipsed the British record—established in 1920—of just over 2,000,000 gross tons launched in a single year.—(Lloyd's Register of Shipping - Times - Daily Telegraph) **(Prev. rep. 15338 A; 15827 A; Sale of "Pasteur," 15810 C.)**

B. GREECE. — Acceptance of U.S. Missiles.

The Greek Government announced on Jan. 26 that it had accepted U.S. *Nike* anti-aircraft missiles for the Greek armed forces under NATO arrangements for collective defence. It was stated that the weapons would have non-atomic warheads, and that equipment for training a Greek battalion in their use would be provided by the U.S. Government free of charge. (Times - Daily Telegraph) **(Prev. rep. 15965 A.)**

C. INDIA - PHILIPPINES. — Legations raised to Embassy Status.

As from Jan. 1 the Indian Legation in Manila and the Philippine Legation in Delhi were raised to the status of embassies, Major-General M. S. Chopra (the Indian Minister in Manila) becoming his country's first Ambassador to the Philippines.—(Indian High Commissioner's Office, London) **(Prev. rep. 14968 A.)**

A. ISRAEL. — Resignation and Reconstitution of Ben-Gurion Cabinet. - Coalition Parties' Agreement on Collective Cabinet Responsibility. - Israeli Efforts to obtain Military Equipment from Western Germany.

A Cabinet crisis was precipitated in Israel during December by the decision of the Prime Minister, Mr. Ben-Gurion, to send a leading Israeli personality to Western Germany to negotiate the purchase of military equipment. At a Cabinet meeting on Dec. 15 Mr. Ben-Gurion's decision was approved by a majority of only one vote, and the Prime Minister's action was strongly criticized by several Ministers. Details of the meeting were subsequently disclosed by the *Ahdut Avoda*, one of the Government parties, in its newspaper. A demand by Mr. Ben-Gurion for the resignation of the Ministers belonging to that party was rejected by the political committee of the *Ahdut Avoda* on Dec. 23.

Mr. Ben-Gurion said in the *Knesset* on Dec. 24 that Israel had succeeded in obtaining equipment to match the Arab States in two dimensions, land and air, but that a danger, "not only to our security but also to immigration before it ever reaches our shores," had recently arisen in "a third dimension." [This statement was believed to refer to the purchase by Egypt of three Soviet submarines -see 15599 A.] The purpose of the proposed mission to Western Germany by "a high-ranking person" had been to obtain equipment which was not available elsewhere to meet this danger. Mr. Ben-Gurion told a press conference on the following day that this mission had not been cancelled, although the envoy had been changed. Mr. Peres, Director-General of the Defence Ministry, left for Bonn on Dec. 25 and returned to Israel on Dec. 29.

The West German Government issued a statement on Dec. 27 expressing surprise at Mr. Ben-Gurion's statement that Israel hoped to purchase arms from Western Germany, and emphasizing that it was its policy not to allow any delivery of arms to areas where an acute conflict existed. Moreover, no private German firm would be allowed to export arms or military equipment to Israel. A Government spokesman subsequently said on Dec. 30 that envoys from Israel had seen Dr. Adenauer, but had not discussed the purchase of arms. It was reported from Helsinki on Dec. 29 that the Israeli Government had attempted to buy arms from Finland, which had refused to supply them on the ground that it might lead to international complications.

The Israeli Cabinet had meanwhile adopted on Dec. 24 two resolutions proposed by Mr. Ben-Gurion, stating (*a*) that "the gravity of the security situation in which Israel is placed makes it essential to increase her defensive capacity by the acquisition of equipment from any quarter and any source," and (*b*) that "the Government considers the publicity given to its confidential decision to be harmful to the State and a grave violation of the principle of collective responsibility." After a further meeting on Dec. 30, however, Mr. Ben-Gurion announced that he had not succeeded in his efforts "to ensure in future the maintenance of collective responsibility of Government and coalition parties in order to prevent injury to the international position of Israel and the requirements of security," and therefore intended to resign. This decision was attributed to the refusal of *Ahdut Avoda* and *Mapam* (the two left-wing parties represented in the Cabinet) to accept Mr. Ben-Gurion's proposal that any Minister who divulged Cabinet proceedings might be dismissed by a two-thirds vote of the other members of the Government.

Mr. Ben-Gurion tendered his resignation on Dec. 31 to President Ben-Zvi, who asked him to form a new Government. After discussions with the former coalition parties, Mr. Ben-Gurion reconstituted his Cabinet on Jan. 6 with the same membership as previously—i.e. nine members of the Labour Party (*Mapai*), two each from the *Ahdut Avoda*, *Mapam*, and the National Religious Party (comprising the *Mizrachi* and *Hapoel Hamizrachi* groups) and one from the Progressive Party.

Mr. Ben-Gurion made a statement to the *Knesset* on Jan. 7 on the Cabinet crisis and its solution.

After referring to his offer of resignation **Mr. Ben-Gurion** explained that he had accepted President Ben-Zvi's invitation to form a new Government on condition that the parties who were prepared to take part in the Government should undertake two obligations: (1) to maintain the collective responsibility of the Government in principle and practice; ; and (2) to ensure the effective preservation of secrecy in regard to the deliberations of the Government, especially in matters of security and foreign policy. The five parties constituting the Coalition had meanwhile informed him that they had agreed to participate in a Government which would be based on these basic principles and on the coalition agreement of the previous Cabinet. The first Article of the basic principles stressed "the collective responsibility of all the members of the Government and all the parties participating in it," and stated that this responsibility "embraces a working programme agreed upon in advance and the decisions of the Cabinet."

All five parties (Mr. Ben-Gurion continued) had declared that they were prepared to maintain the Government until the end of its term of office in July 1959, or a few months later. To reinforce the collective responsibility of the Government and the preservation of secrecy, the parties had also agreed to the following principles:

"(i) Collective responsibility will bind all the members of the Cabinet and the coalition parties to vote in the *Knesset* for all the decisions of the Government and for the laws proposed by it to the *Knesset*.

"(ii) The Government may permit a party to abstain from voting in certain circumstances. A party may also permit one or several of its members to abstain from voting.

"(iii) The details of such abstention and the circumstances under which it may be permitted will be determined by the Government.

"(iv) If one or more Ministers feel themselves compelled to abstain from voting without the agreement of the Government, the Minister or Ministers concerned must resign from the Government.

"(v) A vote by a [coalition] party against a Government decision shall be treated as equivalent to the abstention of a Minister without the agreement of the Government.

"(vi) The Ministers bind themselves, in accordance with the coalition agreement, to preserve complete secrecy in regard to all deliberations in the Government and its committees in matters of security and foreign policy, without any exception.

"(vii) If the Government decides that secrecy shall apply to its deliberations on any other matter, the Ministers are also bound to secrecy in that case.

"(viii) To guarantee the secrecy required, a State Secrets Law, applying both to the person revealing the secret and to the newspaper publishing it, will be submitted to the *Knesset* at the earliest possible moment on behalf of the Coalition parties.

"(ix) The law will define those matters included in the category of State secrets the publication of which is forbidden. It will in any case include the deliberations of the Cabinet on matters of security and foreign affairs, as well as such other deliberations as the Government itself does not release for publication."

[It was pointed out in the Israeli and foreign Press that the most controversial point in Mr. Ben-Gurion's original proposals had been dropped viz., for the dismissal of a Minister by a two-thirds majority of the Cabinet if he or his party were found guilty of divulging Cabinet secrets.]

After debate, the new Government was given a vote of confidence by 76 votes to 33. The National Religious Party (which is represented in the coalition as stated above) accepted the principle of collective responsibility with the reservation that it would not apply if any Government legislation conflicted with the laws of the Torah.—(Israel Government Press Office, Jerusalem - Times - Manchester Guardian - New York Times - Die Welt, Hamburg) **(Prev. rep. 14929 C ; 14520 A.)**

B. LONDON. — The St. Paul's Plan.

The Ministry of Housing and Local Government announced on Jan. 8 that the plan for the re-development of the area round St. Paul's Cathedral (see 14948 C) had been approved in principle by the Minister (Mr. Henry Brooke) subject to three main modifications:

(1) The Minister had taken the view that the proposed northward extension of Carter Lane to join Ludgate Hill would impair the appearance of Ludgate Hill as an approach to the Cathedral, without having any advantages for traffic. He had decided, therefore, that the original plan to extend Carter Lane directly westward to the south-east corner of the proposed Ludgate Square (which will replace Ludgate Circus) should be retained.

[The Minister's decision means that Ludgate Hill will cease to be a principal traffic route when Carter Lane has been widened and extended to the new Ludgate Square.]

(2) Mr. Brooke had also taken the view that the big office block which it was proposed to erect in Newgate Street should be substantially reduced in height, since it would "interfere with important views of the Cathedral even if scaled down to 190 feet." [The "Holford Plan" had envisaged a 22-storey block with a height of about 250 ft., compared with the Cathedral's height of 365 feet.]

(3) As the Minister felt that the best treatment had not been found for the forecourt to the south side of the Cathedral, he believed that this question would be better considered in the future, after existing commercial buildings on the site had been demolished. Accordingly, he proposed to amend the plan by deleting the proposed office zone on the south side of the forecourt, east of Creed Lane. The proposals for the north side of the forecourt were approved.

Except for the first modification (*re* Carter Lane), where the Minister decided in favour of proposals contained in the post-war London Development Plan, the plan approved by Mr. Brooke was basically that prepared by Sir William Holford at the request of the City Corporation. Sir William expressed his satisfaction at the Minister's "sound and encouraging" decisions and, in particular, at the fact that Mr. Brooke had "not whittled the plan down."—(Times - Daily Telegraph) **(Prev. rep. 14948 C.)**

A. UNITED KINGDOM. — Mr. Macmillan on Relations between Russia and the West. - Suggestion for Non-Aggression Pact. - Attitude to "Summit" Talks.

In a broadcast on Jan. 4, on the eve of his departure for a six-weeks' tour of Commonwealth countries, the Prime Minister suggested that renewed Western attempts to seek agreement with the Soviet Union on disarmament and the relaxation of international tension might start with a "solemn pact of non-aggression." Declaring that the Western Powers were "ready and anxious to make a new effort to break the deadlock," Mr. Macmillan said that he did not mind if this were done "through the United Nations, at some smaller meeting, or through diplomatic channels" provided the "rubble of old controversies and disagreements" were swept away and it was possible to "get the path ready for a meeting of Heads of Governments." The Prime Minister spoke as follows:

"Peace is the problem of our day; it was the problem of peace which took the Heads of Governments to the NATO meeting in Paris. It is peace which will occupy us a great deal in the talks I shall be having with my fellow Prime Ministers in the Commonwealth countries I am going to visit.

"Our work for peace is dominated by the problem of how well we can get on with the Russians. Yet over Russian policy hangs a question mark. They often speak fair words . . . Are these professions of respect and friendship really genuine? Or are they saying a number of things they think we would like to hear, in order to weaken our resolve? We cannot yet be sure of the truth. And it is a terrible responsibility for any Government to have to choose to act upon this interpretation or that without being absolutely certain.

"Let me give you an example. There have been repeated proposals for the abolition of nuclear armaments, atom bombs and hydrogen bombs. Suppose that we worked out an agreement for the abolition of such weapons and the prevention of their manufacture. That would be very attractive for many reasons—among others, because it would save us a great deal of money and effort. But suppose that as a result of such an agreement we found ourselves virtually defenceless before the greatly superior weight of Russian conventional arms—men, guns, tanks, aeroplanes, surface ships, and submarines? If that happened wouldn't we bitterly regret the loss of our nuclear deterrent—the one weapon that must give pause to any enemy, however powerful he may be in other respects? Some people may think that it is no part of Communist philosophy or Russian intentions to bring any more countries into subjection by force, and this may well be true. I do not rule it out—not at all. But can anyone be sure?

"I look at it like this. In a curious way the knowledge of the immense devastation which would follow a world conflict does now deter aggressors. The hydrogen bomb is a protection, for in a nuclear war neither side can win a victory. The fact that our sure defence lies in our ability to destroy an aggressor as cruelly as he destroys others is, of course, a horrible idea. I know that; but we dare not let our revulsion from the idea of the H-bomb deprive us of our best guarantee of safety from attack and so really the best guarantee of peace.

"There is at the moment a kind of stalemate, and it is worth considering how this has come about. In 1945, after the war, we were all hoping for a period of prolonged peace and friendship. We had learned to admire the courage and fortitude of our Russian allies. Although we differed profoundly from them in their attitude towards life and liberty, we were confident that we could live in harmony together. Indeed, if we had thought of the phrase then we should have said 'peaceful co-existence'—that really means 'live and let live.' But, alas, our hopes were soon to be dashed. The Soviet Union, which had already swallowed the Baltic States, brought most of Eastern Europe into subjection, and finally the seizure of Czechoslovakia led to the formation of NATO. This alliance of 15 countries was born from the bitter experience of aggression and the determination to halt it. In that purpose it has so far succeeded. And if therefore we have now reached a stalemate, it is no bad thing, for at least it means that world conflict is much less likely, perhaps even impossible.

"Now a word on the American contribution. It has certainly been very great. It may be, of course, that it has been to their own interest, but if their interest and ours coincides, all the better for us both. If we had had this sort of co-operation with America after the first war, we might not have had a second war. And every Government that we have had in Britain since 1947, of whatever political party, has welcomed and worked with the American alliance. In 1948, for instance, American bombers arrived in Britain by an arrangement entered into by Mr. Attlee, then Prime Minister. This arrangement was later reaffirmed by Mr. Churchill. The Americans came to join in the protection of the free world. They are part of our joint defences.

"Of course their bases cannot be used for warlike operations except by agreement between our two Governments. We have a veto, and they have a veto. The early American bombers were armed with the atom bomb; now they are armed with the hydrogen bomb. If occasional flights with hydrogen bombs are necessary to ensure the effectiveness and reliability of our defence, then we must accept that necessity, for effective deterrence depends on an instant readiness to deter. These bombs cannot go off of their own accord; there can't be any nuclear explosion, even if the aircraft which carries them falls and crashes. There would be a small—very small—risk of radiation, indeed practically negligible. And to make the bombs effective needs an elaborate piece of technical drill by the crew of the aircraft.

"None of these bombs could be or would be used except by deliberate military order given upon the instruction of both the British and the American Governments acting in agreement. We ourselves have an absolute veto on the dropping of these bombs from any plane based in this country; there is no doubt about this whatever. Again, if bases for nuclear rockets are the up-to-date equivalent for bomb-carrying planes, then our whole defence policy, our whole strategy, really becomes meaningless unless we have these bases. And we will have exactly the same veto on the use of rockets as we now have on the use of bombs from aeroplanes.

"Now for the future. There are two ways to preserve the peace of the world and two only. They are not opposed, they are parallel and really complementary. The first is to maintain the full strength of our alliances. There may be some who would seek to open old wounds, to stir differences between us and to incite jealousies. These people serve their own generation ill. I am certain that the great mass of responsible people in all the NATO countries want to eliminate any differences between us—they want to work for the fullest mutual understanding. We must stand together or we shall fall together. It would be fatal if we allowed NATO or the other alliances to be broken up, for NATO is not just a military alliance—it is something more, it provides a moral basis for a large part of the free world. That is the first way, then: to keep the alliances together.

"But there is a second way which is just as important: the way of negotiation, of conciliation. Do not let us be dismayed by the failures to date. We must go on trying. We intend to go on trying to get some agreement with the Russians for disarmament and for the relief of tension in the world. All sorts of plans have been discussed. In the U.N. Disarmament Commission four countries—Britain, America, Canada, and France—recently put forward what we thought was a fair plan for at least partial disarmament. This plan received the overwhelming support of the U.N. General Assembly; not one single country voted against it, except, alas, Russia and the satellites.

"There was a time, last summer, when I had every hope that the Soviet Government would begin to discuss this plan seriously with us, but in the end these hopes, too, were dashed. All the same we mustn't give up, we must try again. What can we do? We can start by a solemn pact of non-aggression. This has been done before. It will do no harm. It might do good. We must reach agreement about the testing of nuclear weapons, their manufacture, their use and their numbers, but we must also deal with what are called conventional arms. Yet peace can't be secured just by words—we need deeds as well.

"We are always ready to use new ideas and try new methods, but we must carry with us the lessons of the past. Our whole purpose is to create confidence. It is no good taking away one fear and creating another. We have at least gained this—that we have made such an even balance of power as makes war almost impossible. Don't let us lose this advantage. Therefore, in the plans proposed, whether by the elimination of some weapons, or the reduction of others, or by any other means, we must see that this balance is preserved and that one side is not left with preponderating power over the other. Reduction in all forms of weapons must be so planned as to reduce tensions and not to increase apprehensions.

"There is one condition which is vital to every plan: the agreements must be subject to an effective system of inspection and control in all the countries concerned. We on our side would agree to inspectors ranging over our countries, so long as inspectors could do the same without hindrance in the Soviet bloc.

"Nobody could have tried harder than we have to reach agreement with the Soviet Government. For example, I have been myself at two high-level meetings with the Russians—one of Heads of Governments, the other of Foreign Ministers. I have watched the work of the Disarmament Conference. We couldn't get an agreement. But I don't despair, and that is why at NATO last month we made it perfectly clear that we were ready and anxious to make a new effort to break the deadlock. For my part I don't mind whether we make it through the United Nations or at some smaller meeting. Whether it is done this way or through diplomatic channels, or a combination of both, the object would be to clear away the rubble of old controversies and disagreements, and then perhaps to get the path ready for a meeting of Heads of Government."

A British Foreign Office spokesman made the following comment on that passage in the Prime Minister's broadcast in which he stated that a non-aggression pact with Russia "would do no harm" and "might do good": "This passage should be read as a whole. It is the relationship between words and deeds which he [Mr. Macmillan] was seeking to bring out. What he was really saying was that we must continue to work for an agreement which will be followed by deeds—i.e. the fulfilment of which will be proved by actions taken. If it would assist in arriving at such agreements to have a non-aggression pact, then the British Government would feel that such a pact . . . might do some good." (Times - The Listener) **(Prev. rep. Macmillan-Bulganin Letters, 15974 A; Mr. Macmillan at NATO, 15965 A.)**

A. SOVIET UNION. — Ministries for Defence Industries replaced by State Committees. - New Premiers of Russian and Uzbek Republics. - Changes in Communist Party Leadership. - New Military Appointments. - Enlargement of Supreme Soviet.

The Presidium of the Supreme Soviet announced on Dec. 14 that the four main Ministries concerned with defence industries —those of the Aircraft Industry, Defence Industry, the Radio Engineering Industry, and the Shipbuilding Industry—had been abolished and replaced by State Committees subordinated to the Council of Ministers.

M. Pyotr Dementiev (formerly Minister for the Aircraft Industry) became chairman of the Committee on Aviation Techniques; M. Alexander Domrachev (Deputy Minister for Defence Industry) chairman of the Committee on Defence Techniques; M. Valery Kalmykov (Minister for the Radio Engineering Industry) chairman of the Committee on Radio Electronics; and M. Boris Butoma (Deputy Minister for the Shipbuilding Industry) chairman of the Committee on Shipbuilding. At the same time M. Dmitri Ustinov, the former Minister for the Defence Industry, was appointed a Deputy Premier in the Soviet Government; it was believed that he would be responsible for co-ordinating the work of the four State Committees.

A plenary meeting of the Communist Party's central committee on Dec. 16-17 elected M. Nuritdin Mukhitdinov (secretary of the Uzbekistan Communist Party) as a full member of the party Presidium, of which he had been a candidate member since February 1956. He was also elected to the party Secretariat, together with two other members of the Presidium, M. Nikolai Ignatov and M. Alexei Kirichenko (party secretaries for the Gorki district and the Ukraine respectively). The central committee's meeting was followed by a number of important changes in the party leadership, as given below:

(1) M. Frol Kozlov, a member of the party Presidium, was appointed Premier of the Russian Soviet Republic (R.S.F.S.R.) on Dec. 19 in place of M. Yasnov, who became a First Deputy Premier. M. Spiridonov, secretary of the Leningrad city party, succeeded M. Kozlov in his former post of party secretary for the Leningrad district.

(2) M. Nikolai Byelayev, also a member of the Presidium, was appointed secretary of the Kazakhstan Communist Party on Dec. 26 in place of M. Yakovlev. Reports from Moscow suggested that M. Byelayev (who is one of the party's leading agricultural experts) had been appointed to this post in order to promote grain production in Kazakhstan, which is scheduled to play an important part in the Government's plan for reclaiming uncultivated lands (see 13604 A).

(3) M. Sabir Kamalov, Premier of Uzbekistan, was elected secretary of the Uzbek Communist Party on Dec. 28 in place of M. Mukhitdinov. He was succeeded in the Premiership of Uzbekistan by M. Mansura Mirza-Akhmedov.

(4) It was announced on Dec. 25 that Mme. Ekaterina Furtseva had been released from her post as secretary of the Moscow city party (one of the most important offices in the U.S.S.R., once held by M. Khrushchev and by Stalin) in order to devote her full time to her duties as a member of the national Secretariat, and that M. Vladimir Ustinov had been appointed to succeed her. M. Smolyakov (a former Minister for Machine-building) and M. Nikolai Podgorny were appointed secretaries for the Gorki district and the Ukraine respectively on Dec. 26, in place of M. Ignatov and M. Kirichenko.

M. Maxim Saburov, onetime chairman of the former State Economic Commission, and a former Deputy Premier, had previously been appointed deputy chairman of the State Committee for Foreign Economic Relations on Sept. 16, 1957. The chairman of this committee is M. Pervukhin (see 15701 E).

A number of changes in the High Command of the Soviet Army were announced in November and January. Marshal Rokossovsky, who had been transferred to the command of the Transcaucasian Military District in October at the height of the Syrian-Turkish tension, was restored to his previous post of Deputy Defence Minister on Jan. 2. Marshal Andrei Grechko was succeeded as C.-in-C. of the Soviet forces in Germany on Nov. 25 by General Matvei Zakharov (commander of the Leningrad military district) and was reported to have been appointed a Deputy Defence Minister and commander of Soviet ground forces in succession to Marshal Malinovsky, the new Defence Minister.

Pravda referred to General F. I. Golikov on Jan. 10 as head of the political administration of the armed forces, making no reference to the previous holder of that post, General Zheltov. It was suggested in the British press that the substitution of General Golikov (a professional soldier) for General Zheltov, whose appointment had been primarily a political one, and who was reported to have been largely responsible for Marshal Zhukov's dismissal, was intended to conciliate Army opinion. A Russian Army spokesman confirmed on Jan. 14 that General Golikov had replaced General Zheltov as head of the political department of the armed forces.

It was announced on Jan. 5 that both Houses of the Supreme Soviet would be enlarged because of the increase in population. The membership of the Soviet of the Union would be increased at the next elections (which are fixed for March 16) from 700 to 731, and that of the Soviet of Nationalities from 600 to 633. (Soviet Embassy Press Department, London - Times - Manchester Guardian - New York Times - Le Monde, Paris)

(Prev. rep. 15575 A; 15639 A; 15843 A.)

B. SPAIN. — Arrests of Communists.

The Ministry of the Interior announced on Jan. 19 that 44 Spaniards had been arrested in Madrid, Valencia and Saragossa for attempting to reconstitute the Communist Party in Spain. The arrested persons were stated to have confessed to carrying out political directives from Soviet sources.

The Ministry said that some of the arrested persons had attended the World Festival of Youth held in Moscow in the summer of 1957, and had agreed on their return to Spain to infiltrate into the governing bodies of students' organizations and syndicates [trade unions] with a view to promoting "deviationist policies" and spreading confusion. Reference was made to plans for organizing throughout Spain a so-called "day of national reconciliation" which, the Ministry stated, was to have led to general disturbances. To achieve this plan a campaign of propaganda and proselytism was alleged to have been organized and "cells" formed in various centres.

General Alonso Vega (the Minister of the Interior) explained that 193 Spaniards attended the Moscow youth festival, of whom 103 the sons of exiles were not resident in Spain. Those from Spain had gone first to Paris, where they received invitations to Moscow; no mention was made of political matters, and they had been treated solely as tourists. The Spanish police had been aware of the movements of all those who visited Moscow, and they had been closely watched after their return to Spain.

The Communist Party has been outlawed in Spain since the Civil War. (Times - Le Monde, Paris)

C. UNITED KINGDOM. — Damages for Libel awarded to Labour Party Leaders against "Spectator."

Damages for libel of £2,500 each, with costs, were awarded in the High Court on Nov. 22, 1957, to Mr. Aneurin Bevan, M.P., Mr. Richard Crossman, M.P., and Mr. Morgan Phillips, the secretary of the Labour Party, against the owners of *The Spectator*. The action arose from an article published on March 1, 1957, which, the plaintiffs complained, implied that while attending the Italian Socialist Party congress they had drunk so much whisky that the Italians could not make out whether they were sober or not. The editor of *The Spectator* subsequently agreed in July to publish an apology, but this did not appear until Sept. 20. In his summing-up, Lord Chief Justice Goddard stated that he had no hesitation in saying that the words complained of could be defamatory; that there were no grounds for saying that the article had been misunderstood; and that an apology, especially one published six or eight weeks before the action came to trial, was no defence.—(Times - Manchester Guardian)

D. JAPAN. — Population Figures. - Tokio claimed as World's Largest City.

Figures published on Dec. 25, 1957 by the Statistics Bureau of the Prime Minister's Office showed that the population of Japan was 91,100,000 as at Oct. 1, 1957, an increase of 19,000,000 since the end of the Second World War. Japan thus had the fifth largest population in the world after China, India, the Soviet Union and the United States. The population of Tokio at the same date was 8,534,993, making it the world's largest city.—(Japanese Embassy Press Office, London)

(Prev. rep. 14629 B.)

Note. The British Census of 1951 showed the population of Greater London—i.e. the Metropolitan Police District—as 8,346,137 [see 11751 A]. The population of New York City in 1957 was 7,795,471, according to a census taken by the municipal authorities in the spring of that year [see 15821 C]. *Ed. K.C.A.*

E. SOUTH-EAST ASIA TREATY ORGANIZATION. — Mr. Pote Sarasin reappointed Secretary-General.

It was announced in Bangkok on Jan. 10 that Mr. Pote Sarasin had been reappointed Secretary-General of the South-East Asia Treaty Organization following the formation of a new Siamese Government headed by General Thanom Kittikachorn (see 15988 A). Mr. Pote Sarasin had been appointed Secretary-General of SEATO in July 1957, but temporarily resigned the post on Sept. 21 to take office as Prime Minister of Siam in the "caretaker" Government formed after the overthrow of Field-Marshal Pibul Songgram. (New York Times) **(Prev. rep. 15773 A; 15644 F.)**

FEBRUARY 1—8, 1958

A. UNITED STATES. — Successful Launching of "Explorer" Earth Satellite.

The first U.S. artificial earth satellite, called *Explorer* or *Alpha 1958*, was successfully launched at Cape Canaveral (Florida) at 10.48 p.m. local time on Jan. 31 (3.48 a.m. G.M.T. on Feb. 1) and began orbiting the earth seven minutes later at a speed of 18,000 miles an hour.

The pencil-shaped vehicle containing the satellite was an adapted *Jupiter-C* rocket consisting of (1) a modified *Redstone* rocket—a guided missile developed by the U.S. Army; and (ii) a cluster of rockets—scaled-down versions of the *Sergeant*, an Army tactical missile—superimposed on the cone of the *Redstone*, working in three stages and described as the "high-speed assembly." The last of these rockets (the third stage of the "high-speed assembly") remained attached to the satellite and moved with it through outer space.

The *Explorer* satellite was officially described as a bullet-shaped tube about 80 inches long, six inches wide, and weighing 30.8 lb., including 12.67 lb. of the final-stage rocket and 10 lb. of radio transmitters and instruments to measure outer and inner temperatures, cosmic rays, and the effect of meteoric dust on the outer surface of the satellite.

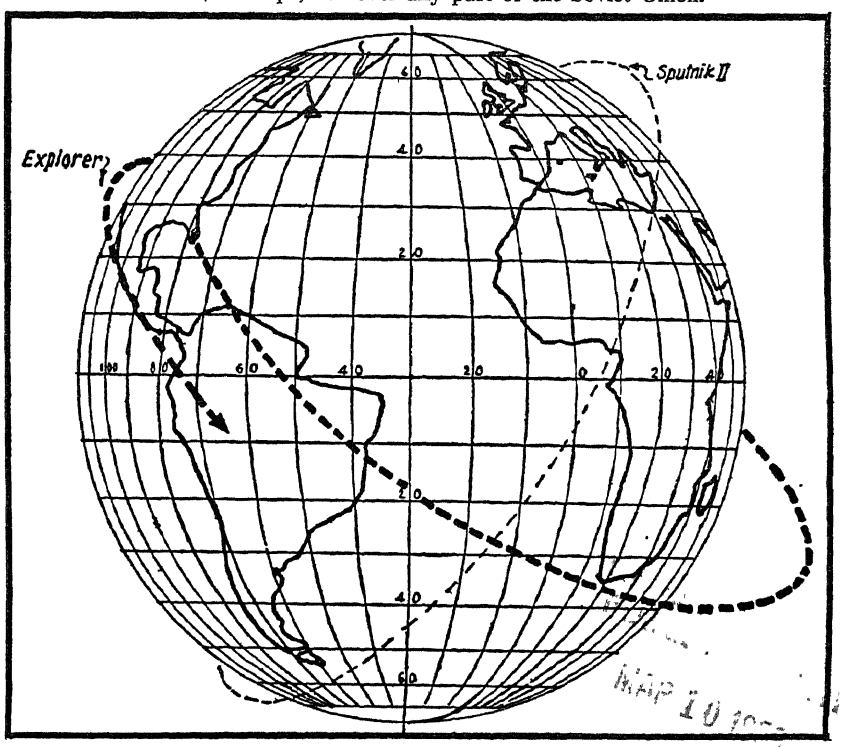
The height of the *Jupiter-C* rocket which launched the *Explorer* was given as 68½ feet, and that of its main stage (i.e. the *Redstone* rocket) as 56 feet, with a diameter of 70 inches. The *Redstone* (which is powered by a *Rocketdyne* engine, and can carry a thermo-nuclear warhead at least 200 miles) is an enlarged and improved version of the German V-2 weapon used against London during the later stages of the Second World War. As stated above, there were three more stages of rockets superimposed on the *Redstone*—the first being a ring of 11 *Sergeant* solid-fuel rockets; the second (inside that ring) three more *Sergeants*; and finally, on top, one *Sergeant* linked to the satellite itself.

All the upper stages reposed in a spin bucket which rested on the nose of the *Redstone*; 11 minutes before the launching, electric motors set the bucket spinning at 460 revolutions per minute, later increased to 760 revolutions so as to counter "wobbling" and vibration.

When the firing-button was pressed at zero hour it took 15¾ seconds before the missile rose from a huge fireball on the launching pad, disappearing into the night within a short time. According to semi-official accounts published in the American Press, the *Redstone* rocket thrust the missile to an altitude of about 50 miles, burning out after 2½ minutes. The missile then coasted upward with the other stages for four minutes to about 200 miles, where the whole vehicle inclined over to the horizontal. At that moment a member of the ground crew touched a button which triggered an important signal to *Jupiter-C*, where a battery sent an electric charge through the ignition system, touching off a chemical reaction and igniting the 11 second-stage rockets. The blast from this ignition knocked the dead *Redstone* away and sent it spinning into the ocean 400 or 500 miles off the Florida coast. Within six seconds the 11 second-stage rockets thrust the satellite forward, giving it a speed of 8,750 miles per hour. An automatic timing mechanism then ignited the next (third) rocket stage, the 11 spent rockets being thrown off. Six seconds later the three third-stage rockets burned out, whilst the single rocket comprising the final stage was ignited—the third-stage rockets falling away. When the last rocket had burned out *Explorer* had reached a height of 300 miles and a speed of 18,000 m.p.h., and had started to orbit the Earth.

The orbit of *Explorer* was described as an elongated ellipse ("severely egg-shaped") crossing the Equator at an angle of approximately 34 degrees, with a maximum height (apogee) of 1,800 miles and a minimum height (perigee) of 187 miles; these were revised figures issued on Feb. 2 on the basis of observations by American scientists, the original estimates having been an apogee of 1,700 miles and a perigee of 200 miles.

The satellite's course is east-to-west, thus enabling it to benefit from an added velocity of 1,000 feet per second because of the rotational speed of the Earth. It completes one full orbit in 118 minutes—a revised estimate on the figure of 114 minutes originally announced. Because of its smaller inclination to the Equator as compared with the Soviet *Sputniks*, the *Explorer's* orbit is confined to a band of about 2,000 miles on either side of the Equator—between 40 deg. North and 40 deg. South. At its northernmost point of orbit it passes over the southern tip of Spain, and at its southernmost point over the southern tip of Africa; thus it does not pass over Britain and the northern and central parts of Continental Europe, nor over any part of the Soviet Union.



The diagram shows the approximate track of the American *Explorer* and the Russian *Sputnik II*. The orbit of the *Explorer* is more oblique than that of the *Sputnik* satellite. (*Manchester Guardian*)

Comparative data of the American *Explorer* and the two Russian *Sputniks* are given below:

	Explorer	*Sputnik I*	*Sputnik II*
Weight	30.8 lb.	184 lb.	1,118 lb.
Shape	Cylindrical	Spherical	Conical
Dimensions	80 in. long; 6 in. diameter	22.8 inches diameter	19 ft. long; 4 ft. diameter
Orbit time	118 minutes	96.2 minutes	103.7 minutes
Speed	18,000 m.p.h.	18,000 m.p.h.	18,000 m.p.h.
Maximum altitude	1,800 miles	560 miles	1,056 miles
Minimum altitude	187 miles	145 miles	104 miles
Angle to equatorial plane	34 degrees	65 degrees	65 degrees
Date launched	Jan. 31, 1958	Oct. 4, 1957	Nov. 3, 1957
Payload	10 lb. of instruments	Instruments	Dog and instruments

The *Explorer* earth satellite was equipped with two radio transmitters, one working at 60 milliwatts on a frequency of 108 megacycles and the other transmitting at 10 milliwatts on a frequency of 108.3 megacycles. The seemingly constant E-E-E-E-toned signal emitted by the transmitters was actually a fusion of a number of complex individual signals relaying information on inner and outer temperatures, cosmic rays, and meteorites and cosmic dust. The more powerful transmitter (which was audible to amateurs) was expected to function for two to three weeks, and the smaller one (whose signals could only be picked up with special equipment) was expected to transmit for two to three months. [The *Sputnik* transmitters emitted at a whole watt; thus their batteries did not last as long as those in the *Explorer* are expected to do.]

Explorer is basically the realization of a satellite project—known as "Orbiter"—which was planned in 1954 by a group of U.S. scientists together with Dr. Wernher von Braun, a German-born scientist and an authority on rocketry.

Dr. von Braun (45), a space-travel enthusiast since his youth, graduated in physics at the University of Berlin and helped to found the German *Verein für Raumschiffahrt* (Spaceship Travel Club) in the early 'thirties. He was engaged on rocket engineering problems for the German Army since the middle 'thirties, played a leading part in establishing the research station at Peenemünde

and worked there during the Second World War, where he helped to develop the V-2 guided missile weapon. In the closing stages of the war he and other German scientists hid from the S.S. in Bavaria, where they were picked up by the U.S. Army. Dr. von Braun was taken to the United States with other German scientists, and subsequently became an American citizen. He is at present head of the Development Operations Division of the U.S. Army's Ballistic Missile Agency at Huntsville, Alabama. [Huntsville is the home of the Redstone arsenal, from which the missile gets its name.] He played a leading part in the development of the *Redstone* missile and later of the *Jupiter* as an inter-continental ballistic missile.

The other two scientists principally associated with the launching of *Explorer* were Dr. William F. Pickering (a New Zealander by birth), head of the Jet Propulsion Laboratory of the California Institute of Technology at Pasadena, which designed and built the solid-fuel rockets for the "high-speed assembly" used in the launching of *Jupiter-C*; and Dr. James Van Allen, a high-altitude research specialist and chairman of the physics department of Iowa State University, under whose direction the basic design of the satellite and the cosmic-ray recording equipment were worked out.

Other scientists prominently connected with the project were Dr. Ernst Stuhlinger, chief of the Research Projects Office of the Army Ballistic Missile Agency; Dr. Kurt H. Debus, director of the Missile Firing Laboratory in Dr. von Braun's division, and test director of the project; Dr. Hans Grueno, his deputy; and Mr. Robert Moser, chief test co-ordinator at Patrick Air Force Base (Florida). Dr. Stuhlinger, Dr. Debus and Dr. Grueno came with Dr. von Braun from Germany, while Mr. Moser is an American scientist.

Major-General John B. Medaris, head of the Army's Ballistic Missile Agency since its creation in 1956, had overall responsibility for the construction of *Jupiter-C*.

At a press conference on Feb. 2 Dr. von Braun expressed "high satisfaction" at the launching of the *Explorer*, which, however, was "a rival only in spirit" to the two Soviet satellites; he added that the rate at which the Russians were working on space and missile programmes was "frightening," and expressed his conviction that it would take the U.S.A. five years to catch up with the Russians. Dr. von Braun also said that the first stage of the *Jupiter-C* (i.e. the *Redstone* rocket) had been fuelled with an "exotic" preparation; although no details were given, the fuel was reported to be a liquid boron compound called hidyne. [The smaller rockets in the "high-speed assembly" were powered by a solid fuel, as stated above.]

Dr. Pickering disclosed that the *Jupiter-C* rocket had generated more power than anticipated and had thus thrust the satellite out into space at a somewhat greater distance from the Earth than had been expected. He expressed the view that *Explorer* would remain in orbit for "several months," although Major-General Medaris thought that the satellite might stay aloft "from two to ten years."

Unlike "Project Vanguard" (see 15890 A), which is the responsibility of the U.S. Navy, the *Explorer* project was carried out by the U.S. Army authorities. It was pointed out in the Press that preparations for launching *Jupiter-C* and the *Explorer* had been completed only 17 weeks after the Administration had given the Army permission to go ahead with the project, following the launching of Russia's *Sputnik I.*

The *Explorer* will be tracked both optically and by radio in the United States and other parts of the world.

The optical tracking in the U.S.A. will be done by "Operation Moonwatch"—a network of observation stations throughout the country. The radio tracking will be done by (i) the "Minitrack" network, a series of stations extending along the West Coast of South America and the East Coast of North America; and (ii) the "Microlock" stations, of which there are four: at Cape Canaveral (Florida), Ibadan (Nigeria), Singapore, and Earthquake Valley, near San Diego (California). The bases at Ibadan and Singapore are manned by British personnel. Other radio tracking facilities in the U.S.A. include those of the U.S. Army signal engineering laboratories at Fort Monmouth (New Jersey) and the Radio Corporation of America.

Radio signals from the *Explorer* were heard around the world on Feb. 1, being picked up at such widely scattered points as Hamburg (Western Germany), the radio astronomy observatory of Ghana University at Accra, monitoring stations at Tashkent (Soviet Central Asia), at the above-mentioned Singapore station, and in Australia.

The first optical observation was reported by a "moonwatch" team at Alamogordo (New Mexico), who saw the satellite passing over their station at about 9.45 p.m. on Feb. 1.

The successful launching of the *Explorer* was greeted with jubilation throughout the United States, whilst messages of congratulation were sent by many Western statesmen, including Mr. Macmillan (then visiting Australia). Congratulations were also sent by leading Russian scientists, including Professor A. N. Nesmeyanov, president of the Soviet Academy of Scientists, and Professor I. P. Bardin, chairman of the Soviet Committee for the International Geophysical Year.

A. UNITED KINGDOM. — Gold and Dollar Reserves. - Further Rise in Sterling-Dollar Rate.

The Treasury announced on Feb. 4 that the sterling area's gold and dollar reserves had risen during January by $131,000,000, after taking into account (*a*) the payment of $13,000,000 to the E.P.U. in respect of the U.K.'s deficiency in December, and (*b*) the payment of $3,000,000 to creditor countries in the Union under bilateral settlements. As a result, the gold and dollar reserves stood at $2,404,000,000 on Jan. 31. No U.S. defence aid was received during the month.

It was unofficially stated that the rise in the reserves could be attributed mainly to commercial transactions, as the sterling area was now entering the season when trade began to swing in its favour. In addition, a certain amount of "bear" covering was believed to have been undertaken by foreign dealers and traders who had speculated against the pound last autumn, whilst there had also been some inflow of U.S. and Continental money to take advantage of the high London interest rates, though in official quarters this influx was not regarded as significant. It was pointed out in the Press that since the Bank Rate had been raised to 7 per cent in September last the reserves had regained over one-half of the severe losses sustained during August and September 1957, if allowance was made for the receipt of $250,000,000 from the Export-Import Bank in October.

Provisional figures for the E.P.U. January settlement showed that Britain had a surplus of £10,500,000, three-quarters ($22,000,000) of which would be settled by the E.P.U. in February in gold or dollars, and one-quarter by a reduction in the United Kingdom's debt to the Union.

The pound sterling continued to maintain its firmness *vis-à-vis* the dollar and other currencies throughout January, rising from 2.81\frac{1}{16}$ at the beginning of the month to 2.81\frac{13}{32}$ on Jan. 31—a new record level. Although the news of Mr. Thorneycroft's resignation as Chancellor of the Exchequer caused a temporary relapse to slightly below $2.81 on Jan. 7, the rate recovered to 2.81\frac{3}{8}$ on Jan. 8 and continued its steady upward movement.—(Treasury Press Office - Financial Times)
(Prev. rep. 15980 D.)

B. SPAIN - UNITED STATES.—Dulles-Franco Talks.

Before returning to Washington from the NATO meeting in Paris, Mr. Dulles flew to Madrid on Dec. 20 for a three-hour talk with General Franco and the Spanish Foreign Minister, Dr. Castiella. Although no statement was issued, Mr. Dulles told press correspondents that he had reported to General Franco on the NATO meeting and had discussed U.S.-Spanish relations generally, the recent outbreak of fighting at Ifni, and Spain's economic position. He referred to the "close interlocking relations" between Spain on the one hand and the U.S.A. and NATO on the other, but said that the question of establishing missile bases in Spain had not been discussed.
(New York Times) **(Prev. rep. 15965 A; 14550 D.)**

C. INDIA. — New Governor of Madras.

Mr. Bishnuram Medhi, formerly Chief Minister of Assam, was appointed Governor of Madras on Jan. 2 in succession to Mr. A. J. John, who had died on Oct. 1, 1957.

Born in Travancore of a Christian family, Mr. Annaparambil Joseph John (64) became president of the State Congress in 1938 and served a short imprisonment when the party was declared illegal in the same year. He was Finance Minister of Travancore in 1948-49 and of the new State of Travancore-Cochin from 1949-51, Chief Minister from 1952-54, and Home Minister in 1955-56. He became Governor of Madras in December 1956.

Mr. Medhi was sworn in as Governor of Madras on Jan. 24.
(The Hindu, Madras) **(Prev. rep. 15282 A.)**

D. CEYLON. — Cultural Agreement with U.S.S.R.

A cultural agreement between Ceylon and the Soviet Union was concluded in Colombo on Jan. 15, following discussions with a Soviet delegation headed by M. Yakovlov, deputy chairman of the State Committee for Cultural Relations with Foreign Countries. It provided for the setting-up of a joint commission to work out programmes for co-operation in the fields of literature, the arts, science, education, health, broadcasting, films, sport, and tourist exchanges.
(Ceylon Government Information Department, Colombo)

A. BRITISH WEST INDIES. — Inauguration of the West Indian Federation. - Constitution of the Federation. - Trinidad Site for Capital of the West Indies.

The Federation of the West Indies came into formal existence on Jan. 3, 1958, when Lord Hailes was sworn in as Governor-General of the West Indies at Port of Spain, Trinidad. The oath of office was administered by Sir Joseph Perez, president of the West Indian Court of Appeal, the ceremony being attended by political leaders from all the ten federating islands and representatives of all the West Indian legislatures. The first Federal elections will be held on March 25 and the new Federal Legislature will be opened by Princess Margaret on April 11, when the Constitution of the West Indies (see below) will become fully effective.

The ten federating islands have a total population of about 3,000,000, of multi-racial composition—African, Carib, East Indian (especially in Trinidad) and European. Their area, population (latest estimates) and chief towns are as follows :

	Area sq. miles	Population (approx.)	Chief Town
*Antigua	108	53,000	St. John
Barbados	166	230,000	Bridgetown
†Dominica	305	63,000	Roseau
†Grenada . ..	133	87,000	St. George's
Jamaica	4,411	1,600,000	Kingston
*Montserrat	33	14,000	Plymouth
*St. Kitts-Nevis and Anguilla ..	170	55,000	Basseterre
†St. Lucia . ..	238	88,000	Castries
†St. Vincent .	150	79,000	Kingstown
Trinidad and Tobago	1,864	750,000	Port of Spain

*Leeward Islands. †Windward Islands.

Notes. (1) The islands of Barbuda (population 1,000) and Redonda (uninhabited) are administered as dependencies of Antigua.

(2) Carriacou (population 7,000) and some smaller islands are administered as part of Grenada.

(3) The Cayman Islands, with a population of about 7,000 and a total area of 100 square miles, are administered as a dependency of Jamaica; they comprise the islands of Grand Cayman, Little Cayman, and Cayman Brac. The Turks and Caicos Islands, though geographically part of the Bahamas chain, are also administered by Jamaica, from which they are 450 miles distant; they have a total area of about 166 square miles and a population of about 6,500, the principal island being Grand Turk.

(4) St. Kitts (St. Christopher), the neighbouring island of Nevis (three miles distant), and Anguilla (60 miles N.W. of St. Kitts) have been administered as a single unit since 1882. St. Kitts has a population of over 34,000, Nevis of about 15,000, and Anguilla of about 6,000.

(5) Tobago has been administered since 1888 as part of Trinidad, from which it is 20 miles distant. It has an area of 116 square miles and a population of about 35,000.

Of the ten federating islands, Antigua, Barbados, Jamaica and St. Kitts-Nevis have been British for over 300 years; Dominica, Grenada, Montserrat, and St. Vincent were ceded by France in 1783, and St. Lucia in 1814; and Trinidad was ceded by Spain in 1802. Antigua and St. Kitts were the first British West Indian islands to be colonized (1622-23); Barbados has always been in the possession of the British Crown and was first settled in 1627; whilst Jamaica was captured from the Spaniards by Oliver Cromwell in 1655.

Four British West Indian and Caribbean colonies remain outside the Federation—the Bahamas, the British Virgin Islands, British Guiana, and British Honduras.

The Constitution of the Federation.

The West Indies (Federation) Order in Council, providing for the establishment of the Federation of the West Indies, was approved in July 1957 by both Houses of the British Parliament, as required by the British Caribbean Federation Act of 1956 (see 15024 C), and was promulgated by her Majesty in Council at the beginning of August. The Constitution of the West Indies, comprising 118 Articles, was published as an annex to the Order in Council, its principal provisions being summarized below :

Preamble. This affirmed the principles of freedom of religious worship throughout the territories of the Federation; of "the greatest possible freedom of movement for persons and goods" within the Federation; and of the necessity for "an integrated trade policy for the Federation." It was stated in the latter connexion that "there should be introduced in the Federation, as far and as quickly as practicable, a Customs union, including internal free trade."

The Federation. "The Federation shall be known as The West Indies and shall consist of the Colonies of Antigua, Barbados, Dominica, Grenada, Jamaica, Montserrat, St. Christopher-Nevis and Anguilla, St. Lucia, St. Vincent, and Trinidad and Tobago," together with any dependencies of these Colonies. (Art. 1)

The Governor-General. The Governor-General of the West Indies would be appointed by H.M. the Queen and would act as her Majesty's representative in the Federation. When the office of Governor-General was vacant, or if the Governor-General was absent from the Federation or unable for any reason to perform the functions of his office, an Acting Governor-General would be appointed by her Majesty. The Governor-General would have the powers conferred on him under the Constitution. (Articles 2-5)

The Federal Capital. "The seat of the Federal Government shall be in the island of Trinidad." (Art. 6)

The Federal Legislature. "The legislative power of the Federation shall be vested in a Federal Legislature consisting of Her Majesty, a Senate, and a House of Representatives" (Art. 7)

The Senate (Articles 8-14). The Senate would consist of 19 members appointed by the Governor-General. Each Territory of the Federation would be represented by two Senators except Montserrat, which would have one. The Senate would have a term of five years and would elect its President and Vice-President at its first meeting. Neither the President nor the Vice-President of the Senate could be a member of the Council of State [see below].

A person would be qualified to be appointed a Senator if (*a*) he was a British subject; (*b*) he had lived in the Federation for at least three years since the age of 21; and (*c*) if, at the date of his appointment, he was resident in the Territory for which he was appointed.

A member of the Senate could not simultaneously be a member of the House of Representatives, and *vice versa*. Nor could any person be appointed to the Senate if he were a member of the Legislature or Executive Council of any Territory. The following categories of persons would also be ineligible for appointment to the Senate: (*a*) persons owing allegiance to a foreign Power; (*b*) persons holding any paid office in the service of the Crown; (*c*) undischarged bankrupts, (*d*) persons who, having professional qualifications, were forbidden to practise their professions on account of any act involving dishonesty, (*e*) persons of unsound mind; (*f*) persons under sentence of death, or serving prison terms of more than 12 months, in any of Her Majesty's dominions.

The House of Representatives (Articles 15-24). The House of Representatives would have 45 members, of whom 17 would be elected in Jamaica, 10 in Trinidad and Tobago, 5 in Barbados, and 2 in each of the other Territories except Montserrat, which would elect 1 member. Montserrat would also elect an "alternate" member who, however, would not take part in the proceedings of the House unless the member for Montserrat was absent or his seat was vacant.

With the exception of Montserrat, which would form a single electoral area, all the Territories would be divided into electoral areas for the purpose of returning members to the House of Representatives. To be qualified to vote in such elections, a voter must (*a*) be a British subject of 21 years or upwards; (*b*) have been a resident in the Territory concerned for a period of not less than six months.

A person could be elected to the House of Representatives if (*a*) he was a British subject of 21 years or upwards; (*b*) he had resided in the Territory concerned for not less than three years, and in any case for not less than six months immediately prior to the election. As in the case of the Senate, persons who were members of the Legislature or Executive Council of any Territory would not be eligible to sit in the House of Representatives. Certain categories of persons [similar to those in the case of the Senate—see above] would also be ineligible for membership of the House.

The House of Representatives would elect its Speaker and Deputy-Speaker at its first meeting. The Speaker could be a member of the House (provided he was not also a member of the Council of State) or could be elected from outside the House. The Deputy-Speaker would have to be a member of the House.

The House of Representatives, like the Senate, would have a term of five years.

Procedure in Federal Legislature (Articles 25-37). All proceedings in the Senate and the House of Representatives would be conducted in the English language.

A quorum of the Senate would consist of eight members, and a quorum of the House of Representatives of 17 members, provided the latter number included "four members who have been elected in four different Territories." Neither the Speaker nor the Deputy-Speaker of either Chamber would be reckoned for purposes of a quorum.

Bills could be introduced by any member in either Chamber of the Federal Legislature, with the proviso that Money Bills could not be introduced in the Senate. Except on the recommendation or with the consent of the Council of State, neither Chamber could "proceed upon any Bill . . . which, in the opinion of the person presiding in the Chamber, makes provision for imposing or increasing any tax, for imposing or increasing any charge on the revenues or other funds of the Federation, for altering any such charge otherwise than by reducing it, or for compounding or remitting any debt due to the Federation" (Art. 32)

"If a Money Bill, having been passed by the House of Representatives and sent to the Senate at least one month before the end of the session, is rejected by the Senate within one month after it is

sent to that Chamber, the Bill . . . shall . . . be presented to the Governor-General for assent notwithstanding that the Senate has not consented to the Bill." (Art. 33)

"If any Bill other than a Money Bill is passed by the House of Representatives in two successive sessions (whether or not the Federal Legislature is dissolved between those sessions) and, having been sent to the Senate in each of those sessions at least one month before the end of the session, is rejected by the Senate in each of those sessions, the Bill shall, on its rejection for the second time by the Senate . . . be presented to the Governor-General for assent notwithstanding that the Senate has not consented to the Bill," provided that at least one year had elapsed between its first and second passage in the House of Representatives in two separate sessions. (Art. 34)

"Money Bill" was defined as "a Public Bill which, in the opinion of the Speaker, contains only provisions dealing with all or any of the following matters: the imposition, repeal, remission, alteration, or regulation of taxation; the imposition, for the payment of debt or other financial purposes, of charges on public money, or the variation or repeal of any such charges; the grant of money to the Crown or to any authority or person, or the variation or revocation of any such grant; the appropriation, receipt, custody, investment, issue or audit of accounts of public money; the raising or guarantee of any loan or the repayment thereof; or subordinate matters incidental to any of the matters aforesaid."

Bills would become law when passed (with or without amendments) by both Chambers and assented to by the Governor-General. The latter may ". . . in his discretion, declare that he assents or refuses to assent thereto, or that he reserves the Bill for the signification of Her Majesty's pleasure."

Dissolution of Legislature, etc. The Governor-General could dissolve or prorogue the Federal Legislature at any time by proclamation. He must dissolve it "at the expiration of five years from the date when the House of Representatives first meets after any general election, unless it has been sooner dissolved." (Art. 38)

General elections to the House of Representatives would be held within three months after every dissolution.

The Federal Legislature would determine the privileges, immunities and powers of the two Chambers and their members. "No such privileges, immunities, and powers shall exceed those of the Commons House of Parliament of the United Kingdom or of the members thereof."

Legislative Powers within the Federation. Articles 43-54 set out in detail the subjects on which the Federal Legislature and the Territorial Legislatures would be competent to legislate. It was laid down *inter alia*:

(i) The Federal Legislature would have "power to make laws for the peace, order, and good government of the Federation with respect to any matter that is included in the Exclusive Legislative List or the Concurrent Legislative List." [These two Lists were appended as Schedules to the Constitution—see below.]

(ii) Territorial Legislatures would not have power to make laws on any matter included in the Exclusive Legislative List.

(iii) Territorial Legislatures (and also the Federal Legislature) would have power to make laws for the Territory concerned on any matter included in the Concurrent Legislative List.

(iv) The Federal Legislature could confer on any Territorial Legislature authority to make laws for that Territory on any matter included in the Exclusive Legislative List.

(v) A Territoral Legislature could confer on the Federal Legislature authority to make laws for that Territory on any matter not included in the Exclusive Legislative List or the Concurrent Legislative List, provided that the subject was within the competence of the Territorial Legislature concerned.

(vi) In the event of any inconsistency between Federal law and Territorial law, "the Federal law shall prevail over the Territorial law."

(vii) During a period of emergency, "a Federal emergency law may make provision with respect to matters not included in the Exclusive Legislative List or the Concurrent Legislative List, and a Territorial emergency law may make provision with respect to matters included in the Exclusive Legislative List." Such emergency legislation, whether Federal or Territorial, would have effect only during the period of the emergency.

(viii) No law of the Federal Legislature would be applicable to the Turks and Caicos Islands or the Cayman Islands unless explicitly stated.

(ix) Legislation by Order in Council could be enacted for the Federation in the United Kingdom on matters relating to defence, external relations, or the maintenance of the financial stability of the Federation. In the event of inconsistency between Federal or Territorial Legislation and any Order made by Her Majesty in Council, "the Order in Council shall . . . prevail over the law of the Federal Legislature or of the Legislature of the Territory, as the case may be."

(x) Special provisions would apply to Territorial laws controlling the movement of persons between the various Territories. If such laws were still in force five years after the Constitution came into effect, they would be reviewed by the Federal Legislature; unless the latter body decided within 90 days that it did not object to the law or laws concerned, the legislation would be considered to have been repealed. The only exceptions would be in the case of laws controlling the movement of persons insofar as they affected public health or public security. Laws on this matter [control of movement] enacted by Territorial Legislatures after the five-year period would be subject to approval by the Federal Legislature within 60 days after their enactment by the Territory concerned. (Arts. 49-51).

Executive Authority within the Federation (Articles 55-58). The executive authority in the Federation would be vested in Her Majesty and would be exercised by the Governor-General on her behalf.

"The executive authority of the Federation shall extend to the execution and maintenance of this Constitution, to all matters with respect to which the Federal Legislature has . . . power to make laws, and to such external relations as may . . . be entrusted to the Federation by H.M. Government in the United Kingdom. Subject to the provisions of this Constitution, the executive authority of each of the Territories shall continue in accordance with the Constitution of that Territory." (Art. 56)

The Governor-General could delegate executive authority to the Governor of any Territory on any matter relating to that Territory and falling within the executive authority of the Federation. Similarly, the Governor of a Territory could entrust the Governor-General, or any officer or authority of the Federation, with responsibility for matters affecting the Territory concerned, provided that the matter fell within the executive authority of the Territory.

The Council of State (Articles 59-71). "There shall be a Council of State which shall be the principal instrument of policy for the Federation and . . . shall advise the Governor-General in the exercise of his functions. The Council of State shall consist of a Prime Minister and ten other Ministers." (Art. 59)

The Governor-General would act on the advice of the Council of State, but would not be required to take the Council's advice (*a*) "in any case in which, in his individual judgment, the public interest requires that he should consult the Prime Minister instead of the Council"; (*b*) "in any case in which, in his individual judgment, the urgency of the matter requires him to act before the Council can be consulted, or the question for decision is too unimportant to require their advice"; (*c*) in respect of the powers conferred on him under Articles 38 and 64 of the Constitution. [Article 38 provides that the Governor-General may at any time prorogue or dissolve the Federal Legislature by proclamation -see above. Article 64 states that "every Minister shall hold office during the pleasure of the Governor-General"- see below.]

With regard to cases under (*a*), however, the Governor-General would act in accordance with the Prime Minister's advice, while in cases of urgency under (*b*) he would inform the Council of the measures that he had adopted and the reasons therefor. In matters connected with defence, external relations, or the financial stability of the Federation, the Governor-General would be required to obtain the advice of the Secretary of State for the Colonies before acting contrary to the advice of the Council of Ministers.

On the advice of the Prime Minister, the Governor-General could "assign to any Minister responsibility for dealing with any business on behalf of the Federal Government." In allocating portfolios, however, the Governor-General would not be obliged to assign to any Minister responsibility for any business relating to (*a*) defence; (*b*) the audit of the accounts of the Federation; (*c*) the making of appointments in the Public Service; and (*d*) the dismissal or disciplinary control of officers in the Public Service. Moreover, responsibility for the initiation, conduct, and discontinuance of criminal proceedings would not be assigned to a Minister but would be vested in the Attorney-General of the Federation.

At its first meeting after a general election the House of Representatives would elect the Prime Minister of the Federation from among its own members. The person chosen would be formally appointed as Prime Minister by the Governor-General. Members of the Executive Council or Legislature of any Territory would not be eligible for election as Prime Minister.

The other Ministers would be appointed by the Governor-General on the advice of the Prime Minister. At least three of the Ministers would have to be members of the Senate, and the remainder would be members of the House of Representatives. No member of the Executive Council or Legislature of any Territory could hold office as a Minister in the Federal Government. Every Minister would hold office "during the pleasure of the Governor-General." [Art. 64, referred to above.]

If the office of Prime Minister was vacant, or the Prime Minister was ill or absent from the Federation, the Governor-General could appoint one of the other Ministers (not being a member of the Senate) to perform the functions of Prime Minister. If a Minister was ill or absent from the Federation, the Governor-General could similarly (and on the advice of the Prime Minister) appoint another person to serve temporarily on the Council of State.

Three persons holding office in the Public Service of the Federation would be nominated by the Governor-General to attend any meetings of the Council of State, and to take part in discussions at such meetings. The Governor-General (or, in his absence, the Prime Minister) would preside at meetings of the Council of State.

The Federal Supreme Court (Articles 72-90). The Federation would have a Federal Supreme Court consisting of a Chief Justice and three Federal Justices, appointed by the Governor-General after consultation with the Prime Minister.

The Federal Supreme Court would have original jurisdiction (*a*) in proceedings between the Federation and a Territory, or between one Territory and another Territory; (*b*) in any proceedings "in

which a writ or order of *mandamus* or prohibition or an injunction is sought by the Federation against an officer or authority of a Territory, or by a Territory against an officer or authority of the Federation"; and (c) in any suit for a penalty under Article 113 of the Constitution. [This refers to penalties incurred by unqualified persons sitting or voting in either Chamber of the Federal Legislature—see Miscellaneous Provisions below.] In addition, the Federal Supreme Court would determine any question arising out of the interpretation of the Constitution, and would hear and determine appeals from any superior court of a Territory.

The Chief Justice of the Federation, and any two Federal Justices selected by him, would draw up rules of procedure regulating the practice and procedure of the Federal Supreme Court. The Court would deliver its judgments in open court and with "the concurrence of a majority of the judges present at the hearing of the matter."

There would be no appeal to the Privy Council from judgments of the Federal Supreme Court, unless the Federal Legislature conferred this right of appeal by law. Similarly, there would be no right of appeal to the Privy Council from the judgment of a superior court of a Territory except with the leave of the Federal Supreme Court, "which shall be granted only in such circumstances as the Federal Legislature may by law prescribe."

Finance (Articles 91-101). In each of the first five years (i.e. the calendar years 1958-62 inclusive) the Federal Government would derive its revenue mainly from a mandatory levy on the Territorial Governments, provided that the total amount levied in any one year did not exceed B.W.I. $9,120,000 (one British West Indian dollar = 4s. 2d.). Each territory would be required to contribute in the following proportions:

	Per cent.
Antigua	1.3374
Barbados	8.5562
Dominica	1.6250
Grenada	1.6969
Jamaica	43.1119
Montserrat	0.2732
St. Kitts-Nevis and Anguilla	1.7256
St Lucia	1.7400
St. Vincent	1.3086
Trinidad and Tobago	38.6252

If, in any of the first five years, the Federal Government's revenues from Customs and Excise duties on "scheduled commodities" exceeded B.W.I. $9,120,000, a corresponding refund would be made to the Territorial Governments. [The "scheduled commodities" were listed in an annex to the Constitution; they comprised motor spirit, cigarettes and tobacco, beer and other fermented beverages, rum, and distilled alcoholic beverages other than rum.] (Arts. 94-95)

As regards postal revenues, Article 97 stated: "If, by any law of the Federal Legislature, the Federal Government becomes entitled for the first time to the revenues arising in any Territory from postal services, then, during a period of five years beginning with the date when the Federal Government becomes entitled to those revenues, the Federal Government shall . . . pay in each year to the Government of that Territory, if that Government so requires, a sum equal to the average annual profits that accrued to that Government from postal services during the period of five years immediately preceding the date aforesaid."

The Federal Public Service Commission (Articles 102-105). The Governor-General would appoint a Public Service Commission for the Federation, consisting of a chairman and not less than two nor more than four other members. The Commission would be responsible for recommending appointments to all offices in the Public Service of the Federation. No person could serve on the Commission if he was a member of the Senate, the House of Representatives, or the Legislature of any Territory.

Power to make appointments to offices in the Public Service (including appointments on promotion or transfer), and to dismiss or exercise disciplinary control over officers in that Service, would be vested in the Governor-General. In exercising these powers the Governor-General would act "in his discretion but after consultation with the Commission."

Miscellaneous Provisions (Articles 106-118). The most important of these were the following:

(i) The Governor-General, on behalf of Her Majesty, would have the power of pardon (after consultation with the Minister concerned) in the case of individuals convicted of offences against Federal law. Such pardon might take the form of remission or reduction of sentences, or the substitution of a less severe sentence than that originally imposed. (Art. 112)

(ii) Any person sitting or voting in either Chamber of the Federal Legislature, "knowing or having reasonable ground for knowing that he is not entitled to do so," would be liable to a penalty not exceeding 96 B.W.I. dollars "for each day on which he so sits and votes." Any such penalty could be recoverable by civil action in the Federal Supreme Court [see above] at the suit of the Attorney-General of the Federation. (Art. 113)

(iii) The Attorney-General of the Federation, the Solicitor-General of the Federation, and any member of the Attorney-General's Department (provided he were a barrister) would have the right of audience in the Federal Supreme Court and in all other courts within the Federation. (Art. 115)

(iv) Her Majesty might by Order in Council amend or revoke any of the provisions of the Constitution, and could also (by such Order) amend the Constitution for the purpose of including other Colonies within the Federation. Specific mention was made of the possible accession of British Guiana and British Honduras to the Federation—which, it was pointed out, would require the creation of additional seats in the Senate and the House of Representatives. (Art. 117)

[It was laid down in Article 117 that no Order could be submitted to Her Majesty in Council reducing the representation of any Territory in the Federal Senate or House of Representatives, unless such reduction was approved by the Legislative Chamber of the Territory concerned.]

(v) Not later than five years after the Constitution came into force, a conference would be held for the purpose of reviewing the Constitution. It would consist of delegates from the Federation, from each of the constituent Territories, and from the United Kingdom. Among other matters, the conference would "review, in the light of progress made towards establishing a Customs union within the Federation and other relevant factors, the powers conferred on the Federal Government to make provision for the levying of taxes on income and profits." (Art 118)

Appended as schedules to the Constitution were (1) the Exclusive Legislative List, setting out those subjects on which only the Federal Legislature could make laws; and (2) the Concurrent Legislative List, on which both the Federal Legislature and the Territorial Legislatures could make laws.

Exclusive Legislative List. Subjects in this list included the borrowing of monies for Federal purposes; defence; Federal agencies and institutions for research, investigation, or special studies; exchange control; Federal libraries and museums; immigration into, and emigration or deportation from, the Federation: public relations of the Federation; the Public Service of the Federation; pensions and gratuities payable from Federal funds; and the University College of the West Indies

Concurrent Legislative List. Subjects in this list included civil aviation and ancillary services; aliens; astronomy and meteorology; audit of public accounts other than those of the Federal Government; banks (including savings banks) and banking; bankruptcy and insolvency; bills of exchange and promissory notes; borrowing of monies for the purposes of any Territorial Government; census; companies (i.e. general provision as to the incorporation, regulation, and winding-up of bodies corporate, other than bodies directly incorporated by Federal or Territorial law); conciliation and arbitration in industrial disputes; control of the movement of persons between Territories [subject, however, to Articles 49, 50 and 51 of the Constitution—see above]; copyright, patents, and trade marks; criminal law and procedure; currency, coinage, and legal tender; Customs and Excise duties [subject to Articles 94 and 95—see above]; industrial development; fishing outside territorial waters; insurance; marriage, divorce, and custody and guardianship of infants; naturalization; atomic energy; postal services [subject to Article 97—see above]; prisons; quarantine, shipping and navigation (including lighthouses, lightships, beacons and buoys); statistics; student services (i.e. financial or other assistance for students receiving university education), surveys, investigations, and research into economic and social matters (except where undertaken by a Federal agency); professional, technological, and agricultural education and training (except in connexion with the University College of the West Indies, which is on the Exclusive Legislative List); taxes on income and profits; telegraphic, telephonic and radio communications with countries outside the Federation; trade and commerce with countries outside the Federation; and weights and measures.

Trinidad Site for Federal Capital.

The Standing Federation Committee of the British West Indian Governments (which includes the Chief Ministers of Jamaica and Trinidad and the Prime Minister of Barbados) had previously decided on Feb. 11, 1957, that the capital of the Federation should be located in Trinidad, despite the earlier recommendation by Sir Francis Mudie's committee (see 15295 C) that the capital should be situated in Barbados. Eleven votes were cast for Trinidad and five for Barbados, Jamaica being eliminated on the first ballot.

The decision settled the most controversial issue in the protracted discussions on the West Indian Federation. Although Trinidad had been originally selected as the site for the Federal capital, the Chief Minister of Trinidad (then Mr. Albert Gomes) voluntarily relinquished this claim at the London conference of 1953 in the hope of reaching agreement, and Grenada was chosen instead. At the London conference of 1956, however, this decision was again altered and a fact-finding commission was appointed under the chairmanship of Sir Francis Mudie to recommend another site. The Commission's report, issued in January 1957, recommended Barbados as the most favourable site, with Jamaica second and Trinidad third in order of preference. The Commission's explanations of its decision, and its remarks about Trinidad in particular, had caused much resentment and adverse comment in that island.

After further discussions, the Standing Federation Committee recommended in May 1957 that the Federal capital should be established on a site in the north-western peninsula of Trinidad. As this site included the U.S. naval base of Chaguaramas (leased to the United States for 99 years under the "destroyers for bases" agreement of 1941), the British

Government were asked to take up with the U.S. Government the question of surrendering the leased base, which extends over some 18 square miles. In choosing this site for the Federal capital, the Standing Committee pointed out that it had access to the sea both to the north and the west, was only seven miles from Port of Spain, and had good dock and seaplane facilities.

A conference of British, U.S., and West Indian representatives was accordingly held in London from July 16-24, 1957 in connexion with the West Indian proposal.

The British Government were represented by Mr. Ormsby-Gore, Minister of State at the Foreign Office, and Mr. Profumo, Under-Secretary of State for the Colonies; the United States by Mr. John Hay Whitney, U.S. Ambassador in London, and American naval officers and officials; and the West Indies by a delegation consisting of Mr. Norman Manley (Chief Minister of Jamaica), Dr. Eric Williams (Chief Minister of Trinidad), Sir Grantley Adams (Prime Minister of Barbados), Mr. F. A. Baron (Minister of Trade, Dominica) and Mr. P. C. Bradshaw (Minister of Trade, St. Kitts-Nevis and Anguilla).

It was announced at the end of the conference (1) that the West Indian delegation had explained the reasons that had led them to choose the Chaguaramas site for the Federal capital; (2) that there was unanimous agreement on the need for a U.S. naval base in the eastern Caribbean; (3) that the West Indian delegation were unable, however, to accept the view that it was essential for strategic and economic reasons to maintain the existing base at Chaguaramas; (4) that they had therefore asked that the base should be released, and an alternative site found, so as to enable the Federal capital to be built on the Chaguaramas site; and (5) that a Joint Commission of "representative technical experts" would be set up to investigate all aspects of the West Indian request.

The membership of the Joint Commission was announced on Dec. 22, 1957, consisting of Sir Charles Arden-Clarke (formerly Governor-General of Ghana) as chairman, two U.K. representatives, three U.S. representatives, two representatives of the West Indies in general (together with an adviser), and two from Trinidad and Tobago in particular. The Joint Commission began its work in Trinidad on Jan. 13, 1958.

Miscellaneous Developments.

The principal developments in the West Indies in recent months, other than those described above, were the introduction of internal self-government in Jamaica, and legislation in the British Parliament to separate the Cayman Islands and the Turks and Caicos Islands from Jamaica so as to enable them to have their own Governments and legislatures.

Jamaican Self-Government. Jamaica became the first British West Indian colony to attain home rule on Nov. 11, 1957, when the Governor and Captain-General (Sir Hugh Foot, now Governor of Cyprus) issued a proclamation giving effect to the new constitutional reforms, including a Cabinet system of government [see 15821 B].

The new Jamaican Government was sworn in by Sir Hugh Foot on the same day. Mr. Norman Manley (who will preside over Cabinet meetings instead of the Governor) remained Chief Minister and Minister for Development, the other portfolios being redistributed as follows: Dr. Ivan Lloyd—Home Affairs (including Local Government and certain functions formerly appertaining to the island's Colonial Secretary and Attorney-General); Mr. F. A. Glasspole—Education; Dr. Glendon Logan—Housing and Social Welfare; Mr. Jonathan Grant—Labour; Sir Robert Beacroft Barker and Mr. Rudolph Burke—Ministers without portfolio. The Cabinet (officially the Council of Ministers) replaced the former Executive Council, which was abolished under the constitutional reforms.

The Cayman Islands and Turks and Caicos Islands. In January 1957, a delegation from the Cayman Islands had visited Kingston for talks with Mr. Manley, during which four main demands were put forward: (1) for maximum autonomy in the Islands' affairs; (2) for recognition of the special position of the Caymans, particularly with regard to taxation, trade, and migration; (3) for representative institutions in the Caymans when the new Jamaican Constitution was introduced; and (4) for special consideration to be given to the Caymans when the Federal Constitution was formulated.

A joint statement by Mr. Manley and the Caymans delegation (Jan. 13, 1957) said that the Governor (Sir Hugh Foot) and the Chief Minister (Mr. Manley) would bear these representations in mind when the Jamaican and Federal Constitutions were framed; that it was agreed that no Federal law should apply to the Caymans unless specifically stated in the Federal Constitution, and after prior consultation with the Caymans authorities; and that provision would be made in the Federal structure for Caymans affairs to be the direct responsibility of the Federal Prime Minister.

A Bill to separate the Caymans Islands—and also the Turks and Caicos Islands—from Jamaica was accordingly introduced in the British House of Commons on Dec. 17, 1957 by Mr. Lennox-Boyd, the U.K. Colonial Secretary. Mr. Lennox-Boyd explained that while these islands would remain dependencies of Jamaica, they would exercise wide responsibilities through their elected representatives in the management of their internal affairs. The Bill entitled the Cayman Islands and Turks and Caicos Islands Bill provided (1) that a separate Government and Legislature for each island group would be created by Order in Council; and (2) that the Caymans and the Turks and Caicos Islands would each have a legislative body of *ex-officio* members, nominated members, and members elected by universal adult suffrage, as well as executive councils which the Commissioners for those territories would normally be required to consult.

The Cayman Islands and Turks and Caicos Islands Bill was given an unopposed second reading by the House of Commons on Jan. 21, 1958. - (West Indies (Federation) Order in Council, 1957 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Governor-General, 15523 B; Federal Capital, 15295 C; West Indian Federation, Map, 14733 A.)**

A. CHINA. — Adoption of Latin Alphabet.

The use of the Latin (Roman) alphabet for the Chinese language, which had been accepted in principle in 1956 (see 14722 A), received formal approval on Dec. 11, 1957 from the State Council of China. It was decided to adopt the 26-letter alphabet as used in Western Europe and America, and to abandon the earlier plan for a 30-letter alphabet incorporating several Russian letters.

An official spokesman explained that the Latinization of Chinese would help to eradicate illiteracy by enabling the national language (i.e. the Mandarin form of Chinese as spoken in Peking and North China) to be taught in all schools, instead of the different dialects at present used in many parts of the country. Moreover, it would facilitate language reform among the national minorities in which connexion mention was made of plans for written languages for 15 minorities, including the Uighurs and the peoples of Inner Mongolia. The spokesman emphasized that it was not intended at the present stage to supplant the traditional ideographic characters, which had themselves tended down the centuries as under the Sung, Yuan, Ming, and Manchu dynasties towards ever greater simplicity and freedom from complexity.

The Prime Minister (Mr. Chou En-lai), speaking on Jan. 10, 1958, to the National Committee of the Chinese People's Political Consultative Conference, called for nation-wide support and publicity for the new alphabet "so that the Chinese language can be steadily changed to suit the needs of socialist construction." He explained that the latinized alphabet would be used at present as a "phonetic auxiliary" for the ideographic Chinese characters. Specifically, it would be used for annotating the ideographs in dictionaries and language books; for indexing; for showing the pronunciation of foreign names and technical terms; for indicating the pronunciation of standard (i.e. Mandarin) spoken Chinese; and for telegraphic transmissions. After saying that the Latin alphabet had been adopted "because it is internationally accepted," Mr. Chou declared: "The adoption of this alphabet does not make Chinese a phonetic language. Whether the Chinese ideographs . . . should be replaced by a latinized or other phonetic language is a question we are not in a hurry to decide."—(Times - New York Times)

B. EGYPT - SOVIET UNION. — Economic and Technical Co-operation Agreement.

An agreement on economic and technical co-operation between Egypt and the Soviet Union was signed in Moscow on Jan. 29, following negotiations between an Egyptian delegation led by Dr. Aziz Sidky (Minister of Industry) and a Soviet delegation headed by M. Pervukhin, chairman of the State Committee for Foreign Economic Relations.

A joint communiqué said that the two Governments would "co-operate in the realization of plans for the development of Egypt's national economy in various industrial fields, in particular in geological work, mining, oil prospecting and production, metallurgy, engineering, and other industries." The Soviet Union would supply Egypt with machinery and equipment; help to instal and operate the machinery so as to bring production up to specified levels; render technical assistance in the design and construction of industrial enterprises; and train Egyptians in prospecting and mining. A long-term loan "on easy terms" to pay for these supplies and services had been granted by the U.S.S.R. to Egypt, which would repay it partly in hard currency and partly by supplying Egyptian goods, including cotton, to the Soviet Union.

The first contract under the agreement was signed in Moscow on the same date. It provided for Soviet aid to Egypt in the construction of three textile mills, each with 15,800 spindles, and laid down that equipment for these mills should be delivered in 1958, 1959, and 1960 respectively.

A. UNITED KINGDOM. — The Life Peerages Bill. - Passage through House of Lords.

The House of Lords gave a second reading on Dec. 3-5, 1957, to the Life Peerages Bill, which, as forecast in the Speech from the Throne (see 15844 A), empowered the Queen to confer on any person, including women, a peerage for life carrying the right to sit and vote in the House of Lords.

Lord Home (Leader of the House) said that the arguments for the introduction of life peers were "strictly and severely practical." "There is a small number of Opposition peers," he continued, "who enable us to present to the world a picture of a House efficient and informed, and which maintains a high level of debate. Equally we know that that is a brave façade On a small number of noble lords opposite there is falling a strain they cannot and should not be asked to continue much longer. This House is perilously near a breakdown in its machinery. That situation can be eased if the Prime Minister is given the discretion to offer life peerages to persons who feel they cannot accept hereditary peerages today. In the selection and appointment of life peers, the emphasis will be on the appointment of persons who could help in the working of Parliament. In discovering such persons, when the Prime Minister is looking for persons who might be able to help the Opposition, he would when appropriate seek the advice of the Leader of the Opposition."

As regards the admission of women to the House of Lords, Lord Home said that the need to keep the House up-to-date was perhaps the most powerful argument for the introduction of women. He could not see any arguments in logic why, if women were in the House of Commons, they should not be in the House of Lords.

The Government had deliberately confined this Bill to life peerages (Lord Home explained) because any proposal to limit numbers, and in particular to limit hereditary peers, would raise the most acute opposition and could only be carried at the cost of bitter and sustained controversy on a constitutional issue. "On this side," he concluded, "believing as we do that the hereditary peerage has a part to play in the Upper House, we have willingly modified the hereditary principle by the introduction of life peers so as to enable the Socialist point of view to be put more effectively from the other side of the House. If Opposition peers in the years to come will show a similar spirit of compromise and be willing to include in a reformed House an element of the hereditary peers, we can arrive without much difficulty at a solution which will appeal to the common sense of the country."

Viscount Alexander of Hillsborough (Leader of the Opposition peers) described the Bill as "tinkering" with House of Lords reform, as it made no attempt to deal with the need for the abolition of the hereditary principle; nor did it give relief to the heirs of peers who did not desire to sit in the House of Lords. Its real purpose, he suggested, was to enhance the prestige of the House while retaining the hereditary principle. The House should be given more information about the Government's intentions, and should be told what the maximum number of life peers would be. If qualifications were to be the basis for their appointment, there was not much inducement in merely offering a daily expenses account, and the Government must rapidly find an alternative method of adequate remuneration.

The **Marquess of Salisbury** said that he was not against the Government's proposals, but regarded them as "sadly inadequate." Firstly, he disagreed with the provision whereby women would be able to become members of the House with life peerages, whereas women who had an hereditary right to a seat could not. Secondly, whatever its other merits, the Government's plan had the "fatal defect" of not including any financial provisions to enable life peers to take up active membership. He presumed that they, like hereditary peers, would receive three guineas a day for each day on which they attended the House. As the House sat only 100 days a year, that was a maximum of £315 per annum, which would not attract the lowest-paid labourer. This meant that it would be necessary for anyone who accepted a life peerage to have independent means, which went a long way to destroy the main object of the Government's Bill.

It would be impossible to consider more substantial remuneration for life peers, Lord Salisbury maintained, while the House contained numbers of hereditary peers who seldom or never attended. The essential pre-requisite of any viable scheme for life peers must be to limit the number of hereditary peers to those who really meant to attend and could justify the payment of larger remuneration to them. He concluded: "I believe the Government—and it applies also to my party in this House—by failing to grasp the nettle while there is yet time, are putting in jeopardy not only the hereditary system but, much more important, the whole basis of a bicameral system, which is the only protection for a country like ours with an unwritten Constitution."

Lord Silkin (an Opposition peer) said that the Bill was unacceptable as a palliative because it maintained the hereditary principle; moreover, it did nothing about the permanent Conservative majority in the House, and made no attempt to deal with the hardship of heirs of peers who got into or wanted to get into the Commons. He was sceptical whether they would "get anyone worth while" as a life peer, and hoped that no-one over the age of 55 would be appointed, as the people they wanted were those young enough to be able to help with the work of the House.

The **Earl of Airlie,** announcing his intention to move amendments in the Committee stage, suggested that it would be "wiser to wait for the inclusion of ladies" until it was seen how the reform worked, as "once they are in, they are in for keeps." **Viscount Samuel** (the Liberal peer), while expressing support for the creation of life peers and the admission of women, said that what troubled him most was how the life peers were to be selected. It would be a disaster if they were chosen simply for party reasons, and he therefore proposed that, to prevent possible abuses, the selection should be referred to an all-party standing committee of the Privy Council.

Viscount Hailsham (Lord President of the Council) said that the Bill was designed to deal with the concrete, practical difficulty that there were too few people to carry out the daily business of the House of Lords. The obvious choice was to widen the field of recruiting, and it would be "little short of idiotic" to exclude rather more than half the population by reason of their sex. On the question of payment of members' expenses, he said that it was not reasonable to expect an alteration in the amount or basis of the indemnification so soon after the announcement. Lord Hailsham also pointed out that the Government had received a large number of complaints from the country because the principle had been adopted at all.

Stressing that no other country in the free world had a Constitution which conferred so much power on the Legislature, Lord Hailsham said that between general elections Parliament was virtually an elected dictatorship, subject to the rights of minorities and public discussion. There was only one check to that—the "old, rickety, anomalous, and illogical" House of Lords. If a Government were to destroy that House and put nothing in its place, or nothing but a creature of its own, he felt certain that the country would detest an elected dictatorship to such an extent that this suppression would become intolerable; in such case the House of Commons itself would be compelled by pressure of business to create an independent body to despatch some of the least important things it had to do What would then emerge would not be the present House of Lords, "deferential, timid, cautious, and extremely responsible," but a Senate with separate authority, which would possibly be calamitous to the spirit of the Constitution.

In 1948 (Lord Hailsham continued) he had said that there was no theoretical defence of the hereditary principle, and he saw no reason to revise his opinion. If the Opposition had any care for continuity and tradition, however, they would have to retain in that House a large proportion of those who sat there by hereditary right. If they wanted a guarantee that the rights of the House would not be used irresponsibly or contrary to the public will, they had that guarantee in the fact that the great majority of peers sat in the House by hereditary right, with no desire to exercise their powers except under compelling reasons of conscience and the insistent demand of public opinion.

Earl Attlee said that in drawing a "terrible picture" of the dictatorship that would occur if there was only a single Chamber, Lord Hailsham had forgotten the most important thing—the effect of public opinion. Extravagant changes did not occur because the House of Commons was amenable to, and in touch with, public opinion. He agreed that the Bill had two merits—the invasion of the hereditary principle, and the assertion of sex equality—but thought that functions and powers were more important matters than the question of composition He stood for "a second Chamber that has no power of over-ruling or even delaying, except for the purpose of putting forward amendments to the properly elected Chamber."

The second Chamber, Lord Attlee asserted, had always been a conservative force—"always for delay, never for advancement." In the House of Lords there was a permanent Conservative majority, and he had yet to learn of "any major Conservative folly" being turned down by them. There had been a big, highly respected feeling in the House against the institution of independent television, yet this had been carried through, against the weight of argument, by a docile Government majority. If the House was to be reformed, it had to be on an entirely different basis. It was indefensible to have a hereditary House, and it was only by great exercise of wisdom that it had not broken down in the last ten years.

Lord Pakenham, winding up for the Opposition, expressed regret at the "niggardly" fashion in which the Government had settled the question of remuneration. The Bill was small enough, but it would fail almost totally if this was to be the real position. He did not think the existence of life peers would make much difference, but so far as it did, it would be to the good.

Viscount Kilmuir (Lord Chancellor) gave an assurance that the Prime Minister, when choosing life peers, would consult the Leader of the Opposition and leaders in other spheres of life. On the question of remuneration, he said that although Lord Hailsham had pointed out that they could not have changes in this matter within a short period of time, this did not mean that the Government was shutting the door on the problem. Another aspect to which attention had been drawn was the difficulty of attending the House while carrying on an occupation. It was not impossible to do both, but it would be easier if the hours of Parliament could be adjusted so that they interfered less with earning times.

The second Chamber, the Lord Chancellor declared, must not be a rival to the Commons, and therefore could not be elected. It must have members of real and wide experience in every field, including that of legislation. It must preserve in its members a true independence of outlook, and be less tied to the party Whip. These qualities existed in the present House, and they had to build on those foundations. He was optimistic about the possibility that, after discussions, they could go forward to build a more effective second Chamber.

The Bill was given an unopposed second reading on Dec. 5. The following amendments were rejected or withdrawn in committee on Dec. 17-18, 1957 :

(1) That life peerages should be conferred only on men. Moved by the **Earl of Airlie.** Rejected by 134 votes to 30.

(2) That an hereditary peerage, subject to the consent of the next heir or his guardian, might be converted into a life peerage, and that a life peer might renounce his peerage at any time. Moved by **Lord Silkin.** Rejected by 75 votes to 25.

(3) That a life peer might renounce his writ of summons to the House of Lords and become eligible to vote and stand in parliamentary elections. Moved by **Viscount Alexander of Hillsborough.** Rejected by 105 votes to 22.

The Bill was given an unopposed third reading in the House of Lords on January 30, 1958.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15694 A.)**

A. AFRO-ASIAN STATES. — Non-Governmental "Afro-Asian Solidarity Conference" in Cairo.

An Afro-Asian "solidarity conference" at non-governmental level was held in Cairo from Dec. 26, 1957, to Jan. 1, 1958. It was attended by some 500 delegates from a large number of Asian and African countries and colonial territories, many of whom were Communists or members of Communist-front organizations. Invitations were sent to all countries represented at the Bandung conference of 1955, as well as to Ghana, Morocco, Uganda, Somaliland, and Nigeria. A number of nations represented at Bandung, however, refused to send delegates to the Cairo conference because of its pro-Communist character, including Liberia, Pakistan, Siam, the Philippines, South Vietnam, Morocco, Malaya, Cambodia and Laos.

The Cairo meeting was organized by the "Asian Solidarity Committee," a Communist-front body launched a short time before the Bandung conference under the auspices of the Soviet-sponsored "World Peace Council." Local "solidarity committees" were subsequently set up in 14 Asian countries, and at the end of 1956 the Asian Solidarity Committee decided to extend the movement to Africa and to convene an Afro-Asian "solidarity conference" in 1957, if possible in Cairo. In October 1957 a preparatory committee - on which Egypt, Syria, Communist China and the U.S.S.R. were represented— met in Cairo to fix the date and draft the agenda for the conference. It was stated that the conference would represent the "peoples" and not the Governments of Afro-Asian countries.

The Soviet Union was represented at the conference by a 27-man delegation headed by M. Rashidov, president of the Soviet Republic of Uzbekistan and a vice-president of the Supreme Soviet of the U.S.S.R. China sent a 20-man delegation headed by Mr. Kuo Mo-jo, president of the Academy of Science, while smaller delegations were present from North Korea, North Vietnam and Mongolia. Among the non-Communist countries, several were represented by Ministers (e.g. the Sudan) and others by political exiles (e.g. Jordan). The Indian delegation was headed by Mrs. Ramashwari Nehru (a distant relative of the Prime Minister), who presided over the Asian Solidarity Committee which met in Delhi shortly before the Bandung conference. A non-Communist delegation from Japan was headed by Mr. Tokutaro Kitamura, a Liberal Democratic member of the Japanese Parliament.

Large numbers of speeches were made by various delegates attacking "imperialism" and "colonialism," denouncing the U.S. "Eisenhower doctrine" in the Middle East and French policy in Algeria, and calling for independence for British, French and other colonial territories in Asia and Africa. M. Arzumanyan (a leading Soviet economist) declared that the U.S.S.R. was ready to provide economic and technical assistance to any Afro-Asian country as "brother to brother," either in the form of "money, loans or aid"; in the course of his speech he commended Egypt's action in nationalizing the Suez Canal and Indonesia's action in nationalizing Dutch banks and economic enterprises, and, by implication, urged other Afro-Asian Governments to nationalize foreign undertakings in their countries.

The conference ended with the adoption of a number of resolutions as summarized below :

"Imperialism" and "Colonialism." After condemning "imperialism in all its forms and manifestations," this resolution (1) expressed "full support for the rights of peoples to self-determination, sovereignty, and complete independence" under governments of their own choosing ; (2) called on the U.N. to end the trusteeship system and to "recognize the independence of countries now under trusteeship"; (3) called for independence for Kenya, the Cmaeroons, Uganda, Madagascar, and Somaliland, and for the "ending of aggression in Oman"; (4) demanded "the return of West Irian to Indonesia, of Goa to India, and of Okinawa to Japan," as well as self-determination for Cyprus ; (5) called for the reunification of Korea and Vietnam ; (6) expressed support for "the struggle of the Arab peoples for unity, freedom and independence"; and (7) denounced the Baghdad Pact and the "Eisenhower doctrine" as "violating the independence of the Arab countries and encroaching on their sovereignty."

Disarmament. After denouncing the "arms race," "military blocs," and the "decision of NATO to supply its member-countries with nuclear and rocket weapons," the resolution (1) called for an unconditional ban on nuclear tests, the prohibition of the manufacture of nuclear and thermo-nuclear weapons, and reductions in the armaments and armed forces of the great Powers ; (2) declared that "Asia and Africa should be a peace zone in which no nuclear and rocket weapons should exist."

In addition to this resolution, the conference issued an appeal to the U.S., Soviet and British Governments to ban nuclear weapons tests "immediately and unconditionally" as a first step towards the "complete prohibition of the manufacture, stockpiling and use of those weapons of mass destruction." It also appealed to the scientists of the world to work for nuclear disarmament, and called on the Afro-Asian peoples "to take joint action to prevent the United States from holding nuclear tests at Eniwetok atoll on March 1, 1958."

Economic, Technical and Cultural Co-operation. This resolution called for close economic and technical co-operation between all Afro-Asian countries, for maximum economic development, and for the promotion of trade among all nations "regardless of their social and economic systems." It condemned "foreign capital investments and foreign loans which are accompanied by political conditions." Stress was laid on the need to develop the fullest cultural relations between the Afro-Asian peoples.

Racial Discrimination. A resolution on this subject denounced South Africa's *apartheid* policy and urged the Union Government to rescind it.

Algeria. The resolution condemned "France's colonial war and the atrocities of the French imperialists against the Algerian people," and urged "recognition of the independence of the Algerian people without delay."

Palestine. A resolution was adopted describing Israel as "a base of imperialism," condemning that country's "aggressive policy," and calling for the repatriation of Palestine Arab refugees.

United Nations. The conference called for the admission of the Chinese People's Republic and Mongolia to U.N. membership.

General Declaration. A 10-point declaration was adopted recapitulating the principles adopted at the Bandung conference, and declaring that those principles "should remain the basis of international relations."

It was decided at the end of the conference to set up a permanent organization in Cairo, known as the Afro-Asian People's Solidarity Council, which would meet at least once a year and have its permanent headquarters and secretariat in the Egyptian capital. This body would have an Egyptian secretary-general and 10 secretaries chosen from China, the Cameroons, Ghana, India, Indonesia, Iraq, Japan, the Sudan, Syria, and the Soviet Union. All Afro-Asian peoples would be represented on the "Solidarity Council," which would have the following aims : implementation of the resolutions of the Cairo conference, promotion and strengthening of Afro-Asian solidarity, and acting as a permanent liaison between the various "national solidarity committees," which would be set up in every Afro-Asian country.

M. Yusuf Sibai, an Egyptian, was elected president of the "Solidarity Council" on Jan. 3 for a two-year term. Four vice-presidents were also elected, representing Algeria, India, the Sudan and the Soviet Union. (Times - Manchester Guardian - Le Monde, Paris - New York Times - Soviet Embassy Press Department, London)

B. JAPAN. — Mass Production of Artificial Food.

It was announced in Tokio early in the New Year that mass production had begun of a new artificial food known as "chlorela." Made from algae that grow in ponds, it will be artificially cultivated in four specially-constructed pools built at the Japan Chlorela Research Institute in Tokio. Dr. Yutaka Tamiya, a chlorela expert on the staff of Tokio University, has been invited by a food research institute in Chicago to popularize this method of artificial cultivation.

Chlorela was described as rich in nutritional value, cheap, and capable of being produced in two forms (powdered and liquid) and of being spread on bread or rice. A spokesman of the Research Institute stated that 25 grammes of chlorela powder was equal in nutritional content to "1½ bottles of milk, 1.2 eggs and 25 grammes of roast beef."

(Japanese Embassy Press Office, London)

C. CANADA. — Mr. Lester Pearson succeeds Mr. St. Laurent as Leader of Liberal Party.

Mr. Lester Pearson (60), the former Secretary of State for External Affairs and recipient of the Nobel Peace Prize for 1957, was elected leader of the Canadian Liberal Party on Jan. 16 in succession to Mr. Louis St. Laurent (76), at the end of a three-day party convention in Ottawa. Mr. Pearson received 1,074 votes against 305 for Mr. Paul Martin, the former Minister of Health and Welfare. One vote was cast for the Rev. H. Lloyd Henderson, a Presbyterian clergyman and Mayor of Portage la Prairie, Manitoba.—(Montreal Star)

(Prev. rep. Mr. Lester Pearson, 15858 A.)

A. UNITED STATES. — State of the Union Message.

President Eisenhower's sixth State of the Union message was delivered to Congress on Jan. 9. In its introductory section, it dealt with what the President described as the two primary tasks facing the American people—" to ensure our safety through strength " and " to do the constructive work of building a genuine peace." President Eisenhower then went on to lay down eight lines of action, " designed to focus our resources upon the two tasks of security and peace," which were " not only desirable but imperative." These were (1) a comprehensive defence reorganization, laying particular stress on the need to eliminate inter-Service rivalries ; (2) acceleration of the defence effort " in particular areas affected by the fast pace of scientific and technological advance " ; (3) intensification of the mutual assistance programmes, both military and economic ; (4) expansion of mutual trade, in which connexion the President called for a five-year extension of the Trade Agreements Act ; (5) legislation to permit the sharing of scientific secrets with America's allies ; (6) a four-year plan for education and research, to cost $1,000,000,000 ; (7) curbs on non-essential spending ; and (8) a call to all peoples to work for peace and disarmament, directed particularly to the Soviet people. In the latter connexion President Eisenhower urged the Soviet Government to co-operate with the United States in world-wide health programmes designed to eradicate such scourges as malaria and cancer, and also in " driving hunger and disease from the earth." As regards disarmament, he said that " we must never give up the search for a basis of agreement," and declared that " we as a nation will always go the extra mile with anyone on earth if it will bring us nearer a genuine peace."

The text of the President's State of the Union message is given below under cross-headings :

The " Two Tasks."

" There are two tasks confronting us that so far outweigh all others that I shall devote this year's message entirely to them.

" The first is to ensure our safety through strength. I have repeatedly voiced this conviction : we now have a broadly based and efficient defensive strength, including a great deterrent power, which is for the present our best guarantee against war ; but unless we act wisely and promptly, we could lose that capacity to deter attack or defend ourselves. My profoundest conviction is that the American people will say as one man : ' No matter what the exertions or sacrifices, we shall maintain that necessary strength.' But we could make no more tragic mistake than merely to concentrate on military strength. For if we did only this, the future would hold nothing for the world but an Age of Terror.

" And so our second task is to do the constructive work of building a genuine peace. We must never become so preoccupied with our desire for military strength that we neglect those areas of economic development, trade, diplomacy, education, ideas, and principles where the foundation of real peace must be laid.

" Safety through Strength."

" The threat to our safety, and to the hope of a peaceful world, is simply stated. It is Communist imperialism. This threat is not something imagined by critics of the Soviets. Soviet spokesmen, from the beginning, have publicly and frequently declared their aim to expand their power, one way or another, throughout the world.

" This threat has become increasingly serious as this expansionist aim has been reinforced by an advancing industrial, military, and scientific establishment. But what makes the Soviet threat unique in history is its all-inclusiveness. Every human activity is pressed into service as a weapon of expansion. Trade, economic development, military power, arts, science, education, the whole world of ideas—all are harnessed to this same chariot of expansion.

" The Soviets are, in short, waging total cold war. The only answer to a regime that wages total cold war is to wage total peace. This means bringing to bear every asset of our personal and national lives upon the task of building the conditions in which security and peace can grow.

" Among our assets, let us first briefly glance at our military power. Military power serves the cause of security by making prohibitive the cost of any aggressive attack. It serves the cause of peace by holding up a shield behind which the patient constructive work of peace can go on. But it can serve neither cause if we make either of two mistakes. The one would be to over-estimate our strength, and thus neglect crucially important actions in the period just ahead. The other would be to under-estimate our strength. Thereby we might be tempted to become irresolute in our foreign relations, to dishearten our friends, and to lose our national poise and perspective in approaching the complex problems ahead.

" Any orderly balance-sheet of military strength must be in two parts. The first is the position of today. The second is the position in the period ahead.

" As of today : Our defensive shield comprehends a vast complex of ground, sea, and air units, superbly equipped and strategically deployed around the world. The most powerful deterrent to war in the world today lies in the retaliatory power of our Strategic Air Command and the aircraft of our Navy. They present to any potential attacker who would unleash war upon the world the prospect of virtual annihilation of his own country.

" Even if we assume a surprise attack on our bases, with a marked reduction in our striking power, our bombers would immediately be on their way in sufficient strength to accomplish this mission of retaliation Every informed Government knows this. It is no secret.

" Since the Korean armistice, the American people have spent $225,000,000,000 in maintaining and strengthening this overall defensive shield. This is the position as of today.

" Now as to the period ahead : Every part of our military establishment must and will be equipped to do its defensive job with the most modern methods and weapons. But it is particularly important that we make a candid estimate of the effect of long-range ballistic missiles on the present deterrent power I have described. At this moment, the consensus of opinion is that we are probably somewhat behind the Soviets in some areas of long-range ballistic missile development. But it is my conviction, based on close study of all relevant intelligence, with the best information that scientists can bring to me, that if we make the necessary effort, we will have the missiles, in the needed quantity and in time, to sustain and strengthen the deterrent power of our increasingly efficient bombers.

" One encouraging fact evidencing this ability is the rate of progress we have achieved since we began to concentrate on these missiles. The intermediate-range ballistic missiles, *Thor* and *Jupiter*, have already been ordered into production. The parallel progress in the inter-continental ballistic missile effort will be advanced by new plans for acceleration. The development of the submarine-based *Polaris* missile system has progressed so well that its future procurement schedules are being moved forward markedly.

" When it is remembered that our country has concentrated on the development of ballistic missiles for only about a third as long as the Soviet, these achievements show a rate of progress that speaks for itself. Only a brief time back we were spending at the rate of only about $1,000,000 a year on long-range ballistic missiles. In 1957 we spent more than $1,000,000,000 on the *Atlas*, *Titan*, *Thor*, *Jupiter* and *Polaris* programmes alone. This is a rate of increase of 1,000 times. But I repeat, gratifying though this rate of progress is, we must still do more.

" Our real problem, then, is not our strength today ; it is rather the vital necessity of action today to ensure our strength tomorrow.

" What I have just said applies to our strength as a single country. We are not alone. I have returned from the recent NATO meeting with renewed conviction that, because we are a part of a world-wide community of free and peaceful nations, our own security is immeasurably increased.

" By contrast, the Soviet Union has surrounded itself with captive and sullen nations. Like a crack in the crust of an uneasily sleeping volcano, the Hungarian uprising revealed the depth and intensity of the patriotic longing for liberty that still burns within these countries.

" The world thinks of us as a country which is strong, but which will never start a war. The world also thinks of us as a land which has never enslaved anyone and which is animated by humane ideals. This friendship, based on common ideals, is one of our greatest sources of strength. It cements into a cohesive security arrangement the aggregate of the spiritual, military, and economic strength of all those nations which, with us, are allied by treaties and agreements.

The " Economic Offensive."

" Up to this point I have talked almost solely about our military strength to deter a possible future war. I now want to talk about the strength we need to win a different kind of war—one that has already been launched against us. It is the intensive economic offensive that has been mounted by the Communist imperialists against free nations.

" The Communist imperialist regimes have for some time been largely frustrated in their attempts at expansion based directly on force. As a result, they have begun to concentrate heavily on economic penetration, particularly of newly developing countries, as a preliminary to political domination. This non-military drive, if under-estimated, could defeat the free world regardless of our military strength. The danger is the greater precisely because many of us fail or refuse to recognize it. Thus, some people may be tempted to finance our extra military effort by cutting economic assistance. But at the very time when the economic threat is assuming menacing proportions, to fail to strengthen our own effort would be nothing less than reckless folly.

" Admittedly, most of us did not anticipate the intensity of the psychological impact upon the world of the launching of the first earth satellite. Let us not make the same kind of mistake in another field, by failing to anticipate the much more serious impact of the Soviet economic offensive.

" As with our military potential, our economic assets are more than equal to the task. Our independent farmers produce an abundance of food and fibre. Our free workers are versatile, intelligent, and hard-working. Our businessmen are imaginative and resourceful. The productivity and adaptability of the American economy is the solid foundation-stone of our whole security structure.

" We have just concluded another prosperous year. Our output was once more the greatest in the nation's history. In the latter part of the year some decline in employment and output occurred, following the exceptionally rapid expansion of recent years. In a free economy, reflecting as it does the independent judgments of

millions of people, growth typically moves forward unevenly. But the basic forces of growth remain unimpaired. There are solid grounds for confidence that economic growth will be resumed without an extended interruption. Moreover, the Federal Government, constantly alert to signs of weakening in any part of our economy, always stands ready, with its full power, to take any appropriate action to promote renewed business expansion.

" If our history teaches us anything, it is this lesson : So far as the economic potential of our nation is concerned, the believers in the future of America have always been realists. I count myself as one of this company.

" Our long-range problem, then, is not the stamina of our enormous engine of production. Our problem is to make sure that we use these vast economic forces confidently and creatively, not only in direct military defence efforts, but likewise in our foreign policy, through such activities as mutual economic aid and foreign trade.

" In much the same way, we have tremendous potential resources on other non-military fronts to help in countering the Soviet threat . education, science, research, and, not least, the ideas and principles by which we live. In all these cases the task ahead is to bring these resources more sharply to bear upon the new tasks of security and peace in a swiftly changing world.

" There are many items in the Administration's programme, of a kind frequently included in State of the Union Messages. They will be the subjects of later messages to Congress. Today I speak only about matters bearing directly upon our security and peace.

" So now I place before you an outline of action designed to focus our resources upon the two tasks of security and peace. In this special category I list eight items requiring prompt action. They are not merely desirable. I believe they are imperative.

Defence Reorganization.

" The first need is to assure ourselves that military organization facilitates rather than hinders the functioning of the military establishment in maintaining the security of the nation. Since World War II, the purpose of achieving maximum organizational efficiency in a modern defence establishment has several times occasioned action by Congress and by the Executive.

" The advent of revolutionary new devices, bringing with them the problem of overall continental defence, creates new difficulties, reminiscent of those attending the advent of the airplane more than half a century ago. Some of the important new weapons which technology has produced do not fit into any existing Service pattern. They cut across all Services, involve all Services, and transcend all Services at every stage from development to operation. In some instances they defy classification according to branch of service.

" Unfortunately, the uncertainties resulting from such a situation, and the jurisdictional disputes attending upon it, tend to bewilder and confuse the public and create the impression that Service differences are damaging the national interest. Let us by all means proudly remember that the members of the armed forces give their basic and first allegiance solely to the United States. Of that fact all of us are certain. But pride of Service and mistaken zeal in promoting particular doctrine has more than once occasioned the kind of difficulty of which I have just spoken.

" I am not attempting today to pass judgment on the charge of harmful Service rivalries. But one thing is sure. Whatever they are, America wants them stopped. Recently I have had under special study . . . the never-ending problem of efficient organization, complicated as it is by these new weapons. Soon my conclusions will be finalized. I shall promptly take such Executive action as is necessary and . . . present appropriate recommendations to Congress.

" Meanwhile, without anticipating the detailed form that a reorganization should take, I can state its main lines in terms of objectives. A major purpose of military organization is to achieve real unity in the defence establishment in all the principal features of military activity. Of all these, one of the most important to our nation's security is strategic planning and direction. This work must be done under unified direction.

" The defence establishment must plan for a better integration of its defensive resources, particularly with respect to the new weapons now building and under development. These obviously require full co-ordination in their development, production, and use. Good organization can help assure such co-ordination.

"In recognition of the need for single control in some of our most advanced development projects, the Secretary of Defence has already decided to concentrate into one organization all anti-missile and satellite technology undertaken within the Department of Defence.

" Another requirement of military organization is a clear subordination of the military services to duly constituted civilian authority. This control must be real ; not merely on the surface.

" Next, there must be assurance that an excessive number of compartments in organization will not create costly and confusing compartments in our scientific and industrial effort.

" Finally, to end inter-Service disputes requires clear organization and decisive central direction, supported by the unstinted co-operation of every individual in the defence establishment, civilian and military.

Acceleration of Defence Effort.

" The second major action item is the acceleration of the defence effort in particular areas affected by the fast pace of scientific and technological advance. Some of the points at which improved and increasing effort are most essential are these :

" We must have sure warning in case of any attack. The improvements of warning equipment are becoming increasingly important as we approach the period when long-range missiles will come into use.

" We must protect and disperse our striking forces and increase their readiness for instant action. This means more base facilities and more stand-by crews.

" We must maintain deterrent retaliatory power. This means, among other things, stepped-up long-range missile programmes ; accelerated programmes for other effective missile systems ; and, for some years, more advanced aircraft.

" We must maintain freedom of the seas. This means nuclear submarines and cruisers, improved anti submarine weapons, missile ships, and the like.

" We must maintain all necessary types of mobile forces to deal with local conflicts should there be need. This means further improvements in equipment, mobility, tactics, and fire-power.

" Through increases in pay and incentive, we must maintain in the armed forces the skilled manpower modern military forces require.

" We must be forward-looking in our research and development to anticipate and achieve the unimagined weapons of the future.

" With these and other improvements, we intend to assure that our vigilance, power, and technical excellence keep abreast of any realistic threat we face.

Mutual Assistance Programmes.

" Third : We must continue to strengthen our mutual security efforts. Most people now realize that our programmes of military aid and defence support are an integral part of our own defence effort. If the foundations of the free world structure were progressively allowed to crumble under the pressure of Communist imperialism, the entire house of freedom would be in danger of collapse.

" As for the mutual economic assistance programme, the benefit to us is threefold. First, the countries receiving this aid become bulwarks against Communist encroachment as their military defences and economies are strengthened. Nations that are conscious of a steady improvement in their industry, education, health, and standard of living are not apt to fall prey to the blandishments of Communist imperialists.

" Second, these countries are helped to reach the point where mutually profitable trade can expand between them and us.

" Third, the mutual confidence creates an atmosphere in which real understanding and peace can flourish.

" In proposals for future economic aid, I am stressing a greater use of repayable loans through the development loan fund, through funds generated by sale of surplus farm products, and through the Export-Import Bank. While some increase in Government funds will probably be required, it remains our objective to encourage shifting to the use of private capital sources as rapidly as possible.

" One great obstacle to the economic aid programme in the past has been, not a rational argument against it on the merits, but a catchword : ' Give-away programme.' The fact is that no investment we make in our own security can pay us greater dividends than economic aid to friendly nations. This is no ' give-away.' Let's stick to facts. We cannot afford to have one of our most essential security programmes shot down with a slogan.

Mutual Trade.

" Fourth : Both in our national interest and in the interests of world peace, we must have a five-year extension of the Trade Agreements Act—with broadened authority to negotiate. World trade supports a significant segment of American industry and agriculture. It provides employment for 4,500,000 American workers. It helps supply our ever-increasing demand for raw materials. It provides the opportunity for American free enterprise to develop on a world-wide scale. It strengthens our friends and increases their desire to be friends. World trade helps to lay the groundwork for peace by making all free nations of the world stronger and more self-reliant.

" America is today the world's greatest trading nation. If we use this great asset wisely to meet the expanding demands of the world, we shall not only provide future opportunities for our own business, agriculture, and labour, but in the process strengthen our security posture and the prospects for a prosperous, harmonious world.

" As President McKinley said, as long ago as 1901 : ' Isolation is no longer possible or desirable . . . The period of exclusiveness is past.'

Scientific Co-operation with Allies.

" Fifth : It is highly important that Congress enact the necessary legislation to enable us to exchange appropriate scientific and technical information with friendly countries. It is wasteful in the extreme for friendly Allies to consume talent and money in solving problems that their friends have already solved - all because of artificial barriers to sharing. We cannot afford to cut ourselves off from the brilliant talents and minds of scientists in friendly countries. The task ahead will be hard enough without handcuffs of our own making.

" The groundwork for this kind of co-operation has already been laid in discussions among NATO countries. Promptness in following through with legislation will be the best possible evidence of American unity of purpose in co-operating with our friends.

Education and Research.

"Sixth: In the area of education and research, I recommend a balanced programme to improve our resources, involving an investment of about $1,000,000,000 over a four-year period. This involves new activities by the Department of Health, Education and Welfare designed to encourage improved teaching quality and student opportunities in the interests of national security. It also provides a five-fold increase in the sums available to the National Science Foundation for stimulating and improving science education . . .

"In the field of research I am asking for substantial increases in basic research funds, including a doubling of the funds available to the National Science Foundation for this purpose.

"But Federal action can do only part of the job. In both education and research, redoubled exertions will be necessary on the part of all Americans if we are to rise to the demands of our times. This means hard work on the part of State and local governments, private industries, schools and colleges, private organizations and foundations, teachers, parents, and—perhaps most important of all—the student himself.

"With this kind of all-inclusive campaign, we can create the intellectual capital we need for the years ahead—and do all this, not as regimented pawns, but as free men and women.

Priorities in Expenditure.

"Seventh · To provide for this extra effort for security, we must apply stern tests of priority to other expenditures, both military and civilian. This extra effort involves, most immediately, the need for a supplemental defence appropriation of $1,300,000,000 for the fiscal year 1958 [i.e. 1957-58]. In the 1959 Budget [1958-59] increased expenditures for missiles, nuclear ships, atomic energy, research and development, science and education, a special contingency fund to deal with possible new technological discoveries, and increases in pay and incentives to obtain competent manpower, add up to a total increase over the comparable figures in the 1957 Budget of about $4,000,000,000 . . .

Message to Soviet People.

"My last call for action is not primarily addressed to the Congress and people of the United States. Rather, it is a message from the people of the United States to all other peoples, especially those of the Soviet Union.

"This is the spirit of what we Americans would like to say: 'In the last analysis, there is only one solution to the grim problems that lie ahead. The world must stop the present plunge toward more and more destructive weapons of war, and turn the corner that will start our steps firmly on the path toward lasting peace. Our greatest hope for success lies in a universal fact: the people of the world have always wanted peace and want peace now. The problem, then, is to find a way of translating this universal desire into action. This will require more than words of peace. It requires works of peace.'

"Now may I try to give you some concrete examples of the kind of works of peace that might make a beginning in the new direction. For a start, our peoples should learn to know each other better. Recent negotiations in Washington have provided a basis in principle for greater freedom of communication and exchange of people. I urge the Soviet Government to co-operate in turning principle into practice by prompt and tangible actions that will break down the unnatural barriers that have blocked the flow of thought and understanding between our peoples.

"Another kind of work of peace is co-operation on projects of human welfare. For example, we now have it within our power to eradicate from the face of the earth that age-old scourge of mankind: malaria. We are embarking with other nations in an all-out five-year campaign to blot out this curse forever. We invite the Soviets to join with us in this great work of humanity. We would be willing to pool our efforts with the Soviets in other campaigns against the diseases that are the common enemy of all mortals—such as cancer and heart disease.

"If people can get together on such projects, is it not possible that we could then go on to a full-scale co-operative programme of science for peace? A programme of science for peace might provide a means of funnelling into one place the results of research from scientists everywhere, and from there making it available to all parts of the world. There is almost no limit to human betterment that could result from such co-operation. Hunger and disease could increasingly be driven from the earth. The age-old dream of a good life for all could, at long last, be translated into reality.

"But of all the works of peace, none is more needed now than a real first step toward disarmament. Last August the U.N. General Assembly, by an overwhelming vote, approved a disarmament plan that we and our Allies sincerely believed to be fair and practical. The Soviets have rejected both the plan and the negotiating procedure set up by the United Nations. As a result, negotiation on this supremely important issue is now at a standstill.

"But the world cannot afford to stand still on disarmament. We must never give up the search for a basis of agreement. Our Allies from time to time develop differing ideas on how to proceed. We must concert these convictions among ourselves. Thereafter, any reasonable proposal that holds promise for disarmament and reduction of tension must be heard, discussed, and, if possible, negotiated.

"There is one indispensable condition. A disarmament proposal, to hold real promise, must at the minimum have one feature: reliable means to ensure compliance by all. It takes actions and demonstrated integrity on both sides to create and sustain confidence. And confidence in a genuine disarmament agreement is vital; vital not only to the signers of the agreement, but also to the millions of people all over the world who are weary of tensions and of armaments. I say once more, to all peoples, that we as a nation will always go the extra mile with anyone on earth if it will bring us nearer a genuine peace.

Conclusion.

"These, then, are the ways in which we must funnel our energies more efficiently into the task of advancing security and peace. These actions demand and expect two things of the American people: sacrifice, and a high degree of understanding. For sacrifice to be effective, it must be intelligent. Sacrifice must be made for the right purpose and in the right place—even if that place happens to come close to home.

"After all, it is no good demanding sacrifice in general terms one day, and the next day, for local reasons, opposing the elimination of some unneeded Federal facility. It is pointless to condemn Federal spending in general, and the next moment condemn just as strongly an effort to reduce the particular Federal grant that touches one's own interest.

"And it makes no sense whatever to spend additional billions on military strength to deter a potential danger, and then, by cutting aid and trade programmes, let the world succumb to a present danger in economic guise.

"The world is waiting to see how wisely and decisively a free representative Government can and now will act. I believe that this Congress possesses and will display the wisdom promptly to do its part in translating into law the actions demanded by our nation's interests. But, to make law effective, our kind of Government needs the full voluntary support of millions of Americans."

In conclusion, President Eisenhower expressed his confidence that "the response of Congress and of the American people will make this time of test a time of honour."
(New York Times) **(President Eisenhower at NATO, 15965 A; "Science in National Security" Broadcasts, 15859 A; State of the Union Message (1957), 15350 A.)**

A. ISRAEL. — Negev Development. - Opening of Beersheba-Eilat Highway. - Negev Research Institute.

A new 148-mile highway linking Beersheba with the port of Eilat, at the head of the Gulf of Akaba, was opened on Jan. 16 by the Prime Minister of Israel, Mr. Ben-Gurion. It is asphalted throughout its length and was built in nine months at a cost of IL. 2,500,000. Described by Mr. Ben-Gurion as a "Suez Canal overland," it is expected to play an important part in opening up the Negev (the southern desert area of Israel), and in developing Israel's economy generally, by giving better communication with Eilat and by linking the northern part of the country with a number of new agricultural and mining settlements established in the Negev during recent years. Moreover, it will reduce the travelling-time on the Beersheba-Eilat route from eight hours to 5½ hours.

The new road runs through desolate country southward from Beersheba to the mining village of Mizpe Ramon and thence plunges into Israel's "grand canyon"—the Makhtesh Ramon, a great depression extending 20 miles across the desert floor. Emerging from the canyon, it crosses more barren country until it reaches the Wadi Araba, the great rift linking the Dead Sea with the Gulf of Akaba. The mountainous nature of the terrain gives rise to differences in gradient of up to 2,400 feet. The highway replaces a rough, narrow and difficult track, a large part of which was unsurfaced and impassable after heavy rains.

A Negev Research Institute was opened at Beersheba on Oct. 31, 1957, comprising a meteorological unit and experimental plant for the exploitation of solar energy and for the desalinization of brackish ground-water. Two further laboratories are projected, one for research into minerals and their industrial exploitation. Designed to serve as a research centre into the problems of arid zones, it will have financial assistance from the U.N. Educational, Scientific, and Cultural Organization (UNESCO) and will be linked with Israeli scientific institutions such as the Hebrew University at Jerusalem and the Technion at Haifa.

UNESCO decided in 1956 to institute research in arid zones as a "major project," Israel being designated as one of four countries most suitable for this purpose. The other three are Egypt, India, and Pakistan, where similar research will be carried out with UNESCO assistance.—(Israel Government Press Office, Jerusalem - Times - New York Times)

B. EUROPEAN UNIFICATION. — Corrigendum.

In the analysis of the voting figures in the French National Assembly debate on the Euratom and Common Market treaties—at the bottom of the second column of page 15957—35 Poujadists should be added to those opposing ratification, making up the total of 234 votes against ratification. (Ed. K.C.A.)

A. UNITED KINGDOM. — Wage Increases and Industrial Disputes in 1957. - Outstanding Wage Claims.

A general review of wage increases and industrial disputes during 1957 was published in the January issue of the *Ministry of Labour Gazette*, and is summarized below.

Wage Increases.

The average increase in weekly wages during the year was nearly 5½ per cent, compared with an average rise in the cost of living of about 4½ per cent; over one-half of the wage increases occurred during the three months March, April, and May, when settlements of the wage claims in the major industries were reached. In 1956 the respective increases were 7½ per cent (wages) and 3 per cent (prices).

About 12,341,000 workers received increases in 1957 aggregating £5,333,800 a week—an average of about 8s. 8d. per worker. The following table shows the approximate number of workers affected in each of the principal groups of industries and the net amount of the weekly changes in wage rates:

	Approximate Number of Workers Affected	Estimated Net Weekly Increases £
Agriculture, Forestry, Fishing	714,500	317,600
Mining and Quarrying	411,500	201,200
Treatment of Non-metalliferous Mining Products other than coal	211,000	62,900
Chemicals and Allied Trades	234,000	84,200
Metal Manufacture	224,500	110,200
Engineering, Shipbuilding and Electrical Goods; Vehicles; Metal Goods not elsewhere specified	2,554,000	1,194,400
Textiles	501,000	194,900
Leather, Leather Goods and Fur	37,500	13,800
Clothing	266,500	102,800
Food, Drink and Tobacco	520,000	207,400
Manufactures of Wood and Cork	215,500	113,200
Paper and Printing	341,000	71,300
Other Manufacturing Industries	149,500	65,000
Building and Contracting	1,246,000	546,900
Gas, Electricity and Water	237,500	121,200
Transport and Communication	1,225,500	770,200
Distributive Trades	1,451,500	511,600
Public Administration	955,000	399,300
Miscellaneous Services	755,000	245,700
Total	12,341,000	5,333,800

Of the wage increases granted, £2,179,200 (40.9 per cent) was obtained through direct negotiation, £1,484,300 (27.8 per cent) through joint industrial councils, £1,116,400 (20.9 per cent) through wages councils and other statutory wages boards, £382,800 (7.2 per cent) under sliding scales based on the retail price index, £109,000 (2.0 per cent) by arbitration and mediation, and £62,100 (1.2 per cent) through other joint councils or conciliation boards.

The index figures of weekly rates of wages (Jan. 31, 1956 = 100) for industries and services as a whole rose from 106 in December, 1956 and January, 1957 to 107 in February, 108 in March-April, 111 in May-September, and 112 in October-December. For manufacturing industries only the index rose from 106 in December, 1956 to 107 in January-March, 1957, 108 in April, 111 in May-July, and 112 in August-December.

During 1957 about 434,000 employees had their normal working hours reduced by an average of about 2½ hours a week.

Industrial Disputes.

There were 2,855 industrial disputes involving stoppages of work during 1957, compared with 2,648 (revised figure) in 1956. About 1,358 workers (approximately 5.5 per cent of the total number in civil employment) were affected, the total number of working days lost being 8,415,000 (against 2,082,000 in 1956)—an average of nearly 7 days per worker and the highest total since 1926, the year of the General Strike.

Stoppages in the various industries chiefly affected by industrial disputes are summarized below:

Engineering and Shipbuilding Industries. The largest stoppages in any industry, judged by the numbers of workers involved and of working days lost, were the related stoppages in the engineering and shipbuilding industries in March-April 1957 (see 15609 A), involving nearly 800,000 workers and costing over 6,000,000 working days. A strike of Merseyside boilermakers and of shipbuilding and ship-repair workers in April over bonus payments involved about 5,000 workers and cost about 80,000 working days.

Transport Industry. A strike of provincial omnibus drivers, conductors, etc. in support of a claim for a wages increase (July 20-28) resulted in a virtually complete stoppage of bus services outside London lasting one week. About 100,000 workers were involved and 770,000 working days lost.

Three large strikes of dock workers and tally clerks occurred in the Port of London during the year, as follows: (1) a stoppage (Jan. 9-24) at Tilbury and London docks over the employment of dock office clerks on work claimed by tally clerks, involving over 3,000 tally clerks and dockers, and costing nearly 21,000 working days; (2) a further stoppage (March 25-April 8) following the repudiation of the agreement reached over this dispute (17,000 dockers and tally clerks involved and 54,000 days lost); (3) a stoppage (Aug. 6-17) at the London docks caused by the employers' return to the labour pool of certain workers who had refused to handle cargo consigned to a market involved in another dispute (over 12,000 dock workers involved and 70,000 working days lost).

Aircraft Manufacturing Industry. A lengthy stoppage, involving about 3,000 draughtsmen, supervisors, and other workers began on July 29 at the de Havilland factories in support of a demand for three weeks' paid holiday. About 250,000 working days had been lost when work was resumed on Oct. 4, after the Minister of Labour and National Service had appointed a committee to inquire into the dispute.

Coalmining Industry. The largest stoppage in this industry began on Feb. 22, when about 760 miners at Coventry ceased work as the result of the dismissal of four men who had led a "go-slow" movement following dissatisfaction with an umpire's award. On March 4 over 5,000 miners from other Warwickshire pits struck in sympathy, and when work was resumed on March 11 about 31,000 working days had been lost.

Other serious stoppages during 1957 included (i) the unofficial strike at the Briggs (Dagenham) motor body works in Jan.-Feb. (see 15539 A), costing about 28,000 working days; and (ii) an unofficial strike of about 2,000 porters and other workers at Covent Garden market, which, together with sympathetic strikes by about 1,500 workers at other London fruit and vegetable markets, involved the loss of about 87,000 working days.

Outstanding Wage Claims.

The following table, brought by the *Economist* in its issue of Feb. 7, shows outstanding wage and other claims at the beginning of February 1958:

	Claim	Workers affected
*Engineers; *Shipbuilders	40-hour week	2,500,000
Building operatives	8d. an hour	1,000,000
Retail shop workers	£1 a week	800,000
Clothing workers	6d. an hour	450,000
Day wage miners	10s. a week	400,000
Railwaymen	Substantial	370,000
Road haulage	3s. in the £	200,000
Wool textiles	Substantial	150,000
Transport engineers	Substantial	130,000
Rail shopmen	Substantial	120,000
Electrical supply	Substantial	120,000
Rail salaried staffs	Cost of living increase	90,000
Engine drivers and firemen	2s. in the £	75,000
Police	2s. in the £	70,000
London busmen	25s. a week	53,000
Electrical contracting	Substantial	50,000
Tobacco workers	10s. a week	40,000
Health Service	1s. in the £	40,000
Print (national newspaper)	12½ to 21 per cent	25,000
Sub-postmasters	2s. in the £	23,000

*The 12-months' wage standstill agreement accepted in 1957 by the engineering and shipbuilding workers (see 15609 A) expires in March.

If a prospective claim on behalf of 100,000 dockers is included in the total, the aggregate cost of present wage claims amounts to about £450,000,000 a year, or nearly 6 per cent of the wages bill in 1957.—(Ministry of Labour Gazette - Times - Daily Telegraph - Manchester Guardian - Economist)

(Prev. rep. 1956 Review, 15432 A; Disputes, Engineering Industry, 15609 A; Briggs Motor Works, 15539 A.)

B. SPANISH SAHARA. — New Provinces.

It was announced in Madrid on Jan. 14 that the Spanish Saharan territories had been reorganized into two provinces: (1) Ifni, and (2) Spanish Sahara, comprising the former colonies of Rio de Oro and Saguia el-Hamra. No mention was made of Spanish Southern Morocco, which was formerly administered as part of the Spanish protectorate (now retroceded to Morocco) and which lies between Saguia-el-Hamra and the southern border of Morocco—see map, page 15985. The announcement added (1) that General Mariano Gomez Zamalloa (previously Governor of all Spanish Saharan territories, and commander of the Spanish forces in the recent Ifni fighting) had been appointed Governor-General of Ifni; (2) that Major-General José Hector Vazquez had been appointed Governor-General of the Spanish Sahara; (3) that the two new provinces would be administered by the Director-General of African Provinces in Madrid; and (4) that General Lopez Valencia, Captain-General of the Canary Islands, would command all Spanish troops in the Spanish Sahara, Ifni, and the Canaries.—(A.B.C., Madrid) **(Prev. rep. 15895 A.)**

FEBRUARY 8—15, 1958

A. EGYPT - SYRIA. — Proclamation of the United Arab Republic.

A proclamation was signed in Cairo on Feb. 1 by President Nasser of Egypt and President Kuwatly of Syria under which the Egyptian and Syrian Republics were merged into a single country under the name of the United Arab Republic. The ceremony took place at the Koubba Palace in Cairo and was attended by a Syrian delegation which included M. Sabry Assali (the Prime Minister), Dr. Khaled Azem (Deputy Premier and Defence Minister) and General Bizri (the Syrian C.-in-C.), in addition to President Kuwatly.

The political and economic union of the two countries had been under discussion for the past two or three years, the Syrian Government having decided in July 1956 to enter into negotiations with Egypt for the creation of a Syro-Egyptian Federal Union (see 14988 G). An agreement on economic union was signed in Damascus in September 1957 (see page 15746, first column), and two months later the Parliaments of both countries unanimously approved the creation of a Federal Union (see page 15920, second column).

The proclamation of the United Arab Republic was read by Presidents Nasser and Kuwatly to large crowds assembled outside the Koubba Palace, the day being celebrated as a public holiday in Egypt and Syria. After recalling that the Egyptian and Syrian Parliaments had unanimously agreed that unity should be established between the two countries " as a preliminary step toward the realization of Arab unity," and after proclaiming the union of Egypt and Syria " into one State, to be known as the United Arab Republic," the proclamation stated that :

(1) The United Arab Republic would have a " presidential democratic system of government " in which executive authority would be vested in the Head of State, assisted by Ministers appointed by and responsible to him.

(2) The new Republic would have " one flag, one army, and one people, who shall be joined in unity wherein all will share equal rights and duties."

(3) President Nasser and President Kuwatly would each make a statement on Feb. 5, in the Egyptian and Syrian Parliaments respectively, " announcing the decisions reached and explaining the principles of unity on which the Republic shall be based."

(4) A plebiscite would be held within 30 days in which the Egyptian and Syrian peoples would choose the Head of State of the United Arab Republic.

(5) Any other Arab country could accede to or federate with the United Arab Republic.

As stated in the proclamation, the principles on which the United Arab Republic would be based were explained on Feb. 5 by President Nasser to the Egyptian National Assembly and by President Kuwatly to the Syrian Chamber of Deputies. In his speech to the Egyptian Parliament, President Nasser described the creation of the United Republic as " a turning-point in the history of mankind " and " a new and glorious dawn of Arab unity after the darkness of a long, pitch-black night." He emphasized that the new State threatened no-one, and expressed the hope that other Arab countries would federate with it on the principles of " positive neutralism and non-alignment."

President Nasser enumerated the following 17 points as the bases of the United Arab Republic :

(1) The Republic was an independent, democratic, and sovereign State, its people being " part of the Arab nation."

(2) Individual liberties and freedoms would be guaranteed to all citizens under the law.

(3) Participation in general elections " shall be the right of citizens within the provisions of the law," and " participation in public life shall be their patriotic duty."

(4) Legislative powers would be vested in a Council of the Nation, whose members would be chosen by the President of the United Republic. At least half the members would be chosen from the present Parliaments of Egypt and Syria.

(5) The President of the United Arab Republic would be vested with executive powers.

(6) Private property of citizens would be safeguarded, and would not be expropriated " except in the public interest and in return for just compensation under the law."

(7) Taxes would not be introduced, amended, or abrogated except by law, nor would taxes be levied in circumstances other than those defined by law.

(8) The independence of the Judiciary would be guaranteed under law.

(9) All Egyptian and Syrian legislation at present in force would remain valid until abrogated, amended, or modified.

(10) The United Arab Republic would consist of two regions (*aqlim*)—Egypt and Syria.

(11) Each region would have an Executive Council whose chairman and ministers would be appointed by the President of the United Arab Republic. The ministers of the two Executive Councils would be appointed by the President of the United Republic on the recommendations of the chairman of the Executive Council concerned.

(12) The jurisdiction and powers of the Executive Councils would be defined by decree of the President of the United Arab Republic.

(13) All international treaties and agreements at present in force between Egypt and Syria and other countries would remain valid.

(14) The public services and administrative systems of Egypt and Syria would remain as at present, until reorganized and merged by decrees of the President of the United Republic.

(15) The citizens of the United Arab Republic " shall form a National Union to work for the attainment of their national goals and to concentrate their efforts on building a politically, economically, and socially sound nation." The date on which the National Union would be formed, and its methods of operation, would be laid down in a decree to be issued by the President of the United Republic.

(16) A permanent Constitution would be drawn up for the United Arab Republic.

(17) A plebiscite would be held throughout the United Republic on Feb. 20 to choose its President and to approve the union of the two countries.

Both the Egyptian National Assembly and the Syrian Chamber of Deputies unanimously endorsed the 17-point programme outlined by Presidents Nasser and Kuwatly. The Syrian Parliament also approved—by unanimous vote—a proposal by President Kuwatly that President Nasser should be the first President of the United Arab Republic. Presidential decrees were issued in Cairo and Damascus on Feb. 7 for the holding of the plebiscite on Feb. 20.

Official spokesmen in Damascus had previously confirmed on Jan. 31 that the United Arab Republic would have one Government, one Parliament, one capital, one flag, and one army. It was also stated in Damascus (*a*) that the President of the United Arab Republic was expected to appoint a Cabinet of 20 members, of whom 15 would be Egyptians and five Syrians ; (*b*) that a Governor-General would be appointed for Syria, with decentralized authority over administrative, financial and economic affairs ; (*c*) that Cairo would be the capital of the United Arab Republic ; and (*d*) that existing diplomatic missions in Damascus would be replaced by consulates-general.

Cairo radio announced on Feb. 4 that President Nasser had decided to dissolve the Syrian political parties after the establishment of the United Arab Republic, and to form a National Union in Syria on the Egyptian model (see 15840 B).

As the Communist Party is outlawed in Egypt, it was commented in Western newspapers that the creation of a single-party National Union in Syria might also result in the outlawing of the influential Syrian Communist Party. It was reported that the Syrian Communist leader, Khaled Baqdash, had left Syria for Moscow some days before the proclamation of the United Republic, together with his family.

In the other Arab countries, as well as in Israel and Turkey, the official attitude towards the formation of the United Arab Republic was one of reserve, no formal statements being issued by any of the Governments concerned. The Crown Prince of the Yemen, however, was present at the proclamation of the United Republic, together with a Yemeni delegation, and subsequently had several meetings with President Nasser. No statement was issued, but it was understood that negotiations were in progress on the possibility of the Yemen's " federation " (not union) with the United Republic.

The United Arab Republic will have a population of about 27,000,000 (about 23,000,000 in Egypt and nearly 4,000,000 in Syria)—more than all the other Arab countries combined. The Egyptian and Syrian " regions," however, are not coterminous, being separated from each other by 150 miles of Israeli and Jordanian territory. It was commented in *Le Monde* (Paris) that, in addition to the Republic's important agricultural and mineral resources, " one of the least negligible aspects of the economic strength of the new State is the fact that about nine-tenths of the oil from the Middle East crosses its territory, either by way of the Suez Canal or through the pipelines of the Iraq Petroleum Company and Aramco." The pipelines referred to—four in number—are those which cross Syria from the Iraqi oilfields. (Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times)

A. NORTH ATLANTIC TREATY ORGANIZATION - WESTERN EUROPEAN UNION. — Further Reduction of British Forces in Germany. - General Gale succeeds Field-Marshal Montgomery as Deputy Supreme Commander, Europe. - NATO Scientific Adviser. - Defence Expenditures of NATO Countries. - NATO Parliamentary Conference and W.E.U. Assembly.

The Council of the Western European Union, meeting in London on Jan. 29, announced that it had agreed to a British proposal to withdraw 8,500 troops from the mainland of Europe as part of the general defence planning for the financial year 1958-59. The strength of the British Army of the Rhine would thereby be reduced to 55,000 men, and the number of withdrawals, including the 13,500 men being withdrawn during 1957-58, be increased to 22,000.

It was made known that the British representative had informed the Council on Dec. 3 that if a satisfactory agreement was reached with the German Federal Government on the question of support costs for the B.A.O.R., only 8,500 men would be withdrawn from Western Germany in 1958-59 instead of 13,000 as originally planned (see 15723 A), and that the British Government was prepared under this condition to leave the remaining 5,000 men from the U.K. "strategic reserve" in Germany. [At the time of the announcement on Jan. 29 no arrangements had yet been made as regards support costs for 1958-59.].

NATO and W.E.U. developments in recent months, apart from the December meeting of the North Atlantic Council (see 15965 A), are summarized below under cross-headings:

Retirement of Field-Marshal Montgomery. - General Gale appointed Deputy Supreme Commander, Europe.

It was announced on Nov. 17, 1957 (his 70th birthday) that Field-Marshal Viscount Montgomery would retire on Sept. 20, 1958, as Deputy Supreme Allied Commander, Europe, and also from active service with the British Army. Field-Marshal Montgomery (who was commissioned in the Royal Warwickshire Regiment in 1908) would have completed exactly 50 years' commissioned service on the date of his retirement.

It was subsequently announced on Jan. 28, 1958, that Lord Montgomery would be succeeded as Deputy SACEUR by General Sir Richard Gale, C.-in-C. of the B.A.O.R. and of NATO Northern Army Group from 1952-1956. General Gale had retired from the British Army in March 1957, but it was learnt that he would be restored to the active list in order to take up his new appointment.

General Sir Richard Gale was commissioned into the Worcestershire Regiment in 1915. In the Second World War he commanded successively the 1st Parachute Brigade, the 6th Airborne Division (with which he landed in Normandy on June 6, 1944), and the 1st Airborne Corps. After the war he commanded the 1st Division in Palestine (1946-47), became G.O.C., British Troops, Egypt (1948-49), and was Director-General of Military Training at the War Office (1949-52) before his appointment as C.-in-C., B.A.O.R.

Other NATO Appointments.

The following military and civilian appointments had also been announced in recent months.

Central European Command. Rear-Admiral M. S. Townsend to succeed Rear-Admiral K. McN. Campbell-Walter as Commander, Allied Naval Forces, Northern Area, Central Europe, with effect from May, 1958 (announced on Jan. 15, 1958).

Naval Commands. Rear-Admiral W. J. N. Woods (Flag Officer, Submarines) to succeed Vice-Admiral Sir John Eaton as Deputy Supreme Allied Commander, Atlantic, as from January 1958 (Sept. 10, 1957).

Admiral Sir Charles Lambe (Second Sea Lord and Chief of Naval Personnel) as British Commander-in-Chief, Mediterranean, and C.-in-C., Allied Forces, Mediterranean. He succeeded Admiral Sir Ralph Edwards, who relinquished the commands for health reasons (Oct. 14, 1957).

Rear-Admiral (Acting Vice-Admiral) Sir St. John Tyrwhitt to succeed Vice-Admiral B. I. Robertshaw as Chief of Allied Staff, Mediterranean, from Jan. 31, 1958 (Dec. 6, 1957).

Standing Military Committee. Colonel A.-D. von Plato, Commandant of the *Bundeswehr* Tank School at Münster, was appointed to the NATO Standing Military Committee in Washington on Nov. 15, 1957. Colonel von Plato was the first German representative to be appointed to this body.

Civilian Appointments. Mr. E. H. Meili (U.S.A.) as Assistant Secretary-General for Production and Logistics in succession to Mr. J. M. Mitchell (U.S.A.), who had resigned on Dec. 31, 1956 (Nov. 21, 1957).

Appointment of NATO Scientific Adviser.

Following the decision taken by the North Atlantic Council at its December meeting, it was announced on Feb. 5, 1958, that Professor Norman F. Ramsey (an American scientist) had been appointed Scientific Adviser to M. Spaak, the Secretary-General of NATO.

Professor Ramsey (42) has been professor of physics at Harvard University since 1947, and is also a member of the U.S. Defence Department's Advisory Panel on Atomic Energy. During the Second World War he headed a group which developed magnetron radar transmitters, and later helped to establish the Brookhaven laboratory for nuclear research, serving as the first chairman of its physics department.

Defence Expenditures of NATO Countries.

Defence expenditures of member-countries for the period 1949-57 were shown in a table published by NATO headquarters on Dec. 19. [With the exceptions mentioned below, the figures for 1949-55 agreed with those given on pages 14618 and 15336 and are therefore not repeated.]

The actual figures for 1956 and the forecasts for 1957 were as follows:

Country or Area	Currency Unit	Actual 1956	Forecast 1957
Belgium	Million B. Frs.	17,065	19,085
Canada	Million Can. $	1,892	1,871
Denmark	Million D. Kr.	936	992
France	Milliard F. Frs.	1,469	1,494
Germany (F.R.) (*a*)	Million DM.	7,211	7,789
Greece	Million Drachmae	4,345	4,424
Italy	Milliard Lire	584	584
Luxemburg	Million L. Frs.	395	454
Netherlands	Million Guilders	1,854	1,840
Norway	Million N. Kr.	967	1,028
Portugal	Million Escudos	2,297	2,389
Turkey (*b*)	Million Liras	1,169	1,347
United Kingdom	Million £ Sterling	1,614	1,609
United States (*c*)	Million U.S. $	41,754	44,278
Total Europe	Million U.S. $	13,116	13,437
Total North America	Million U.S. $	43,646	46,149
Total NATO	Million U.S. $	56,762	59,586

(*a*) The revised West German figure for 1954 was 6,287,000,000 DM.
(*b*) The revised Turkish figure for 1955 was 1,080,000,000 liras.
(*c*) The revised U.S. figures for 1954 and 1955 were $42,900,000,000 and $40,518,000,000 respectively.

Because of the above-mentioned changes, the totals for 1954 and 1955 shown on page 15336 should be revised as follows:

	(Millions of U.S. dollars)	
Europe	11,746	11,829
North America	44,671	42,333
NATO	56,417	54,162

Further German Divisions under NATO Command.

The Federal Defence Ministry in Bonn announced on Jan. 3, 1958, that two armoured divisions, a squadron of transport aircraft, and a squadron of motor torpedo-boats had been transferred to the NATO Command on Jan. 1. This brought the total strength of German forces under NATO Command to three infantry divisions, two armoured divisions, four naval squadrons (three squadrons of minesweepers and one of M.T.B.s, 31 vessels in all), and an air force squadron of 16 transport planes. A mountain division and an airborne division were expected to be available for NATO in the spring and an armoured division and an infantry division in the autumn, whilst the *Luftwaffe* planned to place nine squadrons of fighter-bombers under NATO command in the course of the year.

Franco-German-Italian Agreement on Arms Production and Development.

Following talks on Jan. 21 in Bonn between the French, Italian, and West German Defence Ministers (respectively M. Chaban-Delmas, Signor Taviani, and Herr Strauss), it was announced that it had been agreed in principle to proceed with the joint development and production of weapons and equipment, with the general aim of standardizing all defence production in the three countries.

It was semi-officially stated that a three-Power committee of military and technical experts had been set up to work out details of the proposed co-operation, and that it would concentrate first on anti-tank and ground-to-air missiles, the production of a "European" tank, and the standardization of fighter aircraft, signalling apparatus, and vehicles.

Dutch Military Reorganization.

In a memorandum submitted to the Lower House of the States-General on Dec. 19, the Netherlands Defence Minister (Mr. Staf) gave details of a military reorganization plan to be implemented over the period 1958-60. The main points covered by the memorandum were as follows:

(1) Top priority would be given to combat-ready troops for NATO use.

(2) As the result of a U.S. offer of *Honest John* rockets and ground-to-air missiles, the Netherlands forces were "on the threshold" of being equipped with ballistic and guided missiles. The training of Dutch personnel in the use of ground-to-air missiles would begin in the United States early in 1958.

(3) Since the value of conventional anti-aircraft artillery had declined with the increase in the speed and height of modern aircraft, anti-aircraft units, with their "completely obsolete" equipment, would be abolished.

(4) The actual number of Air Force squadrons would be reduced, but the striking power of the Tactical Air Force would increase considerably. In addition, "arrangements for the possible use of atomic weapons by the Tactical Air Force" would be made in accordance with a U.S. offer. Referring to U.S. legislation forbidding the issue of atomic weapons to non-American forces in peace-time, Mr. Staf said: "There is no reason not to expect that at a critical moment atomic warheads would be made available to Allied forces."

(5) Orders for conventional submarines due to be completed by 1963 had been cancelled, notably because both Britain and France were working on designs for submarines propelled by atomic energy.

(6) With the exception of the Air Observer Corps, the National Reserve would be progressively abolished.

Dutch-Belgian Air Force Co-operation.

Following a proposal by General Norstad that the Belgian and Netherlands air forces should be more closely linked (and perhaps eventually amalgamated), the Netherlands and Belgian Defence Ministers (Mr. Staf and M. Spinoy) met in Brussels on Dec. 3 to discuss the implementation of the Supreme Commander's suggestion.

It was decided at this meeting to set up four joint committees which would present regular reports on the development of co-operation in the fields of personnel training, logistics, standardization of equipment, and flying security.

Reorganization of U.S. Army in Europe.

General Hodes, C.-in-C., U.S. Army in Europe, announced on Oct. 1 that the "pentomic" reorganization of the five component divisions of the U.S. Seventh Army in Germany (see 15723 A) had been completed. "Pentomic" airborne and infantry divisions, General Hodes added, could be rapidly moved by airlift to any threatened area. By means of assault transport planes, they would have the tactical mobility necessary for rapid deployment within a given battlefield.

Warning on Naval Deficiencies.

The Joint Commanders, Eastern Atlantic (Admiral Sir John Eccles and Air Marshal Sir Bryan Reynolds), stated at a press conference on Sept. 27, 1957, that in the light of the merchant shipping protection exercise "Sea Watch," which was carried out in the English Channel from Sept. 20-28, they had concluded that they had insufficient forces to carry out the duties which would fall to them in the event of war.

Sir John Eccles said that the exercise had demonstrated (*a*) that there was a "desperate" shortage of all the necessary equipment, but especially of equipment for the long-range detection of submarines; (*b*) that to enter a war with the forces at present available would entail a "very grave risk"; (*c*) that naval forces were essential, "not only in phase two of any war but right from the outbreak"; and (*d*) that the guided missile-firing submarine of the future would constitute a major problem for NATO. Sir Bryan Reynolds stressed that the Command was especially short of long-range aircraft, and urged a combined scientific effort by NATO to improve submarine detection.

Admiral Wright, Supreme Allied Commander, Atlantic, stated on Sept. 28 that he fully endorsed the criticisms made by the Joint Commanders, Eastern Atlantic.

Transfer of Canadian Warships to Turkey.

At a ceremony at Sydney (Nova Scotia) on Nov. 29, the first five of 10 *Bangor*-class escort vessels of the Royal Canadian Navy to be transferred to Turkey under the NATO Mutual Aid Agreement were formally handed over to their Turkish crews by the Canadian Minister of National Defence, Major-General Pearkes.

Meeting of W.E.U. Consultative Assembly.

The Consultative Assembly of the Western European Union met in Strasbourg from Oct. 10-14, 1957. Some of its principal decisions are summarized below.

Relations with Council of Ministers. The debates were marked by general criticism of the W E.U. Council of Ministers for its allegedly unco-operative attitude towards the Assembly. Among other members, Mr. J. Edwards (U.K., Lab.) declared that if the Assembly could not be supplied with the proper means to do its work "it might as well close down altogether," whilst Signor Lucifero (Italy) asserted that the voice of the Assembly was being "stifled." Eventually the Assembly unanimously adopted a resolution calling upon the Council of Ministers to provide it with fuller information and to pay greater heed to its recommendations.

Guided Missiles and Defence Research. Lord Stonehaven (U.K.) presented a report on guided missiles which proposed that the W.E.U. countries should pool their efforts in this field in order to create "a common defensive weapon." On the question of U.S. guided missiles, the report declared that the United States would have "done far better to abandon their high horse of extreme secrecy and to have confided in us"; it also said that if the U.S.A. had taken "a lead in getting together instead of a lead in isolation, we should not now have the Russians wiping our eye."

Another reason why the U.S.A. was currently lagging behind the Soviet Union in this sphere [the report added] was that American research had been impeded by "inter-departmental rubbish" similar to that from which the U.K. had formerly suffered. As regards excessive secrecy, the U.K. was also guilty since it had withheld information from its Continental allies. In conclusion, the report proposed exchanges of information between the U.S.A. and the W.E U. countries, the setting-up of international teams of scientists, and joint work by engineers and technicians on specified projects for periods of three to seven years.

At the close of the debate on Lord Stonehaven's report, the Assembly adopted a resolution (by 45 votes to 2) calling for fuller co-operation between the member-countries in the field of guided missiles, and asking the Council of Ministers to lay down the circumstances in which strategic nuclear weapons would be used.

Disarmament. The conference adopted a resolution which stated: (*a*) that suspension of nuclear tests should take place only as part of a general disarmament settlement and should be linked with a ban on the production of fissile material; and (*b*) that a scientific conference should be held to discuss the risks arising from nuclear radiation.

NATO Parliamentary Conference.

The third NATO parliamentary conference was held in Paris from Nov. 11-16, 1957. Among reports submitted to the conference, the most notable were those on the military aspect of the NATO alliance and on scientific and technical training.

Military Policy. The military report—presented by M. Gilson (Belgium), chairman of the military committee of the conference, and General Calmeyer (Netherlands)—was highly critical of existing military policy and arrangements. It expressed the view that the NATO land forces were in process of "disintegration" and that the leadership of the alliance was "inadequate." Too much stress was laid on atomic weapons and "massive retaliation," and the Continental countries did not feel that this policy afforded them sufficient protection. The U.S.A. and Britain, on the other hand, did not understand how great a "nightmare" the Russian threat represented for the Continental countries. The report said that the Russians, by their subversive activities in the Middle East, had succeeded in outflanking NATO. It proposed that both the Standing Group and the Committee of Military Representatives should be transferred from Washington to Paris.

The report met with considerable opposition both from other members of the military committee and the full conference, and the resolution which the military committee eventually submitted to the conference—and which was adopted—did not embody the criticisms contained in the report. The resolution proposed, notably, closer collaboration between the political and military arms of the alliance, and the provision of fuller information on political and military developments for the parliamentarians of the member-countries.

Scientific and Technical Training. This report was submitted by Senator Jackson (U.S.A.), chairman of the scientific and technical committee of the conference. It proposed, *inter alia*, (*a*) the establishment of a NATO defence missile training centre and a NATO institute for defence studies; (*b*) a programme, to be instituted and financed by NATO, for producing an extra 500 doctors of science each year; (*c*) the distribution by NATO of 5,000 prizes annually to outstanding secondary school pupils in the fields of science and mathematics; (*d*) the holding of NATO summer schools; (*e*) the creation of a "European labour exchange" for scientists and engineers. Senator Jackson estimated the annual cost of this programme at $10,000,000, but thought that the investment would pay for itself many times over.

The conference (with the exception of the French delegation—see below) unanimously approved a resolution recommending the implementation of Senator Jackson's proposals.

Political Co-operation. A resolution adopted on Nov. 16 embodied a proposal by Senator Kefauver (U.S.A.) that NATO should convene two conferences: the first (and smaller) conference, meeting in 1958, would become a form of permanent organization to advise member-Governments on fundamental questions relating to NATO; the second, meeting in 1959, would be modelled on the Hague Conference of 1948, from which the Council of Europe had developed..

As stated on page 15883 (end of second column) the French delegation walked out of the NATO parliamentarians conference on Nov. 15 in protest against the "brutal" and unjustified" decision of the U.S. and British Governments to supply arms to Tunisia. On the same date, six Democratic members of the U.S. delegation (including Senator Green, chairman of the Senate Foreign Affairs Committee) issued a statement deploring the Anglo-American action; this statement was not signed, however, by the other two Democratic delegates—Senators Kefauver and Jackson. (NATO Information Division, Paris - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - Netherlands News Agency - Frankfurter Allgemeine Zeitung - Department of External Affairs, Ottawa) **(Prev. rep. 15965 A; 15723 A.)**

A. SOUTHERN RHODESIA. — Cabinet Crisis. - Resignation of Mr. Todd's Colleagues. - New Cabinet formed by Mr. Todd. - Sir Edgar Whitehead elected Leader of Southern Rhodesian Division of United Federal Party.

A political crisis was precipitated in Southern Rhodesia by the resignation on Jan. 11 of all the four members of Mr. Garfield Todd's Cabinet, and the one parliamentary secretary. The Ministers who resigned were Sir Patrick Fletcher (Native Affairs), Mr. C. J. Hatty (Treasury), Mr. A. R. W. Stumbles (Justice), Mr. G. Ellman-Brown (Roads, Irrigation, and Housing), and Mr. H. J. Quinton (Parliamentary Secretary to the Minister of Native Affairs).

Announcing the resignations at a press conference on the same day, Mr. Todd said :

" On my return from holiday on Jan. 9 the acting Prime Minister, Sir Patrick Fletcher, informed me at the airport that my Ministers wished to meet me to tender their resignations. Yesterday morning we met, and the Ministers assured me that they had been fully in support of the policy we had together pursued ; that they had no criticism of my ability in leadership ; that they held me personally in high regard ; but that they had regretfully come to the conclusion that the measure of criticism levelled at me at present would make it impossible for the party to win the next election. Having come to this conclusion, they had decided to withdraw their support of me. At the recent party congress no indication was given by any Minister that there was dissatisfaction within the Cabinet. I am distressed that my colleagues . . . should have taken upon themselves to decide for the party that I should be removed from office, thus making way for one of themselves to become Prime Minister . . .

" I know that there are people who want me removed from the Premiership, but there are also many who have supported and encouraged me, and I have no intention of meekly stepping aside to permit four men who may be quite wrong, even in their summing-up of the political situation, to have their way. I am determined to go back to the party and give them an opportunity to express their will.

" I believe that a Prime Minister chosen from among my colleagues would continue in general support of the party policy, but it is now abundantly clear that the policy would have to take second place to purely political considerations. Such leadership would appeal particularly to a section of the European electorate and not to the people as a whole. My colleagues believe that the next few months must be devoted to such legislation, speeches, and action as would be designed to win over the more reactionary of our European electorate.

" I have no wish to cause a split in the party. I am a moderate. Within the ranks of the party there are a great many moderates, but there are also extremists, both liberal and reactionary. The danger at the moment is not from the extreme liberals but from moderates who allow fear to sway them to such an extent that the reactionary element may take over control of the party.

" The Dominion Party provides a comfortable home for reactionaries, but the strength of the United Federal Party lies in the free coming together of people of varying views, all determined to work together for the true welfare of the Federation and all its people. That is the party I support and, if its principles are courageously honoured, I will continue my support."

Mr. Todd concluded by saying that he had considered the advisability of going to the country in an immediate general election, but had decided against it to avoid embarrassing his party in the Federal field. He added that there was complete understanding between himself and Sir Roy Welensky, the Federal Prime Minister.

In a joint reply, issued on the same day, the four resigning Ministers refuted " the Prime Minister's version of what took place between us."

After saying that Mr. Todd had " confused our personal regard for him . . . with our opinion of him as a Prime Minister," the four ex-Ministers continued : " We made it abundantly clear to him that we ourselves had lost confidence in him as a leader and that this view was shared by many in the party, both in and out of Parliament. The allegations that we decided to be rid of him to secure the office for one of ourselves, and that if a Prime Minister is chosen from our number the party policy would have to take second place to purely political considerations, have been read with amazement and disappointment. We can only reject them as being entirely without foundation . . . The Prime Minister must recall that in taking the course of action which we felt constrained to do, we were only concerned with the true interests of stable government at this critical juncture of the Federation's history. He cannot have been totally unaware of our feelings . . . because we made them known to him some weeks ago, before his holiday."

As indicated by Mr. Todd, the conflict between him and the outgoing members of his Cabinet lay in a clash of policies on the racial issue—Mr. Todd having been criticized by many Europeans as an " extreme liberal " for advocating excessively rapid social and political advancement for Africans.

A sharp division of opinion was also apparent in regard to the events leading to the Ministers' resignations. According to Mr. Todd, when Sir Patrick Fletcher told him on Jan. 9 that the Ministers wished to resign, he (Mr. Todd) had asked for their resignations in writing, but these were not sent to him until he had again asked for them on Jan. 11. The former Ministers, on the other hand, stated that they had offered on Jan. 10 to remain in office in a caretaker capacity until Mr. Todd had re-formed his Cabinet, and that he had precipitated matters by asking for written resignations on Jan. 11.

Mr. Todd re-formed his Cabinet on Jan. 14 as follows : Sir George Davenport (Mines, Lands, and Surveys, and Roads and Road Traffic) ; Mr. A. E. Abrahamson (Treasury, and Local Government and Housing) ; Mr. A. D. H. Lloyd (Justice, Internal Affairs, and Labour) ; Mr. E. D. Palmer (Native Affairs and Irrigation) ; Mr. R. D. Palmer (Native Agriculture and Marketing --a new portfolio - and Native Education). Mr. Todd retained the Premiership, but relinquished the portfolios of Native Education and Labour.

Sir George Davenport, a farmer and company director, was for many years Minister of Mines in Sir Godfrey Huggins' Cabinet. Mr. Abrahamson, a Bulawayo industrialist, is president of the Association of Rhodesia and Nyasaland Industries ; Mr. Lloyd is a Bulawayo lawyer ; and Mr. Eric Palmer and his brother, Mr. Ralph Palmer, are farmers.

At a meeting of the United Federal Party caucus held on the same day (Jan. 14), 13 of the party's 24 M.P.s, including the former Ministers, announced that they had lost confidence in Mr. Todd's leadership, and withdrew to hold a separate meeting. At this latter meeting they adopted a resolution declaring that Mr. Todd had been " irresponsible in calling for the resignations of the retiring Ministers before he had formed a new Cabinet," and that the retiring Ministers had " acted in the best interests of the country by offering to preserve continuity of the Government by remaining in office until new Ministers were appointed."

A special congress of the Southern Rhodesian division of the United Federal Party, held in Salisbury on Feb. 8, elected Sir Edgar Whitehead (the Federation's Minister in Washington) as party leader by 193 votes against 129 for Mr. Todd. The decision was reached on a second ballot after Mr. Todd had headed the first vote, in which Sir Edgar Whitehead was second and Sir Patrick Fletcher third. Mr. Todd subsequently announced that his new Cabinet would carry on as a caretaker Government until Sir Edgar's return from Washington, when they would resign.

Mr. Wightwick, M.P. for Umtali, had previously resigned from the Federal United Party on Dec. 27 as a protest against Mr. Todd's decision to raise minimum wages for Africans without consulting either the party or the Federal Government. (Federal Information Department, Salisbury - Times - Manchester Guardian) **(Prev. rep. Cabinet, 15865 A ; United Federal Party, 15888 C ; Sir Edgar Whitehead, 15453 B.)**

B. CANADA. — Mineral Production.

Preliminary estimates published by the Dominion Bureau of Statistics in January 1958 gave the total value of Canadian production of minerals in 1957 (including oil and natural gas) as $2,133,941,000—an all-time record—as compared with $2,084,906,000 in 1956.

The total value of metallic ores was $1,136,411,000, compared with $1,146,350,000 in 1956. Figures for the principal metals were as follows (1956 figures in parentheses) : *Nickel :* $261,253,000 ($222,205,000) ; *Copper :* $199,543,000 ($292,958,000) ; *Iron Ore :* $155,549,000 ($160,362,000) ; *Gold :* $148,787,000 ($151,024,000) ; *Uranium :* $130,911,000 ($45,732,000) ; *Zinc :* $99,696,000 ($125,437,000) ; *Lead :* $52,464,000 ($58,583,000) ; *Silver :* $26,320,000 (25,498,000) ; *Platinum :* $17,490,000 ($15,726,000).

The value of the mineral fuels group rose in 1957 to the record figure of $555,500,000, compared with $518,761,000 in 1956. The chief items were : *Crude Petroleum :* $444,785,000 (compared with $406,562,000 in 1956 and now by far Canada's leading mineral, judged by value) ; *Natural Gas :* $20,823,000 ($16,850,000) ; *Coal :* $89,893,000 ($95,350,000).

The non-metallic ores group rose in value to $167,290,000 in 1957, compared with $160,312,000 in 1956. The principal item was : *Asbestos :* $106,395,000 ($99,860,000).

Structural materials as a group also rose to a record total of $274,740,000, compared with $259,453,000 in 1956.

Mineral production in 1957 was divided between the Provinces as follows (1956 production of each Province in parentheses) : Ontario, $739,219,000 ($650,823,000) ; Alberta, $411,961,000 ($411,172,000) ; Quebec, $384,465,000 ($422,464,000) ; British Columbia, $174,764,000 ($203,278,000) ; Saskatchewan, $161,487,000 ($122,745,000) ; Newfoundland, $76,245,000 ($84,349,000) ; Nova Scotia, $65,434,000 ($66,092,000) ; Manitoba, $61,299,000 ($67,909,000) ; New Brunswick, $23,250,000 ($18,258,000) ; North-West Territories, $21,966,000 ($22,158,000) ; Yukon, $13,851,000 ($15,656,000).

The total value of mineral production in 1957 was more than double the value of production in 1950 ($1,045,450,000) and three times that in 1947 ($644,870,000).—(Department of External Affairs, Ottawa - Montreal Star - Times) **(14574 A.)**

A. UNITED KINGDOM. — Administrative Tribunals. - Report of Franks Committee. - Government Acceptance of Recommendations. - Mr. Butler's Statement.

The report was issued on July 18, 1957, of the committee set up in November 1955, under the chairmanship of Sir Oliver Franks, to inquire into the working of administrative tribunals and to make recommendations (see 14536 B). Many of the recommendations were subsequently adopted by the Government, as announced by the Home Secretary (Mr. R. A. Butler) in a statement to the House of Commons on Oct. 31.

The Franks Report.

Ninety-five specific recommendations were made by the Franks Committee, the following being among the most important :

(1) The creation of two Standing Councils—one for England and Wales, appointed by and reporting to the Lord Chancellor, and the other for Scotland, appointed by and reporting to the Secretary of State for Scotland—to keep the constitution and working of administrative tribunals under constant review.

(2) The transference of the adjudicating functions at present exercised by County Agricultural Executive Committees to new tribunals, independent both of the Minister and the county committees, with a right of appeal to the Agricultural Land Tribunal and (in Scotland) to the Scottish Land Court. Strong criticism was expressed of the County Agricultural Executive Committees on the ground that their constitution was "in conflict with the principle of impartiality" and that they combined "the functions of detective, prosecutor, and judge"; it was therefore considered undesirable that these committees should continue to exercise adjudicating functions in addition to their executive responsibilities.

(3) As regards administrative procedures involving an inquiry or hearing (e.g. compulsory land purchase, and town and country planning), it was recommended that the main body of inspectors conducting these inquiries in England and Wales should be placed under the control of the Lord Chancellor, and that the inspectors' reports should be published, together with the Ministers' subsequent letter of decision and the reasons therefor.

[One member of the Committee, Lord Silkin, dissented from this recommendation; he believed that inspectors should be appointed by and come under the control of the Minister of Housing and Local Government, as at present.]

The Committee emphasized that the work of administrative tribunals, and administrative procedures involving inquiries or hearings, should be based on the principles of openness, fairness, and impartiality. "Less public resentment would be aroused against administrative action," it stated, "if all officials were trained in the principle that the individual has the right to enjoy his property without interference from the administration, unless unmistakably justified in the public interest." In general, however, the Committee found that administrative tribunals had worked "reasonably well," though there was room for much improvement.

Only brief mention was made of "the celebrated case of Crichel Down" (see 14323 G; 13705 A), the Committee pointing out that it had not been asked to go into "questions of maladministration" arising out of decisions which did not result from a formal procedure involving a tribunal or inquiry. In any event, the Crichel Down case had already been the subject of an inquiry conducted by Sir Andrew Clark, Q.C.

The principal recommendations of the Franks Committee are summarized below under cross-headings :

I.—General Principles.

The first section of the report dealt with such matters as the personnel of tribunals, qualifications of members, rights of citizens appearing before tribunals, etc.

Personnel and Qualifications of Tribunals. The Committee had received no significant evidence that any influence was exerted upon members of tribunals by Government departments, "but present practice can give no guarantee for the future." Though unable to recommend that all members of tribunals should be appointed by the Lord Chancellor, it considered that their appointment should not rest with the Ministers concerned with the subject-matter of adjudications. To enhance the independence of tribunals, the Committee considered that the Councils on Tribunals [i.e. the Standing Councils proposed in England and Wales and in Scotland] should make these appointments, but saw no need to review any existing appointments.

The chairmen of tribunals should ordinarily have legal qualifications, and all chairmen of appellate tribunals should have legal qualifications.

In general, tribunal service should not be whole-time or salaried, but there were some chairmen and members who should be paid fees, and the remuneration should be adequate to attract the right people. The Committee were not satisfied that this was at present generally so—e.g. in the case of Rent Tribunals.

Citizens' Rights. - Legal Advice and Representation. Before a tribunal hearing, the citizen should be made aware of his rights and his attention drawn to the facilities provided by the Citizens' Advice Bureau. While not recommending an official scheme of legal advice for tribunals only, the Committee stressed the desirability of its introduction. A most important requirement was that the citizen should know in good time the case he would have to meet. "We are satisfied that the requirement is generally met," the Committee added, "but in some cases—most clearly in the case of some hearings before County Agricultural Executive Committees—we are not satisfied."

The citizen should also receive, in good time beforehand, a document setting out the main points of the opposing case.

At the tribunal hearing, the most important constituent of "openness" was that the proceedings should be in public. Tribunals should sit in private only where considerations of public security were involved; where intimate personal or financial circumstances had to be disclosed; or if the hearing was a preliminary investigation of a case involving professional capacity and reputation

The right to legal representation before tribunals should be curtailed only in the most exceptional circumstances, and Government departments should not be permitted legal representation before a tribunal unless the citizen himself employed a lawyer. The Committee considered that there was a good case for extending the Legal Aid scheme to those tribunals which were formal and expensive, and to final appellate tribunals.

Payment of Costs and Expenses. The award of costs, and payment of expenses of parties concerned, should be reviewed by the Council on Tribunals. A successful applicant should be given a reasonable allowance in respect of his expenses, including in some cases an allowance for the cost of legal representation. An unsuccessful applicant should never have to pay any costs, but in most cases should be entitled to the same reasonable allowance as the successful applicant.

In disputes between private parties, however, the parties should bear their own expenses and costs, except at the appellate level or where a party had acted frivolously or vexatiously—in which case the tribunal should have power to order the unsuccessful party to pay a sum towards the other's costs and expenses.

Reasons for Tribunal Decisions. As soon as possible after the hearing, the tribunal should send to the parties concerned a written notice of decision which should include the findings of fact, the reasons for the decision, and the rights of appeal against it.

Appeals Procedure. The Committee were "firmly of the opinion" that all decisions of tribunals should be subject to review by the Courts on points of law, except from a decision of the National Insurance Commissioner, the Industrial Injuries Commissioner, or National Assistance Appeal Tribunals, which should remain subject to review by *certiorari*.

II.—Present Working of Tribunals. - Recommendations.

From the general principles summarized above, the Committee turned to particular tribunals, discussing first the possibilities of amalgamating some, but putting forward only one such proposal : for the transference of the functions of family allowance referees to National Insurance local tribunals. The Committee commented as follows on the various tribunals :

County Agricultural Executive Committees. "We have heard substantial criticism of the County Committees, and . . . there is no doubt that the workings of the committees, as adjudicating bodies, are far from satisfactory . . . Their constitution as adjudicating bodies is in conflict with the principle of impartiality which we have enunciated, in that they are the delegates of the Minister . . .

"The criticisms we have received are fourfold : Substantial objection has been taken to the fact that these committees combine the functions of detective, prosecutor, and judge, so that a fair hearing of the case and an independent decision cannot result; it has been said that the predominantly local membership of the committees leads to abuses; their procedure has been assailed because before the hearing the farmer does not fully know the case against him, and because the committees are not required to give, and do not give, adequate reasons for their decisions. Finally, many witnesses have criticized the absence of any appeal against the making of a Supervision Order. We regard it as wholly undesirable that these committees should continue to exercise adjudicating functions in addition to their executive functions."

Recommendations : "If present policy of control over agriculture is to continue, new tribunals should be established, independent both of the Minister and of the County Committees, to perform the adjudicating functions now exercised by the County Committees. Appeal should lie from these tribunals to the existing Agricultural Land Tribunals, and in Scotland to the Scottish Land Court. It would be a mistake to dispense entirely with local membership, but its risks would be largely removed by the appointment in all cases of a chairman wholly independent of the area concerned, and with legal qualifications.

"In these tribunals it will be for the County Committee, as well as the farmer when the committee is proposing action against him, to submit evidence on the state of the land. The practice of withholding from the farmer the report of the committee's inspecting panel, to which practice objection is rightly taken, could therefore no longer arise.

"The tribunals should have the right to inspect the land on giving notice to the occupier. The parties concerned should be informed in advance of such inspection and be entitled to be present. The tribunals should be required to give adequate reasons for their decisions.

"We are unable to accept the view that Supervision Orders are not penal measures. A proposal to make a Supervision Order should be heard by one of the new tribunals, and an appeal should lie to an Agricultural Land Tribunal or to the Scottish Land Court . . ."

Agricultural Land Tribunals. "We have received little comment about these tribunals . . . They appear to be generally regarded as satisfactory."

Local Valuation Courts. "We have received no important criticism of these tribunals, but think it undesirable in principle that they should continue to be composed almost entirely of members of local authorities. Their numbers should be reduced; persons acting as chairmen should be independent of any local authority and should generally have legal qualifications. Members of local authorities should not hear any case relating to property within the electoral area in which they live or which they represent."

Lands Tribunal. "We have received little evidence and virtually no criticism of it."

Rent Tribunals. "We have received more criticism of these than of any other. The main criticisms . . . were that the quality of membership was insufficiently high, possibly because the fees offered were inadequate; that many did not have a legally qualified chairman; and that in general there were no valuers on them. General criticisms of procedure were that the tribunals were insufficiently judicial in handling cases and that reasoned decisions were rarely given. There was substantial criticism of the absence of appeal, either on merits or on a point of law."

Recommendations: "All chairmen of rent tribunals should have legal qualifications; panels from which tribunals are constituted should include valuers to serve when required; appeal should lie to an appellate tribunal consisting of a County Court judge or Sheriff, sitting with a valuer as assessor."

Tribunals concerned with National Insurance, National Assistance, and Family Allowances. Legal representation should be permitted before a National Insurance local tribunal when the chairman considered that the claimant could not satisfactorily put his case unless allowed to employ a lawyer. Such tribunals should sit in public except when a case involved disclosure of intimate personal or financial circumstances. In both National Insurance and Industrial Injuries cases all parties should have an automatic right of appeal to the appropriate Commissioner. National Assistance appeal tribunals should continue to sit in private, and legal representation before such tribunals should be permitted on the same basis as that recommended for Insurance local tribunals. The functions of Family Allowance referees should be transferred to National Insurance local tribunals, with an appeal to the National Insurance Commissioner.

N.H.S. Medical Service Committees. "The public interest does not require a public hearing [in cases before these committees] but both patients and practitioners should be prepared to substantiate statements on oath. Complainants should be entitled to apply for the assistance of an official representative at hearings."

National Health Service Tribunal. "This should in general sit in public. The right of appeal from the N.H.S. Tribunal to the Minister should be abolished, and the right of appeal from executive councils to the Minister in certain cases should be replaced by a right of appeal to the tribunal. As a safeguard for practitioners, appeals by individual complainants should be heard by the tribunal in private."

Conscientious Objectors' Tribunals. "It is particularly important that the general recommendations concerning the atmosphere of tribunal hearings and the publication of selected appellate decisions should be applied to these tribunals. An age-limit for members should also be considered."

Transport Tribunal. "There has been virtually no criticism of the constitution or working of this tribunal."

Compensation Appeal Tribunals. "These should be strengthened by vesting the appointment of both chairmen and members in the Lord Chancellor. There should be an appeal to the courts on a point of law."

Compulsory Land Purchase. - Conduct of Inquiries.

A further section of the report gave the Committee's recommendations on such administrative procedures as the holding of an inquiry or hearing on behalf of a Minister, and, in particular, the procedure for the compulsory purchase or acquisition of land.

The Committee emphasized that much of the dissatisfaction with procedures relating to land arose from the basis of compensation, and that objections to compulsory purchase would be far fewer if compensation were assessed at not less than market value. It commented in this connexion:

"Before the hearing takes place, fairness requires that those whose individual rights and interests are likely to be adversely affected by the action proposed should know in good time beforehand the case which they will have to meet. Statutory requirements should be amended to compel acquiring and planning authorities to prepare a written statement of their case before the inquiry. In acquisition cases, the statement should accompany the statutory notice of the proposal to owners and others. The individual would then know in good time the case of the public authority with which he was at issue.

"This alone would not be sufficient. Fair play requires that whenever possible some statement of the relevant ministerial policy should also be made available before the inquiry; but, as broad policy is something for which a Minister is answerable to Parliament alone, he should be free, when issuing such a statement, to direct that the whole or certain parts of it are not open to discussion at the inquiry. This power would avoid useless discussion of policy in the wrong forum. The object would be to give the individual an opportunity at the inquiry of directing his arguments not only to the case of his immediate opponents but to other considerations likely to weigh with the Minister."

The Committee recommended that inspectors conducting these inquiries should be placed under the control of a Minister not directly concerned with the subject-matter of their work. In England and Wales, the appropriate Minister should be the Lord Chancellor. This change, by no longer identifying the inspector in the minds of the objectors with the department of the deciding Minister, would emphasize impartiality at an important stage of the adjudication and do much to allay public misgiving. At the inquiry the initiating authority should be required to explain its proposals fully and support them by oral evidence. The code of procedure should be formulated by the Councils on Tribunals and made statutory.

In connexion with the compulsory purchase of land, development plans, planning appeals, and clearance schemes, a public inquiry should be held in preference to a private hearing unless for special reasons the Minister should decide otherwise. The inspector should have power to administer the oath and subpoena witnesses. Officials of the department of the deciding Minister should be required to give evidence if the inquiry was into a proposal initiated by that Minister, but not otherwise.

The Committee recommended that reasonable costs should generally be awarded to successful objectors and owner appellants, and that the Council on Tribunals should assess the basis of costs. They recommended also that the inspectors' subsequent reports should be published and made available in two parts: (*a*) summary of evidence, findings of fact and inferences of fact; and (*b*) reasoning from facts, including application of policy, and (normally) recommendations. The complete text of the report should accompany the Ministers' letter of decision and be available on request centrally and locally.

Except in time of emergency, threat of emergency, or special security cases, Service departments should adopt the same procedure as other departments if they wished to acquire land for their use i.e. they should give public notice and hold public inquiries.

Government Acceptance of Recommendations.

In his statement to the House of Commons on Oct. 31, referred to above, Mr. Butler announced the Government's acceptance of the "three guiding principles" of openness, fairness, and impartiality which, as the Franks Committee had emphasized, should govern the work of all administrative tribunals and inquiries. Specifically, the Government proposed (1) to set up a single Council on Tribunals (instead of two councils as recommended by the Franks Committee) which would be appointed by the Lord Chancellor and the Secretary of State for Scotland, exercise general supervision over the working of tribunals, and be consulted by the Government; (2) to remove present restrictions on the right to legal representation before tribunals; and (3) to ensure that chairmen of tribunals were appointed by the Lord Chancellor in England and Wales and by the Lord President of the Court of Session in Scotland, and that members of tribunals should generally be appointed by the Minister of the department concerned, after consultation with the Council of Tribunals.

Mr. Butler said that the Government had to bear in mind the need of a just balance between the claims of the citizen and those of the community as a whole. "Taking these into account," he added, "we expect to be able to accept wholly or substantially the great majority of the detailed recommendations in the report." The Home Secretary went on to enumerate those recommendations which the Government proposed to accept and those which it was unable to accept.

Recommendations accepted. These included the following, *inter alia:*

(i) As stated above, the right of legal representation would be allowed before all tribunals, save in exceptional cases. In reply to Mr. Paget (Lab.), Mr. Butler confirmed that this would also apply to Conscientious Objectors' Tribunals.

(ii) The Government agreed that chairmen of administrative tribunals should for the most part have legal qualifications. They did not, however, favour the dismissal of a satisfactory serving chairman because he was not so qualified.

(iii) The Government agreed in principle that the adjudicating functions at present exercised by County Agricultural Executive Committees should be entrusted to new independent tribunals from which appeals should lie to the Land Tribunal or the Scottish Land Court.

(iv) In addition, the Government also accepted the greater part of the recommendations on procedure relating to compulsory acquisition of land. As regards the recommendation that an acquiring or

planning authority should make available, in good time before the inquiry, a statement giving full particulars of its case, Mr. Butler promised that "Ministers concerned will in future require authorities to see that their case is properly set out; this will be obligatory."

(v) The Government also accepted in principle the recommendation that, wherever possible, a statement of the relevant policy should be made available to an appellant before an inquiry.

(vi) As regards the recommendation that most inspectors should be under the control of the Lord Chancellor, the Government took the view that the Minister of Housing and Local Government should retain his present responsibilities in this field—in which connexion Mr Butler pointed out that the Minister had to arrange for some 5,000 to 6,000 inquiries every year. Nevertheless, the Government recognized the importance of emphasizing the independence of the inspectorate. To meet the spirit of the recommendations, it was therefore proposed that the Minister should only appoint inspectors after consultation with the Lord Chancellor, and should dismiss them only with the Lord Chancellor's consent. The Government were ready to arrange for the publication of inspectors' reports, as recommended by the Committee.

(vii) The Government accepted, in general, the recommendations relating to the procedure to be followed at inquiries. Mr. Butler pointed out that since it was agricultural land which was mostly the subject of compulsory acquisitions, these recommendations would be of particular interest to farmers and owners of such land.

(viii) The Government believed that it was "absolutely right" that the Minister's letter of decision should set out in full the evidence, instances of fact, and the reasons for the decision. This was already the practice in some departments, and would be adopted in all.

Recommendations not accepted. (i) Mr. Butler dwelt in some detail on the Committee's recommendation that—save in time of emergency or threat of emergency—the Service departments should be required to adopt the same procedure as other departments before acquiring land for their use. Speed, he pointed out, was often vital to Service departments, and "it was not practicable in the world we live in to wait for an emergency before acting." For this reason "the Government must therefore reserve their position in that respect." Subject to this reservation, however, private interests should be given a statutory right to object and be heard when a Service department wished to acquire land. The hearing would normally be in private, and would be conducted by a person specially appointed by the Lord Chancellor or the Secretary of State for Scotland. The Government could not undertake to publish inspectors' reports in such cases.

(ii) The Government could not agree with the proposal that legal aid should be made available for certain applicants before tribunals. "It does not seem to us," Mr. Butler added, "that there is a sufficient case for extending the official scheme of legal aid to tribunals at present." Moreover, the proposal to reimburse a citizen for some part of legal costs incurred would be expensive, and might encourage the employment of lawyers where it was not fully justified.

(iii) The Government could not accept the recommendation that costs should be awarded to successful objectors or appellants. They recognized, however, that a need existed, and he (Mr. Butler) did not wish to make a final statement on this matter as yet.

In the ensuing debate M.P.s of all parties expressed general approval of the report and recommendations of the Franks Committee, though certain criticisms were made—notably by Labour members—on points of detail. Sir Frank Soskice (a former Labour Attorney-General) welcomed Mr. Butler's statement and commended the Franks Report as a whole, though pointing out that he could not commit the Opposition to acceptance of every one of its recommendations. Sir Lionel Heald (C.), another former Attorney-General, described the report as "a tremendous victory for the ordinary citizen over Whitehall," while Sir Patrick Spens (C.) said that Sir Oliver Franks had "done a great service to the country." In replying to the debate, Sir Reginald Manningham-Buller (the Attorney-General) pointed out that some of the recommendations accepted by the Government did not require legislation and would be given immediate effect; other recommendations would involve a variety of legislation, which it was hoped to introduce as speedily as possible.
(Times - Daily Telegraph - Manchester Guardian)

A. UNITED KINGDOM. — Housing Construction.

Figures published by the Ministry of Housing and Local Government on Jan. 31 showed that 301,000 permanent houses and flats were completed in Britain in 1957, compared with 300,625 (revised figure) in 1956. Of the 1957 total, 165,910 were built by local authorities, 126,455 by private builders (the highest number since the war), 2,018 by housing associations, and 6,707 by Government departments. The total number of permanent houses and flats completed in Britain since the end of the war was given as 2,841,965, of which 1,997,953 had been built by local authorities, 732,677 by private builders, 41,855 by housing associations, and 69,480 by Government departments.—(Ministry of Housing and Local Government) **(Prev. rep. 15420 A; 15696 C.)**

B. ISRAEL. — Industrial Policy. - Workers to share Control of Trade Union Enterprises.

The executive of the *Histadrut* (the Israeli General Federation of Labour) decided early in January to introduce, by stages, a scheme for the participation of workers in the management of enterprises owned by the Federation. The *Histadrut*, in addition to being the largest trade union in Israel, also owns many industrial plants.

It was stated that the scheme would start with the setting-up of joint councils on which labour and management would be equally represented; at a later stage the managements of the undertakings would themselves be re-established on the basis of equal representation for workers and managers. At first the new joint councils would work side by side with the Productivity Councils [which have been functioning in most *Histadrut* plants for several years], but after six months the two types of councils would be merged.

The joint councils would be empowered to decide on all matters affecting the enterprise except wages and social benefits, these two subjects being reserved to negotiations between Workers' Committees and the management concerned. In particular, the joint councils were expected to deal with production programmes, investment policy, purchase of equipment, plant expansion, reorganization, improvements in production methods, purchase of raw materials, selling prices, marketing policies, and finance.

The workers' representatives on the councils would be elected by their own colleagues, but members of the Workers' Committees would not be eligible. Each council would elect its own chairman. The new scheme would be on a trial basis for a period of two to three years.

The question of profit-sharing was also discussed by the *Histradut* executive, but no definite decisions were taken. The secretary-general of the *Histradut* (Mr. Lavon) said that while such a system would eventually be introduced, the time was not yet ripe for it and the executive had decided to leave the final decision to the Federation's central committee.
(Israel Government Press Office)

C. WESTERN GERMANY. — New State Secretary in Foreign Ministry.

It was announced in Bonn on Jan. 30 that Dr. Albert-Hilger van Scherpenberg had been appointed State Secretary in the Foreign Ministry in succession to Professor Walter Hallstein, following the latter's recent election as President of the Commission for the European Economic Community [see page 15958, second column.]

Dr. van Scherpenberg (58), a son-in-law of Dr. Schacht, is of Dutch origin. He joined the German Foreign Service under the Weimar Republic in 1926, served in London for eight years before the war, and remained in the Service during the Hitler regime until arrested for connexions with a resistance group. After the war he served in the Bavarian Economics Ministry until 1949, when he joined the Federal Ministry of Economics. Since 1953 he had been in charge of the trade policy department in the Foreign Ministry.

A reorganization of the Foreign Ministry was announced on Jan. 31 under which two Assistant State Secretaries were appointed—Dr. Dittmann (at present Consul-General in Hong Kong) and Herr Knappstein (Ambassador in Madrid). It was announced that Dr. Dittmann would be responsible for the political department, whilst Herr Knappstein would be in charge of administration and personnel and would also be responsible for legal, cultural, and protocol questions.
(Frankfurter Allgemeine Zeitung)

D. UNITED KINGDOM. — National Savings in 1957.

The National Savings Committee announced on Jan. 6 that savings during 1957 totalled £1,665,000,000, compared with £1,701,000,000 in 1956, and withdrawals £1,589,000,000 (the highest on record), against £1,573,500,000 in 1956. The excess of savings over withdrawals in 1957 thus amounted to £76,000,000 (£127,500,000 in 1956), being the lowest since 1953. The sum remaining invested at Dec. 31, 1957 was £6,246,000,000.—(Times) **(Prev. rep. 15363 A.)**

E. NEW ZEALAND. — Income-Tax Rebate approved by Parliament.

The N.Z. Parliament approved on Jan. 31 a Bill amending the tax law to allow a rebate of £100 where applicable on income-tax demands due in February—thereby implementing the Labour Party's pre-election pledge. The Bill, which involved tax rebates aggregating £NZ.19,000,000, was opposed by the National Party.—(The Dominion, Wellington)
(Prev. rep. 15907 A.)

F. AUSTRALIA - Air Agreement with Britain.

The Anglo-Australian air agreement which had been initialled on Oct. 4, 1957, was formally signed in London on Feb. 7 by Mr. Harold Watkinson and Senator Paltridge, the respective Ministers for Transport and Civil Aviation.—(Times)
(Prev. rep. 15829 C; 15986 C.)

A. NUCLEAR WEAPON TESTS. — American, Russian and British Tests in 1957.

A number of nuclear and thermo-nuclear weapon tests were carried out by the United States, the Soviet Union, and Great Britain at intervals from the spring of 1957 until the end of the year. These tests, summarized below, comprised (*a*) a series of 24 tests (instead of nine as originally announced) carried out by the United States at the Nevada proving-grounds, beginning on May 28 and ending on Oct. 7; (*b*) a number of Soviet tests during the last four months of the year, additional to the series which took place in April (see 15540 A); and (*c*) three British tests at Maralinga (Australia) in September and October, and a fourth at Christmas Island in November.

American Nuclear Tests.

Many different types of device were used in the 24 Nevada tests, a number being exploded from the tops of steel towers and others from captive balloons at varying heights. Military observers and press correspondents from many NATO countries witnessed many of the tests, the larger and more spectacular of which are described below:

(i) In the fifth test (June 24), in which a device was suspended from a balloon at a height of 700 feet, the blast was so violent that it wrenched doors off hinges and cracked walls of concrete blockhouses 14 miles from the point of explosion. The detonation—carried out in broad daylight—produced a "double mushroom" cloud rising to eight miles, a blinding flash visible 80 miles away, and blast effects felt in parts of California 200 miles from the proving-grounds. Experiments were made in the use of protective clothing against flash-burns and radiation, blast effects on shelters, and a variety of packaging material designed to protect food from radioactive fall-out. For these purposes various types of protective clothing were wrapped round some 800 anaesthetized pigs, and the surrounding area was studded at various distances with small concrete shelters, mostly of the dug-in "cupola" type. Nearly 1,000 troops, Civil Defence officials and observers occupied trenches some five miles from the explosion. The *New York Times* stated that the nuclear device was "somewhat larger than the atomic bombs used in World War II."

(ii) The most powerful explosion of the series, and also the most powerful in the United States to date, occurred on July 5 when a nuclear device was exploded from a captive balloon at 1,500 feet. The device was described as "four times as potent as the World War II bombs dropped in Japan." A tremendous flash of light was seen in San Francisco and Los Angeles (respectively 350 and 300 miles away); shock waves were felt at distances of hundreds of miles; and a gigantic orange-red fireball was followed by the biggest atomic cloud ever seen over Nevada, which rose for ten minutes before dispersing. Despite the violence of the explosion, radioactive fall-out was at a minimum and no ill effects were suffered by 2,000 Marines occupying dug-in trenches three miles from "ground zero."

(iii) The first U.S. rocket with an atomic warhead was fired on July 19—an air-to-air weapon (known as the *Genie*) launched from a fighter plane at an imaginary enemy. The U.S. Air Force described the device as "opening a new dimension" in aerial warfare and "the greatest advance since radar," but no details were disclosed except that it had no built-in guiding mechanism. The rocket—launched by remote control and not by the pilot of the plane—exploded at a height of 20,000 to 30,000 feet, causing an explosion of dazzling brilliance and great force.

(iv) In the 15th test on Aug. 31, an atomic device twice as powerful as the bomb dropped on Hiroshima completely vaporized the 700-ft. tower from the top of which it was detonated. A brilliant blue light was visible for hundreds of miles and was clearly seen in San Francisco and Los Angeles, while a mushroom cloud soared to 35,000 feet. Some 8,000 troops—including a Canadian infantry platoon—occupied dug-in trenches five miles from "ground zero"; shortly after the detonation 700 infantrymen in protective clothing were flown by helicopter into the affected area.

Three of America's leading nuclear scientists—Dr. Edward Teller, Dr. Ernest Lawrence and Dr. Mark Mills—informed President Eisenhower on June 24, 1957, that the U.S.A. was able to produce a hydrogen bomb almost free of radioactive fall-out. At a press conference two days later, the President said that the scientists had told him that the point had been reached at which an H-bomb could be made with 96 per cent less fall-out than was generated in the tests held in 1954; within four or five years an absolutely "clean" bomb could be produced which would have no fall-out beyond the heat and blast range of the bomb itself.

In the 23rd biennial report of the U.S. Atomic Energy Commission, issued on Jan. 31, 1958, it was announced that a new series of nuclear tests would be held at Eniwetok atoll in the spring, beginning in April.

The report emphasized that the United States had repeatedly declared its willingness to suspend nuclear tests as part of a general disarmament agreement, but stressed that continued development of nuclear weapons was essential to the defence of America and the free world until such an agreement was attained. It was stated that the Eniwetok tests would "advance the development of weapons for defence against aggression whether airborne, missile-borne, or otherwise mounted"—the first official mention of efforts to neutralize missile weapons. The report also referred to the progress made in reducing radioactivity after nuclear detonations, and stated that the further development of the "clean" bomb would be one of the aims of the Eniwetok tests.

Russian Nuclear Tests.

Following the Soviet announcement of Aug. 26 that an inter-continental ballistic missile had been developed and that a new series of nuclear tests had begun (see 15744 A), the U.S. Atomic Energy Commission issued statements on Sept. 9, Sept. 24, Oct. 9, and Dec. 28 reporting tests of Soviet nuclear and thermo-nuclear weapons. The only Soviet statement during this period was a Tass announcement that a "powerful hydrogen warhead of a new type" had been tested in the Soviet Union on Oct. 6; it was stated that the device had been exploded at a great height and that the test was successful, no further details being given. The Japanese Meteorological Office announced on Oct. 7 that shock waves registered at ten Japanese observatories indicated that the U.S.S.R. had exploded a nuclear weapon which was probably more powerful than ten megatons.

British Nuclear Tests.

Three British atomic devices were tested at the Maralinga proving-grounds in South Australia on Sept. 15, Sept. 25 and Oct. 9. The first two were detonated from the top of a steel tower, while the third—a weapon of exceptional power known as the *Gentleman*—was suspended from a tier of three barrage balloons at a height of 1,000 feet. The tests were observed by over 1,000 scientists and observers from Britain, Australia, Canada, and Allied countries.

The *Gentleman*—described as a tactical weapon of rectangular shape—caused a tremendous explosion felt many miles distant, a great fireball being followed by a mushroom cloud into which Australian airmen flew—only seven minutes after the detonation—to collect samples of atomic dust. The device was described as the most powerful yet detonated in Australia, and as having a force equivalent to more than 10,000 tons of T.N.T. Radioactive fall-out, however, was minimal.

A British nuclear weapon reported as in the megaton range (i.e. equivalent to 1,000,000 tons of T.N.T.) was exploded at high altitude in the area of Christmas Island (Central Pacific) on Nov. 8. The bomb was dropped from a Vickers *Valiant* which was specially treated with white anti-thermal radiation paint (which acts as a heat reflector) and fitted with steel windows to protect the crew from glare. Radioactive fall-out was described as negligible. The test was carried out by a task force under Air Vice-Marshal W. E. Oulton, with Mr. (now Sir) William Cook as scientific director. The British Government had previously warned all shipping against entering an area of 63,000 square miles round Christmas Island, which was declared a danger zone until further notice.

Mr. Nehru's Appeal to America and Russia for Suspension of Tests. - Replies of Marshal Bulganin and President Eisenhower.

In a statement issued on Nov. 28, the Prime Minister of India appealed to the United States and the U.S.S.R. to "stop all nuclear test explosions" and bring about "effective disarmament." Mr. Nehru expressed his conviction that "it is in the power of America and Russia to solve the crisis and save humanity from the ultimate disaster which threatens it."

Mr. Nehru's statement continued: "Our earth has become too small for the new weapons of the atomic age. While man in the pride of his intellect forces his way into space and pierces the heavens, the very existence of the human race is threatened. There are enough weapons of mass destruction already to put an end to life on earth. Today America and Russia possess them in abundance, and Britain also has them. Tomorrow it may be that other countries will possess them . . . No country, no people, however powerful they might be, are safe from destruction if this competition in weapons of mass destruction continues.

"Apart from these dangers ahead, the civilization which thousands of years of human effort have built up is being corroded and undermined by fear and hatred . . . All the peoples of the world have the right to peace and security. They can only preserve these rights by living peacefully together and solving their problems by peaceful methods. They differ in their creeds, beliefs, and ideologies. They cannot convert each other by force or threats of force, for any such attempt will lead to catastrophe for all. The only way is to exist peacefully together in spite of differences, and abandon the policy of hatred and violence. The moral and ethical approaches demand this. But, even more so, practical common sense demands it. I have no doubt that this can be done. I have no doubt that America and Russia have it in their power to put an end to this horror that is enveloping the world . . ."

The text of Mr. Nehru's statement was conveyed to President Eisenhower and Marshal Bulganin on the same

date in the form of letters from the Indian Prime Minister. Marshal Bulganin replied to Mr. Nehru on Dec. 10 and President Eisenhower on Dec. 15.

Marshal Bulganin said that the Soviet Union had considered Mr. Nehru's appeal "with close attention and sympathy" and that Mr. Nehru's "alarm for the destiny of mankind . . . is understandable to us." In the course of a lengthy letter the Soviet Prime Minister recapitulated his Government's views on international problems in general and the disarmament question in particular; reiterated the allegations that the Western Powers were pursuing a policy of "arms race," "cold war," "aggressive blocs" and "colonialism"; and attacked NATO, SEATO, the Baghdad Pact, the "Eisenhower doctrine," and what Marshal Bulganin described as the "Eisenhower-Macmillan doctrine of inter-dependence." A recapitulation of the Soviet disarmament proposals, and a reaffirmation that the U.S.S.R. would not participate in the enlarged U.N. Disarmament Commission for reasons previously stated, were followed by renewed allegations that the Western Powers were seeking "to impose their will on others by force or threat of force." After describing Mr. Nehru's appeal as "an important and serious initiative which could be ignored only by those who are indifferent to the destinies of millions of people," Marshal Bulganin said that his Government were "ready to declare solemnly that the Soviet Union will not stage any explosions of nuclear weapons from Jan. 1, 1958, if the United Kingdom and the United States . . . also express their agreement to cease tests from the same date."

President Eisenhower replied to Mr. Nehru as follows: "I have read with great sympathy your earnest and eloquent appeal of Nov. 28. This is a matter which has concerned me deeply for a very long time. In the days immediately following the end of World War II the United States proposed that the dreadful power of the atomic bomb, which we alone then possessed, be forever denied all nations. We hoped, instead, that the wonders of the nuclear age could be devoted wholly to the uses of peace. This plan was refused and we were left with no choice but to maintain our armed strength . . .

"We have repeatedly stated our readiness, indeed our anxiety, to reduce the possibility of war through arms regulation and control, to stop tests of nuclear weapons, and to devote a part of our huge expenditures for armaments to the great causes of mankind's welfare . . . We earnestly believe that the plan which we joined with the United Kingdom, France and Canada in suggesting at the London disarmament talks offers a meaningful opportunity for removing fear and gaining international trust. It is a source of great personal regret to me that these proposals have not so far been found acceptable by the Soviet Union even as a basis for negotiations.

"In these circumstances, I have been able to reach no other conclusion than that, for the time being, our security must continue to depend to a great degree on our making sure that the quality and quantity of our military weapons are such as to dissuade any other nation from the temptation of aggression. The United States, I can assure you unequivocally, will never use its armed might for any purpose other than defence.

"I know that the testing of nuclear weapons is of understandable concern to many. I have given this matter long and prayerful thought. I am convinced that a cessation of nuclear weapons tests, if it is to alleviate rather than merely to conceal the threat of nuclear war, should be undertaken as part of a meaningful programme to reduce that threat.

"We are prepared to stop nuclear tests immediately in this context. However, I do not believe that we can accept a proposal to stop nuclear experiments as an isolated step, unaccompanied by any assurances that other measures—which would go to the heart of the problem—would follow . . . To stop these tests at this time, in the absence of knowledge that we can go on and achieve effective limitations on nuclear weapons production, as well as a measure of assurance against surprise attack, is a sacrifice which we could not in prudence accept. To do so could increase rather then diminish the threat of aggression and war.

"I believe that bolder and more far-reaching measures are required. Specifically, I believe that any Government which declares its desire to agree not to use nuclear weapons should, if they are sincere, be prepared to agree to bring an end to their production. Agreement to devote all future production of fissionable material to peaceful uses is, as I see it, the most important step that can be taken . . ."

Scientists' Petition to U.N. Secretary-General.

A petition signed by over 9,000 scientists from 44 countries, urging immediate action to stop the testing of nuclear weapons by international agreement, was handed to the U.N. Secretary-General (Dr. Hammarskjöld) on Jan. 13, 1958, by Dr. Linus Pauling of the California Institute of Technology, recipient of the Nobel Prize for Chemistry in 1953. The signatories included 32 Nobel prizewinners in addition to Dr. Pauling.

The petition declared: "Each nuclear bomb test spreads an added burden of radioactive elements over every part of the world. Each added amount of radiation causes damage to the health of human beings all over the world, and causes damage to the pool of human germ-plasm such as to lead to an increase in the number of seriously defective children that will be born in future generations.

"So long as these weapons are in the hands of only three Powers, an agreement for their control is feasible. If testing continues, and the possession of these weapons spreads to additional Governments, the danger of a cataclysmic nuclear war through the reckless action of some irresponsible leader will be greatly increased . . . As scientists we have knowledge of the dangers involved, and therefore a special responsibility to make those dangers known. We deem it imperative that immediate action be taken to effect an international agreement to stop the testing af all nuclear weapons."

The signatories included 2,705 from the United States, 1,141 from Japan, 304 from Great Britain, 216 from the Soviet Union, and 65 from France.

Of the 33 Nobel prizewinners who signed the petition, 11 were American, eight German, four British, two French, two Swedish, two Swiss, one Belgian, one Indian, one Japanese, and one Russian. They included Professors Max Born, Werner Heisenberg, and Otto Hahn (Germany), Bertrand Russell, Lord Boyd-Orr, and Sir Henry Dale (Great Britain), Dr. C. V. Raman (India), Dr. Hideki Yukawa (Japan), Dr. Albert Schweizer and Professor Frédéric Joliot-Curie (France), Dr. Harold Urey, Dr. Otto Loewi, and Dr. G. H. Whipple (U.S.A.), and Dr. Nikolai Semonov (Soviet Union).

Dr. Pauling said that the signatories included 101 members of the National Academy of Sciences in the United States, 216 members of the Academy of Sciences of the U.S.S.R., and 35 Fellows of the Royal Society of London.—(New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau - The Statesman, Calcutta - Soviet Embassy Press Department, London) **(Prev. rep. 15744 A; 15540 A.)**

A. PAKISTAN. — Cabinet Changes.

A number of changes in Mr. Firoz Khan Noon's Cabinet was announced in Karachi between the end of December and the beginning of February, as follows:

(1) Mr. M. A. Qizilbash, the Minister of Industry and Commerce, also took over the portfolio of Parliamentary Affairs, hitherto held by the Prime Minister (announced on Dec. 27, 1957).

(2) Mr. H. M. B. Soomro, hitherto Minister of State for Defence, Economic Affairs, Rehabilitation, Information and Broadcasting, Kashmir Affairs, Law, and Parliamentary Affairs, was appointed a Cabinet Minister in charge of Rehabilitation, relinquishing the other portfolios (Jan. 20).

(3) Mr. Abdul Aleem, Minister of Works, Labour, and Minority Affairs, took over the additional portfolio of Information and Broadcasting, whilst Mr. K. K. Dutta [not Datta, as previously spelled], hitherto Minister for Health and Education, became Minister of Education and Law, relinquishing the Health portfolio (Jan. 21). The Information, Broadcasting, and Law portfolios were previously held by the Prime Minister.

(4) Mr. Mahfuzul Huq was sworn in as Minister of Health and also took the portfolio of Village Aid, which was transferred from the Ministry of Economic Affairs (Jan. 24).

(5) Mr. Basanta Kumar Das was sworn in as Minister of Education and Labour, the two portfolios having previously been held by Mr. Dutta and Mr. Aleem respectively, as stated under (3) above.

Of the two new members of the Government, Mr. Mahfuzul Huq sits as an Independent in the National Assembly, whilst Mr. Das is the leader of the Congress Party in the Assembly. The appointment of Mr. Das brought the representation of the Hindu minority in the Cabinet to two members.
(Pakistan High Commissioner's Office, London)
(Prev. rep. 15936 A.)

B. ISRAEL. — New Chief of Staff.

It was announced on Jan. 26 that the Israeli Chief of Staff, Major-General Moshe Dayan, had been released from the post at his own request and would be succeeded by Brigadier Haim Laskov, who would assume the rank of major-general. It was stated that General Dayan would revert to the rank of brigadier in the Israel Defence Forces, but had been granted two years' leave of absence to resume his studies at the Hebrew University of Jerusalem.

Major-General Laskov (37) was born in Russia and came to Palestine with his parents when only five years of age. During the Second World War he enlisted in the British Army, served with the Royal East Kent Regiment, was commissioned in 1942, and commanded a platoon of the newly-formed Jewish Brigade during the Italian campaign in 1944. In the Israeli Army he held the successive posts of Director of Training and Commander of the Air Force, and after a two-year period of study at Oxford University he became Deputy Chief of Staff in 1955. In the Sinai campaign Brigadier Laskov directed the fighting in the northern sector as Commander of the Armoured Corps.

Brigadier Dayan, who directed the Sinai campaign against Egypt in November 1956, had been Chief of Staff since 1953.
(Israel Government Press Office)

A. UNITED STATES. — Government's Four-year Programme for Development of Education. - President Eisenhower's Message. - Office of Education's Report on Soviet Education. - Report of President's Committee on Scientists and Engineers.

A four-year programme for the development of education, and particularly of scientific and technical education, was approved by President Eisenhower on Dec. 30, 1957, for submission to Congress. Its main features were as follows :

(1) About 10,000 university scholarships would be awarded each year for four years on a basis of ability and need, and would be allocated among the States on a population basis. The scholarships would be granted in all subjects, but preference would be given to students with a good grounding in science and mathematics.

(2) 1,000 graduate fellowships would be granted in the first year, and 1,500 in each of the three succeeding years, to encourage able students to enter university teaching.

(3) Direct grants of up to $125,000 would be made to graduate schools to help meet the cost of expanding their teacher-training programme.

(4) Financial assistance would be given for the establishment of training centres for teachers of languages, particularly those of Asia, Africa, and the Middle East.

(5) A joint fund would be set up by the Federal and State Governments to provide higher salaries for science and mathematics teachers in secondary schools.

(6) A grant of $64,500,000 a year would be made to the National Science Foundation towards the cost of programmes for the improvement of scientific research, training, and teaching.

The total cost of the programme over four years was estimated at $1,800,000,000, of which $1,000,000,000 would be provided by the Federal and $800,000,000 by the State Governments. Federal aid would normally be granted to the States' education authorities on a "matching basis"—i.e. the State would be required to make a contribution equal to that of the Federal Government. At a press conference on Dec. 30, Mr. Folsom (Secretary of Health, Education, and Welfare) said that the programme was partly based on reports submitted several months before, although the Soviet Union's successes in the development of satellites and guided missiles had added to its urgency.

Office of Education's Report on Soviet Education.

Two official reports emphasizing that scientific and technical education was more advanced in the Soviet Union than in the U.S.A. had previously been published in November. The first of these was a general survey of Soviet education published by the Federal Office of Education on Nov. 10, which is summarized below.

Since 1927, the report stated, the number of pupils in Soviet primary and secondary schools had increased from 11,500,000 to over 30,000,000 ; the number of students in technical schools from 189,000 to 1,961,000 ; and the number of university students from 169,000 to 1, 867,000. In 1956 1,500,000 pupils had completed their secondary school training, as against 1,300,000 in the U.S.A.

Although the normal course of primary and secondary education in the Soviet Union covered only 10 years, as against 12 in the U.S.A., the report emphasized that the Soviet secondary school pupil was better educated after 10 years than the American high school pupil after 12, and had studied more science than the great majority of U.S. university students. A Soviet child began studying natural science in his fourth year at school, algebra and geometry in the sixth, and trigonometry and an introduction to calculus in the ninth and tenth. After 10 years at school a Soviet pupil had studied mathematics for 10 years, physics and biology for five, chemistry for four, and astronomy for one. In the U.S.A., on the other hand, after 12 years fewer than one-third of the pupils had studied chemistry for a year, one-fourth had studied physics, one-third had studied algebra for more than a year, and one-seventh had studied advanced mathematics.

In the Soviet Union 40 per cent of the total 10-year syllabus for primary and secondary schools had been devoted to science until 1955, when this was increased to 53 per cent. After science the greatest emphasis was laid on foreign languages ; 40 per cent of secondary school pupils studied English, 40 per cent German, and 20 per cent French, Spanish, or Latin, whilst in higher educational institutions 65 per cent of the pupils studied English. In the U.S.A., the number of high school or university students who studied Russian was negligible.

Soviet university students, the report continued, were encouraged to specialize in branches of science and technology by means of subsidies and subsistence grants. 80,000 students took degrees in engineering each year compared with 30,000 in the U.S.A., and 70 per cent of the higher degrees granted by Soviet universities were in scientific and technological fields.

Among the reasons for Soviet progress in education, the report pointed out, was the high prestige enjoyed by the teaching profession. As there was no shortage of teachers, the size of the average class was 17 ; in the U.S.A., however, 8,000 more high school teachers were needed, and the size of the average class was 27. Soviet schools suffered from a serious lack of classroom space, and most of them operated on a shift basis.

Mrs. Eleanor Lowman, the author of the report, alleged on Nov. 20 that many statements in it had been "suppressed" or "distorted" before publication, e.g. that education in the Soviet Union was free at all levels ; that teachers were paid for a three-hour day, which enabled them to earn more for double shifts, laboratory work, and correction of examination papers, that they were obliged to take periodical refresher courses ; and that a Soviet student after five years' higher education was more advanced in mathematics than an American student with the degree of doctor of mathematics, whilst his training in other subjects had been equally thorough. Mrs. Lowman also alleged that most passages describing weaknesses in the Russian system had also been deleted. The Department of Health, Education and welfare stated in reply that in the published version it had only sought "to improve the original report."

Report of President's Committee on Scientists and Engineers.

The report of the President's Committee on Scientists and Engineers, published on Nov. 30, gave warning that there was little doubt of Soviet superiority over the U.S.A. in science in five or 10 years' time. The committee was established in April 1956 to "foster the development of more highly qualified technological manpower," and consists of representatives of educational, scientific, and industrial organizations. Its chairman is Dr. Bevis, President Emeritus of Ohio State University.

In a letter sent to President Eisenhower with the report, Dr. Bevis said that the committee had felt "very real concern," long before the launching of the Soviet satellites, over "the Soviet Union's mounting challenge to our technological leadership." He continued : "Russia has made extraordinary progress. During the 1930's Russia imported American engineers and American machinery for such relatively simple tasks as building dams. Today Russia has more scientists, engineers, and technicians than the United States, and is graduating more than twice as many each year. Competent American observers report that in certain fields Russian scientific work is comparable in quality to that done here. Certainly the manpower and effort devoted to research and to the education of future scientists exceeds our own. The rate of Russian progress in most scientific fields is so rapid that, unless we broaden and strengthen our own efforts, there is little question of Soviet superiority five or ten years from now."

The report stated that "the Soviet Union is concentrating on the production of highly qualified scientists, engineers, and technicians with a singleness of purpose unmatched in any other country in the world. The Russians channel large numbers of students into engineering and scientific institutions. Their training is sound and modern. The favourable status and living conditions enjoyed by technical graduates do much to stimulate their efforts. Russian scientists and technologists are highly competent and productive. They constitute a challenge which we cannot ignore."

Apart from this fact, the report continued, the "scientific revolution" now in progress meant that the U.S.A. would "need many more highly trained and highly skilled scientists and engineers than we have ever before thought necessary." The committee therefore proposed to set up local action groups to encourage co-operation between the schools, civic organizations, industry, and the trade unions for the improvement of educational standards. The principal objectives of this programme would be to improve the quality of science and mathematics teaching, to encourage young people to continue their education, and to persuade a higher proportion of them to choose science or engineering as a career.

The report emphasized that "a real and permanent improvement in the quality of teaching depends on a substantial rise in the social and economic status of teachers. So long as elementary and secondary school teachers are grossly underpaid in comparison to those with similar training and responsibility in other fields, it will be difficult to secure and to retain the quality of teaching staff which our national needs demand. This will be particularly true of those skilled in science or mathematics, for whom there is such a strong competing demand from industry." Among measures proposed for the improvement of science teaching were the provision of part-time posts for teachers in laboratories or industry ; temporary exchanges between industrial scientists and teachers ; provision of better laboratory facilities ; and revision of science and mathematics curricula.

The committee proposed to make information on scientific and engineering careers available to students and parents through the schools, local action groups, and press, radio and television publicity. Drawing attention to the shortage of technicians needed for routine operational or maintenance work, the report suggested that technical schools and similar institutions should give more emphasis to two-year courses for students with scientific aptitudes who did not wish or were unable to undertake a degree course, or whose abilities were practical rather than academic.

President Eisenhower's Education Message.

The four-year Federal programme was implemented in the Education Message which President Eisenhower sent to Congress on Jan. 27, 1958. It re-stated the various provisions mentioned above but put the total cost at $1,000,000,000, of which the Federal Government would provide $1,000,000,000 and the States $600,000,000. For the first year (1958-59) the

programme requested Federal allocations of $144,859,000, to be distributed by the Department of Health, Education and Welfare, and $78,900,000 for grants to be made by the National Science Foundation to institutions of higher education.

The President's message laid emphasis, *inter alia*, on the need for more teachers of science and mathematics; for encouragement of science as a career; and for improving the teaching of foreign languages. In the latter connexion it was stated that "the American people generally are deficient in foreign languages, particularly those of the emerging nations in Asia, Africa, and the Near East." Stress was accordingly laid on the need to improve the teaching of foreign languages, including "languages which are important today but which are not now commonly taught in the United States." (New York Times - New York Herald Tribune - Times)

A. UNITED KINGDOM. — Rochdale By-election.

Polling took place at Rochdale on Feb. 12 in the by-election caused by the death of Lieutenant-Colonel Wentworth Schofield (Conservative). The Labour Party won the seat from the Conservatives in a three-cornered contest, the result being as follows:

McCann, John (Labour)	22,133
Kennedy, Ludovic (Liberal)	17,603
Parkinson, J. E. (Conservative) ..	9,827
Labour gain from Conservative. Majority	4,530

Figures at the general election were: Lieut-Colonel W. Schofield (C.) 26,518; J. McCann (Lab.) 24,928—Conservative majority, 1,590.

The Labour candidate received 44.7 per cent of the votes, the Liberal candidate 35.5 per cent, and the Conservative candidate 19.8 per cent, whereas at the general election the Conservative candidate received 51.5 per cent and the Labour candidate 48.5 per cent in a straight fight. The Conservative proportion of the poll thus dropped by 31.7 per cent, and the Labour proportion by 3.8 per cent. The Liberals had not contested Rochdale since 1950, when their candidate polled 10,042 votes in a three-cornered contest.

80.19 per cent of the electorate voted in the by-election, compared with 82.81 per cent at the general election. The total electorate numbered 61,809, a decrease of 317 since the general election.

Lieutenant-Colonel Wentworth Schofield (66), who died on Dec. 16, 1957, had represented Rochdale since 1951. An authority on cotton trade administration, he played a leading part in forming the Yarn Spinners' Association, was a member of the general committee of the Federation of Master Cotton Spinners' Associations, and represented the interests of the Lancashire cotton industry at many conferences in Britain and abroad. He served in the Territorial Army for 33 years—with the Manchester Regiment in the 1914-18 War and as a battalion commander in the Royal Tank Regiment from 1939-45. Colonel Schofield promoted a private member's Bill—the Advertisements (Hire Purchase) Bill, enacted in July last—which required hire purchase advertisements to specify all details of their terms.

The Rochdale by-election was the first to be featured on television, several programmes being arranged by Granada Television—an independent T.V. company with its headquarters in Manchester—after the Conservative, Labour and Liberal parties had given their consent.

The three parties agreed to the televising of the by-election—as had been requested by the Granada company—after they had assured themselves (*a*) that it was legally permissible under the provisions of the Television Act, 1954, and the Representation of the People Act, 1949; and (*b*) that the proposed programmes would be accepted as fair by all three parties concerned. The Conservative Central Office took counsel's opinion on the matter before advising Mr. Parkinson that he would be "within the law" in participating in the T.V. programmes.

The Television Act (which governs independent T.V.) gives permission for political subjects and events to be televised providing that strict impartiality and balance are maintained, and that all the parties concerned agree to take part in the programmes. The Representation of the People Act (Section 63) lays down that the costs of the promotion of any candidature shall be shown in the return of electoral expenses. The counsel consulted by the Conservative Party (Mr. Charles Russell, Q.C.) gave it as his opinion that the "proposals put forward by Grenada T.V. are legal under Section 63 of the Representation of the People Act, providing the individual programmes are balanced in accordance with the provisions of the Television Act."

The three candidates accordingly took part in a televised debate at Rochdale Town Hall, and also answered questions which had been submitted to them beforehand; the proceedings were timed by stop-watch, each candidate being allotted exactly the same time for short speeches and for replies to questions. Outside broadcasts were also arranged, including street interviews with voters, the counting of votes, and the declaration of the result.

The result of the Rochdale by-election aroused nation-wide interest in view of the large poll by the Liberal candidate, Mr. Ludovic Kennedy, and the heavy drop in the Conservative vote. Mr. Kennedy (38), a newscaster for Independent Television News, and a well-known playwright and author, was released from his television contract after he had accepted the Liberal nomination. He is married to Miss Moira Shearer, the ballerina and stage and film actress, who helped her husband in the by-election.

The Rochdale result was warmly welcomed by Mr. Jo Grimond, Lady Violet Bonham-Bonham, and other Liberal leaders as evidence of a widespread Liberal revival in the country as a whole, following the large Liberal votes at previous by-elections—e.g. Ipswich (see 15821 E), Gloucester (15756 B), North Dorset (15618 B) and Edinburgh South (15572 A). The Liberal Party Council passed a resolution on Feb. 15 declaring that "the next general election will provide the Liberal Party with its finest opportunity for 30 years," and calling for the largest possible number of Liberal candidates at that election

Mr. Hugh Gaitskell, Leader of the Opposition, described the Rochdale result as "a fine victory for Labour" and "a catastrophe for the Tories," and agreed that "the Liberals have done very well." In the House of Commons on Feb. 13 he asked Mr. Butler whether, "in view of the catastrophe that has overtaken the Conservative Party and the decline in the Conservative vote from over 50 per cent to under 20 per cent," he (Mr. Butler) did not think it "desirable that . . . Parliament should be dissolved immediately?" Mr. Butler replied that "we propose to continue with our normal business for a very long time ahead," adding that Mr. Gaitskell had "little reason for self-satisfaction" in view of the fact that the Labour candidate at Rochdale had been elected on a minority vote.

Mr. Macmillan, who returned to London on Feb. 14 from his six-weeks' Commonwealth tour, described the Rochdale result as "disappointing" but said that he was "not discouraged" and that the Government proposed "to go on and do our job." Lord Hailsham (chairman of the Conservative Party), speaking in Glasgow on Feb. 14, said that the by-election represented "the loss of a small engagement in the course of a campaign for the continued survival and greatness of Britain," adding that "to lose a battle is not the same thing as to lose a war" In the course of a bitter attack on the Liberal Party he asserted that the Conservatives had lost Rochdale because of the intervention of a Liberal candidate.

Rochdale was the third seat to be gained by the Labour Party since the general election in 1955, North Lewisham having been won from the Conservatives (see 15372 C) and Carmarthen from the Liberals (see 15404 B) in February 1957. As at Rochdale, Labour won North Lewisham and Carmarthen on a minority vote in three-cornered contests—an Independent Loyalist standing at Lewisham and a Welsh Nationalist at Carmarthen.

Mr. McCann (47), the new Member for Rochdale, is a diesel engineer by profession and a member of Eccles Borough Council. He unsuccessfully contested Rochdale at the last general election.—(Times - Daily Herald - Daily Telegraph - Manchester Guardian) **(Prev. rep. By-elections, 15903 A.)**

Note. Rochdale was previously a strong Liberal constituency, having been represented by that party from the beginning of the century until 1918, when it was won by a Coalition Unionist candidate in a five-cornered contest. It was won for the first time by Labour in 1922, regained by the Liberals in 1923, and was again represented by Labour in 1924 and 1929 before being won by the Conservatives in 1931. In 1935, 1945 and 1950 it returned a Labour member, but was won by the late Colonel Schofield in 1951 and held for the Conservatives at the last general election. (Times).

B. INDIA. — New Naval Chief of Staff.

It was announced in Delhi on Feb. 3 that Rear-Admiral R. D. Katari, Flag Officer Commanding, Indian Fleet, would succeed Vice-Admiral Sir Stephen Carlill as Chief of Naval Staff towards the end of April, with the rank of vice-admiral. Vice-Admiral Katari will be the first Indian to assume the highest command in the Indian Navy.

It was also announced that Commodore A. Chakravarti, Deputy Chief of Naval Staff, would succeed Rear-Admiral Katari as Flag Officer Commanding, Indian Fleet, in March, with rear-admiral rank, whilst Captain A. K. Chatterjee would succeed Commodore Chakravarti on Feb. 7, with the rank of commodore.—(The Hindu, Madras) **(Prev. rep. 15737 A.)**

C. AUSTRALIA - EGYPT. — Release of Sequestrated Australian Property in Egypt.

It was announced in Cairo on Jan. 29 that the Egyptian Government would release Australian property worth about £A.60,000 which had been seized during the Suez crisis of 1956. An Egyptian spokesman said that the Australian owners would be allowed to enter Egypt to retrieve their assets.

Qantas Empire Airways' Sydney to London service was operated *via* Cairo on Feb. 2, for the first time since Oct. 1956.

(Australian News and Information Bureau)

A. POLAND - SOVIET UNION. — Foreign Ministers' Meeting. - Soviet Support for "Rapacki Plan." - M. Khrushchev's Visit to Poland.

The Polish and Soviet Foreign Ministers (respectively M. Rapacki and M. Gromyko) met in Moscow from Jan. 28 - Feb. 1. It was subsequently announced that the meeting had taken place on Polish initiative and that the conversations had "concerned the Polish proposal, agreed upon with other members of the Warsaw Pact, for the creation in Central Europe of a zone free from production and stockpiling of atomic weapons, covering Poland, Czechoslovakia, the German Democratic Republic, and the German Federal Republic." [i.e. the so-called Rapacki Plan—see page 15979]. Views had also been exchanged on "other current problems of the international situation."

The communiqué said that the Polish Government welcomed the Soviet proposals for a "summit" conference of Heads of Governments, whilst both sides agreed that M. Rapacki's proposal constituted "an attempt to take a real step forward towards an understanding between East and West, the relaxation of tension, and the lessening of the danger of war."

After saying that Poland and the U.S.S.R. regarded as "without foundation the argument put forward by some circles . . . that an alleged shortcoming of the [Rapacki] plan was its lack of clarity on the question of controls," the communiqué went on: "In agreement with other interested Governments, the Polish Government is prepared to participate in the examination and implementation of an effective control system in the proposed zone. Experience gained in the application of such a system in this territorially limited zone could in future be embodied in broader understandings on disarmament. The Soviet Government . . . declares its readiness to participate in the examination and implementation of an effective control system in the above-mentioned zone . . ."

It had previously been announced in Warsaw and Moscow on Jan. 17 that M. Khrushchev, "during a holiday on the Soviet-Polish border," had received an invitation to visit Poland from M. Gomulka and M. Cyrankiewicz, the Polish Prime Minister. M. Khrushchev had accordingly stayed in Poland three days and had had talks with "leading members" of the Polish United Workers' Party and the Polish Government, "in a friendly and cordial atmosphere." Neither the date nor the place of the meeting was announced but it was believed to have taken place from Jan. 9-11 at a Government hunting lodge in the forest of Bialowieza, 160 miles N.E. of Warsaw. The subject of the talks was also not disclosed. (Polish Embassy Press Office, London - Soviet Embassy Press Department, London) **(Prev. rep. Polish-Soviet Talks, 15899 A; Rapacki Plan, 15975 A.)**

B. CANADA. — Dissolution of Parliament.

The Canadian Prime Minister, Mr. Diefenbaker, announced on Feb. 1 that the Federal Parliament would be dissolved with immediate effect, that elections for a new House of Commons would be held on March 31, and that the new Parliament would meet on May 5. Mr. Diefenbaker made the announcement on the adjournment of the House, after he had flown to Quebec to obtain the signature of the Governor-General (Mr. Vincent Massey) for the proclamation dissolving Parliament.

Giving the reasons for this decision, Mr. Diefenbaker told the House of Commons that in recent weeks the position of his minority Government had become "intolerable" and had "made it impossible for us to go ahead with long-term projects to strengthen the resources of the Canadian economy." He recalled that an undertaking had been given by Mr. St. Laurent (the former Liberal leader) that the Liberal Party would not oppose measures brought in by the Conservative Government to fulfil their election promises. Most of this emergency legislation had now been passed, however, and the new Liberal leader, Mr. Lester Pearson, had shown by his statements and attitude that the Government could no longer count on Liberal support. On the other hand, there was no party in the House capable of forming an alternative Government, since none of the parties had an overall majority.

The Speaker did not allow Mr. Lester Pearson and Mr. Stanley Knowles (deputy leader of the C.C.F.) to make a statement after Mr. Diefenbaker's announcement, on the grounds that a debate could not take place after the adjournment of the House and that Parliament had no further existence. Mr. Lester Pearson subsequently protested against the Government's decision, and accused Mr. Diefenbaker of having followed an "incredible procedure."

Party strengths in the House at the dissolution were: 113 Progressive Conservatives; 105 Liberals (including two elected as Independent Liberals); 25 C.C.F. (Labour); 19 Social Credit; and three Independents.—(Department of External Affairs, Ottawa - Montreal Star)
(Prev. rep. 15959 B; 15759 B.)

C. WESTERN GERMANY. — Science Council. - Federal Grants for Technical Training and Science.

The first meeting of the newly-created Science Council took place in Bonn on Feb. 6 under the chairmanship of President Heuss. The Council had been set up under an agreement signed on Sept. 5, 1957, between the Federal Government and the *Länder*, which are in the first instance responsible for science and education.

The agreement provided that the Science Council would work out an overall plan for the promotion of science and thereby co-ordinate the plans of the Federal and *Länder* Governments, indicating priorities and the stages in which the various projects were to be carried out. In addition, the Council would compile annually an "urgency" programme and would make recommendations for the use of funds which the Federal Republic and the *Länder* would make available for this purpose.

The Science Council consists of 39 members, 22 of whom are appointed by the Federal President while the other 17 represent the Federal and *Länder* Governments. Of those appointed by the President, 16 are jointly nominated by certain scientific institutions and the Federal and *Länder* Governments; these members (all of them scientists) were appointed for three years and are eligible for reappointment. The Council will meet either in plenary session or in committees, of which there will be two - (*a*) a Scientific Committee, comprising all the members appointed by the Federal President, and (*b*) an Administrative Committee, comprising all the members representing the Federal and *Länder* Governments. All decisions will be taken by a two-thirds majority of the votes cast.

A second agreement with the *Länder* Governments was concluded on Sept. 5, 1957, whereby the Federal Government undertook to provide a special grant of nearly 22,000,000 DM (£1,833,000) to help the expansion of training facilities at engineering schools during the financial year 1957-58.

The Federal Government made a special grant of 72,000,000 DM (£6,000,000) in the 1957-58 Budget for the promotion of science, and will make another of about 80,000,000 DM in the 1958-59 Budget. - (Frankfurter Allgemeine Zeitung)

D. UNITED KINGDOM. — Trevelyan Scholarships.

In a letter to *The Times* on Dec. 12, 1957, Mr. Benton Jones, of The United Steel Companies Ltd., announced that funds were being made available by a number of industrial companies "to provide a number of awards of a new kind to enable selected boys to attend the Universities of Oxford and Cambridge." Dr. G. M. Trevelyan, O.M., the eminent historian, had expressed interest in the project and had agreed that the awards should be known as Trevelyan Scholarships.

Mr. Benton explained that the scholarships would be open to boys of British nationality receiving full-time education at U.K. schools. Their value would be £150 a year for three years (extended to four years in exceptional circumstances) and would not depend on the parents' income. "In giving these awards," he added, "the donors wish to open up a new avenue of distinction to candidates for Oxford and Cambridge. The present intense competition for university places has greatly increased the emphasis on examination requirements. These may be an effective means of selecting the majority of those with intellectual ability. But some may be denied a university career whose abilities cannot find full expression in the normal curriculum demanded by these requirements, although they possess high personal qualities and high intellectual ability . . . In awarding Trevelyan Scholarships the selectors will look for evidence that the candidate has received a broadly based education at school and has shown high intelligence, originality, enterprise, and vigour."

The first Trevelyan Scholarships, tenable at either Oxford or Cambridge, will be awarded in 1958. It is expected that at least 24 awards will be made in the first year, and that the number may later be raised to 50 a year. The successful candidates will study subjects of their own choosing.—(Times)

E. FRANCE - C.G.T. — Resignation of M. Le Léap.

It was announced in Paris on Nov. 8, 1957, that M. Alain Le Léap, one of the two joint Secretaries-General of the *Confédération Générale du Travail*, had resigned for health reasons. M. Le Léap had held the post since 1948. The other joint Secretary-General is M. Benoît-Frachon. The executive of the C.G.T. subsequently decided in January not to fill the vacancy caused by M. Le Léap's resignation for the time being.—(Le Monde, Paris) **(Prev. rep. 9103 A.)**

F. NETHERLANDS. — Reduction of Bank Rate.

The discount rate of the Netherlands Bank was reduced from 5 to 4½ per cent on Jan. 23. The Bank's action was attributed to an improvement in the foreign exchange position, the "not unfavourable" balance-of-payments position, and growing confidence in the guilder.—(Netherlands News Agency)
(Prev. rep. 15712 C.)

FEBRUARY 15—22, 1958

A. IRAQ - JORDAN. — Merger as Arab Federation. The merger of the Kingdoms of Iraq and Jordan in a Federal union, under the name of the Arab Federation, was proclaimed in Amman on Feb. 14 by King Faisal of Iraq and King Hussein of Jordan. The creation of the Arab Federation came only a fortnight after the merger of Egypt and Syria as the United Arab Republic (see 16005 A).

Discussions on the possibility of an Iraqi-Jordanian federation were initiated by King Hussein after the formation of the United Arab Republic. At King Hussein's invitation, King Faisal arrived in Amman on Feb. 11 with an Iraqi delegation which included the Foreign Minister (Mr. Bashayan), the Finance Minister (Dr. Pachachi), the Minister of Justice (Mr. Khalisi) and the Iraqi Chief of General Staff. The Crown Prince Abdul Ilah (Regent of Iraq during the minority of King Faisal II) and Mr. Tewfik Suweidi (a former Prime Minister of Iraq) also arrived in Amman on Feb. 13 to take part in the conversations.

After two days of discussions, culminating in an all-night session, a proclamation merging the two countries as the Arab Federation was signed by King Faisal and King Hussein at 7.30 a.m. on Feb. 14 and was simultaneously announced in Amman and Baghdad. It contained the following provisions :

(1) The two countries would have one Parliament, one Army, one Ministry of Foreign Affairs, one Ministry of Defence, one Ministry of Justice, and one Diplomatic Service, as well as a unified Customs regime, a unified educational system, and a single legal system. Steps would also be taken to unify the currencies of the two countries and to co-ordinate their economic and financial policy.

(2) King Faisal would be Head of State of the Arab Federation and King Hussein deputy Head of State, each retaining constitutional authority in his own kingdom.

(3) There would be a Federal Legislature, consisting of equal numbers of representatives from the present Iraqi and Jordanian Parliaments, and a Federal Executive Council to be appointed under the Federal Constitution.

(4) Two Regional Councils would be set up, for Iraq and Jordan respectively, which would be responsible for administration in non-Federal matters.

(5) The Federal Constitution would be enacted within three months of the proclamation of the Arab Federation (i.e. within three months from Feb. 14).

(6) The Federal capital would alternate between Baghdad and Amman, the Federal Government meeting for six months of the year in each city.

(7) Any other Arab State could accede to the Arab Federation. In the event of such accession, corresponding changes would be made in the arrangements under (2) relating to the Federation's Head of State.

(8) Any international agreement or alliance signed by Iraq or Jordan before federation would not commit the other country, but all such agreements or alliances signed after federation would be binding on both parties. [This provision meant that Iraq could retain her membership of the Baghdad Pact, to which Jordan is not a party.]

(9) There would be only one flag common to the Federation and to Iraq and Jordan—the Hashemite banner of black, red, white and green. The present Iraqi and Jordanian flags would accordingly disappear.

The Hashemite flag was that flown by the Sherif Hussein, leader of the Arab revolt in the 1914-18 war and great-grandfather of King Faisal and King Hussein. It consists of three horizontal stripes of black, white and green, with a red chevron in the hoist. Both Jordan and Iraq had used this flag, with the addition of two white stars in the case of Iraq and a single white star in that of Jordan. The disappearance of the stars will make the flag identical for both countries.

King Faisal and King Hussein (both 22 years of age) are cousins and, as stated above, great-grandsons of the Hashemite Sherif of Mecca, Hussein ibn-Ali, who led the Arab revolt against the Turks in the First World War. Both Iraq and Jordan (then Transjordan) achieved their independence at the end of that war, when Hashemite dynasties were set up in both countries. Two of the Sherif's sons, Faisal and Abdullah, became the first Kings of Iraq and Transjordan respectively—the first King of Iraq, Faisal I, being the grandfather of the present Sovereign, and King Abdullah of Transjordan being the grandfather of King Hussein.

The proclamation of the Arab Federation laid special emphasis on the part played by the Sherif Hussein in promoting the unity of the Arab peoples. Both King Faisal and King Hussein delivered broadcasts welcoming "this great day in Arab history" and stressing its significance for the entire Arab world. King Hussein referred in his broadcast to the reunion of the Arabs "under the banner carried by our great-grandfather Hussein ibn-Ali the Great." The agreement creating the new Arab Federation was unanimously ratified by the Iraqi Parliament on Feb. 17 and was endorsed by King Hussein of Jordan two days later.

The formation of the Arab Federation was widely regarded in the Western countries as a counter-move to the creation of the United Arab Republic by President Nasser of Egypt and President Kuwatly of Syria. President Nasser nevertheless sent a telegram to King Faisal expressing his "whole-hearted congratulations" and describing the creation of the Arab Federation as a "blessed step" which would be welcomed by all the Arab peoples. Congratulatory messages were sent to King Faisal and King Hussein by President Bayar of Turkey and M. Menderes, the Turkish Prime Minister. In a statement on Feb. 17, M. Menderes said that he had been assured by the Iraqi Ambassador that Iraq had no intention of withdrawing from the Baghdad Pact.

The Arab Federation will have a population of approximately 6,500,000—about 5,000,000 in Iraq and about 1,500,000 in Jordan. Unlike the United Arab Republic, the territories of which are not coterminous, the Arab Federation extends in a solid block from the Persian frontier on the east to the Israeli frontier on the west ; it is bounded on the north by Turkey, on the west and north-west by Israel and the United Arab Republic (Syrian region), and on the south by Saudi Arabia.

Whereas Iraq is one of the wealthiest of the Arab States, the royalties from her oilfields producing more than £80,000,000 a year, Jordan has few economic resources and had previously been dependent on foreign subsidies to the extent of at least £12,000,000 a year. It was commented in Western newspapers that the rapidly expanding Iraqi economy, and the big programme of public works being undertaken in that country (see 14884 A), might provide important opportunities for the resettlement in Iraq of a substantial number of the half-million Palestine Arab refugees in Jordan.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times) **(Prev. rep. United Arab Republic, 16005 A.)**

B. UNITED STATES. — First Civilian Atomic Power Plants in Operation. The first large-scale civilian atomic power plant in the U.S.A.—situated at Shippingport, on the Ohio River 25 miles N.W. of Pittsburgh—started generating electricity for commercial use on Dec. 18, 1957. The plant, which has a designed initial capacity of 60,000 kilowatts, is operated by the Duquesne Light and Power Company for the U.S. Government, its electricity output being bought by the company for use in the Pittsburgh area. The reactor used is of the pressurized water type, using water both as a coolant and a moderator ; the water heated by the reactor core is pumped through heat exchangers, producing steam to drive a turbine.

The cost of the Shippingport plant, including the first loading of atomic fuel, amounted to $72,500,000 (about £26,000,000), of which the U.S. Government paid $50,000,000 ; the cost of the conventional part of the plant ($17,500,000) and $5,000,000 towards the cost of the reactor were borne by the Duquesne Company, whilst the Westinghouse Company waived its profit on the equipment, which would have amounted to about $500,000.

Earlier, on Nov. 14, 1957, a smaller nuclear reactor for the generation of commercial electricity had been inaugurated at Santa Susana (California). The plant had been jointly developed by the Atomic Energy Commission and the Atomics International Division of North American Aviation Inc., at a cost of $16,733,000. Producing 6,500 kilowatts, this plant works on the sodium-graphite arrangement and was the second to be completed of the five different designs which had been planned by the Atomic Energy Commission in its first civilian reactor programme—the boiling water reactor at the Argonne National Laboratory in Chicago being the first, and the Shippingport reactor the third. (New York Times) **(Prev. rep. 14416 A.)**

C. ECUADOR. — Development Ministry. A new Ministry of Development was set up under a decree of President Ponce Enriquez issued on Dec. 30, 1957. The new Ministry was provisionally placed under the control of the Minister of Economy, Señor Federico Intriago Arrata. (Bank of London and South America)

A. INTERNATIONAL BANK. — Loans and Bond Issues, October 1957 to January 1958.

The following loans were announced by the World Bank during the four-month period October 1957-January 1958 :

Belgian Congo. $40,000,000 on Nov. 27 to the Belgian Government to finance a road construction and improvement programme under the Ten-Year Development Plan for the Belgian Congo (1950-60). Nine banks—including the Royal Bank of Canada, the Chase Manhattan Bank, Brown Brothers Harriman and Co , the New York Trust Company, the First National City Bank of New York, the Belgian American Banking Corporation, and the Swiss Credit Bank—participated in the loan to the extent of $5,260,000. Terms : 18 years; 6 per cent interest, including one per cent commission ; repayment to begin February 1961.

This was the second World Bank loan for the development of the Belgian Congo, following one of $70,000,000 in 1951.

Brazil. $13,000,000 on Jan. 22 to the *Usinas Eletricas do Paranapanema S.A.*, in the State of São Paulo, to cover the foreign exchange costs of building an 85,000-kw. electricity project to supply electric power to South-Central Brazil. Terms : 20 years ; 5⅝ per cent interest, including one per cent commission ; repayment to begin March 15, 1962.

The loan, guaranteed by the Brazilian Government, was the tenth World Bank loan to Brazil, bringing total loans to that country to $182,500,000.

Ecuador. $600,000 on Oct. 31 to the Ecuadorean Government for the purchase of spare parts, tools and materials, and eight petroleum tank trucks, to improve the State Railways. The *Bayerische Hypotheken und Wechselbank*, Munich, and the Grace National Bank of New York participated in the loan to the extent of $118,000. Terms : 4 years ; 6 per cent interest, including one per cent commission ; repayment in semi-annual instalments as from May 1959.

This was the fifth World Bank loan to Ecuador, which has received loans amounting to $33,600,000.

India. $32,500,000 on Nov. 20 to the Tata Iron and Steel Company Ltd., to complete its expansion programme aimed at doubling steel-ingot production capacity to 2,000,000 tons a year. Nine U.S. and Canadian Banks—the Bank of America, the Chase Manhattan Bank, the First National City Bank of New York, the Royal Bank of Canada, Chemical Corn Exchange Bank, Manufacturers' Trust Company, the Northern Trust Company, the Philadelphia National Bank, and the National Bank of Washington, D.C.—participated in the loan to the extent of $15,000,000, the largest participation yet taken in a World Bank loan. Terms : 13½ years , 6 per cent interest, including one per cent commission ; repayment in half-yearly instalments, beginning with the *tranche* of the commercial banks, as from October 1960.

This loan—guaranteed by the Indian Government—was the second World Bank loan for Tata's expansion programme, one of $75,000,000 having been made in 1956. It brought total World Bank loans to India up to $356,000,000.

Japan. The equivalent of $8,000,000 on Jan. 29 to the Japan Development Bank (a Government agency providing long-term credit) to help the Kamasaki Steel Corporation to increase its pig-iron production. The First National City Bank of New York, the Manufacturers' Trust Company, and the Grace National Bank of New York participated in the loan to the extent of $734,000. Terms : 14 years ; 5⅝ per cent interest, including one per cent commission ; repayment to begin May 15, 1960.

The loan, guaranteed by the Japanese Government, was the ninth World Bank loan to Japan, bringing total loans to that country to the equivalent of $90,000,000.

Mexico. The equivalent of $11,000,000 on Jan. 14 to the Mexican Light and Power Company (Mexlight)—a privately owned electricity company—for the expansion of its electric power system. Seven private banks—the *Crédit Suisse*, Sofina of Belgium, the Canadian Bank of Commerce, the First National City Bank of New York, the Chemical Corn Exchange Bank, the National Bank of Washington, and the U.S. Trust Company of New York—participated in the loan to the extent of $1,000,000. Terms : 20 years ; 5⅛ per cent interest, including one per cent commission ; repayment as from Sept. 15, 1959.

The loan, guaranteed by the Mexican Government, was the second World Bank loan to Mexlight (one of $26,000,000 having been made in 1950), bringing the total of loans to Mexico to $152,300,000.

Pakistan. $4,200,000 on Dec. 18 to the Pakistan Industrial Credit and Investment Corporation Ltd.—a privately-owned organization established on Oct. 2, 1957, by Pakistani, British, American, and Japanese investors to promote the growth of private industry in the country. Terms : 15 years ; 5½ per cent interest, including one per cent commission.

The loan, guaranteed by the Pakistan Government, was the eighth World Bank loan to that country, bringing total loans to the equivalent of $112,450,000.

Philippines. The equivalent in various currencies of $21,000,000 on Nov. 23 to the National Power Corporation (a Philippine Government agency responsible for hydro-electric power development) for a hydro-electric project in Luzon. The Bank of America National Trust and Savings Association, and the Chase Manhattan Bank, participated in the loan to the extent of $987,000. Terms : 25 years ; 6 per cent interest, including one per cent commission ; repayment as from December 1960.

The loan, guaranteed by the Philippine Government, was the first World Bank loan to that country.

$150,000,000 4¼ per cent World Bank bonds were issued in the U.S.A. on Jan. 6, 1958, through a group of 176 investment firms and banks, headed by The First Boston Corporation and Morgan Stanley & Co. The Bonds, issued at 98½ per cent, will be repayable on Jan. 15, 1979. This was the Bank's largest Bond issue since 1947.—(International Bank, Washington) **(Prev. rep. 15830 A.)**

B. BULGARIA. — Re-election of Yugov Government.

The newly-elected Bulgarian National Assembly opened its first session on Jan. 13, unanimously re-electing M. Yugov as Prime Minister after he had formally tendered his Government's resignation. All the other members of the outgoing Cabinet were unanimously re-elected on Jan. 14, the composition of the Government being as follows :

M. Anton Yugov ..	Prime Minister.
M. Raiko Damyanov, M. Georgi Traikov	First Deputy Premiers.
M. Vulko Chervenkov ..	Deputy Premier, Education and Culture.
General Ivan Mikhailov	Deputy Premier, Transport and Communications.
M. Russi Hristozov ..	Chairman of the State Planning Commission.
M. Kiril Lazarov ..	Finance and State Control.
M. Karlo Lukanov ..	Foreign Affairs.
M. Georgi Tsankov ..	Internal Affairs.
M. Radi Naidenov ..	Justice.
General Peter Panchevsky	Defence.
M. Boris Taskov	Trade.
M. Ivan Prumov ..	Agriculture and Forests.
M. Radenko Vidinsky ..	Construction and Building Materials.
M. Stoyan Tonchev ..	Municipal Economy, Amenities and Highways.
M. Tano Tsolov	Heavy Industry.
M. Kimon Georgiev ..	Electrification and Water Resources.
M. Peter Kolarov ..	Health and Social Services.
M. Atanas Dimitrov ..	Food Industry.
Mme Stanka Tsckova ..	Light Industry.

The National Assembly also adopted a resolution on Jan. 14 endorsing the Supreme Soviet's "peace resolution" of Dec. 21, 1957—see page 15978. (Bulgarian Legation, London) **(Prev. rep. Cabinet, 15696 B ; Elections, 15960 B.)**

C. UNITED KINGDOM. — British Transport Commission. - Traffic Receipts in 1956 and 1957.

Traffic receipts of the British Transport Commission in 1957 totalled £693,013,000, compared with £666,567,000 in 1956, all classes of traffic having shown improved results in 1957 except British Road Services and Docks and Inland Waterways. Details are tabulated below, with 1956 figures for comparison :

	1957 £'000	1956 £'000	Increase (+) or Decrease (−) £'000
British Railways			
Passengers	138,546	126,915	+11,631
Parcels	51,352	47,422	+3,930
Merchandise and Livestock	106,925	104,977	+1,948
Minerals	53,320	51,992	+1,328
Coal and Coke	127,664	126,039	+1,625
	477,807	457,345	+20,462
British Railways Collection and Delivery Services	13,359	12,853	+506
Road Passenger Transport			
Provincial and Scottish buses, coaches, trolley buses, etc.	57,540	56,630	+910
London Transport			
Railways	22,998	22,129	+869
Road Services	59,190	55,590	+3,600
Ships	6,895	6,333	+562
Other Services			
British Road Services, Docks and Inland Waterways ..	55,224	55,687	−463
Total	693,013	666,567	+26,446

Comparisons between 1957 and 1956 were affected by increases in rates and charges authorized from time to time, as well as by the consequences of the restrictions on oil supplies during the Suez emergency and by the provincial bus strike of July 1957.—(Times - Financial Times) **(15735 A ; 14709 D.)**

A. UNITED KINGDOM. — Aircraft Industry. - BOAC and BEA Contracts for British Turbo-Jet Airliners. - Formation of Bristol-Hawker Siddeley and de Havilland-Fairey-Hunting Consortia. - Closer Co-operation between Bristol and Shorts. - Export Orders for Britannias, Comets, and Viscounts. - Abandonment of S.R.-177 Project. - Redundancy in I.O.W. Factories.

Important orders for fleets of turbo-jet airliners were announced in January and February by both major British airlines. The placing by British Overseas Airways of a contract for Vickers *VC-10's* had been decided on in May 1957 (see 15856 A), but the contract envisaged by British European Airways for a fleet of medium-range airliners to meet the outline specification published in August 1957 (see 15856 A) was preceded by lengthy negotiations with two competing groups of aircraft manufacturers. Developments leading up to the signing or negotiation of the contracts are described below.

British Overseas Airways Corporation.

It was announced on Jan. 14 that BOAC had signed a contract with Vickers-Armstrong Ltd. for 35 Vickers *VC-10* turbo-jet swept-wing airliners, for delivery between 1963 and 1965 and for service on BOAC's London-New York non-stop route and Eastern and Commonwealth routes. The value of the contract—described as "by far the largest ever placed for a British civil aircraft—was about £60,000,000; in addition, BOAC acquired an option on a further 20 *VC-10's*, bringing the total value of the contract (including spares) to "at least £100,000,000" if this option were taken up.

It was explained that when BOAC had originally decided in May 1957 to place an order for Vickers *VC-10's* (see 15856 A) it had been intended to employ them exclusively on the African and Eastern routes, but that subsequent development of the airframe and the Rolls-Royce *Conway* engines had made the aircraft suitable for non-stop North Atlantic service.

Details of the *VC-10* were given on the same day by Sir George Edwards and Mr. Basil Smallpeice, managing directors of Vickers-Armstrong and BOAC respectively.

Developed by Vickers-Armstrong as a private venture and without Government assistance, the *VC-10* would be the largest British airliner yet ordered. It would have a maximum speed of about 600 m.p.h., a length of 158 ft. (against the 146½ ft. of the *Boeing 707's* ordered by BOAC in 1957—see 15856 A), a span of 140 ft., and a wing area of 7,800 sq. ft. Its "double-bubble" fuselage would seat 108-152 passengers according to the type of accommodation provided, and would have "substantial" lower-deck space for baggage, mails, and freight—the "all-up" weight for Atlantic flights being 29,000 lb. The four *Conway* turbo-jet engines would be mounted in pairs in the tail of the fuselage (instead of being buried in the wings or carried in "pods" beneath them), it being claimed that this method would improve both airfield performance and cruising economy. As a result, the *VC-10* would be more flexible in use than the *Boeing 707's* and would be able to carry good payloads over long-distance routes with "difficult" airfields. Rear-mounted engines would reduce noise and vibration in the passenger cabin.

British European Airways Corporation.

Mr. Watkinson, the Minister of Transport and Civil Aviation, announced in the House of Commons on Feb. 12 that BEA would open negotiations immediately with a new company, formed jointly by the de Havilland Aircraft Company, Hunting Aircraft Ltd., and Fairey Aviation Ltd. (see below), with a view to the eventual signing of a contract for a fleet of turbo-jet airliners. The new aircraft, to be known as *DH-121*, would meet BEA requirements as previously announced (see 15856 A), and the power plant for the machines would be developed and manufactured by Rolls-Royce Ltd. Mr. Watkinson added that before a definite contract was signed the Government would "wish to be satisfied that the whole project will be developed and manufactured as a private venture by the companies concerned."

The Minister's addendum was considered by the Press to mean that BEA would have to show that the de Havilland consortium would be able to finance the entire development and manufacture of the *DH-121*, including possible initial troubles, out of its own resources and without Government assistance. It was pointed out that the BEA order, if placed, would probably be for about 24-25 airliners, costing, with spares, about £30,000,000, and that the Consortium, in order to cover costs, would have to sell a further 40 to 50 *DH-121's* in overseas markets.

Reorganization of Aircraft Industry in Connexion with BEA Order.

Designs for a turbo-jet airliner to satisfy BEA requirements had been submitted to BEA towards the end of 1957 by four aircraft firms—the Bristol Aeroplane Company, the de Havilland Aircraft Co., Vickers-Armstrong Ltd., and A. V. Roe and Co.—but Vickers-Armstrong had subsequently withdrawn because of its BOAC commitments (see above). Mr. Watkinson had stressed on Dec. 9 that the airliner must be developed by the successful firm as a private venture, adding that the Government believed that in placing the contract BEA should "encourage a policy of merged effort." Lord Mancroft (Minister without portfolio) had also emphasized on Dec. 11 that it was essential that the British aircraft industry should contract, in view of the reduction in military orders, and that it would need to "reorganize itself into a relatively small number of more compact and powerful groups" in order to remain efficient.

The Bristol Aeroplane Company accordingly announced on Jan. 1 that, together with the Hawker-Siddeley Group, it would form a joint company to develop a turbo-jet airliner for BEA. The type to be developed would be the Bristol *T-200*, with "such power plant as may be certified in the contract."

It was announced that the chairman and managing director of the new company would be respectively Sir Frank Spriggs (managing director of the Hawker-Siddeley Group) and Sir Arnold Hall (a director of the Group), and its other directors would be Sir Roy Dobson (Hawker-Siddeley), Sir Reginald Verdon Smith (chairman and managing director of the Bristol Aeroplane Company) and Sir Matthew Slattery (chairman of Bristol Aircraft Ltd., a subsidiary of the BAC—see below). Dr. E. A. Russell, designer of the *Britannia*, would be Chief Engineer. The share capital of the new company would be held as to 65 per cent by Hawker-Siddeley and as to 35 per cent by BAC, and the company would be backed by the "considerable financial resources of the two parent companies, whose assets exceed £200,000,000."

BEA announced on Jan. 3, however, that it would postpone a decision on the type of turbo-jet airliner to be adopted pending further consultations with the Minister of Transport and Civil Aviation. It was stated in the Press that whilst BEA itself preferred the de Havilland design (the *DH-121*), the Government favoured the Bristol-Hawker Siddeley project, mainly because it considered that the size of the group would ensure adequate financial backing.

The de Havilland Company informed BEA on Jan. 3 that it was prepared to build the *DH-121* in co-operation with the Hunting, Fairey, Handley-Page, Saunders-Roe and Bristol companies. On Jan. 13 discussions began at the Ministry of Supply between representatives of the Bristol-Hawker Siddeley Group and the de Havilland Company, whilst on Jan. 17 a meeting took place between Lord Douglas of Kirtleside (chairman of BEA) and senior officials of the Group and de Havillands. Attempts to bring de Havillands into closer financial association with the Bristol-Hawker Siddeley Group proved abortive, however, and on the same day the Group announced that it was negotiating with "a number of overseas customers" interested in the *T-200*, and that a sales team was already on the way to the U.S.A. at the invitation of an American airline to discuss plans for a fleet of these turbo-jets.

Mr. Watkinson announced in the House of Commons on Jan. 27 that final proposals for the development and manufacture of the *DH-121* had been received by the Minister of Supply and himself from the de Havilland Company and its proposed associates, Fairey Aviation Ltd. and Hunting Aircraft Ltd. He added that technical assistance had been offered by Handley-Page Ltd. in view of its special experience with high-speed aircraft and tail design, and that the de Havilland Company would endeavour to pass on to Saunders-Roe Ltd. (see below) any sub-contracting work which the consortium could not undertake itself.

Mr. Watkinson's announcement was followed on Jan. 30 by a statement from the de Havilland Company that, in association with Hunting Aircraft and Fairey Aviation, it had formed a new company—the Aircraft Manufacturing Co. Ltd. ("Airco")—to develop and manufacture the *DH-121*. De Havilland would own 67½ per cent of "Airco's" shares and appoint four members of its board, Hunting Aircraft would own 22½ per cent and nominate two members, and Fairey Aviation would own 10 per cent and appoint one member.

Other recent developments in connexion with the aircraft industry are summarized below.

Closer Collaboration between B.A.C. and Short Brothers. The Bristol Aeroplane Company announced on Oct. 15, 1957 that, in order to bring about closer collaboration between itself and Short Brothers and Harland, Belfast (who were engaged in building *Britannia* aircraft), Rear-Admiral Sir Matthew Slattery, chairman and managing director of Shorts, had been appointed chairman of B.A.C.'s subsidiary, Bristol Aircraft Ltd. Sir Matthew would succeed Mr. C. F. Uwins, who had been appointed a vice-chairman of the parent Bristol Company.

It was explained in the Press that Short Bros. and Harland were building 25 *Britannias* under sub-contract from the Bristol company; that B.A.C. had already acquired 360,000 £1 shares in Shorts (whose capital had been increased at the same time from £2,000,000 to £2,600,000) in July 1954; and that Sir Reginald Verdon Smith, chairman and joint managing director of B.A.C., had joined Shorts'

board. At present 69¼ per cent of Short Bros. and Harland's shares are owned by the Government and 15¼ per cent each by B.A.C. and Harland and Wolff, the Belfast shipbuilders.

Orders for Bristol Britannias. The number of *Britannia* turbo-prop aircraft on order or already delivered was officially given on Jan. 31, 1958, as 78, viz.. *Export Orders*: Four (including three already delivered—see 15959 B) for *El Al* Airlines (Israel); six (order increased from the original three) for Canadian Pacific Airlines (see 15373 A); two each for *Compañia Cubaña de Aviación* and *Aeronaves de Mexico*. *Home Orders:* 33 for BOAC; two for Hunting-Clan Air Transport Ltd.; 20 for R.A.F. Transport Command; and four for the Ministry of Supply.

The Bristol Aeroplane Company had previously announced on Sept. 27, 1957, that the U.S. Northeast Airlines had asked for delivery of its five *Britannia-305's* on order to be postponed until the autumn of 1958. It was explained that completion of the airliners had been delayed because of modifications required by the U.S. Civil Aeronautics Administration to make them suitable for domestic operation, and that they would therefore not be ready before the beginning of 1958. Because of this delay, Northeast Airlines (which had intended them for the New York-Florida winter holiday traffic) had decided to postpone introducing the machines until December 1958.

Manufacture of Bristol Aero-Engines in the U.S.A. The B.A.C. subsidiary, Bristol Aero-Engines Ltd., announced on April 4, 1957, that it had signed an agreement with the Curtiss-Wright Corporation for the manufacture of Bristol gas turbine engines (including *Proteus* and *Orion* turbo-prop engines) in the United States.

Bristol Aero-Engines for U.S. Aircraft. The U.S. Lockheed Aircraft Corporation announced on Oct. 12, 1957, that Bristol *Orpheus* engines installed as a stop-gap measure in the first U.S. jet transport aircraft (the Lockheed *Jetstar*) had proved so satisfactory that these planes would be fitted with two *Orpheus* engines, instead of with four U.S. jet engines as originally intended.

First BOAC London-New York Service by Britannias. The first regular passenger-carrying service across the North Atlantic by a British-built airliner, and the first by a turbo-prop engined type, was inaugurated by BOAC on Dec. 20, 1957, when a *Britannia-310* left London Airport for New York. In spite of strong headwinds (at times reaching 100 m.p.h.) the *Britannia* arrived at Idlewild Airport, New York, in 12 hrs. 25 mins. The return journey New York-London was flown in 8 hrs. 58 mins.—the fastest time ever made on this route by an aircraft in regular passenger service.

Orders for Comets. The number of *Comets* on order in February 1958 was officially given as 25, comprising 19 *Mark IV's* for BOAC (deliveries to begin in mid-1958) and six *Mark IV B's* for BEA (see 15856 A).

It was announced on Jan. 27, 1958 that U.S. Capital Airlines, which early in 1957 had requested that delivery of the *Comets* on order for it should be postponed, had now decided to cancel the order and buy 15 U.S. *Convair* jet airliners instead. The change of plan was attributed in the British Press to Capital Airlines' decision to finance its aircraft requirements in the United States.

World Circuit by Comet III. The prototype of the *Comet Mark III* set up a new record for a commercial aircraft on Dec. 4, 1955. Piloted by Group-Capt. John Cunningham (de Havilland's chief test pilot), it arrived on a proving flight at Sydney (N.S.W.) after flying from Hatfield (Herts.) *via* Cairo, Bombay, Singapore, and Darwin in 24 hrs. 23 mins. net flying time. The previous best time between London and Sydney (44 hrs. 23 mins.), was achieved by a Qantas *Constellation* in June 1953.

After flying from Sydney to Perth *via* Melbourne, the *Comet* established a further record by returning to Sydney (2,055 miles) in 4 hrs. 6 mins.; it then crossed the Pacific *via* Honolulu to Vancouver, the 2,730 miles from Honolulu to Vancouver being crossed in the record time of 5 hrs. 39 min., an average of 483 m.p.h. After flying across Canada, the *Comet* completed her circuit of the world by flying non-stop from Montreal to London (3,350 miles) in 6 hrs. 18 mins., an average speed of 548 m.p.h. The entire world trip of about 30,000 miles was completed in 66 hrs. 43 mins. net flying time, an average of about 450 m.p.h.

New Comet Types. A new type of *Comet III*, powered by four Rolls-Royce *Avon RA* 29 engines—similar to those to be fitted in the *Comet IV* (see 14397 A) ordered by BOAC—made a successful test flight on Feb. 25, 1957. On Oct. 16 the aircraft established a new record by flying from London Airport to Khartoum (3,064 miles) in about 5 hrs. 51 mins., an average speed of 523.41 m.p.h. and on Oct. 24 it flew from London to Johannesburg in the record time for civil aircraft of 13 hrs. 1 min., including a refuelling stop of about an hour at Khartoum. The average speed over the whole route was 507 m.p.h.

The de Havilland company announced on May 21, 1957 that it was developing a larger and more economical version of the *Comet IV-B* for use on short and medium-stage routes. The new aircraft would have 10 per cent more seating capacity than the *Comet IV-A* (i.e. 84 first-class or 99 tourist passengers) and 15 per cent greater economy. The maximum speed would be 520-545 m.p.h. on stages up to 2,000 miles or (flying at a greater altitude) 490-500 m.p.h. on 2,600-mile stages.

It was announced on Nov. 8 that a further version of the *Comet*—the *IV-C*—would be developed to combine the operational economy of the *IV-B* with a payload only just short of that of the inter-continental *Comet IV*. Its cruising speed would be over 500 m.p.h.

Orders for Vickers Viscounts. Export orders for the *Viscount* turbo-prop airliner announced in 1956-57 included: four for Ansett-ANA (see 15801 C); three for New Zealand National Airways; five more for the India Airlines Corporation (making 10 in all), three for Pakistan Airlines, with an option on two more; two for the Egyptian (*Misr*) Airlines, in addition to the three previously ordered—see 13612 B; three for *Lloyd Aero Colombiano* (Colombia); four for *Linee Aeree Italiane* (L.A.I.) in addition to six previously ordered; and an unspecified number for *Transportes Aeros Portugueses*.

Trans-Canada Airlines, which already had 38 *Viscounts* in service or on order, announced on May 2, 1957 that it had exercised its option to acquire 13 more, making 51 in all. The U.S. Capital Airlines, which owns the largest *Viscount* fleet of any airline apart from BEA, announced on May 8, 1957 that it had decided not to take delivery of the further 15 on which it had an option. It was explained that the decision was due solely to a falling-off in profits, coupled with labour uncertainties; the *Viscounts* already in service had proved "completely satisfactory," and their popularity and operational economy had "exceeded expectations."

Vickers-Armstrong Ltd. stated on Oct. 3, 1957 that 374 *Viscounts* were already in service or on order, and that contracts currently under discussion were expected to bring the number to 400 in the near future. The largest fleets already in operation or ordered were those of BEA (67); Capital Airlines (60); Trans-Canada Airlines (51); Continental Airlines (U.S.A.) (15); Trans-Australian Airlines (14); BOAC and *Air France* (12 each); Indian Airlines and *Linee Aeree Italiane* (10 each); and *Lufthansa* and K.L.M (9 each). The total value of *Viscounts* on order was £143,250,000, of which £117,250,000 represented export orders, including £51,500,000 of North American orders. The value of the 235 *Viscounts* already delivered was given as £79,000,000.

New All-Purpose Aircraft. Outline particulars were given on Jan. 18 of the *AW-650*, a turbo-prop pressurized aircraft intended for freighting, tourist coach travel, military transport, or car-ferry service. The *AW-650*, which is being developed as a private venture by Armstrong-Whitworth Aircraft Ltd. (a subsidiary of the Hawker-Siddeley group), will be powered by four Rolls-Royce *Dart* engines and will have a cruising speed of 300 m.p.h. at 25,000 feet, and a range of over 2,000 miles.

Abandonment of Saunders-Roe 177 Project. The Ministry of Supply announced on Dec. 27, 1957, that it had cancelled the project to develop the *S.R.-177* jet-rocket fighter, a supersonic interceptor aircraft developed by Saunders-Roe Ltd.

The R.A.F. had already decided not to adopt the fighter, in accordance with the policy changes announced in the Defence White Paper published in April 1957 (see 15493 A), which envisaged the English Electric *P.1* as "the last fighter aircraft for the R.A.F." However, at the instance of the Minister of Supply (Mr. Aubrey Jones), the project had been continued because of the interest shown by the Royal Navy and the prospect of a large order (worth up to £100,000,000) from the German Federal Government for the *Luftwaffe*. On Dec. 26, however, the German Federal Ministry of Defence definitely rejected the *S.R.-177*.

The Ministry of Supply's statement explained that although the aircraft was "generally recognized to be an excellent and unique design," the number required for the Royal Navy would be so small that the cost of development would be excessively high without the German order.

The Government's decision to abandon the *S.R.-177* project caused widespread dismay in the Isle of Wight, where the Saunders-Roe factories engaged on it are situated, and where the unemployment rate was already much higher than on the mainland. The firm's managing director (Captain E. D. Clarke) proposed to Mr. Aubrey Jones on Dec. 31 that the Government should sanction the building of three *S.R.-177's* for research purposes, while on Jan. 2 a deputation from the island, headed by Sir Peter Macdonald (M.P. for the Isle of Wight), discussed the position with Mr. Aubrey Jones, Mr. Vaughan-Morgan (Minister of State, Board of Trade), and Mr. Robert Carr (Parliamentary Secretary to the Ministry of Labour). As a result, Mr. Jones undertook to consider carefully proposals put forward by Saunders-Roe for the allocation of other aircraft work to the I.O.W. factories, whilst Mr. Vaughan-Morgan promised that the Board of Trade would do its utmost to "interest expanding firms in establishing new projects in the Isle of Wight."

Saunders-Roe announced on Jan. 17 that they had succeeded in obtaining some outside work for their factories; in consequence, redundancy would not be so heavy as feared and might not at present exceed 600. On Jan. 20, however, it was announced that the Ministry of Supply had rejected the proposal that three *S.R.-177's* should be completed for research purposes.

The net assets of the various groups engaged in aircraft production were given by *The Times* on Jan. 8, 1958, as follows: Vickers-Armstrong, £85,173,328; Hawker Siddeley, £71,140,063; English Electric, £55,050,187; Rolls-Royce, £26,400,572; de Havilland, £18,863,177; Bristol Aeroplane Co., £16,656,029; Fairey Aviation Ltd. £6,573,848; Blackburn Aircraft, £4,147,567; Handley Page, £3,837,388. In certain cases—e.g. in that of the de Havilland company—amounts for future tax liabilities had been deducted when these figures were compiled.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Aircraft Industry, 15373 A; BOAC and BEA Reports, 15856 A.)**

A. MIDDLE EAST. — Israeli-Jordanian Dispute on Jerusalem Demilitarized Zones. - Dr. Hammarskjold's Visit to Middle East. - Agreement between Israel and Jordan on Mount Scopus Demilitarized Zone. - Incidents on Israeli-Syrian Border. - Measures against Infiltration in Gaza Strip. - The Kafr Kassim Massacre.

A series of frontier incidents during the autumn of 1957 led to considerable tension between Israel and Jordan, in view of which the U.N. Secretary-General (Dr. Hammarskjold) visited the area in December for discussions with the two Governments. In consequence, an agreement was reached between Israel and Jordan on Jan. 18, 1958, for the implementation of the 1948 agreement on the Mount Scopus demilitarized zone. Details of these and other recent developments in relations between Israel and the Arab States are given below under cross-headings.

Israeli-Jordanian Relations. - The Mount Scopus Dispute.

The Jordanian Government called for an emergency meeting of the U.N. Security Council on Aug. 19, 1957, to consider alleged violations by Israel of the armistice agreement in the Jerusalem area. In its letter to the Security Council, the Jordanian Government stated that Israeli farmers, guarded by an armed force, had begun to plough land and build a road in the demilitarized zone near Government House (the former offices of the Palestine High Commission) on the Mukkaber mountain south-east of Jerusalem; in a separate letter to Dr. Hammarskjold, it accused Colonel Byron V. Leary (acting Chief of Staff of the U.N. Truce Supervision Organization) of failing to take measures to force the Israelis to leave the area. The Israeli Foreign Ministry stated on the same day that Israeli activities in this area were confined to tree-planting around the former offices of the Palestine High Commission.

It was explained in the British and U.S. Press that the Israeli intention was to create a green belt on the terraces of the mountain by planting about 100,000 trees, and that Jordanian objections were materially based on the fact that much of the land was still Arab-owned, though the Arab owners had no access to it.

After hearing statements from both parties, the Security Council requested Colonel Leary on Sept. 6 to submit a report on conditions in this demilitarized zone.

Colonel Leary's report, published on Sept. 26, stated that there were no provisions in the general armistice agreement on the status of the zone, and that the U.N. Truce Supervision Organization did not possess any specific authority with regard to civilian activities in the area. Both Jordanian and Israeli civilians had inhabited the zone, and civilians had freely crossed into the area, ownership of land had not been a criterion for its division; and the records did not show that any agreement had been reached on the creation of a "buffer zone" or on restricting civilians in the area to confine their activities to their own property. On the military side, however, Jordan had continually violated the armistice agreement in this zone; Jordanian troops had been seen there, trenches and military positions had been renovated, and the Jerusalem-Bethlehem-Hebron highway [which passes through the zone] was being used for military traffic. On the other hand, no Israeli military personnel had been observed in the zone.

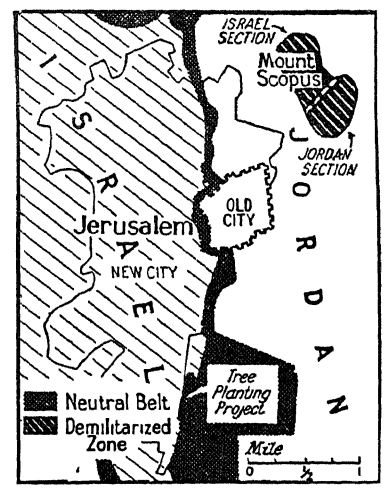
On Nov. 20, 1957, the Jordanian authorities prevented an Israeli convoy from leaving Jerusalem for the Mount Scopus demilitarized zone, which is situated on the north-eastern boundary of the city and forms an Israeli *enclave* in Jordanian territory. Under an agreement concluded on July 7, 1948, the Mount Scopus area—which contains the Hebrew University and the Hadassah Hospital—was divided into sectors to be policed by Israeli and Jordanian forces respectively, and the Israeli garrison was to be relieved and supplied with food and fuel by a fortnightly convoy from Jerusalem. This arrangement was superseded by the 1949 armistice agreement, which called for the appointment of a committee to make arrangements for free access to the "cultural and humanitarian institutions on Mount Scopus"; this clause of the agreement, however, had never been carried out. The convoy stopped on Nov. 20 was carrying, among other supplies, petrol for an electric generator which, the Jordanian authorities alleged, was intended for machines engaged in building fortifications.

Several other incidents occurred on the Israel-Jordan border during the next few days. On Nov. 21 a Jordanian farmer was kidnapped by an Israeli border patrol, and an exchange of fire took place in the Jerusalem area. The Israeli authorities alleged on Nov. 24 that three attempts had been made to carry off Israelis, apparently as a reprisal for the kidnapping of the Jordanian farmer. The Israel-Jordan Mixed Armistice Commission rejected on Nov. 26 the Israeli contention that the farmer had been arrested in Israeli territory, and demanded his immediate release.

An Israeli fighter plane had previously fired on a Jordanian airliner over Jordanian territory near Akaba on Oct. 19, but had been driven off by anti-aircraft fire. In view of the fact that Air Jordan is partly American-owned and is largely operated by American crews, the incident led to a sharp protest to Israel by the U.S. Government.

The Jordanian Foreign Minister (Mr. Samir Rifai) demanded the replacement of Colonel Leary on Nov. 24, and announced that the Jordanian Government would no longer co-operate with him or consider his decisions binding in view of his "biassed" attitude over the Mount Scopus convoy and previous incidents. Dr. Hammarskjold stated on the same day that Colonel Leary continued to enjoy his full confidence, and offered to visit Amman for direct talks on the situation.

This offer was accepted by the Jordanian Government, and Dr. Hammarskjold accordingly flew on Dec. 1 to Amman, where he had talks with Mr. Rifai. On Dec. 3 he proceeded to the Israeli side of Jerusalem for discussions with the Prime Minister, Mr. Ben-Gurion. After flying back to Amman on the following day, and then returning to Jerusalem for further talks, Dr. Hammarskjold succeeded in bringing about an agreement on the question of convoys to Mount Scopus. Both Governments expressed their willingness to give full implementation to the 1948 agreement on a basis of reciprocity; to "accept, on that basis, the inspection of Mount Scopus by the U.N. which is necessary in order to fulfil U.N. responsibilities for checking that such implementation is established and maintained by both parties"; and to discuss the implementation of the agreement with a personal representative appointed by the U.N. Secretary-General. Before returning to New York on Dec. 7, Dr. Hammarskjold visited Damascus and Beirut for discussions with the Syrian and Lebanese Foreign Ministers.



Jerusalem, showing Mount Scopus. (*Economist*)

An Israeli convoy was allowed to leave Jerusalem for Mount Scopus on Dec. 5 with a limited supply of fuel, whilst the kidnapped Jordanian was released by the Israeli authorities on Dec. 11. Dr. Urrutia, a Colombian diplomat, was appointed by Dr. Hammarskjold on Dec. 16 to negotiate on the Mount Scopus question, and began his discussions in Jerusalem on Dec. 31. The talks concluded on Jan. 18, when Dr. Urrutia informed Dr. Hammarskjold that agreement had been reached on the implementation of the 1948 agreement.

Dr. Urrutia reported that Israel and Jordan had given assurances that no new military installations would be erected in the Mount Scopus area, and that all installations erected in violation of the 1948 agreement would be removed or destroyed. U.N. observers would investigate complaints by either party on the spot, and specially designated representatives of the Secretary-General, who would report exclusively to him, would periodically visit both sections of Mount Scopus. The U.N. would assume exclusive responsibility for ensuring that convoy arrangements were in conformity with the 1948 agreement, and for ascertaining the need and ultimate use of items included in the convoy, whilst the Jordanian Government undertook to ensure the protection of convoys when crossing territory under its control. In a letter to Mr. Ben-Gurion published with his report, Dr. Urrutia stated that there would be no restrictions on the transport of food and water, and that fuel requirements would be based on the average of the last three years. Books, scientific and cultural collections, and similar items might be removed from the Hebrew University and the Hadassah Hospital, and the U.N. would make arrangements for their transport to the Israeli sector of Jerusalem.

At Jordan's request, the Security Council resumed its consideration on Jan. 22 of the Jordanian complaint against alleged Israeli violations of the armistice agreement in the demilitarized zone near Government House, in the Jerusalem area.

The Israeli delegate, Mr. Kidron, described Jordan's complaint as "trivial, petty, and more suited to the attention of a rural constable than to the Security Council." After maintaining that no civilian activity had at any time taken place on the Israeli side of the demilitarized zone which could be considered as contrary to the armistice agreement, he pointed out that even the "perfectly legitimate and proper activities" of which Jordan complained had been suspended since the beginning of November.

The Security Council unanimously adopted a resolution—sponsored by Britain and the U.S.A. and accepted by Jordan—which (1) asked the Chief of Staff of the U.N. Truce Super-

vision Organization (General Burns) to "regulate activities within the zone" in accordance with the provisions of the armistice agreement, bearing in mind that "Israelis should not be allowed to use Arab-owned properties and Arabs should not be allowed to use Israeli-owned properties" except by mutual agreement; (2) directed General Burns "to conduct a survey of property records with a view to determining property ownership in the zone"; (3) requested Israel to suspend its tree-planting programme "in order to create an atmosphere conducive to fruitful discussions"; (4) urged Israel and Jordan to endeavour to reach a settlement of the dispute through the Mixed Armistice Commission; (5) called on both countries to prevent their forces from crossing the armistice lines and to "remove or destroy all their military facilities and installations in the zone"; and (6) asked General Burns to report on the implementation of the resolution. The resolution noted that "neither Israel nor Jordan enjoys sovereignty over any part of the zone."

Border Incidents on Israeli-Syrian Frontier.

In connexion with his discussions on the Syrian complaint of Israeli activities in the Lake Huleh area (see 15887 D), the Security Council ordered Colonel Leary on May 28, 1957, to submit, within one month, a report on the situation in the Israeli-Syrian demilitarized zone.

In his report (published on July 8) Colonel Leary stated that since the Israeli military action against Egypt in October 1956 the Israeli authorities had, except on a few occasions, refused to allow U.N. observers to enter the zone, whereas the Syrian authorites had consistently allowed them free access to it. The Israeli Government had also refused to dismantle fortifications which Colonel Leary had ruled to be beyond what was required for the protection of civilian life, on the ground that Syria had not complied with Article 1 of the armistice agreement. [This states that "no aggressive action . . . shall be undertaken, planned, or threatened" and that "the right of each party to its security and freedom from fear of attack . . . shall be respected."] The report suggested that U N. observers should be permanently stationed in the demilitarized zone for purposes of surveillance and more rapid investigation.

A number of incidents occurred on the Israeli-Syrian border during June and July, 1957, notably on July 9, when a civilian was killed and seven policemen wounded on the Israeli side, and two women and two children were wounded on the Syrian side, during a 10-hour exchange of mortar fire north of Lake Huleh. It was subsequently announced on July 16 that the Israeli Government had agreed to the establishment of U.N. observation posts along the Syrian border, which it had hitherto opposed.

The Syrian delegate at the U.N. drew the attention of the United Nations on July 16, 1957, to recent statements by Mr. Ben-Gurion and other Israeli leaders, which, he alleged, constituted a violation of the armistice agreement and Security Council resolutions. The Israeli Government, in reply, lodged a formal complaint with the Truce Supervision Organization on July 22 alleging that Syria had violated Article 1 of the armistice agreement, and citing "the threatening attitude evidenced by Syria's Prime Minister, Sabry el-Assali, in recent public statements." The Truce Supervision Organization, however, refused to investigate the Israeli allegations, on the ground that there was no provision in the armistice agreement for handling complaints referring to general clauses in the agreement.

Following an exchange of fire in the demilitarized zone south-east of Lake Tiberias on Nov. 6, 1957, in which an Israeli policeman was killed, the Israeli-Syrian Mixed Armistice Commission (which Israel had rejoined after boycotting it for the past two years) agreed on Nov. 14 that legitimate work in the demilitarized zones should not be interfered with. A new series of incidents, in which an Israeli civilian was killed, nevertheless occurred in the demilitarized zones between Nov. 24-26. At a meeting of the Mixed Armistice Commission held on Dec. 9 to discuss these incidents, the Syrian delegates refused to co-operate with the chairman of the Commission, Colonel Moe (a Norwegian), whom they accused of "partiality," but continued talks with the Israeli representatives on an informal basis. U.N. headquarters subsequently announced that Colonel Moe would shortly be replaced.

Minor incidents continued to occur in the Syrian-Israeli border area during January and early in February, 1958, in which both sides accused each other of responsibility. There were no casualties.

The Situation in the Gaza Strip.

Following his visit to Cairo in March, 1957, Dr. Hammarskjold announced on April 1 that the Egyptian Government had given him assurances that the authorities were making it clear to the inhabitants of the Gaza Strip that it was Egyptian policy to prevent infiltration across the demarcation line, and that the regulations against infiltration, which included penalties, were being put into force.

Three mine explosions, in which an Israeli was killed and seven others injured, nevertheless occurred in the Gaza border area at the end of May and the beginning of June, whilst five armed Arab infiltrators were killed by UNEF or Israeli patrols between June 14-27, 1957. Major-General Burns (Chief of Staff of UNEF) stated that such incidents were not, in his view, the result of any failure by the Egyptian authorities to co-operate with UNEF; he disclosed that proposals put forward by Dr. Hammarskjold for a security zone on both sides of the demarcation line had been rejected by Israel, which had refused to admit UNEF troops to her side of the border.

A *Times* correspondent reported on Dec. 13, 1957 that the Gaza Strip area was so quiet that "Arabs and Israelis can work freely in the fields right down to the border," and that Israeli troops were no longer patrolling the demarcation line. He attributed this position largely to a regulation of the Egyptian administration forbidding the population of the Gaza Strip to approach within 500 metres of the demarcation line after dark.

In a debate in the British House of Lords, held on Jan. 29, 1958, the Earl of Gosford (Under-Secretary at the Foreign Office) pointed out that the past 11 months had seen far fewer attacks on Israel's borders, and no retaliatory attacks from the Israeli side. "One reason for the quiet on the Egyptian frontier," Lord Gosford added, "is the presence of the U.N. Emergency Force. Judging by the almost complete lack of incidents for several months, the failure to secure its stationing on Israeli territory has not lessened its effectiveness. This picture might easily change if Egypt restarted *Fedayeen* operations. The frontier with Lebanon has been almost wholly quiet, and there has been only one major brush on the Syrian border. Greater restraint has been shown by Arabs and Jews, both of whom seem agreed not to provoke fighting. This seems to be due to increasing respect for the authority of the United Nations."

The Kafr Kassim Massacre.

Deep concern was aroused in Israel, and intense indignation in the Arab countries, by the shooting of a large number of Arab civilians at the Israeli village of Kafr Kassim (near the Jordanian border east of Tel-Aviv) on Oct. 29, 1956, the day on which Israel started military operations against Egypt. A curfew had been imposed on the Arab inhabitants of border villages at the time, but a crowd of men, women and children who had not heard of the curfew regulation were machine-gunned by a patrol of the border police while returning after curfew hours to Kafr Kassim from their work in the fields, 49 persons being killed and 14 wounded.

The first official statement on the massacre was made by Mr. Ben-Gurion in the *Knesset* on Dec. 12, 1956. Speaking of "the terrible tragedy which has happened in our midst," the Prime Minister stated that he had immediately appointed a committee of inquiry; that, in accordance with the committee's recommendations, the commander of the patrol and a number of his men would be brought to trial; that preliminary compensation of £200 had been paid to each family affected; and that additional sums of up to £1,000 had been paid for the loss of the family breadwinner. [Compensation was subsequently agreed on the basis of £1,000 for each head of family and £70 for each dependant.] A joint protest was lodged with Dr. Hammarskjöld on Dec. 14, 1956, by the representatives of 11 Arab countries (Egypt, Iraq, Saudi Arabia, Yemen, Jordan, Syria, Lebanon, Tunisia, Libya, Morocco, and the Sudan), who accused the Israeli Government of the crime of genocide.

On the conclusion of the negotiations over compensation—involving a total of about £100,000, including hospital expenses borne by the Government—a *sulha* (the traditional Arab feast of reconciliation marking the end of a blood feud) was held at Kafr Kassim on Nov. 20, 1957, at which the Israeli Government was represented by the Minister of Police and by senior Army and police officers.—(U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - New York Times - Israel Government Press Office, Jerusalem)

A. INDONESIA. — Parliamentary Approval for Soviet Economic Aid.

The Indonesian Parliament passed legislation on Feb. 5 approving the Soviet loan of over $100,000,000 for the supply of capital and consumer goods, machinery, and heavy industrial equipment, which formed part of the technical and economic co-operation agreement signed by Indonesia and the Soviet Union on Sept. 15, 1956. The goods to be bought from the Soviet Union will also include ships. The voting on the Bill was 95 to 18; the *Masjumi* and Socialist parties opposed the Bill, while the Catholic, Protestant, and a number of other small parties abstained.—(Indonesian Embassy, London)

(Prev. rep. 15246 A.)

A. BAGHDAD PACT. — Ministerial Meeting in Ankara. - Mr. Dulles's Participation as Observer. - American Support for Baghdad Pact.

The Council of Ministers of the Baghdad Pact held its fourth session in Ankara from Jan. 27-30 under the chairmanship of Mr. Adnan Menderes, the Turkish Prime Minister. The principal delegates of the member-countries were—Dr. Eghbal, the Persian Prime Minister; General Nuri es-Said, the former Iraqi Prime Minister; Mr. Firoz Khan Noon, Prime Minister of Pakistan; Mr. Adnan Menderes, the Turkish Prime Minister; and Mr. Selwyn Lloyd, the British Foreign Secretary. The United States was represented by Mr. Dulles, the Secretary of State, who attended the Council meeting as an "observer."

The meeting of the Baghdad Pact Council had been preceded by consultations between the four Moslem members of the Pact, held in Ankara on Dec. 10-11, 1957. At these talks Turkey was represented by Mr. Adnan Menderes and Mr. Zorlu (Foreign Minister); Persia by Mr. Ardalan (Foreign Minister); Iraq by Mr. Defteri (acting Foreign Minister); and Pakistan by Mr. M. S. Baig (General Secretary at the Foreign Ministry).

An official statement said that the aim of the Ankara meeting had been "to ascertain, on the eve of the Atlantic Council meeting (see 15965 A), the ideas of the Moslem members of the Pact regarding Middle East problems and, in particular, about subversive Communist activities." It was added (1) that agreement had been reached on "problems of mutual interest"; (2) that it had been noted "that one of the main sources of unrest in the Middle East was the Palestine problem, which has not so far been settled in accordance with the decisions of the U.N. and with justice and equity"; and (3) that M. Menderes had undertaken to bring the views of the countries concerned to the attention of the North Atlantic Council.

Immediately before the meeting of the Baghdad Pact Council Mr. Menderes flew on Jan. 24 to Baghdad, where he was reported to have had long discussions with Crown Prince Abdul Ilah and Mr. Mirjan, the Iraqi Prime Minister. No official statement was issued, but Mr. Menderes said on his return to Ankara that he had discussed with the Iraqi Government "the precautions which have to be taken to ensure the protection of the Arab and Moslem worlds from subversive activities," adding that by "subversive activities" he meant Communism. He said that "complete agreement" had been reached in the discussions.

At the opening session of the Ministerial Council statements were made by all the leading delegates, as summarized below:

Mr. Menderes said that the meeting was taking place at a time when the danger of attack was increasing, and when the Middle East was facing subversive activities on a much greater scale than ever before. The potential attacker was "on the one hand declaring that he had invented new weapons, in order to subject peace-loving nations to moral threats and pressure, and on the other, was sparing no effort to create conflicts between those nations." "With this objective in view," Mr. Menderes went on, "even the slightest differences between the free nations are being exploited, and the ghosts of long-forgotten hatreds are being brought forth from the grave. The aim is to use all these things to cover the desire for aggression and domination, which is assuming new disguises.

"As in the case of other defensive associations of free nations, the duty of the Baghdad Pact nations is speedily to reinforce their political and military solidarity in the face of increasing danger, and also to strengthen the system of mutual economic aid which is the basis of that solidarity. I believe that our efforts in that direction will be facilitated by the fact that the Baghdad Pact has now become a strong alliance . . ."

General Nuri es-Said emphasized that the Baghdad Pact was "not a security arrangement imposed on us" but had "originated from within this area," adding that "our actions have proved beyond doubt that the Baghdad Pact is peaceful and purely defensive in character." Turning to issues of foreign policy which complicated the work of the member-countries, he referred to the Palestine problem; expressed regret at the "aimless and horrible massacres in Algeria"; and stressed that only the observance of U.N. principles could bring a proper solution of the Algerian and Kashmir problems. On the Cyprus issue, Nuri es-Said declared: "To remove any misunderstandings that may have arisen in certain quarters, we want to make it absolutely clear that Turkey has Iraq's unqualified support on the Cyprus question. Any settlement of this question should be based on the historical bonds between Turkey and Cyprus and should take into full consideration the vital requirements of Turkey's security."

Dr. Eghbal particularly stressed the importance of economic development as a basis for strengthening the Pact. In this connexion he announced that the Persian Government were ready to provide 10,000,000 rials (about £47,600) for technical assistance to Pact members.

Mr. Firoz Khan Noon also underlined the need for economic development under the aegis of the Pact; hoped that the challenge thrown down by the Communist world in offering economic aid to under-developed countries would be met; and referred in this connexion to the "crucial role" of the U.S.A. and Britain in the economic activities sponsored by the Pact. He also spoke of the urgent necessity of equipping member-countries with "weapons similar to those which they may have to encounter should peace in this area be unfortunately disturbed."

Dealing with the political situation in general, the Pakistani Prime Minister declared: "Of all the threats to which the Baghdad Pact area is subjected, the most invidious is from the so-called neutralist countries. The part which they are playing in supporting subversion and in providing pseudo-moral bases for it constitutes a serious threat. It is time this danger was recognized and active steps taken to meet it. The peoples of the Baghdad Pact countries are quite bewildered when they find that some of the so-called neutralists are recipients of large-scale aid, not only from Communist countries, but also from Western countries whose policies they are constantly attacking. Unless differentiation can be made between friends and neutralists, the distinction between friends and foes is in great danger of being blurred . . . In certain quarters neutrality is regarded as meaning hostility to one State and friendship with the other, irrespective of precepts or practice. NATO, the Baghdad Pact, and SEATO are dubbed as 'aggressive military alliances,' but not a word is said about the Warsaw Pact and the massive armaments of which it disposes. Building Communist bases in the Middle East is described as a contribution to world peace, whereas minute supplies of purely defensive weapons under strict guarantees by the U.S.A. and the U.K. is a 'threat to the peace of the area.'"

On the Cyprus question, Mr. Firoz Khan Noon recalled that Pakistan had given full support to Turkey at the United Nations, adding that "Turkey's case has got our full approval."

Mr. Selwyn Lloyd spoke of "the basis of complete equality" on which all member-countries co-operated, denied that the Pact was intended to divide the Arab world; and, referring to Soviet attacks on the Pact, declared: "We should take it as a compliment to the efficiency of the Pact that the Soviet Union should think it worth while to attack it so vigorously." The Foreign Secretary expressed himself in favour of a "summit" meeting between the Western Powers and the Soviet Union, provided it was carefully prepared; he added that "our constant aim must always be to reduce East-West tension and to seek agreement with the Soviet Union wherever and whenever this can be achieved, without surrender of our vital interests."

Referring to the financing of the alliance, Mr. Lloyd recalled that Britain had offered £1,000,000 for economic projects at the previous Council meeting. While he could not undertake any future commitments at the present stage, he gave an assurance that Britain, "within the limits imposed by her own economic situation and other commitments," was "determined to promote continued progress in the Economic Committee's work."

Mr. Dulles declared that the U.S.A. "stands firmly behind the resolve of all Middle East nations to remain free and to reinforce peace." He expressed "whole-hearted support" for the Baghdad Pact, stressing that it threatened no-one, obstructed "no legitimate and constructive national aspirations of any people or group of people," and had as its only purpose "co-operation for self-defence." After recalling the Congressional Resolution of 1957 which referred to "the maintenance of the national independence" of the Middle East countries [i.e. the Eisenhower resolution], Mr. Dulles went on: "Reliable independence rests on two pillars—the pillar of defensive security and the pillar of economic health . . . Congress has authorized the President to use armed forces to assist any nation or group of nations in the Middle East—and the Baghdad Pact constitutes such a group—requesting assistance against armed aggression controlled by international Communism . . . The Baghdad Pact countries can be confident that mobile power of great force would, as needed, be brought to bear against any Communist aggressor . . . Also, it is vital that there be forces of national defence. Such forces—with the reinforcement, where needed, of mobile power—can save the people from the scourge of invasion if deterrence fails . . . The United States has contributed and will continue to contribute to this aspect of defence. One of the merits of collective self-defence is that it reduces the requirements for individual self-defence."

As regards "economic health," Mr. Dulles stressed that while "some economic sacrifices are needed for military security, we dare not give so absolute a priority to military requirements that economic health collapses. Indeed, a sound and developing economy is the indispensable foundation for sustained military effort." He promised continued U.S. support for the economic programmes of member-countries.

On the following day Mr. Dulles made another important statement on the U.S. attitude towards the Pact.

"The U.S. delegation," he said, "has made clear that the United States participates wholeheartedly in the commitment of the Baghdad Pact to co-operate for security and defence. Under our constitutional processes, the Government acts in these matters either by treaty process or pursuant to a Congressional resolution. In this case we act pursuant to a Congressional resolution. Our commitments coincide with the treaty commitments and we are backing them up by co-operative effort in the political, economic and military fields."

It was pointed out in the U.S. and British Press that this statement—apparently made in reply to suggestions by the Moslem member-countries that the U.S.A. should become a

full member of the Pact—went beyond Mr. Dulles's declaration at the opening meeting, since it implied that the Congressional Resolution endorsing the "Eisenhower doctrine" had as much effectiveness in terms of military support as formal U.S. membership of the Baghdad Pact.

Mr. Selwyn Lloyd, in his closing speech, stressed that British trade with the regional members of the Pact amounted to nearly £200,000,000 in 1957, without counting trade in petroleum products. "Our opponents," he said, "blow their own trumpet We are too modest. The Russians profess to offer economic aid when, in fact, what they are offering is generally not aid but trade—and usually not on very good terms. If we went in for the same sort of presentation we could claim that all this trade is economic aid, but we make no such claim."

The following communiqué (cross-headings inserted) was issued at the end of the Council's meeting on Jan. 30 :

General Principles.

"The Council . . . reviewed the work of the Baghdad Pact Organization, and adopted the reports and recommendations of (1) the Economic Committee; (2) the Liaison Committee; (3) the Counter-Subversion Committee; and (4) the Military Committee.

"The Council recalled that the Baghdad Pact arose from the desire of the peoples of the area for security from Communist imperialism or Communist-inspired domination in any shape or form. It noted with satisfaction that in spite of attacks on the Pact and its members, the Pact had developed into a strong and cohesive organization representing the best hope for the safeguarding of peace, liberty and independence in the area.

"The purpose of the Pact, a free alliance between equal partners, is the defence and security of the area. This is as vital to world peace as it is to constructive co-operation for the benefit of the 120,000,000 people of the Pact region, who are predominantly Moslems.

"The Council recognized that attempts at subversion in the area must be defeated and peaceful conditions maintained.

"The Council reaffirmed that the economic progress of the Pact area, and the promotion of the social well-being of its peoples, require speedy implementation of its programme of economic development.

The International Situation. - Communist Infiltration in Middle East.

"The Council reviewed the international situation in a series of meetings. A number of these meetings were of a private nature, in which heads of delegations were able to exchange views and information with that frankness which befits the equal and intimate association of member-countries within the Pact . . .

"The Council recognized the need for constant exposure of the familiar Communist technique—that of subversive penetration, falsely presented as friendly co-existence and help for under-developed countries. While the free world has taken bold and important steps in the liberation and granting of independence to many nations in recent years, and while it is striving to settle the problems of the area in a spirit of justice and equality, the Council noted with regret that, in pursuit of its aims, the international Communist movement attempts to exploit nationalism, fear of war, economic distress, the plight of Arab refugees, colonialism, and Afro-Asian sentiment through propaganda and Communist-controlled and influenced organizations. Communist efforts to penetrate the region by means of indirect aggression, such as infiltration and subversion, continue to be a menace and call for constant vigilance and increased solidarity.

"The Council further noted that since its meeting in Karachi in June, 1957, Communist imperialism has increased its efforts to dominate the Middle East. These efforts, in the form of pressure, threats, and false accusations, were particularly directed by the Soviet Union against Turkey, whose calm and courageous stand evoked the admiration of her associates in the Council . . .

"The Council . . . devoted considerable time to discussion of the situation in the Mediterranean region, the Middle East, and South Asia, and emphasized that situations which imperil the security of the Pact area should be resolved in accordance with the principles of justice and the U.N. Charter.

"The Council was of the opinion that the indiscriminate use of the veto in the Security Council should be given up as an instrument of cold war, so that the United Nations can function as an effective force for the settlement of disputes.

"The Council believed that the concept of the U.N. Emergency Force as an instrument of the United Nations, and its use in areas of disturbance, should be recommended for acceptance to U.N. members.

Economic, Technical and Scientific Co-operation. - Increased U.S. Grant for Telecommunications Network.

"The Council reviewed the work of the Economic Committee and approved recommendations in the fields of health, agriculture, communications, public works, trade, and the financing of joint projects.

"It noted with satisfaction that a firm basis of economic co-operation had been established on which the pact could continue to build, and that . . . there is now a promising programme of technical assistance which is developing on a co-operative basis. This will be of great benefit to living standards in the region.

"Technical assistance already provided or planned covers the following fields—health, agriculture, pest control, animal health, and animal production. In the field of technical assistance the Persian Government have allocated 10,000,000 rials [see above] and the Turkish Government £T.750,000 over a period of five years. These are in addition to the offers made at Karachi—namely, £1,000,000 over five years by the United Kingdom and 500,000 rupees by Pakistan.

"The Council noted that progress has been made in the implementation of approved joint projects. It approved a resolution of the Economic Committee for further implementation of those projects. This resolution recommends that the donor Governments, members of the Baghdad Pact Economic Committee, give early and favourable consideration to providing assistance for such projects, and that member-countries of the region continue their present efforts to implement them.

"The Council recognized the need for specification on approved projects, and was pleased to note that the survey for the telecommunications network linking the capitals of the area members was already under way. It received with appreciation the announcement by the United States that it expected to provide an additional $10,000,000, thus ensuring that most of the funds needed for the construction of this network will be available. [Mr. Dulles had announced on Jan. 24 that the U.S.A. would make a grant of $10,000,000 for telecommunication links between the Baghdad Pact capitals, in addition to the $8,000,000 already provided for surveys now being carried out.]

"The U.S.A. referred also to the possibility of obtaining additional financing for joint projects from the World Bank, the Export-Import Bank, and the recently established development loan fund.

"The Council noted that co-operation among members of the Economic Committee and the sub-committees, and in the Nuclear Centre and its Scientific Council, is already making a contribution to raising the standards of technical and scientific knowledge in the Pact countries. It decided that their deputies should examine the possibilities of extending the present programme into wider fields.

Military Co-operation. - Combined Military Planning Staff.

"The Council noted that the Combined Military Planning Organization had been set up in Baghdad last autumn. This gave considerable impetus to defensive military planning, increased the effectiveness of the defence efforts of the signatory States, and marked a significant step forward in the determination of member-nations to uphold their sovereignty. The Council approved the designation of the permanent planning organization as the Combined Military Planning Staff. Among the duties of the Combined Military Planning Staff are the planning and co-ordinating of combined staff training exercises. The Council also accepted a recommendation of the Military Committee to hold combined staff training exercises in the near future.

"The Council accepted the Military Committee's recommendation to appoint Lieut.-General Ekrem Akallu, of the Turkish Army, as Director of the Combined Military Planning Staff for the year 1958. He will be assisted by Major-General Daniels Campbell of the U.S. Forces, who has been deputy director of the Combined Military Planning Staff since September 1957. The Council commended the work in 1957 of the first director, Major-General Habibullah Khan, of the Pakistan Army.

Next Meeting of Baghdad Pact Council.

"The Council decided to hold its next meeting at Ministerial level in London in July, 1958. Meanwhile the Council will continue to meet regularly at the deputy level."

Other recent developments in connexion with the Baghdad Pact are summarized below :

Meeting of Economic Committee. The Economic Committee of the Baghdad Pact met in Ankara from Jan. 17-21, shortly before the Ministerial meeting. A communiqué was issued urging concentration on three major objectives : (1) improved transportation and communications between the Middle East members of the Pact; (2) encouragement of free movement of persons and goods among those countries; and (3) a study of the possibility of creating a free trade area in the Pact region. Stress was also laid on the need for exchanges of views on the development plans of member-countries, and for reinforcement of national aid services in connexion with flood and earthquake disasters.

Meeting of Counter-Subversion Committee. This Committee met in Ankara from Jan. 21-25 to review the measures taken in combating Communist and other subversive activities during the past two years. It expressed satisfaction with the results already achieved; stated that its efforts would be continued and expanded "with determination and vigour" in face of the continued threat of subversive activities; and decided to co-ordinate measures against Communist subversion by exchanges of information among member-countries.

Joint Measures for Prevention of Smuggling. The Moslem member-countries signed a convention on Jan. 20 aimed at preventing smuggling in the Pact area. It provided for greater liaison between the Customs authorities of Turkey, Iraq, Persia, and Pakistan, the correlation of hours and functions of Customs offices on common frontiers, and exchanges of lists of goods subject to contraband.

Air Co-operation between Moslem Members. The Chiefs of the Air Forces of Pakistan, Persia, Turkey, and Iraq issued a joint statement in Karachi on Feb. 12 stating that the four countries would pool their knowledge to strengthen the defensive ability of their air forces.

During the Ministerial Council's meeting in Baghdad, Mr. Selwyn Lloyd and Sir Hugh Foot (the Governor of Cyprus) had discussions on the Cyprus question from Jan. 28-30 with Mr. Menderes and the Turkish Foreign Minister, Mr. Zorlu. The talks were held in closed session and no statement was issued, but it was understood that they were of an exploratory nature and that the Turkish statesmen had recapitulated their Government's views on the Cyprus problem.—(Times - Daily Telegraph - Manchester Guardian - New York Times - Turkish Embassy Press Office, London - Pakistan High Commissioner's Office, London) **(Prev. rep. Baghdad Pact, 15617 A.)**

A. UNITED KINGDOM. — Issue of 5½ per cent Exchequer Stock and Funding Stock. - Premium Bond Sales in 1956-57.

The Treasury announced on Jan. 9 the issue for cash of £500,000,000 5½ per cent Exchequer Stock, 1966, at 99½ per cent. It was stated on Jan. 14 that the issue had been oversubscribed; applications for Stock up to and including £5,000,000 had been allotted in full, and those for larger amounts as to about 74 per cent of the amounts applied for. Though no details were officially published it was stated in the Press that a substantial amount of the new Stock had been applied for by the banks.

The issue of £300,000,000 5½ per cent Funding Stock, 1982-84, at a price of 98½ per cent, was announced on Feb. 11. The new Stock, for which subscription lists opened on Feb. 14, will be free of U.K. tax for non-resident investors and can be bought with security sterling It was announced late on Feb. 14 that applications for amounts up to and including £1,000,000 had been allotted in full, and that those for larger amounts had received about 82 per cent of the amount applied for.

On Nov. 1, 1957, it had been announced by the chairman of the National Savings Committee (Lord Mackintosh of Halifax) that £114,000,000 worth of Premium Bonds had been sold in the first year since their introduction, and that only £2,500,000 had been withdrawn.—(Financial Times)

(Prev. rep. 15558 B ; 15362 A.)

B. SOVIET UNION. — Attack on Baghdad Pact.

A lengthy statement strongly attacking the Baghdad Pact was issued by the Tass Agency on Jan. 22, a few days before the Council of Ministers of the Baghdad Pact met in Ankara for its fourth session (see 16023 A).

After saying that the Baghdad Pact Council was meeting "at a time when the idea of peaceful co-existence is gaining an increasing hold on the minds of men and women," the statement went on to describe the Pact as "a military organization pursuing aggressive and expansionist aims." It accused the United States and Britain—who were described as the "inspirers" of the Pact—of "seeking to divide the countries of the Arab East," adding that the "colonialist designs of the bosses of the Baghdad Pact" had given rise to "understandable alarm even in some Baghdad Pact countries." America, Britain, and Turkey were further accused of "persistently striving to expand the Baghdad Pact by drawing new members into it, above all Lebanon and Jordan," and of exerting pressure on the other members of the Pact "to take the slippery and precarious path of participating in preparations for an atomic war"

The Tass statement went on to allege that the United States was striving to establish nuclear and rocket bases in the Pact area and "near the Moslem Holy Places," commenting that there was "little in common between the interests of the Moslem world and the Pentagon's strategic plans." After criticisms of the NATO and SEATO organizations, and a denunciation of Turkish policy, the statement commended the resolutions of the recent "Afro-Asian Solidarity Conference" in Cairo (see 16000 A) as having "demonstrated the growing unity of the peoples of the East in the struggle against colonialism."

In conclusion, the Tass statement said that the Middle East should become "a zone of peace free from nuclear and rocket weapons."—(Soviet Embassy Press Department, London)

C. FRANCE.—Socialist Party expels M. André Philip.

M. André Philip, a former deputy for the Rhône department and onetime Minister of Finance, was expelled from the French Socialist Party on Jan. 25 for persistent indiscipline. An opponent of the Anglo-French intervention in Egypt during the Suez crisis, he had also expressed strong opposition to the "Lacoste policy" in Algeria and had accused the party leader (M. Guy Mollet) of "dictatorial" tendencies and of "stifling" freedom of discussion within the party. His prolonged controversy with M. Mollet culminated in the publication of a book, *Le Socialisme trahi*, in which M. Philip attacked what he described as the "degradation" of the French Socialist Party.—(Le Monde, Paris) **(Prev. rep. 14307 E ; 14052 D.)**

D. HUNGARY. — M. Kadar resigns Premiership. - Dr. Muennich appointed Prime Minister. - Death of M. Imre Horvath. - New Foreign Minister.

In a statement on Jan. 27 to the Hungarian National Assembly, M. Janos Kadar announced his resignation from the Premiership in order to concentrate on his duties as First Secretary of the Hungarian Revolutionary Socialist Party. The National Assembly accepted M. Kadar's resignation and unanimously agreed to the following governmental changes proposed by M. Kadar: (1) the appointment of Dr. Ferenc Muennich (hitherto First Deputy Premier) as Prime Minister *vice* M. Kadar; (2) M. Antal Apro (hitherto a Deputy Premier) as First Deputy Premier *vice* Dr. Muennich; (3) Mme. Valeria Benke (head of the Hungarian State Radio) as Minister of Culture *vice* M. Gyula Kallai. In proposing these changes M. Kadar stated that M. Kallai would devote himself to his duties as a member of the party secretariat, and that he (M. Kadar) himself would be willing to serve as a Minister of State—i.e. without portfolio.

Hungary was the only Communist country in which the posts of Prime Minister and First Secretary of the party had been combined in a single individual—M. Kadar having held both positions concurrently since assuming the Premiership after the suppression of the Hungarian uprising. The separation of the two posts thus brought Hungary into line with the other Communist countries of Eastern Europe.

Dr. Ferenc Muennich (76), a lawyer, was conscripted into the Austro-Hungarian Army in the First World War and became a Communist while in a Russian prisoner-of-war camp. After the Russian revolution he helped Bela Kun to establish the short-lived Communist dictatorship in Hungary, and fled to Russia after Bela Kun's overthrow. He fought in the Spanish Civil War, returned again to Russia (where he lived throughout the Second World War), and became Chief of the Budapest Police in 1946, holding that post for three years. From 1949 to 1956 he served successively as Hungarian Ambassador in Helsinki, Sofia, Moscow and Belgrade. Regarded at one time as a "moderate" Communist, he remained relatively in the background during the Rakosi dictatorship and on Oct. 27, 1956, became Minister of the Interior in the Government formed by M. Imre Nagy shortly before the Russian intervention. A few days later, however, he left with M. Kadar to join the Russians, and after the suppression of the uprising he was appointed Deputy Premier and Minister of Public Security in M. Kadar's Government—in which capacity he played a leading role in suppressing the revolutionaries.

M. Antal Apro, a member of the party's Politburo, is regarded as belonging to the "Stalinist" wing of the party; the Vienna Correspondent of *The Times* said that his promotion was regarded as "an uneasy compromise and an intended counter-weight to Mr. Muennich's appointment." **M. Kallai,** also a member of the Politburo, was imprisoned with M Kadar during the Rakosi regime and is believed to share his views. **Mme. Benke,** a member of the party's Central committee, is believed to have opposed the "Rakosi group" before the Hungarian uprising and to have identified herself at the time with the "liberal" wing of the party.

M. Imre Horvath, the Foreign Minister, died on Feb. 2 and was succeeded on Feb. 16 by his deputy, Dr. Endre Sik (67). Dr. Sik was Minister in Washington in 1948-49, subsequently headed the political division of the Hungarian Foreign Office, and had been Deputy Foreign Minister since 1954.

Imre Horvath (57), a locksmith in his early years, took part in the abortive Bela Kun revolt and lived in the Soviet Union from 1922-32. Arrested by the Horthy Government for subversive activities after his return to Hungary, he spent 13 years in prison and was interned for a time in the Dachau concentration camp (Germany) during the Second World War. He became a career diplomat after the war and served as Minister in Washington, London and Prague between 1949 and 1956, when he was elected to the central committee of the Hungarian Workers' Party. He became Foreign Minister in the governmental changes which followed the fall of M. Rakosi, retained that post in M. Nagy's first Government formed on Oct. 27, 1956, but was dropped from M. Nagy's second Government formed on Nov. 3. Reappointed Foreign Minister in the Kadar Government, he led the Hungarian delegation at the U.N. during the debates on the Hungarian uprising, defended the Kadar regime against the strong criticisms directed against it, and walked out of the General Assembly after it had adopted the resolution denouncing Soviet armed intervention in Hungary [see page 15406].

Pastor Janos Peter, the former Calvinist bishop of Tiszantul, became Deputy Foreign Minister in succession to Dr. Sik. Pastor Peter was bishop from 1949 until the outbreak of the Hungarian revolution, when his resignation was demanded by the Calvinist Church Synod. He became chairman of the Hungarian office for cultural relations in December 1956, and was a member of the Hungarian delegation to the United Nations.—(Times - Manchester Guardian - Daily Telegraph - New York Times - Le Monde - Neue Zürcher Zeitung)

A. VENEZUELA. — Overthrow of President Pérez Jimenez. - Formation of Governmental Junta.

The ten-year dictatorship of President Marcos Pérez Jimenez was overthrown by a popular revolt in Caracas on Jan. 21-22 and was succeeded by a Governmental junta headed by Rear-Admiral Wolfgang Larrazabal, Commander-in-Chief of the Venezuelan Navy. The junta, in which both military and civilian representatives were included, restored the democratic freedoms that had been suppressed under the Pérez Jimenez regime and announced that free Congressional elections would be held later in the year, to be followed by Presidential elections. The overthrow of President Pérez Jimenez, and the events leading up to it, are described below under cross-headings.

The December Plebiscite.

A plebiscite was held on Dec. 15, 1957, at which the electorate were asked to signify their approval or otherwise of "the aims and achievements of the present Government," and whether they wished to re-elect President Pérez Jimenez for a further five-year presidential term beginning in April 1958. Although it was originally planned to hold a presidential election on Dec. 15, the Venezuelan Government had announced on Nov. 4 (*a*) that it proposed instead to hold a plebiscite on the above-mentioned lines, and (*b*) that an affirmative vote for President Pérez Jimenez would be regarded also as a vote for the deputies of a new National Congress, of which the Government would draw up a list before the plebiscite was held. A law embodying these provisions was passed by both Houses of the Venezuelan Congress later in the month; it stated specifically that no political parties would be allowed to take part in the plebiscite, nor would any form of party propaganda or campaigning be permitted.

The plebiscite accordingly took place on Dec. 15, the electors being asked to signify their approval or disapproval of President Pérez Jimenez by putting one of two coloured cards into the ballot-boxes—a blue card, indicating support for the regime, or a red card, indicating opposition. The Electoral Commission subsequently announced that 72 per cent of the votes had been cast in favour of President Pérez Jimenez, the figures for the Caracas Federal District (the capital and its environs) being given as 487,000 blue cards (affirmative), 98,000 red cards (negative), and 53,000 blank votes.

Abortive Air Force Revolt.

A revolt against the Government broke out on Jan. 1, 1958, at the Maracay air base (50 miles west of Caracas), one of the principal bases of the Venezuelan Air Force. Jet planes from Maracay flew over the capital in several waves, one being shot down by anti-aircraft fire; otherwise no casualties occurred, nor were any attacks made on ground targets. A Government communiqué (Jan. 2) said that the "armed insurrection" had been confined to Maracay, that it had been completely suppressed, and that "scattered elements of the seditious group" were being pursued. Thirteen Venezuelan air officers arrived on the same day at Barranquilla (Colombia), apparently to escape arrest.

Changes in Venezuelan Government.

Although a strict press censorship was in operation, it became apparent during the first week of January that President Pérez Jimenez was encountering strong opposition from influential sections of the armed forces who were demanding, firstly, a relaxation of the dictatorial regime, and secondly, the dismissal of persons who had incurred particular unpopularity by their actions in recent months—notably the Chief of the Secret Police, Señor Pedro Estrada, and the Minister of the Interior, Señor Laureano Vallenilla, both of whom had been among the President's closest collaborators for several years.

On Jan. 10 President Pérez Jimenez carried out a Cabinet reorganization involving the dismissal of Señores Estrada and Vallenilla and the appointment of a number of new military and civilian Ministers. Both Señor Estrada and Señor Vallenilla left the country and were understood to have gone into exile in the Dominican Republic. The Defence portfolio was given to General Romulo Fernandez (Chief of Army Staff), who—as later became known—had played a leading part in urging the President to reform the Government and to dismiss unpopular Ministers and officials.

Three days later, however, President Pérez Jimenez announced that he had taken over the Defence portfolio from General Fernandez in order "to ensure the continued unity of the armed forces"; a separate announcement said that General Fernandez was leaving the country "on an official mission."

The Caracas Revolt. - Overthrow and Flight of President Pérez Jimenez.

The first overt civilian opposition to the regime manifested itself in a series of student riots in Caracas, extending over several days (Jan. 14-17), in which the police used tear-gas and clubs to break up large groups of youths and schoolboys demonstrating against the Government and demanding the restoration of democratic liberties; on one occasion the police opened fire, several youths being wounded. Similar violence was used to disperse a number of women demonstrators who gathered on Jan. 17 outside the headquarters of the *Seguridad Nacional* (the secret police) to demand the release of political prisoners.

On Jan. 18-19 a number of manifestos and strike leaflets, issued by various clandestine organizations, were distributed in the streets of Caracas calling for the overthrow of the dictatorship and for the restoration of democratic freedoms. The Patriotic Junta, an underground organization which had been active for many months beforehand (see below), issued a call for a general strike on Jan. 21, while the "Venezuelan Students' Front" called upon all students "from kindergartens to universities" to cease to attend classes "until the tyranny of Pérez Jimenez is overthrown." Among the manifestos widely distributed was one signed by 87 prominent persons—including 11 former Cabinet ministers, three former State Governors, two former Mayors of Caracas, and well-known scholars, workers, businessmen, industrialists, and members of the liberal professions—appealing for the restoration of freedom in Venezuela and the ending of repression.

A 48-hour revolt which resulted in the overthrow of the dictatorship and the flight of President Pérez Jimenez broke out in Caracas on Jan. 21, simultaneously with the general strike which had been called by the Patriotic Junta and was widely observed. Despite the imposition of a curfew, and Government orders to fire on any demonstrations, thousands of citizens attacked the secret police headquarters (where some 300 political prisoners were interned) and the nearby offices of the Government newspaper *El Heraldo*, while others overturned and set fire to police vehicles. The police used tear-gas in an effort to disperse the crowds, made repeated charges with clubs and machetes, and fought pitched battles with civilians in which both sides used rifles and machine-guns. No assessment of casualties was possible at the time because of the censorship, but it was subsequently estimated that over 300 persons had been killed and 1,000 wounded.

Some 10,000 civilian demonstrators attacked the headquarters of the *Seguridad Nacional*, where over 100 secret police barricaded themselves in the building and opened fire on the crowds with machine-guns after refusing to surrender. Army units, including tanks, helped the crowds to break into the building after a battle lasting nine hours; several members of the secret police were shot or beaten to death, the political prisoners were liberated from their cells, and the building was completely wrecked after all secret police files had been destroyed. The offices of *El Heraldo* were also wrecked and left ablaze. Elsewhere in the capital, crowds wrecked the offices of the Electoral Commission which had proclaimed the re-election of President Pérez Jimenez after the December plebiscite.

Faced with an ultimatum from the armed forces, many of whose leaders had sided with the demonstrators, President Pérez Jimenez surrendered in the early hours of Jan. 23. He was allowed to leave the country in a Venezuelan aircraft, and arrived later the same day at Ciudad Trujillo (capital of the Dominican Republic), accompanied by his family and several of his former political associates. The news of the ex-President's surrender and flight was greeted with enthusiastic demonstrations in Caracas and other Venezuelan cities.

Formation of Governmental Junta. - New Cabinet.

A five-man Governmental Junta was sworn in on the same day (Jan. 23) at the Miraflores Palace, the seat of the Presidency. Its first actions were to restore all political freedoms suppressed since President Pérez Jimenez seized power in November 1948; to abolish the secret police; to lift the press censorship; to order the release of all political prisoners; and to proclaim a general amnesty for political exiles. It also pledged itself to hold free elections, to respect all Venezuela's international commitments, and to restore diplomatic relations with Argentina, Chile, Uruguay, and Costa Rica, all of whom had severed relations with the regime of President Pérez Jimenez.

The Junta was headed by Rear-Admiral Wolfgang Larrazabal as stated above, its other members being Colonel Carlos Luis Araque, Colonel Pedro José Quevedo, Sr. Eugenio Mendoza, and Dr. Blas Lamberti.

Admiral Larrazabal had originally appointed a five-man military junta consisting of himself and four colonels, representing the Army, Navy, Air Force, and police force. At the request of the Patriotic Junta, however, two of the colonels were replaced by civilian members in the persons of Sr. Mendoza (then in New York), a well-known industrialist and philanthropist, and Dr. Lamberti, a civil engineer and former professor of mathematics. The Patriotic Junta had expressed its support for the Governmental Junta but had urged that the latter body should include civilians as well as military officers.

The Governmental Junta appointed a new Cabinet on the same evening in which all the portfolios were held by civilian Ministers with the exception of the Defence portfolio. Its members were :

Sr. Virgilio Torrealba—Interior; Sr. Oscar Garcia—Foreign Affairs; Colonel Jesus Maria Castro—Defence, Sr. Oscar Machado—Communications; Sr. Carlos Galavis—Agriculture; Sr. Victor Alvarez—Labour; Sr. José Lorenzo—Mines; Sr. Arturo Sosa—Finance; Dr. Carlos Luis Gonzalez—Health; Sr. René d'Sola—Justice, Sr. Oscar Palacio—Economy; Dr. Julio de Armas—Education; Sr. Victor Rotondaro—Public Works.

The new Minister of Communications, Sr. Machado (a prominent businessman and industrialist), was one of the signatories of the "freedom manifesto" issued before the revolt, while the new Minister of Education (Dr. de Armas), was formerly Director of the University of Caracas. Colonel Castro, the new Minister of Defence, led the revolt at the Maracay Air Force base on Jan. 1, and was released from prison during the uprising.

Rear-Admiral Larrazabal announced on Jan. 27 that elections for a Constituent Assembly would be held during 1958 and Presidential elections about six months later, probably some time in 1959 ; he pointed out that it would be necessary to hold the Assembly elections before the Presidential elections in order that a new electoral law could be drafted and other necessary constitutional reforms carried out. Admiral Larrazabal said that the new Government would follow an "impartial middle-of-the-road" policy, maintain Venezuela's traditional friendship with the United States, and continue the large-scale programme of public works begun by the former regime. He had previously given assurances that all foreign investments in Venezuela would be respected, including the large U.S., British, and other foreign investments in the oil industry.

Rear-Admiral Larrazabal (46) comes of a family which has been prominently connected with the Venezuelan Navy for several generations, his father, brother, and uncle having all held high naval command. A career naval officer throughout his life, he has never been identified with any political group but was known to have had sharp differences of opinion with President Pérez Jimenez. Born in Caracas, he received his naval training in the United States and subsequently spent three years in Washington as Venezuelan Naval Attaché.

The Patriotic Junta.

It was disclosed on Jan. 24 that the Patriotic Junta—the underground civilian organization which played a key role in overthrowing the dictatorial regime of President Pérez Jimenez—had been founded and directed by Sr. Fabricio Ojeda, a 29-year-old journalist who had been active in politics for several years and had spent five months in prison in 1952. The creation, activities and aims of the organization were described in a broadcast by Sr. Ojeda after the revolt.

Señor Ojeda explained that the idea of forming the organization had come to him in June 1957, when he was working as a reporter on the newspaper *El Nacional*. He had succeeded in enlisting the support of all the proscribed political parties, from the Right to the Left, and had been appointed president of the Patriotic Junta in December. Four of Venezuela's main political parties—the Christian Democrats (*Copei*), the Republican Democrats, the Democratic Action party, and the Communists—were represented in the organization, all of whose decisions required unanimity. In addition to a directing committee of four persons (one from each party) there were 100 key persons unknown to one another, the necessary co-ordination being maintained through the various parties grouped in the Patriotic Junta. A number of committees—of factory workers, women, students, etc., in addition to strike, propaganda, and "violence committees"—had been set up in preparation for the overthrow of the Pérez Jimenez regime. Although this aim had been successfully accomplished, the Patriotic Junta—which Sr. Ojeda described as a "super-party" directing the nation's political life during the present emergency—would remain in existence for the time being.

Señor Ojeda stressed that the operations had been conducted in such secrecy that none of the "inner committee" had been aware of the identity of the other members until the revolt was over. All had operated under *aliases* and *noms-de-guerre*, he himself having been variously known as "Alonso," "Antonio" and "Professor Soria." After saying that this was "the first time in Venezuelan history that Communists and *Copeianos* have sat together," he expressed his conviction that there was no danger of the Communists gaining control of the Patriotic Junta. All the parties stood for free elections and freedom of ideas, and his own party (the Republican Democratic Union) were opposed to Communism. Señor Ojeda said that the Patriotic Junta would support the Governmental Junta on condition that a Government of "national union" was created in due course.

Agreement between Political Parties.

The leaders of the three main Venezuelan parties—Dr. Romulo Betancourt (Democratic Action Party), Dr. Jovito Villalba (Republican Democratic Union) and Dr. Rafael Caldera (Christian Democratic Party)—signed an agreement in New York on Jan. 23 for the formation of a "Civic Front" so as to avoid party strife until democratic government had been fully restored in Venezuela. All three parties had been proscribed under the Pérez Jimenez regime, their leaders having lived in exile in the United States or Mexico. It was stated that the Civic Front would aim at promoting "a national government able to avoid the return of military rule and to advance economic and social progress." The Christian Democratic Party (popularly known as *Copei*) is right-centre and allied to the Roman Catholic Church, the Democratic Action Party is left-centre, and the Republican Democratic Union is leftist but anti-communist.

Expropriation of Property of Ex-President Pérez Jimenez.

The seizure of all properties belonging to ex-President Pérez Jimenez was decreed by the Governmental Junta on Feb. 7, a commission being appointed to investigate alleged misappropriation of funds during the former regime. The Junta issued a statement saying that it was "a notorious fact that during the deposed regime the property of the nation was illegally taken and official influence used in amassing illegal riches" ; it was added that a major part of these "illegal riches" had been taken out of the country.

In his statement on Jan. 27, referred to above, Rear-Admiral Larrazabal alleged that ex-President Pérez Jimenez had apparently "got away with millions of dollars," and said that a thorough investigation would be conducted into "all financial dealings of Pérez Jimenez," including those with foreign investors.

Ex-President Perón leaves Venezuela.

One of the results of the Caracas revolt was that ex-President Perón of Argentina was obliged to leave Venezuela, where he had been living in exile for 18 months, and to seek refuge in the Dominican Republic. Large crowds demonstrated against the former Argentine dictator during the uprising, and attempts were made to storm the Dominican Embassy when it was learned that he had taken refuge there. Strong contingents of Venezuelan troops were stationed round the embassy to guard it against attack, and on Jan. 26 Señor Perón requested permission to leave for the Dominican Republic, whither he had been preceded by ex-President Pérez Jimenez. Permission was granted by the Governmental Junta, and Señor Peron, accompanied by several former *Peronista* leaders, was accordingly flown to Ciudad Trujillo in a Venezuelan military aircraft.

The revolution in Venezuela, and ex-President Perón's expulsion from that country, were enthusiastically welcomed in Argentina, which had severed relations with Venezuela in July 1957 (see 15671B). Great crowds demonstrated in Buenos Aires against ex-President Perón and ex-President Pérez Jimenez—whose effigies were publicly hanged and burned outside the Congress building—and speeches were made violently denouncing dictatorships in Latin American countries, and the Paraguayan dictatorship in particular.

Argentina restores Diplomatic Relations with Venezuela.

President Aramburu of Argentina issued a decree on Jan. 29 restoring diplomatic relations with Venezuela. The new Venezuelan Government was also recognized by nearly all other Latin American countries, as well as by the United States and Great Britain.—(New York Times - New York Herald Tribune - Times - Manchester Guardian - Le Monde)

A. BURMA. — Commonwealth War Memorial.

A war memorial was unveiled on Feb. 9 at Taukkyan (22 miles from Rangoon) commemorating over 27,000 men of the Commonwealth forces who fell in the Burma and Assam campaigns and who have no known grave. The memorial, erected by the Imperial War Graves Commission, was unveiled by General Sir Francis Festing (C.-in-C., Far East Land Forces) in the presence of the Burmese Prime Minister (U Nu), members of his Cabinet, and relatives of those commemorated. Units of the British, Commonwealth and Burmese forces took part in the ceremony, and prayers were said by Christian, Buddhist, Moslem, and Gurkha priests. Of the 27,000 men commemorated, more than 19,000 were members of the Indian Army.—(Times)

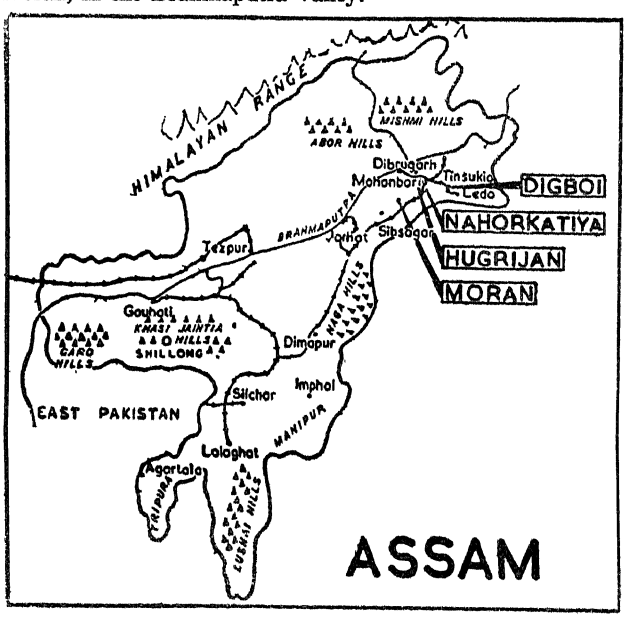
A. INDIA. — New Company to exploit Assam Oilfields. - Proposed Construction of Oil Refineries in Assam and Bihar. - Inauguration of Visakhapatnam Refinery. - Oil and Natural Gas Commission.

An agreement for the formation of a company—partly privately owned and partly public owned—to explore and exploit the oil resources of Upper Assam was signed in Delhi on Jan. 14 between the Government of India and the Burmah Oil Company. The broad features of the agreement had previously been announced in the *Lok Sabha* on Dec. 6, 1957, by the Minister for Steel, Mines, and Fuel (Sardar Swaran Singh).

The agreement provided for the new company to be incorporated and registered in the State of Assam under the name of Oil India Private Ltd. Its authorized capital would be 500,000,000 rupees (£37,500,000), of which two-thirds would be provided by the Burmah Oil Company Ltd. (of which the Assam Oil Company Ltd. is a wholly-owned subsidiary) and one-third by the Government of India. The new company would take over the assets of the Assam Oil Company in the newly-discovered oil areas of Nahorkatiya, Hugrijan, and Moran, in the Brahmaputra Valley.



The map shows the oil-producing areas in Assam.
(*Indian High Commissioner's Office*, London)

In addition to undertaking the production of oil, the new company would also arrange for the construction in two stages, and the operation, of a pipeline to transport crude oil from the Assam oil wells to Barauni (Bihar). The first stage would be the laying of the pipeline to an intermediate locality in Assam, to be agreed between the Government of India and the Burmah Oil Company, whilst in the second stage the pipeline would be extended to Barauni.

The oil produced by the new company would be sold to two refineries to be established by the Government of India as public undertakings. The delivery price for the crude oil payable by each refinery would be determined as either (i) the lowest price at which crude oil could be secured by the refinery from any alternative source for delivery at Calcutta; or (ii) the cost incurred by the new company plus a reasonable commercial return, whichever was less. The price would accordingly be fixed by the new company (with the approval of the Government of India) after examination of costs, and would be subject to review every six months.

The Burmah Oil Company would advance a sterling loan of £10,000,000 to the new company to meet the foreign exchange content of the cost of the first stage of construction of the pipeline and related facilities. The first refinery would be located in Assam, at the terminus of the first stage of the pipeline, and the second at Barauni.

The agreement also provided (*a*) that Oil India Private Ltd. would employ Indian nationals wherever possible; and (*b*) that, in addition to the training programme already being carried out by the Assam Oil Co., a further programme of training Indian personnel would be arranged between the Government of India and Oil India Private Ltd.

The Burmah Oil Co., through the Assam Oil Co., had been prospecting and producing oil in Assam for over 60 years, the first well at Digboi having been drilled in 1890 and a refinery erected in 1930. This refinery, with an output of about 400,000 tons of high quality petroleum products a year, is still India's only indigenous producer of oil.

In 1954 oil was found at the village of Nahorkatiya in Upper Assam, followed by discoveries of new fields at Hugrijan and Moran in the same area. Although concessions to prospect the new areas were granted to the Assam Oil Co. by the Indian Government in 1955, the subsequent negotiations on their commercial exploitation proved long and difficult. A preliminary agreement for the formation of a "Rupee Company" in Assam was announced in the Indian Parliament on Dec. 18, 1956, but a controversy arose over the location of the refinery to deal with the crude oil from the new oilfields.

A special committee of experts appointed by the Government on Oct. 2, 1956, including a French and a Rumanian oil expert, unanimously reported on Dec. 2, 1956, that Calcutta was the most suitable site for the refinery, having regard also to the fact that oil reserves in the Assam area were likely to be much larger than originally estimated. This recommendation aroused strong feelings in Assam, where it had been proposed that the new refinery should be located at Gauhati, and the Assam Government proposed in July 1957 that it should itself build a refinery in the State. A special "action committee" launched a *satyagraha* campaign on Aug. 14, 1957 for the setting-up of an oil refinery in Assam. The Government of India's final decision to build one refinery at Barauni (Bihar) and another in Assam represented a compromise in face of the local agitation.

The Minister of Natural Resources (then Mr. Malaviya) had stated on Nov. 17, 1956, that it would be possible to produce 3,000,000 tons of oil per annum by 1959 as a result of the recent intensive drilling operations by the Assam Oil Co. It was hoped to increase production to 5,000,000 tons in 1962.

It was announced on Dec. 24, 1957, that negotiations for the setting-up of the State-owned oil refinery in Assam had been initiated by the Government of India with a consortium of French oil refineries, and that the Assam refinery would have an annual capacity of 775,000 tons and would cost about 150,000,000 rupees (£11,250,000), including 60,000,000 rupees (£4,500,000) in foreign exchange.

Creation of Oil and Natural Gas Commission.

It had previously been announced in Delhi on Aug. 19, 1956, that the Government of India had set up an Oil and Natural Gas Commission to undertake the exploration, exploitation, and refining of mineral oil throughout the country.

It was stated that the Commission would absorb the Directorate of Oil and Natural Gas; would have its headquarters at Dehra Dun; and would have powers of administration and implementation of the agreements with oil companies for joint or participatory working. It would also advise the Central Government on matters relating to the exploration, exploitation, and refining of oil and natural gas resources. The Commission consists of Mr. K. D. Malaviya (Minister for Natural Resources), as chairman; Mr. A. M. Ghosh (head of the Oil and Natural Gas Directorate); and Mr. G. S. Menon (joint secretary at the Ministry of Finance).

Inauguration of New Oil Refinery.

The third refinery to be built under the First and Second Five-Year plans was inaugurated at Visakhapatnam (Andhra Pradesh) on Nov. 30, 1957. Built by the Caltex company, it cost 150,000,000 rupees (£11,250,000) and can process 13,500 barrels of crude oil a day.

The Visakhapatnam refinery is the first to be built on the East Coast, the other two oil refineries built under the Five-Year plans being at Bombay.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. Oil Refineries, 14103 A; 13935 D; Oil Policy, 15113 A; 14872 B.)**

B. SOUTHERN RHODESIA. — New Cabinet.

The Cabinet crisis in Southern Rhodesia was ended on Feb. 17 by the formation of a new Cabinet by Sir Edgar Whitehead, the newly-elected leader of the United Federal Party. The outgoing Prime Minister, Mr. Garfield Todd, was included in the new administration, in which portfolios were allocated as follows:

Sir Edgar Whitehead ..	Prime Minister and Minister for Native Affairs.
Mr. R. S. Garfield Todd ..	Labour and Social Welfare.
Mr. Cyril Hatty	Treasury and Native Education.
Mr. Geoffrey Ellman Brown	Roads, Local Government, Housing and Irrigation.
Mr. Reginald Knight, Q.C.	Justice and Internal Affairs.
Sir George Davenport ..	Mines, Lands and Surveys.

Sir George Davenport will be Leader of the House and will deputize for Sir Edgar Whitehead until the new Prime Minister has obtained a seat in the Southern Rhodesian Parliament. (Federal Information Department, Salisbury) **(16008 A.)**

FEBRUARY 22—MARCH 1, 1958

A. UNITED KINGDOM. — The Defence White Paper. - Progress in implementing New Policy. - Defence Statistics, 1958-59.

A White Paper outlining the progress made in implementing the policy set out in the Government's "Statement on Defence" of April 1957 (see 15493 A) was published on Feb. 16, and is summarized under cross-headings below.

Balance of Arms. The White Paper first discussed the implications of the launching of the Russian *sputniks* in regard to the balance of arms between the Western Powers and the Soviet Union on which world peace at present depended. It stressed that although the Russian success was "evidence of remarkable progress in rocket development" the balance of military power had not thereby been upset; in fact, the "overall superiority of the West" was likely to "increase rather than diminish" as a consequence of the advent of medium-range ballistic rockets. It was explained that, from sites in Europe and elsewhere, these weapons could "dominate practically every target of importance in Russia," whilst for geographical reasons the possession by Russia of rockets of equal range would not "afford her any corresponding advantage."

The White Paper went on: "It would be of no use to her [Russia] to attack Western Europe unless she could simultaneously knock out the vital strategic air bases in the United States. She could at present have no reasonable hope of achieving this with manned bombers, and it will take her several years to complete the development of an accurate inter-continental rocket and produce it in sufficient numbers . . . Moreover, by that time the U.S.A. (which has now also launched an artificial satellite) will have inter-continental rockets also. There is thus no military reason why a world conflagration should not be prevented for another generation or more through the balancing fears of mutual annihilation. In fact, there is no reason why this should not go on almost indefinitely. But that would indeed be a mournful prospect. To-day no country can hope to gain anything by war; and all would derive incalculable benefit from the restoration of mutual confidence and real peace."

The White Paper stressed, however, that there could be "no such confidence of peace so long as the arms race continues," although it pointed out the "practical difficulties of reaching agreement on disarmament and of enforcing the agreement once made." It added: "The issue is further complicated by the possibility that additional nuclear Powers may emerge in a few years' time . . . whilst in the next decade the vast potential resources of China will have to be reckoned with as an increasingly important element in the balance of power."

Disarmament. After emphasizing that "the ultimate aim must be comprehensive disarmament by all nations, coupled with comprehensive inspection and control by a world authority," the White Paper went on: "It would, of course, be too much to hope that this objective could be brought about all at one stroke. It will have to be pursued by stages. If the safety of humanity is not to be imperilled, great care must be taken to maintain, at each successive stage, the balance of military power and deterrents which, for the present, constitute almost the sole safeguard of peace. In seeking a basis for agreement, account must be taken of the entirely different military positions of the two sides.

"Russia has been making great strides in the field of nuclear weapons and rockets. But her basic strength lies in her overwhelming superiority in conventional armaments and military manpower. The Soviet Union and her satellites have over 200 active divisions facing the West, about 20,000 aircraft, and a fleet which includes some 500 submarines.

"The West, on the other hand, relies for its defence primarily upon the deterrent effect of its vast stockpile of nuclear weapons and its capacity to deliver them. The democratic Western nations will never start a war against Russia. But it must be well understood that if Russia were to launch a major attack on them, even with conventional forces only, they would have to hit back with strategic nuclear weapons. In fact, the strategy of NATO is based on the frank recognition that a full-scale Soviet attack could not be repelled without resort to a massive nuclear bombardment of the sources of power in Russia. In that event, the role of the Allied defence forces in Europe would be to hold the front for the time needed to allow the effects of the nuclear counter-offensive to make themselves felt.

"It is best that these stark facts should be stated plainly; since the one thing which might conceivably tempt the Soviet Union into military adventure would be the erroneous belief that the West, if attacked, would flinch from using its nuclear power. The Western nations, although they know that their entire safety rests upon the possession of nuclear weapons, have never resisted the idea that these should be progressively reduced. But they obviously cannot agree to this without fully compensating reductions in conventional forces. Otherwise Russia would be left in a position to dominate the world."

On the other hand (the White Paper continued) there was always the chance that however carefully the balance of armaments was held, some unfortunate circumstance or miscalculation might "spark off a world-wide catastrophe." It was therefore justifiable to accept a reasonable risk in trying to bring about an agreement, and it was in this spirit that Britain, Canada, France, and the U.S.A. had put forward their proposals within the framework of the United Nations. After outlining the history of the disarmament negotiations the White Paper continued: "The British Government will approach any further negotiations without prejudice and with the will to make them succeed. Given sincerity and perseverance on both sides, and having regard to the fact that disarmament is just as much in the interests of Russia as of every other country, it should not prove impossible to find some fair and workable method of composing the differences which at present divide, impoverish, and endanger the world." Even with the best intentions, however, these negotiations were bound to be "complicated and protracted," and even when an agreement had been reached its full implementation would inevitably take a number of years. Meanwhile the free world could "not afford to lower its guard," and, until disarmament was actually achieved "the utmost vigilance and preparedness must be maintained."

Collective Defence. Although global war could probably be averted so long as the effectiveness of the nuclear deterrent was maintained, the very success of the latter would compel the Communist Powers to try to achieve their goal of world domination by other methods, and they must be expected increasingly to concentrate on "political subversion, economic penetration, and indirect military action." "The protection of the free world against the Communist threat," the White Paper stressed, "must therefore be treated as an indivisible problem, to be undertaken by the collective effort of all the countries concerned. This idea of collective defence inspired the creation of NATO, the Baghdad Pact, and SEATO, through which Britain will continue to make her main contribution to the joint task of preserving peace.

"If the full benefits of collective defence are to be obtained, the members of the alliance must be prepared to accept that they will inevitably become more and more inextricably dependent on one another. The concept of interdependence in defence planning of all kinds was formally enunciated by President Eisenhower and the Prime Minister in Washington last October and was subsequently endorsed by the Heads of the 15 NATO Governments. The adoption of this principle will unavoidably raise . . . military, economic, and political problems of varying kinds. This applies in particular to countries which, like Britain, are members of more than one defence system and have also independent overseas responsibilities of their own. But, in view of the unquestionable benefits to the common cause, ways must be found of overcoming these difficulties, as far as is practicable.

"The policy of interdependence is particularly applicable to the North Atlantic Alliance, which has an international command with a joint planning organization. Within this integrated structure, it should be possible gradually to get away from the idea that each member-nation must continue to maintain self-contained national forces, which by themselves are fully balanced. Instead, each should seek to make the most useful contribution it can to the combined forces of the alliance as a whole.

"Equally great advantages are obtainable from collective action in the technical and industrial fields. The members of NATO possess between them the world's greatest manufacturing and scientific capacity. If weapon research and production could be jointly planned, considerable economies in time and resources could undoubtedly be secured. Within the framework of the Western European Union, H.M. Government have, during the current year, initiated discussions on this subject with the French, German, and Dutch Governments. Technical studies are now proceeding, and it is intended in due course to set up appropriate machinery to co-ordinate these bilateral efforts. Close co-operation is being maintained with the U.S.A. and Canada on a number of important projects. If the U.S. Congress approve the proposal to amend the Atomic Energy Act, the scope for fruitful collaboration will be greatly extended. In that event, the British atomic research and development programme will be reviewed, with the object of eliminating duplication and ensuring the most effective contribution to the joint needs of the Western Alliance.

"In the Baghdad Pact and SEATO, where different conditions apply, measures to achieve the highest practical degree of co-operation are being taken. Efficient combined planning organizations have been set up within both these alliances, and action is being pursued to strengthen and co-ordinate the forces of the member-States."

The Nuclear Deterrent. The White Paper emphasized that the effectiveness of the defensive shield provided by NATO, SEATO, and the Baghdad Pact depended ultimately on the fact that there stood behind it "the immense nuclear power of the West." The Western nuclear deterrent still rested primarily upon the strength and constant readiness of the U.S. Strategic Air Command, with its bases all round the world and vast supply of megaton bombs. Britain, however, was making "an increasing significant contribution," and now had a "substantial and growing pile of kiloton weapons," the design of which was being steadily improved as the result of experience gained at the Maralinga proving grounds. Following the success of the thermo-nuclear tests at Christmas Island, British megaton bombs were also being produced and delivered to the Royal Air Force. Aircraft of the British strategic bomber force, equipped with these bombs and based in Britain, could be transferred within a few hours to overseas stations, thus providing "a mobile and flexible form of military power." Most of the squadrons were equipped with *Valiants*, but the proportion of *Victors* and *Vulcans* was increasing; these aircraft could fly as high and as fast as any bombers in the world, and had navigational and

bomb-aiming equipment of the highest accuracy. Progress was also being made with propelled bombs which could be released from a considerable distance, making it unnecessary for the aircraft to fly into heavily-defended target areas.

Although Britain's nuclear power could not be compared with that of the U.S.A., the British bomber force, when fully equipped with megaton weapons, would in itself constitute a formidable deterrent. For its influence to be fully effective, however, it must not be considered capable of being knocked out on the ground, and measures were accordingly being taken to raise its state of readiness so as to reduce the time needed for take-off. The organization of the radar watch was also being improved, and was being linked more fully with the Continental system so as to obtain the earliest possible warning of the approach of hostile aircraft.

The decision that it was not practical to try to defend the country as a whole against nuclear attack [see 15493 A] meant that Fighter Command had now the more limited task of protecting the bomber bases, and its strength was being correspondingly reduced. The White Paper continued: "When the Russians, in addition to manned bombers, have ballistic rockets in sufficient numbers, capable of knocking out airfields in Britain, the value of a fighter defence system will obviously decrease, and the same will apply to a missile defence system effective only against aircraft. But that point has not yet been reached. Meanwhile the squadrons of Fighter Command will continue to play their part in defending the deterrent. British short-range ground-to-air missiles will begin to be deployed during the coming year, and a longer-range type is in the course of development. In the testing of these and other weapons the Woomera rocket range in Australia is playing an invaluable part."

After stating that it had become necessary to co-ordinate operational plans with the U.S. Air Force now that Britain herself had a "substantial" strategic bomber force and a growing stockpile of nuclear weapons, the White Paper added that expenditure on the strategic bomber force and its nuclear bombs, as well as on related research and development (including work on ballistic rockets), represented less than one-tenth of the total Defence Estimates. The fighter force and control and warning systems, together with research and development on fighters and defensive guided missiles, represented about the same amount. Together these items therefore accounted for 15-20 per cent of the Estimates, and on the basis of present plans these costs seemed unlikely to increase significantly over the next few years.

Finally, it was announced (*a*) that H.M Government had accepted the U.S. offer to supply Britain with intermediate-range ballistic missiles, and that an agreement to this effect would be completed "very shortly"; and (*b*) that a British ballistic rocket of a more advanced type, designed for underground launching, was being developed on the highest priority, in close co-operation with the U.S.A.

Conventional Forces. The White Paper stressed that the existence of the strategic nuclear deterrent did not obviate the need to maintain "a substantial shield of land forces, with air and naval support, to defend the frontiers of the free world." Nor could the nuclear deterrent be used in localized emergencies or for preserving order and stability: for these tasks—which formed a large part of the present responsibilities of all three Services—conventional forces equipped with non-nuclear weapons were required, and a high proportion of Britain's military effort would therefore continue to go into forces of this kind.

Thus, in addition to her contribution to the Western nuclear deterrent and to NATO land, sea, and air forces, Britain was at present maintaining armed forces over 100,000 strong in the Far and Middle East; moreover, the widely dispersed nature of British military responsibilities made it necessary for the Army to maintain a strong Central Reserve supported by an adequate fleet of aircraft to carry reinforcements rapidly to any part of the world. A proportion of this Reserve would be kept in a high state of readiness to enable it to be moved at short notice, and vehicles and supplies would be stored at focal points, e.g. Singapore, to facilitate air transport of heavy equipment. The *Hastings*, *Comet*, and *Beverley* aircraft with which R.A.F. Transport Command was equipped would be supplemented by *Britannias*, of which 20 were on order [see page 16020, first column] and which would greatly expand the Command's long-range trooping capacity.

Close co-operation continued to be maintained between the U.K. forces and those of other Commonwealth nations. Australian and New Zealand were sharing with Britain the task of helping the Federation of Malaya, through their contribution to the Commonwealth Strategic Reserve. The Federation of Rhodesia and Nyasaland was playing its part in Commonwealth defence, and a squadron of the Royal Rhodesian Air Force was undergoing training at Aden. Discussions on defence had recently been held with South Africa, and the Royal Navy periodically carried out joint exercises with the navies of other Commonwealth countries.

During 1957-58 the strength of the British Army of the Rhine would have been reduced from 77,000 to about 64,000, and the Council of the W.E.U. had agreed to a further reduction to 55,000 during the coming year [see 16006 A]. In this connexion, the Government had asked the North Atlantic Council to consider the financial problem involved in maintaining these forces in Germany. The cost in 1958-59 was estimated at £125,000,000, including about £47,000,000 in Deutschmarks. Independent experts, appointed by NATO to examine the position, had confirmed that expenditure of this order in Deutschmarks would place a heavy additional burden on Britain's balance of payments. The Government were "most anxious to continue to make a substantial contribution to the NATO shield," but had been "obliged to state clearly that, in the event of adequate financial assistance not being forthcoming, they would reluctantly have to reconsider the size of the British land and air forces they can afford to retain on the Continent."

Sea Power. After explaining that the Government had reviewed the role, composition, and disposition of the Royal Navy during 1957, the White Paper defined the tasks of British naval forces as follows: (*a*) *in peace time*, to help carry out Britain's responsibilities in the Colonies and protected territories, to defend British shipping, and to contribute by their presence to the maintenance of peace and stability; (*b*) *in limited war*, to protect sea communications, escort troops and supplies to the area of operations, and give them support in action, (*c*) *in global war*, to make an effective contribution to the combined naval forces of the Western Alliance. It continued:

"Russia's formidable submarine force constitutes a world-wide threat which is of special concern to an island people, dependent upon sea communications for their food supplies and economic life in peace and war. For this reason the Government consider it desirable to concentrate the efforts of the Royal Navy to an increasing extent on the anti-submarine role. In the Atlantic and Mediterranean, the Royal Navy and maritime aircraft of the R.A.F. will continue to play their part in NATO. Since, apart from fulfilling certain colonial responsibilities, the Royal Navy will be operating in conjunction with other Allied navies, the aim will be to make the most effective contribution to the combined forces of the Alliance, and not necessarily to provide a fully balanced all-purpose British fleet. The British naval forces in this area will include two carriers, two cruisers, and a number of destroyers, frigates and submarines. The carriers, while containing some fighter and strike aircraft, will be equipped predominantly with anti-submarine aircraft and helicopters.

"East of Suez it is proposed to maintain a balanced, all-purpose fleet of appreciable strength . . . to enable Britain to discharge her obligations to SEATO and the Baghdad Alliance, and to fulfil her independent military commitments in that area. This Eastern Fleet, based on Singapore, will be composed of one aircraft carrier (with a balanced complement of strike, fighter and anti-submarine aircraft), one cruiser, and a number of destroyers, frigates and smaller vessels. It will also include a converted carrier, equipped to accommodate a Marine Commando force and capable of operating helicopters for either the troop-carrying or anti-submarine role. These ships will operate singly or in groups, coming together at intervals for training. In addition to the main operational fleets, a small number of frigates will be stationed in the Persian Gulf. Some light craft will be employed at Hong Kong for local defence, together with a frigate patrol to protect British shipping along the China coast. A few frigates or destroyers will also be kept on the West Indies and South Atlantic Stations.

"The naval construction and modernization programmes are being aligned with this policy, and dockyard facilities and bases will be curtailed to correspond with the reductions in the size of the Navy. Similarly, the plans for the Reserve Fleet are being revised. It is proposed to follow the principle that the Reserve Fleet should comprise only sufficient ships to keep the Active Fleet up to strength, allowing for accidents and long refits.

"A number of important projects are in hand to ensure that the Royal Navy will in the years ahead continue to keep abreast of the times. A new comprehensive radar and aircraft control system for carriers, more advanced than any other in service elsewhere, has been introduced. A low-level tactical bomber is being developed for the Royal Navy, and its adoption by the R.A.F. is being considered; the prototype will fly later this year. The development of a nuclear submarine is proceeding, with the valuable co-operation of the United States."

Civil Defence. The White Paper stressed that this remained "an integral part of the defence plan," and that the framework of the local C.D. services and of the regional organization would be maintained. Provision would continue to be made for training schools and equipment, and additional orders were being placed for instruments to measure radioactivity. The Government would encourage the recruitment and training of the Industrial Civil Defence Service, which contributed about 200,000 volunteers towards the total of over 500,000 men and women enrolled in Civil Defence. Improvements continued to be made in the warning and monitoring systems and in communications.

Contraction of Forces. In accordance with the policy approved by Parliament, the process of reducing the size of the Forces was continuing. At March 31, 1958, the three Services would have a combined adult male strength of 606,000 (Royal Navy 99,000, Army 325,000, R.A.F. 182,000), representing an overall reduction of 83,000 during the current year.

After referring to the arrangements made for compensating those whose Service careers would be prematurely cut short, and for helping them to find civilian employment [see 15795 A], the White Paper stated that the Royal Navy had now completed the selection of those to be retired—over 90 per cent of the officers concerned and 100 per cent of the ratings having voluntarily applied for retirement. The Army and the R.A.F., whose problem was larger, were less advanced, but it was already clear that it would likewise be possible to deal with a high proportion of the redundancies in both Services on a voluntary basis. The White Paper added that eight of the reductions scheduled to be made in Army "teeth arm" units would have been effected by March 31, 1958, and a further 22 would be carried out in 1958-59.

Regular Recruitment. As already announced [see 15493 A], it was planned to bring National Service to an end by Dec. 31, 1962, and to rely thereafter on all-Regular forces of a combined strength of about 375,000. By that date Britain's military commitments might have increased or decreased, but so far nothing had happened to lead the Government to revise this figure or alter its views about the prospects of recruiting the Regulars needed. In this connexion the White Paper explained that the Services had been authorized to recruit up to the following ceilings: Royal Navy, 88,000; Army, 165,000; R.A.F., 135,000. The fact that these three ceilings together totalled 388,000 did not mean, however, that it was intended to increase the maximum strength of the combined force beyond 375,000, but the Government had felt it right to maintain some flexibility at the present stage.

The White Paper gave the following details of recruiting in the three Services:

Royal Navy (all Regulars obtained on initial engagements of 7 or 12 years). 2,800 ratings and 4,300 boys and apprentices had been recruited in 1957. There was a need for some increase in recruits for certain branches and also for the Marines, who had a higher proportion of National Servicemen to be replaced. If the recruiting trend remained as at present, the manpower strength of the Royal Navy would be about 84,000 by the end of 1962.

Army: The whole pattern of recruitment had been altered by the decision to end the three-year engagement (with few exceptions) and to substitute one of at least six years. Although it was too soon to assess the effects of the change, long-term engagements in the three months (November 1957-January 1958) since the new scheme came into effect had risen to 3,557, compared with 685 in the corresponding period of 1956-57. Forecasts based on such short-term statistics must be treated cautiously, but if the recruiting trend stayed as at present the infantry should be up to basic strength by Dec. 31, 1962. Recruitment for technical, professional, and administrative units raised special problems; while the Royal Electrical and Mechanical Engineers seemed unlikely to have much difficulty in securing the numbers needed for certain trades, present recruitment rates for most other administrative corps were below requirements.

R.A.F. About 5,600 airmen were recruited on long-service and about 8,500 on short-service engagements during 1957, as well as about 3,400 boys and apprentices. Recruiting, both of men on 9-year engagements and of boys and apprentices, had shown a satisfactory increase on 1956; but, as expected, the announcement of the plan to end National Service had led to a decline in recruiting on shorter engagements. The present rate of recruiting pilots was almost sufficient, but recruiting for certain other aircrew categories needed to be increased. If present recruiting rates remained unchanged the Regular strength of the R.A.F. should be about 120,000 at Dec. 31, 1962.

After stressing the desirability of considerably augmenting the strength of the Women's Services, which would have an increasingly important part to play in the new all-Regular forces, the White Paper referred to the setting-up in November 1957 of an independent committee under Sir James Grigg (a former Secretary of State for War) to conduct a comprehensive study of the recruiting problem in all its aspects.

Pay and Allowances. Meanwhile, the Government proposed to introduce the following increases in pay and allowances for Regulars of all ranks, to come into force early in April 1958: (1) An increase in the weekly pay of all Regular "other ranks" of 14s., 17s. 6d., or 21s., depending on length of engagement. (2) Abolition of the existing specially low rate for recruits, who would in future receive the same rate as the "one star" private or his equivalent—e.g. a Regular recruit enlisting on a 6-year engagement would be paid 24s. 6d. a week more than at present. (3) Increases in officers' pay, with proportionately larger increases for junior officers than for higher ranks, e.g. a second lieutenant's pay would be raised by £73 a year and that of a lieutenant-colonel by £109. (4) A special increase in the pay of the Women's Services over and above the general increase, e.g. women recruits would receive 21s. more a week than at present. (5) Increases in marriage allowance rates, together with increases, in the rents of official quarters and the payment to other ranks of the "out-of-quarters" allowance of 3s. a day at present payable only to officers. [The White Paper explained that rents of Service quarters were at present abnormally low, with the result that married officers and men for whom quarters were not available were liable to suffer "serious financial disadvantage." The new arrangements, taken together, would leave those occupying Service quarters in broadly the same financial position as before, but would greatly improve the position of those not in such quarters.]

Other steps recently taken to remove grievances and anomalies connected with allowances included (*a*) the extension to Aden, the Persian Gulf, and Habbaniyah (Iraq) of the scheme whereby men serving in overseas stations and separated from their families were granted periods of home leave; (*b*) removal of restrictions on the use of travel warrants by Service personnel in Britain; (*c*) increases in the education allowances payable to all ranks.

The increases in pay and allowances, etc., would amount to £32,000,000 in 1958-59, including about £22,000,000 in respect of pay. The White Paper explained that these increases would be more than offset by savings resulting from the reduction in the strength of the Forces and in the number of civilians employed by them, in fact, the total bill for pay, allowances, and maintenance of Service personnel and for civilian wages would be lower in 1958-59 than in 1957-58, and these costs would decrease as the rundown of the Forces proceeded.

Accommodation. Plans for the improvement of accommodation at home and abroad covered (1) the construction of additional new accommodation in Kenya, Aden, Malaya, and Hong Kong; (2) a comprehensive programme (to cost £90,000,000 over five years) for the replacement or modernization of out-of-date barracks, messes, and hospitals in the U.K., and the building of considerably more married quarters; (3) accelerated provision (at a cost of £1,000,000 during 1958-59) of canteens, clubs, sports grounds, swimming baths, etc., with particular attention to the needs of those serving abroad or at isolated home stations.

The White Paper concluded by pointing out that the net Defence Estimates for 1958-59 [see below] were £2,000,000 less than those for 1957-58, notwithstanding the need to absorb increases in civilian wages and prices amounting to about £50,000,000, increases in Service pay and allowances costing £32,000,000, compensation to officers and men prematurely retired, totalling £14,000,000, and a reduction in U.S. aid of £13,000,000. Not only had additional charges amounting to over £100,000,000 been thus absorbed, but the favourable effects of the new defence policy announced in 1957 were beginning to make themselves felt in a fall in the proportion of the working population in the Services or supporting them, and in an appreciable reduction in the claims on the metal-using industries and on scientific and engineering skills.

Detailed analyses of the proposed active strength of the three Services, and of the estimated cost of the 1958-59 Defence programme as a whole, were given in a White Paper (*Defence Statistics, 1958-59*—Cmd. 364) which was also published on Feb. 16. A summary is given below:

Manpower Statistics.

The estimated strengths of the Forces at April 1, 1958 and April 1, 1959, compared with the actual strength at April 1, 1957, was shown in the following tables:

	April 1, 1957 (actual)				April 1, 1958 (estimated)				April 1, 1959 (estimated)			
					(thousands)							
	Royal Navy	Army	R.A.F.	Total	Royal Navy	Army	R.A.F.	Total	Royal Navy	Army	R.A.F.	Total
Regular	102.7	194.6	153 9	451.2	97.1	176.1	141.3	415.3	94.7	289.9	168.8	556.2
National Service .	9.6	174.3	68.7	252.6	5.5	153.6	46.7	205.8	2.8			
Women	3.7	6.3	5.3	15.3	3.6	5.3	4 8	13.7	3.5	5.4	5.2	14.1
Total ..	116.0	375.2	227.9	719.1	107.0	335.0	192 8	634.8	101.0	295.3	174.0	570.3

The White Paper stated that the three Services would require about 130,000 male entrants in 1958-59. Of this total, 99,000 would come (either as Regulars or as National Servicemen) from the age-groups liable to call-up for National Service during the year; 2,000 of these would go to the Royal Navy, 76,000 to the Army, and 21,000 to the R.A.F.

Financial Statistics.

Expenditure Estimates. The gross cost of the 1958-59 programme was estimated at £1,465,450,000, or £17,580,000 less than the original estimate for 1957-58 of £1,483,030,000. An amount of £47,000,000 would be appropriated in 1958-59 in respect of the local costs of British forces in Germany, but no receipts from the U.S.A. would be appropriated in aid of Service Votes; for 1957-58, receipts from the U.S.A. and Germany together had totalled £62,750,000. The net cost of the 1958-59 programme (i.e. after deducting the receipts from Germany) was therefore estimated at £1,418,450,000, or £1,830,000 less than the net estimate of £1,420,280,000 for 1957-58 (after deducting receipts from the U.S.A. and Germany).

The division of expenditure between Departments in 1958-59 and 1957-58 was as follows:

	Gross Estimate		Net Estimate	
	1958-59	1957-58	1958-59	1957-58
	(£ million)		(£ million)	
Admiralty	339.40	316.15	339.40	316.00
War Office	441.40	445.50	401.90	481.40
Air Ministry	474.55	506.15	467.05	487.65
Ministry of Supply	193.35	197.60	193.35	197.60
Ministry of Defence	16.75	17.63	16.75	17.63
Total . ..	1,465.45	1,483.03	1,418.45	1,420.28

Offshore Procurement. The value of new contracts placed in the U.K. by the U.S.A. under the Offshore Procurement Programme was $36,000,000. In consultation with the U.S. Government, adjust-

ments had been made in certain earlier contracts to take account of revisions in defence plans, the net result being that the cumulative total of Offshore Procurement orders had been reduced to $640,000,000. The savings in U.S. Aid funds would be applied to other agreed defence projects.

Military Aid from the U.S.A. and Canada. During 1957 the U.S. Government had supplied *Corporal* missiles for the equipment of British Army units stationed in Germany. Other assistance under the U.S. Mutual Security Act had consisted mainly of radio equipment, aircraft and spares. The Canadian Government had provided further supplies of ammunition and equipment spares under its Mutual Aid Programme.

Defence Expenditure by Civil Departments. £18,850,000 would be provided during 1958-59 for defence expenditure by Civil departments (including loan expenditure by the Post Office), as compared with £21,900,000 included in the Estimates for 1957-58.

Figures issued on Feb. 27 by the Defence Ministry showed that the total strength of the armed forces on Dec. 31, 1957, was 650,000, against 702,100 at June 30. Figures in detail were: Royal Navy and Royal Marines, 13,600 officers and 95,300 ratings; Army, 29,900 officers and 310,700 other ranks; R.A.F., 25,400 officers and 175,000 other ranks. These totals included 212,000 National Service officers and other ranks. The number in the Reserve and Auxiliary forces was 599,700, against 591,500 six months earlier, while civilian employees of the Services numbered 246,000, a reduction of 6,500 over the six months.—(White Papers, Cmd. 363 and 364 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15493 A.)**

A. BAHAMAS. — Settlement of General Strike.

A 19-day strike which had brought economic life in the Bahamas to a virtual standstill, paralysed the tourist industry, and led to the despatch of a battalion of troops from Jamaica, was ended on Jan. 30, when the strikers agreed to a general resumption of work.

The strike originated in a long-standing dispute between taxi-drivers and other transport interests competing for business at the airport, to which large numbers of tourists are brought by British Overseas Airways and Pan-American Airways. A demonstration by the taxi-drivers' union on Nov. 2 resulted in the airport closing down for 24 hours and gave the taxi-drivers complete control of transport to and from the airport for two months, during which period the Governor (Sir Arthur Raynor) tried to resolve the dispute by mediation. Negotiations broke down in January, and the Governor then offered to appoint a three-man tribunal to investigate the dispute. This offer was rejected by the taxi-drivers' union, and discussions finally broke down when the union demanded the right to dictate what form of transportation tour operators should use (i.e. the form of transport to take tourists about the islands).

The strike began on Jan. 11, when the Bahamas Federation of Labour ordered all hotel employees to cease work in support of the taxi-drivers. It spread rapidly to bakery employees, electricity department workers, dustmen and street-cleaners, plumbers, building workers, stevedores, and airport workers, with the result that normal economic life was brought to a standstill. All hotels in Nassau (including the Emerald Beach Hotel, the largest in the Colony) closed down, together with many shops and bars; power supplies in some parts of the islands were severely disrupted, and in other areas were only maintained by the efforts of the managerial staffs and volunteers; and thousands of tourists left the islands in a general exodus. At the request of the Governor, a company of the 1st Battn., Worcestershire Regt. (about 120 officers and men) was flown to Nassau on Jan. 15 to assist the police in keeping order, guarding public buildings, and preventing intimidation. The frigate H.M.S. *Ulster* anchored on Jan. 19 off New Providence Island (15 miles from Nassau) and landed technicians to man local power stations affected by the strike.

Apart from an abortive attempt to sabotage the water supply, no serious incidents occurred during the strike, nor were any acts of violence reported. The Bahamas Federation of Labour and the taxi-drivers' union notified the Governor on Jan. 30 that they were returning to work on the understanding (1) that machinery would be set up to regulate urban transport; (2) that steps would be taken to remove restrictions on Bahamian trade unions; and (3) that the Bahamas Legislature would defer adoption of a hotel-workers' Bill and revise clauses opposed by the unions. The strike ended on the same day, and the troops of the Worcestershire Regiment were flown back to Jamaica on February 4.

The strike was estimated to have cost the Colony about £42,700 a day during its duration.—(Times - Daily Telegraph)

B. UNITED KINGDOM. — Reduction in Interest Rates on Local Authority Loans.

The Treasury announced on Feb. 25 that interest rates on new loans to local authorities from the Local Loans Fund would be reduced with immediate effect as follows (existing rates in parentheses): up to 5 years—6½ per cent (7¼ p.c.); 5 to 15 years—6¾ per cent (6¾ p.c.); over 15 years—6½ per cent (6¾ p.c.). (Financial Times) **(Prev. rep. 15800 A.)**

C. UNITED KINGDOM. — Capital Issues in 1957.

New capital issues in the U.K. in 1957 amounted to £383,357,000, as compared with £295,952,000 in 1956. Of the 1957 total, £320,989,000 (83.7 per cent) was for the home market, £60,923,000 (15.9 per cent) for Commonwealth and Empire countries, and £1,445,000 (0.4 per cent) for foreign countries.

The total for the home market included the whole of £40,950,000 issued by British Petroleum Ltd. in December 1957, no information being available as to the division between home and overseas use.

Issues in respect of the home market were divided into the following categories: Public Bodies, £27,140,000; Production, £250,283,000; Trade, £6,972,000; Transport, £8,745,000; Finance, £27,848,000. Classified by industrial and other groups, the total of all capital issues (home and overseas) was divided as follows: Governments, £13,014,000; Local Authorities, £24,185,000; Public Boards, £2,955,000; Railways, nil; Gas and Water, £3,004,000; Electric Light and Power, nil; Telegraph and Telephone, £3,598,000; Road Transport, nil; Shipping, Canals, and Docks, £8,745,000; Banking, Insurance, Investment, and Finance, £33,911,000; Property, £3,233,000; Coal, Iron, Steel, and Engineering, £110,391,000; Motors and Aircraft, £14,012,000; Mining, £17,344,000; Oil, £48,166,000; Tea, Coffee, and Rubber, £85,000; Breweries and Distilleries, £2,702,000; Miscellaneous, £98,013,000.

The figures above exclude all borrowings by the British Government; shares issued to vendors; allotments arising from the capitalization of reserve funds and undivided profits; sales of already issued securities which add nothing to the capital resources of the company whose securities have been offered; issues in replacement of securities previously held in the United Kingdom; and private placings for which no market quotations are obtained. The figures are based upon the prices of issue.

In a written reply on Feb. 4, the Chancellor of the Exchequer (Mr. Heathcoat Amory) gave details of approvals of applications for new capital issues by the Capital Issues Committee. These figures showed that approved applications during the fourth quarter of 1957 totalled £351,000,000, against £380,000,000 during the third quarter, £294,600,000 in the second quarter, and £447,700,000 in the first quarter. Comparative figures for 1956 were £327,000,000 in the fourth quarter, £251,600,000 in the third quarter, and £287,500,000 in the second quarter. The totals include applications for issues by oversea Governments, local authorities, and the nationalized industries.—(Times - Midland Bank Ltd.)

D. RHODESIA AND NYASALAND FEDERATION. — Measures to reduce Drain on Sterling Reserves.

Measures to reduce the drain on the Federation's sterling reserves were announced by the Federal Treasury on Jan. 31, including (i) a request to the commercial banks to reduce the level of bill finance and advances, and (ii) steps to tighten up hire-purchase transactions.

The Treasury statement said that payments for imports and other overseas services had reached a record high level in 1957, while export rates had fallen sharply—the copper price having dropped during the year from £267 to £182 a ton, and having since fallen to £163. Preliminary estimates indicated that the total sterling reserves of the Federation had fallen by £47,000,000 during 1957, totalling about £100,000,000 at the end of the year. Although this figure was equal to 4½ months' overseas payments at the average rate of such payments in 1957, £30,000,000 of the total loss of £47,000,000 had occurred during the last quarter of the year; if the drain on the reserves were to continue at the same rate, the position could easily become dangerous.

The Government believed that measures to control the physical volume of imports by the reimposition of controls would not be justified. To halt the current drain on the Federation's sterling resources, however, it had decided to reduce the demand for imports by (1) asking commercial banks and merchant banks to reduce the total level of their bill finance and advances "significantly" by April 30, particularly those which were made for the purpose of financing imports; (2) issuing regulations to increase the minimum deposit for hire-purchase transactions to 50 per cent of the purchase price, and reducing the period of repayment in various groups from 18 to 15 months and from 36 to 24 months respectively. The regulations restricting hire-purchase transactions were issued on the same day (Jan. 31) with immediate effect.

It was stated that the Government would not hesitate to resort to further measures if these appeared necessary. (Federal Information Department, Salisbury) **(15794 B.)**

E. BRAZIL. — First Atomic Reactor in Latin America.

The first nuclear reactor in Latin America went into operation on Jan. 25 at the University of São Paulo. A high-powered reactor of the "swimming-pool" type, it will produce isotopes for medical and industrial purposes and will be used for the training of Brazilian atomic scientists. Its maximum potential is 5,000,000 watts. (Brazilian Government Bulletin) **(15734 A.)**

A. AUSTRALIA. — Proposed Banking Legislation. - Creation of Independent Reserve Bank. - Reorganization of Commonwealth Bank. - New Special Accounts System. - Bills rejected by Senate.

The Federal Prime Minister (Mr. Menzies) announced on April 10, 1957, that the Government had decided to introduce legislation to amend the structure of the Commonwealth Bank with a view to dividing its functions as a central bank from its trading activities, and reorganizing the latter on a par with the trading banks. Legislation was accordingly introduced in the Federal House of Representatives on Oct. 24, 1957, comprising four major Bills and 10 subsidiary Bills. The major Bills were the Reserve Bank Bill, the Commonwealth Banks Bill, the Banking Bill, and the Banking (Transitional Provisions) Bill. The main provisions of these Bills, which were designed to replace the existing Banking Act, are summarized below :

The Reserve Bank Bill.

The chief purpose of this Bill was to establish a central bank as an institution which would not be directly associated with the conduct of bank business in competition with the private banks. The Commonwealth Bank of Australia—which at present combines the functions of a central bank and a trading bank—would accordingly be renamed the Reserve Bank of Australia, which would be exclusively devoted to carrying on the central banking functions of the Commonwealth Bank.

The Rural Credits Department (at present one of the branches of the Commonwealth Bank) would be attached to the new Reserve Bank ; its capital would be increased by £2,000,000 from central bank reserves, bringing it up to £4,714,000.

The present Commonwealth Bank Board would continue in existence as the Reserve Bank Board, comprising the Governor of the Reserve Bank as chairman, the Deputy Governor as deputy chairman, the Secretary to the Treasury, and seven other members, of whom at least five would be persons who were not officers of the Reserve Bank or of the Commonwealth Public Service. The Board would determine the Reserve Bank's policy and ensure that it was carried into effect. It would have the duty of ensuring, within the limits of its powers, that the monetary and banking policy of the Reserve Bank was " directed to the greatest advantage of the people of Australia," and that the powers of the bank were used " to promote the stability of the currency, the maintenance of full employment, and the economic prosperity and welfare of the people of Australia."

The Commonwealth Banks Bill.

This measure provided for the reconstitution of the banking elements of the present Commonwealth Bank group, other than the central bank and the Rural Credits Department, under a new corporation to be known as the Commonwealth Banking Corporation. The new corporation would be the controlling body for three banks : (1) the Commonwealth Savings Bank, (2) the Commonwealth Trading Bank (both belonging to the present Commonwealth group of banking institutions), and (3) the Commonwealth Development Bank, which would take over the Mortgage Bank Department and the Industrial Finance Department of the Commonwealth Bank.

The board of the new corporation would have power to determine the policy of the three banks and to control their affairs, and would also provide a common staff for conducting the business of the three banks. The board would comprise 11 members, including the managing director and deputy managing director of the Corporation and the Secretary to the Treasury as *ex officio* members, and eight other persons who were not officers of the Commonwealth Public Service or directors, officers, or employees of any bank ; of these eight members, one would be chairman and another deputy chairman of the board.

Each of the three constituent banks (the Commonwealth Trading Bank, the Commonwealth Savings Bank, and the Commonwealth Development Bank) would have an executive committee consisting of five members of the board of the corporation appointed by the Federal Treasurer after consultation with the board. The managing director of each bank would be a member of its respective executive committee, and the deputy managing director would also be eligible for membership. The Secretary to the Treasury might become a member of the executive committee for the Savings Bank, but would be ineligible for membership of the committees for the Trading Bank or the Development Bank.

The Commonwealth Trading Bank (which would be continued in its present form) would have its capital increased from central bank reserves by £2,000,000, bringing it up to £7,429,000 ; as its present reserve fund amounted to £2,735,000, this would give the Trading Bank a combined capital and reserves of over £10,000,000, apart from provisions for contingencies set aside over the years. Under a proposed amendment to the Income-Tax Act, the Trading Bank would become liable to tax from the beginning of the financial year in which the Commonwealth Banks Act came into operation, thus placing it on an equal footing with its private trading bank competitors. Its net profits after taxation would continue to be distributed as to one-half to its reserve fund and as to the other half to the Commonwealth Government.

The Commonwealth Savings Bank would continue its present functions but would lose its existing monopoly and would be put on equal terms with other savings banks. Any profits would be exempt from income-tax and would be divided each year between its reserve fund and the Commonwealth Government.

The Commonwealth Development Bank, like the Trading Bank and the Savings Bank, would have a separate identity, its own charter, and its own General Manager. It would operate in the fields of both primary and secondary industry, and would provide finance to assist primary production or the establishment or development of industrial undertakings, especially small undertakings, where it thought this desirable and where such finance would not otherwise be available on reasonable and suitable terms and conditions. To help people who were starting new agricultural development or establishing new industrial enterprises, the Development Bank would have regard " primarily to the prospects of the enterprise becoming or continuing to be successful," and would not " necessarily have regard to the value of the security available." The Development Bank would take over the capital and reserve funds of the existing Mortgage Bank and Industrial Finance Departments, amounting to over £14,300,000, which would be increased by a further £5,000,000 from central bank reserves. It would not be subject to income tax, any profits going to its reserve fund ; would have power to accept deposits from the public, but would not rely on such deposits as a major source of funds ; and could borrow up to £2,000,000 from the Reserve Bank without the consent of the Treasurer, though consent would be required for any borrowing overseas.

The Banking Bill.

This Bill (*a*) replaced the existing special account provisions (requiring the trading banks to deposit a specified part of their reserves in special accounts with the Commonwealth Bank) by a system of statutory reserve deposits ; (*b*) made provision for the regulation of savings bank business in general, having regard to the emergence of private savings banks following the ending of the monopoly of the Commonwealth Savings Bank ; and (*c*) regulated the position of the new Commonwealth Development Bank in the banking structure.

Statutory Reserve Deposits. Each trading bank would be required to maintain a statutory reserve deposit account with the Reserve Bank, and to have on deposit in the account such percentage of its Australian deposits as was determined by the Reserve Bank from time to time. On giving one day's notice the Reserve Bank might vary the statutory reserve deposit ratio up to 25 per cent, and on giving 45 days' notice above 25 per cent. A ratio would remain in force unless replaced by another one, but any ratio above 25 per cent could only be maintained for more than six months, and for succeeding periods of three months, if the Reserve Bank gave notice of such extension at least 45 days before the end of each period. The ratio would be the same for all trading banks (except four small banks which conduct business of a restricted kind). At least once every quarter the Reserve Bank must inform the trading banks of its estimates of likely changes in certain banking figures, and of its expected policy with regard to statutory reserve deposit ratios. Amounts held in statutory reserve deposit accounts would receive interest at a rate determined by the Reserve Bank, with the Treasurer's approval.

[These new provisions, especially the requirement whereby the Reserve Bank would have to give 45 days' notice of a determination of a statutory reserve deposit ratio in excess of 25 per cent, involved important changes as compared with the present system. At present, the central bank has power to require trading banks, virtually without notice, to lodge in special accounts with it those amounts which they held in special accounts at October 1952, plus up to three-quarters of the increase in their Australian deposits since that date. In practice, however, the amount in special accounts has so far never exceeded 25 per cent of the trading banks' total deposits.]

Savings Banks. These provisions introduced the customary safety guarantees for deposits by providing that private savings banks might not accept deposits from a profit-making body or company, and might not invest their depositors' funds otherwise than in deposits with banks, public securities, loans, guaranteed building societies, and loans for housing or other purposes on the security of land. They must maintain at least 70 per cent of depositors' funds in the form of cash, deposits with the central bank, and public securities, including at least 10 per cent in Treasury Bills and deposits with the central bank. A savings bank might not maintain deposits with trading banks to an amount exceeding £2,000,000, plus 2½ per cent of its depositors' balances. All these provisions would apply uniformly to the Commonwealth Savings Bank and the private savings banks.

Commonwealth Development Bank. Because of its special functions the Development Bank would not be subject to the reserve deposit provisions, nor would it be treated as a trading bank as regards the restrictions on deposits from savings banks.

The Banking (Transitional Provisions) Bill.

This Bill provided, *inter alia*, that the new Reserve Bank would carry on without interruption as the successor to the Commonwealth Bank ; that the statutory reserve deposits of the trading banks would automatically take the place of the present special accounts ; and that the existing foreign exchange regulations would remain in force without interrup-

tion. It also dealt with the position of the staff of the Commonwealth Bank and their distribution amongst the newly-formed successor banks.

Federal Treasurer's Statement on Banking Legislation.

The above-mentioned four major Bills, and the 10 subsidiary Bills, were moved for their second reading by the Federal Treasurer (Sir Arthur Fadden) on Oct. 24, 1957.

In addition to explaining the proposed new organization and institutions, **Sir Arthur Fadden** dealt at length with the reasons which had prompted the Government to propose a change in the present set-up. He explained that the main reason why the Government had decided to separate the central bank from the rest of the Commonwealth Bank group was entirely a practical one. Experience had shown that, unless and until this separation was effected, there could "not be full harmony within the Australian banking system, nor that close co-operation which ought to subsist between the central bank and the trading banks." The Government believed that there must be a strong central bank, but also that the private trading banks had a vital part to play in the country's banking system and economy. One condition, however, for the smooth and effective functioning of a system which included both a Government-owned central bank and a number of private trading banks was that "there must be mutual understanding between the central bank and the private banks, mutual confidence, and a will to co-operate." Sir Arthur Fadden emphasized that these requirements were "just as vital as legal powers for the central bank."

The private banks (Sir Arthur went on) had consistently maintained that they could not enter into fully confidential relationships with the central bank so long as it had, under its control and operating as an adjunct to itself, a major trading bank which was a competitor of theirs. They did not object to the competition of the Commonwealth Trading Bank so long as it was fair competition, but they did consider that the Commonwealth Trading Bank gained unfair advantages from its connexion with the central bank, they also feared the use that might be made of a trading bank, linked in this manner with the central bank, if a Government hostile to their interests came to power.

"The private banks have made it plain," Sir Arthur Fadden continued, "that they do not criticize the way in which the central bank has used the powers and functions it has under present legislation. On the contrary, they have been at pains to commend the competence, integrity, and impartiality of the central bank. They say that their complaint is simply and solely against the banking legislation as it stands, and that their fears relate wholly to the wrong use that might be made of that legislation." Their objections centred on two main points—the link between the central bank and the trading bank, and the special account system, which they believed could be used to damage them in vital ways.

A highly important aspect of this matter (Sir Arthur continued) was that these apprehensions were shared by many of the customers of the banks, who represented the great majority of the people engaged in trade and industry. Whilst some people might argue that there was no essential reason why there need be such lack of confidence under the present system, it could not be denied that this lack of confidence existed, and that it constituted a barrier to the achievement of a truly satisfactory banking system. The Government had to consider the matter from the standpoint of the national interest as a whole, and had a clear obligation to remove any element of weakness which barred the way to full efficiency and harmony in the banking system.

In the light of practical experience the Government had "by degrees come round to the belief" that only by completely separating the central bank from the rest of the Commonwealth banking group would the source of friction be eliminated. Technically, this was a complex problem, but the Government considered that the scheme put forward would provide an adequate and workable solution. In framing it, they had been determined to ensure that separation would not lead to any weakening of the basic powers of the central bank—in particular, of the powers to regulate the total volume of bank credit. Hence the introduction of the proposed statutory reserve deposits system, which would provide safeguards of the kind the banks desired and at the same time give ample scope and flexibility for credit control action by the central bank. The Government had been equally concerned not to impair the other institutions belonging to the present Commonwealth Bank group; to retain the Commonwealth Trading Bank as a "strong, active, competitive bank"; to safeguard the future of the Commonwealth Savings Bank; and to preserve the useful functions of the existing Rural Credits Department, the Mortgage Bank Department, and the Industrial Finance Department.

Labour Party's Opposition to Legislation. - Bills rejected in Senate.

The proposed legislation encountered strong opposition from the Labour Party, the Treasurer's speech leading to stormy scenes in the House of Representatives.

Dr. Evatt (Leader of the Opposition), speaking on Nov. 7, described the legislation as entirely unnecessary and denounced it as having been brought in at the behest of the private trading banks, which, he said, were hostile to the Labour Party. He claimed that the private banks had nothing to fear from the present special account system, and were protected against discrimination, whereas the new system would seriously delay action by the Reserve Bank to counter inflation. Dr. Evatt alleged that the real reason for the legislation was the successful competition of the Commonwealth Trading Bank against the private banks, its deposits having increased since 1945 [when it was first required by statute to compete with the private banks] from £50,000,000 to £200,000,000, and its loans having increased eightfold. In 1956 it had had 500,000 customers, and the figure was increasing at a rate of 42,000 a year.

The four major banking Bills and the 10 subsidiary Bills were given a third reading by the House of Representatives on Nov. 26-27, the voting on the Reserve Bank Bill being 53 to 28, on the Commonwealth Banks Bill 50 to 27, on the Banking Bill 54 to 28, and on the Banking (Transitional Provisions) Bill 53 to 29. When the Bills came up in the Senate, however, the Opposition mobilized every one of its members to oppose the Bill—including three Senators who were ill, and one who had recently undergone a serious operation and was brought to Parliament on a stretcher. As a result, the Government's motion for the first reading of the Reserve Bank Bill and the Commonwealth Banks Bill was defeated on Nov. 27 on a tie vote (28 for and 28 against). In a second attempt on Dec. 3 to pass these Bills, the motion for the first reading was again rejected by a tie vote of 27-27. The Senate also rejected on the same date, and by the same tie vote, the Banking Bill and the Banking (Transitional Provisions) Bill, and defeated the 10 subsidiary Bills by a voice vote. All the votes were taken without debate.

When opening the new session of the Commonwealth Parliament on Feb. 25, 1958, the Governor-General (Field-Marshal Sir William Slim) announced in the Speech from the Throne that the Government would reintroduce the four major banking Bills which had been rejected in the Senate.
(Australian Parliamentary Report, Banking Legislation 1957 - Australian News and Information Bureau) **(12918 C.)**

A. UNITED STATES.—Reductions in Federal Reserve Bank Rates, Stock Margin Requirements, and Reserve Requirements of Member Banks.

The Federal Reserve Board approved on Nov. 14, 1957, a reduction in the discount rate from 3½ per cent to 3 per cent by the Federal Reserve Banks of New York, Atlanta, Richmond, and St. Louis, as from Nov. 15. Similar cuts took place in the discount rate of the Federal Reserve Bank of Boston on Nov. 19; of the Federal Reserve Banks of Philadelphia, Minneapolis, and Kansas City on Nov. 22; of the Federal Reserve Banks of Chicago, Cleveland, and San Francisco on Nov. 28; and of the Federal Reserve Bank of Dallas on Dec. 2.

A spokesman of the Federal Reserve Board stated on Nov. 14 that the discount rate had been reduced because the "feverish surge in the economy" had been worked off and inflationary pressure eased; it was time, therefore, to change the rate to meet present economic conditions. The reductions (the first to be effected after a three-year period of rate increases) followed a noticeable decline of industrial and business activity, largely in the production of durable goods—the downward trend being described in the American Press as a "mild business slow-down."

A further reduction in the discount rate of the Federal Reserve Bank of Philadelphia from 3 per cent to 2¾ per cent was approved by the Federal Reserve Board on Jan. 21, 1958. Similar reductions were made by the Reserve Banks of New York, Cleveland, Chicago, Richmond, St. Louis, and Kansas City with effect from Jan. 24, followed by the Reserve Banks of Boston, Atlanta, Dallas, and Minneapolis. The Reserve Bank of San Francisco, however, announced on Feb. 14 that it would continue its rate at 3 per cent.

The new cut in the bank rate was an expression of increasing uneasiness over the continued recession in U.S. economic activity. According to the Federal Reserve Board's report issued on Jan. 16, personal incomes had declined in December for the fourth successive month, whilst industrial output was at its lowest level for 18 months.

Between the first and second reduction of discount rates the Federal Reserve Board had announced another credit-easing move on Jan. 15 by reducing margin requirements for stock purchases from 70 per cent to 50 per cent, with effect from Jan. 16. [Margin is the minimum percentage of cash a purchaser must put up to purchase stock.]

In yet another move to stimulate economic activity, the Federal Reserve Board announced on Feb. 19 that reserve requirements of member-banks would be reduced by ½ per cent: viz., from 20 per cent to 19½ per cent of net demand deposits for central Reserve city banks (New York and Chicago); from 18 per cent to 17½ per cent for Reserve city banks; and from 12 per cent to 11½ per cent for country banks. The cuts will release about $500,000,000 from present required reserves, and it was estimated that this would mean some $3,000,000,000 more in available credit.—(New York Times - New York Herald Tribune - Financial Times, London) **(Prev. rep. 15784 A.)**

A. UGANDA. — Constitutional Developments. - Direct Elections to Legislative Council in 1958. - Common Roll Elections in 1961. - Rejection of Lukiko's Petition for Discussions on Self-Government. - Split in Uganda National Congress.

Proposals for the direct election of the 18 African representative members of the Uganda Legislative Council in 1958 were published by the Government of Uganda on June 28, 1957, after discussions with the district councils. The proposals were unanimously approved by the Legislative Council on Aug. 8 and accepted by the U.K. Government on Oct. 10, 1957. Details of the Government's constitutional proposals and of the controversies preceding and arising from them are given below.

Sir Andrew Cohen (then Governor of Uganda) had announced in the Legislative Council on April 24, 1956, that it was the policy of the Government of Uganda, with the full support of H.M. Government, to introduce direct elections on a common roll for representative members of the Legislative Council in 1961, if an acceptable scheme could be arranged. The Government would therefore set up machinery in the next Legislative Council to work out details of the franchise, as well as a scheme to secure proper representation of non-African communities within the system of a common roll. At the next elections in 1957 the members representing the Northern, Eastern, and Western provinces would be chosen as hitherto by district councils, but the five Baganda representatives would be directly elected, in accordance with the Buganda Agreement of 1955, if satisfactory arrangements could be agreed on with the Kabaka's Government. Although the elections in Buganda would not be on a common roll, they would provide an opportunity of testing the method of direct elections in preparation for a country-wide examination of the problems of direct common-roll elections in 1961.

The Governor's statement was strongly criticized by the African Press and political organizations.

The Uganda National Congress (U.N.C.), the largest political party in the country, issued a statement on May 13, 1956, opposing the proposal that direct elections in 1957 should be confined to Buganda, and demanding that the Government should prepare the whole country for such elections; while expressing its willingness to discuss representation of minorities, the U.N.C. questioned whether such safeguards as the Government desired were necessary. The Central Council of Moslem Associations (a largely Asian organization, then newly formed) announced its full support for the Governor's statement on Aug. 3, 1956; it added that if adequate and effective representation of non-African groups appeared likely to retard constitutional advance, "the Moslem community would not insist upon the reservation of minority representation."

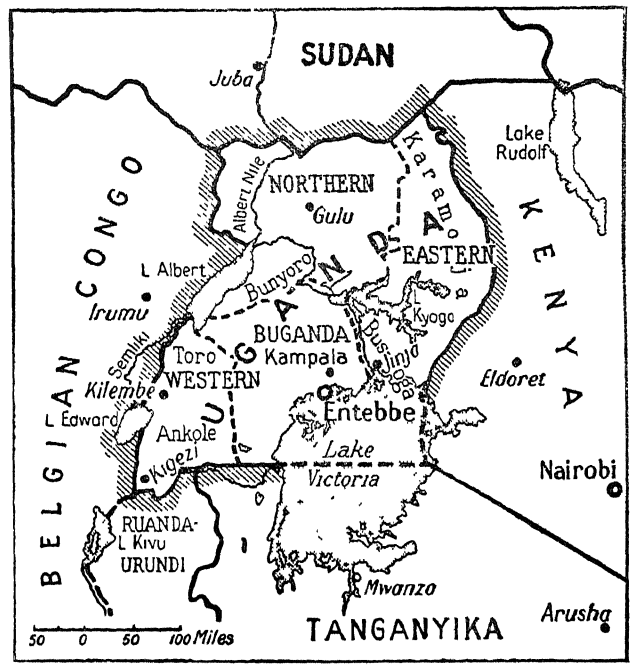
It was announced on Nov. 22, 1956, that the Government's proposals had been discussed in all districts and would be considered by a special committee of the Legislative Council appointed by the Governor. A report on discussions between representatives of the Protectorate Government and the Buganda Government, published at the same time, recommended that voters in Buganda should possess certain property, educational, or other qualifications. These recommendations, however, were subsequently rejected by the Lukiko (the Buganda Council), which adopted a resolution in favour of universal adult suffrage. Discussions were accordingly reopened in April 1957 with a different delegation representing Buganda.

On June 28, 1957, the Uganda Government published amended proposals which provided for direct elections for the whole Protectorate. The report of the Elections Committee of the Legislative Council, and another report on the discussions between the Uganda and Buganda Governments, were published at the same time.

The paper setting out the Uganda Government's revised proposals stated that the main objective remained the introduction of the common roll in 1961, but that the Government was "prepared to modify its views about the timing of the introduction of direct elections for African representatives from outside Buganda as a result of discussions held throughout the Protectorate, and because it is satisfied that it is preferable that these members should be elected on the same basis throughout the Protectorate." To make the necessary legislative and administrative arrangements, it would be necessary to prolong until 1958 the life of the Legislative Council, which was due to be dissolved at the end of 1957.

The Elections Committee recommended that every voter should be 21 or over and resident in his constituency, and should either (*a*) be an owner or genuine occupier of land; (*b*) be able to read and write in the vernacular; (*c*) have been employed continuously for seven years in the public services, agriculture, commerce, or industry; or (*d*) have an income of £100 a year or property worth £400. Candidates should be at least 27 years of age; be able to speak, read, and write English; be registered voters of the administrative district in which they were standing for election; and have an income of £200 a year or property worth £700. Agreement on similar qualifications for voters and candidates had been reached between the Protectorate and Buganda Governments.

A minority report signed by three African members of the Elections Committee, including Dr. B. N. Kununka (general secretary of the U.N.C.), dissented from the view—expressed in the report—that the non-African communities should be represented on the representative side of the Legislative Council when the common-roll was introduced, and maintained that any common-roll system should not be weighted in favour of certain sections of the population.



(*Economist*)

The Legislative Council approved unanimously on Aug. 8, 1957, a Government-sponsored motion asking H.M. Government to introduce direct elections for the 18 African representatives from all parts of Uganda except Karamoja (a backward district in north-eastern Uganda). Mr. J. V. Wild (the Administrative Secretary) stated during the debate that the proposed qualifications would make 70 to 80 per cent of African men and about 20 per cent of African women eligible for the franchise. He also announced that a seat would be found on the Government back-bench for a representative from Karamoja.

The Lukiko had previously (July 30, 1957) adopted a motion approving the introduction in Buganda of direct elections for the Legislative Council. The principle of direct elections was subsequently endorsed by all the district councils except those of Ankole and Bugishu, and on Oct. 10 Mr. Lennox-Boyd (the U.K. Colonial Secretary, then visiting Uganda) announced that he had agreed to direct elections for the 18 African seats in question being held in 1958.

A resolution approving the principle of a common roll with "adequate and effective representation" for minorities in the 1961 elections was moved in the Legislative Council by Mr. C. H. Hartwell (the Chief Secretary) on Sept. 30, 1957, and after a four-day debate was approved on Oct. 3 by 34 votes to 20. All African representative members voted against it. Mr. Hartwell explained that the concept of "adequate representation" referred to the number of seats, whilst by "effective representation" the Government meant that the electoral mechanism must be such as to ensure that the number of non-Africans regarded as adequate were in fact returned to the representative side. He gave an assurance that the Government had no intention of increasing the present number of non-African representatives.

The Government's attitude on this question also met with considerable African opposition outside the Legislative Council. The Lukiko adopted a resolution on Aug. 19, 1957, protesting against the Government's intention to link the introduction of direct elections with the Council's acceptance of the principle of a common roll. The U.N.C. announced on Oct. 13 that it would instruct its members on the Council to resign if the Government pressed its "totalitarian policies," whilst the United Congress Party, which had broken away from the U.N.C. [see below], also announced that it was considering a boycott of the Council as a protest against Mr. Lennox-Boyd's decision that there should be no major constitutional changes before 1961.

Two United Congress Party members of the Council, Dr. E. M. K. Muwazi (one of the five members from Buganda) and Mr. David Lubogo (one of the two members representing the neighbouring district of Busoga), subsequently resigned their seats in November 1957 on the ground that the Council was "ignoring the wishes of the African people." The Buganda electoral college decided on Dec. 17 not to elect a successor to Dr. Muwazi, and called upon the four other Baganda members to resign, whilst the Busoga district council similarly decided not to replace Mr. Lubogo. After both bodies had reaffirmed their decision, Sir Frederick Crawford (Sir Andrew Cohen's successor as Governor) announced on Jan. 13, 1958, that Dr. Muwazi's seat would remain vacant, but that he (the Governor) would nominate a successor to Mr. Lubogo. The U.N.C. and the Progressive Party dissociated themselves from the attitude of the Buganda electoral college and reiterated their decision to work for constitutional progress from within the Council; the four other Baganda members likewise did not resign from the Council.

Three additional African members were nominated to the Council on Jan. 6, 1958, including a representative of Karamoja. Two of these new members took over the two votes formerly held by Sir Frederick Crawford as president of the Council, whilst the third replaced Mr. C. A. L. Richards, who had resigned his seat to devote himself fully to his duties as Resident of Buganda.

Other recent political developments in Uganda are described below under cross-headings.

Buganda and Toro Demands for Self-Government.

The Lukiko unanimously approved on Feb. 14, 1957, a petition to the Queen asking for discussions in the near future between representatives of the Queen and of the Lukiko to "make a definite policy which will lead us to self-government in a fixed time within the Commonwealth."

After recalling that Buganda had accepted British protection in 1893, under an agreement signed by the then Kabaka, the petition asserted that there had since been a departure from the spirit of that agreement in three instances: (i) the deportation of the Kabaka in 1953, (ii) proposals by the Protectorate Government for the compulsory acquisition of land for a new railway; and (iii) a plan for the establishment in Nairobi of a central supply organization for the East African military forces. The petition contended that the 1955 agreement had not mentioned self-government because it had been concluded as the only means of securing the Kabaka's return, and therefore "other important political issues were not discussed."

Mr. Lennox-Boyd's reply, which was handed to the Katikiro (Chief Minister) of Buganda on April 5, 1957, stated that the U.K. Government saw no reason to alter the arrangement agreed upon in 1955—viz., that there should be no major changes in the Constitution before 1961.

With reference to the grievances mentioned, Mr. Lennox-Boyd said that no useful purpose could be served by again discussing the Kabaka's deportation; that the Protectorate Government was arranging for a test case in the courts on the railway land dispute; and that the establishment of a central military supply organization in Nairobi would not affect the Governor's control of the Forces in Uganda. Refuting the statement that the 1955 agreement had been entered into by Buganda mainly as a means of ensuring the Kabaka's return, Mr. Lennox-Boyd pointed out that the discussions leading to the 1955 agreement, and the agreement itself, had covered many important issues unconnected with the return of the Kabaka. In reply to the request for a meeting with "representatives of the Queen," Mr. Lennox-Boyd pointed out that the Governor of Uganda was the Queen's representative and was always available for discussions.

The Rukurato (Council) of the kingdom of Toro (in western Uganda) adopted a resolution on June 23, 1957, supporting Uganda's evolution towards self-government on federal lines, as a means of preserving the position of the native rulers, rather than as a unitary State. On July 30 the Lukiko adopted a similar resolution opposing Uganda's development as a unitary State, and advocating a system which would "strengthen firmly the position of the Kabaka and other native rulers."

Lukiko's Rejection of Direct Election of its Members.

The Lukiko rejected on June 20, 1956, by 57 votes to 21, a motion that direct election of its own members should be introduced in 1958.

The motion had been proposed by Mr. E. M. K. Mulira (leader of the Progressive Party) and was supported by the Katikiro (Mr. Kintu), who pointed out that they could not ask for direct election to the Legislative Council and reject it for themselves. [The Lukiko consists of the Kabaka's Ministers, 20 *saza* (county) chiefs, six nominees of the Kabaka, 50 members chosen by electoral colleges, and 20 elected by *saza* councils.] After the vote Mr. Mulira, Mr. I. K. Musazi (president of the U.N.C.), and Mr Joseph Kiwanuka (chairman of the U.N.C.) walked out as a protest The Speaker (Mr. Kasule) subsequently ordered the expulsion of Mr. Mulira from the Lukiko on the ground that he had "broken custom" by walking out.

Split in Uganda National Congress.

Dissensions among the leadership of the U.N.C. during 1956-57 culminated in an open split at the annual congress on June 30, 1957, when 47 delegates walked out in protest against alleged irregularities in the election of the leadership. The dissenting delegates subsequently formed the United Congress Party, whose leaders included several former members of the U.N.C. executive—among them Dr. Muwazi, Mr. Lubogo, and Mr. J. L. Zake, legal adviser to the Lukiko.

The U.N.C. had previously issued a manifesto on May 12, 1957, declaring that its objective was the complete independence of Uganda as a full member of the British Commonwealth. It defined its immediate aims as (1) direct elections throughout Uganda on a basis of universal suffrage, (2) the unity of Uganda's tribes as an African nation, with preservation of tribal institutions; (3) Africanization of the Civil Service; (4) the creation of opportunities for Africans in trade, commerce, and industry.

Alleged Conspiracy against the Kabaka.

Mr. Kiwanuka was arrested by order of the Buganda Government on Jan. 14, 1958, on a charge of conspiring to procure by bribery the assassination of the Kabaka, of Mr. Kintu, and of three other prominent Baganda. Mr. Musazi, for whose arrest a warrant had been issued, gave himself up on the following day, but no charge was brought against him. The hearing of the case against Mr. Kiwanuka (who had been released on bail) was adjourned indefinitely by the chief court of Buganda on Jan. 24, after the prosecution had stated that investigations were taking longer than had been anticipated.

Speaker of Legislative Council. - New Seat of Government.

Sir John Griffin, a former Chief Justice of Uganda, was appointed the first Speaker of the Legislative Council on Nov. 18, 1957.

Sir Frederick Crawford, the Governor, informed the Legislative Council on Jan. 13, 1958, that the seat of the Protectorate Government would be moved from Entebbe to Kampala.—(Times - Daily Telegraph - Manchester Guardian)
(Prev. rep. Constitutional Reform, 14356 A; 14034 A; Buganda Agreement, 14481 A; Governor, 15032 E.)

Note. As shown on the map on page 16035, the Uganda Protectorate consists of the Kingdom of Buganda and the Northern, Eastern and Western provinces. The people of Buganda are known as the Baganda; their language is Luganda.

A. PANAMA. — Assassination of President Remón. - Defendants acquitted of Complicity. - Release of Ex-President Guizado.

The trial opened in Panama City on Oct. 21, 1957, of Señor Ruben Miro on a charge of complicity in the assassination of President Remón on Jan. 2, 1955. Six other defendants (five men and one woman) were also tried the men on the same charge as Sr. Miro, and the woman for having allegedly harboured one of the accused.

The prosecution rested almost entirely on a confession which Sr. Miro was alleged to have made after the murder of President Remón; this confession, however, was subsequently retracted, and Sr. Miro pleaded not guilty at the trial. After extensive hearings, all seven defendants were acquitted on Dec. 6 and immediately released. Ex-President Guizado, who had been serving a sentence of six years and eight months on a charge of being an accessory to the assassination, was also released from gaol on Dec. 10, after serving almost three years of his sentence. - (New York Times)
(Prev. rep. 14161 B; 14053 A.)

B. ITALY - PERSIA. — New Trade Agreement.

A new trade and payments agreement between Italy and Persia was signed in Rome on Jan. 20, 1958.

Replacing an agreement of 1952, it provided for an increase in the volume of Italo-Persian trade from 15,800,000,000 lire during the first ten months of 1957 to 40,000,000,000 lire a year, and removed all Persian import restrictions on Italian exports of capital equipment and industrial machinery. Italian exports to Persia (for which quotas were fixed) will include cotton, woollen, and artificial-fibre textiles and yarns; lorries, buses, and motor cars; tyres; agricultural machinery; pharmaceutical products; cement; cables, etc. Italy may also supply small ships and aircraft. The principal Persian exports to Italy will be raw cotton and oil-seeds, as well as timber, carpets, hides, ores, wool, and silk.

The agreement abolished the existing clearing arrangement and introduced the new multilateral lira system in its place. The trade arrangements will be valid for one year in the first instance, but will continue until notice of termination is given. (Corriere d'Informazione, Milan) **(Prev. rep. 15837 A.)**

A. SAMOA. — Constitutional Development. - Introduction of Ministerial System. - New Zealand Reparation Estates transferred to Public Corporation.

Two Bills granting the Trust Territory of Western Samoa an increased degree of self-government were passed by the New Zealand Parliament in 1956 and 1957. The first of these provided that the High Commissioner might entrust elected as well as official members of the Executive Council with the responsibility for Government departments, whilst the second established ministerial government, with the Executive Council functioning as a Council of Ministers. Statements issued by the New Zealand Government emphasized that these changes were intended to be preparatory to the introduction of a full system of Cabinet government in 1960. Details of these and other recent constitutional developments are given below.

A Samoan constitutional convention held in December 1954 had put forward the following recommendations :

(1) A single Legislature should replace the existing 26-member Legislative Assembly and the Fono of Faipule (an advisory council of 41 members). The Legislature should be presided over by a Speaker elected by the House, and should consist of 41 elected Samoan members, five elected European members, and two official members (the Ministers of Justice and Finance).

(2) The Legislature should have power to make all laws necessary for the peace, order, and good government of Western Samoa, subject only to the suspensory veto of the Head of State and to any restrictions which might be advisable owing to Samoa's relationship with New Zealand. "Reserved" subjects would remain as they were for the present, but should be reviewed as constitutional changes took place.

(3) Elections should be held every three years, and the Legislature should not be dissolved save for these triennial elections. In the Samoan constituencies, only *matai* (chiefs) should have the right to vote and to be nominated as candidates. Elections should be by secret ballot, but any candidate nominated by a majority of the *matai* of the constituency should be declared elected.

(4) The two *Fautua* should be the first Head of State, acting together and with equal powers. Their term should be for life, but legal provision should be made to permit them to resign at any time. Future vacancies in the position should be filled in a manner decided by the Legislature.

(5) A Premier and Cabinet should control the executive from the time when the new Legislature was established. The Premier should be chosen by the Legislature, and could be dismissed by the Head of State only after a vote of no-confidence passed by two-thirds of its members. On the dismissal or resignation of the Premier, Parliament should not be dissolved but should elect another Premier.

(6) The Premier should choose his Cabinet from the elected members with the Legislature's approval. For the time being, two official members (the Ministers of Justice and Finance) should be included in the Cabinet.

(7) The Government should control its own Public Service through a Public Service Commissioner.

(8) The special relationship between Western Samoa and New Zealand should be maintained indefinitely, although its form might change with changing circumstances and constitutional developments. There should be a New Zealand representative in Western Samoa, whose status, powers, and functions would depend upon the nature of the relationship between the N.Z. and Samoan Governments.

The New Zealand Government's proposals for the constitutional development of Western Samoa were contained in a memorandum sent to the High Commissioner on Dec. 26, 1955, and were endorsed in principle at a joint session of the Samoan Legislative Assembly and the Fono of Faipule in February 1956.

The memorandum accepted the convention's recommendations in general, but proposed a number of amendments, the most important of which were as follows : (1) power to dissolve the Legislature before its three-year term was completed should be vested in the High Commissioner, and after his establishment in the Head of State. (2) The Legislature should be able to remove the Premier by a simple majority vote of no-confidence. (3) While accepting the recommendation for restriction of the franchise, the N.Z. Government hoped that universal suffrage would eventually be adopted.

The memorandum proposed that full Cabinet government should be achieved by the following stages : (1) As from 1956, the elected as well as the official members of the Executive Council should be responsible for departments allotted to them. The High Commissioner and the *Fautua* would continue to be members of the Executive Council (over which the High Commissioner would preside) and of the Legislature. (2) Ministerial government, with the Executive Council functioning as a Council of Ministers, would be established when the new Legislature was set up in 1957. The High Commissioner and the *Foutua* would still be members of the Executive Council, over which the High Commissioner would preside, but would cease to be members of the Legislature, which would be presided over by an elected Speaker and led by a Leader of Government Business. (3) Cabinet government would be introduced, it was hoped, in 1960. The Premier would then preside over the Council of Ministers and lead the Legislature, and the High Commissioner and the *Fautua* would no longer attend Council meetings.

"With full Cabinet government thus established," the memorandum stated, "there would remain only one more step to be taken before it could be said that self-government had been finally achieved—namely, the change in status of the representative of New Zealand and the assumption by the Head of State of the proper powers and functions of that office. When this should be done would be the subject of discussions between the new Government of Western Samoa and the Government of New Zealand."

The Samoa Amendment Act, 1956, providing for the assumption of departmental responsibilities by elected members of the Executive Council, was passed by the N.Z. House of Representatives in the summer of that year and came into force on Sept. 1, 1956. Under the provisions of this Act, four Samoan members of the Legislative Assembly assumed responsibility for the Departments of Agriculture, Lands, Education, and Health.

The Samoa Amendment Act, 1957, which received its third reading in the N.Z. House of Representatives on Oct. 9, 1957, increased the number of Samoan elected members of the Executive Council—who were to be known as Ministers—from four to five. The High Commissioner was required to consult the Executive Council and to act upon its advice in the exercise of his powers, except those relating to defence, external affairs, the title to Crown Land, and certain other matters. The Act also abolished the Fono of Faipule and increased the size of the Legislative Assembly, in accordance with the constitutional convention's recommendations. It also laid down that the Assembly should meet at least once a year and be elected for a three-year term, but might be prorogued or dissolved by the High Commissioner.

In the elections to the Assembly which took place on Nov. 15, 1957, voting took place in only 10 of the 41 constituencies. Of the remaining Samoan members, 26 were returned unopposed and five were nominated by a majority of the *matai* in their constituencies.

The N.Z House of Representatives passed on Oct. 24, 1956, an Act establishing a corporation (the Western Samoan Trust Estates Corporation) to administer the assets of the New Zealand Reparation Estates for the benefit of the people of Western Samoa.

The estates comprise cocoa and coconut plantations, bush land, and buildings which were taken over from German owners when N.Z. forces occupied the German colony of Samoa in 1914, and were subsequently granted to the N.Z. Government as war reparations. Since 1945 the profits from the estates had been used to finance projects for the social and economic advancement of the Samoan people. The estates, which are the largest single employer of labour and the largest taxpayer in Western Samoa, cover 33,245 acres and are valued at £1,104,065.

The estates were handed over on April 1, 1957, to the corporation, which consists of the Director of Agriculture of Western Samoa, a general manager, four Samoan directors appointed by the High Commissioner, and a director appointed by the New Zealand Minister of Island Territories.

B. SCIENTIFIC RESEARCH. — The Sea Gravimeter.

The U.S. Committee for the International Geophysical Year announced on Dec. 13, 1957, that successful tests had been carried out of a new instrument—known as the sea gravimeter —which would make it possible to determine the density of the earth's crust beneath all the oceans of the world. The new device was developed in 1955 by Dr. Anton Graf, of Munich, and Dr. J. Lamar Worzel, Professor of Geology at Columbia University, and had undergone successful tests on a route from Long Island (N.Y.) 200 miles south-eastward into the Atlantic. The instrument was mounted on a gyro-stabilized platform installed in a guided-missile ship, U.S.S. *Compass Island*, and had accurately determined the density of the earth's crust over the route taken.

The sea gravimeter can detect changes of one-millionth of the value of gravity at the earth's surface. It is expected to be used extensively in the oceanographical researches being carried out as part of the I.G.Y. programme. (New York Times)

C. FRANCE. — Population passes 44,000,000-mark.

The National Statistical Institute announced on Feb. 26 that the population of France had passed the 44,000,000-mark, being 44,289,000 at Jan. 1, 1958—an increase of 435,000 during 1957. It was stated that this increase was partly due to the influx of over 100,000 foreign workers. Births totalled 805,000 in 1957, against 803,000 in 1956, and deaths 520,000, against 542,000.
(Le Monde, Paris) **(Prev. rep. 15577 A.)**

A. SOVIET UNION.—Agricultural Policy. - Sale of State-owned Machinery and Tractors to Collective Farms. - Adoption of M. Khrushchev's Proposals.

In a speech at Minsk on Jan. 22 to a conference of agricultural workers, M. Khrushchev suggested the elimination of the State-owned machine and tractor stations (which rent out most of the agricultural machinery used by the collective farms) and the sale of their machinery to the collective farms. M. Khrushchev's proposals were approved on Feb. 26 by the Central Committee of the Soviet Communist Party.

M. Khrushchev said that the concentration of machinery in the machine and tractor stations had been justified when the collective farms were small and could not use new equipment economically. Since then, however, they had been enlarged, until some had as much as nearly 50,000 acres, and they were therefore now in a position to make rational use of equipment. Grain and other crops cost much less to produce on State farms—which owned their own machinery—than on collective farms, because of the many overhead expenses at the machine and tractor stations. The collective farms and the machine and tractor stations each had their own managerial apparatus, with the result that "there are two masters on the same land, and where there are two masters there cannot be good order . . ."

He therefore suggested that part of the machinery owned by the machine and tractor stations (e.g. tractors, cultivators, seed drills, and soil-tilling implements) should be sold to the collective farms. The machine and tractor stations should be entrusted with repairs and with the sale of spare parts and machines, and should rent out machines which it was not advantageous for the collective farms to buy—e.g. land reclamation equipment and road-making machinery. Emphasizing that this change would put an end to "the bureaucratic distribution of machinery from the centre," M Khrushchev commented: "Today, unfortunately, there is much disorder in this matter, which causes huge losses to the State. The machine and tractor stations take a machine even if they do not need it. No flax is sown, but they get flax combines; no cabbages are grown, but they receive machines for sowing cabbage seed. As a result, much equipment is unused for years, and State funds amounting to hundreds of millions of roubles are turned into dead capital."

M. Khrushchev stated that his proposal was being studied by the Communist Party Central Committee and the Council of Ministers. If it was approved, the same procedure might be followed as in the case of the reorganization of industrial management [see 15575 A]—i.e. "theses" would be published for general discussion, and a session of the Supreme Soviet would be convened. The process of reorganization, however, might be spread over two or three years, as some collective farms were not in a position to buy the necessary equipment and organize its proper utilization immediately.

A policy of transferring the machine and tractor stations to the collective farms had been approved by the Communist Party Central Committee as far back as 1930, but was reversed a few months later. The possibility of reverting to such a policy was discussed by Stalin in his *Economic Problems of Socialism in the U.S.S.R.*, published in 1952, but was rejected by him on the grounds that the collective farms would be ruined by the expense of replacing obsolete machinery, and that such a change would be a step away from Communism. M. Khrushchev's proposals therefore represented a continuation both of his campaign against "bureaucracy" in the organization of economic life, and of the attack on Stalin's economic theories launched at the 20th Communist Party congress in February 1956 [see 14745 A].

The Soviet Ministry of Agriculture announced on Oct. 24, 1957, that nearly 90,000,000 acres of virgin land (more than the total cultivated area of France, Italy, Western Germany, Austria, Belgium, Denmark, the Netherlands, Spain, and Sweden) had been brought under cultivation in the eastern part of the U.S.S.R. since 1954, with the result that output of grain had increased by nearly 24,500,000 tons. More than 7,500,000 acres had been ploughed up during 1957, mainly in Kazakhstan and Siberia, and an additional 30,000,000 to 37,500,000 acres would be brought into cultivation within the next two or three years in Siberia, the Urals, and the south-eastern part of the Russian Soviet Republic (R.S.F.S.R.)

(Prev. rep. 15899 A; 15690 B.)

B. SWITZERLAND. — Air Force. - Purchase of 100 Jet Fighters from Britain.

An order for 100 Hawker *Hunter* turbo-jet fighters was placed by the Swiss Government on Jan. 29 with the Hawker Aircraft Company. The Swiss National Council (the Lower House) had approved the transaction earlier the same day by 123 votes to 11, the Council of States having already given its approval in December. The aircraft will cost £13,000,000 (312,800,000 Swiss francs) and will be delivered by the end of 1959. They will replace the 75 *Vampire* fighters bought by Switzerland from Britain in 1947.—(Neue Zürcher Zeitung)

(Prev. rep. 8694 C.)

C. LITERATURE. — Book Selections, January and February 1958. - British Book Production in 1957.

Selected books published in Great Britain and the United States are given below:

Great Britain. Abrahams, Peter—"Jamaica: An Island Mosaic." (H.M. Stationery Office, Corona Library, 25s.)
Baines, Frank—"Look Towards the Sea." An Autobiography. (Eyre and Spottiswoode, 21s.)
de la Bedoyere, Michael—"The Meddlesome Friar." The Conflict between Savonarola and Pope Alexander VI. (Collins, 18s.)
Bonnin, Georges (editor)—"Bismarck and the Hohenzollern Candidature for the Spanish Throne." The Documents in the German Diplomatic Archives. (Chatto and Windus, 42s.)
Bruce, Maurice—"The Shaping of the Modern World, 1870-1939: Volume I—The World to 1914." (Hutchinson, 42s.)
Campbell, Peter—"French Electoral Systems and Elections, 1789-1957." (Faber and Faber, 21s.)
Cobb, Belton—"The First Detectives." (Faber and Faber, 15s.)
Connell, John—"The 'Office': A Study of British Foreign Policy and its Makers, 1919-1951." (Allan Wingate, 25s.)
Davidson, Basil—"Turkestan Alive: New Travels in Chinese Central Asia" (Cape, 25s.)
Guppy, Nicholas—"Wai-Wai: Through the Forests North of the Amazon." (John Murray, 28s.)
Hemlow, Joyce—"The History of Fanny Burney." (Oxford University Press, 35s.)
Høyer, Liv Nansen—"Nansen: A Family Portrait." Translated from the Norwegian. (Longmans, 30s.)
Jones, L. E. (Sir Lawrence Jones)—"Georgian Afternoon." Autobiography, Volume III. (Rupert Hart-Davis, 21s.)
Kennan, George F.—"Russia, the Atom, and the West." The B.B.C. Reith Lectures for 1957. (Oxford University Press, 10s. 6d.)
Linn, Bettina—"A Letter to Elizabeth." A Novel. (Chatto and Windus, 15s.)
Lodwick, John (with D. H. Young)—"Gulbenkian." An Interpretation of Calouste Sarkis Gulbenkian. (Heinemann, 21s.)
Macintyre, Captain Donald—"Jutland." (Evans, 18s.)
Martin, E. W.—"Where London Ends: English Provincial Life after 1750." (Phoenix House, 30s.)
Mehta, Ved—"Face to Face." The Autobiography of a Blind Indian Student. (Collins, 16s.)
Namier, Sir Lewis—"Vanished Supremacies." Essays in European History, 1812-1918. (Hamish Hamilton, 18s.)
O'Connor, Philip—"Memoirs of a Public Baby." (Faber and Faber, 18s.)
Powell, Dilys—"An Affair of the Heart." Three Post-war Journeys to Greece. (Hodder and Stoughton, 21s.)
Salvesen, Sylvia—"Forgive—But do not Forget." A Norwegian Woman's Experiences in Ravensbrück Concentration Camp. Translated from the Norwegian. (Hutchinson, 21s.)
Sansom, William—"The Icicle and the Sun: Finland, Norway, Sweden, Denmark" (Hogarth Press, 18s.)
Slater, Humphrey, and Barnett, Corelli—"The Channel Tunnel." (Allan Wingate, 21s.)
Stewart, J. D.—"British Pressure Groups: Their Role in Relation to the House of Commons." (Oxford University Press, 30s.)
Swan, Michael—"The Marches of El Dorado: British Guiana, Brazil, Venezuela." (Cape, 25s.)
Warner, Oliver—"A Portrait of Lord Nelson." (Chatto and Windus, 30s.)
Watson-Watt, Sir Robert—"Three Steps to Victory." The Story of the Development of Radar. (Odhams, 30s.)
West, Morris—"Children of the Sun." The Story of Father Mario Borelli and the House of the Urchins at Naples. (Heinemann, 16s.)
Wilding, Norman, and Laundy, Philip "An Encyclopaedia of Parliament." (Cassell, 63s.)

United States. Acheson, Dean—"Power and Diplomacy." (Harvard University Press, $3.00)
Ashmore, Harry S.—"An Epitaph for Dixie." (William Norton, New York, $3.50)
"Clarence Darrow: Attorney for the Damned." Edited by Arthur Weinberg, with Foreword by Justice William O. Douglas. (Simon and Schuster, New York, $6.50)
Corwin, Edward S.—"The President: Office and Powers." (New York University Press, $6.50)

British publishers issued the record number of 20,719 titles in 1957—the first year in which the figure had exceeded the 20,000 mark. The figures were the highest ever recorded both for new titles (14,798) and for reprints and new editions (5,921).—(Ed. K.C.A. - Times Literary Supplement)

D. PARAGUAY.—Re-election of President Stroessner.

General Alfredo Stroessner was re-elected President of Paraguay on Feb. 9 for a further five-year term, in an election at which he was the only candidate and at which no Opposition parties were permitted. President Stroessner stood as the candidate of the *Colorado* party, the only political organization allowed in the country. A 60-member Chamber of Deputies was elected at the same time, all nominations being presented by the *Colorados* on a single list.—(New York Times)

(Prev. rep. 13688 D.)

A. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. — Creation of European Nuclear Energy Agency. - The Eurochemic Company.

Two new European agencies functioning within the framework of the O.E.E.C. came officially into existence on Feb. 1 : (*a*) the European Nuclear Energy Agency, which will co-ordinate nuclear research and development between member-countries for peaceful purposes ; and (*b*) the European Company for the Chemical Processing of Irradiated Fuel (Eurochemic), a joint undertaking in which 12 of the O.E.E.C. countries will participate. The statute of the European Nuclear Energy Agency had been signed on Dec. 20, 1957, after preparatory studies extending over 15 months.

The European Nuclear Energy Agency will be a specialized agency established within the framework of the O.E.E.C. and under the authority of its Council. It will promote the establishment of joint undertakings by the O.E.E.C. countries, discuss their research and production programmes for nuclear energy, study their requirements for raw materials and capital equipment, promote the liberalization of trade in these products, develop facilities for the training of specialists, and help to harmonize national legislation, in particular as regards the safeguarding of public health, prevention of accidents, third-party liability, and atomic risk assurance.

In carrying out these tasks, the Agency will take into account the work done by other international organizations and will, as far as possible, call on them for assistance In particular, it will establish close co-operation with Euratom.

The exclusively peaceful character of the Agency's objectives is ensured by a security control guaranteeing that the operation of the joint undertaking, together with the materials, equipment or services provided by the Agency, cannot be used for military purposes. The basic rules of this security control are laid down in a special convention, and closely follow those defined in the statute of the International Atomic Energy Agency and the Euratom Treaty. They provide for an examination of all plant subject to control; a system of quantitative control for nuclear fuel; on-the-spot supervision by international inspectors; and, in cases of non-observance, the possibility of imposing penalties by a majority vote. Provision is made for an international tribunal to settle certain disputes to which the exercise of control may give rise.

As the Euratom countries have established a complete system of security control, it is specified that control on Euratom territory will be exercised by its bodies under conditions to be settled by an agreement between the Agency and Euratom. Provision is also made for co-operation with the International Atomic Energy Agency in regard to control.

The Eurochemic Company. This Company will build and operate a plant for the chemical treatment of irradiated fuel (i.e. the production of plutonium) which will be erected at the Nuclear Research Centre at Mol (Belgium). The plant will have a capacity for treating approximately 100 tons of natural or slightly enriched uranium per annum. It is expected to cost 12 million E.P.U. units of account ($12,000,000, or 5,040 million French francs) and to be in operation by 1961.

The undertaking is constituted as a European Company, with a capital of 20,000,000 E.P.U. units of account ($20,000,000, or 8,400 million French francs), set up under an international convention with the participation of Governments, public institutions, and semi-public or private undertakings. The Company's capital will be divided into 400 shares, each of the nominal value of 50,000 units of account, to be initially subscribed and allotted as follows :

	Shares	E.P.U. Units of Account
Austrian Government	20	1,000,000
Belgian Government	44	2,200,000
Danish Government	22	1,100,000
French *Commissariat à l'Energie Atomique*	68	3,400,000
German Federal Government	68	3,400,000
Italian *Comitato Nazionale per le Ricerche Nucleari*	44	2,200,000
Norwegian Government	20	1,000,000
Netherlands Government	30	1,500,000
Portuguese *Junta de Energia Nuclear*	6	300,000
Swedish *Aktiebolaget Atomenergi*	32	1,600,000
Swiss Government	30	1,500,000
Turkish Government	16	800,000

One E.P.U. unit = one U.S. dollar or 420 French francs.

Other Projects. The O.E.E.C. announced on Feb. 1 that the following European projects were also under discussion : (1) a project for the joint operation of the reactor built at Halden (Norway) by the Norwegian Institute for Atomic Energy ; (2) the establishment of a homogeneous aqueous reactor at the British Research Centre at Winfrith Heath (Dorset); and (3) a study of the possibilities for the production of heavy water in Iceland by using geothermic energy (i.e. the hot water from geysers, which provide an abundant source of heat at exceptionally low cost).

Professor Pierre Huet, a French jurist, was appointed Director of the European Nuclear Energy Agency and took up his post on Feb. 1. General Counsel (*conseiller juridique*) of the O.E.E.C. since 1948, he was responsible for the work within the O.E.E.C. secretariat which led to the setting-up of the Agency. He was formerly professor at the *Institut des hautes études internationales* in Paris.

The chairman of the Eurochemic Company is Dr. Erich Pohland, of the Federal German Ministry of Atomic Affairs, and its vice-chairman is Dr. Erik Svenke, head of the Industrial Division of the Swedish Atomic Energy Agency (*Aktiebolaget Atomenergi*).

The European Nuclear Energy Agency was the third European organization to be created by the O.E.E.C., following the establishment of the European Productivity Agency and the European Payments Union. (O.E.E.C. Information Division)

(Prev. rep. 15097 A.)

B. POLAND. — Increased U.S. Economic Aid. - Sale of U.S. Surplus Farm Products. - Large U.S. Credit.

An economic aid agreement between Poland and the United States was signed in Washington on Feb. 15, following negotiations which had begun in October last. It provided for (1) the sale to Poland of U.S. surplus farm products worth $73,000,000 at world market prices, against payment in zlotys ; (2) the extension to Poland of a $25,000,000 credit for the purchase of additional agricultural products, raw materials, machinery, and medical equipment.

It was announced that the sales of agricultural surplus products would cover the following items : 40,000 tons of wheat ($25,700,000), 165,000 tons of barley ($7,200,000), 50,000 tons of maize ($2,600,000), 20,000 tons of sorghum ($800,000), 100,000 bales of cotton, ($16,800,000), 26,000 tons of soya oil or cotton-seed oil ($9,900,000) and 15,000 tons of powdered milk ($3,300,000). Approximate sea transport costs were estimated at $6,700,000, making a total of $73,000,000.

The zlotys received from the sale of these products will be used chiefly for the payment of U.S. Embassy expenses in Warsaw. It was provided, however, that as from March 1963 Poland would buy back the unused zlotys for dollars, at the rate of $2,810,000 a year.

The goods to be supplied against credit will comprise—machinery and installations for the food, leather, textile and metallurgical industries ($5,400,000); medical equipment ($1,000,000); articles supplementing industrial production ($4,000,000); raw and processed hides ($2,400,000); artificial silk yarn ($1,000,000); artificial fibres, e.g. dynol and orlon ($1,000,000); plastics ($1,000,000); and tinned fruit juices and preserves ($200,000). Cost of sea transport was estimated at $9,000,000, making a total of $25,000,000.

The credit [which will come from the President's special assistance fund] will be administered by the Export-Import Bank. It will be paid in dollars and will bear interest at 4½ per cent per annum, repayments being made over a 20-year period beginning in 1963.

It was also announced that both sides had agreed to discuss additional measures to facilitate U.S.-Polish trade, including the possibility of extending U.S. preferential treatment to Poland.

The agreement—which covered the financial year 1957-58—was the second of its kind, following the earlier agreement concluded on June 7, 1957.—(New York Times - New York Herald Tribune - Polish Embassy Press Office, London)

(Prev. rep. 15606 D.)

C. UNITED KINGDOM. — Clean Air Act to come into Operation on June 1.

The Minister of Housing and Local Government (Mr. Henry Brooke) announced on Feb. 6 that he had made regulations naming June 1 as the second " appointed day " for the entry into force of the Clean Air Act. As from that date (i) emission of dark smoke from chimneys would be banned ; and (ii) emissions of grit and dust would have to be reduced.

The regulations will make the pollution of air by dark smoke from any chimney an offence punishable by fines up to £100. It will apply to factories, shops, and offices, as well as to the funnels of ships and railway engines. House-chimneys will also be subject to the ban, but it was pointed out by a Ministry spokesman that in practice they rarely produced " dark smoke," which is defined in the Act as smoke " as dark or darker than shade 2 on the Ringelmann Chart." [The Ringelmann Chart was devised more than 60 years ago by Professor Ringelmann, a Frenchman, and has been used for some time by smoke inspectors in the U.S.A. in enforcing the " clean air " legislation in that country. The Ringelmann shade card is graduated from 0 (no smoke) to 5 (dense black).]

Emissions of grit and dust will also have to be reduced from June 1, as stated above. After that date all new furnaces for burning pulverized fuel, or more than one ton an hour of other solid fuels, will have to be equipped with grit- and dust-arresting plant approved by the local authority. In the case of other new and existing furnaces (except for small domestic boilers) failure to take practicable steps to minimize the emission of grit and dust will be an offence.

Much of the Clean Air Act has been in force since Dec. 31, 1956, including those sections which give local authorities powers to establish smoke-control areas in which householders must burn smokeless fuel.—(Times) **(Prev. rep. 15374 A.)**

A. UNITED STATES - SOVIET UNION.—Agreement on Development of Cultural Relations.

An agreement on the development of cultural and other exchanges between the Soviet Union and the United States was signed in Washington on Jan. 27 by M. Zarubin, the Soviet Ambassador, and Mr. Lacey, special assistant to the Secretary of State.

The question of U.S.-Soviet cultural relations had first been discussed at the Geneva "summit" conference in 1955. Further impetus leading to the opening of negotiations on this subject had been given by an interview with M. Khrushchev which was televised and broadcast by the Columbia Broadcasting System on June 2, 1957, and was estimated to have been heard by 100,000,000 people in the United States. In the course of this interview M. Khrushchev expressed his support for the exchange of cultural delegations and the development of contacts between the two peoples as a step towards the normalization of Soviet-American relations.

Following M Khrushchev's broadcast, the U.S. Government proposed on June 24 that an agreement should be reached in principle at an early date for the regular exchange of uncensored radio and television broadcasts. The Soviet reply (July 26), whilst expressing willingness to discuss this proposal, suggested that the scope of the negotiations should be widened to cover the whole field of cultural relations. This was accepted by the State Department on Aug. 16, and talks accordingly began on Oct. 28.

The terms of the agreement were as follows :

(1) Radio and television broadcasts would be exchanged, including broadcasts devoted to discussion of international political problems. The texts of broadcasts on political subjects would be exchanged in advance, and if either party considered that any such broadcast would not contribute to a betterment of Soviet-U.S. relations, the exchange would not take place.

(2) Delegations of specialists in various branches of industry, agriculture, and medicine, writers, composers, artists, and representatives of youth and women's organizations, would be exchanged during 1958. A proposal to exchange delegations of members of Congress and the Supreme Soviet would be the subject of further discussions.

(3) Negotiations between the cinema industries of both countries for the sale and purchase of films would open immediately, whilst negotiations on the possibility of organizing, joint production of films would begin not later than May 1958. Delegations of film technicians would be exchanged in order that they might study the other country's production methods.

(4) Provision was made for the exchange of a number of orchestras, ballet companies, and musicians ; e.g. the Philadelphia Symphony Orchestra would visit the U.S.S.R. in 1958, and the Bolshoi Theatre Ballet would visit the United States in 1959.

(5) The Academies of Science of the two countries would organize exchanges of scientific lecturers and research workers.

(6) Arrangements would be made for an exchange of students between Soviet and U.S. universities, amounting to 20 students on each side for the academic year 1958-59 and 30 for 1959-60. Delegations of university lecturers would be exchanged, who would study the other country's system of higher education.

(7) Contests between the two countries in various branches of sport and athletics would be organized.

(8) Both countries would promote the development of tourism.

(9) Both countries would promote the exchange of publications between scientific, medical, and educational institutions, and of films on medical and agricultural subjects. Examination of measures for promoting the distribution of the magazines *U.S.S.R.* in the United States and *Amerika* in the Soviet Union would continue at ambassadorial level.

(10) It was agreed in principle to establish direct air services between the two countries. Further discussions on this subject would be held at a later date.

The joint announcement described the agreement as "a significant first step in the improvement of mutual understanding between the U.S. and Soviet peoples," and expressed the "sincere hope" that it would be carried out "in such a way as to contribute substantially to the bettering of relations between the two countries, thereby also contributing to a lessening of international tensions."

It was reported in the U.S. Press that, in the negotiations for the agreement, the U.S. Government had failed to persuade the Soviet Government to stop jamming U.S. news broadcasts to the U.S.S.R., to permit uncensored explanations of U.S. policy on Soviet television and radio, or to abolish the ban on free travel within the Soviet Union. On the other hand, the Soviet Government had failed to persuade the U.S. Government to minimize the travel ban in the two countries, to send large numbers of industrial technicians to the Soviet Union, or to work out a definite agreement on direct air communications between the two countries.

Dr. Willard Libby, the scientific member of the U.S. Atomic Energy Commission, disclosed on Dec. 21 that samples of soil from various parts of the U.S.A. had been sent to the Soviet Academy of Sciences to be analysed for their radioactive fall-out content (particularly strontium-90) and that the Commission expected to receive similar samples from the Soviet Union. Dr. Libby stated that the original suggestion for such a joint study had been made to him by Soviet scientists attending a UNESCO conference held in Paris in September last.

B. SPAIN. — Carlist Recognition of Don Juan.

Don Juan, Count of Barcelona, was recognized as the rightful claimant to the Spanish throne by 44 delegates of the Carlist movement on Dec. 20, 1957, at a ceremony which took place at his residence at Estoril, near Lisbon.

The Carlist delegates, who came from all parts of Spain, asked Don Juan to recognize the basic principles of the Carlist branch of the Spanish Royal family, which the last member of this branch, Don Alfonso Carlos, had laid down in a decree of Jan. 23, 1936, shortly before his death. These principles included the Roman Catholic unity of Spain ; the natural and organic constitution of her regions ; a legitimate monarchy ; and a modern adaptation of the principles and spirit of the secular traditions of Spain. Don Juan formally recognized these principles, whereupon the Carlist delegates acknowledged him as the future King of Spain in the traditional manner by bowing before him and uttering the words *Viva el Rey !*

Don Juan declared in his speech : "Three essential factors make traditionalism useful to Spain at the present moment. They are popular roots, a distaste for party politics, and the certainty of support for a real policy of social justice which is vitally necessary in our century and must be carried out in Spain, not for reasons of political tactics, but because it is the duty of our Christian conscience . . . I want to be a very human King, in contact with my people, and not a symbolic mummy preserved in court protocol . . . I want to be the King of all Spaniards and do not reject anyone, even my enemies. I want to establish a solid basis for the State and the Government, and to give peace and true liberty to Spain."

The Carlist recognition of Don Juan ended a dynastic dispute which had embittered Spanish politics for more than a century and had led to two civil wars. General Franco was officially informed of the Carlists' meeting with Don Juan, and was reported to have approved of the latter's recognition by the Carlist movement.—(Times - Le Monde, Paris - A.B.C., Madrid)
(Prev. rep. 15666 A ; Don Juan, 14300 A.)

Note. The Carlist movement originated when King Ferdinand VII died in 1833 without male issue and was succeeded by his daughter, who ascended the throne as Queen Isabella II. An influential section of Spanish opinion refused to recognize Queen Isabella's accession and maintained that King Ferdinand should have been succeeded by his brother, Don Carlos (hence the name Carlists), and that the succession should thereafter pass to Don Carlos' descendants. The dispute led to two Civil Wars in 1834-39 and 1872-76—in which the Carlists drew their principal support from the Basque provinces. Queen Isabella was deposed in 1868 and, after an interregnum, was succeeded by her son, who ascended the throne in 1875 as Alfonso XII and reigned until 1885. Alfonso XIII (the son of Alfonso XII) came to the throne on his father's death and reigned until 1931, when he abdicated after the proclamation of the Spanish Republic. Don Juan is a son of the late King Alfonso XIII, and thus a direct descendant of King Ferdinand.
(Ed. K.C.A.)

C. LIBERIA. — Anti-Discrimination Law.

Legislation making racial discrimination a crime punishable by fines up to $30,000, and in some cases by imprisonment, was passed by the Liberian National Assembly on Feb. 12. Drafted by President Tubman, it laid down *inter alia* that convicted foreign companies would have their businesses closed after a third offence ; that individual foreigners practising racial discrimination would be deported ; and that Liberian nationals guilty of the same offence might be sentenced to a year's imprisonment. The preamble to the law said that certain foreign concessions in Liberia had been practising discrimination and segregation.

For some weeks beforehand Liberian newspapers had been accusing certain foreign companies of such practices, specific allegations being levelled against the Firestone Plantations Company—a U.S. concern which buys most of the rubber produced in Liberia.—(New York Times)

D. NETHERLANDS. — Repatriates from Indonesia.

A total of 16,641 Dutch nationals—many of them children and aged persons—were repatriated from Indonesia to Holland between Dec. 1, 1957, and Jan. 31, 1958, of whom 13,137 came by sea and 3,504 by air. A further 700 arrived at Amsterdam on Feb. 21 in the liner *Oranje*, while 12,400 more are expected to arrive by sea before the end of March, exclusive of others who will travel by air.—(Netherlands News Agency)
(Prev. rep. 15931 A.)

MARCH 1—8, 1958

A. BRITISH COMMONWEALTH. — Mr. Macmillan's Commonwealth Tour. - Visits to India, Pakistan, Ceylon, Australia, New Zealand, and Singapore.

Mr. Harold Macmillan, accompanied by Lady Dorothy Macmillan, left London on Jan. 7 for a six-weeks' goodwill tour of Australia, New Zealand, India, Pakistan, and Ceylon—the first occasion on which a British Prime Minister had visited any of these countries while in office. During his Commonwealth tour, which also included brief visits to Singapore, Mr. Macmillan flew over 32,000 miles in a chartered *Britannia* airliner and delivered some 20 major speeches and broadcasts. Mr. Butler, Home Secretary and Lord Privy Seal, presided over the Cabinet during Mr. Macmillan's absence from the United Kingdom.

Invitations to visit Australia, New Zealand, India, Pakistan, and Ceylon had been extended by the Prime Ministers of those countries during the autumn of 1957 and accepted by Mr. Macmillan. Similar invitations had been extended previously to Sir Anthony Eden, who was unable to accept them because of his illness and subsequent resignation.

Visit to India.

The Prime Minister arrived in Delhi on Jan. 8 for a four-day visit to India (Jan. 8-11) during which he had discussions with Mr. Nehru and other Indian leaders.

Mr. Macmillan was warmly welcomed by great crowds which had assembled at the airport to greet him, Union Jacks and Indian tricolours flying side by side and bands playing *God Save the Queen* and the Indian National Anthem, *Jana Gana Mana*. After inspecting a guard of honour he drove from the airport with Mr. Nehru in an open car to the latter's residence in New Delhi, the route being lined by crowds who gave Mr. Macmillan a similarly cordial welcome.

In the morning of Jan. 9 Mr. Macmillan and Lady Dorothy Macmillan drove to Rajghat, on the banks of the River Jumna, to lay a wreath on the memorial to Mahatma Gandhi, erected on the spot where the Mahatma was assassinated on Jan. 30, 1948. Later in the morning Mr. Macmillan had meetings with Mr. Morarji Desai, the Minister for Commerce and Industries, and Pandit Pandit, the Home Minister, after which he called on Dr. Radhakrishnan, the Vice-President of India. [Dr. Sarvepalli Radhakrishnan, a distinguished scholar, was formerly Spalding Professor of Eastern Religions and Ethics at Oxford, a post he held for 16 years.] At a lunch at Mr. Nehru's residence, Mr. Macmillan met President Sukarno of Indonesia, who was also visiting New Delhi at the time.

During the afternoon Mr. Macmillan visited a rural community project at the village of Shamaspur, near Gurgaon (20 miles from Delhi), where several thousand peasants from the surrounding countryside had gathered to greet him. He inspected model farms, houses, schools, and welfare centres, and mixed informally with throngs of peasants who gave him an enthusiastic welcome and festooned him with garlands.

In the evening Mr. Macmillan was the guest of honour at a banquet given by Mr. Nehru, at which speeches were made by both Prime Ministers.

Mr. Nehru said that the centuries-old relationship between Britain and India, which contained "a good deal of the dramatic element," had been reflected in British influences upon Indian institutions which were "basic and not superficial" and which had "survived even a radical change in that relationship." Speaking of the "unique and strangely dramatic manner" in which that change had been brought about, Mr. Nehru said: "Suddenly, as if by the wave of a magic wand, an end was brought to those long years of conflict, and in its place there came the desire and the wish to co-operate in spite of considerable differences in opinion and in our reaction to events. That was not only remarkable in itself, but in some measure has set a pattern from which others can perhaps profit . . . We have learned much from you. Perhaps you have learned something from us . . ."

In the course of his speech Mr. Nehru warmly welcomed Mr. Macmillan's proposal for a non-aggression pact between Russia and the West [see 15991 A], and expressed the "earnest hope" that it could be implemented "so that the shadow of war may at last disappear from the face of the earth."

Mr. Macmillan, in reply, expressed his pleasure at being "the first British Premier to visit independent India during his term of office," and his satisfaction at being able to see something of "the life of this great Indian democracy and the tremendous efforts towards progress which are being made by the Indian Government and people." He continued:

"The history of our two countries has been inextricably bound up for more than two centuries, and our relations have seen many vicissitudes. It was a momentous event in world history that, when the time came for an independent India to choose her own institutions, she chose not only to maintain many of the traditions in the administration of Government and justice that we share today, but also freely to associate with us, on terms of complete equality and unfettered liberty of action, in the Commonwealth of Nations. It was this historic decision which first gave the Commonwealth its present character of a family of nations of many races, and paved the way for the Commonwealth to become a great practical working example of inter-racial co-existence.

"This Commonwealth, founded on the noblest ideals of international fellowship, will, I believe, prove both enduring and flexible. . . . This year membership has been increased by a new African member, Ghana, as well as the new independent kingdom of Malaya. This growth and development could not have taken place but for the lead given by India.

"There must always be a difference of emphasis, as well as of approach, between us over day-to-day events. But I do not think that should obscure agreement on the fundamental aims and ideals which exist between you in India and ourselves in Britain. We both believe in parliamentary democracy and in allowing the people to decide how they will be governed by free and secret vote . . . We like to think that the first seeds of Parliamentary Government were sown in a small island, Britain, many centuries ago. If that is so, it is in India that parliamentary democracy has come to its full power on a scale that could hardly have been dreamed of by the first parliamentarians of Britain. Of every nine people in the world who enjoy the privilege and freedom of living under conditions which you and ourselves would describe as democratic, four are Indians.

"Our people, therefore, share the universal desire for peace and tolerance between nations, and respect for the independence of small States as well as large. We will use our energies to the best of our ability towards removing from the world the fear of international conflict, which in today's conditions could only result in destruction and devastation.

"It is in accordance with these principles, which you have made well known under the name of *Panch Sila*, that nations must learn to live. But I would remind you that we in the Commonwealth stand for and cherish something that is equally important—freedom of the individual and parliamentary democracy, of which I have spoken. With much in common, scope for co-operation between our two countries is wide, and opportunity great. I look forward to long and continuing friendship between India and Britain, which will, I hope, not only bring comfort and advantage to us both, but which will make the Commonwealth of Nations an ever stronger force for peace."

In the morning of Jan. 10 Mr. Macmillan had meetings with the Finance Minister (Mr. Krishnamachari) and the Defence Minister (Mr. Krishna Menon) and later lunched with President Rajendra Prasad. In the afternoon the Prime Minister laid the foundation stone of the new British High Commission offices in New Delhi, while Lady Dorothy Macmillan visited a home for incurables founded near Delhi by Group-Captain Cheshire, V.C. Later in the day Mr. Macmillan received an enthusiastic ovation from huge crowds assembled outside the historic Red Fort, where a civic reception was given in his honour by the municipality of Delhi; speaking with great emotion, Mr. Macmillan thanked the municipality for the "wonderful" reception which had been accorded him, and expressed the wish that the "whole British people" could have witnessed it.

In a nation-wide broadcast over All-India Radio the same evening, Mr. Macmillan spoke of the steady progress being made in helping dependent countries of the Commonwealth to attain independence and self-government, as had been the case with Ghana and Malaya. In the ten years since India had become independent, the Commonwealth had increasingly assumed the pattern of a free association of independent peoples of many races, religions, and cultures—"a practical working model of that international co-operation on which the peace of the world must ultimately depend." After deploring the disparity in living standards, which was still "one of the most disturbing features of the world today," Mr. Macmillan pointed out that Britain, despite the drain of two World Wars, was playing a major part in raising the standards of life in under-developed areas of the Commonwealth. Four-fifths of all foreign business capital in India was British, and in the first five years of Indian independence British investment had been ten times that of any other country. The Anglo-Indian link was also being strengthened by the Colombo Plan, as a result of which more Indian students were studying in Britain than ever before.

After discussions with Mr. Nehru on Jan. 11, Mr. Macmillan left Delhi in the morning of Jan. 12 for Karachi. He and Lady Macmillan were seen off at the airport by Mr. Nehru, Mrs. Indira Gandhi (daughter of the Indian Prime Minister) and Mr. Krishna Menon.

In a farewell message to Mr. Nehru, Mr. Macmillan said that he and his wife were leaving India "with full hearts" and had been "deeply touched by the warmth of welcome we received in Delhi and the friendliness with which we were greeted everywhere." After expressing Britain's sympathy with and admiration for "the progress of India's great adventure in democratic development," he said that his talks with Mr. Nehru had "confirmed our joint resolve to continue working together with our other Commonwealth friends to secure lasting peace and friendship between all nations."

Visit to Pakistan.

The British Prime Minister arrived in Karachi the same morning (Jan. 12) on a four-days' visit to Pakistan, being welcomed at the airport by Mr. Firoz Khan Noon (Prime Minister of Pakistan) and members of the Government.

During his first day in Karachi Mr. Macmillan had discussions with Mr. Firoz Khan Noon and Mr. Qizilbash (Minister for Industries and Commerce), attended a reception given by Sir Alexander Symon (the U.K. High Commissioner), and was the guest of President Mirza at a State banquet. In the morning of Jan. 13 he visited the Mausoleum of the *Quaid-i-Azam* (Mohammed Ali Jinnah, the founder of Pakistan), where he placed wreaths on the graves of Mr. Jinnah and of Liaquat Ali Khan, the first Prime Minister of Pakistan. After visiting an industrial estate on the outskirts of Karachi he spent the rest of the day as the guest of the Pakistani Navy, touring the Karachi dockyard and lunching with the C.-in-C. (Vice-Admiral Choudri) on board the cruiser *Babur*, flagship of the Pakistani Navy. In the evening Mr. Macmillan was the guest at a dinner given by Mr. Firoz Khan Noon, after which he held a press conference for Pakistani journalists.

On Jan. 14 Mr. Macmillan was the guest of the Pakistani Air Force, visiting the Mauripur air station (near Karachi) to see a display by *Sabre* jet fighters and lunching with the C.-in-C., Air Vice-Marshal Asghar Khan. Later in the day he had further conversations with Mr. Firoz Khan Noon, and in the evening gave a broadcast over Radio Pakistan in which he stressed the "spirit of partnership and equality" which united Britain and Pakistan within the Commonwealth framework. In the course of his broadcast Mr. Macmillan expressed his satisfaction that Pakistan had adhered to the Baghdad Pact, emphasizing that it was a purely defensive organization framed in conformity with the principles of the U.N. Charter and designed to promote the political and economic development of its member-countries, as well as to ensure their collective defence. As in India, he stressed the importance of raising living standards in under-developed parts of the Commonwealth, pointing out in this connexion that Britain had contributed more than 90 per cent of all foreign capital invested in Pakistan during the past four years.

Mr. Macmillan, accompanied by Mr. Firoz Khan Noon, flew from Karachi to Peshawar (a distance of 770 miles) in the morning of Jan. 15 to visit the North-West Frontier as the guest of the Pakistani Army. He was welcomed at Peshawar by the Chief Minister of West Pakistan (Sardar Abdur Rashid) and the Pakistani Chief of Staff (Major-General Musa Khan), and met a number of veterans of the old [pre-partition] Indian Army who fought with distinction in the two World Wars, they included Subadar Khudedad Khan (68), who won the first V.C. of World War I at Ypres in 1914, and Jamadar Ali Haidar, who won the last V.C. of World War II in Italy in 1945.

From Peshawar Mr. Macmillan drove to Fort Jamrud (formerly a historic frontier fortress of the British Army) to meet several hundred Afridi chieftains and tribesmen who had assembled to greet him—described by the Correspondent of *The Times* as "a formidable array of shaggy, hawk-eyed warriors, more than a few of whom must have given trouble to the British authorities in the not so distant past." He was given an extremely cordial welcome by the Afridis, who presented him with many gifts and—in the words of the *Daily Telegraph* Correspondent—put "so many garlands round his neck that he had to carry some on his arm." From Fort Jamrud Mr. Macmillan drove 30 miles along the Khyber Pass to the Afghan frontier, after which he returned to Landi Kotal to visit the headquarters of the Khyber Rifles.

After flying back to Karachi, where he had further talks with Mr. Firoz Khan Noon, Mr. Macmillan left Pakistan for Colombo on Jan. 15. In a farewell message to the Pakistani Prime Minister, he expressed his pleasure at the cordiality and friendliness extended to him, and his admiration at the progress being made in developing Pakistan.

Visit to Ceylon.

Mr. Macmillan was given a particularly enthusiastic welcome in Ceylon, where he arrived on Jan. 16. He was met at Katunayake airfield by the Ceylonese Prime Minister, Mr. Bandaranaike, and drove to the latter's official residence in Colombo (Temple Trees) along a gaily decorated 22-mile route lined with cheering crowds.

After calling on the Governor-General, Sir Oliver Goonetilleke, Mr. Macmillan had discussions with Mr. Bandaranaike at Temple Trees, and later gave a press conference for Ceylonese journalists. On Jan. 17 Mr. Macmillan and Lady Dorothy Macmillan visited the Temple of the Tooth at Kandy—one of the sacred places of Buddhism—and later visited the University of Ceylon at Peradeniya (on the outskirts of Kandy), where the British Prime Minister received the honorary degree of Doctor of Laws. After a visit to the Royal Botanical Gardens at Peradeniya, Mr. Macmillan returned the same evening to Colombo for a reception given by Mr. Bandaranaike.

On Jan. 17, at a dinner given in his honour by both Houses of the Ceylonese Parliament, Mr. Macmillan announced that the British Government had decided to double its original allocation of £10,000 for the relief of victims of the recent flood disaster in northern and eastern Ceylon (see 16046 A).

Visit to New Zealand.

After a two-day visit to Singapore on Jan. 18-19 (see below) Mr. Macmillan flew on to Auckland (New Zealand), where he arrived on January 20.

Mr. Macmillan was greeted by Mr. Walter Nash (the N.Z. Prime Minister) and Sir George Mallaby (the U.K. High Commissioner), and later had private talks with Mr. Nash, followed by a civic reception at Auckland Town Hall. On Jan. 21 the British Prime Minister and Lady Dorothy Macmillan left by car for a 60-mile drive to the thermal area of the North Island, breaking their journey at Ngaruawahia to visit King Koroki and other Maori chieftains (Koroki is the fifth king of the Maoris and chieftain of the Waikato and allied tribes). After lunching at Hamilton—New Zealand's biggest inland city, and centre of a rich dairy-farming region—they visited the geothermal power project at Wairakei, 60 miles south of Rotorua.

After 24 hours in the Rotorua district, Mr. Macmillan and Lady Dorothy Macmillan travelled on Jan. 23 to Wellington, where Mr. Macmillan called on the Governor-General (Lord Cobham), had discussions with Mr. Nash and other Ministers, attended a full session of the New Zealand Cabinet, and was guest of honour at a State lunch and civic reception. It was understood that Mr. Macmillan and Mr. Nash had discussed New Zealand's balance-of-payments difficulties, the marketing of N.Z. agricultural produce in Britain, and defence problems.

On Jan. 24 Mr. Macmillan and his wife flew to Dunedin, in the South Island, where they spent two days; the Prime Minister formally opened the city's Festival Week, and attended a civic reception and other functions. After a short visit to Timaru they went on Jan. 27 to Christchurch, where they also remained two days, and where Mr. Macmillan addressed the Canterbury Chamber of Commerce. Mr. Nash flew to Christchurch on Jan. 28 for a final talk with Mr. Macmillan, after which both Prime Ministers held a joint press conference. Mr. Nash disclosed, and Mr. Macmillan confirmed, that agreement had been reached on the need to review the 1932 Ottawa Agreement on preferential tariffs in view of the great changes in Anglo-New Zealand trading relations since the agreement was signed, British and N.Z. officials would accordingly begin talks on this matter in April, followed by ministerial discussions in September or October.

In a farewell broadcast from Christchurch, Mr. Macmillan said that his discussions with Mr. Nash had been "as intimate and informal as those between Cabinet colleagues at home," and that he had "learned much from those talks which will be of real value to me and my colleagues when I return to London." Mr. Macmillan expressed his admiration for the "abounding energy and enterprise" of the people of New Zealand, who had succeeded in the past century in establishing "a society of equal opportunity and a democratic way of life which is an inspiration to the rest of the world."

Visit to Australia.

After his eight-days' visit to New Zealand the Prime Minister paid a fortnight's visit to Australia, flying to Canberra on Jan. 28 from Christchurch.

Mr. Macmillan and Lady Dorothy Macmillan were welcomed at Canberra airport by Mr. Menzies (the Federal Prime Minister), and later dined at Government House with Field-Marshal Sir William Slim, the Governor-General. On Jan. 29 Mr. Macmillan laid a wreath on the Australian National War Memorial, attended a meeting of the Australian Cabinet, had private talks with Mr. Menzies, and was guest of honour at a parliamentary dinner attended by Mr. Menzies and Dr. Evatt, the Leader of the Opposition. Speeches were made by both Prime Ministers and also by Dr. Evatt, who warmly welcomed Mr. Macmillan's suggestion for a non-aggression pact between the Soviet Union and the Western Powers.

On Jan. 30 Mr. Macmillan had a long private discussion with Dr. Evatt, after which he had further talks with Mr. Menzies and also with Sir Arthur Fadden (the Federal Treasurer), Mr. Casey (Minister for External Affairs), Sir Philip McBride (Defence Minister) and other Ministers. Mr. Macmillan visited the Australian National University during the day to receive the honorary degree of Doctor of Laws for "distinguished eminence in public service."

Mr. Macmillan and Lady Dorothy Macmillan visited Brisbane and the Queensland bush country (Jan. 31-Feb. 3), Sydney (Feb. 3-5), Melbourne (Feb. 5-7) and Hobart (Feb. 8-9) before returning to Canberra on Feb. 10 to end their Australian tour. They attended receptions given in their honour by the Premiers of Queensland, New South Wales, Victoria, and Tasmania, in addition to civic receptions in the State capitals visited. While in Sydney Mr. Macmillan paid a visit to the British Motor Corporation's new factory at Zetland (a suburb of Sydney), which covers 55 acres and represents a £13,000,000 investment of British capital; he also visited Sydney Harbour and saw the site of the proposed Sydney Opera House.

During his visit to Victoria the Prime Minister drove 40 miles from Melbourne to the rapidly-growing port of Geelong, whose population has more than doubled since the war and now stands at 90,000. He also drove 70 miles through the new Dandenong industrial area, visiting a number of factories and receiving a warm welcome from many British immigrants who have settled in the district. Among the places inspected was the new Shell Oil refinery (one of several built in Australia since the war at a cost of £125,000,000), the factory of British Nylon Spinners Ltd., and a hostel where some 550 recent immigrants—mostly from Britain—are temporarily accommodated.

Before leaving Canberra for Singapore on Feb. 11, Mr. Macmillan gave a press conference, jointly with Mr. Menzies, in which he described his Australian visit as "one of the most exciting and stimulating experiences of my life," and in which

he warmly thanked the Australian people and political leaders for the "extraordinary degree of warmth and friendship" extended to him. Both Prime Ministers announced complete agreement on economic and defence questions between their two Governments.

Mr. Macmillan said that he had two main impressions of his Australian visit—firstly, the "extraordinary kindness" of the Australian people and their affection for the "Old Country"; and secondly, the rapid rate of Australian industrial development. He recalled that British Governments had spent over £3,000,000 since the war in assisting some 250,000 British immigrants to settle in Australia, whilst about the same number had migrated "under their own steam." From the immigration point of view, Britain would do everything possible to "preserve Australia as a British country—a country of British blood." In the field of industrial development, Britain had been able to supply two-thirds of all overseas capital invested in Australia since the war

In reply to questions, Mr. Macmillan said that he had made no demands for further Australian contributions for the defence of South-East Asia. He added in this connexion: "We recognize the contributions Australia is already making, and are very happy that Australian and New Zealand troops are alongside our own in Malaya. Britain recognizes Australia's contribution in ships, planes, troops, and other ways. We can thus both be content. Discussions on the defence of South-East Asia have been full, and we are as one on the broad approach."

Mr. Macmillan said that both the British and Australian Governments were worried about the situation in Indonesia, which he had discussed at great length with the Australian Cabinet; he was not unhopeful that developments might take place which would reduce the very real danger of Indonesia falling under Communist control. On the New Guinea question Britain fully supported the attitude taken by the Australian Government [i.e. in opposing Indonesian territorial claims to Dutch New Guinea.]

Visit to Singapore.

As stated above, Mr. Macmillan broke his journey from Ceylon to New Zealand for a two-day visit to Singapore on Jan. 18-19, during which he had discussions with the Governor (Sir William Goode), the U.K. Commissioner-General in South-East Asia (Sir Robert Scott), and the Chief Minister of Singapore (Mr. Lim Yew Hock). He also attended a conference of British diplomatic representatives in South-East Asian countries, and met Service chiefs. In addition, Mr. Macmillan had a brief meeting with the Japanese Foreign Minister, Mr. Fujiyama, who was passing through Singapore on his way to Jakarta. Mr. Macmillan again visited Singapore on Feb. 12, while flying back to London from Canberra, for a further meeting with Mr. Lim Yew Hock.

At a press conference on the latter date, Mr. Macmillan was asked if there was a possibility that Britain might suspend the Colony's new constitution if an extreme left-wing Government came to power in Singapore. He replied that the British Government had no such intention and would carry out its pledge of self government for Singapore, in the confident expectation that the people of Singapore would "live up to their great responsibility."

Return to London.

The Prime Minister and Lady Dorothy Macmillan arrived back in London from their six-weeks' Commonwealth tour on Feb. 14. In a statement at London Airport Mr. Macmillan expressed his sense of "exhilaration and renewed faith" as a result of his tour, which, he pointed out, was the first of its kind ever made by a British Prime Minister. He summarized his impressions as follows:

"Many people have thought that the change from the old Empire to the new Commonwealth would mean the end of British influence. Just the opposite—it is the beginning of a new act in a great drama. The countries of British tradition and descent, like Australia and New Zealand, have a loyalty to the Crown and an affection for the Old Country which has to be seen to be believed. These countries are forging ahead with great rapidity . . . They look more and more to British people to join them, and they look to British capital and experience to share in this work.

"In the new Commonwealth countries—India, Pakistan, and Ceylon—we had an equally friendly reception. Everywhere you go you see the signs of how these vast populations of different races, creeds, and histories are determined to maintain the links which make the Commonwealth a reality. Those countries, too, want and welcome our help and partnership . . . The Commonwealth today, old countries and new, is lively, vigorous, and something absolutely unique in history . . ."

Mr. Macmillan spoke in similar terms at a televised press conference given the same evening at 10, Downing Street.

A. INDONESIA. — Extension of Territorial Waters.

The Indonesian Government issued a proclamation on Dec. 14, 1957, declaring that all waters "around, between, and connecting the islands or part of the islands of the Indonesian archipelago, irrespective of their width or dimension," were "natural appurtenances of its land territory and therefore an integral part of the inland waters subject to the absolute sovereignty of Indonesia." Outside the perimeter of the archipelago, the limit of Indonesian territorial waters was fixed at 12 nautical miles "measured from straight base lines connecting the outermost points of the Republic of Indonesia." After claiming that the Indonesian archipelago had been "an entity since time immemorial," the declaration said that "peaceful passage of foreign vessels through these waters is guaranteed . . . insofar as it is not contrary to the sovereignty of the Indonesian State or harmful to its security."

The Indonesian declaration—which coincided with the measures taken against Dutch nationals and property in Indonesia [see 15931 A]—abolished the existing delimitation of territorial waters, which had been based on the concept of the islands of Indonesia as separate land areas each having its own territorial waters. Instead, it claimed control of an area of over 2,000 miles of sea extending from Sumatra in the west to the Indonesian islands adjacent to New Guinea in the east, as well as of the wide stretches of sea between some of the major islands—e.g. the Java Sea, the 100-mile channel between Java and Borneo which is used by all shipping plying between Australia and Singapore.

The Indonesian claim was rejected by the Governments of the principal seafaring countries, as summarized below:

Australia. A Note was presented to Indonesia on Jan. 15 declaring that Australia could not recognize the validity of what would be sovereignty not only over a vast expanse of the high seas, including the Java Sea, but over the corresponding airspace as well. The Note emphasized that Indonesia's claim was not in accordance with the recognized principles of international law.

Great Britain. A British protest was handed to the Indonesian Ambassador in London (Dr. Sunario) on Jan. 3. A Foreign Office spokesman said that the Indonesian Government had been officially informed that H.M. Government were unable to recognize the validity of the Indonesian claim. The Foreign Office had previously issued the following statement on Dec. 16, 1957:

"H.M. Government see no reason to abandon their long-standing policy of upholding the freedom of the seas. In our view the waters between many of the Indonesian islands have always constituted, and do constitute, part of the high seas."

France. A French Note to Indonesia (Jan. 9) similarly refused to recognize the legitimacy of the Indonesian decision.

Japan. The Japanese Government informed the Indonesian Consul-General in Tokio on Jan. 14 that it could not admit the Indonesian claim under established international law. It was emphasized that the Japanese attitude in this question had nothing whatever to do with the Dutch-Indonesian dispute over New Guinea.

Netherlands. The Netherlands Government similarly rejected the Indonesian claim at the beginning of January.

New Zealand. The N.Z. Prime Minister (Mr. Nash) announced on Jan. 20 that a Note had been delivered to the Indonesian Government stating that New Zealand would not accept the Indonesian claim, which was contrary to the established principles of international law.

United States. The U.S. State Department announced on Jan. 17 that it had informed the Indonesian authorities that any action to put the Indonesian declaration into effect would be viewed by the U.S.A. "with grave concern," since it would be in serious conflict with the principle of freedom of the seas.

In making its announcement, the Indonesian Government said that it would justify its attitude at the International Conference on the Law of the Sea which was to open in Geneva in February 1958.—(Indonesian Embassy Press Office, London - Times - Daily Telegraph - Australian News and Information Bureau - Netherlands News Agency - Le Monde, Paris - Japanese Embassy Press Office, London - N.Z. Directorate of Information - New York Times) **(Prev. rep. 15931 A.)**

B. MIDDLE EAST. — General von Horn becomes Chief of Staff of U.N. Truce Supervision Organization.

Dr. Hammarskjold announced on March 3 that Major-General Carl Carlsson von Horn, of Sweden, had been appointed Chief of Staff of the U.N. Truce Supervision Organization in Palestine in succession to Lieut.-General E. L. M. Burns, of Canada, who had resigned from the post in November 1956 to become Commander of the U.N. Emergency Force.

General von Horn (57) has served in the Swedish Army for 37 years. He was executive assistant to the late Count Folke Bernadotte from 1943-45, when Count Bernadotte was in charge of repatriation of prisoners of war. (New York Times) **(Prev. rep. 14079 A).**

A. BELGIUM - NETHERLANDS - LUXEMBURG. — The Benelux Economic Union Treaty.

A treaty establishing an Economic Union between Belgium, the Netherlands, and Luxemburg was signed on Feb. 3 at The Hague by the Prime Ministers of the three countries—respectively M. Van Acker, Dr. Drees, and M. Bech.

Historical Background to Benelux Treaty.

The formal signing of the treaty represented the successful culmination of fourteen years' work aimed at the economic union of the three countries. The preparatory stages are summarized below.

The first step towards achieving close economic co-operation between the three countries had been taken as long ago as Sept. 5, 1944, when the three Governments—then all in exile in London—signed a treaty establishing Benelux, with the intention, after the liberation of their countries, of introducing a common Customs tariff *vis-à-vis* third countries and of abolishing all import duties in their mutual trade relations [see 6679 A]. Owing to the great differences in the economic situation of the three countries resulting from the effects of the war, the implementation of these measures took longer than anticipated, but on Jan. 1, 1948, the London agreement, adjusted to the changed conditions, was put into operation [see 8674 B ; 8924 B ; 9045 E]. Since that date no duties have been levied in intra-Benelux trade, and a common external tariff has applied to imports from third countries. At the same time the institutions provided for under the London agreement were set up—a Customs Regulation Council, a Trade Treaties Council, and an Economic Union Council, all of them served by a Secretariat-General with headquarters in Brussels.

At a ministerial conference in Luxemburg in October 1949 the three countries concluded the so-called Pre-Union Treaty, as an introductory stage to a full-fledged Economic Union [see 10723 A]. Under this treaty, the exchange of goods between the three countries was made progressively free from quantitative restrictions, except for a special arrangement for agricultural products, and the three countries undertook not to change this liberalization of their mutual trade except by common agreement.

Following an agreement of Feb. 18, 1950, which provided for the unification of the Excise duties and hall-marking fees in the three member-countries, a protocol of July 24, 1953, laid down that they would also in future co-ordinate their economic and social policies. A further protocol concerning common trade policy was signed on Dec. 9, 1953, under which the three countries started concluding joint trade agreements with third countries, whilst in 1957 they strengthened their co-operation by entering as a single collective unit into trade negotations with third countries. The O.E.E.C. had previously decided [in January 1956] to regard the three Benelux countries as an economic unit for the purpose of applying the trade liberalization rules with other O.E.E.C. member-countries.

Further steps in the extension of economic co-operation between the Benelux countries included (*a*) the treaty of July 8, 1954, which largely liberalized the mutual exchange of capital ; (*b*) a protocol signed on May 3, 1955, on the progressive harmonization of their agricultural policies within a seven-year period ; and (*c*) the setting-up of a common labour market under interim regulations in April 1957, as a transitional stage in the implementation of a Labour Treaty which had been signed on June 7, 1955. This treaty (which came into effect simultaneously with the Economic Union Treaty) provides that workers of any member-country will have the same rights as those in the other two countries ; that labour permits will no longer be required in any of the countries for employing nationals of the other two countries ; and that a common policy on employment would be established within the Benelux community.

Other Benelux steps towards economic integration included an agreement for co-operation in the monetary sphere providing for the establishment of exchange rates by mutual consultation ; and special arrangements allowing nationals of any member-country to submit tenders for public works in the other member-countries.

An important step was the agreement of Nov. 5, 1955, providing for the establishment of an Interparliamentary Benelux Advisory Council which would consider (1) problems concerning the working of all the agreements made in preparation for full economic union of the Benelux countries ; (2) cultural matters leading to closer relations between them ; (3) the growth of Benelux co-operation in foreign affairs ; and (4) the unification of legislation in the three countries. This Council, comprising 21 members from Belgium, 21 from the Netherlands, and seven from Luxemburg—chosen by the respective Parliaments from among their own members—held its first meeting in Brussels on Feb. 22-23, 1957. [*Note.*—These membership figures supersede those given in 15437 C.]

After two further ministerial meetings on May 30 and June 15, 1957, practically complete agreement was reached on the provisions of the Union Treaty, and after the settlement of some minor points the Treaty was formally initialled in New York on Sept. 17, 1957, by the Belgian, Netherlands, and Luxemburg Foreign Ministers (M. Larock, Dr. Luns, and M. Bech), all of whom were attending the 12th session of the U.N. General Assembly. The Treaty was subsequently submitted to the Benelux Interparliamentary Advisory Council, which approved it with some minor modifications by 41 votes to two on Nov. 22-23, 1957, thereby clearing the way for the final signature on Feb. 3, 1958.

Provisions of Benelux Treaty.

The provisions of the Benelux Union Treaty, which consists of 100 Articles and will be valid for 50 years in the first instance, are summarized below under cross-headings.

Part I.—Definition of Principles.

The purposes of the Economic Union were defined as the free mutual movement of persons, goods, services, and capital ; the co-ordination of national economic policies ; and the pursuance of a common trade policy towards third countries (Article 1).

Free Movement of Persons. The nationals of the three member-countries will be free to move within the whole territory of the Economic Union, and the nationals of each member-country will enjoy in the other two countries the same treatment as is accorded to the nationals of those countries. This equal treatment will apply to freedom of movement, residence and establishment, the exercise of economic or professional activities (including the rendering of services), capital transactions, labour conditions, social provisions, dues and taxes, and legal protection of the rights and interests of the persons concerned (Article 2).

Free Exchange of Goods, Capital, and Services. Trade between the three countries will be free from all import duties, taxes, or levies, as well as from any import or export restrictions of a quantitative, qualitative, or currency nature (Art. 3) ; capital movements from one country to the other will also be free (Art. 4) ; the exchange of services will be subject to the same principles as merchandise trade (Art. 5) ; and free intercourse between the member-countries may not be unduly hampered by national measures of a non-economic or non-financial nature (Art. 6). The last-named measures would include such restrictions as import prohibitions imposed with the object of protecting public health and morals, and certain legal restrictions (e.g. quality restrictions) which, although they operate only nationally and do not in themselves prevent goods from entering the country concerned, nevertheless hinder free trade. Controls or statistical inspections exercised at common frontiers, however, will not constitute restrictions within the meaning of the Treaty. As the competitive relations between the three member-countries might be an obstacle to free mutual trade, the Treaty provides that any distortion of competitive conditions will not be permitted (Article 7).

Co-ordination of Economic, Financial, and Social Policies. The three Governments will jointly consult on their national economic policies with a view to creating the necessary conditions for the economic integration of their countries (Article 8).

Co-ordinated and Joint Action towards Third Countries. In addition to co-ordinating their internal economic policies, member-countries will also consult each other to determine the Union's attitude at meetings of international bodies and in matters relating to regional economic integration, or in relation to matters with third countries, insofar as these matters affect the aims of the Union (Art. 9). There will also be a common policy to cover trade and payments with third countries (Art. 10). Goods originating from or destined for third countries will be subject to a common tariff in respect of import and other duties. There will also be a common regime in the issue of licences and fixing of quotas, and a common policy in regard to all other arrangments affecting imports, exports, and transit trade (Article 11).

Monetary Rules. As the Economic Union does not include a monetary union, Articles 12 and 13 laid down certain monetary rules essential to the proper functioning of the Union, including the requirement that the policy to be pursued with regard to rates of exchange would be framed in joint consultation between the member-countries.

Escape Clause. Should the vital interests of a member-country be placed in jeopardy, the Committee of Ministers may take measures in deviation from the Treaty provisions (Article 14).

Part II.—Institutions of the Union.

Part II of the Treaty enumerates the eight institutions of the Union, as follows :

The Committee of Ministers. This Committee, consisting of nine members (three from each member-country), is the directing body of the Union, being charged with the implementation of the Treaty and the taking of the necessary measures to that end. Decisions must be taken by unanimous vote and be binding on the three Governments. The Committee will also give directives to the bodies operating under it, and will maintain contact with the Advisory Interparliamentary Council (Articles 16-24).

Interparliamentary Council. The constitution, powers, and procedure of this Advisory Council are based on the agreement of November 5, 1955 [see above].

Council of the Economic Union. This body, which will function under the Committee of Ministers as a co-ordinator of the other institutions, consists of three chairmen appointed by each of the member-Governments, and of representatives of the committees similarly designated by member-Governments.

Committees and Special Committees. There will be seven committees : (1) on foreign economic relations ; (2) on monetary and financial questions ; (3) on industry and commerce ; (4) on agriculture, foodstuffs, and fisheries ; (5) on Customs duties and taxes ; (6) on transport ; and (7) on social questions.

There will also be five Special Committees for (1) co-ordination and statistics ; (2) comparing the budgets of public and semi-public institutions ; (3) public tenders ; (4) public health ; and (5) for the " trading middle class " [i.e. small and medium businesses].

All these committees will be empowered to make proposals to the directing organs of the Union; they will also possess executive and supervisory powers regarding the administration of decrees by the member-Governments.

Secretariat-General. This will be established at Brussels and will be directed by a Netherlander, its organization and powers agreeing broadly with those of the Secretariat-General already existing under the Customs Agreement of 1944 (Articles 33-39).

Joint Services. The Committee of Ministers was empowered to institute joint services if a need for these should arise (Article 40)

Board of Arbitrators. Any dispute between the member-countries over the application of the Treaty will be referred to a Board of Arbitrators, each country appointing one national arbitrator and one deputy national arbitrator (Articles 41-53).

Economic and Social Consultative Council. This body (whose members will be appointed by the three Governments) will give advice—at the request of the Committee of Ministers or on its own initiative—on matters directly related to the operation of the Union (Article 54).

Part III.—Special Provisions.

Part III of the Treaty (Articles 55-92) contains a number of special provisions elaborating some of the principles laid down in Part I.

These concern mutual treatment of nationals, freedom of movement, and the exercise of economic and professional activities (Arts. 55-63); co-ordination of policies in investment, agriculture, transport, social questions, and monetary problems (Arts. 64-71); financial relations with third countries (Arts. 64-71); Customs duties and taxes, notably turnover tax, Excise duties, and hall-marking fees (Arts. 78-84); free exchange of transport services (Arts. 85-89); and statistics (Arts. 90-92).

Part II also specifies certain spheres in which the Committee of Ministers will be authorized to take decisions binding on the three member-countries; in addition, it provides that the principles of the Treaty shall be carried into effect by special agreement in a number of other cases.

Part IV.—General Provisions.

The two principal provisions of Part IV (Articles 93-100) laid down (1) that the scope of the Treaty would be limited to the territories of the member-countries in Europe, although the interests of Belgian and Dutch overseas territories could be safeguarded in trade agreements concluded with third countries; (2) that the Treaty would be concluded for a period of 50 years, but could be tacitly extended by further 10-year terms unless any of the parties wished to terminate it by giving advance notice of one year.

Supplementary Agreements.

In addition to the Union Treaty, the Ministers signed a Transitional Agreement, a Protocol of Implementation, a Protocol of Signature, and an exchange of correspondence between the three Foreign Ministers.

Transitional Agreement. This specified the exceptions from the principle of a common market during a transitional period in the following spheres: (*a*) *Agriculture.* In view of the wide difference in the economic structure of agriculture in the three member-countries, free mutual trade in agricultural products was made subject to certain conditions, with the proviso, however, that agricultural policy in the three countries should be completely harmonized within five years (i.e. by 1962). (*b*) *Transport.* Quantitative restrictions on road haulage and unscheduled road passenger transport between the three countries would remain in force for another three years. These transitional provisions would, however, be reviewed annually by the Committee of Ministers, which would consider the possibility of abolishing them at an earlier date; on the other hand, the Committee of Ministers could extend the transitional provisions by another two years should this prove necessary.

Protocols of Implementation and Signature. The former protocol laid down the manner of execution of some of the provisions of the Treaty and the Transitional Agreement, indicating which previous agreements and protocols (or part of them) would be superseded or suspended when the Union Treaty took effect. The latter protocol provided for the setting-up of a group of experts for road haulage and unscheduled road passenger transport within two years of the operative date of the Treaty; these experts would also work out road haulage rates for traffic between the three member-countries.

Foreign Ministers' Correspondence. This laid down that the agreements would not concern those measures taken with regard to the premiums payable to Rhine shipping for traffic with Belgian seaports.

The population of the Netherlands on Dec. 31, 1957, was given by the Dutch Central Statistical Bureau as 11,094,736. The populations of Belgium and Luxemburg as at Dec. 31, 1956, were 8,951,000 and 310,000 respectively. The economic union of the three countries will therefore cover a total population of over 20,000,000.

The share of the three Benelux countries in world trade (excluding internal trade between them) amounted to 5.8 per cent in 1956, compared with 17.5 per cent for the U.S.A., 10.4 per cent for Britain, 7.5 per cent for Western Germany, and 5.4 per cent for France.

Belgium and Luxemburg have been linked by an economic union since 1921. The new union of the three Benelux countries will function within the framework of the European Economic Community, of which they are all members and which, in addition, comprises France, the German Federal Republic, and Italy.—(Netherlands Ministry of Economic Affairs - Netherlands News Agency - Algemeen Handelsblad, Amsterdam - La Nation Belge, Brussels)

A. UNITED KINGDOM. — Gold and Dollar Reserves. - Extension of Export-Import Bank Credit.

The Treasury announced on March 4 that the sterling area's gold and dollar reserves had risen during February by $135,000,000, after taking into account (*a*) the receipt of $22,000,000 from the E.P.U. in respect of the U.K.'s surplus in January, and (*b*) the payment of $3,000,000 to creditor countries in the Union under bilateral settlements. As a result, the gold and dollar reserves stood at $2,539,000,000 on February 28.

The provisional figures for the E.P.U. February settlement showed that Britain had a surplus of £45,000,000, three-quarters of which would be settled by the E.P.U. in March in gold or dollars, and one-quarter by a reduction in the U.K.'s debt to the Union.

It was pointed out in the British Press that the February surplus in the E.P.U. represented the highest for eight years. It was believed that an important contributing factor had been the buying of sterling by Royal Dutch with the proceeds of its recent share issue; another favourable influence was the relaxation of the French *ratissage* measures whereby the French authorities had compelled French banks to repatriate their overseas working balances in order to ease French balance-of-payments difficulties.

It was announced in London and Washington on March 4 that the U.S. Export-Import Bank had renewed for a further year the $250,000,000 line of credit granted to the U.K., which had expired on Feb. 28. This amount represents the undrawn portion of the $500,000,000 stand-by credit opened by the Bank for the U.K. in February 1957. A Treasury spokesman in London stated that the extension had been agreed on payment by the U.K. of a commitment fee of one-quarter per cent ($625,000), which would be deductible from the interest payable on any future drawing.

Sterling maintained a strong position *vis-à-vis* the dollar and other currencies throughout February, the official dollar spot rate varying between $2.81½ and 2.81\frac{13}{16}$, except on Feb. 25-27, when it fell to $2.81¼, 2.80\frac{11}{16}$, and $2.81⅛ respectively; by Feb. 28 it had recovered to $2.81¼. The rates for transferable sterling and security sterling also remained firm, the former rising from $2.7890 on Feb. 2 to $2.7955 on Feb. 28 (its highest level since April 1954); security sterling rose from $2.74 on Feb. 1 to $2.79 on Feb. 19 (its highest level since April 1956), closing at $2.78¾ on Feb. 28.—(Treasury Press Office, London - Financial Times) **(Prev. rep. 15994 A; Export-Import Bank Loan, 15840 A; 15416 D.)**

B. IRAQ. — General Nuri forms New Government.

General Nuri es-Said (70) formed a new Iraqi Cabinet on March 3 following the resignation of Mr. Abdul Wahab Mirjan, who had been Prime Minister since mid-December. Every member of the new Government had previously held ministerial office, three of them being former Prime Ministers. Portfolios were allotted as follows:

General Nuri es-Said—Prime Minister and Minister of Defence; Dr. Tewfiq Suweidi—Deputy Prime Minister; Dr. Fadhil Jamali—Foreign Minister; Said Qazzaz—Interior; Abdul Karim Uzri—Finance; Jamil Abdul Wahab—Justice; Dr. Abdul Hamid Khadim—Education; Dr. Abdul Amir Allawi—Health; General Sami Fattah—Social Affairs; Dr. Dhia Jaffar—Economics; Rushdi Chalabi—Communications and Works; General Salah Jaburi—Development; Mohammed Mushin Hardan—Agriculture; Burhaneddin Bashayan—Minister for Arab Federation Affairs.

In addition to General Nuri, both Dr. Tewfiq Suweidi and Dr. Jamali had held the Premiership in earlier Cabinets. Dr. Jamali took over the Foreign Affairs portfolio from Mr. Bashayan, who became Minister in charge of Arab Federation Affairs. The new Minister of Justice, Jamil Abdul Wahab, was Minister in Beirut prior to joining the Cabinet. General Nuri and other members of the new Cabinet have given strong and consistent support to the Baghdad Pact, and several of them—e.g. Dr. Jamali—have been strongly critical of the policies of President Nasser and of the union of Egypt and Syria as the United Arab Republic.

No official explanation was given of the reasons for Mr. Mirjan's resignation. General Nuri became Prime Minister for the seventh time, his last tenure of the Premiership being from 1954-56.—(Times - Manchester Guardian)

(Prev. rep. 15916 B; 15644 A.)

A. NATURAL DISASTERS. — The Persian, Turkish, Mexican, and Mongolian Earthquakes. - Ceylon Flood Disaster.

Details are given below of a number of major earthquakes which occurred during 1957 in Persia, Turkey, Mexico, and Mongolia, and of a severe flood disaster which caused nearly 300 deaths in Ceylon during December.

The Persian Earthquakes.

About 2,500 people were killed in a series of severe earthquake shocks during July 2-11 in the area south of the Caspian Sea. Every house collapsed in the small town of Sangchal, where at least 180 people were killed, and several villages were completely wrecked or buried under landslides. Rescue and relief work was seriously hampered by falls of boulders which blocked the roads, and also by continuous heavy rain, and in some districts Army mules were the only means of transport which could be used.

In response to an appeal by the Persian Government, gifts of tents for the homeless were sent by the British and U.S Governments and by the International Red Cross; the British Government also sent £10,000 as a contribution to relief funds, other gifts of money or supplies being received from the Soviet Union, India, Pakistan, Iraq, and Turkey.

Another serious earthquake occurred on Dec. 13 over an area of 2,600 square miles in north-western Persia between the towns of Kermanshah, Hamadan, and Sanandaj, 1,306 people being killed and 29 villages destroyed. The great majority of the casualties, however, occurred in one village—Farsinaj, near the epicentre of the earthquake, where some 950 bodies were subsequently recovered.

The Turkish Earthquakes.

An earth tremor lasting 45 seconds wrecked 80 per cent of the buildings in the Turkish port of Fethiye on April 24, ten people being killed and 80 injured. Serious damage to property also occurred at Marmaris, Mugla, Milas, and other towns in south-western Anatolia, although no fatal casualties were reported from these centres.

A further earthquake on May 26 caused heavy damage in an area of north-western Anatolia between Bolu and Mudurnu, 66 people being killed and several hundred seriously injured.

The Mexican Earthquake.

A series of severe earthquake shocks in southern Mexico on July 28 caused 56 deaths and seriously injured 50 people. Thirty-six of the fatal casualties occurred in Mexico City, where heavy damage was done to property. Many buildings were also damaged in Chilpancingo (135 miles south of Mexico City), the capital of Guerrero State.

The Mongolian Earthquake.

One of the greatest earthquakes ever recorded occurred on Dec. 4 in Outer Mongolia, in the Altai Mountains and the Gobi Desert. The Mongolian radio, however, reported only 20 dead and 13 missing in the area, which is sparsely populated. The report of a joint Soviet-Mongolian expedition to the area, published in *Izvestia* on Jan. 23, 1958, stated that the earthquake's intensity reached 11 on the international scale [which goes up to a maximum of 12], whilst British and U.S. seismologists compared it to the San Francisco earthquake of 1906 and the Assam earthquake of 1950 (see 10978 A).

According to *Izvestia*, the shock moved mountains and rivers and created new ones, completely changing the geography of the region. Professor Florentsov, a member of the expedition, described it as being "like primitive chaos or Dante's Inferno"; dense yellow clouds of dust 3,000 to 4,500 feet high could be seen 40 miles away, and a continuous roar could be heard, caused by avalanches of rock which were still moving. Mountains had split in half, forming sheer drops of thousands of feet, and sections of the Altai range were 18 feet higher than before. The epicentre of the earthquake was marked by a fissure 170 miles long and up to 60 feet wide. Rivers had disappeared in some places, and new ones six to eight miles long had appeared elsewhere.

The Ceylon Flood Disaster.

Ceylon's worst floods for many years caused 288 deaths during Dec. 21-31 and rendered over 300,000 people homeless in the Northern, North-Central, North-Western, and Eastern Provinces. Following six weeks' continuous rain, five large irrigation reservoirs (one of which covers 90 square miles) overflowed the neighbouring areas, and at the height of the floods nearly half the island was submerged. Road, rail, and telegraph communications were disrupted over large areas, and numerous villages were completely cut off for several days. Many of the casualties were caused by landslides in highland areas, in which houses and their inhabitants were buried. The floods were estimated to have inundated over 650,000 acres of paddy land, destroying 400,000 tons of rice (three-quarters of Ceylon's total rice crop) and causing damage amounting to £25,000,000.

The Prime Minister (Mr. Bandaranaike) asked the Indian Government to send helicopters and other aircraft to assist in relief and rescue work, and also appealed to other countries to give all the help they could. R.A.F. aircraft co-operated with the Ceylon and Indian Air Forces in dropping supplies to the flooded areas and rescuing marooned people, and were subsequently joined by U.S. naval and Canadian Air Force planes. The U.S. aircraft carrier *Princeton* arrived from Singapore with 20 helicopters on board, and four ships of the British and two of the U.S. Navy, which had sailed from Singapore or the Persian Gulf, assisted in transporting food and medical supplies to coastal towns in the flooded areas. Gifts of cash, medical supplies, food, clothing, tractors and agricultural machinery were received from many sources, including the Governments of Great Britain, India, Canada, Australia, New Zealand, Malaya, Singapore, the U.S.A., France, Italy, Western Germany, the Soviet Union, Czechoslovakia, Israel, Saudi Arabia, Ethiopia, Burma, Siam, China and Japan, the Vatican, the World Health Organization, and many national Red Cross societies and private organizations. The British Government contributed £10,000 for relief, the sum being subsequently doubled as announced by Mr. Macmillan during his visit to Ceylon on Jan. 16-17 [see page 16042 A, first column].

Mr. Bandaranaike stated on Jan. 7 that several foreign Governments had offered Ceylon loans totalling 1,000,000,000 rupees (£75,000,000) to repair the damage caused by the floods, and that the Government would probably accept them if 20 to 30 years were allowed for repayment. -(Times - Daily Telegraph - Manchester Guardian - New York Times - Soviet Embassy Press Department, London - Ceylon Government Information Department) **(Prev. rep. Earthquakes, 15808 B.)**

B. UNITED STATES. — Resignation of Mr. Stassen.

It was officially announced on Feb. 15 that Mr. Harold Stassen had resigned as Special Assistant to President Eisenhower on disarmament problems in order to seek the Republican nomination in the autumn election for the governorship of Pennsylvania. In accepting Mr. Stassen's resignation, the President said that he "deeply regretted" the loss of Mr. Stassen's services to the Administration.

Mr. Stassen had been Special Assistant to the President on disarmament since March 1955, and led the U.S. delegation in the protracted discussions of the U.N. Disarmament Sub-committee (the "London sub-committee"). It had become known that a wide divergence of views on the conduct of the disarmament negotiations had developed between Mr. Dulles and Mr. Stassen, the latter having been placed under the control and guidance of the State Department in March 1957.

It was announced in Washington on Feb. 27 that Mr. James Wadsworth, a member of the U.S. delegation at the United Nations, had been appointed successor to Mr. Stassen. It was stated that Mr. Wadsworth would report to Mr. Dulles and not to the President, and that he would not be known by Mr. Stassen's former designation of Special Assistant to the President. [The *New York Times* described Mr. Wadsworth's functions as those of "U.S. representative in future disarmament negotiations."] Mr. Wadsworth has been a prominent U.S. spokesman at the U.N. for several years past, and has taken part in many important debates.

The State Department also announced on the same date (Feb. 27) that Mr. Dulles had asked General Alfred M. Gruenther, Mr. Robert M. Lovett, Mr. John J. McCloy, and General Walter Bedell Smith to advise him on disarmament policy in their private capacities. General Gruenther was Supreme Allied Commander, Europe, from 1953-56 and is now president of the American Red Cross; Mr. Lovett, Secretary of Defence from 1951-53, is a partner in the Wall Street firm of Brown Brothers, Harriman and Co.; Mr. McCloy, chairman of the Chase Manhattan Bank (New York), was formerly U.S. High Commissioner in Germany and Assistant Secretary for War; and General Bedell Smith, vice-chairman of the American Machine and Foundry Company, was Chief of Staff to General Eisenhower during the war. (New York Times - New York Herald Tribune)

C. NIGERIA. — First Oil Exports to Europe.

The first bulk shipment of Nigerian oil for export to Europe was pumped into the British tanker *Hemifusus* at Port Harcourt on Feb. 17, for delivery at Rotterdam. The oil came from the two oilfields now working in Nigeria—at Oloibiri (Eastern Region) and Afam (30 miles north of Port Harcourt). Oil from the five Oloibiri wells is transported to Port Harcourt by barge, whilst Afam is linked with Port Harcourt by a pipeline. The oilfields are owned by Shell-B.P. Petroleum Development Co. of Nigeria, in which the Royal Dutch-Shell group and British Petroleum Ltd. have a joint interest. Drilling of the first well began in September 1951.

(Times - Manchester Guardian)

A. UNITED NATIONS. — Twelfth Session of General Assembly. - Debates and Resolutions.

The 12th session of the U.N. General Assembly, which opened in New York on Sept. 17, 1957 (see 15818 A), ended on Dec. 14 after disposing of an agenda of about 65 items. The subjects discussed included Algeria, Cyprus, the New Guinea question, Hungary, the U.N. Emergency Force in the Middle East, the disarmament problem, the South African Government's *apartheid* policy, the status of South-West Africa, the Palestine Arab refugees, and Korea. The Syrian-Turkish dispute was also added to the agenda during the session.

Three of the principal subjects discussed—the Indonesian claim on Dutch New Guinea, the dispute between Syria and Turkey, and the disarmament question—are dealt with in earlier articles. [For New Guinea see 15931 A, page 15934 ; the Syrian-Turkish dispute, 15919 A ; disarmament, 15941 A, pages 15944-46.] Summaries are given below of the other principal subjects debated by the Assembly, and the resolutions adopted.

The Algerian Problem.

A protracted but inconclusive debate in the Political Committee resulted in the Algerian question going to the full General Assembly without any recommendation. As at the 11th session (see 15505 A), the full Assembly adopted a compromise resolution on Algeria without debate and without a dissenting vote. This resolution, sponsored by 15 countries, recalled the Assembly's resolution of Feb. 15, 1957 (see reference above) and (*a*) reiterated the Assembly's concern over the situation in Algeria ; (*b*) took note of the offer of good offices made by the King of Morocco and the President of Tunisia (see 15915 A) ; and (*c*) expressed " the wish that, in a spirit of effective co-operation, *pourparlers* will be entered into, and other appropriate means utilized, with a view to a solution in conformity with the principles and purposes of the U.N. Charter."

The Algerian question had been placed on the Assembly's agenda at the request of 21 Afro-Asian countries : Afghanistan, Ceylon, Egypt, Ethiopia, India, Indonesia, Iraq, Japan, Jordan, Lebanon, Libya, Morocco, Nepal, Pakistan, Persia, Philippines, Saudi Arabia, Sudan, Syria, Tunisia and Yemen. After recalling the resolution adopted at the 11th Assembly session, the 21 countries (in a joint *aide-mémoire*) drew attention to the continued " suffering and loss of human life " in Algeria and expressed regret that there had been " no indication . . . that any progress has been made towards achieving the purposes of the resolution." [The resolution referred to had expressed the hope for a " peaceful, just and democratic solution " of the Algerian problem, " in a spirit of co-operation " and in accordance with the principles of the U.N. Charter.]

The Political Committee began its debate on Algeria on Nov. 27, when a lengthy statement was made by M. Pineau, the French Foreign Minister.

M. Pineau emphasized that his participation in the debate was in no way inconsistent with his Government's standpoint, which it had consistently maintained, that the General Assembly was not competent to discuss the Algerian situation since this was solely within French domestic jurisdiction. In taking part in the debate, he proposed " to bring the truth of the Algerian question to the knowledge of international opinion, to stress the efforts we are making to achieve a peaceful settlement of a drama which has already caused too much bloodshed and too many tears, and to refute the calumnies levelled against us in order that we, in turn, may make our grievances heard."

The Algerian rebels (M. Pineau continued) had already lost on the military, psychological and political fronts, and knew that they had " no hope of staging a come-back " ; their only hope lay in " internationalizing " the conflict, and any " thoughtless interference " by the General Assembly would not only constitute a violation of the Charter but would also " have no practical result other than to risk postponing a solution that we all wish to find as soon as possible."

Despite the rejection of French offers to negotiate for an immediate cease-fire, France remained ready to negotiate a political settlement in the following three stages : (1) the opening of talks with the Algerian parties without any political pre-conditions ; (2) the holding of free elections, in which France would " take the initiative in inviting Governments of countries which are accustomed to democratic procedures to send as many observers as necessary " ; and (3) discussions with the duly elected representatives of the Algerian people " to decide upon the definitive institutions of Algeria."

While the French Government had no intention of equating Algerian nationalism with international Communism, M. Pineau pointed out that the Algerian Communist Party had participated in the rebellion in two ways : firstly, by specializing in " the organization of urban terrorism " ; and secondly, by successfully infiltrating into the F.L.N. terrorist bands. The Algerian Communist Party had used not only Moslem members but " especially members of European origin," who had " entered the fray in the hope that the triumph of the rebellion will lead to the setting-up of a regime of their own choice in Algeria." Were France to withdraw from Algeria, these Communist elements would be in the best position to seize power, since they were " the only truly disciplined forces involved in the rebellion " ; moreover, they would be able to rely on " powerful aid from foreign countries when they are ready to carry out their scheme." It was not contended that the Algerian rebels obeyed Communist orders alone, but " even were the rebellion to be sincerely opposed to the setting-up of a Communist regime in Algeria, it may one day, even unwillingly, turn out to be the Trojan Horse of Communism in North Africa."

M. Pineau charged that the rebellion had received considerable foreign assistance, much of it from " countries of the Near East." After referring to the anti-French radio campaigns in Egypt and Syria, and to the "constantly increasing shipments" of arms to the rebels from Egyptian sources, he alleged specifically (i) that the first orders for the rebellion had come from Cairo, with the unleashing on Nov. 1, 1954, of the first uprising in the Aurès ; and (ii) that the F.L.N. had been established in Cairo with the encouragement of the Egyptian authorities " and, to a large extent, on the orders and with the monies of the Egyptian Secret Service."

As regards the alleged arms deliveries, M. Pineau said that several " large shipments " had been made to Tunisian ports, whence they were secretly forwarded to Algeria. He went on to charge that assistance to the rebels had become " more and more overt " in Tunisia, until finally there had been set up in Tunis " a military headquarters of sorts that claims to direct operations throughout the whole of eastern Algeria." Rebel commandos from Tunisian bases were constantly infiltrating into Algeria, and " no sooner do they feel themselves threatened than they scurry back to the sanctuary of Tunisian soil." M. Pineau alleged also that the F.L.N. was " firmly entrenched " in eastern Morocco, whence it had been able to carry out raids into Algeria " in relative security " until the French Command had set up permanent field fortifications along the Algerian-Moroccan frontier.

In the course of his speech M. Pineau explained that one of the principal reasons why France could not accept the offer of good offices by the King of Morocco and President Bourguiba was because their joint communiqué had referred to the F.L.N. as the sole spokesman of the Algerian people. France, on the other hand, maintained that the " undisputed spokesmen " of the Algerian people could only be ascertained as the result of free elections. Moreover, although the Moroccan-Tunisian communiqué no longer referred to the " precondition of independence " for Algeria, it had replaced this by " the pre-condition of recognition of the sovereignty of Algeria—a less precise term than the other, perhaps, but bearing an absolutely identical juridical meaning." In view of these facts, and also of the aid received by the rebels from Tunisian and Moroccan territory, France was unable to accept the offer of good offices made by the two countries.

In conclusion, M. Pineau said that the Algerian situation should be seen within the context of the " Franco-North African Community " which it was France's desire to create. The vast economic resources of the Sahara, now being exploited, could mean " the beginning of a new economic era " from which France, the Algerian people, and the North African countries could all benefit. In mobilizing her efforts to exploit these resources, France did not intend to introduce " a neo-colonialism of the desert " but " to associate the neighbouring countries in the immense task of economic and social development so that they may be able to share in the results we hope to achieve."

In the ensuing debate, M. Omar Loutfi (Egypt) described M. Pineau's accusations as " replete with inaccuracies and falsehoods," alleging that " French propaganda " had sought " by all ways and means to make Egypt responsible for the war that has been going on in Algeria since 1954." The real explanation of the " cruel events " in Algeria, he added, was France's " refusal to recognize Algeria's rights and the struggle which the Algerian people are waging for independence against a French army 500,000 strong." In a more moderately-worded speech, M. Mongi Slim (Tunisia) also upheld the Algerian demand for independence but expressed his conviction that this could be achieved in a manner which would reconcile the rights and interests of all interested parties, including France ; he emphasized that the Tunisian-Moroccan offer of good offices represented a sincere attempt at reaching a just solution by mediation, and made a " categoric disclaimer " of M. Pineau's allegation that Algerian rebels were operating from Tunisian bases. M. Ahmed Laraki (Morocco) stressed that his country and Tunisia were not offering " arbitration " but " mediation " ; he rejected M. Pineau's contention that Morocco and Tunisia were too deeply involved in the matter to act as mediators, declaring that " France still persists in regarding this as an essentially domestic problem which only she can solve through unilateral action."

Forty-seven countries in all took part in the ten-day debate, in which the demand for Algerian independence was supported by many Afro-Asian nations (including India, Pakistan, Ceylon and Ghana) and also by the Communist countries. On the other hand, France was supported by Turkey, Japan, Israel, Portugal, and several Latin American countries, including Argentina, Uruguay and Peru. Mr. Cabot Lodge, for the U.S.A., commended the new French *loi-cadre* for Algeria and expressed the hope that the U.N. would " avoid any action that might hamper progress towards a peaceful and equitable solution." Unlike M. Pineau, however, Mr.

Lodge welcomed the mediation offer of King Mohammed and President Bourguiba, and expressed the U.S. Government's appreciation of "the worthy motives underlying this offer and the conciliatory spirit in which it was made."

An Afro-Asian resolution (presented by 17 nations, and in its final form incorporating Canadian, Irish and Norwegian amendments) declared that the principle of self-determination was "applicable to the Algerian people," and called for negotiations aimed at a solution "in accordance with the principles and purposes of the U.N. Charter."

A second resolution, presented by Spain and six Latin American countries, expressed the hope that a "peaceful, just and democratic solution" of the Algerian question would be found "through appropriate means" and in conformity with Charter principles. It noted that attempts had been made to settle the problem "both through the good offices of Heads of State and by French legislative measures."

The Political Committee's debate on Algeria ended on Dec. 6 without any resolution being adopted. The Afro-Asian resolution received 37 votes in favour and 37 against (a tie vote constituting a rejection of a resolution), whilst the seven-nation resolution was not taken to a vote.

In the full Assembly, the above-mentioned compromise resolution, sponsored by 15 countries, was introduced on Dec. 10 and adopted by 80 votes to nil with no abstentions, France not participating in the vote and South Africa being absent. As stated, the resolution was not debated. Its sponsors were Argentina, Brazil, Canada, Cuba, the Dominican Republic, India, the Irish Republic, Italy, Japan, Mexico, Norway, Persia, Peru, Spain, and Siam.

The compromise resolution was worked out at a series of conferences between the sponsors of the Afro-Asian resolution, the Spanish and Latin American resolution, and the delegations of Canada, the Irish Republic, and Norway, whose amendments had been incorporated in the Afro-Asian resolution.

Speaking after the vote, M. Pineau welcomed the resolution as a "testimony of confidence" that France would find for Algeria the "peaceful, democratic, and just solution" which the French people themselves desired. M. Mongi Slim also welcomed the resolution, but on diametrically opposite grounds—that it called on France "to follow the path of negotiations and accept the Tunisian and Moroccan offer of mediation," and that it "did not approve the French plan to solve the Algerian problem" [i.e. made no mention of the new French *loi-cadre* for Algeria].

The Cyprus Dispute.

A Greek resolution on Cyprus, amended in important respects by Canada, Chile, Denmark, and Norway, failed to obtain the necessary two-thirds majority in the General Assembly and was therefore not adopted. The voting was 31 in favour, 23 against, and 24 abstentions.

The Cyprus question was put on the agenda at the request of the Greek delegation. As originally worded, the item was presented by Greece as (*a*) "application under U.N auspices of the principle of equal rights and self-determination for the people of Cyprus," and (*b*) "violations of human rights and atrocities by the British colonial administration against the Cypriots." In the Assembly's Standing Committee, however, the Greek delegation accepted a Norwegian suggestion that the resolution should be presented simply as "the Cyprus question." In this form the resolution was placed on the agenda by 11 votes to nil, with four abstentions—Great Britain, France, the Soviet Union, and Czechoslovakia.

The British and Greek cases were presented in the Political Committee on Dec. 9 by Commander Allan Noble, U.K. Minister of State for Foreign Affairs, and M. Evangelos Averoff, the Greek Foreign Minister.

Commander Noble emphasized that H.M. Government were anxious to settle the Cyprus dispute in the spirit of the resolution adopted at the last Assembly session [see page 15473], and was ready to give the most sympathetic consideration to "any proposal which commends itself to both the Greek and Turkish Governments." The essence of any solution was that it should be acceptable to the people of Cyprus and to Britain, Greece, and Turkey, and H.M. Government had made great efforts to achieve such a solution. Britain, which bore responsibility for the government of Cyprus, had always supported the principle of self-determination and had sincerely tried to take constructive initiatives during the past year—e.g. by releasing Archbishop Makarios, by offering a safe-conduct out of Cyprus to all terrorists, and by relaxing the emergency regulations.

The active support given by Greece to the *enosis* movement and Eoka terrorism, however, had created an international problem. It had become clear that the terrorists took their orders from Archbishop Makarios, and for this reason the Archbishop had been deported and could not be allowed to return to the island at present. Nevertheless, Britain was prepared to discuss self-determination with a representative Cypriot delegation—which could include the Archbishop himself—on condition that any future arrangements provided for good government, internal security, and order in the island, and for the protection of the rights of all its inhabitants.

In supporting the principle of self-determination, H.M. Government had made it clear that this must apply equally to the Greek and Turkish communities in Cyprus. In the hope of making progress towards a compromise settlement, Britain had informally suggested to the Greek and Turkish Governments that they should get together and discuss the whole problem with open minds and without insisting in advance on any particular solution. H.M. Government had suggested that such a conference should be free to discuss, without prejudice, "every solution so far mooted"—including *enosis*, self-determination within a fixed time-limit, self-government leading to self-determination at an unspecified time, guaranteed independence, a condominium with plural nationality, partition, the maintenance of full British sovereignty, or any other solution that might be put forward. The Turkish Government had accepted this suggestion, but the Greek Government, while not rejecting the idea of a conference, had insisted that the basic outlines of a solution must first be agreed between the three Governments concerned.

Commander Noble concluded: "Bearing in mind our own responsibilities, the welfare of the peoples of Cyprus, the legitimate interest of Greece and Turkey in the future of the island, and the friendship between our three countries, we are convinced that there is room for compromise . . ."

M. Averoff claimed that the question at issue was the "abolition of colonialism" in Cyprus, declaring that there was "only one interested party—Cyprus and its people." Denouncing what he described as "certain practices of colonial oppression," he alleged that British troops had committed "atrocious acts" in Cyprus and said in this connexion: "The British people, a liberal and noble people, are not responsible for these acts which have been perpetrated by men wearing British uniforms. It is true that several emergency measures have been abolished and that the man chiefly responsible for them, Field-Marshal Harding, has been replaced by a man who enjoys an excellent reputation [i.e. Sir Hugh Foot, the new Governor of Cyprus]. But this is not a sufficient guarantee for the future . . ."

After accusing the British Government of "intransigence" on the Cyprus question, and alleging that it had taken "no serious steps" to implement the resolution adopted at the 11th session, M. Averoff expressed satisfaction that the British Labour Party had shown itself "sympathetic to the Cypriot cause." He added that the resolution on Cyprus adopted at the last conference of the Labour Party [containing a pledge of immediate self-determination for Cyprus if a Labour Government came to power] had aroused "feelings of admiration and gratitude" both in Greece and Cyprus.

In the ensuing debate M. Selim Sarper (Turkey) accused Greece of wishing to annex Cyprus outright, declaring that "all the actions, proposals, statements, and policies of the Greek Government, as well as of the Cypriot Orthodox Church, are aimed at . . . bringing about the annexation of Cyprus against the will of the Turkish Cypriots and in contradiction to treaties signed by Greece." A number of delegates - including Dr. Abdul Rahman (Malaya) and Mr. Gunewardene (Ceylon) - paid tribute to Britain's achievements in bringing independence to former non-self-governing peoples, and expressed confidence that a just solution would be found in Cyprus; Dr. Rahman said that the experience of Malaya had shown that Britain was "earnest and sincere in her desire to lead her dependent territories along the peaceful path to independence," while Mr. Gunewardene cited the examples of India, Pakistan, Ceylon, Burma, and Ghana in the same connexion. The Soviet delegate, M. Peive, called for "recognition of the rights of the Cypriots to self-determination, withdrawal of all foreign troops from the island, and the liquidation of all foreign military bases there." Mr. Cabot Lodge said that the U.S. Government maintained its belief that "quiet diplomacy" held the greatest hope for a solution of the Cyprus question.

By 33 votes to 20, with 25 abstentions, the Political Committee adopted a resolution on Dec. 12 which (1) reaffirmed the resolution adopted at the 11th Assembly session; (2) expressed "concern that more progress has not been made towards a solution of this problem"; (3) considered that the situation in Cyprus "is still fraught with danger and that a solution at the earliest possible time is required to preserve peace and stability in the area"; and (4) expressed the "earnest hope that further negotiations and discussions will be undertaken with a view to having the right of self-determination applied in the case of the people of Cyprus."

As originally submitted by M. Averoff, the resolution declared in its operative paragraph that the people of Cyprus should be "given the opportunity to determine their own future by the application of their right to self-determination." After various amendments had been suggested by Canada, Chile, Denmark, and Norway, and sub-amendments by M. Averoff, the resolution was finally presented in the form given above.

As stated, the resolution failed to secure acceptance in the General Assembly for lack of a two-thirds majority. Voting on the resolution took place on Dec. 14 with the following result:

For the Resolution (31 votes): Albania, Bolivia, Bulgaria, Byelorussia, Costa Rica, Czechoslovakia, Ecuador, Egypt, El Salvador, Ethiopia, Ghana, Greece, Guatemala, Haiti, Hungary, Iceland, Indonesia, Irish Republic, Lebanon, Panama, Poland, Rumania, Saudi Arabia, Soviet Union, Sudan, Syria, Tunisia, Ukraine, Uruguay, Yemen, Yugoslavia.

Against the Resolution (23 votes): Argentina, Australia, Belgium, Canada, Chile, Colombia, Denmark, Dominican Republic, France, Italy, Luxemburg, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Persia, Portugal, South Africa, Spain, Sweden, Turkey, United Kingdom.

Abstentions (24). Afghanistan, Austria, Brazil, Burma, Cambodia, Ceylon, China (Nationalist), Finland, Honduras, India, Iraq, Israel, Japan, Laos, Liberia, Malaya, Mexico, Nepal, Paraguay, Peru, Philippines, Siam, United States, Venezuela.

Absent (4): Cuba, Jordan, Libya, Morocco.

The Afro-Asian group and the Latin American group were divided on the resolution, although the Communist group voted for it *en bloc*. Mr. Cabot Lodge explained that the United States had abstained because the Cyprus question "involves the interests of three of our closest allies—Greece, Turkey, and the United Kingdom"; he added that "Cyprus is not the kind of problem which can be solved by U.N. deliberations in the absence of agreement among the parties."

In defiance of his Government's instructions, the Iraqi delegate (Dr. Hashim Jawad) voted for the resolution in the Political Committee, though abstaining in the General Assembly. On Dec. 23 the Iraqi Ambassador in Ankara presented his Government's apologies to the Turkish Prime Minister (M. Menderes) for Dr. Jawad's vote in the Political Committee, and subsequently told press correspondents that Iraq fully supported Turkey's views on Cyprus. It was announced in Baghdad two days later that Dr. Jawad had been recalled to Iraq for disobeying instructions and voting against Turkey.

The U.N. Emergency Force.

By 51 votes to 11, with 19 abstentions, the General Assembly approved a report on the U.N. Emergency Force in the Middle East (UNEF) presented by Dr. Hammarskjold, and adopted a resolution calling for contributions by member-countries for the continued upkeep and operation of the Force, as requested by the Secretary-General.

In his first report on the working of UNEF—a 47-page document issued on Oct. 12, 1957—Dr. Hammarskjold said that the Force "has become, and undoubtedly continues to be, one of the pre-conditions for the preservation of peace and quiet along the line between Egypt and Israel." The maintenance of this atmosphere of quiet, he added, was "indispensable to fruitful effort towards the removal of the major obstacles to peace in the Near East." At the same time the Secretary-General expressed concern at "the present inadequate and insecure basis of UNEF financing," pointing out that "this vital U.N. undertaking" might be "seriously jeopardized" unless it was assured of "the same degree of financial support as afforded to other U.N. activities which have as their purpose the maintenance of peace and security."
